TABLE OF CONTENTS

Section **Page No.**

1 EXECUTIVE SUMMARY

1-1 Introduction 1-1
1-2 Study Area 1-1
1-3 Criteria 1-2
1-4 Existing Sewer System 1-4
1-5 Ultimate Sewer System 1-7
1-6 Hydraulic Sewer Model 1-8
1-7 System Analysis 1-10
1-8 Capital Improvement Program 1-12

2 INTRODUCTION

2-1 Purpose 2-1
2-2 City History and Background 2-1
2-3 Previous Studies and Work Completed 2-2
2-4 Objectives and Scope of Work 2-4
2-5 Statewide General Waste Discharge Requirements 2-5
2-6 Future Regulations–Capacity, Management, Operation, and Maintenance (CMOM) ... 2-7
2-7 Government Accounting Standards Board Statement 34 (GASB 34) 2-8
2-8 Organization of Sewer Master Plan Report 2-9
2-9 Acknowledgements 2-10
2-10 Abbreviations 2-10

3 STUDY AREA

3-1 Purpose 3-1
3-2 Location 3-1
3-3 Topographical Description and Geology 3-1
3-4 Climate 3-5
3-5 Land Use 3-6
3-6 Population 3-12

4 CRITERIA

4-1 General 4-1
4-2 Unit Flow Factors 4-1
4-3 Peaking Factors 4-8
4-4 Inflow and Infiltration 4-9
4-5 Sewer Design Criteria 4-10
4-6 Pump Station Design Criteria 4-11
4-7 Service Life of Pipe and Lift Station Equipment 4-14
4-8 Criteria for Specific Plans and Development Subareas 4-14

5 EXISTING SEWER SYSTEM

5-1 General Description 5-1
5-2 Regional Facilities and Points of Connection 5-5
5-3 Sewersheds 5-8
5-4 Inverted Siphons 5-10

5-5 Flow Splits 5-12
5-6 Septic Tanks 5-13
5-7 Sewer Pump Stations 5-20

6 ULTIMATE SEWER SYSTEM
6-1 General Description 6-1
6-2 Existing and Projected Sewage Generation 6-1
6-3 Cooperative Agreement between City of Ontario and IEUA 6-5

7 HYDRAULIC SEWER MODEL
7-1 Hydraulic Model Software 7-1
7-2 Construction of Model Geometry 7-1
7-3 Missing Information 7-2
7-4 Split Manholes and Flow Patterns 7-3
7-5 Model Loads (Wastewater Flows) 7-4
7-6 Schools 7-10
7-7 High Water Users 7-11
7-8 Pump Stations 7-11
7-9 Holt Boulevard Trunk Sewer 7-19
7-10 Siphons 7-19

8 SYSTEM ANALYSIS
8-1 Hydraulic Analysis 8-1
8-2 Condition Assessment 8-5
8-3 Hot Spots 8-5
8-4 Sanitary Sewer Overflow (SSO) History 8-9
8-5 Maintenance Program 8-10

9 CAPITAL IMPROVEMENT PROGRAM
9-1 General 9-1
9-2 Capital Improvement Project Priorities 9-1
9-3 Capital Improvement Program 9-2
9-4 Old Model Colony Capital Improvement Project Descriptions 9-10
9-5 New Model Colony Capital Improvement Project Descriptions 9-16

LIST OF TABLES

Table **Page No.**
1-1 Ultimate Unit Flow Factors 1-3
1-2 Sewer System Criteria 1-5
1-3 City of Ontario Ultimate Sewage Generation 1-7
1-4 Old Model Colony Capital Improvement Projects 1-16
1-5 New Model Colony Proposed Sewers 1-20
2-1 Abbreviations 2-11
3-1 Existing Study Area Land Uses 3-6
3-2 Ultimate Study Area Land Uses 3-9
3-3 Future Buildout 3-11
4-1 Flow Monitoring Results 4-3

4-2 Calibrated Unit Flow Factors 4-5
4-3 Ultimate Unit Flow Factors 4-6
4-4 Minimum Sewer Slopes 4-11
4-5 Sewer System Criteria 4-13
4-6 Planning Criteria for Facility Useful Life 4-14
5-1 Regional Connection Locations 5-6
5-2 Existing Siphons 5-10
5-3 Flow Splits 5-12
5-4 Septic Tanks 5-15
5-5 Existing Land Use and Estimated Flows to Magnolia Pump Station 5-21
5-6 Existing Land Use and Estimated Flows to Haven Pump Station 5-23
6-1 City of Ontario Ultimate Sewage Generation 6-4
6-2 Ontario International Airport Sewage Load Estimates 6-5
6-3 Summary of Average Daily Wastewater Flow (ADWF) Capacities for Conveyances ... 6-6
7-1 Data Imported from GIS Files to Hydraulic Model 7-2
7-2 General Plan Land Use Buildout by TAZ 7-5
7-3 School Loads 7-10
7-4 Point Source Loadings for High Water Users – Existing Model 7-12
7-5 Point Source Loadings for High Water Users – Ultimate Model 7-16
8-1 Hydraulic Deficiencies 8-2
8-2 Hot Spot Locations 8-7
8-3 Sanitary Sewer Overflow Summary, Calendar Year 2007-September 2010 8-9
9-1 Old Model Colony Capital Improvement Projects 9-5
9-2 New Model Colony Proposed Systems 9-9

LIST OF FIGURES

Figure **Page No.**

1-1 Old Model Colony Capital Improvement Project Locations 1-15
1-2 Proposed New Model Colony Capital Improvement Projects 1-19
3-1 Regional Location Map 3-2
3-2 Soils Map and Drainage Channels 3-4
3-3 Seasonal Rainfall 1997-2010 3-5
3-4 Existing Land Use Map 3-7
3-5 Ultimate Land Use Map 3-10
3-6 City of Ontario Population History and Projections 3-13
4-1 Flow Monitoring Locations 4-2
4-2 Measured Flow Data 4-4
4-3 Peaking Formula Coefficient “a” 4-9
5-1 Existing Sewer System 5-2
5-2 Total Length of Gravity Sewer by Size 5-3
5-3 Total Length of Gravity Sewer by Year of Construction 5-4
5-4 Siphon and Split Manhole Locations 5-11
5-5 OMC Septic Tank Locations 5-14
5-6 Magnolia Pump Station 5-21
5-7 Magnolia Pump Station Tributary Area 5-22
5-8 Haven Pump Station Tributary Area 5-24

6-1 Ultimate Sewer System 6-2
6-2 Proposed New Model Colony Sewer System 6-3
7-1 Traffic Area Zone Boundaries 7-9
8-1 Capacity Deficiencies Identified by Hydraulic Model 8-4
8-2 Hot Spot Locations 8-6
9-1 Old Model Colony Capital Improvement Project Locations 9-4
9-2 Proposed New Model Colony Capital Improvement Projects 9-8

APPENDIX ***(See inside front cover for CD)***

A Flow Monitoring Data (November 2006 – December 3006)
B Flow Monitoring Data (November 2007)
C Technical Memo - Sewer Load Estimates
D Agreements with the City of Chino
E Cooperative Agreement with IEUA
F Info Sewer Models
G Hydraulic Model Input and Results
H Survey Data
I Archibald Trunk Siphon Study
J Brooks Street Sewer Feasibility Study
