

CITY OF ONTARIO PLANNING COMMISSION/ HISTORIC PRESERVATION MEETING AGENDA

October 27, 2020

Ontario City Hall
303 East "B" Street, Ontario, California 91764

6:30 PM

WELCOME to a meeting of the Ontario Planning/Historic Preservation Commission.

All documents for public review are on file in the Planning Department located at 303 E. B Street, Ontario, CA 91764.

- *Anyone wishing to speak during public comment or on a particular item should fill out a green slip and submit it to the Secretary.*
- *Comments will be limited to 5 minutes. Speakers will be alerted when their time is up. Speakers are then to return to their seats and no further comments will be permitted.*
- *In accordance with State Law, remarks during public comment are to be limited to subjects within the Commission's jurisdiction. Remarks on other agenda items will be limited to those items.*
- *Remarks from those seated or standing in the back of the chambers will not be permitted. All those wishing to speak including Commissioners and Staff need to be recognized by the Chair before speaking.*
- *The City of Ontario will gladly accommodate disabled persons wishing to communicate at a public meeting. Should you need any type of special equipment or assistance in order to communicate at a public meeting, please inform the Planning Department at (909) 395-2036, a minimum of 72 hours prior to the scheduled meeting.*
- *Please turn off all communication devices (phones and beepers) or put them on non-audible mode (vibrate) so as not to cause a disruption in the Commission proceedings.*

ROLL CALL

PLEDGE OF ALLEGIANCE TO THE FLAG

ANNOUNCEMENTS

- 1) Agenda Items
- 2) Commissioner Items

PUBLIC COMMENTS

Citizens wishing to address the Planning/Historic Preservation Commission on any matter that is not on the agenda may do so at this time. Please state your name and address clearly for the record and limit your remarks to five minutes.

Please note that while the Planning/Historic Preservation Commission values your comments, the Commission cannot respond nor take action until such time as the matter may appear on the forthcoming agenda.

CONSENT CALENDAR ITEMS

All matters listed under CONSENT CALENDAR will be enacted by one summary motion in the order listed below. There will be no separate discussion on these items prior to the time the Commission votes on them, unless a member of the Commission or public requests a specific item be removed from the Consent Calendar for a separate vote. In that case, the balance of the items on the Consent Calendar will be voted on in summary motion and then those items removed for separate vote will be heard.

A-01. MINUTES APPROVAL

Planning/Historic Preservation Commission Minutes of September 22, 2020, approved as written.

PUBLIC HEARING ITEMS

For each of the items listed under PUBLIC HEARING ITEMS, the public will be provided an opportunity to speak. After a staff report is provided, the chairperson will open the public hearing. At that time the applicant will be allowed five (5) minutes to make a presentation on the case. Members of the public will then be allowed five (5) minutes each to speak. The Planning/Historic Preservation Commission may ask the speakers questions relative to the case and the testimony provided. The question period will not count against your time limit. After all persons have spoken, the applicant will be allowed three minutes to summarize or rebut any public testimony. The chairperson will then close the public hearing portion of the hearing and deliberate the matter.

HISTORIC PRESERVATION COMMISSION ITEMS

- B. MILLS ACT CONTRACT REVIEW FOR FILE NO. PHP20-012:** A Mills Act Contract for a 2,160 square foot Spanish Colonial Revival style single-family residence, a Contributor within the Euclid Avenue Historic District known as the Dr. G. Ben Henke House, located at 1458 North Euclid Avenue within the LDR-5 (Low Density Residential-2.1 to 5.0 du/ac) and EA (Euclid Avenue Overlay) zoning districts. The

Contract is not considered a project pursuant to Section 21065 of the CEQA Guidelines. (APN: 1047-352-14) **submitted by Steven and Sylvia Romero. City Council action is required.**

1. CEQA Determination

No action necessary – Not a project pursuant to CEQA Guidelines Section § 21065

2. File No. PHP20-012 (Mills Act Contract)

Motion to recommend Approval/Denial

PLANNING COMMISSION ITEMS

C. ENVIRONMENTAL ASSESSMENT, GENERAL PLAN AMENDMENT, AND SPECIFIC PLAN AMENDMENT FOR FILE NOS. PGPA19-008 AND PSPA19-011: A General Plan Amendment (File No. PGPA19-008) to modify the Policy Plan (General Plan) Land Use Plan (Exhibit LU-01) component of The Ontario Plan, changing the land use designation on 10.49 acres of land, from School to Low-Medium Density Residential, in conjunction with modification of the Future Buildout Table (Exhibit LU-03) to be consistent with the proposed land use designation change, and an Amendment to The Avenue Specific Plan (File No. PSPA19-011), changing the land use designation on the project site, from School to Low-Medium Density Residential, generally located at the northeast corner of La Avenida Drive and Manitoba Place. Staff has prepared an Addendum to The Ontario Plan (File No. PGPA06-001) Environmental Impact Report (SCH# 2008101140), certified by the City Council on January 27, 2010. This application introduces no new significant environmental impacts. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP); (APN: 0218-652-27) **submitted by Ontario Schaefer Holdings, LLC. City Council action is required. This item was continued from the September 22, 2020 Planning Commission meeting.**

1. CEQA Determination

Motion to recommend Approval/Denial of an Addendum to a previous EIR

2. File No. PGPA19-008 (General Plan Amendment)

Motion to recommend Approval/Denial

3. File No. PSPA19-011 (Specific Plan Amendment)

Motion to recommend Approval/Denial

D. ENVIRONMENTAL ASSESSMENT AND TENTATIVE TRACT MAP REVIEW FOR FILE NO. PMTT19-015 (TM 20298): A Tentative Tract Map to subdivide 10.49

acres of land into 106 numbered lots and 19 lettered lots, located at the northeast corner of La Avenida Drive and Manitoba Place, within the proposed Low-Medium Density land use district of The Avenue Specific Plan. Staff has prepared an Addendum to The Ontario Plan (File No. PGPA06-001) EIR (SCH# 2008101140) certified by City Council on January 27, 2010. This application introduces no new significant environmental impacts, and all previously-adopted mitigation measures are a condition of project approval. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP); (APN: 0218-652-27) **submitted by Ontario Schaefer Holdings, LLC.**

1. CEQA Determination

Motion to recommend Approval/Denial of an Addendum to a previous EIR

2. File No. PMTT19-015 (TM 20298) (Tract Map)

Motion to Approve/Deny

E. ENVIRONMENTAL ASSESSMENT AND DEVELOPMENT AGREEMENT REVIEW FOR FILE NO. PDA20-001:

A Development Agreement (File No. PDA20-001) between the City of Ontario and Ontario Schaefer Holdings, LLC, to establish the terms and conditions for the development of Tentative Tract Map 20298 (File No. PMTT19-015), a 10.49 acre property located at the northeast corner of La Avenida Drive and Manitoba Place, within the proposed Low-Medium Density Residential land use district of The Avenue Specific Plan. Staff has prepared an Addendum to The Ontario Plan (File No. PGPA06-001) EIR (SCH# 2008101140) certified by City Council on January 27, 2010. This application introduces no new significant environmental impacts, and all previously adopted mitigation measures are a condition of project approval. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP); (APN: 0218-652-27). **Submitted by Ontario Schaefer Holdings, LLC. City Council action is required.**

1. CEQA Determination

Motion to recommend Approval/Denial of an Addendum to a previous EIR

2. File No. PDA20-001 (Development Agreement)

Motion to recommend Approval/Denial

F. ENVIRONMENTAL ASSESSMENT AND DEVELOPMENT AGREEMENT REVIEW FOR FILE NO. PDA19-001:

A Development Agreement (File No. PDA19-001) between the City of Ontario and Euclid Land Venture, LLC, to establish the terms and conditions for the development of Tentative Parcel Map 20016 (File No. PMTT18-011), a 85.6 acre property located at the northeast corner of Merrill Avenue and Euclid

Avenue, within the Industrial and Business Park land use districts of the Ontario Ranch Business Park Specific Plan. The environmental impacts of this project were previously reviewed in conjunction with the Ontario Ranch Business Park Specific Plan, for which an Environmental Impact Report (SCH# 2019050018) was certified by the City Council on September 15, 2020. This application introduces no new significant environmental impacts. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP). The project site is also located within the Airport Influence area of Chino Airport and is consistent with policies and criteria set forth within the 2011 California Airport Land Use Planning Handbook published by the California Department of Transportation, Division of Aeronautics; (APNs: 1054-011-01, 1054-011-02, 1054-011-04; 1054-021-01, 1054-021-02; 1054-271-01, 1054-271-02, 1054-271-03, 1054-281-01, 1054-281-02, and 1054-281-03) **submitted by Euclid Land Venture, LLC. City Council action is required.**

1. CEQA Determination

No action necessary – use of previous EIR

2. File No. PDA19-001 (Development Agreement)

Motion to recommend Approval/Denial

G. ENVIRONMENTAL ASSESSMENT, TENTATIVE PARCEL MAP, AND DEVELOPMENT PLAN REVIEW FOR FILE NOS. PMTT18-011 (TPM 20016) AND PDEV18-036:

A Parcel Map (File No. PMTT18-011, TPM20016) to subdivide 85.6 acres of land into eight parcels to facilitate a Development Plan (File No. PDEV18-036) to construct three Industrial buildings totaling 1,447,123 square feet and five Business Park buildings totaling 105,624 square feet, located at the northeast corner of Merrill and Euclid Avenues, within the Industrial and Business Park land use districts of the Ontario Ranch Business Park Specific Plan. The environmental impacts of this project were previously reviewed in conjunction with the Ontario Ranch Business Park Specific Plan, for which an Environmental Impact Report (SCH# 2019050018) was certified by the City Council on September 15, 2020. This application introduces no new significant environmental impacts. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP). The project site is also located within the Airport Influence area of Chino Airport and is consistent with policies and criteria set forth within the 2011 California Airport Land Use Planning Handbook published by the California Department of Transportation, Division of Aeronautics; (APNs: 1054-011-01, 1054-011-02, 1054-011-04; 1054-021-01, 1054-021-02; 1054-271-01, 1054-271-02, 1054-271-03, 1054-281-01, 1054-281-02, and 1054-281-03) **submitted by Euclid Land Venture, LLC.**

1. CEQA Determination

No action necessary – use of previous EIR

2. File No. PMTT18-011 (PM 20016) (Parcel Map)

Motion to Approve/Deny

3. File No. PDEV18-036 (Development Plan)

Motion to Approve/Deny

H. ENVIRONMENTAL ASSESSMENT, TENTATIVE PARCEL MAP AND DEVELOPMENT PLAN REVIEW FOR FILE NO(S). PMTT20-001 AND PDEV20-001:

A Tentative Parcel Map (File No. PMTT20-001/TPM 20187) to subdivide 15.74 acres of land into 4 numbered parcels in conjunction with a Development Plan (File No. PDEV20-001) to construct 4 industrial buildings totaling 355,254 square feet located on the southeast corner of Grove Avenue and Francis Street within the Business Park land use designation of the Grove Avenue Specific Plan. The environmental impacts of this project were previously analyzed with The Ontario Plan (File No. PGPA06-001) Environmental Impact Report (SCH# 2008101140) that was certified by the City Council on January 27, 2010. This application introduces no new significant environmental impacts, and all previously adopted mitigation measures are a condition of project approval. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP). (APNs: 113-451-14 & 113-451-27) **submitted by EBS Realty Partners, LLC.**

1. CEQA Determination

No action necessary – use of previous EIR

2. File No. PMTT20-001 (PM 20187) (Parcel Map)

Motion to Approve/Deny

3. File No. PDEV20-001 (Development Plan)

Motion to Approve/Deny

I. ENVIRONMENTAL ASSESSMENT, GENERAL PLAN AMENDMENT, SPECIFIC PLAN AMENDMENT AND ZONE CHANGE REVIEW FOR FILE NOS. PGPA19-007, PSPA19-010 AND PZC19-002 :

A request for the following entitlements: 1) A General Plan Amendment (File No. PGPA19-007) to modify the Policy Plan (General Plan) Land Use Plan (Exhibit LU-01) component of The Ontario Plan, changing the land use designation of approximately 41 acres of land from Mixed-Use (Hamner/SR-60 Area 12) to 7.6 acres of General Commercial and 33.75 acres of Industrial; 3) Modify the Future Buildout Table (Exhibit LU-03) to be consistent with the land use designation changes; and 3) Repeal of the Tuscana Village Specific Plan (File No. PSPA19-010); and 4) A zone change (File No. PZC19-002) from LDR-5 (Low Density Residential), Community Commercial and Specific Plan to 33.75 acres of Light Industrial and 7.6 acres of Community Commercial. The project site is located on the northwest corner of Riverside Drive and Milliken Avenue. Staff has prepared an

Addendum to The Ontario Plan (File No. PGPA06-001) EIR (SCH# 2008101140) certified by City Council on January 27, 2010. This application introduces no new significant environmental impacts, and all previously-adopted mitigation measures are a condition of project approval. The proposed project is located within the Airport Influence Area of Ontario International Airport, and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP); (APNs: 1083-361-01, 1083-361-04 & 1083-361-07) **submitted by Toscana Square, LLC c/o Orbis Real Estate Partners. City Council action is required.**

1. CEQA Determination

Motion to recommend Approval/Denial of an Addendum to a previous EIR

2. File No. PGPA19-007 (General Plan Amendment)

Motion to recommend Approval/Denial

3. File No. PSPA19-010 (Specific Plan Amendment)

Motion to recommend Approval/Denial

4. File No. PZC19-002 (Zone Change)

Motion to recommend Approval/Denial

J. ENVIRONMENTAL ASSESSMENT, TENTATIVE PARCEL MAP AND DEVELOPMENT PLAN REVIEW FOR FILE NOS. PMTT19-018 AND PDEV19-059: A Tentative Parcel Map (File No. PMTT19-018/TPM 20177) to subdivide approximately 20 acres of land into 7 numbered parcels in conjunction with a Development Plan (File No. PDEV19-059) to construct 3 industrial buildings totaling 295,991 square feet located on the northwest corner of Riverside Drive and Milliken Avenue within the proposed Community Commercial and Light Industrial zoning districts. Staff has prepared an Addendum to The Ontario Plan (File No. PGPA06-001) EIR (SCH# 2008101140) certified by City Council on January 27, 2010. This application introduces no new significant environmental impacts, and all previously adopted mitigation measures are a condition of project approval. The proposed project is located within the Airport Influence Area of Ontario International Airport, and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP); (APN: 1083-361-01) **submitted by Toscana Square, LLC c/o Orbis Real Estate Partners.**

1. CEQA Determination

Motion to recommend Approval/Denial of an Addendum to a previous EIR

2. File No. PMTT19-018 (PM 20177) (Parcel Map)

Motion to Approve/Deny

3. File No. PDEV19-059 (Development Plan)

Motion to Approve/Deny

K. ENVIRONMENTAL ASSESSMENT, DEVELOPMENT PLAN REVIEW AND CONDITIONAL USE PERMIT FOR FILE NOS. PDEV20-012 AND PCUP20-009:

A Development Plan (File No. PDEV20-012) to construct a 3,062 square foot convenience store (7-Eleven), an ancillary drive-thru car wash and fueling station in conjunction with a Conditional Use Permit (File No. PCUP20-009) to establish alcoholic beverage sales for a Type 20 ABC license (Off-Sale Beer and Wine) on 1.25 acres of land, located on the northwest corner of Riverside Drive and Milliken Avenue within the proposed Community Commercial zoning district. Staff has prepared an Addendum to The Ontario Plan (File No. PGPA06-001) EIR (SCH# 2008101140) certified by City Council on January 27, 2010. This application introduces no new significant environmental impacts, and all previously-adopted mitigation measures are a condition of project approval. The proposed project is located within the Airport Influence Area of Ontario International Airport, and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP); (APN: 1083-361-01) **submitted by Toscana Square, LLC c/o Orbis Real Estate Partners.**

1. CEQA Determination

Motion to recommend Approval/Denial of an Addendum to a previous EIR

2. File No. PCUP20-009 (Conditional Use Permit)

Motion to Approve/Deny

3. File No. PDEV20-012 (Development Plan)

Motion to Approve/Deny

L. ENVIRONMENTAL ASSESSMENT AND DEVELOPMENT PLAN REVIEW FOR FILE NO. PDEV20-013:

A Development Plan (File No. PDEV20-013) to construct a 2,490 square foot commercial building for a fast food restaurant (Starbucks) with a drive-thru facility on 1.21 acres of land, located on the northwest corner of Riverside Drive and Milliken Avenue within the proposed Community Commercial zoning district. Staff has prepared an Addendum to The Ontario Plan (File No. PGPA06-001) EIR (SCH# 2008101140) certified by City Council on January 27, 2010. This application introduces no new significant environmental impacts, and all previously-adopted mitigation measures are a condition of project approval. The proposed project is located within the Airport Influence Area of Ontario International Airport, and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP); (APN: 1083-361-01) **submitted by submitted by Toscana Square, LLC c/o Orbis Real Estate Partners.**

1. CEQA Determination

Motion to recommend Approval/Denial of an Addendum to a previous EIR

2. File No. PDEV20-013 (Development Plan)

Motion to Approve/Deny

M. ENVIRONMENTAL ASSESSMENT AND DEVELOPMENT CODE AMENDMENT REVIEW FOR FILE NO. PDCA18-003:

A Development Code Amendment proposing to: [1] revise current provisions regarding the regulation of Accessory Dwelling Units, replacing an Urgency Ordinance previously approved by the City Council on January 21, 2020; [2] revise current provisions regarding the MU-1 (Downtown Mixed Use) zoning district, to facilitate the establishment of the Downtown District Plan; [3] establish new provisions regarding the regulation of small lot infill subdivisions, which are proposed to be allowed in Mixed Use zoning districts and the MDR-11 (Low-Medium Density Residential – 5.1 to 11.0 DUs/Acre), MDR-18 (Medium Density Residential – 11.1 to 18.0 DUs/Acre), MDR-25 (Medium-High Density Residential – 18.1 to 25.0 DUs/Acre), and HDR-45 (High Density Residential – 25.1 to 45.0 DUs/Acre) zoning districts; [4] revise current provisions regarding Massage Services and Massage Establishments, establishing that such uses are subject to Administrative Use Permit issuance and requirements; and [5] modify certain Development Code provisions to include various clarifications and interpretations, including Chapter 2.0 (Administration and Procedures), Chapter 4.0 (Permits, Actions and Decisions), Chapter 5.0 (Zoning and Land Use), Chapter 6.0 (Development and Subdivision Regulations), Chapter 8.0 (Sign Regulations), and Chapter 9.0 (Definitions and Glossary). The proposed Development Code Amendment is exempt from the requirements of the California Environmental Quality Act (CEQA) and the guidelines promulgated thereunder, pursuant to Section 15061(b)(3) of the CEQA Guidelines. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP). Furthermore, the project site is located within the Airport Influence area of Chino Airport and is consistent with policies and criteria set forth within the 2011 California Airport Land Use Planning Handbook published by the California Department of Transportation, Division of Aeronautics; **City Initiated. City Council action is required. This item was continued from the August 25, 2020, Planning Commission meeting. Continued from the September 27, 2020, meeting.**

1. CEQA Determination

No action necessary – Exempt: CEQA Guidelines Section § 15061(b)(3)

2. File No. PDCA18-003 (Development Code Amendment)

Motion to recommend Approval/Denial

MATTERS FROM THE PLANNING/HISTORIC PRESERVATION COMMISSION

- 1) Old Business
 - Reports From Subcommittees
 - Historic Preservation (Standing): Met on October 8, 2020
- 2) New Business
- 3) Nominations for Special Recognition

DIRECTOR'S REPORT

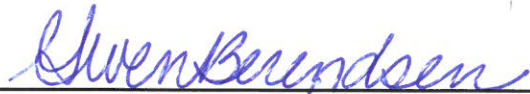

- 1) Monthly Activity Report

If you wish to appeal any decision of the Planning/Historic Preservation Commission, you must do so within ten (10) days of the Commission action. Please contact the Planning Department for information regarding the appeal process.

If you challenge any action of the Planning/Historic Preservation Commission in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice, or in written correspondence delivered to the Planning/Historic Preservation Commission at, or prior to, the public hearing.

I, Gwen Berendsen, Administrative Assistant, of the City of Ontario, or my designee, hereby certify that a true, accurate copy of the foregoing agenda was posted on **Friday, October 23, 2020**, at least 72 hours prior to the meeting per Government Code Section 54954.2 at 303 East "B" Street, Ontario.

Gwen Berendsen, Secretary Pro Tempore

Rudy Zeledon, Planning Director
Planning/Historic Preservation
Commission Secretary

HISTORIC PRESERVATION MEETING**

MINUTES

September 22, 2020

REGULAR MEETING: City Hall, 303 East B Street
Via ZOOM Called to order by Chairman Willoughby at 6:30 PM in honor of the retiring Planning Director, Cathy Wahlstrom and her years of services to the City of Ontario and the planning department.

COMMISSIONERS

Present via Teleconference: Chairman Willoughby, Vice-Chairman DeDiemar, Gage, Gregorek, Reyes, and Ricci

Absent: None

OTHERS PRESENT: Community Development Executive Director Murphy, Planning Director Wahlstrom, Assistant Planning Director Zeledon, City Attorney Otto, Principal Planner Mercier, Senior Planner D. Ayala, Senior Planner Mejia, Associate Planner Antuna, Assistant Planner Vaughn, Planning Intern Carranza, Assistant City Engineer Lee, and Planning Secretary Berendsen

PLEDGE OF ALLEGIANCE TO THE FLAG

The Pledge of Allegiance was led by Commissioner Reyes.

SPECIAL CEREMONIES

Each Commissioner thanked Ms. Wahlstrom for her service, knowledge, great qualities, and the work she has done within the city and stated how they would miss her, and relayed stories of memories they had with her.

Mr. Murphy stated Cathy is always very gracious and passionate at what she does, not only with her staff, but with the City. She has a background in anthropology, but planning is her passion, and she has been involved in a lot of projects from the General Plan to the driving force behind the Historic Preservation program and making sure we were looking to the future as well as to the past and making sure the cultural resources are here for generations to come. He explained how she became the Planning Director and how she was a rock star for the City of Ontario. He stated the historical knowledge she has is invaluable and she will be missed and there are others willing to step up, because of her mentoring.

Ms. Wahlstrom stated she appreciated working with the commissioners, staff, BB& K associates, and collaborative community partners and felt so privileged to work in a premier city where collectively we have made a difference, one project and decision at a time. She stated the great

leadership will continue with Mr. Murphy and Mr. Zeledon and thanked everyone for their friendship and partnership.

Mr. Zeledon stated this has been a crazy busy year and with COVID, Cathy with her mentorship and leadership, has been the glue to keep us all together been. He stated we have been blessed to work under such a smart, incredible person and the fun times she brought to the workplace which made it so much better. He stated that she was not only a leader but also a friend and will be missed, but she has a bright new chapter in her life. He stated we wouldn't be where we are without her and the mentoring she did.

Mr. Murphy stated Mr. Zeledon will be the new Planning Director and this transition, although bittersweet, will be smooth and we are in good hands moving forward.

ANNOUNCEMENTS

Ms. Wahlstrom stated that Items G & H have been requested to be continued to the October 27, 2020 Planning Commission meeting.

PUBLIC COMMENTS

Ms. Mejia stated there were no callers wishing to speak at this time.

CONSENT CALENDAR ITEMS

Mr. Gregorek stated he will recuse himself from Item A-02, as his firm has done work on the project.

A-01. MINUTES APPROVAL

Planning/Historic Preservation Commission Minutes of August 25, 2020, approved as written.

It was moved by Reyes, seconded by Gage, to approve the Planning Commission Minutes of August 25, 2020, as written. Roll call vote: AYES, DeDiemar, Gage, Gregorek, Reyes, Ricci and Willoughby; NOES, none; RECUSE, none; ABSENT, none. The motion was carried 6 to 0.

A-02. ENVIRONMENTAL ASSESSMENT AND DEVELOPMENT PLAN REVIEW FOR FILE NO. PDEV20-006:

A Development Plan to construct 226 single-family dwellings on 53.79 acres of land generally located at the northwest corner of Haven and Bellegrave Avenues, within Planning Areas 28 (Conventional Medium Lot) and 29 (Conventional Medium Lot) of the Subarea 29 Specific Plan. The environmental impacts of this project were previously reviewed in conjunction with an Addendum to the Subarea 29 Specific Plan Environmental Impact Report (File No. PSPA14-002, SCH #2004011009), certified by the City Council on April 21, 2015. This project introduces no new significant environmental impacts. The proposed project is located within the Airport Influence Area of Ontario International Airport, and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP). The project site is also located within the Airport Influence area of Chino Airport and is consistent with policies and criteria set forth within the 2011

California Airport Land Use Planning Handbook published by the California Department of Transportation, Division of Aeronautics. (APNs: 0218-321-17 and 0218-321-30) **submitted by Lennar Homes of California, Inc.**

PLANNING COMMISSION ACTION

It was moved by DeDiemar, seconded by Reyes, to adopt a resolution to approve the Development Plan, File No., PDEV20-006, subject to conditions of approval. Roll call vote: AYES, DeDiemar, Gage, Reyes, Ricci and Willoughby; NOES, none; RECUSE, Gregorek; ABSENT, none. The motion was carried 5 to 0.

HISTORIC PRESERVATION / PLANNING COMMISSION ITEMS

- B. ENVIRONMENTAL ASSESSMENT AND HISTORIC DISTRICT DESIGNATION REVIEW FOR FILE NO. PHP18-028:** A request for a Local Historic District Designation of the Graber Olive House Historic District as Historic District No. 8, located at the northeast corner of East Fourth Street and North Columbia Avenue, within the College Park Historic District, at 301 East Fourth Street, 315 East Fourth Street, 405 East Fourth Street, and 406 East Harvard Place, within the LDR-5 (Low Density Residential – 2.1 to 5.0 DU/Acre) zoning district. The request is not a “Project” pursuant to Section 21065 of the CEQA Guidelines; (APNs: 1047-543-01, 1047-543-31, 1047-543-30, 1047-543-20) **submitted by Clifford Graber II. This item was continued from the August 25, 2020 Planning Commission meeting. City Council action required.**
- C. ENVIRONMENTAL ASSESSMENT LANDMARK DESIGNATION REVIEW FOR FILE NO. PHP18-029:** A request for a Local Landmark Designation of a single-family residence, a Contributor to the Designated College Park Historic District, located at 301 East Fourth Street, within the LDR-5 (Low Density Residential – 2.1 to 5.0 DU/Acre) zoning district. The request is not a “Project” pursuant to Section 21065 of the CEQA Guidelines; (APN: 1047-543-01) **submitted by Clifford Graber II. This item was continued from the August 25, 2020 Planning Commission meeting. City Council action required.**

Planning Intern Carranza, presented the staff report. She described the location and the history of the Graber Olive House, and the resources that are included within the proposed district. She described the architecture of the Graber Olive House and its historical significance. She stated that staff is recommending the Historic Preservation Commission recommend approval for File Nos. PHP18-028 and PHP18-029, pursuant to the facts and reasons contained in the staff report and attached resolution, and subject to the conditions of approval.

No one responded.

PUBLIC TESTIMONY

Ms. Mejia stated there were no callers on the line for this item.

As there was no one else wishing to speak, Chairman Willoughby closed the public

testimony

Mr. Gage stated the Graber Olive house is deserving of the Historic District and Landmark Designation for the home. He stated the architecture is amazing, and the history of the people and family, which were very involved in the community and with the Ontario Heritage home tours, always there to sell tickets and have really been a part of the community.

Mr. Gregorek stated these are well deserving and the presentation was fantastic, as he learned things that he didn't even know about this gem for the city and that Graber Olives has always been supportive of the community and glad it has been brought forward as it is a great asset to the City of Ontario.

Ms. DeDiemar thanked staff for a wonderful presentation, which was factual and informative.

Mr. Reyes stated the staff presentation was great and that he appreciated the site plan to help follow along and that this is also a historical landscape and a true example of urban farming, and is well deserving not only within our city but should be recognized state and even nationally for its historic value.

Mr. Ricci agreed with the other commissioners and stated he appreciates the care the Graber's put into the property and is thankful for Ontario Heritage and the tours they have.

Mr. Willoughby stated very few cities in our entire state, can say they have a continual family owned business within their city for over 100 years. He stated he was glad to see this going forward and honored to have the Graber family and the Graber House as part of our city and agrees it deserves state recognition as well.

HISTORIC PRESRVATION COMMISSION ACTION

It was moved by Gage, seconded by DeDiemar, to recommend adoption of a resolution to approve the Local Historic District Designation, File No., PHP18-028, subject to conditions of approval. Roll call vote: AYES, DeDiemar, Gage, Gregorek, Reyes, Ricci and Willoughby; NOES, none; RECUSE, none; ABSENT, none. The motion was carried 6 to 0.

It was moved by Gregorek, seconded by Ricci, to recommend adoption of a resolution to approve the Landmark Designation, File No., PHP18-029, subject to conditions of approval. Roll call vote: AYES, DeDiemar, Gage, Gregorek, Reyes, Ricci and Willoughby; NOES, none; RECUSE, none; ABSENT, none. The motion was carried 6 to 0.

- D. ENVIRONMENTAL ASSESSMENT, GENERAL PLAN AMENDEMENT, AND ZONE CHANGE REVIEW FOR FILE NOS. PGPA19-009 AND PZC19-003:** A General Plan Amendment (File No. PGPA19-009) to modify the Land Use Map (Exhibit LU-01) component of The Ontario Plan, changing the land use designation from Rural Residential to Low-Medium Density Residential on 0.21-acre of land and modify the Future Buildout Table (Exhibit LU-03) to be consistent with the proposed land use designation change, and a Zone Change on the project site (File No. PZC19-003), from AR-2 (Residential-Agricultural – 0 to 2.0 DUs/Acre) to MDR-11 (Medium Density

Residential – 5.1 to 11.0 DUs/Acre), generally located west of 1524 and 1526 South Euclid Avenue. Staff has prepared an Addendum to The Ontario Plan (File No. PGPA06-001) Environmental Impact Report (SCH# 2008101140), certified by the City Council on January 27, 2010. This application introduces no new significant environmental impacts. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP); (APN: 1050-061-16) **submitted by Blaise D’Angelo. This item was continued from the August 25, 2020 Planning Commission meeting. City Council action is required.**

Associate Planner Antuna, presented the staff report. She described the location and the surrounding area. She stated that the property is land locked and described the proposed land use. She stated noticing was sent out and explained the comments received. She stated that staff is recommending the Planning Commission recommend approval for File Nos. PGPA19-009 and PZC19-003, pursuant to the facts and reasons contained in the staff report and attached resolution, and subject to the conditions of approval.

No one responded.

PUBLIC TESTIMONY

Mr. Blaise D’Angelo, the applicant spoke and stated his family has owned property of Euclid Ave for the last 42 years and his father purchased the property in 1978 and operated a care facility until 2016, when his father passed away and they decided to keep the property and clear up the zoning and address the housing need in the community. They take great pride in owning and operating them.

Ms. Mejia stated there were no other callers wishing to speak on this item.

Mr. Willoughby wanted to clarify that the 2 comments received were confirming the zoning and not in opposition.

Ms. Wahlstrom stated that is correct.

As there was no one else wishing to speak, Chairman Willoughby closed the public testimony

There was no Planning Commission deliberation.

PLANNING COMMISSION ACTION

It was moved by Gregorek, seconded by DeDiemar, to recommend adoption of a resolution to approve an Addendum to a previously certified EIR, the General Plan Amendment, File No., PGPA19-009 and the Zone Change, File No., PZC19-003, subject to conditions of approval. Roll call vote: AYES, DeDiemar, Gage, Gregorek, Reyes, Ricci, and Willoughby; NOES, none; RECUSE, none; ABSENT, none. The motion was carried 6 to 0.

E. ENVIRONMENTAL ASSESSMENT, GENERAL PLAN AMENDMENT, AND

SPECIFIC PLAN AMENDMENT FOR FILE NOS. PGPA19-003 AND PSPA19-003: A General Plan Amendment (File No. PGPA19-003) to modify the Policy Plan (General Plan) Land Use Plan (Exhibit LU-01) component of The Ontario Plan, changing the land use designation on approximately 23.8 gross acres of land, from Low Density Residential to Medium Density Residential, in conjunction with a modification to the Future Buildout Table (Exhibit LU-03) consistent with the proposed land use designation change, and an Amendment to the Esperanza Specific Plan (File No. PSPA19-003) to establish row townhomes as a permitted land use and increase the maximum allowed density within Planning Area 4, from 6.26 to 14.0 dwelling units per acre. The project site is generally located at the northeast corner of Clifton and Eucalyptus Avenues, within the PA-4 land use district of the Esperanza Specific Plan. The environmental impacts of this project were previously reviewed in conjunction with The Ontario Plan (File No. PGPA06-001) EIR (SCH# 2008101140), certified by the City Council on January 27, 2010. This application introduces no new significant environmental impacts. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP); (APN: 0218-302-01) **submitted by Christopher Development Group, Inc. City Council action is required.**

- F. **ENVIRONMENTAL ASSESSMENT, TRACT MAP, AND DEVELOPMENT PLAN REVIEW FOR FILE NOS. PMTT19-010 (TM 20285) AND PDEV19-030:** A Tentative Tract Map (File No. PMTT19-010, TM 20285) to subdivide 8.57 acres of land into 11 numbered lots and 6 lettered lots, in conjunction with a Development Plan (File No. PDEV19-030) to construct 126 multiple-family dwellings generally located at the northeast corner of Clifton and Eucalyptus Avenues, within the PA-4 land use district of the Esperanza Specific Plan. The environmental impacts of this project were previously reviewed in conjunction with The Ontario Plan (File No. PGPA06-001) EIR (SCH# 2008101140), certified by the City Council on January 27, 2010. This application introduces no new significant environmental impacts. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP); (APN: 0218-302-01) **submitted by Patrick McCabe, Christopher Development Group, Inc.**

Associate Planner Vaughn, presented the staff report. She described the location and the surrounding area and the General and Specific Plan Amendments needed. She described the tract map and the development plan including the access, parking, landscape, active and passive recreation facilities, and the proposed units. She stated that staff is recommending the Planning Commission recommend approval for File Nos. PGPA19-003 and PSPA19-003 and approve File Nos. PMTT19-010 and PDEV19-030, pursuant to the facts and reasons contained in the staff report and attached resolution, and subject to the conditions of approval.

No one responded.

PUBLIC TESTIMONY

Mr. Patrick McCabe the applicant, thanked Ms. Vaughn and Mr. Zeledon for helping with the project and navigating them through the specific plan and for Mr. Sotomayor from engineering

for helping to get them to this point.

Mr. Gregorek wanted to know the selling price range for the project.

Mr. McCabe stated he believed they would be starting in the high \$300,000 to low \$400,000, but it would depend on the market and the comps within the neighborhoods around them.

Mr. Willoughby wanted to know when they would be getting started on the project.

Mr. McCabe stated they are eager to get going and their other project, Dorado has been selling very well even through COVID.

Ms. Mejia stated there were no other callers wishing to comment on this item.

As there was no one else wishing to speak, Chairman Willoughby closed the public testimony

Mr. Gage stated he was skeptical about increasing the density but this project was really well done and it looks like a good project. He stated he likes the 64 guest parking spaces provided, and hopes we don't increase density on every project.

Mr. Reyes wanted to thank staff for the overall landscape plan, which gives a great picture of how the applicant is these units and amenities which are ideal to go along with the density and he is looking forward to the different open spaces and great amenities.

Mr. Willoughby stated we don't want to increase density on all projects, but it makes sense for this project, and it is a nice looking product that will enhance Ontario Ranch.

PLANNING COMMISSION ACTION

It was moved by Reyes, seconded by Gregorek, to recommend adoption of a resolution to approve the General Plan Amendment, File No., PGPA19-003 and the Specific Plan Amendment, File No. PSPA19-003, subject to conditions of approval. Roll call vote: AYES, DeDiemar, Gage, Gregorek, Reyes, Ricci, and Willoughby; NOES, none; RECUSE, none; ABSENT, none. The motion was carried 6 to 0.

It was moved by Gage, seconded by DeDiemar, to adopt a resolution to approve the Tentative Tract Map, File No., PMTT19-010 and the Development Plan, File No. PDEV19-030, subject to conditions of approval. Roll call vote: AYES, DeDiemar, Gage, Gregorek, Reyes, Ricci, and Willoughby; NOES, none; RECUSE, none; ABSENT, none. The motion was carried 6 to 0.

- G. ENVIRONMENTAL ASSESSMENT, GENERAL PLAN AMENDMENT, AND SPECIFIC PLAN AMENDMENT FOR FILE NOS. PGPA19-008 AND PSPA19-011:** A General Plan Amendment (File No. PGPA19-008) to modify the Policy Plan (General Plan) Land Use Plan (Exhibit LU-01) component of The Ontario Plan, changing the land use designation on 10.49 acres of land, from School to Low-Medium Density Residential, in conjunction with modification of the Future Buildout Table (Exhibit LU-

03) to be consistent with the proposed land use designation change, and an Amendment to The Avenue Specific Plan (File No. PSPA19-011), changing the land use designation on the project site from School to Low-Medium Density Residential, generally located at the northeast corner of La Avenida Drive and Manitoba Place. Staff has prepared an Addendum to The Ontario Plan (File No. PGPA06-001) Environmental Impact Report (SCH# 2008101140), certified by the City Council on January 27, 2010. This application introduces no new significant environmental impacts. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP); (APN: 0218-652-27) **submitted by Ontario Schaefer Holdings, LLC. City Council action is required.**

This Item is being requested to be continued to the October 27, 2020 meeting.

PUBLIC TESTIMONY

Ms. Mejia stated there were no callers wishing to speak on this item.

Chairman Willoughby left the public testimony open

There was no Planning Commission deliberation.

PLANNING COMMISSION ACTION

It was moved by Gage, seconded by Ricci, to continue File Nos., PGPA19-008 and PSPA19-011 to the October 27, 2020 Planning Commission meeting. Roll call vote: AYES, DeDiemar, Gage, Gregorek, Reyes, Ricci, and Willoughby; NOES, none; RECUSE, none; ABSENT, none. The motion was carried 6 to 0.

- H. ENVIRONMENTAL ASSESSMENT AND DEVELOPMENT CODE AMENDMENT REVIEW FOR FILE NO. PDCA18-003:** A Development Code Amendment proposing to: [1] revise current provisions regarding the regulation of Accessory Dwelling Units, replacing an Urgency Ordinance previously approved by the City Council on January 21, 2020; [2] revise current provisions regarding the MU-1 (Downtown Mixed Use) zoning district, to facilitate the establishment of the Downtown District Plan; [3] establish new provisions regarding the regulation of small lot infill subdivisions, which are proposed to be allowed in Mixed Use zoning districts and the MDR-11 (Low-Medium Density Residential – 5.1 to 11.0 DUs/Acre), MDR-18 (Medium Density Residential – 11.1 to 18.0 DUs/Acre), MDR-25 (Medium-High Density Residential – 18.1 to 25.0 DUs/Acre), and HDR-45 (High Density Residential – 25.1 to 45.0 DUs/Acre) zoning districts; [4] revise current provisions regarding Massage Services and Massage Establishments, establishing that such uses are subject to Administrative Use Permit issuance and requirements; and [5] modify certain Development Code provisions to include various clarifications, including Chapter 2.0 (Administration and Procedures), Chapter 3.0 (Nonconforming Lots, Land Uses, Structures, and Signs), Chapter 5.0 (Zoning and Land Use), Chapter 6.0 (Development and Subdivision Regulations), Chapter 7.0 (Historic Preservation), Chapter 8.0 (Sign Regulations), and Chapter 9.0 (Definitions and Glossary). The proposed Development Code Amendment is exempt from the requirements of the California Environmental

Quality Act (CEQA) and the guidelines promulgated thereunder, pursuant to Section 15061(b)(3) of the CEQA Guidelines. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP). Furthermore, the project site is located within the Airport Influence area of Chino Airport and is consistent with policies and criteria set forth within the 2011 California Airport Land Use Planning Handbook published by the California Department of Transportation, Division of Aeronautics; **City Initiated. City Council action is required. This item was continued from the August 25, 2020, Planning Commission meeting.**

This Item is being requested to be continued to the October 27, 2020 meeting.

PUBLIC TESTIMONY

Ms. Mejia stated there were no callers wishing to speak on this item.

Chairman Willoughby left the public testimony open

There was no Planning Commission deliberation.

PLANNING COMMISSION ACTION

It was moved by Gage, seconded by DeDiemar, to continue File No., PDCA18-003, to the October 27, 2020 Planning Commission meeting. Roll call vote: AYES, DeDiemar, Gage, Gregorek, Reyes, Ricci, and Willoughby; NOES, none; RECUSE, none; ABSENT, none. The motion was carried 6 to 0.

MATTERS FROM THE PLANNING COMMISSION

Old Business Reports From Subcommittees

Historic Preservation (Standing): Met on September 15, 2020.

Mr. Gregorek stated they did a tier determination and one public hearing and discussed about the water gallery at the museum.

Development Code Review (Ad-hoc): Met on September 14, 2020.

Mr. Willoughby stated they went over the development code amendment and some of the clean-up items.

New Business

NOMINATIONS FOR SPECIAL RECOGNITION

None at this time.

DIRECTOR'S REPORT

Ms. Wahlstrom stated the Monthly Activity Reports are in their packets.

ADJOURNMENT

Mr. Willoughby closed the meeting in Ms. Wahlstrom's honor.

Gregorek motioned to adjourn, seconded by Gage. The meeting was adjourned at 8:21 PM.

Secretary Pro Tempore

Chairman, Planning Commission

**HISTORIC PRESERVATION COMMISSION
STAFF REPORT
OCTOBER 27, 2020**

FILE NO. : PHP20-012

SUBJECT: Request for a Mills Act Contract (Preservation Agreement)

LOCATION: 1458 North Euclid Avenue (APN: 1047-352-14)

PROPERTY OWNER: Steven and Sylvia Romero

RECOMMENDATION: That the Historic Preservation Commission adopt the attached resolution recommending that the City Council approve File No. PHP20-012. The Historic Preservation Subcommittee reviewed this application on October 8, 2020 and is recommending approval.

BACKGROUND: Effective March 7, 1973, Chapter 1442 of the Statutes of 1972 (also known as the Mills Act) added sections 50280 through 50289 to the Government Code to allow an owner of a qualified historical property to enter into a preservation agreement with a local government. The City of Ontario established the Mills Act program in 1997 to provide an economic incentive for the preservation of designated historic landmarks and/or contributing structures within a designated historic district. Since inception of the City’s program, 77 Mills Act Contracts have been approved and recorded. There is one contract proposed at this time, a single-family residence designated as a Contributor to the Euclid Avenue Historic District.

In order for the historic property to be eligible for the program, it must meet the requirements outlined in the guidelines and standards set by the State of California, Board of Equalization and the City’s Development Code (Sec. 4.02.065). The historic property must be either a local, state, or nationally designated property or a contributor within a locally designated historic district whereby the property owner agrees to certain improvements to restore, rehabilitate or preserve a qualified historic building. In exchange, the San Bernardino County Tax Assessor reassesses the property’s value based on an alternative formula that may result in a significant reduction in the owner’s property taxes.

Pursuant to State law, a Mills Act Contract is recorded on the property and is a perpetual 10-year contract that automatically renews annually, unless the property owner or the City request a notice of non-renewal. The Mills Act Contract and all benefits and responsibilities remain with the land, even after a change of ownership. If a contract is cancelled for any reason, including non-compliance with the conditions of the contract, or upon the request of the property owner or City, a cancellation fee of 12.5 percent of the market value (as of the time of cancellation) is assessed.

Case Planner: Elly Antuna, Associate Planner

Planning Director Approval: 

Submittal Date: 09/04/2020

Hearing Body	Date	Decision	Action
HPSC:	10/08/2020	Approval	Recommend
PC / HPC:	10/27/2020		Recommend
CC:	11/17/2020		Final

PROJECT ANALYSIS: Staff provides estimates of potential tax savings for the property owner, but ultimately, only the San Bernardino County Assessor can determine the actual Mills Act adjusted value. The Mills Act assessment involves many variables that are typically determined by market forces such as interest rates, capitalization rates, and fair market rental rates. The average property tax savings for the proposed Mills Act Contracts roughly range between 30 and 55 percent in the initial year, with a tax savings decrease each passing year.

Upon City Council approval, the City Clerk informs the San Bernardino County Assessor that the property has entered into a Mills Act Contract. The Assessor values the historic property with the Mills Act assessment the following tax year, which may differ from the Planning Department estimates.

[1] Architectural Description – The one-story Spanish Colonial Revival Bungalow style single-family residence located at 1458 North Euclid Avenue was built in 1937 (est.) for Dr. Ben Henke. Spanish Colonial features on the home include a low-pitched red tile roof, exposed rafter tails, multi-paned metal framed windows, stucco siding and an ornate wood front entry door. Other character-defining features include a small roof overhang, recessed windows, and a small courtyard style porch at the rear of the residence. The Dr. Ben Henke House was designated by City Council as a Contributor to the Euclid Avenue Historic District on June 4, 2013.

[2] Work Program — The applicants are proposing both exterior and interior work as part of the contract that qualifies under the guidelines and standards set by the State of California. The exterior work includes roof repairs, tree trimming, re-glazing of windows and paint. The interior work includes plumbing repairs and replacements, updating electrical, and refinishing of hardwood floors, cabinets and original doorknobs. The improvements are valued at an estimated \$41,900.

[3] Property Owner Savings — The following Mills Act savings to the property owner are based on estimates calculated by the Planning Department.

Current Annual Taxes Paid:	\$4,176
Mills Act Annual Taxes Estimated:	\$2,647
Potential Total Annual Tax Savings:	\$1,529
Estimated Savings over 10 years:	\$15,290
Estimated Savings Percentage:	36.6%

[4] City Cost — According to the City budget, Ontario receives approximately 16.8 percent of the property taxes collected. The following shows the cost to the City for this contract and is based on estimates calculated by the Planning Department.

Current Annual City Tax Revenue:	\$702
Mills Act Annual City Tax Revenue Estimated:	\$445
Estimated Total Annual Cost to the City:	\$257
Estimated Cost to the City over 10 years:	\$2,570

This contract provides for \$16.30 in private improvements for every \$1 in estimated property tax cost to the City.

CUMULATIVE IMPACTS: The City currently has 77 approved Mills Act Contracts and one proposed contract. The cumulative impacts are based on the initial projected assessment of each contract for the proposed year.

	Existing	Proposed
Number of contracts:	77	78
Average Estimated Annual Tax Saving to Property Owners:	\$1,782	\$1,779
Estimated Annual Cost to the City:	\$23,056	\$23,313
Estimated Cost to the City over 10 Years:	\$230,560	\$233,130
Estimated Total Value of Mills Act Improvements over 10 Years:	\$3,162,975	\$3,204,875
Estimated Loss of Revenue to Improvement Ratio:	\$1/13.72	\$1/13.75

COMPLIANCE WITH THE ONTARIO PLAN: The Mills Act Contract Program is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan (TOP). More specifically, the goals and policies of TOP that are furthered by the proposed project are as follows:

[1] City Council Goals.

- Invest in the Growth and Evolution of the City’s Economy
- Operate in a Businesslike Manner
- Focus Resources in Ontario’s Commercial and Residential Neighborhoods
- Encourage, Provide or Support Enhanced Recreational, Educational, Cultural and Healthy City Programs, Policies and Activities

[2] Policy Plan (General Plan)

Community Design Element – Historic Preservation

- Goal CD4: Historic buildings, streets, landscapes and neighborhoods, as well as the story of Ontario's people, businesses, and social and community organizations, that have been preserved and serve as a focal point for civic pride and identity.
 - CD4-2 Collaboration with Property Owners and Developers. We educate and collaborate with property owners and developers to implement strategies and best practices that preserve the character of our historic buildings, streetscapes and unique neighborhoods.
 - CD4-4 Incentives. We use the Mills Act and other federal, state, regional and local programs to assist property owners with the preservation of select properties and structures.
 - CD4-6 Promotion of Public Involvement in Preservation. We engage in programs to publicize and promote the City's and the public's involvement in preservation efforts.

Community Design Element – Protection of Investment

- Goal CD5: A sustained level of maintenance and improvement of properties, buildings and infrastructure that protects the property values and encourages additional public and private investments.
 - CD5-1 Maintenance of Buildings and Property. We require all public and privately owned buildings and property (including trails and easements) to be properly and consistently maintained.
 - CD5-3 Improvements to Property & Infrastructure. We provide programs to improve property and infrastructure.
 - CD5-4 Neighborhood Involvement. We encourage active community involvement to implement programs aimed at the beautification and improvement of neighborhoods.

RESOLUTION NO. PC

A RESOLUTION OF THE HISTORIC PRESERVATION COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PHP20-012, RECOMMENDING THAT THE CITY COUNCIL APPROVE THE MILLS ACT CONTRACT FOR THE DR. BEN HENKE HOUSE, LOCATED AT 1458 NORTH EUCLID AVENUE (APN: 1047-352-14).

WHEREAS, STEVEN AND SYLVIA ROMERO ("Applicant") has filed an Application for the approval of a Mills Act Contract, File No. PHP20-012, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the City's character and history are reflected in its cultural, historical, and architectural heritage with an emphasis on the "Model Colony" as declared by an act of the Congress of the United States and presented at the St. Louis World's Fair in 1904; and

WHEREAS, the City's historical foundations should be preserved as living parts of community life and development in order to foster an understanding of the City's past so that future generations may have a genuine opportunity to appreciate, enjoy, and understand Ontario's rich heritage; and

WHEREAS, the Community Development and the Aesthetic, Cultural, Open Space and Recreational Resources Elements of the Ontario Plan (Policy Plan) sets forth Goals and Policies to conserve Ontario's historic buildings and districts; and

WHEREAS, the Dr. Ben Henke House, a Spanish Colonial style single-family residence constructed in 1937 (est.), located at 1458 North Euclid Avenue (APN: 1047-352-14) is worthy of preservation and was designated by City Council on June 4, 2013 as a Contributor within the Euclid Avenue Historic District; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act (Public Resources Code Section 21000 et seq.) ("CEQA"); and

WHEREAS, the Project is exempt from CEQA pursuant to a categorical exemption (listed in CEQA Guidelines Article 19, commencing with Section 15300) and the application of that categorical exemption is not barred by one of the exceptions set forth in CEQA Guidelines Section 15300.2; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Historic Preservation Commission the responsibility and authority to review and make recommendation to the City Council on the subject Application; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing

procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on October 8, 2020, the Historic Preservation Subcommittee of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date, voting to issue Decision No. HPSC20-012, recommending the Historic Preservation Commission recommend to the City Council approval of the Application; and

WHEREAS, on October 27, 2020, the Historic Preservation Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, the Historic Preservation Commission has reviewed this application and determined it to be to the mutual benefit to the City and property owner to enter into a Historic Property Preservation Agreement; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED, the Historic Preservation Commission of City of Ontario, as follows:

SECTION 1. Environmental Determination and Findings. As the recommending body for the Project, the Historic Preservation Commission has reviewed and considered the information contained in the administrative record for the Project. Based upon the facts and information contained in the administrative record, including all written and oral evidence presented to the Historic Preservation Commission, the Historic Preservation Commission finds as follows:

(1) The Mills Act Contract is not considered a project pursuant to Section 21065 of the CEQA Guidelines. The Mills Act Contract will not result in a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment.

SECTION 2. Concluding Facts and Reasons. Based upon the substantial evidence presented to the Historic Preservation Commission during the above-referenced hearing and upon the specific findings set forth in Section 1 above, the Historic Preservation Commission hereby concludes as follows:

(1) California Government Code Section 50280, et seq., authorizes cities to enter into contracts with the owners of a qualified historical property to provide for the use, maintenance and restoration of such historical property so as to retain its

characteristics as a property of historical significance; and

(2) The Dr. Ben Henke House, located at 1458 North Euclid Avenue, was designated by City Council on June 4, 2013 as a Contributor within the Euclid Avenue Historic District; and

(3) The Applicant has set forth a work program for this specific property to ensure the preservation of this historic resource that qualifies under the guidelines and standards set by the State of California.

SECTION 3. Historic Preservation Commission Action. Based upon the findings and conclusions set forth in Sections 1 and 2 above, the Historic Preservation Commission hereby RECOMMENDS THE CITY COUNCIL APPROVE THE REQUEST FOR A MILLS ACT CONTRACT.

SECTION 4. Indemnification. The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 5. Custodian of Records. The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 E. B Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 6. Certification to Adoption. The Secretary shall certify to the adoption of the Resolution.

Code Section 6103 & 27383

HISTORIC PROPERTY PRESERVATION AGREEMENT

THIS AGREEMENT is made and entered into this 17th day of November 2020, by and between the City of Ontario, a municipal corporation (hereinafter referred to as the "City") and Steven and Sylvia Romero (hereinafter referred to as the "Owner").

WITNESSETH:

A. Recitals.

(i) California Government Code Section 50280, et seq., authorizes cities to enter into contracts with the owners of qualified historical property to provide for the use, maintenance and restoration of such historical property so as to retain its characteristics as property of historical significance;

(ii) Owner possesses fee title in and to that certain real property, together with associated structures and improvements thereon, commonly known as the Dr. Ben Henke House, located at 1458 North Euclid Avenue, Ontario, CA 91762 (hereinafter such property shall be referred to as the "Historic Property"). A legal description of the Historic

Property is attached hereto, marked as Exhibit "A" and is incorporated herein by this reference;

(iii) On June 4, 2013, the City Council of the City of Ontario designated the Historic Property as a Contributor within the Euclid Avenue Historic District pursuant to the terms and provisions of Title 9, Chapter 1 Chapter 4 of the Ontario Municipal Code; and,

(iv) The City and Owner, for their mutual benefit, now desire to enter into this agreement both to protect and preserve the characteristics of historical significance of the Historic Property and to qualify the Historic Property for an assessment of valuation pursuant to the Provisions of Chapter 3, of Part 2, of Division 1 of the California Revenue and Taxation Code.

B. Agreement

NOW, THEREFORE, City and Owner, in consideration of the mutual covenants and conditions set forth herein, do hereby agree as follows:

1. Effective Date and Term of Agreement. This Agreement shall be effective and commence on November 17, 2020 and shall remain in effect for a term of ten (10) years thereafter. Each year upon the anniversary of the effective date, such initial term will automatically be extended as provided in paragraph 2, below.

2. Renewal. Each year on the anniversary of the effective date of this Agreement (hereinafter referred to as the "renewal date"), a year shall automatically be added to the initial term of this Agreement unless notice of non-renewal is mailed as provided herein. If either Owner or City desires in any year not to renew the Agreement, Owner or City shall serve written notice of non-renewal of the Agreement on the other party in advance of the annual renewal date of the Agreement. Unless such notice is served by Owner to City at least ninety (90) days prior to the annual renewal date, or served by City to Owner at least sixty (60) days prior to the annual renewal date, one (1) year shall automatically

be added to the term of the Agreement provided herein. Owner may make a written protest of the notice. Upon receipt by the Owner of a notice from the City of non-renewal, the City may, at any time prior to the annual renewal date of the Agreement, withdraw its notice to Owner of non-renewal. If either City or Owner serves notice to the other of non-renewal in any year, the Agreement shall remain in effect for the balance of the term then remaining, either from its original execution or from the last renewal of the Agreement, whichever may apply.

3. Fees. Prior to recordation the applicant shall pay the applicable fee in effect at the time recordation is requested.

4. Standards for Historical Property. During the term of this Agreement, the Historic Property shall be subject to the following conditions, requirements and restrictions:

A. Owner shall preserve and maintain the characteristics of historical significance of the Historic Property. Attached hereto, marked as Exhibits "B", and incorporated herein by this reference, is a list of those minimum standards and conditions for maintenance, use and preservation of the Historic Property, which shall apply to such property throughout the term of this Agreement.

B. Owner shall, where necessary, restore and rehabilitate the property according to the rules and regulations of the Office of Historic Preservation of the Department of Parks and Recreation, the United States Secretary of the Interior's Rehabilitation Standards, the State Historical Building Code, and the Ontario Development Code and in accordance with the attached schedule of potential improvements, drafted by the applicant and approved by the City Council, attached hereto as Exhibit "C".

C. Pursuant to Section 4.02.050 of the Ontario Development Code, Owner shall obtain a Certificate of Appropriateness for any alteration, addition, restoration,

rehabilitation, repainting, resurfacing, and for each and every item listed in Exhibit "C", prior to commencement of work. Failure to obtain all necessary permits, including building permits, and approvals may result in cancellation of this Agreement as set forth on Paragraph 6, Cancellation herein.

D. Owner shall allow reasonable periodic examinations, by prior appointment, of the interior and exterior of the Historic Property by representatives of the County Assessor, State Department of Parks and Recreation, State Board of Equalization, and the City, as may be necessary to determine Owner's compliance with the terms and provisions of this Agreement.

5. Provision of Information of Corporation. Owner hereby agrees to furnish City with any and all information requested by the City, which may be necessary or advisable to determine compliance with the terms and provision of this Agreement.

6. Cancellation. City, following a duly noticed public hearing as set forth in California Government Code Sections 50280, et seq., may cancel this Agreement if it determines that Owner breached any of the conditions of this Agreement or has allowed the property to deteriorate to the point that it no longer meets the standards for a qualified historic property. City may also cancel this Agreement if it determines that the Owner has failed to restore or rehabilitate the property in the manner specified in subparagraph 4(B) of this Agreement. In the event of cancellation, Owner may be subject to payment of those cancellation fees set forth in California Government Code Sections 50280, et seq.

7. Enforcement of Agreement. In lieu of and/or in addition to any provision to cancel the Agreement as referenced herein, City may specifically enforce, or enjoin the breach of, the terms of this Agreement. In the event of a default, under the provisions of this Agreement by Owner, City shall give written notice to Owner by registered or certified mail addressed to the address stated in this Agreement, and if such a violation is not corrected to the reasonable satisfaction of the City within thirty (30) days thereafter, or if not corrected within such reasonable time as may be required to cure the breach or

default if said breach or default cannot be cured within thirty (30) days (provided that acts to cure the breach of default may be commenced within thirty (30) days and must be pursued to completion by Owner), then City may, without further notice, declare a default under the terms of this Agreement and may bring any action necessary to specifically enforce the obligations of Owner growing out of the terms of this Agreement, apply to any court, state or federal, for injunctive relief against any violation by Owner or apply for such other relief against any violation by Owner or apply for such other relief as may be appropriate.

City does not waive any claim of default by Owner if City does not enforce or cancel this Agreement. All other remedies at law or in equity which are not otherwise provided for in this Agreement or in City's regulations governing historic properties are available to the City to pursue in the event that there is a breach of this Agreement. No waiver by City of any breach or default under this agreement shall be deemed to be a waiver of any other subsequent breach thereof or default herein under.

8. Binding Effect of Agreement. The Owner hereby subjects the Historic Property described in Exhibit "A" hereto to the covenants, reservations and restriction as set forth in this Agreement. City and Owner hereby declare their specific intent that the covenants, reservations and restrictions as set forth herein shall be deemed covenants running with the land and shall pass to and be binding upon the Owner's successors and assigns in title or interest to the Historic Property. Each and every contract, deed or other instrument hereinafter executed, covering or conveying the Historic Property, or any portion thereof, shall conclusively be held to have been executed, delivered and accepted subject to the covenants, reservations and restrictions expressed in this Agreement regardless of whether such covenants, reservations and restrictions are set forth in such contract, deed or other instrument.

City and Owner hereby declare their understanding and intent that the burden of the covenants, reservations and restrictions set forth herein touch and concern the land in that Owner's legal interest in the Historic Property is rendered less valuable

thereby. City and Owner hereby further declare their understanding and intent that the benefit of such covenants, reservations and restrictions touch and concern the land by enhancing and maintaining the historic characteristics and significance of the Historic Property for the benefit of the public and the Owner.

9. Notice. Any notice required to be given by the terms of this Agreement shall be provided at the address of the respective parties as specified below or at any other address as may be later specified by the parties hereto.

To City: City of Ontario
303 East "B" Street
Ontario, CA 91764

Attention: Planning Director

To Owner: Steven and Sylvia Romero
1458 North Euclid Avenue
Ontario, CA 91762

10. General Provisions.

A. None of the terms, provisions or conditions of this Agreement shall be deemed to create a partnership between the parties hereto and any of their heirs, successors or assigns, nor shall such terms, provisions or conditions cause them to be considered joint ventures or members of any joint enterprise.

B. Owner agrees to and shall hold City and its elected officials, officers, agents, and employees harmless from liability for damage or claims for damage for personal injuries, including death, and claims for property damage which may arise from the direct or indirect use or operations of Owner or those of his contractor, subcontractor, agent, employee or other person acting on his behalf which relates to the use, operation and maintenance of the Historic Property. Owner hereby agrees to and shall defend the City and its elected officials, officers, agents, and employees with respect to any and all actions for damages caused by, or alleged to have been caused by, reason of Owner's activities in connection with the Historic Property. This hold harmless provision applies

to all damages and claims for damages suffered, or alleged to have been suffered, by reason of the operations referred to in this Agreement regardless of whether or not the City prepared, supplied or approved the plans, specifications or other documents for the Historic Property.

C. All of the agreements, rights, covenants, reservations and restrictions contained in this Agreement shall be binding upon and shall inure to the benefit of the parties herein, their heirs, successors, legal representatives, assigns and all persons acquiring any part or portion of the Historic Property, whether by operation of law or in any manner whatsoever.

D. In the event legal proceedings are brought by any party or parties to enforce or restrain a violation of any of the covenants, reservations or restrictions contained herein, or to determine the rights and duties of any party hereunder, the prevailing party in such proceeding may recover all reasonable attorney's fees to be fixed by the court, in addition to court costs and other relief ordered by the court.

E. In the event that any of the provisions of this Agreement are held to be unenforceable or invalid by any court of competent jurisdiction, or by subsequent preemptive legislation, the validity and enforceability of the remaining provisions, or portions thereof, shall not be affected thereby.

F. This Agreement shall be construed and governed in accordance with the laws of the State of California.

11. Recordation. No later than twenty (20) days after the parties execute and enter into this Agreement, the City shall cause this Agreement to be recorded in the office of the County Recorder of the County of San Bernardino.

12. Amendments. This Agreement may be amended, in whole or in part, only by a written recorded instrument executed by the parties hereto.

IN WITNESS WHEREOF, City and Owner have executed this Agreement on the day and year first written above.

Ontario, CA 91762

Contract Year	Description
2021:	Paint interior of home.
2022:	Paint exterior of home.
2023:	Replace plumbing in bathroom. Re-glaze bathtub.
2024:	Replace and repair electrical as needed.
2025:	Reglaze windows and doors where glass is broken.
2026:	Tree trimming (4 trees) by certified arborist.
2027:	Repair cupboards in kitchen, bathroom and hall.
2028:	Refinish/replace wood floors throughout the home.
2029:	Replace broken tiles on roof.
2030:	Replace skeleton keys and refinish doorknobs. Repair garage roof.

PLANNING COMMISSION STAFF REPORT

October 27, 2020

303 East B Street, Ontario, California 91764 Phone: 909.395.2036 / Fax: 909.395.2420

FILE NOS: PGPA19-008, PSPA19-011, and PMTT19-015

SUBJECT: A request for approval of the following entitlements: [1] A General Plan Amendment (File No. PGPA19-008) to modify the Policy Plan (general plan) Land Use Plan (Exhibit LU-01) component of The Ontario Plan, changing the land use designation on 10.49 acres of land, from Public School to Low-Medium Density Residential (5.1 – 11 du/ac), in conjunction with modification of the Future Buildout Table (Exhibit LU-03) to be consistent with the proposed land use designation change; [2] An Amendment to The Avenue Specific Plan (File No. PSPA19-011), changing the land use designation on the Project site from School to Low-Medium Density Residential, introduce Product Type 1D (2,700 - 3,500 square-foot lots), and revise applicable exhibits, maps, development standards, and other text throughout the Specific Plan to accommodate the proposed land use change; and, [3] A Tentative Tract Map (File No. PMTT19-015/TTM 20298) to subdivide 10.49 acres of land into 106 numbered lots and 19 lettered lots, generally located at the northeast corner of La Avenida Drive and Manitoba Place; (APN: 0218-652-27) **submitted by Ontario Schafer Holdings, LLC. City Council action is required (PGPA19-008 and PSPA19-011 only).**

PROPERTY OWNER: Ontario Schafer Holdings, LLC

RECOMMENDED ACTION: That the Planning Commission consider and adopt the following:

- (1) A resolution recommending the City Council approve the use of an Addendum to The Ontario Plan Environmental Impact Report; and
- (2) Resolutions recommending the City Council approve File Nos. PGPA19-008 and PSPA19-011 pursuant to the facts and reasons contained in the staff report and attached resolutions; and
- (3) A resolution approving File No. PMTT19-015 (TTM 20298), pursuant to the facts and reasons contained in the staff report and attached resolutions, and subject to the conditions of approval contained in the attached departmental reports.

PROJECT SETTING: The Project site is comprised of 10.49 acres of land located at the northeast corner of Manitoba Place and La Avenida Drive, within the PA-6B land use district of The Avenue Specific Plan, and is depicted in Figure 1: Project Location, right. The parcels to the north, west, and south of the Project site are located within the Low-

Case Planner:	Alexis Vaughn

DAB	10/19/2020	Approval	Recommend
PC	10/27/2020		Final/Recommend
CC	11/17/2020		Final

Density Residential land use district of The Avenue Specific Plan and are currently under construction with single-family homes. The parcel to the east is located within the Public School land use district of The Avenue Specific Plan and is currently vacant. The existing surrounding land uses, zoning, and general plan and specific plan land use designations are summarized in the "Surrounding Zoning & Land Uses" table located in the Technical Appendix of this report.

Figure 1: Project Location

PROJECT ANALYSIS:

(a) Background — The Avenue Specific Plan (File No. PSP05-003) was approved, and the related Environmental Impact Report ("EIR"; SCH# 2005071109) was certified, by the City Council on February 16, 2007. The Avenue Specific Plan established the land use designations, development standards, and design guidelines on 569 acres of land, which included the potential development of 2,875 dwelling units, 130,680 square feet of commercial space and approximately 30 acres of land dedicated to elementary and middle schools.

In 2010, The Ontario Plan ("TOP") was adopted, which set forth the land use pattern for the City to achieve its Vision. With the adoption of TOP, Public School land use designation was assigned to the Project site.

On October 3, 2019, the Applicant submitted three applications to facilitate the future construction of 106 single-family dwellings, which are described below.

- A General Plan Amendment ("GPA", File No. PGPA19-008) to modify the Policy Plan (general plan) Land Use Plan (Exhibit LU-01) component of The Ontario Plan, changing the land use designation on approximately 10.49 gross acres of land from Public School to Low-Medium Density Residential (5.1-11 du/ac).
- An amendment to The Avenue Specific Plan ("SPA," File No. PSPA19-011), changing the land use designation of the project site, PA-6B, from Public School to Low-Medium Density Residential.
- A Tentative Tract Map (File No. PMTT19-015/TTM 20298) to subdivide 10.49 acres of land into 106 numbered lots and 19 lettered lots.

The GPA and SPA require Planning Commission recommendation to the City Council for review and approval. The Tentative Tract Map requires Development Advisory Board recommendation to the Planning Commission for review and approval. The proposed Tentative Tract Map will subdivide the Project site into 106 numbered lots and 19 lettered lots (See Exhibit E – Tentative Tract Map) to facilitate the future construction of 106 single-family homes and associated recreation and landscape areas. The future development of the site will require a Development Plan to be submitted, reviewed and approved by the Planning Commission.

On October 19, 2020, the Development Advisory Board (“DAB”) conducted a hearing to consider the Tentative Tract Map, and concluded the hearing, voting to recommend that the Planning Commission approve the Application subject to conditions of approval, which is included as an attachment to the Planning Commission resolution.

(1) General Plan Amendment (“GPA”) — On July 23, 2019, the City received a letter from the Mountain View School District (MVSD) Superintendent, Douglass Moss, informing us that they would not be pursuing or acquiring the future 20.49 acre school site located within Planning Areas 6B and 9B of The Avenue Specific Plan identified for a middle school. The western 10.49 acres of the school (PA-6B) is owned by Ontario Schafer Holdings, LLC, and eastern 10 acres (PA-9B) is owned by Brookcal Ontario, LLC. Ontario

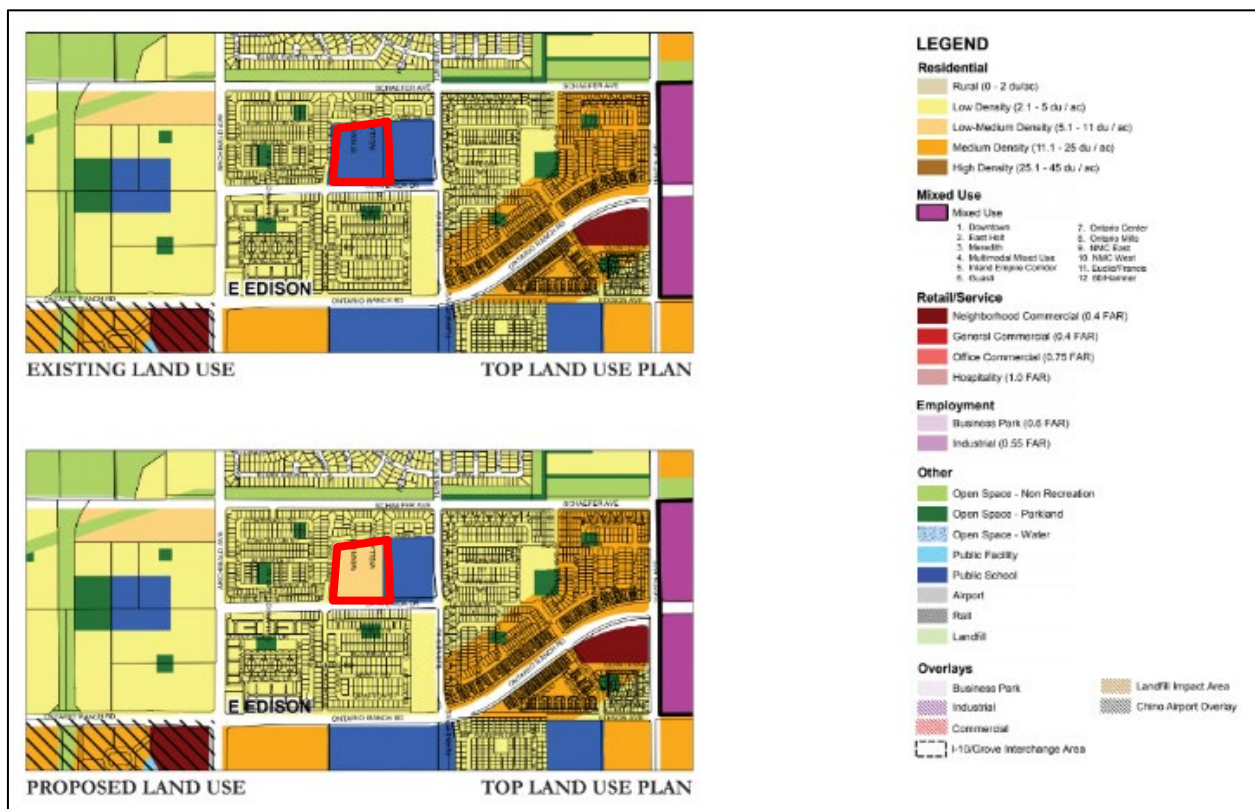

Figure 2: General Plan Amendment

Schafer Holdings, LLC, is requesting to move forward with a GPA to change the land use

designation of 10.49 acres of land, from Public School to Low-Medium Density Residential. Brookcal Ontario, LLC, currently is not pursuing a GPA or SPA to change their 10 acres of land from Public School to Low-Medium Density Residential. Brookcal would like to continue to work with the MVSD to possibly pursue a future elementary school on their 10-acre site. The proposed Low-Medium Density Residential land use will provide a buffer and transition from the presumed 10-acre elementary school to the east of the project site to the low density residential to the west and be consistent with Low-Medium Density Residential land use within PA-7 of The Avenue Specific Plan, located at the southwest corner of La Avenida and Broadway Avenue (see Exhibit C – The Avenue Specific Plan Land Use Plan).

The proposed GPA will revise Exhibit LU-01, Land Use Plan, of the Policy Plan component of The Ontario Plan, changing the land use designation of 10.49 acres of land, from Public School to Low-Medium Density Residential, as shown above in Figure 2: General Plan Amendment. Exhibit LU-03, Future Buildout Table, will also be amended for consistency with the proposed Project (see Exhibit B - Amended LU-03: Future Buildout Table, attached). The GPA will also accommodate the proposed Tract Map application and the future development of the site.

(2) The Avenue Specific Plan Amendment ("SPA") — To accommodate the proposed Tentative Tract Map and future Development Plan applications, the SPA proposes to change the land use designation for PA-6B from School to Low-Medium Density Residential (see Exhibit C – The Avenue Specific Plan Land Use Plan and Exhibit D – The Avenue Specific Plan Land Use Summary Table, attached). In addition, the applicant has introduced development standards for Product Type 1D, a conventional product type which includes typical lot sizes of 45-FT interior/50-FT corner lot width x 60-FT interior/70-FT corner lot depth (2,700 – 3,500 square-foot lots).

The SPA includes updates to development standards, the land use matrix, and various exhibits, along with text changes to reflect the proposed density increase and infrastructure requirements to accommodate the proposed Tentative Tract Map and future Development Plan applications (see Attachment A: The Avenue Specific Plan Amended Document to the Resolution for The Avenue Specific Plan Amendment). All changes and additions to the Specific Plan (exhibits, tables, and development standards) are contained within the revised Specific Plan document and are shown in red text.

(3) Tentative Tract Map — The proposed Tentative Tract Map will subdivide the Project site into 106 numbered lots and 19 lettered lots (see Exhibit E – Tentative Tract Map, attached) to facilitate the future construction of 106 single-family homes and associated recreation and landscape areas. The future development of the site will require Development Plan review and approval by the Planning Commission.

(4) Site Design/Building Layout — The Applicant has proposed to subdivide the Project site to accommodate the future development of 106 single-family homes and associated

recreation and landscape areas. The rectangular parcel predominantly arranges lots along alleys, which intersect with existing Manitoba Place and future A and B streets (See Exhibit F – Site Plan with Conceptual Plotting). The recreational park is situated near the southwest corner of the project site. Future development on the site will be required to meet all The Avenue Specific Plan development standards. All units adjacent to public streets will be required to orient building fronts toward the street.

(5) Site Access/Circulation — The Project site will be accessible from Manitoba Place, along the western portion of the site, and from Calgary Street, along the northern portion of the site. Internally, one major west-east private street (“A Street”) will intersect with one major north-south private street (“B Street”). Smaller alleys will feed off of A and B Streets, and two larger alleys will provide additional site circulation and east-west access from B Street to Manitoba Place.

(6) Parking — Future development of the site will be required to meet all Development Code and The Avenue Specific Plan parking regulations. Conceptual plotting of the site provides for a two-car garage for each unit, as well as a two-car driveway. On-street parking spaces will also be provided around the site, including along the public and private streets.

(7) Architecture — Future development of the site will be required to meet all The Avenue Specific Plan and Development Code standards regarding architecture, including style, decorative elements, enhancements, etc.

(8) Landscaping — Future development of the site will be required to meet all The Avenue Specific Plan and Development Code standards for landscaping. An approximate one-half acre park is required to provide open space and picnic/play equipment amenities (see Exhibit G – Conceptual Landscape and Park Plan, attached). The site will include landscaped parkways along the public and private streets, and each home will have a small front landscape area maintained by the Homeowners Association. The conceptual landscape plan includes a variety of trees, shrubs, groundcovers, and vines, and will be reviewed and approved as part of the future Development Plan application process.

(9) Utilities (drainage, sewer) — All major backbone improvements currently serve the site, which were previously installed as part of the surrounding developments. The Project site will be required to install all in-tract utilities and improvements, as per the regulations set forth in the related Development Agreement (File No. PDA20-001). Furthermore, the project will be required to undergo a more extensive Preliminary Water Quality Management Plan (“PWQMP”) review as part of the Development Plan process. The PWQMP establishes projects’ compliance with storm water discharge/water quality requirements and includes site design measures that capture runoff and pollutant transport by minimizing impervious surfaces and maximizes low impact development (“LID”) best management practices (“BMPs”), such as retention and infiltration, biotreatment, and evapotranspiration.

COMPLIANCE WITH THE ONTARIO PLAN: The proposed Project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan (TOP). More specifically, the goals and policies of TOP that are furthered by the proposed Project are as follows:

(1) City Council Goals.

- Operate in a Businesslike Manner
- Focus Resources in Ontario's Commercial and Residential Neighborhoods
- Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
- Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in the New Model Colony

Vision.

Distinctive Development:

- Commercial and Residential Development
 - Development quality that is broadly recognized as distinctive and not exclusively tied to the general suburban character typical of much of Southern California.

(2) Governance.

Decision Making:

- Goal G1: Sustained decision-making that consistently moves Ontario towards its Vision by using The Ontario Plan as a framework for assessing choices.
 - G1-2 Long-term Benefit. We require decisions to demonstrate and document how they add value to the community and support the Ontario Vision.

(3) Policy Plan (General Plan)

Land Use Element:

- Goal LU1: A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.
 - LU1-1 Strategic Growth. We concentrate growth in strategic locations that help create place and identity, maximize available and planned infrastructure, and foster the development of transit.

➤ LU1-6 Complete Community: We incorporate a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, employers, workers and visitors have a wide spectrum of choices of where they can live, work, shop and recreate within Ontario. (Refer to Complete Community Section of Community Economics Element).

- Goal LU2: Compatibility between a wide range of uses.

➤ LU2-6: Infrastructure Compatibility: We require infrastructure to be aesthetically pleasing and in context with the community character.

Housing Element:

- Goal H2: Diversity of types of quality housing that are affordable to a range of household income levels, accommodate changing demographics, and support and reinforce the economic sustainability of Ontario.

➤ H2-4 New Model Colony. We support a premier lifestyle community in the New Model Colony distinguished by diverse housing, highest design quality, and cohesive and highly amenitized neighborhoods.

➤ H2-5 Housing Design. We require architectural excellence through adherence to City design guidelines, thoughtful site planning, environmentally sustainable practices and other best practices.

Goal H5: A full range of housing types and community services that meet the special housing needs for all individuals and families in Ontario, regardless of income level, age or other status.

Community Economics Element:

- Goal CE1: A complete community that provides for all incomes and stages of life.

➤ CE1-6 Diversity of Housing. We collaborate with residents, housing providers and the development community to provide housing opportunities for every stage of life; we plan for a variety of housing types and price points to support our workforce, attract business and foster a balanced community.

- Goal CE2: A City of distinctive neighborhoods, districts, and corridors, where people choose to be.

➤ CE2-1 Development Projects. We require new development and redevelopment to create unique, high-quality places that add value to the community.

➤ CE2-2 Development Review. We require those proposing new development and redevelopment to demonstrate how their projects will create appropriately unique, functional and sustainable places that will compete well with their competition within the region.

➤ CE2-4 Protection of Investment. We require that new development and redevelopment protect existing investment by providing architecture and urban design of equal or greater quality.

➤ CE2-5 Private Maintenance. We require adequate maintenance, upkeep, and investment in private property because proper maintenance on private property protects property values.

Safety Element:

▪ Goal S1: Minimized risk of injury, loss of life, property damage and economic and social disruption caused by earthquake-induced and other geologic hazards.

➤ S1-1 Implementation of Regulations and Standards. We require that all new habitable structures be designed in accordance with the most recent California Building Code adopted by the City, including provisions regarding lateral forces and grading.

Community Design Element:

▪ Goal CD1: A dynamic, progressive city containing distinct neighborhoods and commercial districts that foster a positive sense of identity and belonging among residents, visitors, and businesses.

➤ CD1-1 City Identity. We take actions that are consistent with the City being a leading urban center in Southern California while recognizing the diverse character of our existing viable neighborhoods.

▪ Goal CD2: A high level of design quality resulting in public spaces, streetscapes, and developments that are attractive, safe, functional and distinct.

➤ CD2-1 Quality Architecture. We encourage all development projects to convey visual interest and character through:

- Building volume, massing, and height to provide appropriate scale and proportion;
- A true architectural style which is carried out in plan, section and elevation through all aspects of the building and site design and appropriate for its setting; and
- Exterior building materials that are visually interesting, high quality, durable, and appropriate for the architectural style.

➤ CD2-2 Neighborhood Design. We create distinct residential neighborhoods that are functional, have a sense of community, emphasize livability and social interaction, and are uniquely identifiable places through such elements as:

- A pattern of smaller, walkable blocks that promote access, activity and safety;
- Variable setbacks and parcel sizes to accommodate a diversity of housing types;
- Traffic calming measures to slow traffic and promote walkability while maintaining acceptable fire protection and traffic flows;
- Floor plans that encourage views onto the street and de-emphasize the visual and physical dominance of garages (introducing the front porch as the “outdoor living room”), as appropriate; and
- Landscaped parkways, with sidewalks separated from the curb.

➤ CD2-7 Sustainability. We collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials and construction techniques.

➤ CD2-8 Safe Design. We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintenance of visibility and accessibility, and use of lighting.

➤ CD2-9 Landscape Design. We encourage durable landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits.

➤ CD2-11 Entry Statements. We encourage the inclusion of amenities, signage and landscaping at the entry to neighborhoods, commercial centers, mixed use areas, industrial developments, and public places that reinforce them as uniquely identifiable places.

➤ CD2-13 Entitlement Process. We work collaboratively with all stakeholders to ensure a high degree of certainty in the efficient review and timely processing of all development plans and permits.

- Goal CD3: Vibrant urban environments that are organized around intense buildings, pedestrian and transit areas, public plazas, and linkages between and within developments that are conveniently located, visually appealing and safe during all hours.

- CD3-1 Design. We require that pedestrian, vehicular, bicycle and equestrian circulation on both public and private property be coordinated and designed to maximize safety, comfort and aesthetics.
- CD3-2 Connectivity Between Streets, Sidewalks, Walkways and Plazas. We require landscaping and paving be used to optimize visual connectivity between streets, sidewalks, walkways, and plazas for pedestrians.
- CD3-3 Building Entrances. We require all building entrances to be accessible and visible from adjacent streets, sidewalks, or public open spaces.
- CD3-5 Paving. We require sidewalks and road surfaces to be of a type and quality that contributes to the appearance and utility of streets and public spaces.
- CD3-6 Landscaping. We utilize landscaping to enhance the aesthetics, functionality and sustainability of streetscapes, outdoor spaces, and buildings.
 - Goal CD5: A sustained level of maintenance and improvement of properties, buildings and infrastructure that protects the property values and encourages additional public and private investments.
- CD5-1 Maintenance of Buildings and Property. We require all public and privately owned buildings and property (including trails and easements) to be properly and consistently maintained.
- CD5-2 Maintenance of Infrastructure. We require the continual maintenance of infrastructure.

HOUSING ELEMENT COMPLIANCE: The Project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan. The Project site is one of the properties listed in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix, and the proposed Project is consistent with the number of dwelling units (2,875) and density (2 - 12 du/ac) specified in the Available Land Inventory.

AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE: The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land Use Compatibility Plan ("ALUCP"), establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and

overflight impacts of current and future airport activity. The proposed Project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the ALUCP. Any special conditions of approval associated with uses in close proximity to the airport are included in the conditions of approval provided with the attached Resolution.

ENVIRONMENTAL REVIEW: Staff has prepared an Addendum to The Ontario Plan (File No. PGPA06-001) Environmental Impact Report (SCH# 2008101140), certified by the City Council on January 27, 2010. This Application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of Project approval and are incorporated herein by this reference.

CONDITIONS OF APPROVAL: See attached department reports.

TECHNICAL APPENDIX:

Surrounding Zoning and Land Use:

Notes

- Historically, citywide buildout levels do not achieve the maximum allowable density/intensity on every parcel and are, on average, lower than allowed by the Policy Plan. Accordingly, the buildout projections in this Policy Plan do not assume buildout at the maximum density or intensity and instead are adjusted downward. To view the buildout assumptions, access the Methodology report.
- Acres are given as adjusted gross acreages, which do not include the right-of-way for roadways, flood control facilities, or railroads.
- Assumed Density/Intensity includes both residential density, expressed as units per acre, and non-residential intensity, expressed as floor area ratio (FAR), which is the amount of building square feet in relation to the size of the lot.
- Projections of population by residential designation are based on a persons-per-household factor that varies by housing type. For more information, access the Methodology report.
- To view the factors used to generate the number of employees by land use category, access the Methodology report.
- Acreages and corresponding buildout estimates for these designations do not reflect underlying land uses within the Business Park, Industrial and Commercial Overlays. Estimates for these areas are included within the corresponding Business Park, Industrial and General Commercial categories.

RESOLUTION NO.

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, RECOMMENDING THE CITY COUNCIL APPROVE AN ADDENDUM TO THE ONTARIO PLAN (TOP) CERTIFIED ENVIRONMENTAL IMPACT REPORT (SCH # 2008101140), PURSUANT TO THE REQUIREMENTS OF THE CALIFORNIA ENVIRONMENTAL QUALITY ACT, AS AMENDED, FOR FILE NO. PGPA06-001

WHEREAS, ONTARIO SCHAEFER HOLDINGS, LLC. (hereinafter referred to as "Applicant") has filed an Application for the approval of a General Plan Amendment, Specific Plan Amendment, and a Tentative Tract Map, File Nos. PGPA19-008, PSPA19-011, and PMTT19-015, which consist of: [1] A General Plan Amendment (File No. PGPA19-008) to modify the Policy Plan (General Plan) Land Use Plan (Exhibit LU-01) component of The Ontario Plan, changing the land use designation on approximately 10.49 gross acres of land from Public School to Low-Medium Density Residential (5.1-11 du/ac), and modify the Future Buildout Table (Exhibit LU-03) to be consistent with the proposed land use designation change; [2] A Specific Plan Amendment (File No. PSPA19-011) changing the land use designation of the project site, PA-6B, from Public School to Low-Medium Density Residential; and [3] A Tentative Tract Map (File No. PMTT19-015/TPM 20298) to subdivide 10.49 acres of land into 106 numbered lots and 19 lettered lots. The Project site is located at the northeast corner of La Avenida Drive and Manitoba Place, in the City of Ontario, California (hereinafter referred to as "Application" or "Project"); and

WHEREAS, The Ontario Plan (File No. PGPA06-001) Environmental Impact Report (State Clearinghouse No. 2008101140) was certified on January 27, 2010 (hereinafter referred to as "Certified EIR"), in which development and use of the Project site was discussed; and

WHEREAS, the Planning Director of the City of Ontario has prepared and approved for attachment to the certified Environmental Impact Report, an Addendum to the Certified EIR (hereinafter referred to as "EIR Addendum") in accordance with the requirements of the California Environmental Quality Act of 1970, together with State and local guidelines implementing said Act, all as amended to date (collectively referred to as "CEQA"); and

WHEREAS, the EIR Addendum concluded that implementation of the Project could result in a number of significant effects on the environment that were previously analyzed in the Certified EIR, and that the Certified EIR identified mitigation measures that would reduce each of those significant effects to a less-than-significant level; and

WHEREAS, pursuant to State CEQA Guidelines Section 15164(a), a lead agency shall prepare an addendum to a previously certified EIR if some changes or additions are

necessary to a project, but the preparation of a subsequent or supplemental EIR is not required; and

WHEREAS, the City determined that none of the conditions requiring preparation of a subsequent or supplemental EIR would occur from the Project, and that preparation of an Addendum to the Certified EIR was appropriate; and

WHEREAS, the City of Ontario is the lead agency on the Project, and the Planning Commission is the recommending authority for the requested approval to construct and otherwise undertake the Project; and

WHEREAS, the Planning Commission has reviewed and considered the EIR Addendum for the Project, has concluded that none of the conditions requiring preparation of a subsequent or supplemental EIR have occurred, and intends to take actions on the Project in compliance with CEQA and state and local guidelines implementing CEQA; and

WHEREAS, approval of this Project is contingent upon City Council approving a General Plan Amendment (File No. PGPA19-008), an amendment to The Avenue Specific Plan (File No. PSPA19-011), and an EIR Addendum to The Ontario Plan (File No. PGPA06-001) Environmental Impact Report (State Clearinghouse No. 2008101140) that was certified on January 27, 2010; and

WHEREAS, the EIR Addendum for the Project are on file in the Planning Department, located at 303 East B Street, Ontario, CA 91764, are available for inspection by any interested person at that location and are, by this reference, incorporated into this Resolution as if fully set forth herein; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: Environmental Determination and Findings. As the recommending authority for the Project, The Planning Commission has reviewed and considered the information contained in the administrative record for the Project. Based upon the facts and information contained in the administrative record, including all written and oral evidence presented to the Planning Commission, the Planning Commission finds as follows:

(1) The environmental impacts of this project were reviewed in conjunction with an Addendum to The Ontario Plan Environmental Impact Report Environmental Impact

Report (State Clearinghouse No. 2008101140), certified by the Ontario City Council on January 27, 2010, in conjunction with File No. PGPA06-001.

(2) The EIR Addendum and administrative record have been completed in compliance with CEQA, the State CEQA Guidelines, and the City of Ontario Local CEQA Guidelines; and

(3) The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. This Application introduces no new significant environmental impacts.

(4) All previously adopted mitigation measures shall be a condition of project approval, as they are applicable to the Project, and are incorporated herein by this reference.

(5) The EIR Addendum contains a complete and accurate reporting of the environmental impacts associated with the Project, and reflects the independent judgment of the Planning Commission; and

(6) There is no substantial evidence in the administrative record supporting a fair argument that the project may result in significant environmental impacts; and

SECTION 2: Additional Environmental Review Not Required. Based on the Addendum, all related information presented to the Planning Commission, and the specific findings set forth in Section 1, above, the Planning Commission finds that the preparation of a subsequent or supplemental Environmental Impact Report is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and.

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3: *Planning Commission Action.* Based upon the findings and conclusions set forth in Sections 1 and 2, above, the Planning Commission hereby recommends the City Council finds that based upon the entire record of proceedings before it, and all information received, that there is no substantial evidence that the Project will constitute substantial changes to the Certified EIR, and does hereby approve the EIR Addendum, attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 4: *Indemnification.* The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 5: *Custodian of Records.* The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 6: *Certification to Adoption.* The Secretary shall certify to the adoption of the Resolution.

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a regular meeting thereof held on the 27th day of October 2020, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

Jim Willoughby
Planning Commission Chairman

California Environmental Quality Act Addendum to The Ontario Plan Environmental Impact Report

Project Title/File Nos.: PGPA19-008, PSPA19-011, and PMTT19-015

Lead Agency: City of Ontario, 303 East "B" Street, Ontario, California 91764, (909) 395-2036

Contact Person: Alexis Vaughn, Assistant Planner, 909-395-2436

Project Sponsor: City of Ontario, 303 East B Street, Ontario, CA 91764

Project Location: The project site is located in southwestern San Bernardino County, within the City of Ontario. The City of Ontario is located approximately 40 miles from downtown Los Angeles, 20 miles from downtown San Bernardino, and 30 miles from Orange County. As illustrated on Figures 1 through 3, below, the project site is located on Assessor Parcel Number (APN): 0218-652-27, which is comprised of 10.49 acres of land generally located north of La Avenida Drive, South of Schaefer Avenue, east of Archibald Avenue and west of Turner Avenue.

Figure 1: REGIONAL LOCATION MAP

Figure 2: VICINITY MAP

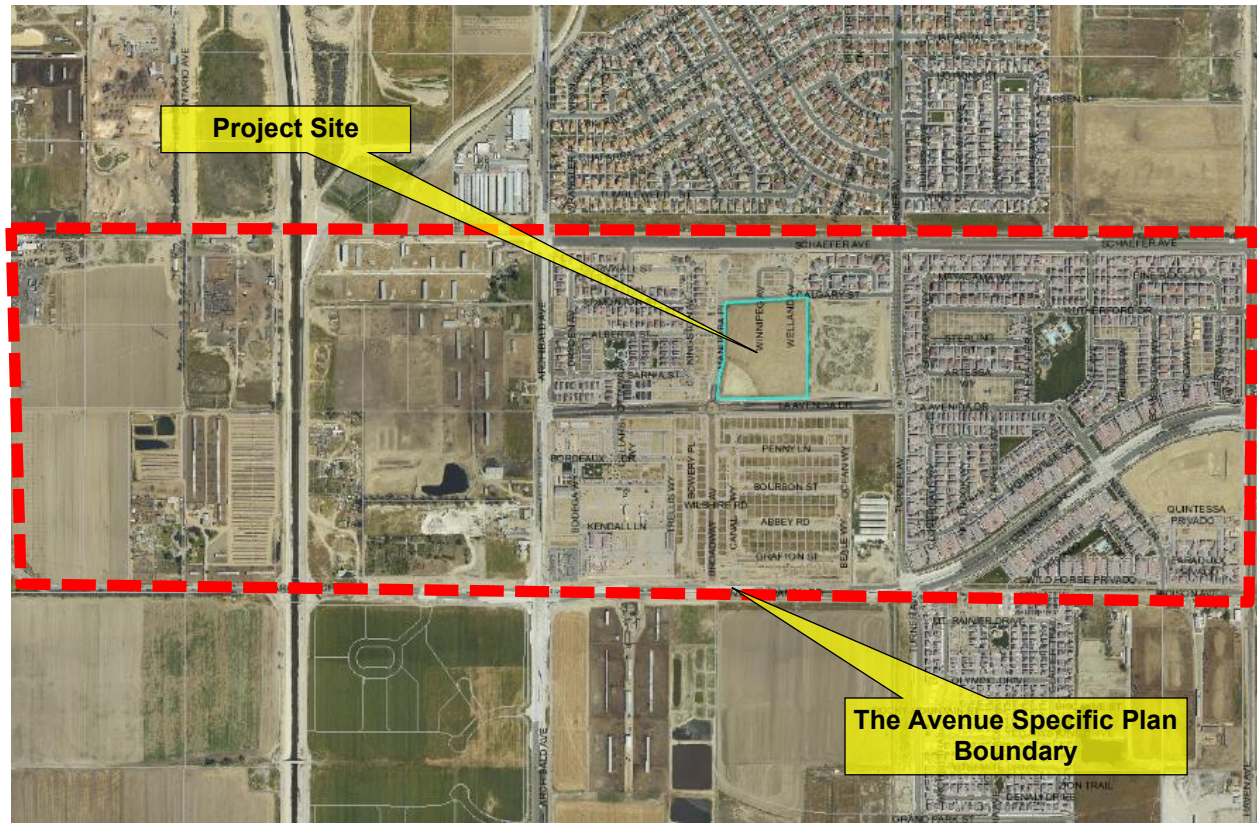

Figure 3: AERIAL PHOTOGRAPH

General Plan Designation: Existing –Public School; Proposed – Low-Medium Density Residential (5.1-11 du/ac)

Zoning: Existing – Public School district of the of The Avenue Specific Plan. Proposed – Low-Medium Density Residential.

Description of Project: The project proposes the following entitlements:

1. A General Plan Amendment (GPA) (File No. PGPA19-008) to modify the Land Use Plan (Exhibit LU-01) of the Policy Plan (General Plan) of The Ontario Plan to change the land use designation on 10.49 acres of land, from Public School to Low-Medium Density Residential (5.1-11 du/ac), and modify the Future Buildout Table (Exhibit LU-03) to be consistent with the land use designation change.
2. An amendment to The Avenue Specific Plan (SPA) (File No. PSPA19-011) to change the land use designation of 10.49 acres of land from Public School to Low-Medium Density Residential The Avenue Specific Plan, adopted on February 16, 2007, is located on approximately 568 acres of land generally located south of Schaefer Avenue, north of Ontario Ranch Road, west of Haven Avenue, and east of Carpenter Avenue. The Specific Plan Amendment will include the following revisions to the Specific Plan:
 - Any graphic that currently identifies the 10.49 acres of Public School, will be changed to Low-Medium Density Residential;
 - Any text that references acre totals to reflect the land use change;
 - Changes to all tables, including Table 2 – Statistical Analysis, to reflect land use change; and
 - Text and graphic changes to the Development Regulations chapter to accommodate a new product type to serve the Project site.
3. A Tentative Tract Map (File No. PMTT19-015) to subdivide 10.49 acres of land into 106 numbered lots and 19 lettered lots, for property located within the proposed Low-Medium Density Residential land use district of The Avenue Specific Plan, located at the northeast corner of La Avenida Drive and Manitoba Place.
4. The future development of the Project site with 106 single-family dwellings, along with an associated one-half acre park area, and common and private landscaped areas, which will require the submittal of a Development Plan application.

Project Setting: The project site consists of approximately 10.49 acres of land within southeast Ontario. The site is generally rectangular in shape and abuts La Avenida Drive to the south. The site gently slopes to the southwest and is vacant. The site was historically used for agriculture uses, including dairy farms and row crop production. The site is surrounded by residential land uses to the north, west, and south, and by the vacant remainder of the Public School site to the east. Additional residential units are sited to the east of the Public School site.

Background: On January 27, 2010, the Ontario City Council adopted The Ontario Plan (“TOP”). TOP serves as the framework for the City’s business plan and provides a foundation for the City to operate as a municipal corporation that consists of six (6) distinct components: 1) Vision; 2) Governance Manual; 3) Policy Plan; 4) Council Priorities; 5) Implementation; and 6) Tracking and Feedback. The Policy Plan component of TOP meets the functional and legal mandate of a General Plan and contains nine elements: Land Use, Housing, Parks and Recreation, Environmental Resources, Community Economics, Safety, Mobility, Community Design and Social Resources.

An Environmental Impact Report (“EIR”) was prepared for TOP (State Clearinghouse No. 2008101140) and certified by the City Council on January 27, 2010 (hereinafter referred to as “Certified EIR”), which included Mitigation, Findings and a Statement of Overriding Considerations pursuant to the requirements of the California Environmental Quality Act, commencing with Public Resources Code Section 21000 (“CEQA”). The Certified EIR analyzed the direct and physical changes in the environment that would be caused by

TOP implementation; focusing on changes to land use associated with the buildout of the proposed land use plan, and in the Policy Plan and impacts resultant of population and employment growth in the City. The subject site was analyzed in the addendum to the Certified EIR as Low-Medium Density Residential (5.1-11 du/ac) (See Exhibit A) to be consistent with the residential uses to the north, west, and south of the subject site, Public School use to the east, and additional residential farther east. The significant unavoidable adverse impacts that were identified in the original Certified EIR included agriculture resources, air quality, cultural resources, greenhouse gas emissions, noise, and transportation/traffic.

On February 16, 2007, the Ontario City Council adopted The Avenue Specific Plan EIR (State Clearinghouse No. 2005071109), which included Mitigation, Findings and a Statement of Overriding Considerations pursuant to the requirements of the California Environmental Quality Act, commencing with Public Resources Code Section 21000 (“CEQA”). The Certified EIR analyzed the direct and physical changes in the environment that would be caused by The Avenue Specific Plan, which was established so as to be consistent with the underlying Land Use Designations as set forth by TOP and the Policy Plan.

Analysis: According to California Environmental Quality Act Guidelines Section 15164, an Addendum to a previously certified EIR may be used if some changes or additions are necessary, but none of the conditions described in Section 15162 requiring the preparation of a subsequent Negative Declaration or EIR have occurred. The CEQA Guidelines require that a brief explanation be provided to support the findings that no subsequent EIR or Negative Declaration are needed for further discretionary approval. These findings are described below:

- 1) *Required Finding: Substantial changes are not proposed for the project that will require major revisions of the previous EIR due to the involvement of new, significant environmental effects or a substantial increase in the severity of previously identified effects.*

Substantial changes are not proposed by the project and project implementation will not require revisions to TOP EIR. TOP EIR analyzed the direct and physical changes in the environment that would be caused by TOP; focusing on changes to land uses associated with the buildout of the proposed land use plan. The Ontario Plan EIR assumed more overall non-residential development at buildout as shown below. Since the adoption and certification of TOP EIR, several amendments have been approved. These amendments, along with the proposed General Plan Amendment to change the land use designations for 10.49 acres of land, from Public School, Low-Medium Density Residential (5.1-11 du/ac), will result in less public school development than TOP EIR analyzed at buildout. Note that categories listed under “Other” in the TOP Buildout Analysis, including Public School, are not analyzed for “Non-Residential Square Feet” or “Jobs” impacts and have thus been omitted from the table below.

TOP Buildout Analysis	Units	Population	Public School Acreage
Buildout per Original TOP EIR	101,071	348,479	632
Revised Buildout per previous approved TOP amendments and the proposed amendment	101,160	348,836	621

In addition, the proposed GPA would replace the need for a minimum of 450 middle school student trips (based on Table 2-2: Project Trip Generation by Planning Area as analyzed in The Avenue Specific Plan’s Environmental Impact Report). In August 2018, the Mountain View School District completed a School District Facilities Needs Analysis, which determined that future elementary school facilities will be designed to accommodate 800 students, and future middle school facilities will be designed to accommodate 1,200 students. In March 2020, a Trip Generation Assessment (Attached to this document) was completed by Urban Crossroads, which analyzed the impact of the proposed land use change. Per the Mountain View School District, conversion of the existing 20-acre middle school site would result in an approximately ten acres of a single-family detached land use, and ten acres of an elementary school land use (the remaining approximately ten acres of the site not directly affected by the proposed project). The trip generation rates used for the analysis were based on information collected from the Mountain View School District and the Institute of Transportation Engineers (ITE),

as provided in their Trip Generation Manual, 10th Edition, 2017. A summary of the currently approved and proposed trip generation, including the remaining approximately 10-acre parcel, which will shift from a middle school to an elementary school land use, is shown below. Note: at the time of the Trip Generation Analysis, the proposed number of dwelling units was 110; the project has since been reduced to 106 dwelling units. The table below reflects the current project dwelling unit count. As shown, the project and General Plan Amendment, in conjunction with the remaining parcel to the east indirectly affected by the project, is forecast to result in 128 fewer Average Daily Trips (ADT) compared to the assumed middle school development under the existing Public School General Plan land use designation, including 88 fewer Passenger Commuter Equivalent (PCE) trips during the AM peak hour and 27 more PCE trips during the PM peak hour.

Trip Generation Comparison

Land Use	Size	Units	ADT	AM Peak Hour			PM Peak Hour		
				In	Out	Total	In	Out	Total
Proposed Land Use – 106 Residential Single-Family Detached (ITE Land Use 210)	106	SFD							
Trip Rate			9.44	0.19	0.56	0.74	0.62	0.37	0.99
Trip Generation			1,000	20	59	79	65	39	104
Internal Capture (8%)			-84	-2	-5	-7	-6	-3	-9
Remaining Adjacent Land Use – Elementary School, 800 Students (ITE Land Use 520)	800	STD							
Trip Rate			1.89	0.36	0.31	0.67	0.08	0.09	0.17
Trip Generation			1,512	289	247	536	65	71	136
Existing Land Use – Middle School, 1,200 Students (ITE Land Use 522)	1,200	STD							
Trip Rate			2.13	0.31	0.27	0.58	0.08	0.09	0.17
Trip Generation			2,556	376	320	696	100	104	204
TOTAL TRIP GENERATION (Proposed – Existing)			-128	-69	-19	-88	24	3	27

Since the anticipated buildout and trip generations resulting from previous approved TOP amendments and the proposed project changes will be less than that originally analyzed in TOP EIR, no revisions to TOP EIR are required. In addition, all previously adopted mitigation measures are a condition of project approval and are incorporated herein by this reference. The Project will not cause environmental impacts such that any of the circumstances identified in State CEQA Guidelines Section 15162 are present.

- 2) *Required Finding: Substantial changes have not occurred with respect to the circumstances under which the project is undertaken, that would require major revisions of the previous Environmental Impact Report due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects.*

Substantial changes have not occurred with respect to the circumstances under which the project was undertaken, that would require major revisions to TOP EIR in that the proposed changes would be in keeping with the surrounding area. The area surrounding the Project site has been designated as residential and was previously analyzed as such; the land use change proposed will be consistent with the surrounding neighborhood. Therefore, no proposed changes or revisions to the EIR are required. In addition, all previously adopted mitigation measures are a condition of project approval and are incorporated herein by reference. The attached Initial Study provides an analysis of the Project and verification that the Project will not cause environmental impacts such that any of the circumstances identified in State CEQA Guidelines Section 15162 are present.

- 3) *Required Finding. No new information has been provided that would indicate that the proposed project would result in one or more significant effects not discussed in the previous EIR.*

No new information has been provided that would indicate the proposed project would result in any

new significant effects not previously discussed in TOP EIR. Therefore, no proposed changes or revisions to the EIR are required. In addition, all previously adopted mitigation measures are a condition of project approval and are incorporated herein by reference. The attached Initial Study provides an analysis of the Project and verification that the Project will not cause environmental impacts such that any of the circumstances identified in State CEQA Guidelines Section 15162 are present

CEQA Requirements for an Addendum: If changes to a project or its circumstances occur or new information becomes available after adoption of a negative declaration, the lead agency may: (1) prepare a subsequent EIR if the criteria of State CEQA Guidelines Section 15162(a) are met, (2) prepare a subsequent negative declaration, (3) prepare an addendum, or (4) prepare no further documentation. (State CEQA Guidelines Section 15162(b)). When only minor technical changes or additions to the negative declaration are necessary and none of the conditions described in section 15162 calling for the preparation of a subsequent EIR or negative declaration have occurred, CEQA allows the lead agency to prepare and adopt an addendum. (State CEQA Guidelines Section 15164(b).)

Under Section 15162, a subsequent EIR or negative declaration is required only when:

1) Substantial changes are proposed in the project which will require major revisions of the previous negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;

2) Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the negative declaration due to the involvement of any new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or

3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the negative declaration was adopted, shows any of the following:

a) The project will have one or more significant effects not discussed in the previous negative declaration;

b) Significant effects previously examined will be substantially more severe than shown in the previous EIR;

c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or

d) Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

Thus, if the Project does not result in any of the circumstances listed in Section 15162 (i.e., no new or substantially greater significant impacts), the City may properly adopt an addendum to the Certified EIR.

Conclusion: TOP EIR, certified by City Council on January 27, 2010, was prepared as a Program EIR in accordance with CEQA, the State CEQA Guidelines, and the City's Rules for the Implementation of CEQA and in accordance with Section 15121(a) of the State CEQA Guidelines (California Code of Regulations, Title 14, Division 6, Chapter 3). TOP EIR considered the direct physical changes and reasonably foreseeable indirect physical changes in the environment that would be caused by The Ontario Plan. Consequently, TOP EIR focused on impacts from changes to land use associated with buildout of the City's Land Use Plan, within the Policy Plan, and impacts from the resulting population and employment growth in the City. The proposed Specific Plan Amendment coordinates with the existing uses of the properties and uses within the surrounding areas. Subsequent activities within TOP Program EIR have been evaluated to determine whether an additional CEQA document needs to be prepared.

Accordingly, and based on the findings and information contained in the Certified EIR, the analysis above, the attached Initial Study, and CEQA statute and State CEQA Guidelines, including Sections 15164 and 15162, the Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary, nor is there a need for any additional mitigation measures; therefore, pursuant to State CEQA Guidelines Section 15164, the Ontario City Council hereby adopts this Addendum to the Certified EIR.

Surrounding Land Uses:

	Existing Land Use	General Plan Designation	Zoning Designation	Specific Plan Land Use
Site:	Vacant	Public School (Low-Medium Density Residential proposed)	The Avenue Specific Plan	Public School (Low-Medium Density Residential Proposed)
North:	Single-Family Residential	Low-Density Residential (2.1-5 du/ac)	The Avenue Specific Plan	Low Density Residential
South:	Single-Family Residential	Low-Density Residential (2.1-5 du/ac)	The Avenue Specific Plan	Low Density Residential
East:	Vacant	Public School	The Avenue Specific Plan	Public School
West:	Single-Family Residential	Low-Density Residential (2.1-5 du/ac)	The Avenue Specific Plan	Low Density Residential

Other public agencies whose approval is required (e.g., permits, financing approval or participation agreement): None

Tribal Consultation: Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1?
 Yes No N/A

If "yes," has consultation begun? Yes No Completed

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

- | | | |
|--|---|---|
| <input type="checkbox"/> Aesthetics | <input type="checkbox"/> Agriculture/Forestry Resources | <input type="checkbox"/> Air Quality |
| <input type="checkbox"/> Biological Resources | <input type="checkbox"/> Cultural Resources | <input type="checkbox"/> Geology / Soils |
| <input type="checkbox"/> Greenhouse Gas Emissions | <input type="checkbox"/> Hazards & Hazardous Materials | <input type="checkbox"/> Hydrology / Water Quality |
| <input type="checkbox"/> Land Use / Planning | <input type="checkbox"/> Mineral Resources | <input type="checkbox"/> Noise |
| <input type="checkbox"/> Population / Housing | <input type="checkbox"/> Public Services | <input type="checkbox"/> Recreation |
| <input type="checkbox"/> Transportation | <input type="checkbox"/> Utilities / Service Systems | <input type="checkbox"/> Mandatory Findings of Significance |
| <input type="checkbox"/> Tribal Cultural Resources | <input type="checkbox"/> Wildfire | <input type="checkbox"/> Energy |

DETERMINATION (To be completed by the Lead Agency)

On the basis of this initial evaluation:

- I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
- I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
- I find that the proposed project MAY have a "potentially significant" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
- I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

For

EVALUATION OF ENVIRONMENTAL IMPACTS

1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g. the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g. the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).

2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.

3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect is significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.

4) "Negative Declaration: Less Than Significant with Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from the "Earlier Analyses" Section may be cross-referenced).

5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or Negative Declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:

- a) Earlier Analyses Used. Identify and state where they are available for review.
- b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the

scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.

c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.

6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g. general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

7) Supporting Information Sources. A source list should be attached, and other sources used, or individuals contacted should be cited in the discussion.

8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.

9) The explanation of each issue should identify:

- a) The significance criteria or threshold, if any, used to evaluate each question; and
- b) The mitigation measure identified, if any, to reduce the impact to less than significance.

<i>Issues</i>	<i>Potentially Significant Impact</i>	<i>Less Than Significant with Mitigation</i>	<i>Less Than Significant Impact</i>	<i>Impacts Previously Analyzed in TOP EIR</i>
1. AESTHETICS. Would the project:				
a. Have a substantial adverse effect on a scenic vista?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
2. AGRICULTURE AND FOREST RESOURCES. In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest protocols adopted by the California Air Resources Board. Would the project:				

Issues	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	Impacts Previously Analyzed in TOP EIR
a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Result in the loss of forest land or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
3. AIR QUALITY. Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:				
a. Conflict with or obstruct implementation of the applicable air quality plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Expose sensitive receptors to substantial pollutant concentrations?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Result in other emissions (such as those leading to odors adversely affecting a substantial number of people)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
4. BIOLOGICAL RESOURCES. Would the project:				
a. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Issues	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	Impacts Previously Analyzed in TOP EIR
f. Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
5. CULTURAL RESOURCES. Would the project:				
a. Cause a substantial adverse change in the significance of a historical resource pursuant to Section 15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Disturb any human remains, including those interred outside of dedicated cemeteries?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
6. ENERGY. Would the project:				
a. Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
7. GEOLOGY AND SOILS. Would the project:				
a. Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury or death involving:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
ii. Strong seismic ground shaking?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
iii. Seismic-related ground failure, including liquefaction?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
iv. Landslides?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Result in substantial soil erosion or the loss of topsoil?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Be located on expansive soil, as defined in Table 18 1 B of the Uniform Building Code, creating substantial direct or indirect risks to life or property?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f. Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
8. GREENHOUSE GAS EMISSIONS. Would the project:				

Issues	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	Impacts Previously Analyzed in TOP EIR
a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emission of greenhouse gases?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
9. HAZARDS AND HAZARDOUS MATERIALS. Would the project:				
a. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
g. Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
10. HYDROLOGY AND WATER QUALITY. Would the project:				
a. Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
i. result in substantial erosion or siltation on- or off-site;	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
ii. substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite;	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
iii. create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Issues	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	Impacts Previously Analyzed in TOP EIR
iv. impede or redirect flood flows?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
11. LAND USE AND PLANNING. Would the project:				
a. Physically divide an established community?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
12. MINERAL RESOURCES. Would the project:				
a. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
13. NOISE. Would the project result in:				
a. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Generation of excessive groundborne vibration or groundborne noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
14. POPULATION AND HOUSING. Would the project:				
a. Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of road or other infrastructure)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
15. PUBLIC SERVICES. Would the project:				
a. Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
i. Fire protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
ii. Police protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
iii. Schools?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
iv. Parks?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
v. Other public facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Issues	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	Impacts Previously Analyzed in TOP EIR
16. RECREATION. Would the project:				
a. Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Does the project include recreational facilities or require the construction or expansion of recreational facilities which have an adverse physical effect on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
17. TRANSPORTATION. Would the project:				
a. Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Result in inadequate emergency access?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
18. TRIBAL CULTURAL RESOURCES. Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is				
a. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
19. UTILITIES AND SERVICE SYSTEMS. Would the project:				
a. Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Issues	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	Impacts Previously Analyzed in TOP EIR
20. WILDFIRES. If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:				
a. Substantially impair an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
21. MANDATORY FINDINGS OF SIGNIFICANCE.				
a. Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current project, and the effects of probable future projects.)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

EXPLANATION OF ISSUES

1. AESTHETICS. Would the project:

a. Have a substantial adverse effect on a scenic vista?

Discussion of Effects: The Policy Plan (General Plan) does not identify scenic vistas within the City. However, the Policy Plan (Policy CD1-5) requires all major north-south streets be designed and redeveloped to feature views of the San Gabriel Mountains. The project site is not directly adjacent to any Principal Arterials, as identified in the Functional Roadway Classification Plan (Figure M-2) of the Mobility Element within the Policy Plan. The proposed General Plan Amendment and Specific Plan Amendment to change the land use designation on 10.49 acres of land, from Public School to Low-Medium Density

Residential (5.1-11 du/ac), will not result in adverse environmental impacts with regard to views of the San Gabriel Mountains. Therefore, no adverse impacts are anticipated in relation to the project.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP EIR. No changes or additions to the Certified EIR analyses are necessary.

b. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings and historic buildings within a state scenic highway?

Discussion of Effects: The City of Ontario is served by three freeways: I-10, I-15, and SR-60. I-10 and SR-60 traverse the northern and central portion of the City, respectively, in an east–west direction. I-15 traverses the northeastern portion of the City in a north–south direction. These segments of I-10, I-15, and SR-60 have not been officially designated as scenic highways by the California Department of Transportation. In addition, there are no historic buildings, or any scenic resources identified on or in the vicinity of the project site. Therefore, it will not result in adverse environmental impacts.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP EIR. No changes or additions to the Certified EIR analyses are necessary.

c. In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?

Discussion of Effects: The Project would not degrade the existing visual character or quality of the site or its surroundings. The project site is located in an area that is characterized by residential development and is surrounded by urban land uses.

Any development proposals that would subsequently occur from the proposed Project will be required to be in accordance with the policies of the Community Design Element of the Policy Plan (General Plan) and zoning designations on the property. Therefore, no adverse impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP EIR. No changes or additions to the Certified EIR analyses are necessary.

d. Create a new source of substantial light or glare that would adversely affect day or nighttime views in the area?

Discussion of Effects: The proposed land use change itself will not cause lighting to be installed in the Project. New lighting will be introduced to the site with the development of the project. Pursuant to the requirements of the City’s Development Code, on-site lighting will be shielded, diffused or indirect, to avoid glare to pedestrians or motorists. In addition, lighting fixtures will be selected and located to confine the area of illumination to within the project site and minimize light spillage.

Site lighting plans will be subject to review by the Planning Department and Police Department prior to issuance of building permits (pursuant to the City’s Building Security Ordinance). Therefore, no adverse impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

2. AGRICULTURE AND FOREST RESOURCES. In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state’s inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. Would the project:

a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

Discussion of Effects: The site is presently vacant and does not contain any agricultural uses. Further, the site is identified as Urban and Built-up Land on the map prepared by the California Resources Agency, pursuant to the Farmland Mapping and Monitoring Program. As a result, no adverse environmental impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP EIR. No changes or additions to the Certified EIR analyses are necessary.

b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?

Discussion of Effects: The project site is not zoned for agricultural use. The project proposes a General Plan Amendment and Specific Plan Amendment to change the land use designation for 10.49 acres of land from Public School to Low-Medium Density Residential (5.1-11 du/ac). Future development will be consistent with the development standards and allowed land uses. Furthermore, there are no Williamson Act contracts in effect on the subject site. Therefore, no impacts to agricultural uses are anticipated, nor will there be any conflict with Williamson Act contracts.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

c. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?

Discussion of Effects: The proposed project would not result in the rezoning of forest land, timberland, or timberland zoned Timberland Production because such land use designations do not exist within the City of Ontario. Therefore, no impacts to forest or timberland are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

d. Result in the loss of forest land or conversion of forest land to non-forest use?

Discussion of Effects: There is currently no land in the City of Ontario that qualifies as forest land as defined in Public Resources Code section 12220(g). Neither TOP nor the City's Zoning Code provide designations for forest land. Consequently, the proposed project would not result in the loss or conversion of forest land.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP EIR. No changes or additions to the Certified EIR analyses are necessary.

e. Involve other changes in the existing environment, which, due to their location or nature, could individually or cumulatively result in loss of Farmland to non-agricultural use or conversion of forest land to non-forest use?

Discussion of Effects: Implementation of the Project would not result in changes to the existing environment other than those previously addressed in the Certified EIR. While conversion of farmland increases the potential for adjacent areas to also be converted from farmland to urban uses, there are no agricultural uses occurring onsite or in the vicinity and the Project does not directly or indirectly result in conversion of farmland. No new cumulative impacts beyond those identified in the Certified EIR would result from Project implementation. As a result, the project will not result in loss of Farmland to non-agricultural use.

Additionally, there is currently no land in the City of Ontario that qualifies as forest land as defined in Public Resources Code Section 12220(g). Neither TOP nor the City's Zoning Code provide designations

for forest land. Consequently, to the extent that the proposed project would result in changes to the existing environment, those changes would not impact forest land.

Mitigation Required: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP EIR. No changes or additions to the Certified EIR analyses are necessary.

3. AIR QUALITY. Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:

a. Conflict with or obstruct implementation of the applicable air quality plan?

Discussion of Effects: The subject site was previously analyzed by the Certified EIR as Public School and is generally surrounded on all sides by residential land uses. The project will not conflict with or obstruct implementation of any air quality plan. As noted in the Certified EIR (Section 5.3), pollutant levels in the Ontario area already exceed Federal and State standards. To reduce pollutant levels, the City of Ontario is actively participating in efforts to enhance air quality by implementing Control Measures in the Air Quality Management Plan for local jurisdictions within the South Coast Air Basin.

The proposed project is consistent with The Ontario Plan, for which the EIR was prepared and impacts evaluated. Furthermore, the project is consistent with the City's participation in the Air Quality Management Plan and, because of the project's limited size and scope, will not conflict with or obstruct implementation of the plan. Mitigation (Mitigation Measure 5.3-2) has been adopted by the City that requires fugitive dust control measures pursuant to SCAQMD's Rule 403, use of Tier 3 construction equipment, proper service and maintenance of construction equipment, limiting nonessential idling of construction equipment, and use of Super-Compliant VOC paints for coating and architectural surfaces. Any future development proposals on the project site will be required to comply with Mitigation Measure 5.3-2. No new impacts beyond those identified in the Certified EIR would result from Project implementation.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

b. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?

Discussion of Effects: The project will not result in a cumulatively considerable net increase of any criteria pollutant for which the region is in non-attainment under an applicable federal or state ambient air quality because the Project is a Specific Plan Amendment that adds residential land uses to property surrounded by residential land uses by the Official Land Use Map (Exhibit LU-01) of the Policy Plan component of TOP. Mitigation (Mitigation Measure 5.3-1) has already been adopted by the City that would facilitate continued City cooperation with the SCAQMD and SCAG to achieve regional air quality improvement goals, promote energy conservation design and development techniques, encourage alternative modes of transportation, and implement transportation demand strategies. The project will comply with the air quality standards of the Certified EIR and the SCAQMD resulting in impacts that are less than significant [please refer to Sections 3(a) and 3(b)].

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

c. Expose sensitive receptors to substantial pollutant concentrations?

Discussion of Effects: The subject site was previously analyzed by the Certified EIR as Public School and is surrounded on all sides by residential land uses. As discussed in Section 5.3 of the Certified EIR, the proposed Project is within a non-attainment region of the South Coast Air Basin (SCAB). The proposed General Plan Amendment and Specific Plan Amendment closely correlates with the land use designations of the surrounding area and will not generate significant new or greater air quality impacts than identified in the Certified EIR. Adequate mitigation (Mitigation Measure 5.3-5) has already been adopted by the City that would require new developments to be consistent with recommended buffer distances of the California Air Resources Board's Air Quality and Land Use Handbook: A Community Health Perspective (April 2005). Under this mitigation, new development that is inconsistent with the recommended

buffer distances shall only be approved if all feasible mitigation measures, such as high efficiency Minimum Efficiency Reporting Value filters, have been incorporated into the project design to protect future sensitive receptors from harmful concentrations of air pollutants as a result of proximity to existing air pollution sources. As no industrial or commercial development is proposed for this site, the introduction of additional residential units to an area currently dominated by residential land uses will not subject the existing residential land uses/sensitive receptors to substantial pollutant concentrations. No new impacts beyond those identified in the Certified EIR would result from Project implementation.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

d. Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

Discussion of Effects: The subject site was previously analyzed by TOP EIR as Public School and is surrounded on all sides by residential land uses. The use proposed on the subject site (residential) does not create objectionable odors. Further, the project shall comply with the policies of the Ontario Municipal Code and the Policy Plan (General Plan). Therefore, no adverse impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP EIR. No changes or additions to the Certified EIR analyses are necessary.

4. BIOLOGICAL RESOURCES. Would the project:

a. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

Discussion of Effects: The subject site was previously analyzed by the Certified EIR as Public School and is surrounded on all sides by residential land uses. According to the Certified EIR, the project site is located within an area that has been identified as containing species identified as a candidate, sensitive, or special status species in local or regional plans, policies or regulations or by the California Department of Fish and Game or the U.S. Fish and Wildlife Service. The species includes the Delhi Sands Flower Loving Fly ("DSF"). However, the species was not observed on site during general surveys conducted as a result of the Supplemental EIR ("SEIR") for The Avenue Specific Plan, certified in February 2010. Further, all previous focused DSF surveys conducted in the eastern portions of the site were negative. Since certification of the SEIR, construction has occurred all around the project site, isolating the site. Additionally, much of the Specific Plan area has been highly disturbed and degraded over decades of continuous dairy and agricultural practices, and do not support any of the plant species typically associated with the presence of the DSF. Therefore, DSF is not expected to occur within the project site and focused surveys were not recommended.

Previous western burrowing owl studies have revealed portions of The Avenue Specific Plan have been inhabited by paired and unpaired owls. A standard mitigation measure is to provide burrowing owl surveys prior to ground disturbance.

In addition to the western burrowing owl, other special-status animal species have some potential (albeit very limited) to occur on site, such as nesting birds. A standard mitigation measure is to provide nesting bird surveys prior to ground disturbance.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP EIR. No changes or additions to the Certified analyses are necessary.

b. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

Discussion of Effects: The subject site was previously analyzed by the Certified EIR Public School and is surrounded by residential land uses. The site does not contain any riparian habitat or other sensitive

natural community identified by the Department of Fish & Game or Fish & Wildlife Service. Therefore, no adverse environmental impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

c. Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

Discussion of Effects: No wetland habitat is present on site. Therefore, project implementation would have no impact on these resources.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

d. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

Discussion of Effects: The site is a vacant property that is bounded on all four sides by development. As a result, there are no wildlife corridors connecting this site to other areas. Therefore, no adverse environmental impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

e. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

Discussion of Effects: The City of Ontario does not have any specific policies or ordinances protecting biological resources. Further, the project site does not contain any mature trees necessitating the need for preservation. As a result, no adverse environmental impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

f. Conflict with the provisions of an adopted Habitat Conservation Plan (HCP), Natural Community Conservation Plan (NCCP), or other approved local, regional, or state habitat conservation plan?

Discussion of Effects: The site is not part of an adopted HCP, NCCP or other approved habitat conservation plan. As a result, no adverse environmental impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

5. CULTURAL RESOURCES. Would the project:

a. Cause a substantial adverse change in the significance of a historical resource pursuant to Section 15064.5?

Discussion of Effects: The subject site was previously analyzed by The Avenue Specific Plan for a Public School and use. The subject site is vacant and does not contain any buildings or structures constructed more than 50 years ago and cannot be considered for eligibility for listing in the California Register of Historic Resources. Archival records searches were conducted within the San Bernardino Eastern Information Center in Riverside, California, and the Archaeological Information Center at the San Bernardino County Museum as a result of The Avenue SP EIR process. The records failed to show any prehistoric archeological sites, isolates, or any historic cultural resources within the Specific Plan area. A total of eight structures at five different addresses were identified as potentially historic within the Specific

Plan area; however, none of these resources occur within the subject project site. The potential historic resources identified as part of The Avenue Specific Plan's EIR process will not be impacted (directly or indirectly) by the proposed Project. Therefore, no adverse impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

b. Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?

Discussion of Effects: The Certified EIR (Section 5.5) indicates no archeological sites or resources have been recorded in the City with the Archeological Information Center at San Bernardino County Museum. The Project site has been highly disturbed by modern human activities to include dairy and crop production uses and grading activities that would have displaced potential surface and subsurface archaeological resources. Therefore, the proposed Project will not impact cultural (prehistoric, historic, or historic built environments) resources and no mitigation measures are recommended. While no adverse impacts to archeological resources are anticipated at this site due to its urbanized nature, standard conditions have been imposed on the project that in the event of unanticipated archeological discoveries, construction activities will not continue or will moved to other parts of the project site and a qualified archaeologist shall be contacted to determine significance of these resources. If the find is discovered to be historical or unique archaeological resources, as defined in Section 15064.5 of the CEQA Guidelines, avoidance or other appropriate measures shall be implemented.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

c. Disturb any human remains, including those interred outside of formal cemeteries?

Discussion of Effects: The proposed project is in an area that has been previously disturbed by human activity. No known religious or sacred sites exist within the Project area. Thus, human remains are not expected to be encountered during any construction activities. However, in the unlikely event that human remains are discovered, existing regulations, including the California Public Resources Code Section 5097.98, would afford protection for human remains discovered during development activities. Furthermore, standard conditions have been imposed on the project that in the event of unanticipated discoveries of human remains are identified during excavation, construction activities, the area shall not be disturbed until any required investigation is completed by the County Coroner and/or Native American consultation has been completed, if deemed applicable.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

6. ENERGY Would the project:

a. Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

Discussion of Effects: Energy was not analyzed in the Certified EIR but has been included as part of the 2019 revisions to the State CEQA Guidelines. Implementation of the Project would increase the demand for electricity and natural gas at the Project site and gasoline consumption in the region during construction and operation. A detailed discussion is provided below.

Electricity

Construction. Temporary electric power would be required for lighting and electronic equipment (e.g., computers) located in trailers used by the construction crew. However, the electricity used for such activities would be temporary and would have a negligible contribution to the project's overall energy consumption.

Operational. The proposed General Plan Amendment and Specific Plan Amendment will change the land use designation for 10.49 acres of land, from Public School to Low-Medium Density Residential (5.1-11 du/ac). The Project does not include construction of an actual development; however, the proposed

residential land use will be similar to the already allowed school use, and will have similar energy use during operation, as residential, school, or commercial-type uses would require electricity for multiple purposes, such as: building heating and cooling, lighting, appliances, and electronics. Any future development on the site would be required to comply with the CALGreen Building Code requirements in effect at the time of development, which are more efficient than the 2016 standards. Moreover, the Project will include a sample Greenhouse Gas Reduction Measure Screening Table for Residential and Commercial Development. The Screening Table includes measures for energy efficient development, indoor space efficiency measures, building efficiency measures, renewable energy measures, and water conservation measures. Measures that would reduce electricity consumption include, but are not limited to: greatly enhanced window insulation, an enhanced cool-roof, an improved efficiency heating, ventilation, and air conditioning (“HVAC”) system, blower doors HERS verified Envelope leakage or equivalent, enhanced duct insulation, Energy Star commercial appliances, water efficient landscaping and irrigation systems, and water-efficient toilets and faucets. Although electricity consumption would increase at the site under implementation of the Project, the building envelope, HVAC, lighting, and other systems, would be designed to maximize energy performance. The project would also be subject to statewide mandatory energy requirements as outlined in the CALGreen Code. In addition, the Project would implement additional measures, as detailed in the GHG reduction measures screening table, that would further reduce electricity consumption. Electricity that would be consumed by the Project would also be subject to the cap-and-trade regulation. For these reasons, the electricity that would be consumed by the Project is not considered to be inefficient or wasteful, and impacts would be less than significant.

Natural Gas

Construction. Natural gas consumption is not anticipated during construction of the Project. Fuels used for construction would generally consists of diesel and gasoline, which are discussed in the next subsection. Any amounts of natural gas that may be consumed during project construction would be nominal and would have a negligible contribution to the project’s overall energy consumption

Operational. The proposed General Plan Amendment and Specific Plan Amendment will change the land use designation for 10.49 acres of land, from Public School to Low-Medium Density Residential (5.1-11 du/ac). The Project does not include construction of an actual development. However, during hypothetical operation of the Project, a residential use would require natural gas consumption for various purposes, such as building heating and cooling. Any future structure developed on the site would be built to the 2016 Title 24 CALGreen efficiency requirements or the code in effect at the time of development. In addition, measures will be applied based on the information contained in the County’s GHG DRP checklist. These measures include, but are not limited to: enhanced wall, attic, and window insulation; high efficiency water heater, and optimized building orientation. Although natural gas consumption would increase at the site under implementation of the Project, the building envelope, HVAC, lighting, and other systems, would be designed to maximize energy performance. The project would be subject to statewide mandatory energy requirements as outlined in the CALGreen Code. In addition, the project would implement additional measures, as detailed in the GHG reduction measures screening table, that would further reduce natural gas consumption. Natural gas that would be consumed by the Project would also be subject to the cap-and-trade regulation. For these reasons, the natural gas that would be consumed by the project is not considered to be inefficient or wasteful, and impacts would be less than significant.

Diesel and Gasoline Fuel

Construction. Diesel and gasoline fuels, also referred to as petroleum in this subsection, would be consumed throughout construction of the Project. Fuel consumed by construction equipment would be the primary energy resource consumed over the course of construction, and vehicle miles traveled (“VMT”) associated with the transportation of construction materials (e.g., deliveries to the site) and worker trips to and from the site would also result in petroleum consumption. Whereas on-site, heavy-duty construction equipment and delivery trucks would predominantly use diesel fuel, construction workers would generally rely on gasoline-powered vehicles. Any future development would be required to comply with CARB’s Airborne Toxic Control Measures, which restricts heavy-duty diesel vehicle idling to five minutes. Since petroleum use during construction would be temporary and required to conduct development activities, it would not be wasteful or inefficient, and impacts would be less than significant.

Operational. Fuel consumption associated with development pursuant to the Project’s operational phase would primarily be attributable to workers commuting to and from the Project and the operation of

large, diesel-powered trucks (e.g., semi-trucks) needed to transport goods. Over the lifetime of the Project, the fuel efficiency of the vehicles being used by the employees is expected to increase. As such, the amount of petroleum consumed as a result of vehicular trips to and from the Project site during operation is anticipated to decrease over time. There are numerous regulations in place that require and encourage fuel efficiency. For example, CARB has adopted an approach to passenger vehicles by combining the control of smog-causing pollutants and GHG emissions into a single, coordinated package of standards. The approach also includes efforts to support an accelerate the number of plug-in hybrids and ZEVs in California. In addition, per the requirements identified in SB 375, CARB adopted a regional goal for the SCAG region of reducing per-capita GHG emissions from 2005 levels by 8 percent by 2020 and 19 percent by 2035 for light-duty passenger vehicles. Accordingly, operation of the Project is expected to decrease the amount of petroleum it consumes in the future due to advances in fuel economy. Although the Project would increase petroleum use in the region during construction and operation, the use would be a small fraction of the statewide use and, due to efficiency increases, would diminish over time. As such, petroleum consumption associated with the Project would not be considered inefficient or wasteful and would result in a less-than-significant impact.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts. No changes or additions to the Certified EIR analyses are necessary.

b. Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

Discussion of Effects: The Project would not conflict with or obstruct a state or local plan adopted for the purposes of increasing the amount of renewable energy or energy efficiency. The California Title 24 Building Code contains energy efficiency standards for residential buildings. These standards address electricity and natural gas efficiency in lighting, water, heating, and air conditioning, as well as the effects of the building envelope (e.g., windows, doors, walls and roofs, etc.) on energy consumption. As described above, the Project would be required to comply with the 2019 Title 24 CALGreen standards and would implement additional measures as identified in the County's GHG DRP checklist. Since the Project would comply with applicable State standards and adhere to the County's energy reductions measures identified in the GHG Emissions Reduction Plan, the Project would not conflict with nor obstruct a state or local plan for renewable energy or energy efficiency. This impact would be less than significant.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts. No changes or additions to the Certified EIR analyses are necessary.

7. GEOLOGY & SOILS. Would the project:

a. Expose people or structures to potential substantial adverse effects, including the risk of loss, injury or death involving:

i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.

Discussion of Effects: There are no active faults known on the site and the project site is located outside the Fault Rapture Hazard Zone (formerly Alquist-Priolo Zone). The Certified TOP EIR (Section 5.7/Figure 5.7-2) identifies eight active or potentially active fault zones near the City. Given that the closest fault zone is located more than ten miles from the project site, fault rupture within the project area is not likely. All development will comply with the Uniform Building Code seismic design standards to reduce geologic hazard susceptibility. Therefore, no adverse impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

ii. Strong seismic ground shaking?

Discussion of Effects: There are no active faults known on the site and the project site is located outside the Fault Rapture Hazard Zone (formerly Alquist-Priolo Zone). The Certified TOP EIR (Section 5.7/Figure 5.7-2) identifies eight active or potentially active fault zones near the City. The closest fault zone is located more than ten miles from the project site. The proximity of the site to the active faults will result in ground shaking during moderate to severe seismic events. All construction will comply with the California

Building Code, the Ontario Municipal Code, The Ontario Plan and all other ordinances adopted by the City related to construction and safety. Therefore, no adverse impacts are anticipated

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

iii. Seismic-related ground failure, including liquefaction?

Discussion of Effects: As identified in the Certified EIR (Section 5.7), groundwater saturation of sediments is required for earthquake induced liquefaction. In general, groundwater depths shallower than 10 feet to the surface can cause the highest liquefaction susceptibility. Depth to ground water at the project site during the winter months is estimated to be between 250 to 450 feet below ground surface. Therefore, the liquefaction potential within the project area is minimal. Implementation of The Ontario Plan strategies, Uniform Building Code and Ontario Municipal code would reduce impacts to a less than significant level.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

iv. Landslides?

Discussion of Effects: The project would not expose people or structures to potential adverse effects, including the risk of loss, injury, or death involving landslides because the relatively flat topography of the project site (less than 2 percent slope across the City) makes the chance of landslides remote. Amending the Specific Plan Planning Area 1 to allow warehousing, distribution, and/or manufacturing uses will not create greater landslide potential impacts than were identified in the Certified EIR. Implementation of The Ontario Plan strategies, Uniform Building Code and Ontario Municipal Code would reduce impacts to a less than significant level.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

b. Result in substantial soil erosion or the loss of topsoil?

Discussion of Effects: The proposed Specific Plan Amendment to change the land use designation of 10.49 acres of land, from Public School to Low-Medium Density Residential (5.1-11 du/ac) will not create greater erosion impacts than were identified in the Certified TOP EIR. Impacts will be less than significant with mitigation.

The project will not result in significant soil erosion or loss of topsoil because of the previously disturbed nature of the Project site and the limited size and scope of the Project. Grading increases the potential for erosion by removing protective vegetation, changing natural drainage patterns, and constructing slopes. However, compliance with the California Building Code and review of grading plans by the City Engineer will ensure no significant impacts will occur. In addition, the City requires an erosion/dust control plan for projects located within this area. Implementation of a NPDES program, the Environmental Resource Element of the Policy Plan (General Plan) strategies, Uniform Building Code and Ontario Municipal code would reduce impacts to a less than significant level.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

c. Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?

Discussion of Effects: The proposed GPA and SPA to change the land use designation of 10.49 acres of land, from Public School to Low-Medium Density Residential (5.1-11 du/ac) will not create greater landslide potential impacts than were identified in the Certified EIR. In addition, the associated projects would not result in the location of development on a geologic unit or soil that is unstable, or that would become unstable because as previously discussed, the potential for liquefaction and landslides associated

with the project is less than significant. The Certified EIR (Section 5.7) indicates that subsidence is generally associated with large decreases or withdrawals of water from the aquifer. The project would not withdraw water from the existing aquifer. Further, implementation of The Ontario Plan strategies, Uniform Building Code and Ontario Municipal code would reduce impacts to a less than significant level.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

d. Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?

Discussion of Effects: The majority of Ontario, including the project site, is located on alluvial and eolian soil deposits. These types of soils are not considered to be expansive. Therefore, no adverse impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

e. Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?

Discussion of Effects: The area is served by the local sewer system and the use of alternative systems is not necessary. There will be no impact to the sewage system.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

f. Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

Discussion of Effects: The City of Ontario is underlain by deposits of Quaternary and Upper-Pleistocene sediments deposited during the Pliocene and early Pleistocene time, Quaternary Older Alluvial sediments may contain significant, nonrenewable, paleontological resources and are, therefore, considered to have high sensitivity at depths of 10 feet or more below ground surface. In addition, the Certified EIR (Section 5.5) indicates that one paleontological resource has been discovered in the City. Moreover, results of the paleontological resources search through the Natural History Museum of Los Angeles County (NHMLAC) indicate that there are no known vertebrate fossil localities or unique geological features that have been previously identified within the Project area or within a one-mile radius. The results of the literature review and the search at the NHMLAC indicate that the Project site has surficial sediments composed of younger Quaternary Alluvium, derived as alluvial fan deposits from the San Gabriel Mountains to the north or as dune sands. These deposits typically do not contain significant vertebrate fossils, at least in the uppermost layers, but they may be underlain by older sedimentary materials at estimated depths greater than 9 feet. Consequently, it is concluded that the proposed Project will not impact paleontological resources or unique geological features and, as such, no mitigation measures are recommended. While no adverse impacts are anticipated, standard conditions have been imposed on the Project that in the event of unanticipated paleontological resources are identified during excavation, construction activities will not continue or will be moved to other parts of the Project site and a qualified paleontologist shall be contacted to determine significance of these resources. If the find is determined to be significant, avoidance or other appropriate measures shall be implemented.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

8. GREENHOUSE GAS EMISSIONS. Would the project:

a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

Discussion of Effects: The subject site was previously analyzed by the Certified EIR as a Public School use. Additionally, the impact of buildout of The Ontario Plan on the environment due to the emission

of greenhouse gases (“GHGs”) was analyzed in the Certified EIR. According to the EIR, this impact would be significant and unavoidable (Re-circulated Portions of the Ontario Plan Draft Environmental Impact Report, p. 2-118.) This EIR was certified by the City on January 27, 2010, at which time a statement of overriding considerations was also adopted for The Ontario Plan’s significant and unavoidable impacts, including that concerning the emission of greenhouse gases. Amending the Specific Plan Planning Area 6B to allow additional residential uses on the site will not create significantly greater impacts than were identified in the Certified EIR. Therefore, quantification of Project-specific GHG emissions is not required.

Additionally, pursuant to Public Resources Code Section 21083.3, this impact need not be analyzed further, because (1) the proposed project would result in an impact that was previously analyzed in the Certified EIR, which was certified by the City; (2) the proposed project would not result in any greenhouse gas impacts that were not addressed in the Certified EIR; (3) the proposed project is consistent with The Ontario Plan. The proposed impacts of the project were already analyzed in the Certified EIR and the project will be built to current energy efficient standards. Potential impacts of project implementation will be less than significant with mitigation already required under the Certified EIR and current energy efficiency standards. No changes or additions to the Certified EIR analyses are necessary.

Mitigation Required: No new mitigation measures required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to TOP EIR analyses are necessary. The mitigation measures adopted as part of TOP EIR adequately address any potential significant impacts and there is no need for any additional mitigation measures. The City has reviewed the emission reduction measures and concepts in The Ontario Plan EIR’s MM 6-2 and 6-3, and has determined that the following actions apply and shall be undertaken by the applicant in connection with the project: energy efficient design, efficient irrigation systems, and compliance with Title 24 of the California Code of Regulations.

b. Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?

Discussion of Effects: The subject site was previously analyzed by the Certified EIR as a Public School use. The proposed Project is consistent with The Ontario Plan Goal ER 4 of improving air quality by, among other things, implementation of Policy ER4-3, regarding the reduction of greenhouse gas emissions in accordance with regional, State, and federal regulations. In addition, the proposed Project is consistent with the policies outlined in Section 5.6.4 of the Environmental Impact Report for The Ontario Plan, which aims to reduce the City’s contribution of greenhouse gas emissions at build-out by fifteen percent, because the project is upholding the applicable City’s adopted mitigation measures as represented in 6-1 through 6-6 and energy efficient design, efficient irrigation systems, electric vehicle charging stations, and compliance with Title 24 of the California Code of Regulations. The Project is consistent with the City’s Climate Action Plan. Therefore, the proposed Project does not conflict with an applicable plan, policy or regulation adopted for the purpose of reducing emissions of greenhouse gases.

Mitigation Required: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

9. HAZARDS & HAZARDOUS MATERIALS. Would the project:

a. Create a significant hazard to the public or the environment through the routine transport, use or disposal of hazardous materials?

Discussion of Effects: The subject site was previously analyzed by TOP EIR as a Public School use. The project is not anticipated to involve the transport, use or disposal of hazardous materials during either construction or project implementation. Therefore, no adverse impacts are anticipated. However, in the unlikely event of an accident, implementation of the strategies included in The Ontario Plan will decrease the potential for health and safety risks from hazardous materials to a less than significant impact.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

Discussion of Effects: The subject site was previously analyzed by the Certified EIR as a Public School use. The proposed project does not include the use of hazardous materials or volatile fuels. In addition, there are no known stationary commercial or industrial land uses within close proximity to the subject site, which use/store hazardous materials to the extent that they would pose a significant hazard to visitors/occupants to the subject site, in the event of an upset condition resulting in the release of a hazardous material.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

c. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances or waste within one-quarter mile of an existing or proposed school?

Discussion of Effects: The proposed project does not include the use, emissions or handling of hazardous or acutely hazardous materials, substances, or waste. Therefore, no impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

d. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

Discussion of Effects: The proposed project site is not listed on the hazardous materials site compiled pursuant to Government Code Section 65962.5. Therefore, the project would not create a hazard to the public or the environment and no impact is anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

e. For a project located within the safety zone of the airport land use compatibility plan for ONT or Chino Airports, would the project result in a safety hazard for people residing or working in the project area?

Discussion of Effects: The proposed project was reviewed and found to be located within the Airport Influence Area of Ontario International Airport ("ONT") and was evaluated and found to be consistent with the policies and criteria of the Airport Land Use Compatibility Plan ("ALUCP") for ONT. The site is located within the airport influence area but outside the airport safety zones. The proposed GPA and SPA to change the land use designation of 10.49 acres of land from Public School to Low-Medium Density Residential (5.1-11 du/ac) is compatible with the ALUCP. In addition, the project site lies outside the boundaries of the Chino Airport Influence Area. Therefore, any impacts would be reduced to a less than significant level.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

f. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

Discussion of Effects: The City's Safety Element, as contained within The Ontario Plan, includes policies and procedures to be administered in the event of a disaster. The Ontario Plan seeks interdepartmental and inter-jurisdictional coordination and collaboration to be prepared for, respond to and recover from every day and disaster emergencies. In addition, the project will comply with the requirements of the Ontario Fire Department and all City requirements for fire and other emergency access. Because the project is required to comply with all applicable City codes, any impacts would be reduced to a less than significant level.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

g. Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?

Discussion of Effects: The project site is not located in or near wildlands. Therefore, no impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

10. HYDROLOGY & WATER QUALITY. Would the project:

a. Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?

Discussion of Effects: The project site is served by City water and sewer service and will not affect water quality standards or waste discharge requirements. The grading and drainage of The Avenue Specific Plan area shall be designed to detain, filter, and treat surface runoff, in a manner and combination which is practical, to comply with the most recent requirements of the San Bernardino County NPDES Stormwater Program's Water Quality Management (WQMP) for significant new development projects. The objective of the WQMP for this project is to minimize the detrimental effects of urbanization on the beneficial uses of receiving waters, including effects caused by increased pollutants and changes in hydrology. These effects may be minimized through the implementation of site designs that reduce runoff and pollutant transport by minimizing impervious surfaces and maximizing on-site infiltration, Source Control Best Management Practices (BMPs) and/or either on-site structural Treatment Control BMP's, or participation in regional or watershed-based Treatment Control BMPs. Prior to the issuance of a grading or construction permit, a Storm Water Pollution Prevention Plan (SWPPP) will also be prepared. The SWPPP will be prepared to comply with the California State Water Resources Control Board's (State Water Board) current, "General Permit to Discharge Storm Water Associated with Construction Activity" and the current Areawide Urban Storm Water Runoff (Regional NPDES Permit). The SWPPP will identify and detail all appropriate Best Management Practices (BMPs) to be implemented or installed during construction of the project. In addition to the preparation of a SWPPP for construction related activities, and as part of the approval of any grading plans within the Specific Plan Area, the applicant will be required to submit a Water Quality Management Plan (WQMP) on the regional model form provided by the City. The WQMP shall identify and detail all Site Design, Source Control, and Treatment Control BMPs to be implemented or installed at this site in order to reduce storm water pollutants and site runoff. All Priority Land Use (PLU) areas within the Specific Plan Area shall comply with the statewide Trash Provisions adopted by the State Water Resources Control Board (SWRCB) and trash requirements in the most current San Bernardino County Area-Wide MS4 Permit. Drainage from such as a Debris Separating Baffle Box (DSBB), Continuous Deflective System (CDS), or an equivalent hydrodynamic separator which has been approved by the SWRCB. The Specific Plan area is located within the sub-watershed area of a regional storm water runoff treatment facility. This regional treatment facility serves as an alternative to complete on-site treatment of all pollutants of concern. Therefore, no impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

b. Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?

Discussion of Effects: The subject site was previously analyzed by the Certified EIR as a Public School use. No increases in the current amount of water flow to the project site are anticipated, and the proposed project will not deplete groundwater supplies, nor will it interfere with recharge. The water use associated with the proposed use of the property was included in the Certified EIR analysis. The development of the site will require the grading of the site and excavation is expected to be less than three feet and would not affect the existing aquifer, estimated to be about 230 to 250 feet below the ground surface. No adverse impacts are anticipated.

Mitigation: No additional mitigation required.

c. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:

i. Result in substantial erosion or siltation on- or off-site?

Discussion of Effects: It is not anticipated that the Project would alter the drainage pattern of the site or area, in a manner that would result in erosion, siltation or flooding on-or-off site, nor will the proposed Project increase the erosion of the subject site or surrounding areas. The existing drainage pattern of the site will not be altered, and it will have no significant impact on downstream hydrology. Stormwater generated by the project will be discharged in compliance with the statewide NPDES General Construction Activities Stormwater Permit and San Bernardino County MS4 permit requirements. With the full implementation of a Storm Water Pollution Prevention Plan developed in compliance with the General Construction Activities Permit requirements, the Best Management Practices included in the SWPPP, and a stormwater monitoring program would reduce any impacts to below a level of significance. No streams or streambeds are present on the site. No changes in erosion off-site are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

ii. Substantially increase the rate or amount of surface runoff water in a manner which would result in flooding on- or off-site?

Discussion of Effects: The proposed Project is not anticipated to increase the flow velocity or volume of storm water runoff to cause environmental harm from the site and will not create a burden on existing infrastructure. Furthermore, with the implementation of an approved Water Quality Management Plan developed for the site, in compliance with the San Bernardino County MS4 Permit requirements, stormwater runoff volume shall be reduced to below a level of significance.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

iii. Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?

Discussion of Effects: It is not anticipated that the project would create or contribute runoff water that would exceed the capacity of existing or planned stormwater drainage systems or create or contribute stormwater runoff pollutants during construction and/or post-construction activity. The stormwater flows will enter an existing storm pipe in Jurupa Street. Pursuant to the requirements of The Ontario Plan, the City's Development Code, and the San Bernardino County MS4 Permit's "Water Quality Management Plan" ("WQMP"), individual developments must provide site drainage and WQMP plans according to guidelines established by the City's Engineering Department. If master drainage facilities are not in place at the time of project development, then standard engineering practices for controlling post-development runoff may be required, which could include the construction of on-site storm water detention and/or retention/infiltration facilities. Therefore, no impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

iv. Impede or redirect flood flows?

Discussion of Effects: Urbanization in the areas surrounding the project site have resulted in increased responsiveness of the basin to rainfall. The increase in impervious surfaces such as roofs, roads, and parking lots has resulted in a decrease in groundwater infiltration and larger storm surges. The Project site currently slopes southeast, and the existing drainage pattern is characterized by sheet flows that follow the slope to the northwest. The project site is not impacted by offsite flows. The project site is not located in a FEMA Firm Panel designated Flood Zone Risk, and according to the United States Fish and Wildlife Service National Wetlands Inventory ("NWI") no wetlands exist on the property. The Project could lead to

the conversion of permeable surfaces to impermeable surfaces such as parking areas and building foundation areas. Any future development on the Project site would discharge onsite flows into an existing storm drain facility. As such, the proposed project would not impede or redirect flood flows. With adherence to existing federal, state, and local regulation no changes to the existing flood flows would occur.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

d. In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?

Discussion of Effects: Impacts associated with flooding are primarily related to the construction or placement of structures in areas prone to flooding including within an unprotected 100-year flood zone, and in areas susceptible to high tides, tsunamis, seiches, mudflows or sea level rise. Specifically, structures placed in flood prone areas, if flooded, would be damaged, and could subject people to injury or death. The National Flood Insurance Act of 1968 requires the identification of floodplain areas and establishment of flood-risk zones within those areas. FEMA administers the programs and coordinates with communities to establish effective floodplain management standards. According to FEMA, the Project is not located in a known floodplain. Furthermore, this area is not known to flood and is not typically subjected to flooding. The Project site is not located in a floodplain as shown in Figure S-2 of TOP. The Project site is dominated by Agricultural fallow fields and does not contain any vegetation associated with riparian features. No wetlands have been mapped on the project site according to the NWI. According to the FEMA, the Project is not located in an area that is subject to flood hazard, tsunami, or seiche zones. The project site is located over 60 miles east of the Pacific Ocean and is not located in a mapped tsunami zone. Therefore, the project would not have a significant risk of flood hazard, tsunami, seiche zones, release of pollutants due to project inundation.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

e. Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

Discussion of Effects: The Regional Water Quality Control Board's Basin Plan is designed to preserve and enhance water quality and protect the beneficial uses of all regional waters. Specifically, the Basin Plan (i) designates beneficial uses for surface and ground waters, (ii) sets narrative and numerical objectives that must be attained or maintained to protect the designated beneficial uses and conform to the state's anti-degradation policy, and (iii) describes implementation programs to protect all waters in the region. Development allowed by the Project would be required to adhere to requirements of the water quality control plan, including all existing regulation and permitting requirements. This would include the incorporation of best management practices ("BMPs") to protect water quality during construction and operational periods. Development of the Project would be subject to all existing water quality regulations and programs, as described in the regulatory section above, including all applicable construction permits. Existing General Plan policies related to water quality would also be applicable to the Project. Implementation of these policies, in conjunction with compliance with existing regulatory programs, would ensure that water quality impacts related to the Project would be less than significant.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

11. LAND USE & PLANNING. Would the project:

a. Physically divide an established community?

Discussion of Effects: The project site is in an area that is currently developed with urban land uses. This project will be of similar design and size to surrounding development. No adverse impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

b. Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?

Discussion of Effects: The subject site was previously analyzed by the Certified EIR as a Public School use. Amending The Ontario Plan land use exhibits and the Specific Plan to allow residential uses on 10.49 acres of land will not create greater impacts than were identified in the Certified EIR. The proposed project does not interfere with any policies for environmental protection. As such, no impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

12. MINERAL RESOURCES. Would the project:

a. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?

Discussion of Effects: The Project site is located within a mostly developed area surrounded by urban land uses. There are no known mineral resources in the area. Therefore, no impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

b. Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?

Discussion of Effects: There are no known mineral resources in the area. No impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

13. NOISE. Would the project result in:

a. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

Discussion of Effects: The subject site was previously analyzed by the Certified EIR as a Public School use and the Project will not expose people to or generate noise levels in excess of standards as established in the Certified EIR (Section 5.12). The subject site is surrounded by residential land uses, and the subject site is not within the landing approach of the Ontario International Airport. No additional analysis will be required at the time of site development review.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

b. Generation of excessive groundborne vibration or groundborne noise levels?

Discussion of Effects: The subject site was previously analyzed by the Certified EIR as a Public School use and the uses associated with this project normally do not induce groundborne vibrations. As such, no impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

c. For a project located within the vicinity of a private airstrip or the noise impact zones of the airport land use compatibility plan for ONT and Chino Airports, would the project expose people residing or working in the project area to excessive noise levels?

Discussion of Effects: The proposed Amendment was reviewed and found to be located within the Airport Influence Area of Ontario International Airport (“ONT”) and was evaluated and found to be consistent with the policies and criteria of the Airport Land Use Compatibility Plan (“ALUCP”) for ONT. The project site is located outside of the Safety, Noise Impact and Airspace Protection Zones. In addition, the project site lies outside the boundaries of the Chino Airport Influence Area. Therefore, no impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

14. POPULATION & HOUSING. Would the project:

a. Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of road or other infrastructure)?

Discussion of Effects: The subject site was previously analyzed by the Certified EIR as a Public School use. The proposed GPA and SPA to change the land use designation to Low-Medium Density residential (5.1-11 du/ac) on 10.49 acres of land will be in keeping with the surrounding land use designations. Given the limited scope of the project area and given that the related Tract Map (File No. PMTT19-015) is not proposing a high density land use and result in no more than 115 dwelling units in an area already characterized by residential land uses, no substantial impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

b. Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?

Discussion of Effects: The project site does not contain existing housing units and was previously designated as a Public School land use. Changing the permitted zoning and land use on the site from Public School to Low-Medium Density Residential will instead contribute to the number of available housing units rather than displace units.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

15. PUBLIC SERVICES. Would the project:

a. Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

i. Fire protection?

Discussion of Effects: The site is in a developed area currently served by the Ontario Fire Department. The Project will not require the construction of any new facilities or alteration of any existing facilities or cause a decline in the levels of service, which could cause the need to construct new facilities. No impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

ii. Police protection?

Discussion of Effects: The site is in a developed area, currently served by the Ontario Police Department. The Project will not require the construction of any new facilities or alteration of any existing facilities or cause a decline in the levels of service, which could cause the need to construct new facilities. No impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

iii. Schools?

Discussion of Effects: Upon development, the Project will be required to pay school fees as prescribed by state law prior to the issuance of building permits. No impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

iv. Parks?

Discussion of Effects: The site is in a developed area, currently served by the City of Ontario. The Project's related Tract Map (File No. PMTT19-015) proposes one-half acre of additional park land to be provided within the tract and will remit a Development Impact Fee to the City, for the construction of additional parkland elsewhere in the City. The Project will not cause a decline in the existing levels of service with the additional parkland to be provided, which could cause the need to construct new facilities. No impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

v. Other public facilities?

Discussion of Effects: The site is in a developed area, currently served by the City of Ontario. The Project will not require the construction of any new facilities or alteration of any existing facilities or cause a decline in the levels of service, which could cause the need to construct new facilities. No impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

16. RECREATION. Would the project:

a. Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

Discussion of Effects: This project proposing new park amenities to accompany the new housing units. No impacts are anticipated to local or regional recreation facilities.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

b. Does the project include recreational facilities or require the construction or expansion of recreational facilities that have an adverse physical effect on the environment?

Discussion of Effects: This project is proposing new housing units and a small recreational park to accompany it; however, given the small scope of the project at 10.49 acres, no significant impacts are anticipated above and beyond what was previously considered and addressed in the Certified EIR.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

17. TRANSPORTATION. Would the project:

a. Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?

Discussion of Effects: The subject site was previously analyzed by the Certified EIR as a Public School use and is surrounded by residential land uses. The project is in a developed neighborhood with all street improvements existing. As previously mentioned, a trip generation comparison was conducted by the City's Traffic Engineering Division and Urban Crossroads (Trip Generation Assessment, March 12, 2020) that evaluated the change in vehicle trips anticipated to be generated by the proposed conversion of the 20-acre middle school site into a 10-acre elementary school and 106 single-family detached dwelling units on the project site's 10 acres. The Trip Generation Study concluded that the proposed project (single-family dwellings and adjacent elementary school for the remaining parcel) is anticipated to generate 128 fewer trips than the previously-approved 20-acre middle school land use, with 88 fewer AM peak trips and 27 more PM peak trips.

Therefore, the traffic impacts will be consistent with and less than the traffic impacts projected and analyzed under the Certified EIR. The project will not create a substantial increase in the number of vehicle trips, traffic volume or congestion at intersections. Less than significant impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

b. Conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?

Discussion of Effects: CEQA Guidelines Section 15064.3 subdivision (b) has been included in the 2018 CEQA Guidelines as part of the implementation of SB 743 which requires local jurisdictions to use Vehicle Miles Travelled (VMT) instead of Level of Service (LOS) methodologies for the purpose of determining the significance of traffic impacts under CEQA. Also, as part of the implementation of SB 743 local jurisdiction are given until July 1, 2020 to develop and implement thresholds of significance criteria and methodologies for evaluating VMT under the new SB 743 requirements. The City of Ontario has adopted and established a VMT analysis threshold or analysis methodology based on our Policy Plan (General Plan) baseline. However, the project was submitted prior to the adoption of the threshold and therefore not subject to the adopted thresholds. Subsequently, The Ontario Plan EIR analyzed VMT, as part of the GHG analysis. The Ontario Plan (TOP) is consistent with the RTP/SCS for the Southern California region. The SBTAM model has incorporated TOP buildout which was then incorporated into the SCAG model in developing the RTP/SCS for the region. The thresholds used in these models can be found in the tool created for SBCTA that analyzes the various threshold options. TOP to establish VMT thresholds since this option has already been found to be consistent with the RTP/SCS and these land use assumptions have been incorporated into the SBTAM and SCAG's regional models. The screening tool created for use in San Bernardino County can be utilized for locations within Ontario where additional analysis is not required, and the City thresholds be used for projects where additional analysis is required. If mitigation measures are included for the project and the VMT brought down below the established threshold (City average), then the project can be determined to have less than a significant impact on transportation (in terms of CEQA). Therefore, impacts with respect to CEQA Guidelines Section 15064.3(b) are less than significant.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

c. Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

Discussion of Effects: The Project is in an area that is already developed with a residential neighborhood. All street improvements are complete, and the related Tentative Tract Map (File No. PMTT19-015) and future Development Plan will be required to construct right-of-way improvements along the project frontages. The Project will therefore not create a substantial increase in hazards due to a design feature. No impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

d. Result in inadequate emergency access?

Discussion of Effects: Development of the Project will be designed to provide access for all emergency vehicles and will therefore not create an inadequate emergency access. No impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

e. Result in inadequate parking capacity?

Discussion of Effects: The proposed GPA and SPA will not affect the parking capacity in the Specific Plan. The future Development Plan to construct 106 single-family residential dwelling units will be required to meet parking standards established by the Ontario Development Code and will therefore not create an inadequate parking capacity. No impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

18. TRIBAL CULTURAL RESOURCES. Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:

a. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k)?

Discussion of Effects: The subject site was previously analyzed by the Certified EIR as a public school land use and is not listed in the California Register of Historic Resources or local register of historical resources. The proposed GPA and SPA will allow for 10.49 acres of land to be developed for residential purposes. The degree of land disturbance resulting from residential development activities would be of no greater than those previously identified in the Certified EIR. Therefore, no impacts are anticipated.

Mitigation: No new mitigation measures required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

b. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.

Discussion of Effects: The subject site is not listed in the California Register of Historic Resources. On July 22, 2020, the Lead Agency notified the tribes located within the territory of the Project Site, per the requirements of SB 18 and AB 52, and concluded consultations on October 14, 2020. No impacts are anticipated through Project implementation beyond those identified in the Certified EIR.

Mitigation: No new mitigation measures are required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

19. UTILITIES AND SERVICE SYSTEMS. Would the project:

a. Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?

Discussion of Effects: The project will not require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects. Wastewater is treated by the Inland Empire Utilities Agency at the RP-1 treatment plant. RP-1 is not at capacity and future development of this Project site will not cause RP-1 to exceed capacity. The Project will therefore not require the construction of new water or wastewater treatment facilities, or the expansion of existing facilities. No impacts are anticipated.

Mater Plan storm drain facilities were installed in conjunction with previous surrounding development. Additionally, the Project is required to meet the requirements of the Ontario Engineering Department regarding storm drain facilities. No impacts are anticipated.

As discussed in the energy section above, the Project will have less than significant impacts with regard to electric power and natural gas. In addition, the Project will not have an impact on telecommunications facilities. Therefore, no impacts are anticipated beyond those previously analyzed in the Certified EIR.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

b. Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry, and multiple dry years? In making this determination, the City shall consider whether the project is subject to the water supply assessment requirements of Water Code Section 10910, et seq. (SB 610), and the requirements of Government Code Section 664737 (SB 221).

Discussion of Effects: The Project site is served by the City of Ontario water system. There is currently sufficient water supply available to the City of Ontario to serve this Project as per the findings of TOP EIR. No impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

c. Result in a determination by the wastewater treatment provider that serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

Discussion of Effects: The Project site is served by the City of Ontario sewer system, which has waste treated by the Inland Empire Utilities Agency at the RP-1 treatment plant. RP-1 is not at capacity and future development of this project site will not cause RP-1 to exceed capacity. No impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

d. Generate solid waste in excess of state or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?

Discussion of Effects: City of Ontario serves the Project site. Currently, the City of Ontario contracts with a waste disposal company that transports trash to a landfill with sufficient capacity to handle the City's solid waste disposal needs. No impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to analyses are necessary.

e. Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?

Discussion of Effects: This Project complies with federal, state, and local statues and regulations regarding solid waste. Therefore, no impacts are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

20. WILDFIRE. If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:

a. Substantially impair an adopted emergency response plan or emergency evacuation plan?

Discussion of Effects: Wildfire impacts were not analyzed in the Certified EIR. A discussion of potential wildfire impacts is provided herein.

The Project site is not located in or near a state responsibility area nor is it located in or near lands classified as very high fire hazard severity zones. Therefore, no impacts are anticipated.

Mitigation: No new mitigation measures required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

b. Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?

Discussion of Effects: The Project site is not located in or near a state responsibility area nor is it located in or near lands classified as very high fire hazard severity zones. Therefore, no impacts are anticipated.

Mitigation: No new mitigation measures required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

c. Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?

Discussion of Effects: The Project site is not located in or near a state responsibility area nor is it located in or near lands classified as very high fire hazard severity zones. Therefore, no impacts are anticipated.

Mitigation: No new mitigation measures required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

d. Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?

Discussion of Effects: The Project site is not located in or near a state responsibility area nor is it located in or near lands classified as very high fire hazard severity zones. Therefore, no impacts are anticipated.

Mitigation: No new mitigation measures required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

21. MANDATORY FINDINGS OF SIGNIFICANCE.

a. Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

Discussion of Effects: The proposed Project does not have the potential to reduce wildlife habitat and threaten a wildlife species; therefore, no environmental impacts resulting from the Project are anticipated.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

b. Does the project have the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals?

Discussion of Effects: The Project does not have the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

c. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current project, and the effects of probable future projects.)

Discussion of Effects: The Project does not have impacts that are cumulatively considerable.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

d. Does the project have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly?

Discussion of Effects: The Project does not have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly.

Mitigation: No additional mitigation required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified EIR. No changes or additions to the Certified EIR analyses are necessary.

EARLIER ANALYSES

(Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, one or more effects have been adequately analyzed in an earlier EIR or Negative Declaration. Section 15063(c)(3)(D)):

- 1) Earlier Analyses Used. Identify earlier analyses used and state where they are available for review.
 - a) The Ontario Plan Final EIR (SCH# 2008101140)
 - b) The Ontario Plan
 - c) The Avenue Specific Plan
 - d) The Avenue Specific Plan EIR (SCH# 2005071109)
 - e) City of Ontario Official Zoning Map
 - f) City of Ontario Development Code
 - g) Ontario International Airport Land Use Compatibility Plan
 - h) Ontario International Airport Land Use Compatibility Plan Negative Declaration (SCH 2011011081)

All documents listed above are on file with the City of Ontario Planning Department, 303 East "B" Street, Ontario, California 91764, (909) 395-2036.

- 2) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of, and adequately analyzed in, an earlier document pursuant to applicable legal standards.

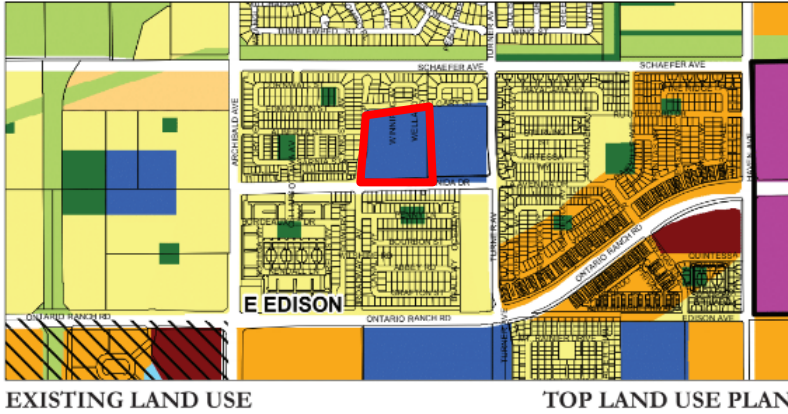

MITIGATION MEASURES

(For effects that are “Less than Significant with Mitigation Incorporated,” describe the mitigation measures, which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.)

The Mitigation Measures contained in the Certified EIR adequately mitigate the impacts of the proposed Project. These mitigation measures are contained in the attached Exhibit C, Mitigation Monitoring Program. Those mitigation measures that are not applicable to the Project are shown in red strikethrough text. All mitigation measures applicable to the project are shown in black text.

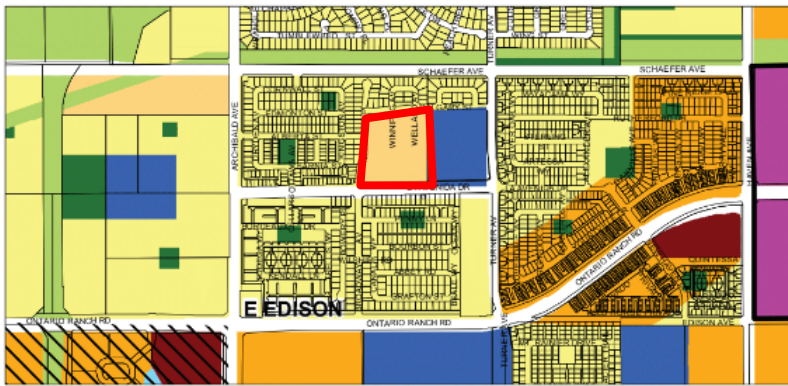

No additional mitigation beyond that previously imposed is required.

Notes

- Historically, citywide buildout levels do not achieve the maximum allowable density/intensity on every parcel and are, on average, lower than allowed by the Policy Plan. Accordingly, the buildout projections in this Policy Plan do not assume buildout at the maximum density or intensity and instead are adjusted downward. To view the buildout assumptions, access the Methodology report.
- Acres are given as adjusted gross acreages, which do not include the right-of-way for roadways, flood control facilities, or railroads.
- Assumed Density/Intensity includes both residential density, expressed as units per acre, and non-residential intensity, expressed as floor area ratio (FAR), which is the amount of building square feet in relation to the size of the lot.
- Projections of population by residential designation are based on a persons-per-household factor that varies by housing type. For more information, access the Methodology report.
- To view the factors used to generate the number of employees by land use category, access the Methodology report.
- Acreages and corresponding buildout estimates for these designations do not reflect underlying land uses within the Business Park, Industrial and Commercial Overlays. Estimates for these areas are included within the corresponding Business Park, Industrial and General Commercial categories.

EXHIBIT C:
Mitigation Monitoring Program for
The Ontario Plan Environmental Impact Report

1. Introduction

1.1 PURPOSE OF MITIGATION MONITORING PROGRAM

This Mitigation Monitoring Program has been developed to provide a vehicle by which to monitor mitigation measures and conditions of approval outlined in The Ontario Plan Environmental Impact Report (EIR), State Clearinghouse No. 2008101140. The Mitigation Monitoring Program has been prepared in conformance with Section 21081.6 of the Public Resources Code and City of Ontario Monitoring Requirements. Section 21081.6 states:

(a) When making the findings required by paragraph (1) of subdivision subsection (a) of Section 21081 or when adopting a mitigated negative declaration pursuant to paragraph (2) of subdivision (c) of Section 21080, the following requirements shall apply:

(1) The public agency shall adopt a reporting or monitoring program for the changes made to the project or conditions of project approval, adopted in order to mitigate or avoid significant effects on the environment. The reporting or monitoring program shall be designed to ensure compliance during project implementation. For those changes which have been required or incorporated into the project at the request of a responsible agency or a public agency having jurisdiction by law over natural resources affected by the project, that agency shall, if so requested by the lead agency or a responsible agency, prepare and submit a proposed reporting or monitoring program.

(2) The lead agency shall specify the location and custodian of the documents or other material which constitute the record of proceedings upon which its decision is based.

(b) A public agency shall provide that measures to mitigate or avoid significant effects on the environment are fully enforceable through permit conditions, agreements, or other measures. Conditions of project approval may be set forth in referenced documents which address required mitigation measures or, in the case of the adoption of a plan, policy, regulation, or other public project, by incorporating the mitigation measures into the plan, policy, regulation, or project design.

(c) Prior to the close of the public review period for a draft environmental impact report or mitigated negative declaration, a responsible agency, or a public agency having jurisdiction over natural resources affected by the project, shall either submit to the lead agency complete and detailed performance objectives for mitigation measures which would address the significant effects on the environment identified by the responsible agency or agency having jurisdiction over natural resources affected by the project, or refer the lead agency to appropriate, readily available guidelines or reference documents. Any mitigation measures submitted to a lead agency by a responsible agency or an agency having jurisdiction over natural resources affected by the project shall be limited to measures which mitigate impacts to resources which are subject to the statutory authority of, and definitions applicable to, that agency. Compliance or noncompliance by a responsible agency or agency having jurisdiction over natural resources affected by a project with that requirement shall not limit the authority of the responsible agency or agency having jurisdiction over natural resources affected by a project, or the authority of the lead agency, to approve, condition, or deny projects as provided by this division or any other provision of law.

1.2 PROJECT SUMMARY

The proposed project is the preparation of The Ontario Plan, which consists of a Vision, Governance Manual, Policy Plan, City Council Priorities, Implementation Plans, and Tracking and

Feedback. The Ontario Plan integrates components of city governance documents into a single guidance system that shapes the community 20 years or more into the future.

(a) The Ontario **Vision** describes the future community of Ontario. Its basic purpose is to improve the quality of life for the people of Ontario. It is the rationale and motivation for everything the City does.

(b) The **Governance Manual** describes the foundation for conducting the public's business on behalf of the present and future people of Ontario. It explains how The Ontario Plan is a tool for decision-making and communication.

(c) **City Council Priorities** define the short-term direction in City actions and initiatives. They are the primary means for exercising leadership in carrying out The Plan and realizing the Vision.

(d) The **Policy Plan** connects intent with action through the broad range of Goals and Policies that would guide the long-term growth and development required for the City to achieve its Vision. It also satisfies the California Government Code requirement for a general plan. Figure 3-6, *Proposed Land Use Plan*, shows the proposed General Plan land use designations that guide and regulate land use patterns, distributions, densities and intensities in the City of Ontario, including residential employment, retail, recreation, and public uses.

(e) **Implementation** consists of actions taken to carry out Plan policies. This includes initiatives by the City and decisions on public and private development projects.

(f) **Tracking and Feedback** allows the City to learn from experience and redirect efforts.

Pursuant to CEQA Guidelines Section 15064(d), the EIR considers the direct physical changes and reasonably foreseeable indirect physical changes in the environment that would be caused by The Ontario Plan. Consequently, the EIR focuses on impacts from changes to land use associated with buildout of the Proposed Land Use Plan, within the Policy Plan, and impacts from the resultant population and employment growth in the City. The Ontario Plan Proposed Land Use Plan for the ultimate development of the City is not linked to a timeline. However, for the purpose of this environmental analysis, buildout of the Proposed Land Use Plan is forecast for the year 2035.

1.3 PROJECT LOCATION

The City of Ontario is in the southwestern corner of San Bernardino County and is surrounded by the Cities of Chino and Montclair, and unincorporated areas of San Bernardino County to the west; the Cities of Upland and Rancho Cucamonga to the north; the City of Fontana and unincorporated land in San Bernardino County to the east; and unincorporated Riverside County land to the south. The City is in the central part of the Upper Santa Ana River Valley. This portion of the valley is bounded by the San Gabriel Mountains to the north; the Chino Hills, Puente Hills, and San Jose Hills to the west; the Santa Ana River to the south; and Lytle Creek Wash on the east.

The City comprises approximately 50 square miles (31,958 acres), which includes the 8,200-acre New Model Colony (NMC) in the southern portion of the City (formerly the City's Sphere of Influence). The northern urbanized portion of the City is known as the Original Model Colony (OMC). The City is generally bounded by Benson Avenue and Euclid Avenue on the west; Interstate 10 (I-10), 8th Street, and 4th Street on the north; Etiwanda Avenue and Hamner Avenue on the east; and Merrill Avenue and the San Bernardino County/Riverside County boundary on the south. Regional circulation to and through the City is provided by I-10 and State Route 60 (SR-60) east-west, and by I-15 and SR-83 (Euclid Avenue) north-south.

1.4 ENVIRONMENTAL IMPACTS

The environmental document for this project is a “program EIR” as defined by State CEQA Guidelines (Section 15161, California Code of Regulations, Title 14, Division 6, Chapter 3). As provided in Section 15168 of the State CEQA Guidelines, a Program EIR may be prepared on a series of actions that may be characterized as one large project that are related either 1) geographically; 2) as logical parts of a chain of contemplated events; 3) in connection with issuance of rules, regulations, plans, or other general criteria to govern the conduct of a continuing program; or 4) as individual activities carried out under the same authorizing statutory or regulatory authority and have generally similar environmental effects that can be mitigated in similar ways.

Although the legally required contents of a Program EIR are the same as those of a Project EIR, Program EIRs are typically more conceptual and may contain a more general discussion of impacts, alternatives, and mitigation measures than a Project EIR. Once a Program EIR has been prepared, subsequent activities within the program must be evaluated to determine whether an additional CEQA document needs to be prepared. However, if the Program EIR addresses the program’s effects as specifically and comprehensively as possible, many subsequent activities could be found to be within the Program EIR scope and additional environmental documents may not be required (Guidelines Section 15168[c]). When a Program EIR is relied on for a subsequent activity, the lead agency must incorporate feasible mitigation measures and alternatives developed in the Program EIR into the subsequent activities (Guidelines Section 15168[c][1]). If a later activity would have effects that were not examined in the Program EIR, a new Initial Study would need to be prepared leading to either an EIR or a Negative Declaration. Pursuant to Sections 15126.2 and 15126.4 of the State CEQA Guidelines, the EIR should identify any potentially significant adverse impacts and recommend mitigation that would reduce or eliminate these impacts to levels of insignificance.

1.4.1 Impacts Considered Less Than Significant

Ten environmental categories are identified as having less than significant impacts that do not require mitigation. These categories are:

- Aesthetics
- Biological Resources
- Geology/Soils
- Hazards & Hazardous Materials
- Hydrology/Water Quality
- Land Use & Planning
- Mineral Resources
- Population and Housing
- Public Services
- Recreation

1.4.2 Potentially Significant Adverse Impacts That Can Be Mitigated, Avoided, or Substantially Lessened

The following have been identified as potentially resulting in significant adverse impacts that can be mitigated, avoided, or substantially lessened:

- Cultural Resources: Mitigation Measures 5-2 through 5-4 would reduce archeological and prehistoric cultural resource impacts to less than significant.
- Noise: Mitigation Measure 12-3 would ensure that any new vibration-sensitive structures near the Union Pacific Railroad or Southern California Regional Rail Authority right-of-way would be constructed so that train-related vibration would not be perceptible and operational vibration impacts would be less than significant.
- Utilities and Service Systems: Mitigation Measures 17-1 through 17-4 would reduce impacts on water supply and demand from buildout of The Ontario Plan to less than significant.

1.4.3 Unavoidable Significant Adverse Impacts

There are six environmental categories considered to have impacts that would be significant and unavoidable and would not be lessened through mitigation.

Agricultural Resources

Buildout of The Ontario Plan would convert 3,269.3 acres of California Resource Agency designated Prime Farmland, Unique Farmland, and Farmland of Statewide Importance to residential, commercial, mixed-use, and industrial land uses. Consequently, impacts to Farmland would remain significant and unavoidable.

There are a number of Williamson Act contracts within the City that have yet to expire. Buildout of The Ontario Plan would most likely require the cancellation or nonrenewal of these contracts. The current use of these contracts would slow the rate of conversion from agricultural to nonagricultural land, but it would not impede the conversion. Since there are some Williamson Act contracts still active in the New Model Colony, implementation of the proposed land use plan for The Ontario Plan would conflict with these contracts and cause a significant impact. Consequently, impacts to Williamson Act contracts would remain significant and unavoidable.

Development of the City in accordance with The Ontario Plan would increase the amount of nonagricultural land uses. When nonagricultural land uses are placed near agricultural uses, the odors, noises, and other hazards related to agriculture conflict with the activities and the quality of life of the people living and working in the surrounding areas. Consequently, conversion of agricultural uses in the city may cause farms and agricultural land uses outside the City to be converted to nonagricultural uses because of the nuisances related to agriculture and impacts would remain significant and unavoidable.

Air Quality

The project would not be consistent with the Air Quality Management Plan (AQMP) because air pollutant emissions associated with buildout of the City of Ontario would cumulatively contribute to the nonattainment designations in the South Coast Air Basin (SoCAB). Furthermore, buildout of the Proposed Land Use Plan would exceed current estimates of population, employment, and vehicle miles traveled for Ontario and therefore these emissions are not included in the current regional emissions inventory for the SoCAB. As both criteria must be met in order for a project to be considered consistent with the AQMP, the project would be considered inconsistent with the AQMP. Consequently, this impact would remain significant and unavoidable.

Construction activities associated with buildout of The Ontario Plan would generate short-term emissions that exceed the South Coast Air Quality Management District's (SCAQMD) regional significance thresholds; cumulatively contribute to the SoCAB's nonattainment designations for ozone (O₃), coarse inhalable particulate matter (PM₁₀), and fine inhalable particulate matter (PM_{2.5}); and potentially elevate concentrations of air pollutants at sensitive receptors. Mitigation Measure 3-1 would reduce The Ontario Plan's short-term construction-related volatile organic compounds (VOC), carbon monoxide (CO), oxides of nitrogen (NO_x), PM₁₀, and PM_{2.5} emissions but they would not be reduced to levels below the SCAQMD's regional thresholds and they would not reduce these impacts to less than significant. Consequently, construction air pollutant emissions generated by buildout of The Ontario Plan would remain significant and unavoidable.

Buildout of The Ontario Plan would generate long-term emissions that would exceed SCAQMD'S regional significance thresholds and cumulatively contribute to the SoCAB nonattainment designations for O₃, PM₁₀, and PM_{2.5}. Mitigation Measure 3-2 would reduce long-term operational emissions of VOC, CO, NO_x, PM₁₀, and PM_{2.5} related to the buildout of The Ontario Plan but they would not reduce these emissions to levels below the SCAQMD's regional significance thresholds and impacts would not be less than significant. Consequently, operational impacts from buildout of The Ontario Plan would remain significant and unavoidable.

Approval of residential and other sensitive land uses within 500 feet of Interstate-10, Interstate-15, or State Route-60 would result in exposure of persons to substantial concentrations of diesel particulate matter. Mitigation Measure 3-3 would reduce impacts related to the exposure of sensitive receptors (residential and other sensitive land uses) to diesel particulate matter because of their placement near freeways within the City. However, it would not reduce this impact to be less than significant.

Conversion of agricultural land to nonagricultural uses would temporarily expose residents to objectionable odors and impacts would remain significant and unavoidable.

Cultural Resources

Although protective regulations are in place and preservation policies are included in The Ontario Plan, implementation of the Proposed Land Use Plan, especially within growth focus areas, has the potential to impact Tier III historic resources. Mitigation Measure 5-1 would require a historical evaluation for properties within historic resources in the Focus Areas under the City's ordinance. However, the ordinance does not provide a high level of protection for Tier III resources. As a result, demolition of historical resources categorized under the Ordinance as Tier III could potentially be impacted with implementation of the Proposed Land Use Plan. Consequently, Tier III historic resource impacts would remain significant and unavoidable.

Global Climate Change

Buildout of the City of Ontario would generate greenhouse gas emissions that would significantly contribute to global climate change impacts in California. Greenhouse gas (GHG) emissions generated in the City would significantly contribute to climate change impacts in California as a result of the growth in population and employment in the City and scale of development activity associated with buildout of the Proposed Land Use Plan. Mitigation Measures 6-1 through 6-6 would act to reduce the contributions of The Ontario Plan to global climate change but they would not reduce the impacts to less than significant.

Noise

Buildout of the Proposed Land Use Plan would result in an increase in traffic on local roadways in the City of Ontario, which would substantially increase noise levels. Consequently, impacts would remain significant and unavoidable.

Noise-sensitive uses could be exposed to elevated noise levels from transportation sources. Any siting of new sensitive land uses within a noise environment that exceeds the normally acceptable land use compatibility criterion would result in a potentially significant impact and would require a separate noise study through the development review process to determine the level of impacts and required mitigation. Mitigation Measure 12-1 would decrease the exposure of sensitive receptors to excessive noise levels within 65 dBA CNEL contours, whether near Los Angeles/Ontario International Airport (LAONT) or other noise-producing areas such as freeways and railroads, but it would not reduce these impacts to less than significant.

Construction activities associated with buildout of the individual land uses associated with the Proposed Land Use Plan would expose sensitive uses to strong levels of groundborne vibration. Mitigation Measure 12-2 would reduce the impacts caused by construction-related vibrations on sensitive receptors but it would not reduce the impact to less than significant.

Impact 5.12-5. Significant. Construction activities associated with buildout of the individual land uses associated with the Proposed Land Use Plan would substantially elevate noise levels in the vicinity of sensitive land uses. Mitigation Measure 12-4 calls for the use of noise-reducing techniques during construction projects that would impact nearby sensitive receptors, such as the use of temporary sound walls and reduced unnecessary truck idling. However, these impacts would not be reduced to levels considered less than significant.

Noise-sensitive land uses within the 65 dBA CNEL contour of the Los Angeles/Ontario International Airport would be exposed to substantial levels of airport-related noise. Consequently, impacts would remain significant and unavoidable.

Transportation and Traffic

The increased development and population growth associated with the buildout of the Proposed Land Use Plan would cause deficient levels of service at area intersections without implementation of the recommended lane geometry improvements. In addition, buildout of the Proposed Land Use Plan would also cumulatively contribute to the cumulatively significant freeway level of service impact that is already projected to occur in the future. Mitigation Measure 16-1 would require the buildout of The Ontario Plan to be consistent with the traffic study prepared by Kimley-Horn and Associates. This traffic study indicates the appropriate lane geometry for area intersections. This would allow for intersections to have LOS values of E or above, but it would not improve the cumulative freeway LOS standards to appropriate levels. The City has no jurisdiction over Caltrans projects, such as freeway improvements. Therefore, the impacts related to cumulative LOS deficiencies on freeways would not be reduced to levels considered less than significant.

2. Mitigation Monitoring Process

2.1 MITIGATION MONITORING PROGRAM ORGANIZATION

CEQA requires that a reporting or monitoring program be adopted for the conditions of project approval that are necessary to mitigate or avoid significant effects on the environment (Public Resources Code 21081.6). The mitigation monitoring and reporting program is designed to ensure compliance with adopted mitigation measures during project implementation. For each mitigation measure recommended in the Environmental Impact Report, specifications are made herein that identify the action required and the monitoring that must occur. In addition, a responsible agency is identified for verifying compliance with individual conditions of approval contained in the Mitigation Monitoring Program (MMP). In order to effectively track and document the status of mitigation measures, a mitigation matrix has been prepared and includes:

- Responsibility for implementation
- Timing
- Responsibility for monitoring
- Monitor

Mitigation measure timing of verification has been apportioned into several specific timing increments. Of these, the most common are:

- Prior to project approval
- Prior to issuance of grading permit(s)
- During construction

Information pertaining to compliance with mitigation measures or any necessary modifications or refinements will be documented in the comments portion of the matrix.

2.2 MITIGATION MONITORING PROCEDURES

The City of Ontario Planning Department is the designated lead agency for the Mitigation Monitoring and Reporting Program. The City of Ontario includes the Mitigation Measures within the Special Conditions of Approval. The City is responsible for review of all monitoring reports, enforcement actions, and document disposition. The Planning Department shall designate a Project Mitigation Monitor for the proposed project.

2.2.1 In-Field Monitoring

The Responsible Monitoring Party shall exercise caution and professional practices at all times when monitoring construction. Protective wear (hard hats, glasses, etc.) shall be worn at all times in construction areas. Injuries shall be reported immediately to the Project Mitigation Monitor.

2.2.2 Coordination with Contractors

The construction manager/superintendent is responsible for coordination of contractors and for contractor completion of required measures in accordance with the provisions of this program.

2.2.3 Recognized Experts

The use of recognized experts as a component of the monitoring team is required to ensure compliance with scientific and engineering mitigation measures. While the recognized experts assess

compliance with required mitigation measures, consultation with the City of Ontario planning staff shall take place in the event of a dispute.

2.2.4 Enforcement

Agencies may enforce conditions of approval through their existing police power, using stop-work orders, fines, infraction citations, loss of entitlements, refusal to issue building permits or certificates of use and occupancy or, in some cases, notice of violation for tax purposes. Criminal misdemeanor sanctions could be available where the agency has adopted an ordinance requiring compliance with the monitoring program, similar to the provision in many zoning ordinances that affirm the enforcement power to bring suit against violators of the ordinances.

3. Mitigation Monitoring Requirements

3.1 CATEGORIZED MITIGATION MEASURES/MATRIX

Project-specific mitigation measures have been categorized in matrix format, as shown in Table 3-1. The matrix identifies the environmental factor, specific mitigation measures, schedule, and responsible monitor. The mitigation matrix will serve as the basis for scheduling the implementation of, and compliance with, all mitigation measures.

3.2 IN-FIELD MONITORING

Project monitors and technical subconsultants shall exercise caution and professional practices at all times when monitoring implementation of mitigation measures. Protective wear (e.g., hard hat, glasses) shall be worn at all times in construction areas. Injuries shall be immediately reported to the mitigation monitoring committee.

3.3 DATABASE MANAGEMENT

All mitigation monitoring reports, letters, and memos shall be prepared using Microsoft Word software on IBM-compatible PCs and processed according to the City's Environmental Compliance Program.

3.4 COORDINATION WITH CONTRACTORS

The construction manager is responsible for coordination of contractors and for contractor completion of required mitigation measures.

3.5 LONG-TERM MONITORING

Long-term monitoring related to several mitigation measures will be required, including fire safety inspections. Post-construction fire inspections are conducted on a routine basis by the Ontario Fire Department.

Table 3-1 Mitigation Monitoring Requirements				
Mitigation Measure	Responsibility for Implementation	Timing	Responsibility for Monitoring	Monitor (Signature Required) (Date of Compliance)
5.3 AIR QUALITY				
<p>3-1 The City of Ontario Building Department shall require that all new construction projects incorporate feasible mitigation measures to reduce air quality emissions. Potential measures shall be incorporated as conditions of approval for a project and may include:</p> <ul style="list-style-type: none"> • Requiring fugitive dust control measures that exceed South Coast Air Quality Management District's Rule 403, such as: <ul style="list-style-type: none"> ○ Requiring use of nontoxic soil stabilizers to reduce wind erosion. ○ Applying water every four hours to active soil-disturbing activities. ○ Tarping and/or maintaining a minimum of 24 inches of freeboard on trucks hauling dirt, sand, soil, or other loose materials. • Using construction equipment rated by the United States Environmental Protection Agency as having Tier 3 or higher exhaust emission limits. • Ensuring construction equipment is properly serviced and maintained to the manufacturer's standards. • Limiting nonessential idling of construction equipment to no more than five consecutive minutes. • Using Super-Compliant VOC paints for coating of architectural surfaces whenever possible. A list of Super-Compliant architectural coating manufactures can be found on the South Coast Air Quality Management District's website at: http://www.aqmd.gov/prdas/brochures/Super-Compliant_AIM.pdf . 	<p>City of Ontario Building Department in coordination with the landowner/project applicant's construction contractor</p>	<p>During construction</p>	<p>City of Ontario Building and Department and Developer/Contractor</p>	

Table 3-1 Mitigation Monitoring Requirements				
Mitigation Measure	Responsibility for Implementation	Timing	Responsibility for Monitoring	Monitor (Signature Required) (Date of Compliance)
3-2 The City of Ontario shall evaluate new development proposals within the City and require all developments to include access or linkages to alternative modes of transportation, such as transit stops, bike paths, and/or pedestrian paths (e.g., sidewalks).	City of Ontario Planning/Engineering Department in coordination with the landowner/project applicant	Prior to individual project approvals	City of Ontario Planning Department	
3-3 The City of Ontario shall evaluate new development proposals within the City for potential incompatibilities with regard to the California Air Resources Board's <i>Air Quality and Land Use Handbook: A Community Health Perspective</i> (April 2005). New development that is inconsistent with the recommended buffer distances shall only be approved if feasible mitigation measures, such as high efficiency Minimum Efficiency Reporting Value filters have been incorporated into the project design to protect future sensitive receptors from harmful concentrations of air pollutants as a result of proximity to existing air pollution sources.	City of Ontario Planning Department in coordination with the landowner/project applicant	Prior to individual project approvals	City of Ontario Planning Department	
5.5 CULTURAL RESOURCES				
5-1 Historic or potentially historic resources in the City shall be evaluated for historic significance through the City's tier system prior to the issuance of plan or development approvals.	City of Ontario Planning Department	Prior to individual project approvals	City of Ontario Planning Department	
5-2 In areas of documented or inferred archaeological and/or paleontological resource presence, City staff shall require applicants for development permits to provide studies to document the presence/absence of such resources. On properties where resources are identified, such studies shall provide a detailed mitigation plan, including a monitoring program and recovery and/or in situ preservation plan, based on the recommendations of a qualified cultural preservation expert. The mitigation plan shall include the following requirements:	City of Ontario Planning Department in coordination with the Landowner/Project Applicant	Prior to individual project approvals	City of Ontario Planning Department	

Table 3-1 Mitigation Monitoring Requirements				
Mitigation Measure	Responsibility for Implementation	Timing	Responsibility for Monitoring	Monitor (Signature Required) (Date of Compliance)
<ul style="list-style-type: none"> • Archaeologists and/or paleontologist shall be retained for the project and will be on call during grading and other significant ground-disturbing activities. • Should any cultural resources be discovered, no further grading shall occur in the area of the discovery until the Planning Director or designee is satisfied that adequate provisions are in place to protect these resources. • Unanticipated discoveries shall be evaluated for significance by a San Bernardino County Certified Professional Archaeologist/Paleontologist. If significance criteria are met, then the project shall be required to perform data recovery, professional identification, radiocarbon dates, and other special studies; submit materials to a museum for permanent curation; and provide a comprehensive final report including catalog with museum numbers. 				
<p>5-3 Upon receipt of an application for a Specific Plan or a project that requires a General Plan amendment subject to CEQA and is within the City's jurisdiction, the City's representative shall consult with the relevant tribe(s)' representative(s) to determine if the proposed project is within a culturally sensitive area to the tribe. If sufficient evidence is provided to reasonably ascertain that the site is within a [tribal] culturally sensitive area, then a cultural resources assessment prepared by an archaeologist shall be required. The findings of the cultural resources assessment shall be incorporated into the CEQA documentation. A copy of the report shall be forwarded to the tribe(s). If mitigation is recommended in the CEQA document, the procedure described in Mitigation Measure 5-4 shall be followed.</p>	City of Ontario Planning Department	Prior to individual project approvals	City of Ontario Planning Department	
<p>5-4 Prior to the issuance of grading permits for a Specific Plan or project that requires a General Plan amendment for which the CEQA document defines cultural resource mitigation for potential tribal resources, the project applicant</p>	City of Ontario Planning Department in coordination with the	Prior to issuance of grading permit(s)	City of Ontario Planning Department	

Table 3-1 Mitigation Monitoring Requirements				
Mitigation Measure	Responsibility for Implementation	Timing	Responsibility for Monitoring	Monitor (Signature Required) (Date of Compliance)
shall contact the designated tribe(s) to notify them of the grading, excavation, and monitoring program. The applicant shall coordinate with the City of Ontario and the tribal representative(s) to develop mitigation measures that address the designation, responsibilities, and participation of tribal monitors during grading, excavation, and ground-disturbing activities; scheduling; terms of compensation; and treatment and final disposition of any cultural resources, sacred sites, and human remains discovered on the site. The City of Ontario shall be the final arbiter of the conditions for projects within the City's jurisdiction.	Landowner/Project Applicant			
5.6 Global Climate Change				
○				
•				
○				
6-5 Pursuant to a goal of overall consistency with the Sustainable Communities Strategies, the City of Ontario shall evaluate new development for consistency with the development pattern set forth in the Sustainable Communities Strategies plan, upon adoption of the plan by the Southern California Association of Governments.	City of Ontario Planning Department	Prior to individual project approvals	City of Ontario Planning Department	
6-6 The City of Ontario shall participate in the County of San Bernardino's Green Valley Initiative.	City of Ontario Planning Department	Prior to individual project approvals	City of Ontario Planning Department	
5.12 NOISE				

Table 3-1 Mitigation Monitoring Requirements				
Mitigation Measure	Responsibility for Implementation	Timing	Responsibility for Monitoring	Monitor (Signature Required) (Date of Compliance)
12-2 Individual projects that involve vibration-intensive construction activities, such as pile drivers, jack hammers, and vibratory rollers, occurring near sensitive receptors shall be evaluated for potential vibration impacts. If construction-related vibration is determined to be perceptible at vibration-sensitive uses (i.e., exceed the Federal Transit Administration vibration-annoyance criteria of 78 VdB during the daytime), additional requirements, such as use of less vibration intensive equipment or construction techniques, shall be implemented during construction (e.g., drilled piles to eliminate use of vibration-intensive pile driver).	City of Ontario Planning/Building/MUA Department in coordination with the Landowner/Project Applicant's construction contractor	During construction	City of Ontario Building/MUA Department	
12-4 Construction activities associated with new development that occurs near sensitive receptors shall be evaluated for potential noise impacts. Mitigation measures such as installation of temporary sound barriers for adjacent construction activities that occur adjacent to occupied noise-sensitive structures, equipping construction equipment with mufflers, and reducing non-essential idling of construction equipment to no more than five minutes shall be incorporated into the construction operations to reduce construction-related noise to the extent feasible.	City of Ontario Building/Planning/MUA Department in coordination with the Landowner/Project Applicant's construction contractor	During construction	City of Ontario Building/Planning/MUA Department

SUBJECT: THE AVENUE SPECIFIC PLAN AMENDMENT TRIP GENERATION ASSESSMENT

Dear Mr. Jason Lee:

Urban Crossroads, Inc. is pleased to submit this Trip Generation Assessment for the proposed The Avenue Specific Plan Amendment (referred to as "Project"). The Project is located north of Edison Avenue between Carpenter Avenue and Haven Avenue in the City of Ontario.

The purpose of this letter is to evaluate the change in vehicle trips anticipated to be generated by the proposed conversion of the 20-acre middle school site to a 10-acre element school and 110 single-family detached dwelling units within the remaining 10-acres.

PROJECT OVERVIEW

The proposed land use changes are within Planning Areas (PA) 6B and 9B of The Avenue Specific Plan. As currently approved in The Avenue Specific Plan Amendment Traffic Impact Analysis, (August 27, 2008, Urban Crossroads, Inc.), PA-6B and PA-9B are together designated as a middle school site on 20-acres. The proposed Project consists of converting PA-6B into 110 single-family detached residential dwelling units on 10-acres and converting PA-9B into an elementary school site (10-acres). The Project site is located within the Mountain View School District.

PROJECT TRIP GENERATION

The trip generation rates used for this analysis are based upon information collected by the Institute of Transportation Engineers (ITE) as provided in their Trip Generation Manual, 10th Edition, 2017.

For purposes of this analysis, the following Land Use Codes have been utilized:

- ITE Land Use Code 210 (Single-Family Detached Housing)
- ITE Land Use Code 520 (Elementary School)
- ITE Land Use Code 522 (Middle School)

According to the Mountain View School District School Facilities Needs Analysis, dated August 8, 2018, the student capacity is 800 students for an elementary school (on a 10.60-acre site) and 1,200 students for a middle school (on a 21.30-acre site). The Mountain View School District has determined that future elementary school facilities will be designed to accommodate 800 students and future middle school facilities will be designed to accommodate 1,200 students. Trip generation for the currently approved middle school and the proposed elementary school have been based upon these student capacities.

CURRENTLY APPROVED TRIP GENERATION

A summary of the currently approved trip generation is shown in Table 1. As shown in Table 1, the proposed Project is anticipated to generate 2,556 weekday trip-ends per day, with 696 AM peak hour trips and 204 PM peak hour trips.

TABLE 1: CURRENTLY APPROVED TRIP GENERATION SUMMARY

Land Use	Units ²	ITE LU Code	AM Peak Hour			PM Peak Hour			Daily
			In	Out	Total	In	Out	Total	
Trip Generation Rates¹									
Middle School	STU	522	0.31	0.27	0.58	0.08	0.09	0.17	2.13

Land Use	Quantity	Units ²	AM Peak Hour			PM Peak Hour			Daily
			In	Out	Total	In	Out	Total	
Trip Generation Summary									
Middle School ³	1,200	STU	376	320	696	100	104	204	2,556

² STU = Students

³ Student capacity obtained from Table 10 of the Mountain View School District School Facilities Needs Analysis.

PROPOSED PROJECT TRIP GENERATION

Table 2 provides a summary of the proposed Project trip generation. As shown in Table 2, the proposed Project is anticipated to generate 2,466 weekday trip-ends per day, with 610 AM peak hour trips and 236 PM peak hour trips.

TABLE 2: PROPOSED PROJECT TRIP GENERATION SUMMARY

Land Use	Units ²	ITE LU Code	AM Peak Hour			PM Peak Hour			Daily
			In	Out	Total	In	Out	Total	
Trip Generation Rates¹

Total			307	303	610	128	108	236	2,466

¹ Trip Generation Source: Institute of Transportation Engineers (ITE), Trip Generation Manual, Tenth Edition (2017).

² DU = Dwelling Units; STU = Students

³ Internal Capture percentage obtained from The Avenue Specific Plan Amendment Traffic Impact Analysis, dated August 27, 2008 prepared by Urban Crossroads, Inc.

⁴ Student capacity obtained from Table 10 of the Mountain View School District School Facilities Needs Analysis.

TRIP GENERATION COMPARISON

As shown in Table 3, based on a comparison of the trip generation from the currently approved specific plan and the proposed Project, the proposed Project is anticipated to generate 90 fewer daily trips, with 86 fewer AM peak hour trips and an increase of 32 PM peak hour trips.

RESOLUTION NO.

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, RECOMMENDING CITY COUNCIL APPROVAL OF FILE NO. PGPA19-008, A GENERAL PLAN AMENDMENT TO MODIFY THE POLICY PLAN (GENERAL PLAN) LAND USE PLAN (EXHIBIT LU-01) COMPONENT OF THE ONTARIO PLAN, CHANGING THE LAND USE DESIGNATION ON 10.49 ACRES OF LAND FROM PUBLIC SCHOOL TO LOW-MEDIUM DENSITY RESIDENTIAL (5.1 – 11 DU/AC), IN CONJUNCTION WITH MODIFICATION OF THE FUTURE BUILDOUT TABLE (EXHIBIT LU-03) TO BE CONSISTENT WITH THE PROPOSED LAND USE DESIGNATION CHANGE, AND MAKING FINDINGS IN SUPPORT THEREOF—APN: 0218-652-27. (SEE EXHIBITS A AND B) (PART OF CYCLE 4 FOR THE 2020 CALENDAR YEAR).

WHEREAS, Ontario Schaefer Holdings, LLC., (hereinafter referred to as "Applicant") has filed an Application for the approval of a General Plan Amendment, File No. PGPA19-008, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 10.49 acres of vacant land generally located at the northeast corner of La Avenida Drive and Manitoba Place, currently within the Public School land use district of The Avenue Specific Plan; and

WHEREAS, the property to the north of the Project site is within the proposed Low-Medium Density Residential land use district of The Avenue Specific Plan and is vacant. The properties to the north, west, and south are within the Low-Density Residential land use district of The Avenue Specific Plan and are under construction with single-family homes. The property to the east is within the School land use district of The Avenue Specific Plan and is vacant; and

WHEREAS, the City of Ontario adopted the Policy Plan (General Plan) as part of The Ontario Plan in January 2010. Since the adoption of The Ontario Plan, the City has evaluated Exhibits LU-01: Official Land Use Plan and LU-03: Future Buildout further and is proposing modifications; and

WHEREAS, on July 23, 2019, the City received a letter from the Mountain View School District (MVSD) Superintendent, Douglass Moss, informing us that they would not be pursuing or acquiring the future 20.49 acre school site located within Planning Areas 6B and 9B of The Avenue Specific Plan identified for a middle school. The western 10.49 acres of the school (PA 6B) is owned by Ontario Schaefer Holdings Inc, LLC, and eastern 10 acres (PA 9B) is owned by Brookcal Ontario, LLC. Ontario Schaefer Holdings is requesting to move forward with a GPA to change the land use designation of 10.49 acres of land, from Public School to Low-Medium Density Residential. The proposed Low-

Medium Density Residential land use will provide a buffer and transition from the presumed 10-acre elementary school to the east of the project site to the low density residential to the west and be consistent with Low-Medium Density Residential land use within PA-7 of The Avenue Specific Plan, located at the southwest corner of La Avenida and Broadway Avenue; and

WHEREAS, the General Plan Amendment (File No. PGPA19-008) proposes to modify the Policy Plan (General Plan) Land Use Plan (Exhibit LU-01) component of The Ontario Plan, changing the land use designation on approximately 10.49 acres of land from Public School to Low-Medium Density Residential (5.1-11 du/ac) as shown on Exhibit A, attached, to accommodate future residential development of the Project site; and

WHEREAS, Policy Plan Exhibit LU-03 (Future Buildout) specifies the expected buildout for the City of Ontario, incorporating the adopted land use designations. The proposed changes to Exhibit LU-01 (Official Land Use Plan) will require that Exhibit LU-03 (Future Buildout) is modified to be consistent with Exhibit LU-01 (Official Land Use Plan), as depicted on Exhibit B, attached; and

WHEREAS, a Specific Plan Amendment and Tentative Tract Map, File Nos. PSPA19-011 and PMTT19-015 respectively, were filed in conjunction with the proposed General Plan Amendment. The two applications consist of: 1) an amendment to The Avenue Specific Plan to change the land use designation for Planning Area 6B (PA-6B) from School to Low-Medium Density Residential, introduce Product Type 1D (2,700-3,500 square foot lots), and revise exhibits, maps, development standards, and other text throughout the Specific Plan to accommodate the proposed land use change; and 2) a Tentative Tract Map (File No. PMTT19-015/TPM 20298) to subdivide 10.49 acres of land into 106 numbered parcels and 19 lettered lots, to facilitate a future Development Plan application; and

WHEREAS, The Avenue Specific Plan Environmental Impact Report (State Clearinghouse No. 2005071109) was certified on February 16, 2007, in which development and use of the Project site was discussed; and

WHEREAS, The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140) was certified on January 27, 2010 (hereinafter referred to as "Certified EIR"), in which development and use of the Project site was discussed; and

WHEREAS, the Planning Director of the City of Ontario prepared and approved for attachment to the certified Environmental Impact Report, an Addendum to the Certified EIR (hereinafter referred to as "EIR Addendum") in accordance with the requirements of the California Environmental Quality Act of 1970, together with State and local guidelines implementing said Act, all as amended to date (collectively referred to as "CEQA"); and

WHEREAS, the environmental impacts of this Project were thoroughly analyzed in the EIR Addendum, which concluded that implementation of the Project could result in a number of significant effects on the environment that were previously analyzed in the Certified EIR, and that the Certified EIR identified mitigation measures that would reduce each of those significant effects to a less-than-significant level; and

WHEREAS, the City's "Local Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act — Public Resources Code Section 21000 et seq. — (hereinafter referred to as "CEQA") and an EIR Addendum has been prepared to determine possible environmental impacts; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and make recommendation to the City Council on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (hereinafter referred to as "ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, as the first action on the Project, on October 27, 2020, the Planning Commission issued a Resolution recommending City Council adopt the EIR Addendum, finding that the proposed Project introduces no new significant environmental impacts

and applying all previously adopted mitigation measures to the Project, which were incorporated by reference; and

WHEREAS, on October 27, 2020, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: *Housing Element Compliance.* Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the recommending authority for the Project, the Planning Commission finds that based upon the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the Project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan. The Project site is one of the properties listed in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix, and the proposed Project is consistent with the number of dwelling units (2,875) and density (2-12 du/ac) specified in the Available Land Inventory.

SECTION 2: *Ontario International Airport Land Use Compatibility Plan (“ALUCP”) Compliance.* The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the ALUCP, establishing the Airport Influence Area for Ontario International Airport (hereinafter referred to as “ONT”), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the recommending authority for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ALUCP compatibility factors, including [1] Safety Criteria (ALUCP Table 2-2) and Safety Zones (ALUCP Map 2-2), [2] Noise Criteria (ALUCP Table 2-3) and Noise Impact Zones (ALUCP Map 2-3), [3] Airspace protection Zones (ALUCP Map 2-4), and [4] Overflight Notification Zones (ALUCP Map 2-5). As a result, the PLANNING COMMISSION, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ALUCP.

SECTION 3: *Concluding Facts and Reasons.* Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing, and upon the specific findings set forth in Sections 1 and 2, above, the Planning Commission hereby concludes as follows:

(1) The proposed General Plan Amendment is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, as the Project will contribute to providing “a spectrum of housing types and price ranges that match the jobs in the City, and that make it possible for people to live and work in Ontario and maintain a quality of life” (Goal LU1). In addition, the Project will further “[d]iversity in types of quality housing that are affordable to a range of household income levels, accommodate changing demographics, and support and reinforce the economic sustainability of Ontario (Goal H2). Moreover, the Project will promote the City’s policy to “incorporate a variety of land uses and building types that contribute to a complete community where residents at all stages of life, employers, workers, and visitors, have a wide spectrum of choices of where they can live, work, shop, and recreate within Ontario” (Policy LU1-6 *Complete Community*); and

(2) The proposed General Plan Amendment would not be detrimental to the public interest, health, safety, convenience, or general welfare of the City; and

(3) The Land Use Element is a mandatory element allowed four general plan amendments per calendar year and this general plan amendment is the fourth amendment to the Land Use Element for the 2020 calendar year, consistent with Government Code Section 65358; and

(4) The Project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan. The Project site is one of the properties listed in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix, and the proposed Project is consistent with the number of dwelling units (2,875) and density (2-12 du/ac) specified in the Available Land Inventory; and

(5) During the amendment of the general plan, opportunities for the involvement of citizens, California Native American Indian tribes (Government Code Section 65352.3.), public agencies, public utility companies, and civic, education, and other community groups, through public hearings or other means were implemented consistent with Government Code Section 65351.

SECTION 4: *Planning Commission Action.* Based upon the findings and conclusions set forth in Sections 1 through 3, above, the Planning Commission hereby **RECOMMENDS THE CITY COUNCIL APPROVE** the herein described Application,

subject to each and every condition set forth in the Department reports attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 5: *Indemnification.* The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 6: *Custodian of Records.* The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 7: *Certification to Adoption.* The Secretary shall certify to the adoption of the Resolution.

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a regular meeting thereof held on the 27th day of October 2020, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

Notes

- Historically, citywide buildout levels do not achieve the maximum allowable density/intensity on every parcel and are, on average, lower than allowed by the Policy Plan. Accordingly, the buildout projections in this Policy Plan do not assume buildout at the maximum density or intensity and instead are adjusted downward. To view the buildout assumptions, access the Methodology report.
- Acres are given as adjusted gross acreages, which do not include the right-of-way for roadways, flood control facilities, or railroads.
- Assumed Density/Intensity includes both residential density, expressed as units per acre, and non-residential intensity, expressed as floor area ratio (FAR), which is the amount of building square feet in relation to the size of the lot.
- Projections of population by residential designation are based on a persons-per-household factor that varies by housing type. For more information, access the Methodology report.
- To view the factors used to generate the number of employees by land use category, access the Methodology report.
- Acreages and corresponding buildout estimates for these designations do not reflect underlying land uses within the Business Park, Industrial and Commercial Overlays. Estimates for these areas are included within the corresponding Business Park, Industrial and General Commercial categories.

RESOLUTION NO.

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, RECOMMENDING CITY COUNCIL APPROVAL OF FILE NO. PSPA19-011, A SPECIFIC PLAN AMENDMENT TO CHANGE THE LAND USE DESIGNATION ON 10.49 ACRES OF LAND FROM SCHOOL TO LOW-MEDIUM DENSITY RESIDENTIAL, INTRODUCE PRODUCT TYPE 1D (2,700-3,500 SQUARE-FOOT LOTS), AND REVISE EXHIBITS, MAPS, DEVELOPMENT STANDARDS, AND OTHER TEXT THROUGHOUT THE SPECIFIC PLAN TO ACCOMMODATE THE PROPOSED LAND USE CHANGE, AND MAKING FINDINGS IN SUPPORT THEREOF—APN: 0218-652-27.

WHEREAS, Ontario Schaefer Holdings, LLC. (hereinafter referred to as "Applicant") has filed an Application for the approval of a Specific Plan Amendment, File No. PSPA19-011, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 10.49 acres of vacant land generally located at the northeast corner of La Avenida Drive and Manitoba Place, currently within the Public School land use district of The Avenue Specific Plan; and

WHEREAS, the property to the north of the Project site is within the proposed Low-Medium Density Residential land use district of The Avenue Specific Plan and is vacant. The properties to the north, west, and south are within the Low-Density Residential land use district of The Avenue Specific Plan and are under construction with single-family homes. The property to the east is within the School land use district of The Avenue Specific Plan and is vacant; and

WHEREAS, Specific Plan Amendment includes changes to The Avenue Specific Plan Land Use Summary. The revisions to the Land Use Summary will reflect the proposed changes to the Project site's land use, from School to Low-Medium Density Residential; and

WHEREAS, the Specific Plan Amendment includes updates to the development standards, land use matrix, and various exhibits, along with text/map changes to reflect the proposed land use changes and infrastructure requirements to accommodate future residential development with a new conventional product type (Product Type 1D, 2,700-3,500 square-foot lots). The development regulations and land use matrix have been amended to include standards and the additional product type for Planning Area 6B (PA-6B); and

WHEREAS, a General Plan Amendment and Tentative Tract Map, File Nos. PGPA19-008 and PMTT19-015/TM20298 respectively, were filed in conjunction with the

proposed Specific Plan Amendment. The two applications consist of: [1] A General Plan Amendment (File No. PGPA19-008) to modify the Policy Plan (General Plan) Land Use Plan (Exhibit LU-01) component of The Ontario Plan, changing the land use designation on 10.49 acres of land from Public School to Low-Medium Density Residential, in conjunction with modification of the Future Buildout Table (Exhibit LU-03) to be consistent with the proposed land use designation change; and, [2] A Tentative Tract Map (File No. PMTT19-015/TM 20298) to subdivide 10.49 acres of land into 106 numbered lots and 19 lettered lots, to facilitate a future Development Plan application; and

WHEREAS, The Avenue Specific Plan Environmental Impact Report (State Clearinghouse No. 2005071109) was certified on February 16, 2007, in which development and use of the Project site was discussed; and

WHEREAS, The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140) was certified on January 27, 2010 (hereinafter referred to as "Certified EIR"), in which development and use of the Project site was discussed; and

WHEREAS, the Planning Director of the City of Ontario prepared and approved for attachment to the certified Environmental Impact Report, an Addendum to the Certified EIR (hereinafter referred to as "EIR Addendum") in accordance with the requirements of the California Environmental Quality Act of 1970, together with State and local guidelines implementing said Act, all as amended to date (collectively referred to as "CEQA"); and

WHEREAS, the environmental impacts of this project were thoroughly analyzed in the EIR Addendum, which concluded that implementation of the Project could result in a number of significant effects on the environment that were previously analyzed in the Certified EIR, and that the Certified EIR identified mitigation measures that would reduce each of those significant effects to a less-than-significant level; and

WHEREAS, the City's "Local Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act — Public Resources Code Section 21000 et seq. — (hereinafter referred to as "CEQA") and an EIR Addendum has been prepared to determine possible environmental impacts; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and make recommendation to on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (hereinafter referred to as "ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, as the first action on the Project, on October 27, 2020, the Planning Commission issued a Resolution recommending City Council adopt the EIR Addendum, finding that the proposed Project introduces no new significant environmental impacts and applying all previously adopted mitigation measures to the Project, which were incorporated by reference; and

WHEREAS, on October 27, 2020, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: Housing Element Compliance. Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the recommending authority for the Project, the Planning Commission finds that based upon the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan. The project site is one of the properties listed in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report

Appendix, and the proposed project is consistent with the number of dwelling units (2,875) and density (2-12 du/ac) specified in the Available Land Inventory.

SECTION 2: Ontario International Airport Land Use Compatibility Plan (“ALUCP”) Compliance. The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the ALUCP, establishing the Airport Influence Area for Ontario International Airport (hereinafter referred to as “ONT”), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the recommending authority for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ALUCP compatibility factors, including [1] Safety Criteria (ALUCP Table 2-2) and Safety Zones (ALUCP Map 2-2), [2] Noise Criteria (ALUCP Table 2-3) and Noise Impact Zones (ALUCP Map 2-3), [3] Airspace protection Zones (ALUCP Map 2-4), and [4] Overflight Notification Zones (ALUCP Map 2-5). As a result, the PLANNING COMMISSION, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ALUCP.

SECTION 3: Concluding Facts and Reasons. Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing, and upon the specific findings set forth in Sections 1 and 2, above, the Planning Commission hereby concludes as follows:

(1) ***The proposed Specific Plan, or amendment thereto, is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan.*** The proposed The Avenue Specific Plan Amendment will provide land use consistency with the related proposed General Plan Amendment (File No. PGPA19-008) that will change the land use on 10.49 acres of land from School to Low-Medium Density Residential. The proposed amendments will accommodate a proposed residential development on the subject site that is consistent with goals, policies, plans and City Council priorities of The Ontario Plan.

(2) ***The proposed Specific Plan, or amendment thereto, would not be detrimental to the public interest, health, safety, convenience, or general welfare of the City.*** The proposed amendments to The Avenue Specific Plan will establish consistency with the related proposed General Plan Amendment (File No. PGPA19-008). The proposed Specific Plan Amendment will not be detrimental to the public interest,

health, safety, convenience, or general welfare of the City. The land use changes will continue to provide residential land uses within The Avenue Specific Plan, which is consistent with the type and intensity of development specified in The Ontario Plan and evaluated by The Ontario Plan Environmental Impact Report.

(3) ***In the case of an application affecting specific property(ies), the proposed Specific Plan, or amendment thereto, will not adversely affect the harmonious relationship with adjacent properties and land uses.*** The Project site is currently zoned for a public school land use and is surrounded by other residentially designated properties to the north, west, and south of the Project site. The proposed Specific Plan Amendment will not adversely affect the harmonious relationship with adjacent properties and land uses, because it will remain consistent with said properties and land uses. The proposed Specific Plan Amendment will facilitate a related Tentative Tract Map application (File No. PMTT19-015) and a future Development Plan application, which will provide additional housing and recreational facilities for the neighborhood, as well as tract improvements such as landscaping.

(4) ***In the case of an application affecting specific property(ies), the subject site is physically suitable, including, but not limited to, parcel size, shape, access, and availability of utilities, for the request and anticipated development.*** The subject site is physically suitable to accommodate the proposed residential land uses that are a result of the Specific Plan Amendment and related files. The Avenue Specific Plan amendment includes development standards to facilitate the proposed land uses, which will be developed with adequate lot sizes, access, and utilities to serve the Project site.

SECTION 4: Planning Commission Action. Based upon the findings and conclusions set forth in Sections 1 through 3, above, the Planning Commission hereby RECOMMENDS THE CITY COUNCIL APPROVE the herein described Application, subject to each and every condition set forth in the Department reports attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 5: Indemnification. The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 6: Custodian of Records. The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 7: Certification to Adoption. The Secretary shall certify to the adoption of the Resolution.

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a regular meeting thereof held on the 27th day of October 2020, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

Section 1 - Introduction/Overview

1.1 Vision of The Avenue

The Avenue will be a truly walkable community, featuring pedestrian amenities that encourage walking and biking to schools, parks and basic commercial needs—all within five minutes, for the majority of residents. The Avenue is named after the central **La Avenida Drive**, a tree-lined street with one-way traffic on each side, and a continuous 13' parkway and 8' sidewalk on both sides without curb cuts or driveways to create an uninterrupted path. The Avenue will provide a connection from Archibald Avenue to the Recreation Area, Active Recreation Park, **Elementary Schools**, **Middle School**, and adjacent neighborhood and pocket parks. With a diversity of housing types and styles, The Avenue will have something for everyone—providing a place for everyone to live, learn, play and shop.

1.2 Project Location

The Avenue Specific Plan is comprised of approximately 568.1 gross acres. The project site is bounded by Schaefer Avenue to the north, **Ontario Ranch Road** to the south, Haven Avenue to the east, Carpenter Avenue to the west as illustrated in Exhibit 1, “Regional Map” and Exhibit 2, “Project Location”.

The Avenue will offer a variety of residential housing types and neighborhoods within walking distance to parks, schools, and recreation facilities. The Land Use Plan, as illustrated in Exhibit 8, “Land Use Plan” is consistent with the goals and policies of the New Model Colony General Plan Amendment, combining walkable residential neighborhoods served by recreational spaces that offer opportunities for social interaction among residents. A Planned retail and commercial area is located within **La Avenida Drive** at **Ontario Ranch Road** and Haven Avenues to serve the commercial needs of the residents of The Avenue as well as surrounding neighborhoods.

The regional context and local setting of The Avenue (the Project Site) are illustrated in Exhibit 1, "Regional Map", and Exhibit 2, "Project Location Map".

Exhibit 1 - Regional Map

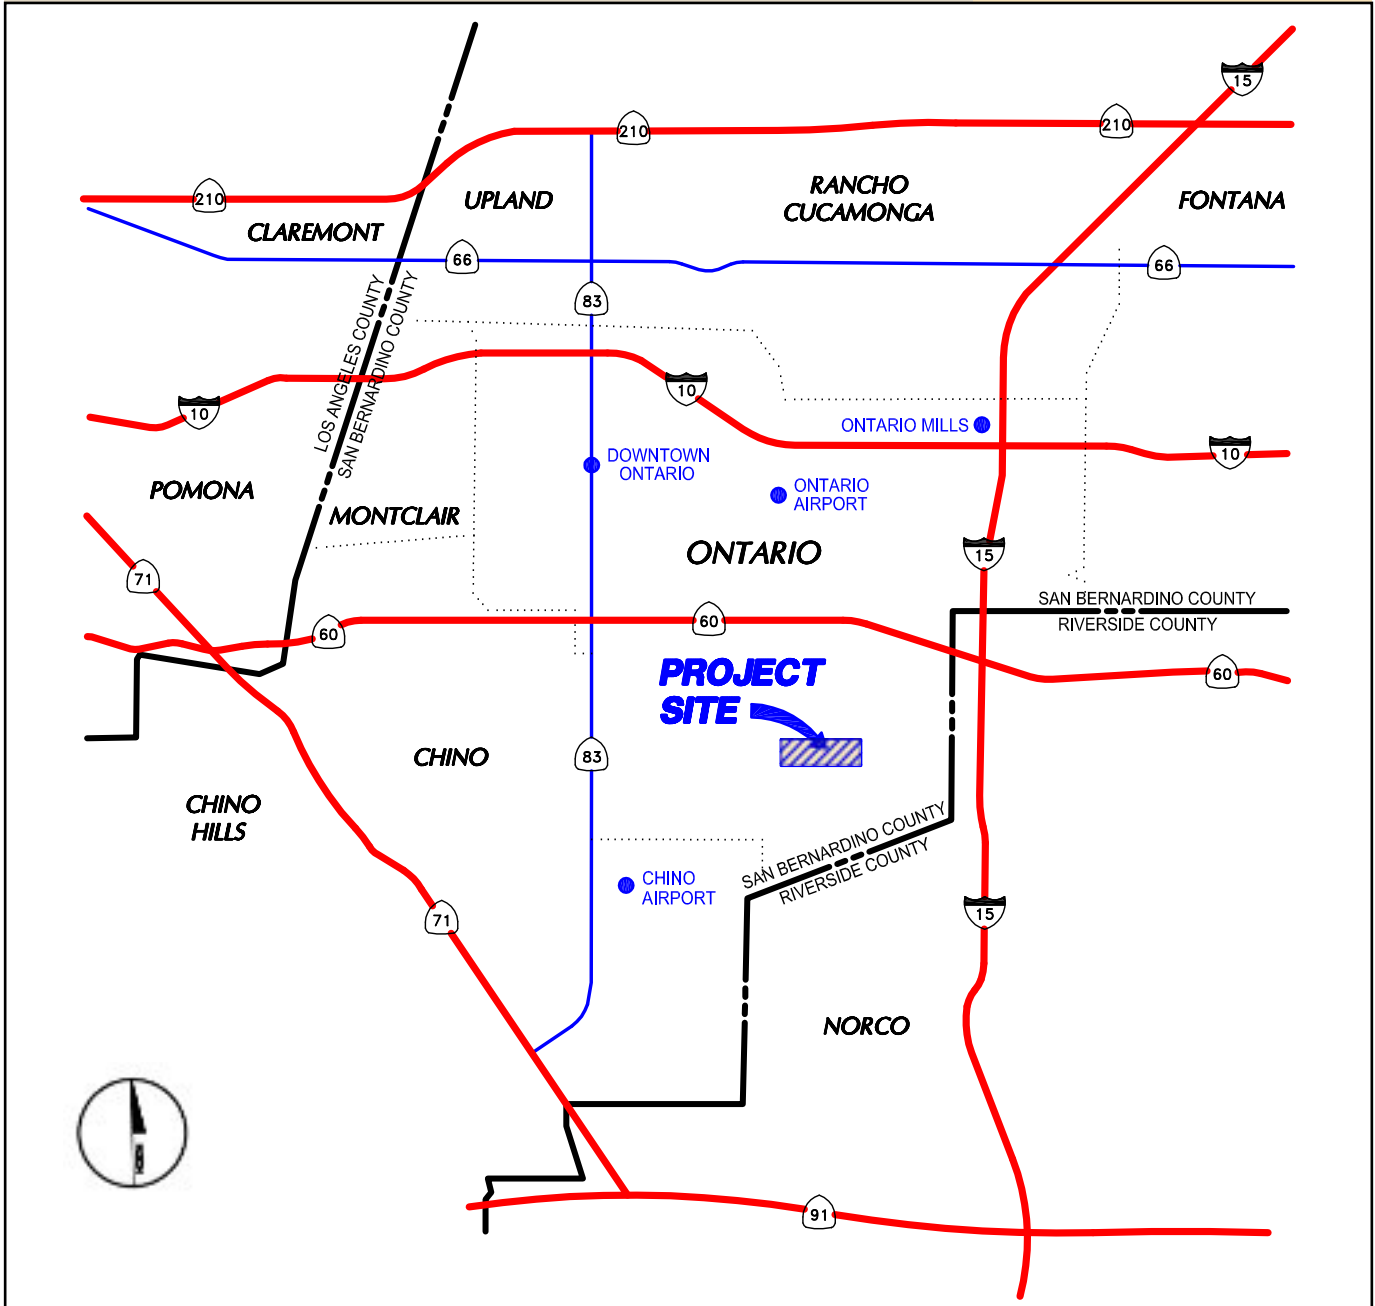

Exhibit 2 - Project Location Map

1.3 Project History and Background

After an extensive public participation program, the Ontario City Council adopted the Sphere of Influence General Plan Amendment for the 8,069 acre area known as the “The New Model Colony” on January 7, 1998. On November 30, 1999, the area was annexed into the City of Ontario. The New Model Colony General Plan provides the framework to create a high quality environment where residents will live, work and play. The area was divided into 30 subareas, each requiring the preparation of a specific plan reflecting the unique goals and qualities of each area. In this way, each subarea could be part of the overall New Model Colony, but retain a sense of individuality. The Avenue site has historically been used for agricultural operations, primarily dairy use. Those areas not in active agricultural production are occupied by rural residential housing, farm buildings, and other ancillary agricultural facilities. The natural vegetation and soil conditions that once occurred throughout **La Avenida Drive** have been significantly altered through agricultural uses, leaving little or no native vegetation.

On January 26th, 2010, the City of Ontario adopted The Ontario Plan (TOP) which serves as the City’s new business plan and includes a long term Vision and a principle based Policy Plan (General Plan). The city’s Policy Plan, which acts as the City’s General Plan, designates (Policy Plan Exhibit LU-1 -Land Use Plan) the project site for development of Low Density Residential (2.1 -5.0 dwelling units per acre), Low Medium Residential (5.1 - 11 .0 dwelling units per acre), Medium Density Residential (11.1 - 25.0 dwelling units per acre), Neighborhood Commercial, Public Schools, and Open Space- Parkland.

The Avenue
SPECIFIC PLAN

The New Model Colony

ONTARIO, CALIFORNIA

The Avenue Specific Plan was amended on February 2, 2010, June 17, 2104, and March 21, 2017 to modify the Land Use Plan. The city of Ontario General Plan (The Ontario Plan – TOP) and The Avenue Specific Plan was amended concurrently and reflects the final language to convert a 10 acre portion of the 20 acre school site located west of Turner Road; identified as PA 6B to Low Medium Density Residential (5.1 – 11.0 dwelling units per acre).

1.4 Specific Plan Purpose

The Avenue Specific Plan serves to implement the City's Policy Plan for the project site and provides zoning regulations for development of the project site by establishing permitted land use, development standards, infrastructure requirements, and implementation requirements for development. A comprehensive set of design guidelines and development regulations are included to guide and regulate site planning, landscape and architectural character within the community ensuring that excellence in community design is achieved during project development. The Avenue Specific Plan establishes the procedures and requirements to approve new development within the project site.

1.5 Specific Plan Objectives

The following objectives are established for The Avenue Specific Plan:

Residential Areas

1. Development of a variety of housing types into the land use plan addressing a wide variety of lifestyles and economic segments
2. Provide for both single family attached and detached housing in low density and low medium density residential districts
3. Plan for seamless transitions between housing product types in order to create cohesive neighborhoods that include a range of types and styles
4. Plan residential neighborhoods around a series of parks and open space areas, promoting outdoor activity and interaction among neighbors
5. Provide for connectivity between residential neighborhoods, recreational areas, and adjacent commercial land uses, as well as to the elementary and middle schools, by means of pedestrian and bicycle trail linkages along the Avenue and trails incorporated into both the Southern California Edison Easement and the Cucamonga Creek Channel

6. Create a strong functional relationship between homes and schools
7. Create an hierarchy of parks, providing for active and passive recreation
8. Create residential neighborhoods with diverse architectural styles and traditional design elements reflecting some of the characteristics of older established Ontario neighborhoods

Commercial Area

1. Develop retail and commercial uses to meet the needs of the residential community and larger surrounding market area, as well as implement Policy Plan Policies
2. Provide trails and sidewalks to connect the residential community with the retail and commercial area
3. Consider the development of plazas and other public space amenities within the retail and commercial area providing space for social interaction
4. Orient retail and commercial buildings to the street, wherever possible, to create an urban edge and sense of arrival

1.6 Development Approval Components

The components of the development approval process for The Avenue are discussed below.

General Plan

The Ontario Plan establishes the direction and vision for the City of Ontario providing a single guidance system that will shape the Ontario community for the future. The Plan provides for policies to accommodate change over a 30 year period commencing in 2010, the beginning of the planning period. The Ontario Plan consists of a six part Component Framework: 1) Vision, 2) Governance Manual, 3) Policy Plan, 4) City Council Priorities, 5) Implementation, and 6) Tracking and Feedback.

Specific Plan

The Policy Plan requires the approval of a Specific Plans for development of the project site to ensure that sufficient land area is included to achieve unified districts and neighborhoods. The City of Ontario has zoned the project site as AG-Specific Plan. The zoning designation of AG-Specific Plan requires that a Specific Plan be approved to guide development of the project site and to implement the goals and policies of the Policy Plan. The Specific Plan provides the zoning regulations to govern development of the project

site. The requirements of the Specific Plan shall take precedence over the City of Ontario Development Code. In instances where the Specific Plan is silent, the City of Ontario Development Code shall prevail.

Subdivision Maps

Tentative tract maps will be approved by the City of Ontario for the residential portion of The Avenue indicating the approximate location of lot lines, streets, and proposed grading. Following approval by the City of the tentative tract maps, final maps will be prepared. The final maps become legal documents that are recorded and define legal parcels and lots that can be sold for development. Parcel maps may be approved by the City of Ontario for development proposed within the commercial and business park/light industrial portions of The Avenue.

Development Plan Review

Following the approval of The Avenue Specific Plan, all development proposals for individual neighborhoods or product areas within the Specific Plan will be subject to the Development Plan Review process pursuant to Article 8 of the City's Development Code.

Development Agreement(s) Required

Unless done in a coordinated manner and with adequate fiscal planning, development projects within the New Model Colony are likely to present a challenge in their implementation because of the lack of existing public facilities including streets, sewerage, transportation, drinking water, school, and utility facilities. California law has established a mechanism for ensuring the adequate provision of such facilities, while at the same time providing assurances to applicants that, upon approval of the project, the applicants can proceed with their projects. Approval of this Specific Plan without development agreements may result in a waste of resources, escalate the cost of housing to the consumer, and discourage investment in and commitment to comprehensive planning, as envisioned by the City, which seeks to make maximum efficient utilization of resources at the least economic cost to the public.

Therefore, a single statutory development agreement, or multiple agreements, authorized pursuant to California Government Code sections 65864 et seq., shall be required as part of the approval of this Specific Plan. For the above-mentioned reasons, the development agreement(s) for this Specific Plan shall include, among other things, methods for financing acquisition and construction of infrastructure, acquisition and development of adequate levels of parkland, and schools, as well as the provision of adequate housing opportunities for various segments of the community consistent with the regional housing needs assessment. Such development agreements shall have been fully approved before the issuance of building permits for plans within this project.

1.7 Specific Plan Authority and Requirements

State of California Government Code, Title 7, Division 1, Chapter 3, Article 8, Section 65450-57 grants authority to cities to adopt Specific Plans for purposes of implementing the goals and policies of their

General Plans. The Government Code specifies that Specific Plans will be adopted by ordinance, and that the Specific Plan is required to be consistent with the General Plan. The City of Ontario will be adopting this Specific Plan, as with other New Model Colony Specific Plans, by ordinance, thereby establishing the zoning regulations for the development of The Avenue. The standards set by The Avenue Specific Plan shall take precedence over the City of Ontario Development Code, and in instances where The Avenue Specific Plan is silent, the City of Ontario Development Code shall prevail.

California Government Code Section 65451 sets forth the minimum requirements and review procedures for specific plans as follows:

A Specific Plan shall include a text and a diagram or diagrams, which specify all of the following in detail:

1. The distribution, location, and extent of the uses of land, including open space, within the area covered by the plan;
2. The proposed distribution, location, and extent and intensity of major components of public and private transportation, sewage, water, drainage, solid waste disposal, energy, and other essential facilities proposed to be located within the area covered by the plan and needed to support the land uses described in the plan;
3. Standards and criteria by which improvements will proceed, and standards for the conservation, development, and utilization of natural resources, where applicable, and a program of implementation measures including regulations, programs, public works projects and the financing measures necessary to carry out paragraphs 1 and 2 above. The Specific Plan shall include a statement of the relationship of the Specific Plan to the General Plan.

Typical outdoor eating area—Middle School

1.8 Relationship to General Plan, Airport Land Use Compatibility and Zoning

The City's Policy Plan, which acts as the City's General Plan, designates the project site for development as follows:

- Low Density Residential (2.1 -5.0 dwelling units per acre)
- Low Medium Residential (5.1 - 11 .0 dwelling units per acre)
- Medium Density Residential (11.1 - 25.0 dwelling units per acre)
- Neighborhood Commercial
- Public Schools
- Open Space- Parkland.
- Open Space - Non-Recreation

The Policy Plan (General Plan) establishes a development capacity of 4,010 dwelling units and a maximum FAR of 0.40 for Neighborhood Commercial for a total of up to 172,240 square feet of commercial uses for the Specific Plan Area. The Policy Plan residential capacity is further broken down as follows:

Gross Acres	TOP Land Use Designation	Maximum Permitted Dwelling Units
391.72	Low Density Residential	1,763
19.9 29.9	Low Medium Density Residential	169 254
94.97	Medium Density Residential	2,078
Total 506.09 516.59		4,010 4,095*

**Densities do not reflect maximum allowable densities by the Policy Plan and are based on TOP EIR densities (average) of 4.5 du/ac for Low Density, 8.5 du/ac for Low Medium Density and 22 du/ac for Medium Density.*

California Government Code (Title 7, Division 1, Chapter 3, Article 8, Section 65450-65457) permits the adoption and administration of specific plans as an implementation tool for elements contained in the local general plan. Specific plans must demonstrate consistency in regulations, guidelines, and programs with the goals and policies set forth in the general plan. The Avenue Specific Plan has been prepared in conformance with the goals and policies of the City of Ontario Policy Plan (General Plan). The policy analysis in located in the Appendix of this document, describes the manner in which the Avenue Specific Plan complies with the Policy Plan policies applicable to the project.

The Avenue Specific Plan is located within the Airport Influence Area (AIA) of Chino Airport and Ontario International Airport and is required to be consistent with both Airport Land Use Compatibility Plans.

1.9 CEQA Compliance

An Environmental Impact Report (EIR) was prepared by the City of Ontario for The Avenue Specific Plan in accordance with the California Environmental Quality Act (CEQA), to address impacts associated with the Specific Plan. The EIR was prepared as a basis for the environmental review for all subsequent discretionary and ministerial actions. On December 19, 2006, the City Council certified the EIR for The Avenue Specific Plan.

Policy Plan Land Use Map

The Avenue

SPECIFIC PLAN

Section 2 - Existing Conditions

2.1 Site History

The Avenue site has previously been extensively used for agricultural operations, including dairy use. Those areas not in active agricultural production are occupied by rural residential housing, farm buildings and other ancillary facilities. The natural vegetation and soils conditions that once occurred throughout the project area have been significantly altered through agricultural uses, leaving little or no native vegetation. **Though still currently in the transitioning phase for development from agricultural uses, The the Zoning Classification for parts of the site is were once considered as (AG) Specific Plan Ag Preserve.**

2.2 Existing Site Conditions

The Avenue **has undergone a significant change in land use patterns replacing what was historically undeveloped, with agricultural operations scattered throughout the area with lower density urban land uses. Historically,** improvements within The Avenue included single-family residences, feed storage areas, and various other farming or cattle raising facilities. Other agricultural-related facilities, such as above ground tanks and modular structures, **were** scattered throughout, and a commercial nursery **was** located on the easterly portion of the site. **These agricultural uses are transitioning to residential uses, parks and recreational areas and neighborhood commercial development since the Avenue Specific Plan has been approved and has been implemented over the plan area.**

Exhibit 4 - Site Aerial Photo

2.2.1 Site Area

The Avenue Specific Plan is approximately 568.1 gross acres in size. This includes street right-of-ways and all utility easements.

2.2.2 Topography

The Project Site is located on gently sloping undeveloped terrain with a relatively uniform slope as illustrated in Exhibit 5, "Existing Topography". The existing ground on the site slopes southerly away from Schaefer Avenue at an approximately 1% grade.

2.2.3 Existing On-site Land Use

The Avenue Specific Plan currently comprises agricultural, dairy, farming, and other agricultural related land uses. There are utility uses such as the Cucamonga Creek flood control channel and the Southern California Edison utility easement traversing the site, as well as a one-acre Southern California Edison substation.

View of Dairy Farm that existed on the Project Site prior to the adoption of the original Avenue Specific Plan

Historic agricultural uses on the Project Site circa 2004

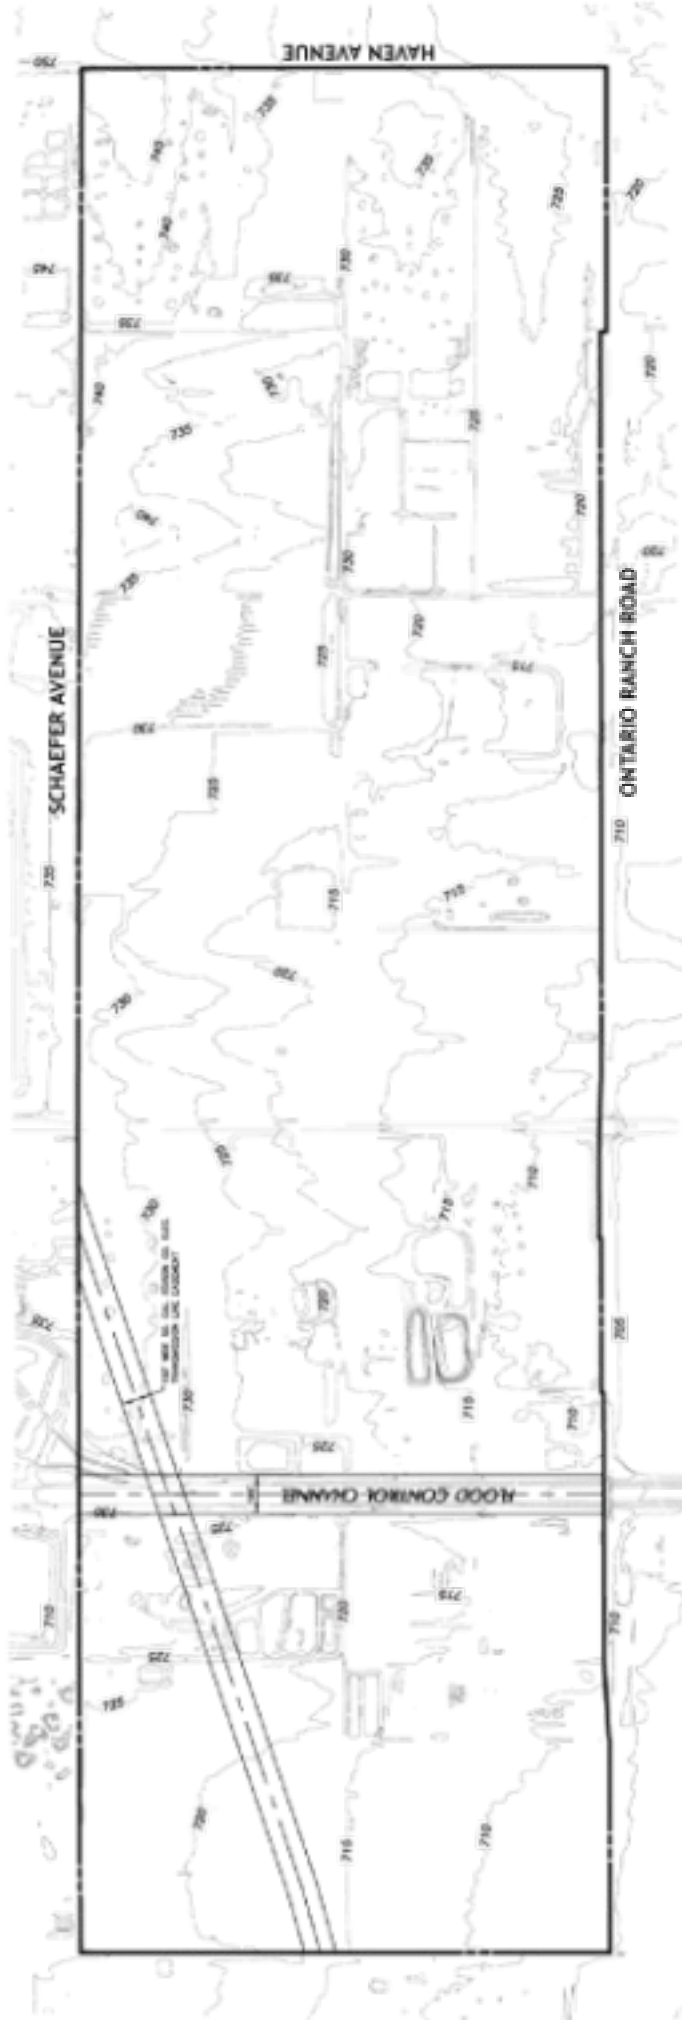

Streetscene along La Avenida Drive

Turner Avenue and La Avenida Drive Intersection

Existing Conditions

Note: The existing site slopes southerly at approximately 2% grade.

2.2.4 Surrounding Land Use

Land uses adjacent to The Avenue Specific Plan area include:

- North: Existing residential community and SCE Easement.
- East: New residential community, low and medium density developments, farm land and vacant land.
- South: Existing residential community is currently under construction and future mixed use/residential development.
- West: Farm land and vacant land.

The New Model Colony General Plan designates the surrounding areas as:

- North: Low Density Residential, Elementary School, Flood Control and Green Belt (Subareas 5 and 12)
- East: Low Density Residential and Green Belt (Subarea 12)
- South: Low, Medium and High Density Residential, Flood Control and Green Belt (Subarea 23)
- West: Medium Density Residential, High Density Residential and Green Belt (Subarea 17)

La Avenida as viewed from Archibald looking East

2.2.5 Williamson Act Contracts

There are currently 3 Williamson Act Contracts within the Specific Plan Area as shown in Exhibit 6, "Williamson Act Contracts".

Existing Conditions

2.4 Existing Circulation

Access to The Avenue Specific Plan is currently provided from newly constructed arterial and collector roadways that are developed adjacent to and within The Avenue Specific Plan area. Ontario Ranch Road abuts the plan area on the south and is currently being improved in a phased manner from Haven Avenue westerly towards Carpenter Avenue.

Archibald Avenue has partially been improved to its ultimate condition and bisects the plan area through the center of the project. Schaefer Avenue has been fully constructed from Haven Avenue to Archibald Avenue. Haven Avenue has been fully constructed between Schaefer Avenue and Ontario Ranch Road (formerly Edison Avenue).

The New Model Colony • Ontario, California

Exhibit 7 - Assessors Parcel Numbers

2.5 Existing Infrastructure and Utilities

2.5.1 Water

There is an existing 12-inch main within Archibald. This is a Chino Desalter Authority (CDA) line which extends through **La Avenida Drive**. The source is well water, the zone is elevation 1010 and the line usage is for dairy lands in this vicinity. The private wells currently in use for this main will eventually be destroyed per DHS standards upon development of this Specific Plan. The location of existing wells are shown in Exhibit 24, "Existing Wells". Per the NMC Water Master Plan, new domestic facilities will be required to serve The Avenue Specific Plan area. Existing water facilities are shown on Exhibit 20, "Domestic Water Master Plan".

In compliance with the Chino Basin Water Master's Well Procedure for Developers, a well use/destruction plan and schedule for all existing private/agricultural wells shall be submitted to the City of Ontario for approval prior to the issuance of permits for any construction activity. If a private well is actively used for water supply, the Developer shall submit a plan to abandon such well and connect users to the City's water system (residential to the domestic water system and agricultural to the recycled water system) when available. Wells shall be destroyed/abandoned per the California Water Resource Guidelines and require permitting from County Health Department. The location of existing wells are shown in Exhibit 24, "Existing Wells". A copy of such permit **and Form DWR 188 Well Completion Form** shall be provided to the Engineering and Public Works Agency prior to issuance of grading and/or building permits. If the Developer proposes temporary use of an existing agricultural well for purposes other than agriculture, such as grading, dust control, etc., the developer shall make a formal request to the City of Ontario for such use prior to issuance of permits for any construction activity. Upon approval, the Developer shall enter into an agreement with the City of Ontario and pay any applicable fees as set forth by the agreement.

2.5.2 Recycled Water

There is an existing Chino Basin Municipal Water District 30-inch main within **La Avenida Drive**. The main is located within the existing and proposed alignment of Carpenter Street extending northerly and southerly of this Specific Plan area. This main will serve The Avenue project along with proposed NMC Master Plan facilities connecting to this 30-inch line as the source of recycled water. Existing recycled water facilities are shown on Exhibit 21, "Recycled Water Master Plan".

2.5.3 Sewer

Existing recently constructed IEUA 33-inch and 36-inch Eastern Trunk Sewer mains are located within Archibald ~~Street~~**Avenue**. The Archibald trunk reach eventually joins the existing Kimball 54-inch Interceptor Trunk Sewer to the south of **La Avenida Drive**. The existing Archibald IEUA sewer will serve the easterly side of The Avenue Specific Plan via proposed NMC Master Plan facilities which will connect to it. **La Avenida Drive** west of the Cucamonga Flood Channel currently has no gravity sewer service. All other existing septic systems will be destroyed per DHS standards with the development of the Specific Plan. Existing sewer facilities are shown on Exhibit 23, "Sewer Master Plan".

2.5.4 Storm Drainage

The Avenue is presently in agricultural use; therefore, only a limited portion of the site is covered with impervious surfaces. Normal rainfall to the area is able to percolate through on-site soils and does not result in high volumes of surface runoff, as typically associated with urban areas. During periods of heavy rainfall when ground surfaces are saturated, surface runoff is collected in the existing drainage ditches and retention basins located within the site. Off-site flows are then directed into the existing storm drain system surrounding The Avenue which is generally unimproved and consists primarily of open earthen swales along area roadways or curbed roadway surfaces.

Cucamonga Creek Channel

An existing drainage channel bisects the site but does not collect off-site flows from **La Avenida Drive**. The channel is a major flood control facility that conveys water from much of the urbanized area located to the north of **La Avenida Drive** through the site and then to the Prado Basin in the south. Existing storm drain facilities are shown on Exhibit 22 “Storm Drain Master Plan”.

Master planned storm drain facilities have been installed along with development/implementation of the Specific Plan since it was originally approved.

2.5.5 Solid Waste

Solid Waste service is provided by the City of Ontario.

2.5.6 Gas

No gas is currently available within The Avenue. Individual propane units are currently being used.

2.5.7 Electric

Electricity is available from Southern California Edison.

2.5.8 Telephone

Telephone is currently available from Verizon.

2.5.9 Cable Television

Cable is available in the newly developed areas of The Avenue.

Schaefer Avenue looking west between Archibald and Haven

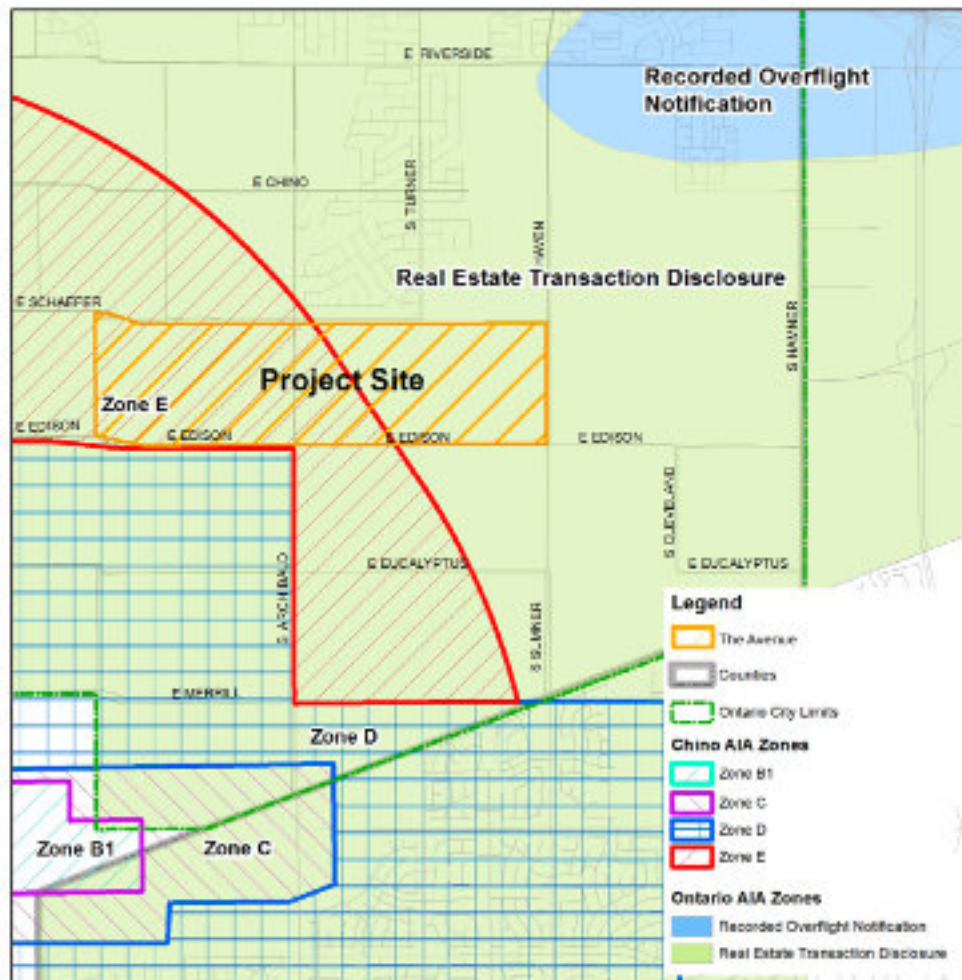

Ontario Ranch Road looking west

2.6 Airport Influence Areas

The Avenue Specific Plan is located within the Airport Influence Areas of Chino Airport and Ontario International Airport. All development proposals or Specific Plan Amendments must be consistent with the Airport Land Use Compatibility Plans for both airports.

Chino Airport Influence Zone E

Section 3 - Land Use Plan

3.1 Land Use Concept

The proposed 569-acre Avenue Specific Plan offers a traditional neighborhood lifestyle featuring a variety of residential housing types designed within easy walking distance to recreational amenities, retail and commercial uses, and school sites. Connectivity within The Avenue Specific Plan is provided through a system of pedestrian and bicycle trails linking residential neighborhood parks to the retail and commercial land use areas within the plan area.

The Avenue lies between two tree-lined avenues - **Ontario Ranch Road** to the south and Schaefer to the north. These arterials converge on one another at the eastern portion of the project. There are two additional dramatic tree-lined arterials, Archibald and Haven, that take advantage of the views of the San Bernardino Mountains to the north and the Santa Ana Mountains to the south. The vehicular circulation through the community provides a significantly different experience at each point of entry into the Colony. The Avenue's central element emphasizes pedestrian and recreational movement with wide sidewalks, tree-lined parkways and planted vehicular medians. The unifying elements include tree-lined streets and entry monuments coupled with drought tolerant flowering plant material.

Several key issues have been addressed in the design concept for The Avenue. They include the following:

- Development of an elegant, traditional style of landscape theming with generously landscaped common areas and strong, rich landscape materials that may include river rock, stone, brick, groves of trees, tree-lined streets, earth tone colors, and a diversity of other materials appropriate to the design theme
- Incorporation of a residential village and park program which is clear, identifiable and properly serves the needs of the community
- Pedestrian and non-motorized circulation throughout the community between recreational and educational elements
- Consideration of resources and long term maintenance efficiency in the selection of plant materials and placement helps create a strong "sense of community" through landscape design elements

Notable features of the proposed The Avenue Land Use Plan include the following:

- A variety of attached and detached housing opportunities
- Neighborhoods that serve retail and commercial locations
- Recreation Areas may feature shade trees, barbeques and turf play areas that may include pools, and tot lots

The Avenue
SPECIFIC PLAN

The New Model Colony

ONTARIO, CALIFORNIA

- Neighborhood pocket parks that will serve to integrate the neighborhoods
- Enhanced Roadways - **La Avenida Drive** and Turner Avenue - roadway, pedestrian and multi-use corridors linking each of the recreational sites and schools—providing connection between neighborhoods, featuring enhanced setbacks, multi-use paths, divided landscape medians, and front-on architecture
- Schools - **One** Elementary School (10 acres) with an attached five-acre park **and one additional school site (10 acres)** that will be pedestrian-accessible from all neighborhoods
- Trails - 5 to 10 minute walk or bike to community amenities

Residential development is designed to address a variety of lifestyles, such as singles, families, executives and “empty nesters”. Housing types will include a variety of single family detached and attached homes. Attached housing may include duplex, triplex, row townhomes, senior and court-style residential.

Retail and commercial land uses are provided for in The Avenue Specific Plan for the development of one commercial site totaling 10 acres. The commercial site is located on the southwest corner of Haven Avenue and **Ontario Ranch Road**.

3.1.1 Residential Planning Areas/Housing Types

The Specific Plan will provide for development of a variety of residential housing types oriented toward open space amenities and designed to promote walkability and interaction among residents. Residential development on approximately 506 acres of the plan area will contain up to 2,875 dwelling units, providing a mix of single family detached, single family attached and multifamily attached housing types. In determining the number of residential units for The Avenue Specific Plan area, SCE easements, schools and commercial areas have been removed from the gross in order to determine net acres as shown on Table 2, “Statistical Analysis”.

A. Transferring or removing units within the Specific Plan Area are subject to the following requirements:

1. **Water and Sewer Technical Studies shall be prepared to study how the transfers change the quantity and locations of sewer and water demands and how those changes impact the Water and Sewer Master Plan Systems and local sewer and water systems.”**
2. **If unit transfers result in net changes to the overall projected water demands or the water demands are transferred between the 1010PZ and 925PZ, then the initializing project shall be responsible for processing an Amendment to the Water Master Plan as part of the entitlement process of Implementation.”**
3. **If unit transfers result in net changes to the overall projected sewer demands or the sewer demands are transferred between different Master Plan Truck Sewer Tributary Areas, then the initializing project shall be responsible for processing an Amendment to the Sewer Master Plan as part of the entitlement process of Implementation.”**

3.1.2 Parks and Open Spaces

The Avenue Specific Plan provides approximately 21.6 acres of parkland in a diverse hierarchy of evenly distributed parks. The maximum parkland dedication requirement, based on 2,875 households at 3.997 persons per household, yields a parkland requirement of approximately 20 acres at 2 acres per 1,000 population. The city standard of 3.347 persons per household will be used in calculating park demand for Multi-family housing. Approximately twelve (12) Neighborhood Parks are evenly dispersed throughout the neighborhoods. A Recreation Area is also proposed as part of the project.

A five-acre Active Recreation Park is to be located adjacent to the ten (10) acre elementary school site to provide an extra play field during school hours and recreational opportunities to the residents after school hours

Approximately 14 acres of Southern California Edison (SCE) easement, located in the northwest portion of the plan area will be utilized for passive recreation and a trail, to the extent permitted by SCE. The multi-use path is designed to connect the regional trail in the SCE easement, Active Recreation Park, ~~Elementary and Middle Schools~~, The Avenue and Recreation Area. The conceptual locations of parks are shown in Exhibit 10, the "Parks and Open Space" plan.

SPECIFIC PLAN

The New Model Colony • Ontario, California

Planning Areas/Developer Controlled/Ownership

Exhibit 9 - Planning Areas/Developer Controlled/Ownership

Critical to the success of any community is the quality of the community spaces and proper integration into the community fabric. The Avenue’s land plan is developed around a theme of recreation and open space amenities to enhance the quality of life. All parks (including the pool and splash play area) will be designed to meet all ADA and City accessibility standards. The Active Recreation Park site and recreation amenities will become more valuable in combination with the school sites as the synergy of active recreational, social and educational opportunities will address the diverse and changing needs of the community. The park and recreation design program has several major elements including multi use park sites, a recreation trail system and an aquatic sports facility.

The Avenue enjoys a well balanced plan of park locations interconnected by a clear pedestrian system. A majority of the residents can access the community parks and school sites with minimal vehicular road interface by utilizing the Avenue’s pedestrian paths and parkways, the SCE easement, and flood control channel trails.

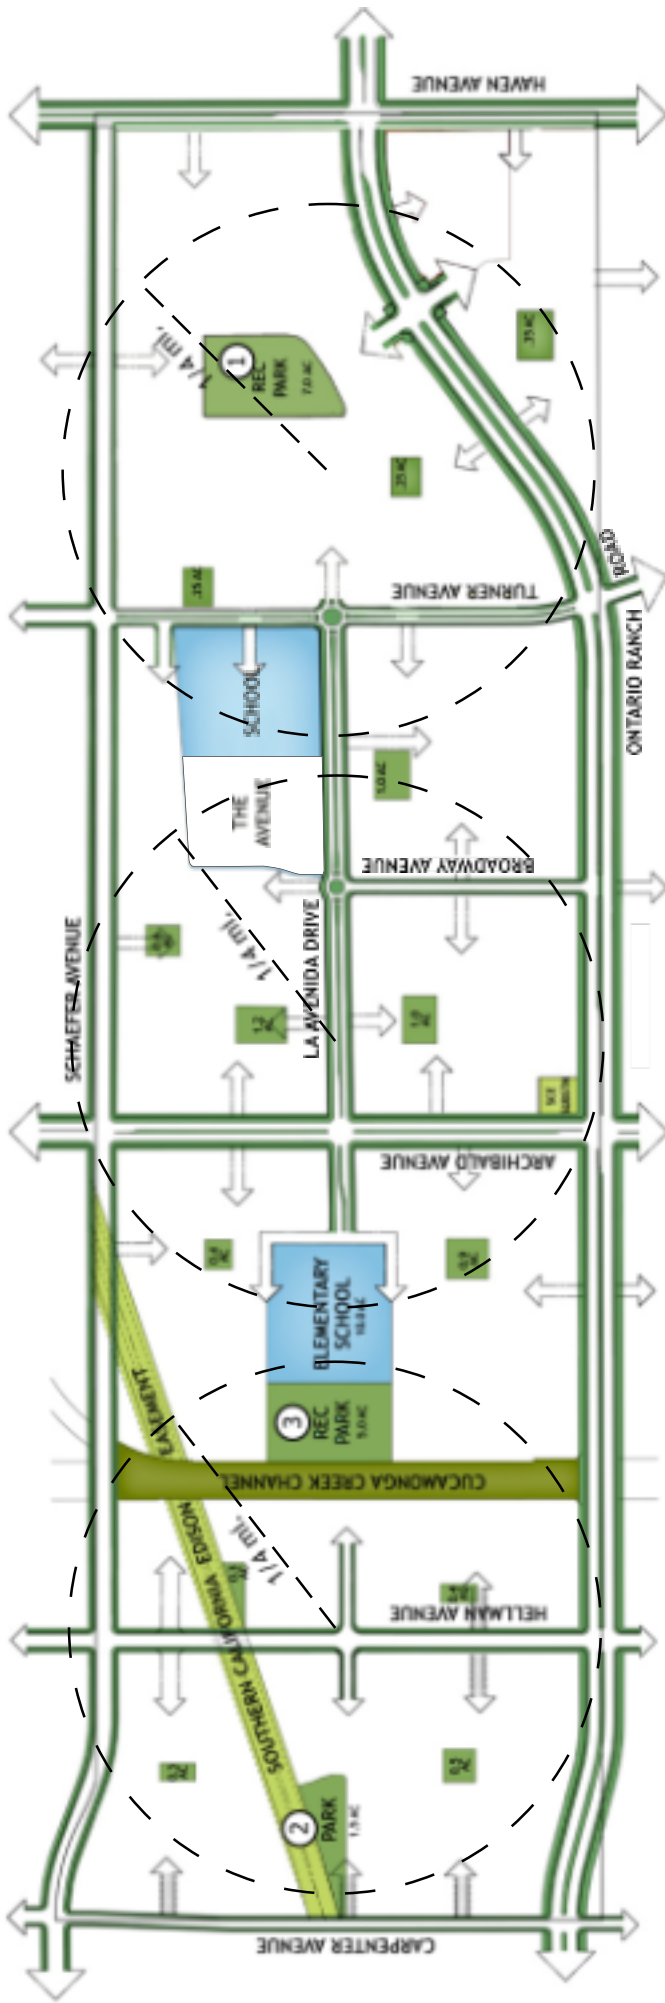

California Architecture

Neighborhood Park Sites

The park system includes approximately twelve (12) Neighborhood Parks that range in size. These are private parks and conceptual designs may include the following elements:

- Restrooms
- Picnic facilities
- Barbecues
- Basketball courts
- Sand volleyball courts
- Tot lot and pre-teen areas
- Gazebo and/or trellis structures
- Shade tree plantings with open turf areas for informal sport activities
- Drinking fountains
-

 - ② WESTERLY PARK: 1.5 AC
 - ③ ACTIVE RECREATION PARK: 5.0 AC
- NEIGHBORHOOD PARKS: 8.1 AC
TOTAL PARKS: 21.6 AC

NOTE: The size and location of the parks are conceptual and will be determined as part of the tract map approval process.

Exhibit 11 - Typical Neighborhood Park 1

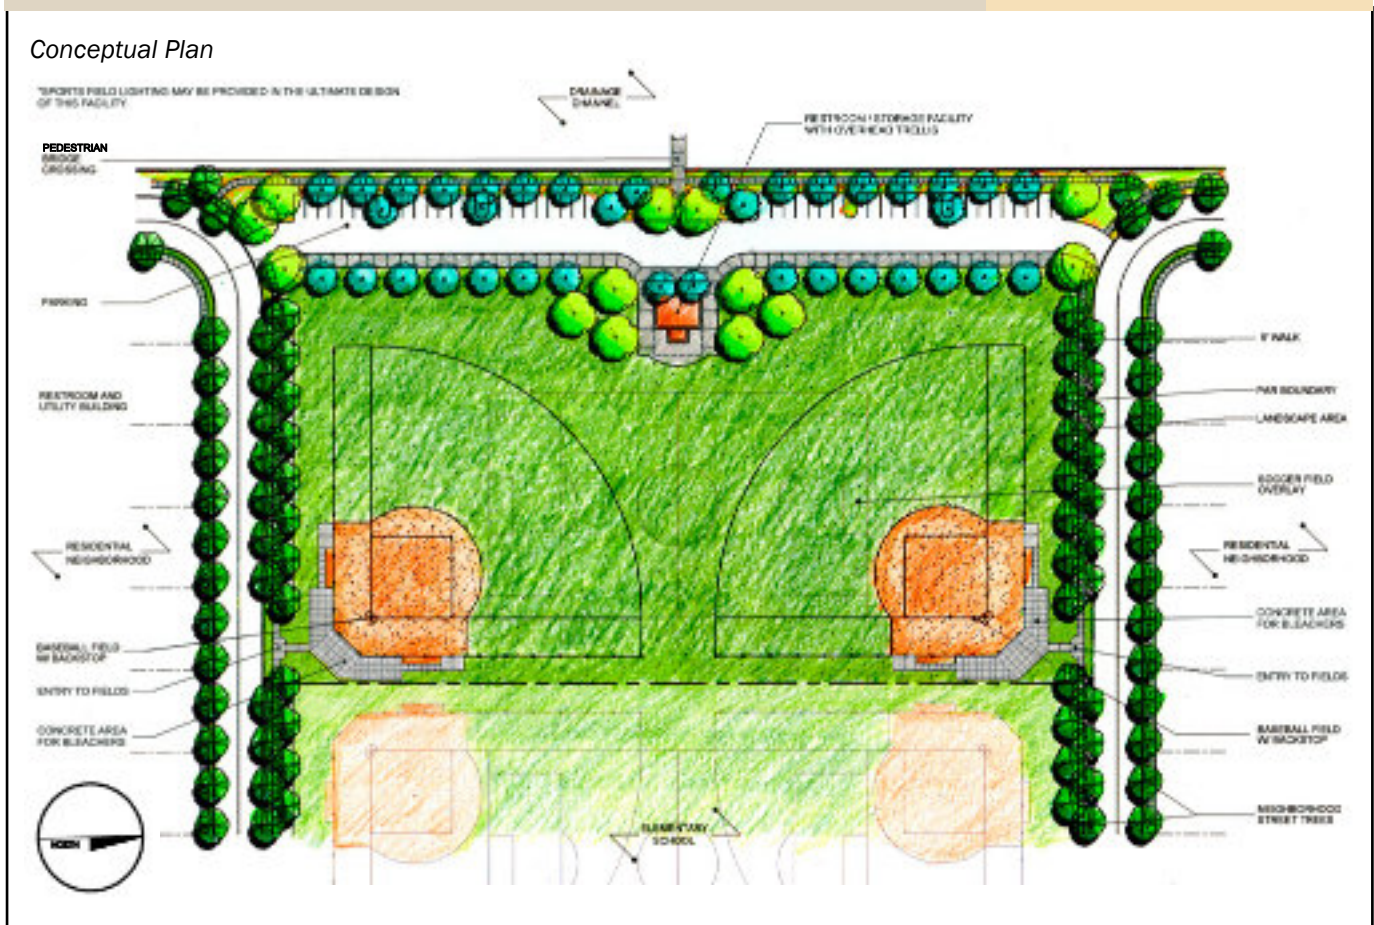

Exhibit 12 - Typical Neighborhood Park 2

Active Recreation Park Site

The design maximizes the efficiency of organized sport league management by focusing, if feasible, on a particular field sport entity. As a public park, the school district will be encouraged to design site plans that complement park development to better meet community needs. The specific specialty sport uses provided in the park include a soccer/football field and baseball/softball fields that will be lit for security and evening use. Basketball and volleyball uses can be best accommodated on the ~~elementary and/or middle~~ school sites due to the large number of courts available.

Exhibit 13 - Typical Active Recreation Park

Recreation Areas

Opportunities for recreation centers will be provided within the Avenue. These recreation centers will be developed and maintained by the Homeowners Association, boundaries and location of which have yet to be determined.

The recreation centers may include, but not limited to, the following amenities:

- Clubhouse with Picnic facilities
- Gazebo and/or trellis structures
- Basketball courts
- Tot lot and pre-teen areas
- Shade tree plantings with open turf area for additional recreational activities
- Barbecues
- Swimming pool and splash park
- Sand volleyball courts
- Open play area
- Drinking fountains
-

Exhibit 14 - Typical Recreation Area

3.1.3 Schools

The Avenue Specific Plan provides two (2) school sites within the plan area to serve students both within the plan area and surrounding areas. A ten (10) acre elementary school site is centrally located west of Archibald Avenue in the western portion of the plan area and adjacent to a neighborhood park. An additional ten (10) acre school site is located on the west side of Turner Avenue, south of Schaefer Avenue in the central portion of the plan area. Both school sites are easily accessible by multi-purpose path, sidewalks and interior roadways. The site plan will be determined by Mountain View School District. The school locations are shown in Exhibit 10, "Parks and Open Space" and in Exhibit 8, "Land Use Plan".

A multi-use bridge for crossing Cucamonga Creek is conceptually located near the school to facilitate non-vehicular access from the neighborhoods west of Cucamonga Creek to the school. Lots will be pulled back away from the trail landing on the west side of the bridge to allow for good visibility and, therefore, safety and security of trail users. The graphic on this page is a conceptual layout to show a potential method of access. Final design will be subject to City review.

Conceptual layout for the bike and pedestrian access to the multi-use path over Cucamonga Creek

3.1.4 Commercial/Retail

The Avenue Specific Plan will provide for the development of a 10 acre commercial site totaling 130,682 s.f. The site is located on the southwest corner of **Ontario Ranch Road** and Haven Avenue. The commercial site has been located to provide vehicular access off of the major arterial streets, minimizing traffic through the residential neighborhoods. The commercial site will include a mix of retail and high density residential in order to locate a high number of residents within a short walk of retail services.

The Avenue Main Street District Concept

The commercial center at The Avenue is located at the southwest corner of **Ontario Ranch Road** and Haven. It is envisioned as an inviting suburban destination, not your typical neighborhood center or strip mall. The idea behind this commercial center is to provide a memorable and walkable center with strong architectural elements, public spaces and a complementary and diverse mix of residential uses surrounding the site.

The Experience – Main Street

The Main Street is envisioned to have a traditional feel with storefronts adjacent to wide sidewalks, plenty of on-street parking and inviting outdoor plazas. The shops along Main Street will provide an eclectic mix of smaller retail stores, coffee houses and restaurants. There are also pad buildings proposed near the major arterials to provide opportunities for other uses including but not limited to larger restaurants, drug store, in-line shops or a bank.

The Residential Program

The residential areas adjacent to the commercial center will play a crucial role in the vitality of the center. An intensification of the residential density surrounding the commercial area will provide a strong local consumer base to support the commercial uses. The **Ontario Ranch Road** corridor east of Turner is envisioned by the city as a mixed-use, higher intensity corridor that will provide employment and shopping among typically higher residential densities than found elsewhere at The Avenue. The Main Street District is a complementary use to the higher density residential and the District's pedestrian environment encourages residents to walk, therefore reducing vehicle trips.

Potential Residential Uses:

- Townhomes & Flats
- Apartments
- Senior Housing

Section 4 - Infrastructure and Services

4.1 Master Plan of Circulation

The proposed circulation plan for The Avenue Specific Plan provides for safe and efficient movement of vehicular traffic through the project, while also providing a safe environment for pedestrian movement and bicycle traffic, reducing the reliance on the automobile as a means of travel.

Access to The Avenue Specific Plan from surrounding areas is provided by Archibald Avenue bisecting the site in a north and south direction; also running in a north to south direction is Haven Avenue on the eastern boundary and Carpenter Avenue on the western boundary; running in an east to west direction is **Ontario Ranch Road** on the southern boundary and Schaefer Avenue on the northern boundary. Hellman Avenue bisects the site in a north to south direction between Archibald and Carpenter in the western portion of the plan area. Bus turnouts will be provided on **Ontario Ranch Road**, Schaefer Avenue, Haven Avenue, and Archibald Avenue to the satisfaction of the City Engineer and Omnitrans.

A primary interior circulation element for The Avenue Specific Plan is the central “**La Avenida Drive**” which features enhanced setbacks and travel lanes to allow for vehicle, bicycle, and pedestrian access linking residential areas with retail and commercial, recreational, and the school sites within the plan area. Improvements to non-NMC streets will be made by the developer/applicant based on the data from the Environmental Impact Report and traffic study. The traffic study will also determine the additional right of way that may be needed at critical intersections to accommodate additional right and left turn lanes. The “Circulation Plan”, Exhibit 15, establishes the hierarchy and general location of these roadways within the plan area.

Streetscapes within The Avenue are critical in maintaining the perception of community theming, unification and quality. These common landscape areas link vehicular and pedestrian traffic to neighborhoods and community elements.

The streetscapes in The Avenue are treated as critical community spaces providing quality pedestrian and vehicular circulation ways including jogging and bicycle paths and well-buffered pedestrian walks. For pedestrian and vehicle safety, reflective street signs will be provided on all proposed streets within the City. Shrubs and low groundcovers from the New Model Colony Streetscape Master Plan will be used to the greatest extent feasible to reduce maintenance, conserve resources and provide a buffered separation between pedestrian and vehicular traffic. The 8' expanded sidewalks, at an enlarged width, are designed to provide a better travel way along **La Avenida Drive**.

Streetscape landscape treatments were developed to form a hierarchy of community importance and use characteristics. Landscaped parkways are enlarged beyond the city street right-of-way to reinforce this hierarchy consistent with the pathway system, residential orientation, and traffic volumes. These “landscape edges” are indicated on the streetscape sections.

La Avenida Drive's design concept is focused on the use of earth tone materials and colors, meandering drifts and groves of plant material and trees and the limited but appropriate use of turf. Soldiered trees are at a uniform spacing reinforcing the linear design of the vehicular circulation system to provide a welcoming feel to those entering the community.

The unique and vital streetscape concept for **La Avenida Drive** is focused on the treatment of the divided collector streetscape cross section. The design of the streetscape provides a strong and significant landscape while providing pedestrian pathway choices for residents.

Although The Avenue is designed for maximum benefit of the community residents, the overall plan provides convenient access points to allow vehicles to maximize road travel on the perimeter urban arterials and neighborhood collectors instead of **La Avenida Drive**. This is intended to reduce interior traffic and maximize resident, pedestrian, and bicycle enjoyment of the streetscapes.

Ontario Ranch Road, Schaefer Avenue, Haven Avenue, and Archibald Avenue streetscapes are designed to provide additional landscape area beyond the street right-of-way. The Avenue is planned to focus internally. These perimeter streetscapes will allow reasonable buffering along with the appropriate landscape treatments to properly introduce the community while maintaining consistency along the overall arterial streetscape.

Carpenter Avenue and Hellman Avenues are north/south trending collectors while Turner Avenue is a north/ south trending divided collector all which contain relatively balanced landscape zones beyond their respective right-of-ways. These collectors provide access to community facilities, recreation areas, school sites, the retail center and the arterial avenues of Schaefer, **Ontario Ranch Road**, Haven, and Archibald.

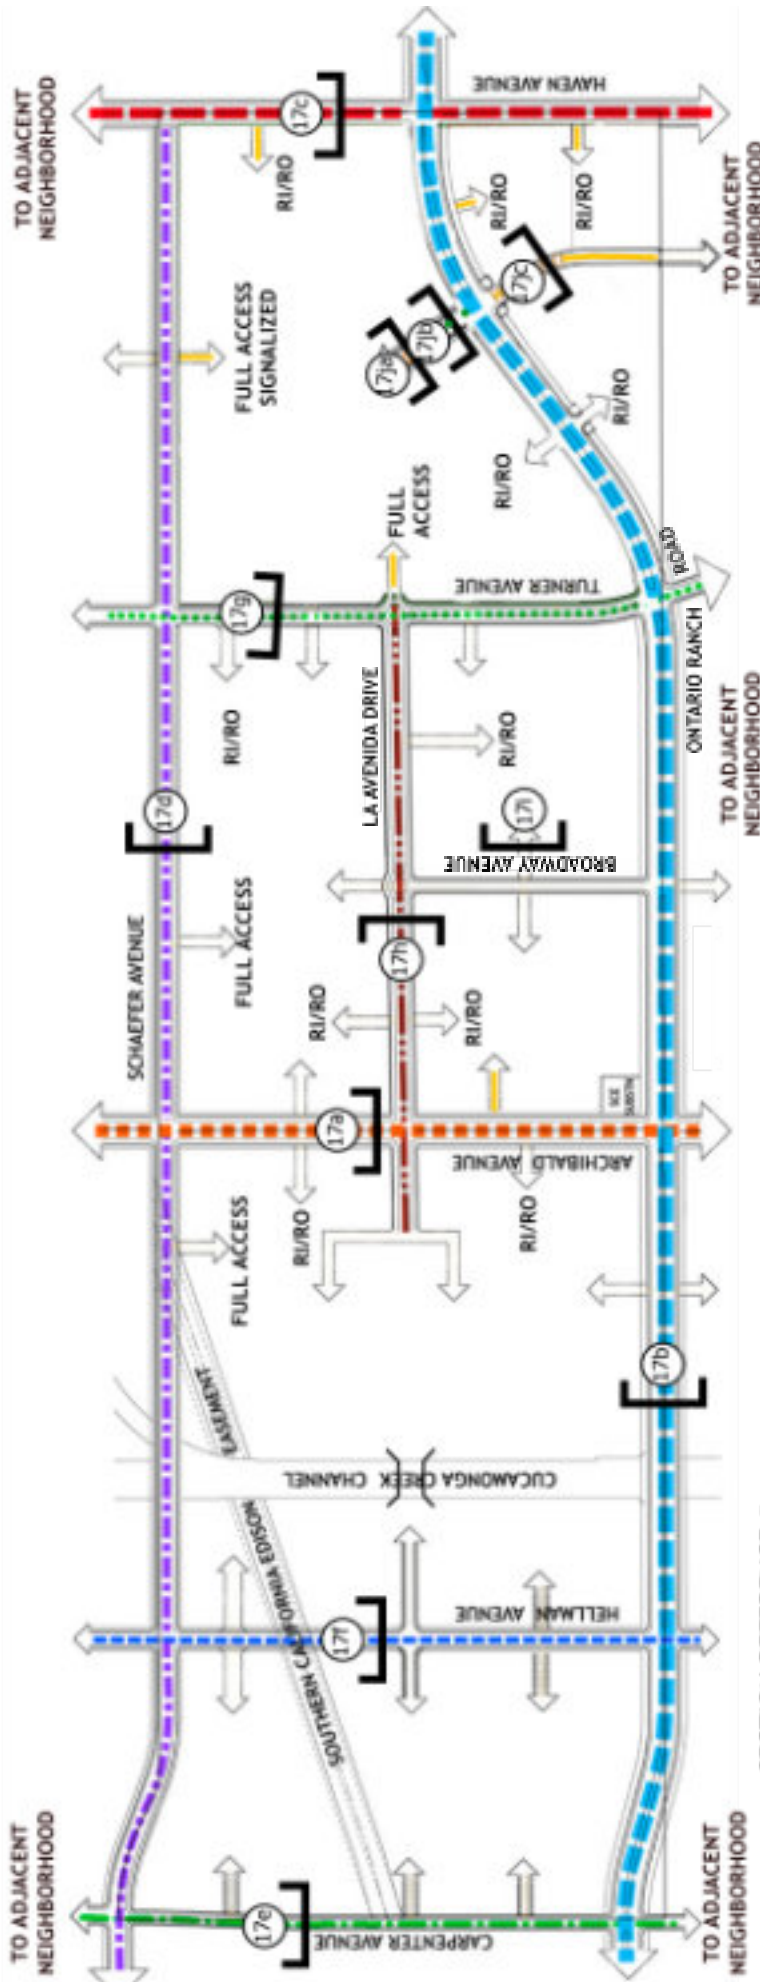

4.1.1 Street Plans and Sections

Primary access to The Avenue Specific Plan is provided by seven (7) major Avenues: **Ontario Ranch Road**, Haven, Schaefer, Turner, Hellman, Carpenter and Archibald Avenues. Within the plan area public streets of varying design will provide access to the residential, commercial, school, and park areas.

The Avenue

SPECIFIC PLAN

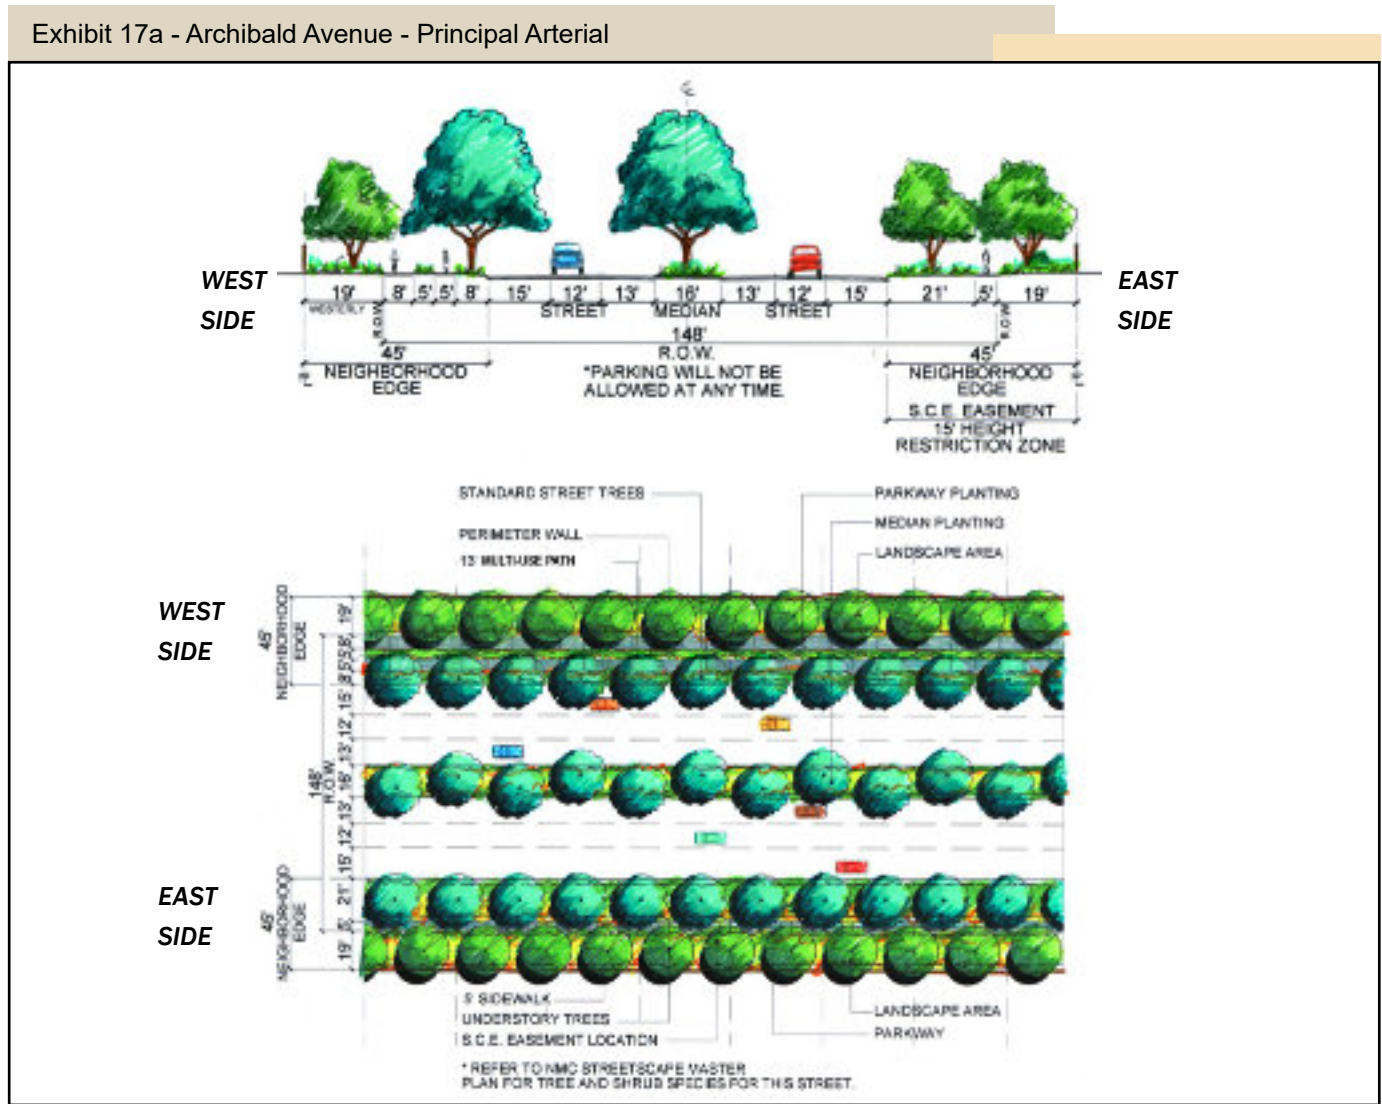

Entries and Signalization

The New Model Colony • Ontario, California

Exhibit 16 - Entries and Signalization

Archibald Avenue

Archibald Avenue bisects The Avenue Specific Plan in a north/south direction in the central portion of the plan area. Archibald Avenue is designated as a “Principal Arterial” with a total right of way of 148 feet with 80 feet of paved travel area separated by a 16-foot wide raised median. There are 19-foot wide landscape lots on both sides of the street serving as a buffer between homes and the right-of-way. The west side of the street has a 13-foot multi-use path (5’ sidewalk may be divided from the 8’ expanded sidewalk at the discretion of the City) separated from the street by a 13-foot landscaped parkway. The east side of the street has a 5-foot sidewalk separated from the street by a 21-foot landscaped parkway. Along Archibald Avenue, bus turnouts will be located to the satisfaction of the City Engineer and Omnitrans. The developer will be responsible for those improvements to Archibald Avenue as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project. The Archibald Avenue cross-section is illustrated below:

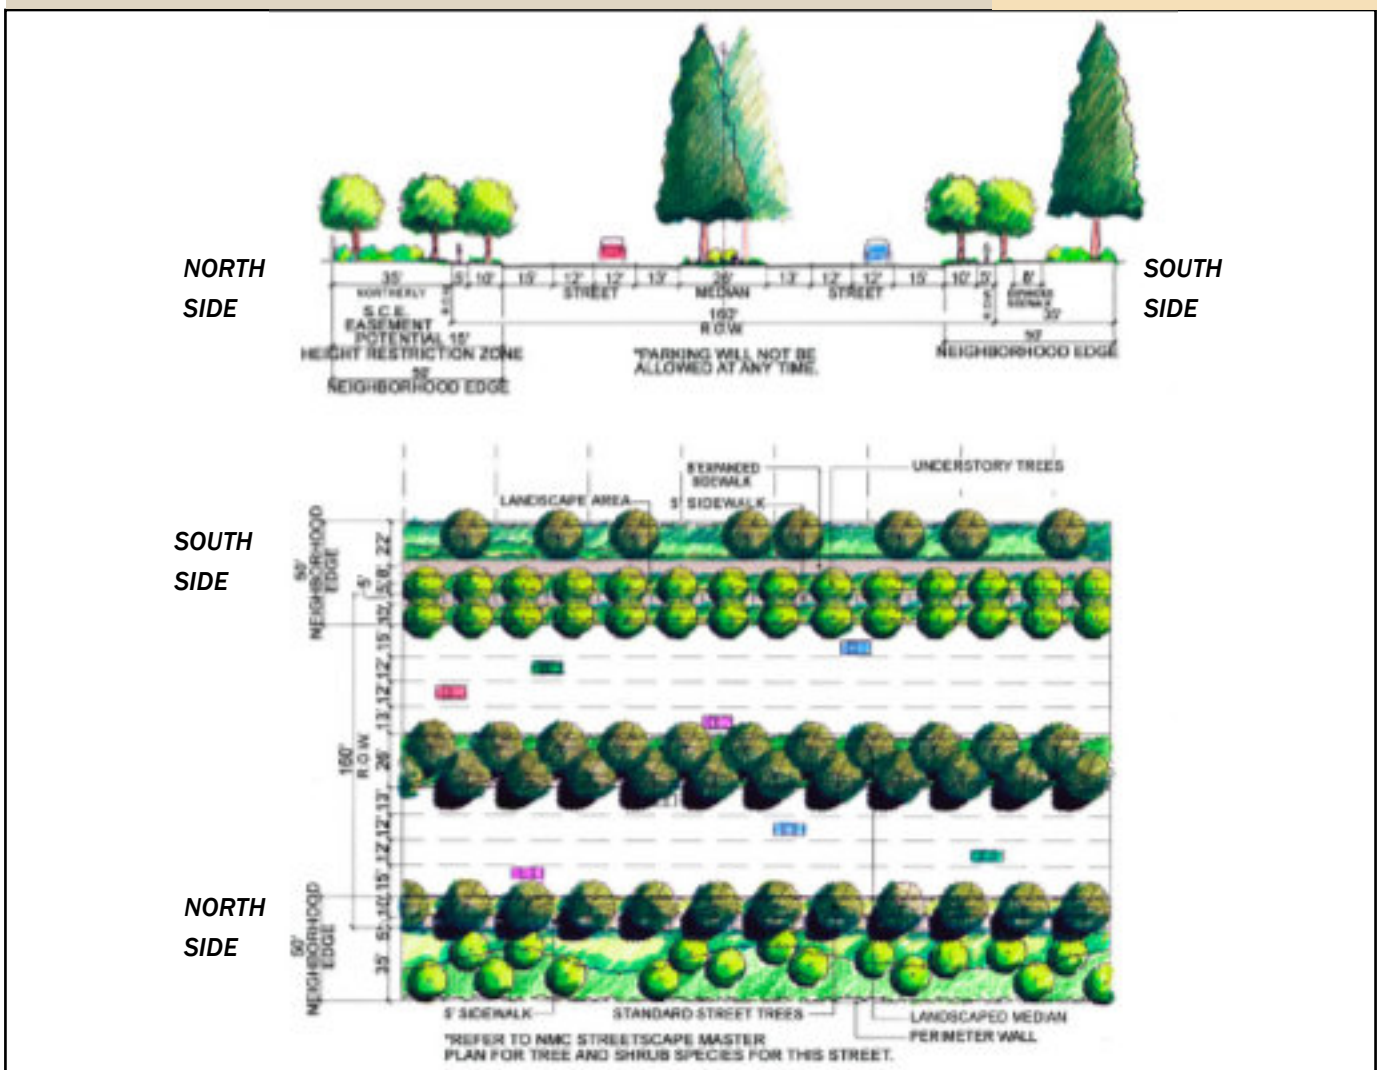

Ontario Ranch Road

Ontario Ranch Road is designated as “Principal Arterial” and borders the plan area on the south. Ontario Ranch Road has a total right-of-way of 160 feet with 104 feet of paved travel area separated by a 26-foot wide raised median.

Along Ontario Ranch Road, bus turnouts will be located to the satisfaction of the City Engineer and Omnitrans. A 50-foot landscape edge on both sides of the street contains a 35-foot landscape buffer with a 5-foot sidewalk separated from the street by a 10-foot landscaped parkway and a multi-use path on the south. The S.C.E. Easement exists within the northerly 50-foot Landscape Edge and may be relocated within the Landscape Edge in the future. The developer will be responsible for those improvements to Ontario Ranch Road as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project. The Ontario Ranch Road cross-section is illustrated below:

Exhibit 17b - Ontario Ranch Road - Principal Arterial

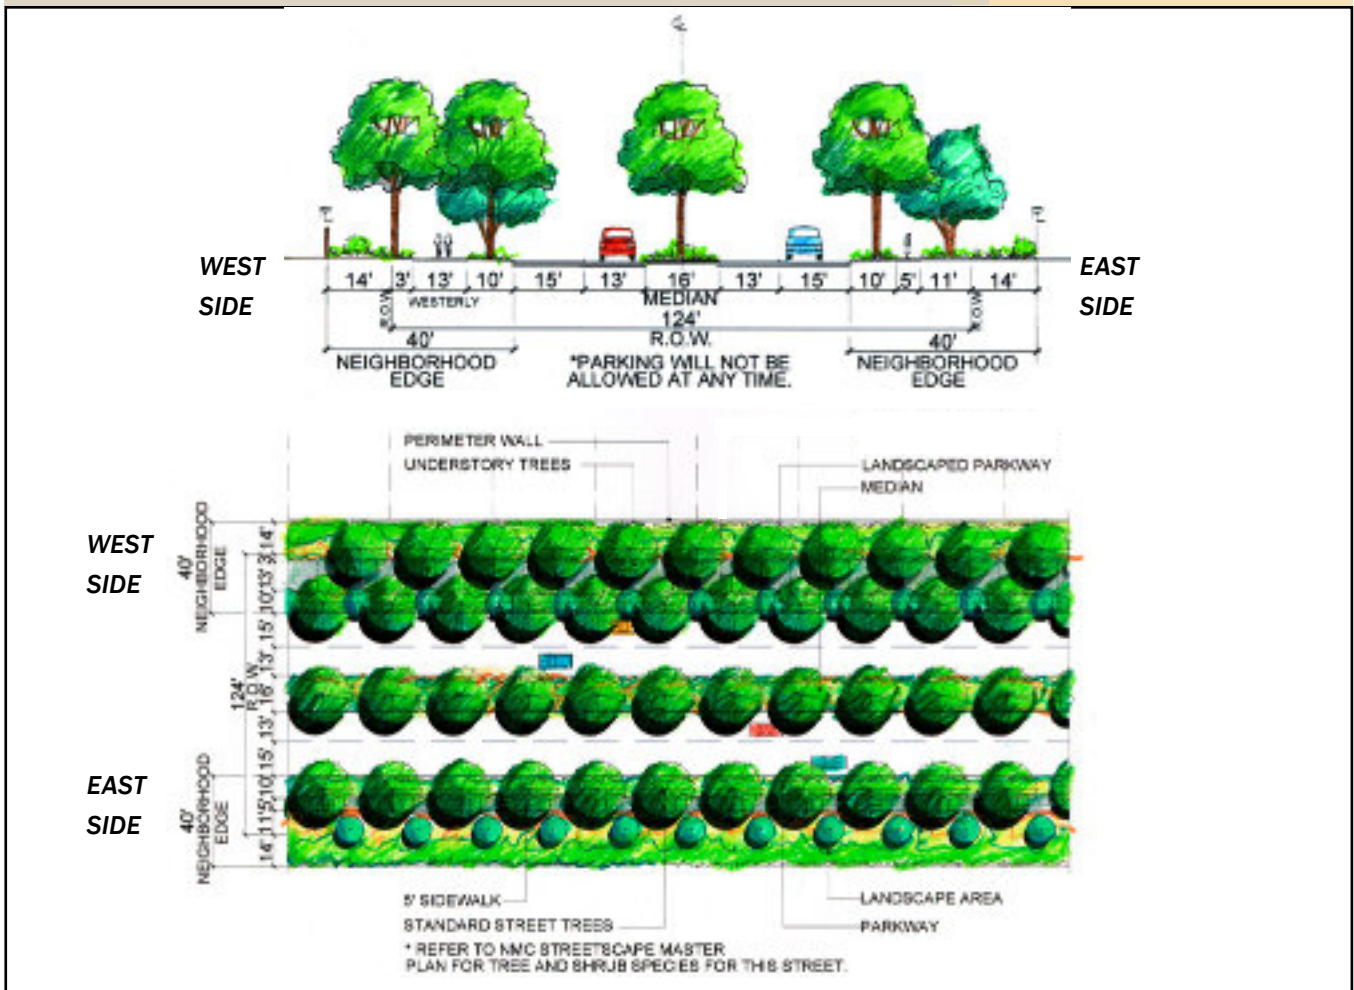

Haven Avenue

Haven Avenue is designated as “Principal Arterial” and borders the plan area on the east. Haven Avenue has a total right-of-way of 124 feet, with 56 feet of paved travel area separated by a 16-foot wide raised median.

The west side of the street has a 40-foot Neighborhood Edge with 14 feet of landscape buffer between the property line and the right-of-way. Along Haven Avenue, bus turnouts will be located to the satisfaction of the City Engineer and Omnitrans. A 13-foot multi-use path (5’ sidewalk may be divided from the 8’ expanded sidewalk at the discretion of the City) that is separated from the street by a 10-foot parkway and an additional 3 feet of landscape to the right-of-way edge. The east side of the street also has a 40-foot landscape edge with 14 feet of landscape buffer to the right-of-way. A 5-foot sidewalk is separated from the street by a 10-foot parkway and the right-of-way by an additional 11 feet of landscape. The developer will be responsible for those improvements to Haven Avenue as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project. The Haven Avenue cross-section is illustrated below:

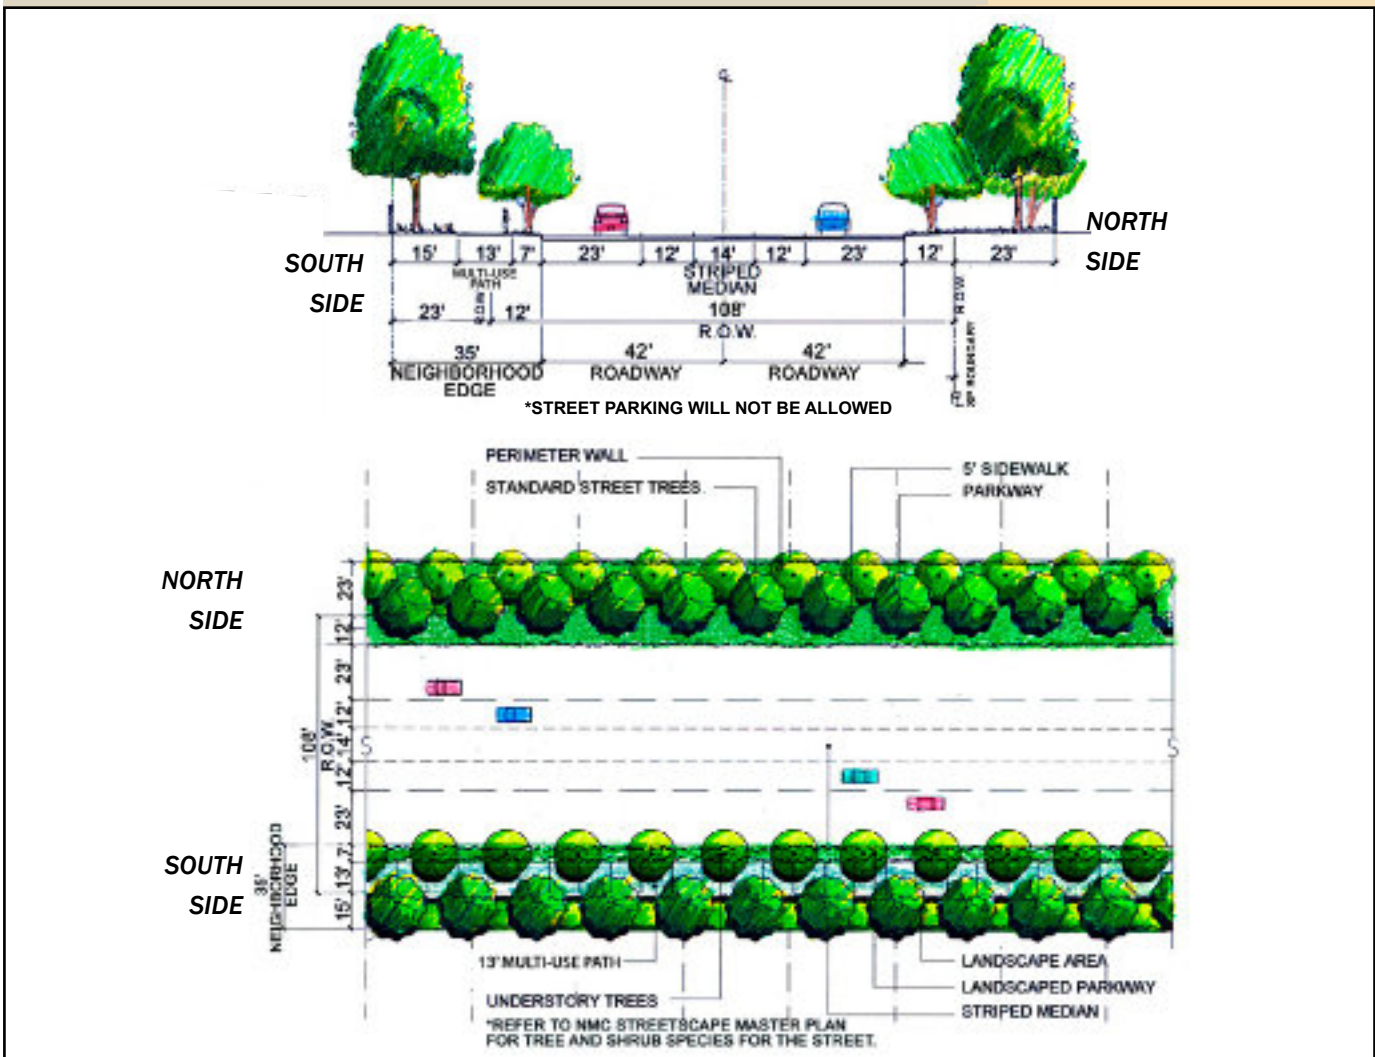

Exhibit 17c - Haven Avenue - Principal Arterial

Schaefer Avenue

Schaefer Avenue is designated as “Collector” and borders the plan area on the north. Schaefer Avenue has a total right-of-way of 108 feet with 84 feet of paved travel area. Along Schaefer Avenue, bus pads will be located to the satisfaction of the City Engineer and Omnitrans. The south side of Schaefer has a 35-foot neighborhood edge. The Neighborhood Edge is comprised of 12 feet of street right-of-way and an adjacent 23-foot wide landscape lot. The Neighborhood Edge includes a 13-foot multi-use path, including 5-foot sidewalk, separated from the street by a 7-foot parkway. The north side of Schaefer will have a 23 -foot wide landscape lot adjacent to a 12-foot parkway. The dedication and improvements of the 23 -foot wide landscape lot to the north of the Project boundary is not a part of The Avenue Specific Plan Requirements .The developer will be responsible for those improvements to Schaefer Avenue as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project. The Schaefer Avenue cross-section is illustrated below:

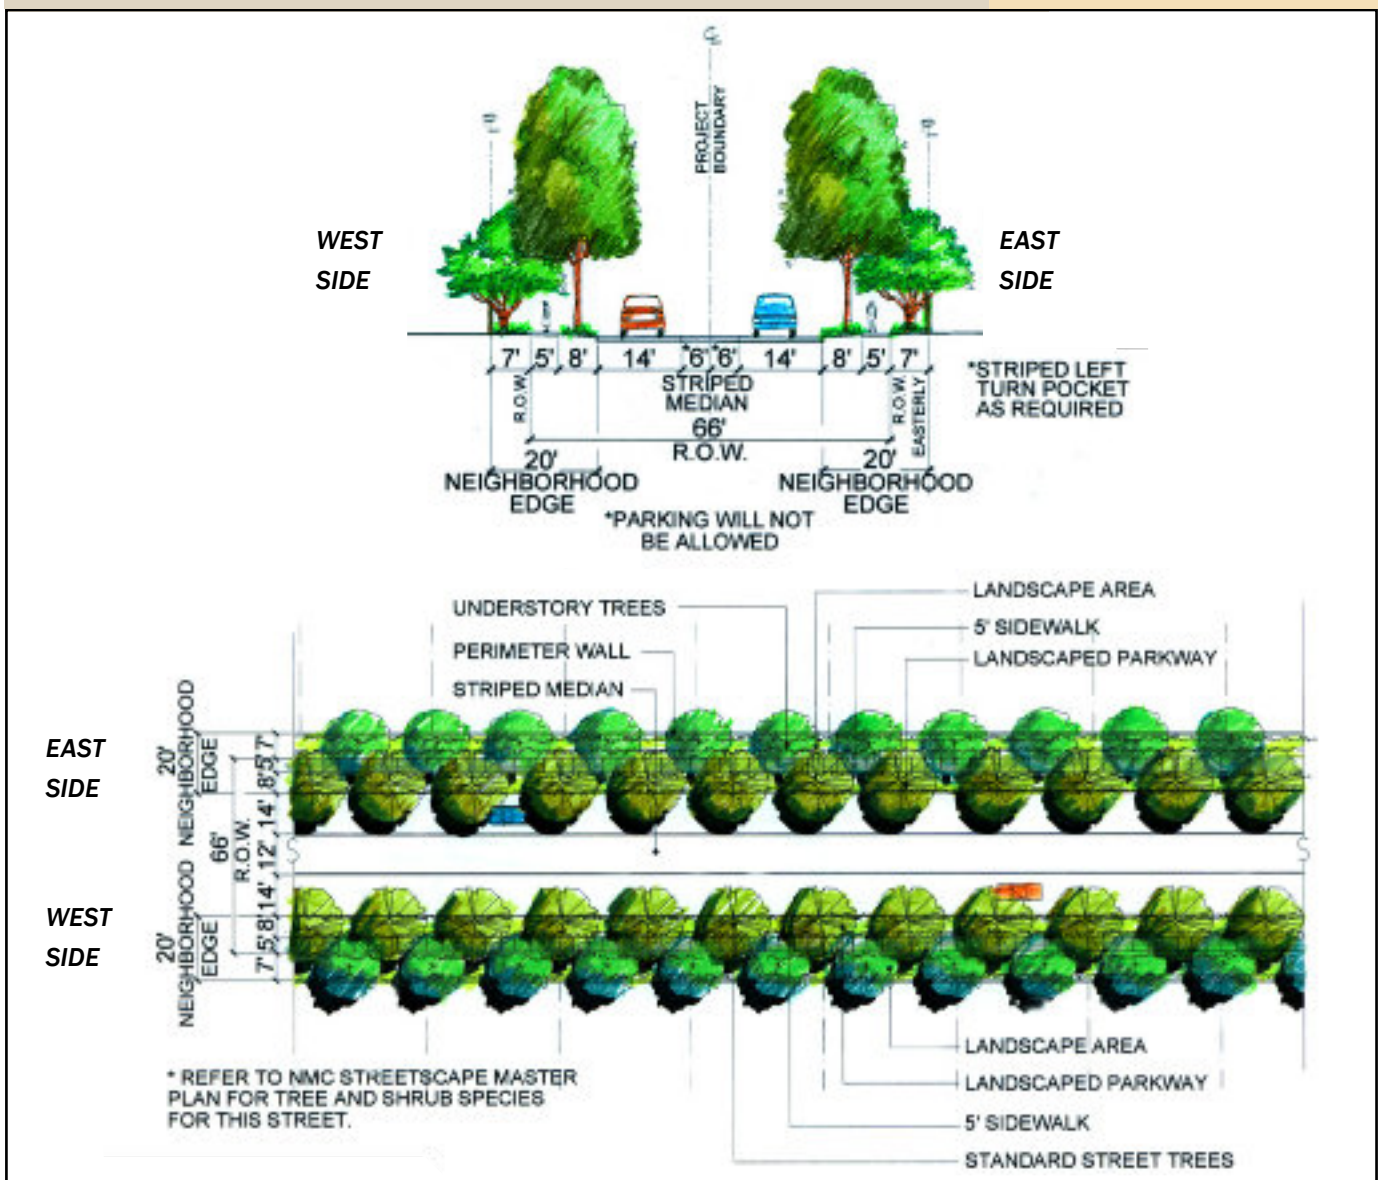

Exhibit 17d - Schaefer Avenue - Collector

Carpenter Avenue

Carpenter Avenue is designated as a “Primary Local Street” running in a north/south direction whose centerline forms the western project boundary. It has a total right-of-way of 66 feet with 40 feet of paved travel area. There is a 5-foot sidewalk separated from the street by a 8-foot landscaped parkway on each side of the street. In addition, there is an 7-foot wide landscape lot adjacent to both sides of the street. The developer will be responsible for those improvements to Carpenter Avenue as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project. The Carpenter Avenue cross-section is illustrated below:

Exhibit 17e - Carpenter Avenue - Primary Local Street

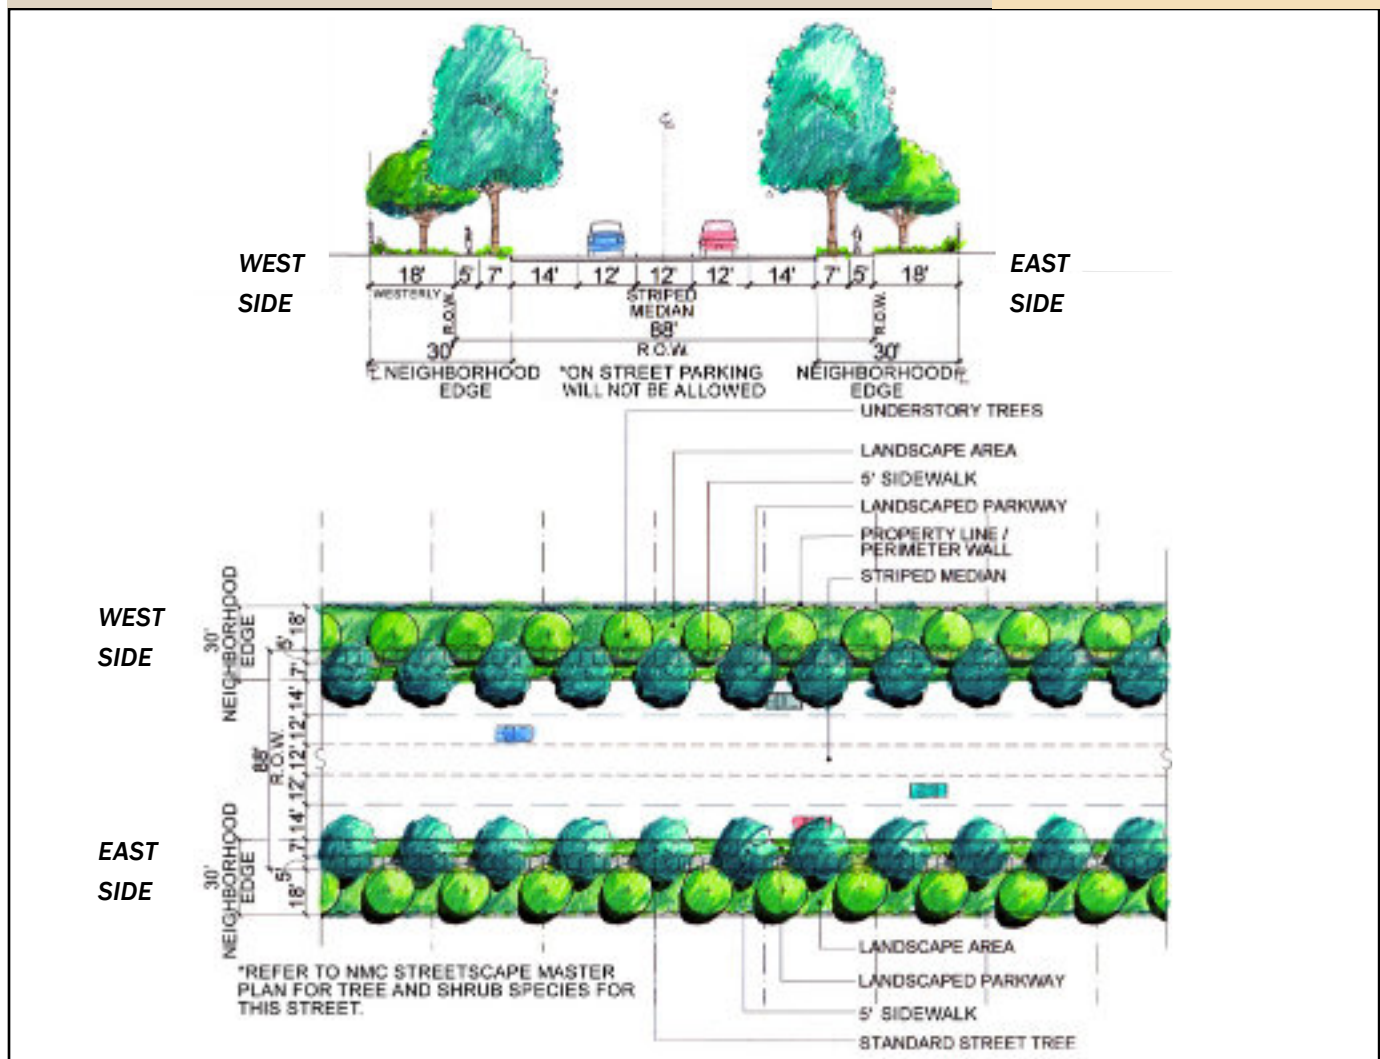

Hellman Avenue

Hellman Avenue is designated as “Collector” and bisects the plan area in a north/south direction in the western portion. Hellman Avenue has a total right-of-way of 88 feet with 64 feet of paved travel area. There is a 12-foot parkway on each side of the street which includes a 5-foot sidewalk separated from the street by a 7-foot landscaped parkway. In addition, there is an 18-foot wide “landscaped lot” adjacent to both sides of the street.

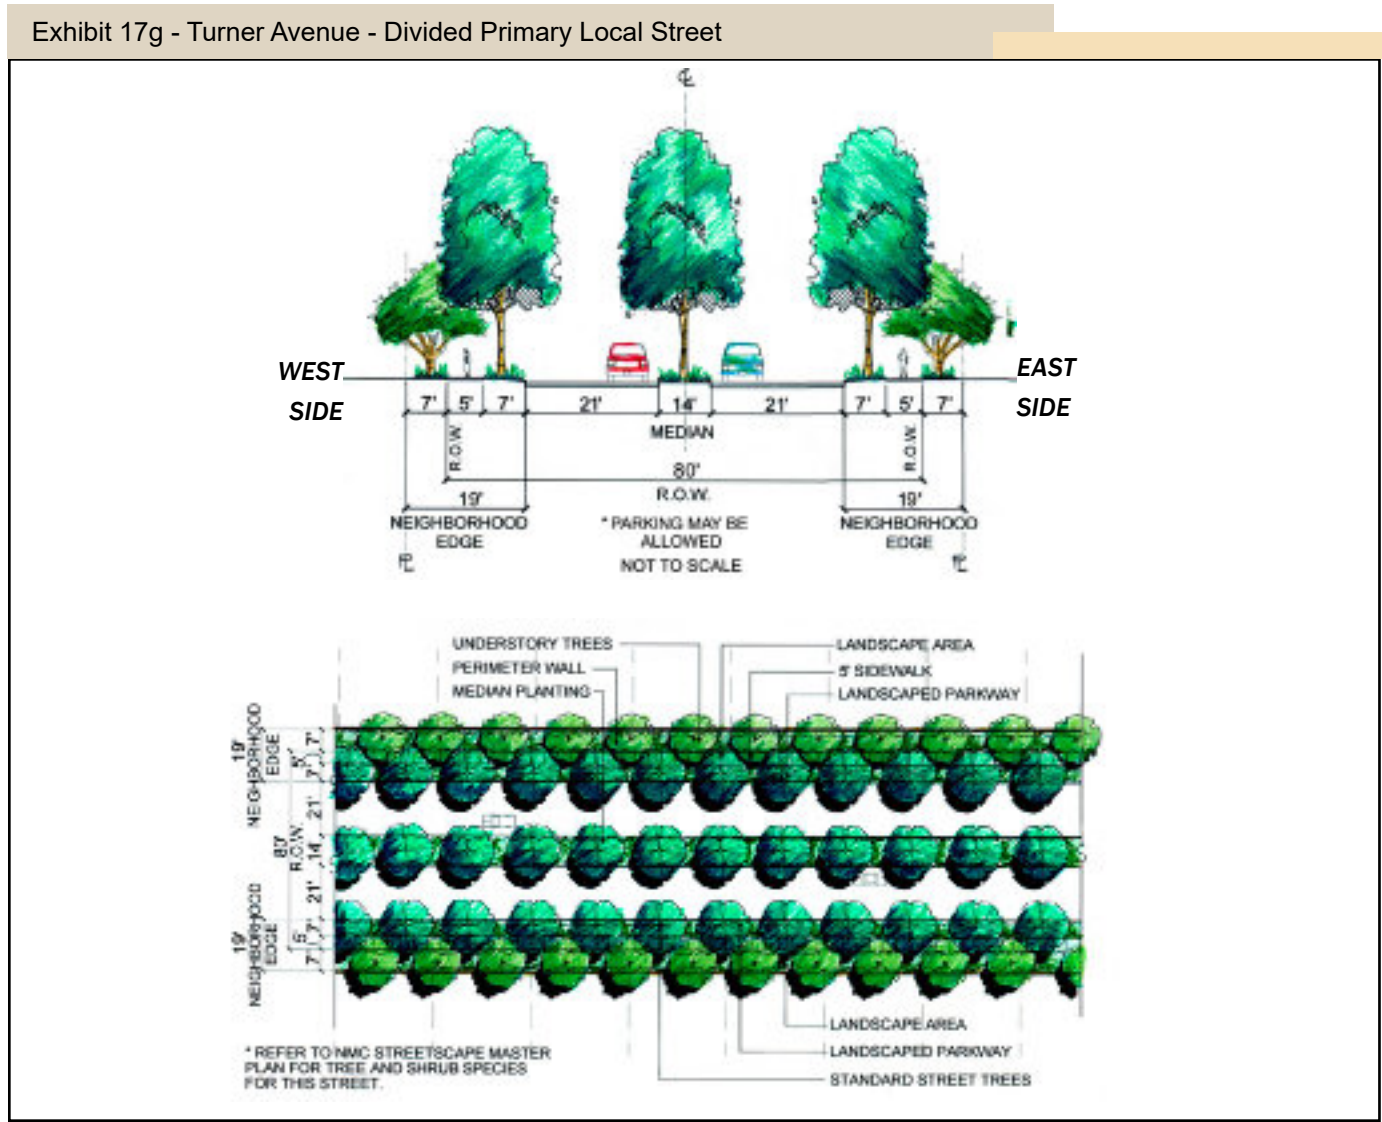

The developer will be responsible for those improvements to Hellman Avenue as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project. The developer will be responsible for those improvements to Hellman Avenue as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project. The Hellman Avenue cross-section is illustrated below:

Exhibit 17f - Hellman Avenue - Collector

Turner Avenue

Turner Avenue is designated as “Divided Primary Local Street” and bisects the plan area in a north/south direction in the eastern portion. Turner Avenue has a total right-of-way of 80 feet through the Specific Plan Area, with a 14-foot landscaped median separating two paved 21-foot travel lanes. The east and west sides of the street includes a 5-foot sidewalk separated from the street by a 7-foot landscaped parkway. The final roadway section will be determined by the City Engineer. The developer will be responsible for those improvements to Turner Avenue as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project. Turner Avenue shall be constructed such that the westerly curb and gutter shall be located completely off Assessor’s Parcel Number 218-201-19 with the parkway and neighborhood edge on the west side to be deferred until such time APN: 218-201-19 develops in accordance with The Avenue Specific Plan.

La Avenida Drive

La Avenida Drive, designated as a “Divided Primary Local Street”, is a centrally-located avenue connecting community amenities to the residential neighborhoods. **La Avenida Drive** has a total right-of-way of 124 feet with two 28-foot one-way avenues with on-street parking, separated by a 16-foot wide raised median. This pedestrian oriented street, with generously landscaped median and parkways, links the recreation areas, schools and parks. **La Avenida Drive** presents a strong image, emphasizing homes fronting along the street with an 8-foot expanded sidewalk on both sides of the street separated by 13-foot landscaped parkways and 5-foot landscape lots. The developer will be responsible for those improvements to **La Avenida Drive** as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project. No portion of **La Avenida Drive** right of way or neighborhood edge shall be located on the property identified as Assessor’s Parcel Number 218-201-19. ~~The official name for The Avenue is La Avenida Drive.~~

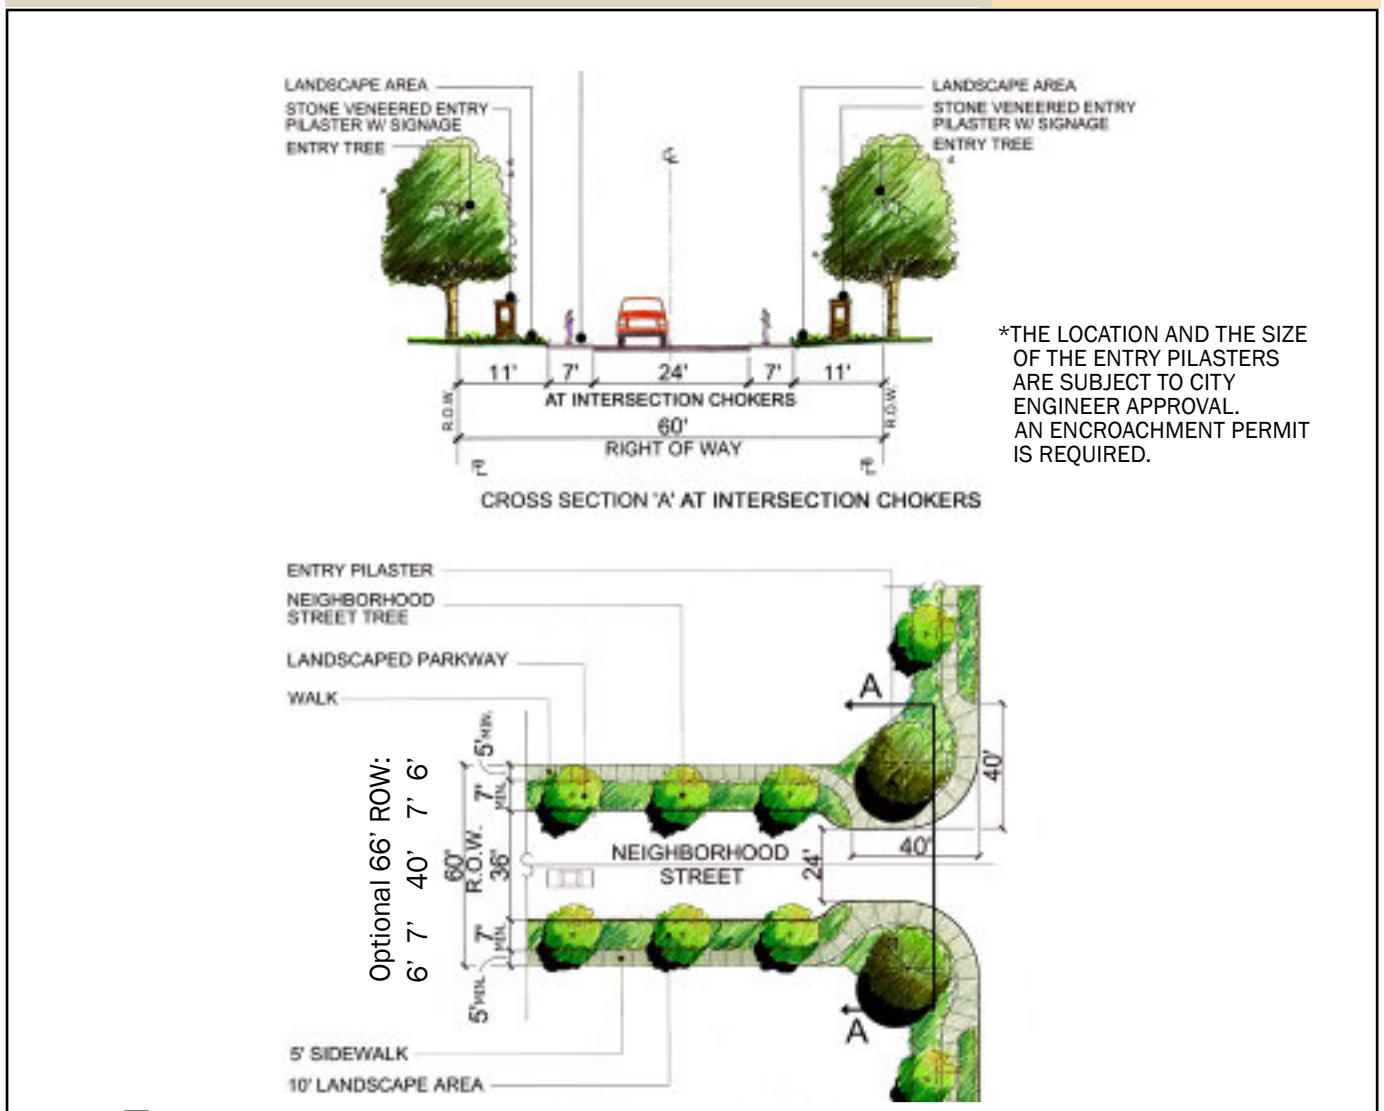

Exhibit 17h - La Avenida Drive - Divided Primary Local Street

Neighborhood Entry Street

Neighborhood Entry Streets are designed to distribute vehicular traffic from the arterial and collector streets into the residential neighborhoods. These streets have a 60 foot minimum total right-of-way with 36 feet of paved travel area. There is a 12-foot wide parkway within the right-of-way which provides for a minimum 5-foot wide sidewalk separated from the street by a minimum 7-foot wide landscaped area. The developer will be responsible for those improvements to Neighborhood Entry Streets as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project. The Neighborhood Entry Street cross-section is illustrated below:

Exhibit 17i - Neighborhood Entry Street

Neighborhood Entry Street With Median

The Neighborhood Entry Street With Median is designed to distribute vehicular traffic from **Ontario Ranch Road** into the residential neighborhood. Section 17ja has a 74 foot minimum total right-of-way with 40 feet of paved travel area split by a 10-foot landscaped median. There is a 12-foot wide parkway within the right-of-way which provides for a 5-foot wide sidewalk separated from the street by a 7-foot wide landscaped area. Section 17jb has an 84-foot right-of-way with two 20 foot travel lanes, split by a 10' landscaped median and 10 foot turn lane for southbound motorists wishing to turn left onto **Ontario Ranch Road**. Each side of Section 17jb contains a 5 foot sidewalk and 7 foot parkway. Section 17jc also has an 84 foot right-of-way containing two 20 foot travel lanes. There is a 10 foot turn lane for northbound motorist wishing to turn left onto **Ontario Ranch Road**. This 10 foot turn lane is flanked by a 4 foot landscape median and a 6 foot striped zone. Each side of Section 17jc also contains a 5 foot sidewalk and 7 foot parkway.

Exhibit 17ja - Neighborhood Entry Street with Median

The final roadway section widths will be determined by the City Engineer based on the need for intersection left and/or right turn lanes. The developer will be responsible for those improvements to Neighborhood Entries as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project. The Neighborhood Entry Street with Median cross-section is illustrated below:

Exhibit 17jb - Neighborhood Entry Street with Median - Southbound

Exhibit 17jc - Neighborhood Entry Street with Median - Northbound (South of Ontario Ranch Road)

Neighborhood Park Adjacent Street

The Park adjacent street is a 20-foot clear paveway and 3-foot concrete gutter for one-way circulation around the park. This narrow section does not allow on-street parking in order to allow a clearer view from the homes to the park, better visibility of pedestrians and a minimum 20-foot clear for emergency vehicles. On the park side of the street angled parking is provided outside of the 20-foot right of way between the corners of the park.

Within each row of parking spaces, landscape islands shall be placed to prevent more than 10 vehicles from being parked side-by-side in an abutting configuration. Planter islands for a single row of parking spaces shall be landscaped with at least one (1) tree and vegetative groundcover. The side of the street adjacent to homes will have a 7-foot landscaped area and 5-foot sidewalk as indicated below and the developer will be responsible for those improvements to Neighborhood Streets as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project. This street type applies to Planning Area 10A only. The Neighborhood Park Adjacent Street is illustrated below:

Exhibit 17k - Neighborhood Park Adjacent Street

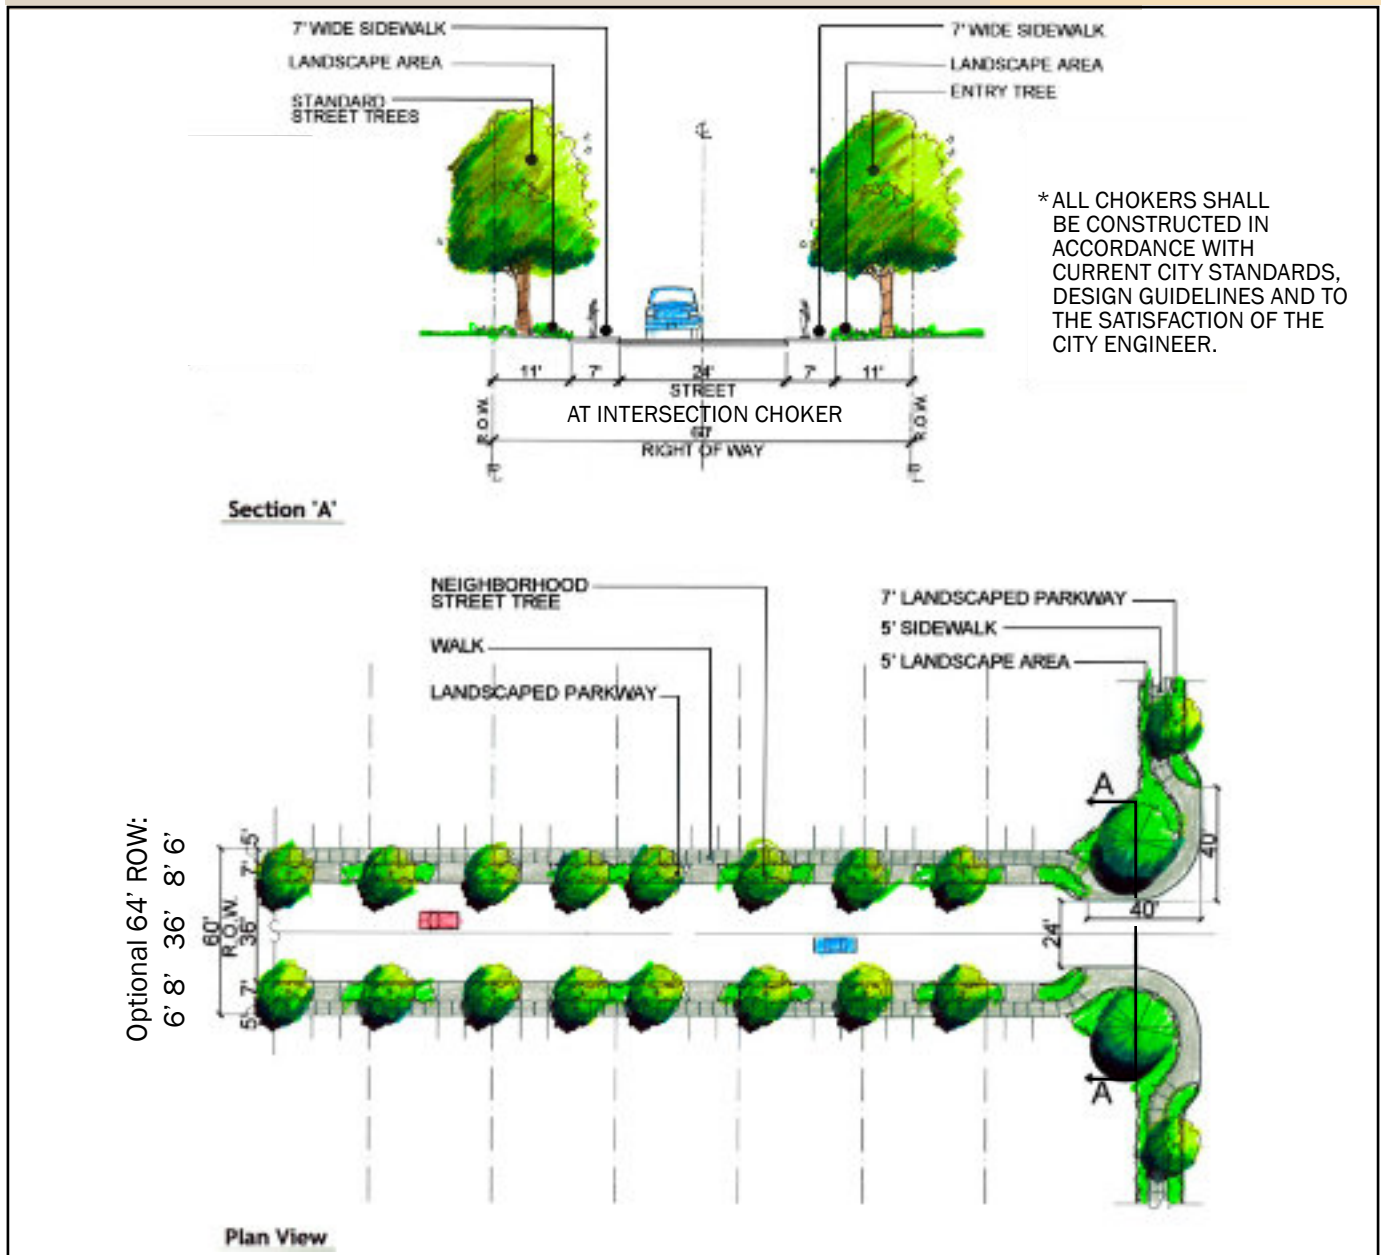

NOTE: This concept applies to PA 10A only.

Neighborhood Streets With Intersection Chokers

Neighborhood intersection chokers are traffic calming devices to slow down vehicles when they reach the neighborhood street level. They also facilitate pedestrian crossings by shortening the crossing distance and make them safer. The developer will be responsible for those improvements to Neighborhood intersection chokers as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project.

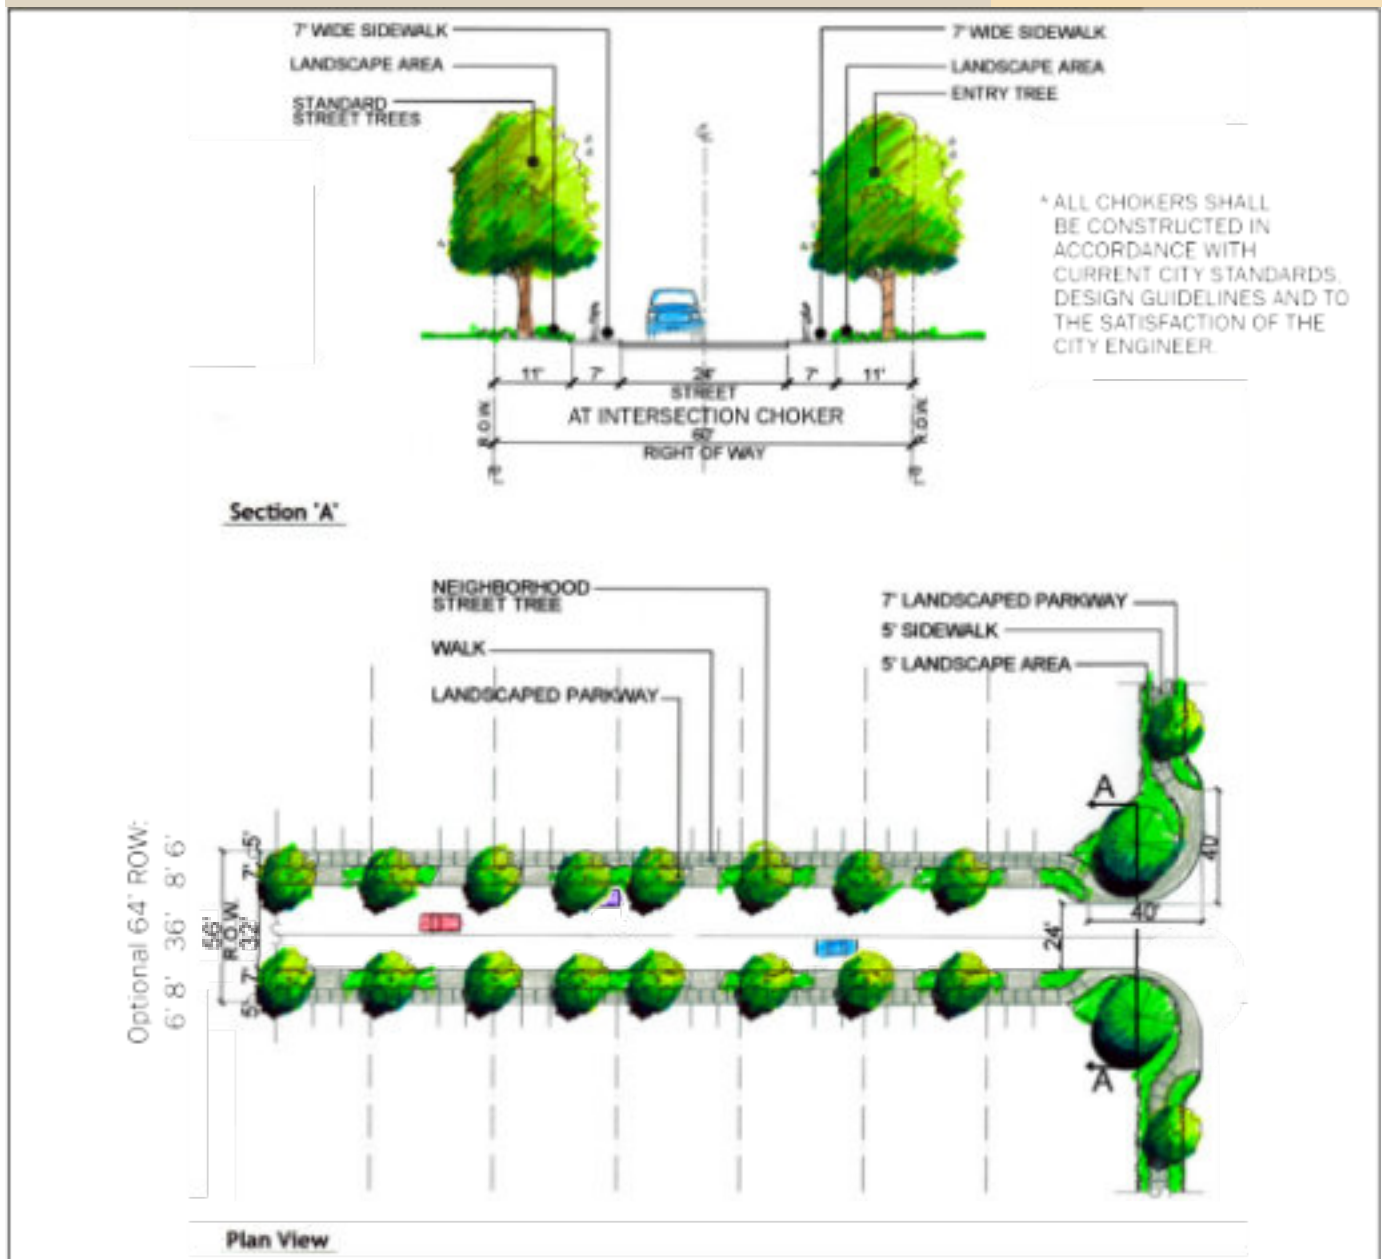

Exhibit 17I-1 - Neighborhood Streets With Intersection Chokers

Private Streets With Intersection Chokers

Private Street intersection chokers are traffic calming devices to slow down vehicles when they reach the neighborhood street level. They also facilitate pedestrian crossings by shortening the crossing distance and make them safer. The developer will be responsible for those improvements to private Street intersection chokers as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project.

Exhibit 17I-2 - Private Streets With Intersection Chokers

Alley

Alleys within the plan area will consist of 20 feet of paved travel area with 5 feet of landscape and apron on each side. The alleys will incorporate tapers at the entrance to alleys to slow traffic in these areas and to provide a visual element to discourage drivers from using alleys as a through street. Pavement may expand to 24 feet for Fire use with 3' landscape and apron on each side to maintain a 30' building separation. Final alley design shall be subject to review and approval by the Planning, Engineering, and Fire Departments. The developer will be responsible for those improvements to alleys as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project.

Exhibit 17m-1 - Alley (Cross-Section and Plan)

*PAVEMENT MAY EXPAND TO 24' FOR FIRE USES WITH 3' LANDSCAPE AND APRON EDGES ON BOTH SIDES TO MAINTAIN 30' BUILDING SEPARATION. FINAL PRIVATE DRIVE DESIGN SHALL BE SUBJECT TO REVIEW AND APPROVAL BY THE PLANNING, ENGINEERING AND FIRE DEPARTMENTS.

Private Alley

Private alleys within the plan area will consist of 20 feet of paved travel area with 5 feet minimum driveway aprons on each side. The private alleys will be paved per City Standards to encourage a street-like character. Pavement may expand to 24 feet for Fire use with 3' landscape and apron on each side. Final private alley design shall be subject to review and approval by the Planning, Engineering, and Fire Departments. The developer will be responsible for those improvements to Private Alleys as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project.

Exhibit 17m-2 - Private Drive (Cross-Section and Plan)

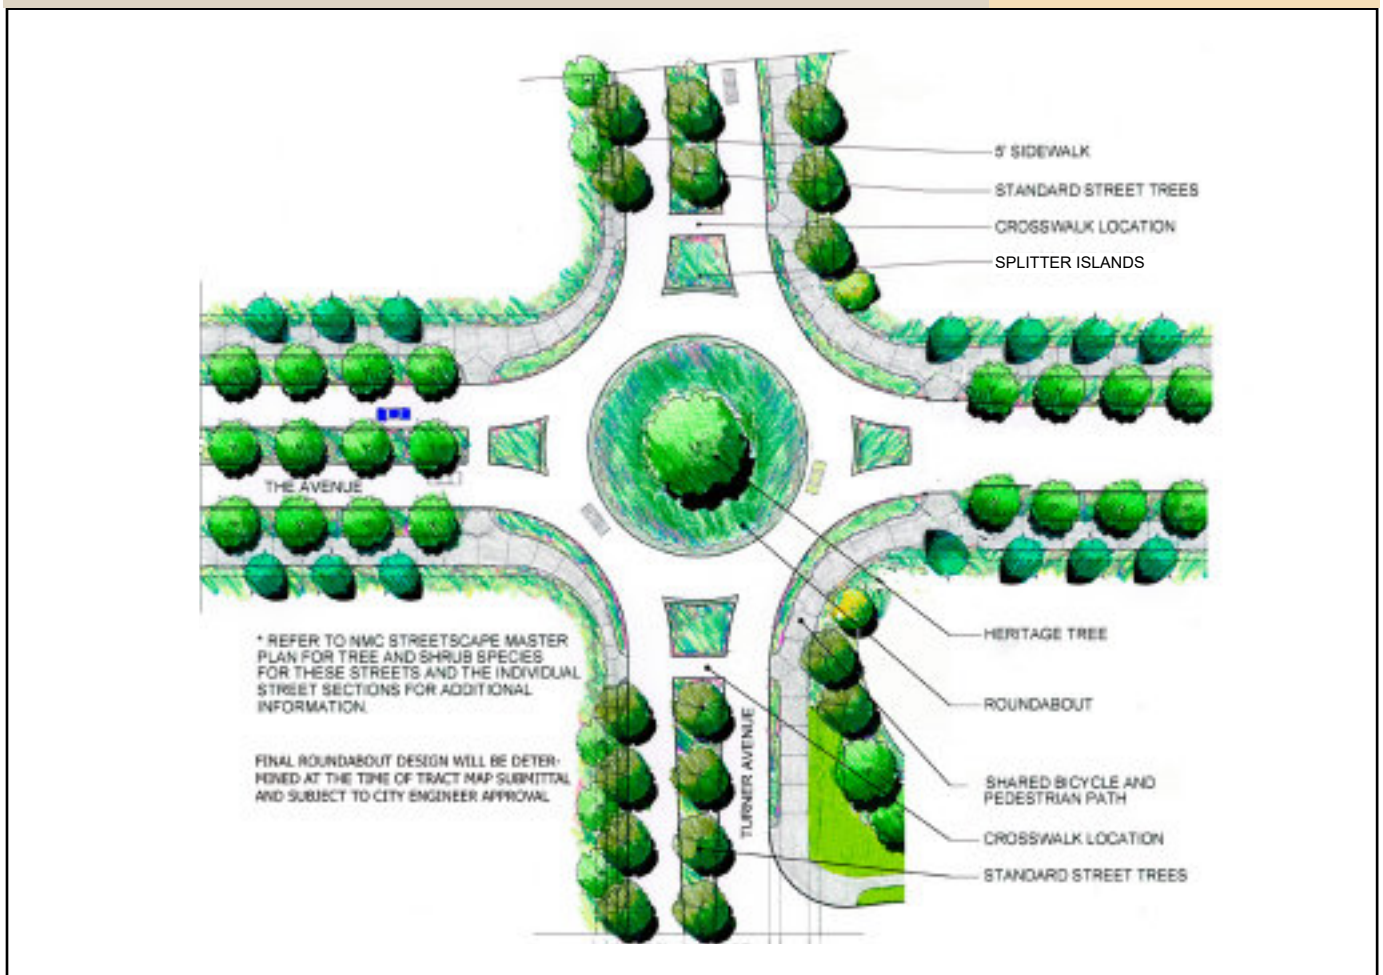

*PAVEMENT MAY EXPAND TO 24' FOR FIRE USES WITH 3' LANDSCAPE AND APRON EDGES ON BOTH SIDES TO MAINTAIN 30' BUILDING SEPARATION. FINAL PRIVATE DRIVE DESIGN SHALL BE SUBJECT TO REVIEW AND APPROVAL BY THE PLANNING, ENGINEERING AND FIRE DEPARTMENTS.

Typical Roundabout

Roundabouts have been strategically located throughout the plan to calm traffic through the center of the project, facilitate traffic movement and reduce air pollution by avoiding mandatory stops from all directions at the conceptual locations shown in Exhibit 17n, "Typical Roundabout". These roundabouts will follow the City adopted guidelines/standards and their final design will require City planning and engineering department approval as part of the tentative tract map review process. Utilities shall not be located under roundabouts. The developer will be responsible for those improvements to Roundabouts as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project.

Exhibit 17n - Typical Roundabout (La Avenida Drive and Turner Avenue)

* ROUNDABOUTS ARE ONLY ALLOWED ON SINGLE LANE APPROACHES.
 IF IT IS INTENDED THAT LA AVENIDA DRIVE OR TURNER AVENUE EVER BECOME A 4 LANE ROADWAY
 (2 APPROACH LANES) THE PROPOSED ROUNDABOUT AT THIS LOCATION SHALL BE REMOVED.

4.1.2 Traffic Calming

The Avenue Specific Plan provides for traffic calming within residential neighborhoods to contribute to safer and more livable neighborhoods in which to walk, bike and drive. According to the Federal Highway Administration (FHWA) document FHWA-HRT-06-047 HRTC-01/01-06(1M)E, Roundabouts Safety and Design, 2006 some of the benefits of roundabouts are:

- Crashes are less severe than other intersection crashes.
- Safer than traditional intersections.
- Cost-effective way to improve intersection safety.
- Increased traffic capacity and improved traffic flow.
- No signal equipment to maintain.
- Aesthetic benefits.

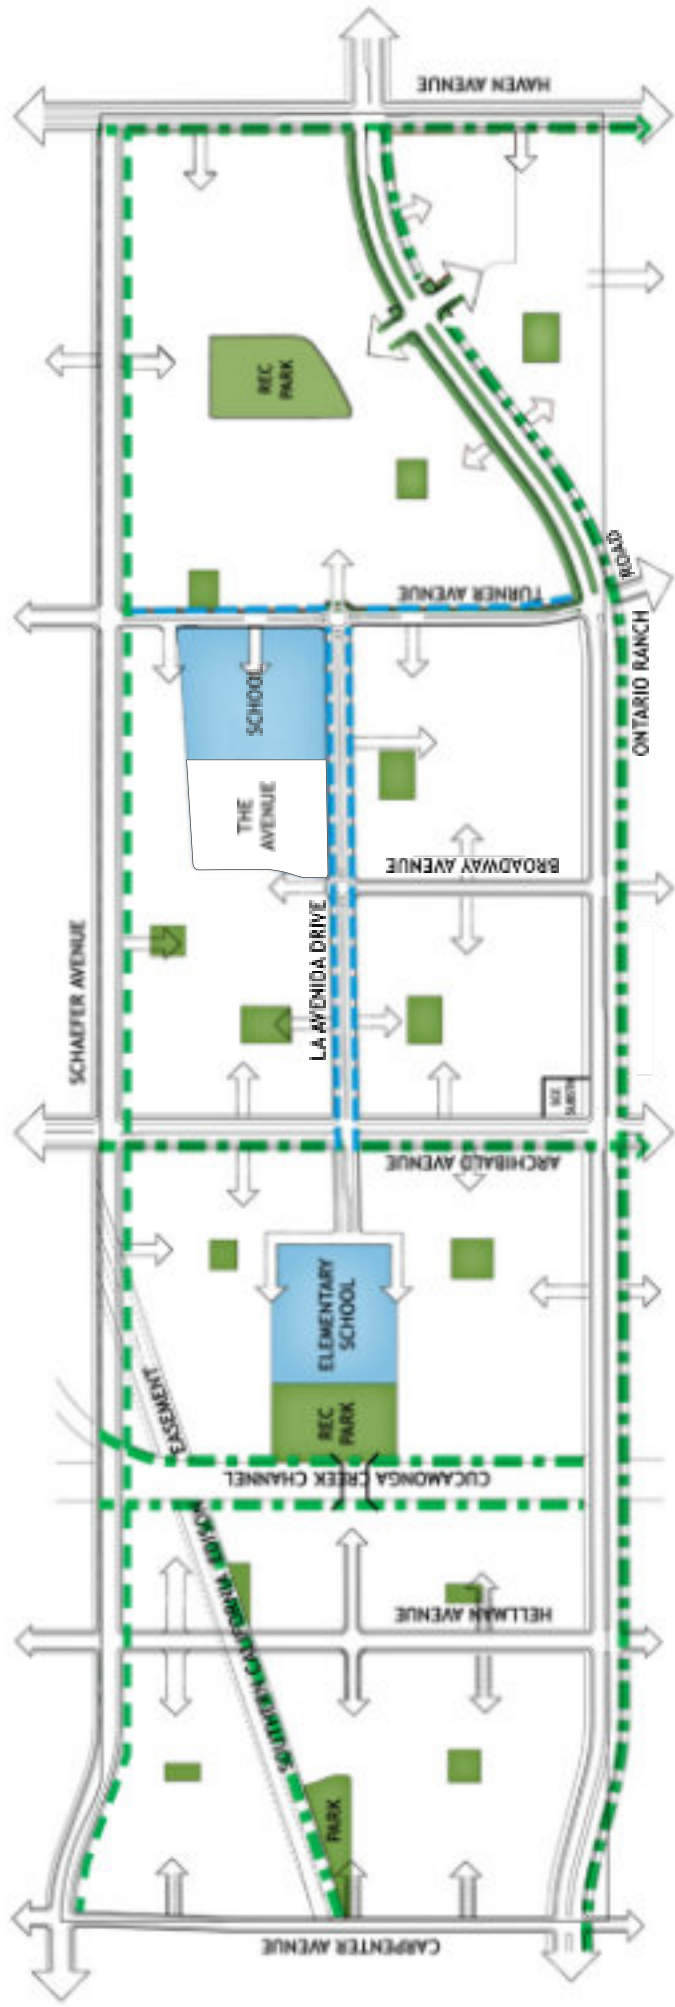

There are also environmental benefits to roundabouts. The FHWA Publication FHWA-RD-00-067 Roundabouts, An Informational Guide, June 2000 states that “The environmental benefits of a project are most readily quantified in terms of reduced fuel consumption and improved air quality. Of these, reductions in fuel consumption and the benefits associated with those reductions are typically the simplest to determine.”

4.1.3 Pedestrian/Bicycle Trails and Connectivity

A primary recreational trail will be provided through the improvement of a portion of the SCE owned property (SCE Corridor) within the plan area as shown on Exhibit 18b, “SCE Easement Trail”. The developers of the Specific Plan Area will be responsible for the construction of this trail. These improvements represent a part of the City’s Master Planned multi-use path system planned for the New Model Colony. This SCE trail will extend from Vineyard Avenue, located west of the plan area to the Cucamonga Creek Channel. The trail will then head north along the west side of the Channel, where it will meet the Multi-Use path on Schaefer Avenue. This series of trails will provide access to Archibald Avenue and the trail on the East side of the Channel, which also runs north-south within the flood control right of way connecting Schaefer to **Ontario Ranch Road**. The trail also provides points of connection to parks, **La Avenida Drive** corridor, residential neighborhoods and the retail center.

The Specific Plan proposes a steel truss bicycle/pedestrian bridge crossing over the Cucamonga Creek Channel to connect the east and west sides of the channel and encourage school children west of the Channel to walk or bike to school. The developer will be required to pay for the bridge and its construction. An encroachment permit will be needed from San Bernardino County Flood Control to construct the bridge crossing. A minimum 12-foot easement will need to be recorded to the City of Ontario in order to maintain the pedestrian bridge and provide public access across the channel. The SCE and flood control channel trails are important components in the overall trail system design of the New Model Colony and are an important component of the city’s master plan trail system. The residential users will find that the trail is useful in reaching many of The Avenue’s amenities, as well as the surrounding community. The improved trails will be landscaped with approved evergreen, deciduous, and flowering plant material. There will be several points in the trail system linking to secondary paths that will lead to The Avenue’s retail/commercial areas, as well as to the neighborhoods.

- LEGEND**
- - - NMC MASTER PLAN MULTI-USE PATH
 - - - PROPOSED MULTI-USE BRIDGE ACROSS CHANNEL
 - - - ENHANCED PEDESTRIAN SIDEWALK PER SPECIFIC PLAN (SEE SECTIONS 17G AND 17H)

NOTE: The precise locations of the trails are conceptual and will be determined as part of the tract map approval process. The location of the proposed multi-purpose bridge is shown as conceptual and subject to Planning Department and Traffic Engineering Department review and approval.

The Avenue

SPECIFIC PLAN

Trail Master Plan

Exhibit 18 - Trail Master Plan

The New Model Colony • Ontario, California

Multi-use paths are provided within the plan area along Archibald, Haven, Ontario Ranch Road and Schaefer Avenues. These paths are provided adjacent to the major drainage easement, along Hellman Avenue, and along the spine road (The "Avenue") which traverses the center of the plan area in an east-west direction.

Multi-use paths shall provide benches/seatwalls along path at appropriate locations with adequate lighting and trash receptacles at seating areas. In addition, these paths should provide clear directional signage (subject to Engineering and Planning Department approval) to facilitate movement to and from crosswalks and entry points.

Bike racks at destination locations serving as a point of departure to and from bike path will also be available on Class I bike paths. The bicycle trail system provides access and connectivity to the various land use components of the plan area (parks, schools, retail and commercial center, and residential neighborhoods) as shown in Exhibit 18, "Trail Master Plan". Class II on-street striped bike lanes shall be provided on roadways within The Avenue Specific Plan area as determined by the City Engineer.

Exhibit 18a - Cucamonga Creek Channel Trail

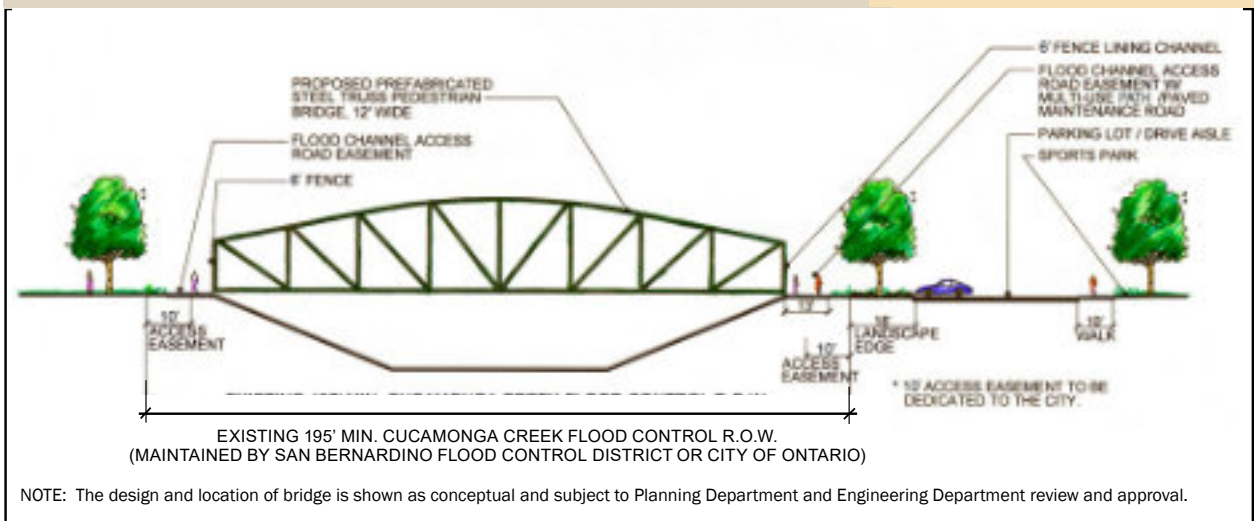

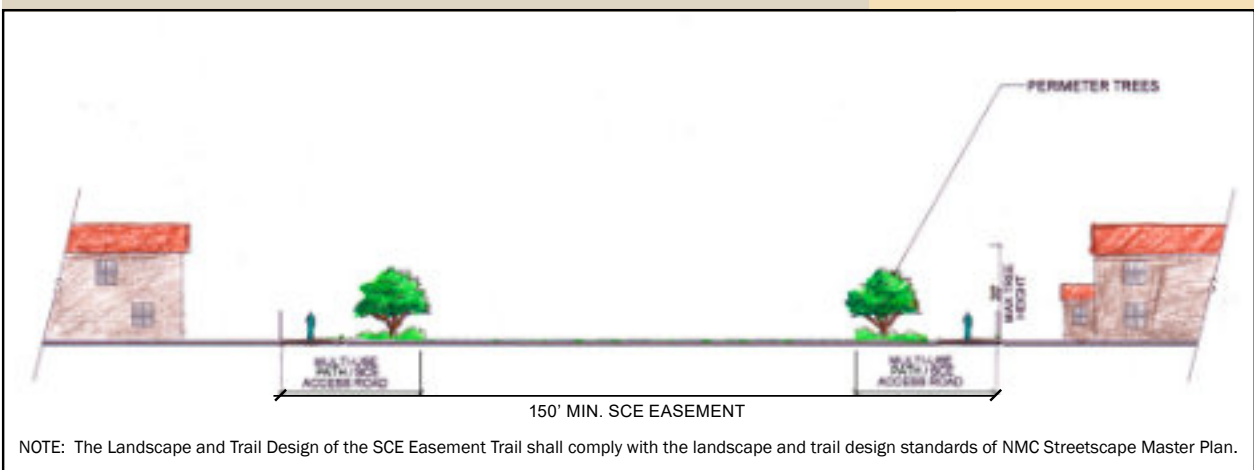

Exhibit 18b - SCE Easement Trail

4.2 Infrastructure Plans

The improvement plans for the various infrastructure facilities, including water, recycled water, sewer, and storm drainage are intended to provide The Avenue Specific Plan with essential services in a safe and efficient manner. Infrastructure facilities shall comply with the latest approved Master Plans. The current 2012 Master Plans shall be referenced for design standards, sizing, alignment, etc.

Water, recycled water and sewer utilities may be designated as “public utilities” if located within public or private streets. All public utilities within private streets shall be designed and constructed per City standards and contained within easements acceptable to the City. The CC&RS shall contain language that requires all proposed work by the HOA within said easements to be plan checked and inspected by the City, including applicable fees. Generally, utilities will not be accepted as public within alleys, parking areas or driveways.

Utilities within commercial and industrial parking lots and loading areas shall be designated as private. The extent to which said utilities will be accepted as public utilities for maintenance shall be determined, at the full discretion of the City, during final design plan review. The following sections describe each of the infrastructure facilities in detail.

4.2.1 Water

Domestic water will be provided by the City of Ontario. The Master Planned (MP) programs new potable water facilities to include: 30 and 24-inch Francis loop main extension from existing Zone 925 reservoir facilities within Milliken, Eucalyptus, Archibald and **Ontario Ranch Road** Streets. The remainder of The Avenue will be served by a series of new Master Planned 12-inch mains as follows: **Ontario Ranch Road** extending to Haven, Schaefer from Carpenter to Haven, Haven from Eucalyptus to Schaefer, Turner from **Ontario Ranch Road** to Schaefer and Hellman from **Ontario Ranch Road** to Schaefer. Construction of the Master Planned water mains service network improvements is required prior to issuance of project related building permits for The Avenue. Master Planned domestic and recycled water main lines serving, surrounding and within the Specific Plan, as identified in the 2012 Water Master Plan, shall be constructed prior to issuance of first occupancy. Sizing of non-master planned facilities is subject to City review and approval of the required Hydraulic Analysis.

New domestic water mains to be constructed as part of the development of The Avenue will include: 12-inch mains within Turner Avenue from **Ontario Ranch Road** to Schaefer and within **La Avenida Drive** street from the proposed Elementary school site easterly of Archibald extending to Turner Avenue. These two 12-inch mains form the interior backbone loops connecting to Master Planned potable water facilities. The remainder of all interior streets within The Avenue project, including Carpenter and “A” Street located between Archibald and Turner will have 8-inch domestic mains. The construction on dead end water mains shall be avoided.

Higher fire flow demands for medium to high density residential and non-residential projects should be identified in accordance with the 2012 Water Master Plan. Fire flow demands in excess of 1500 gpm for single family residential may require upsizing certain distribution to 12-inch pipelines as shown in Exhibit 20, “Domestic Water Master Plan”. A hydraulic modeling analysis report is required to demonstrate that the proposed water system will meet peak demands including maximum day plus fire demand and peak hour demand.

4.2.2 Recycled Water

~~Recycled water will be provided by Inland Empire Utilities Agency (IEUA). All of The Avenue will be served within recycled water zone 930. Initial service will generate from an existing 30-inch main line facility running north-south within the existing and future alignment of Carpenter Street. A future IEUA 48-inch recycled main is also proposed within Carpenter Street. The proposed Master Planned recycled water improvements construction will include: 20-inch and 24-inch facilities within Archibald from Ontario Ranch Road to Schaefer; a 16-inch 12-inch facility within Haven fronting the easterly boundary of The Avenue project; a 12-inch line within Ontario Ranch Road from the Haven intersection extending westerly to joint the existing IEUA 30-inch transmissions main within Carpenter. Schaefer will have a 12-inch main from the intersection of Haven extending westerly to Carpenter intersection. The ultimate sizing and alignment shall follow the most currently approved Master Plan. In order to assure conformance with Master Plan Design Criteria during the Implementation process: a Conceptual Technical Study shall be prepared and approved by the City prior to or concurrently with the entitlement submittal; and, a Final Technical Study shall be prepared and approved by the City prior to approval of Construction Drawings and Permits.~~

All new Master Planned recycled water mains will have the potential to interconnect to the proposed future 48-inch transmission facility within Carpenter. New recycled water facilities to be constructed as part of The Avenue will include: a 8-inch main within Turner from Ontario Ranch Road to Schaefer; a 8-inch main within La Avenida Drive from Archibald westerly to the Elementary school site and from Archibald to Turner. All remaining interior streets built with The Avenue project will connect to the Master Planned recycled water facilities and The Avenue backbone facilities to serve the project landscape edges, parkways, neighborhood, parks, street medians, etc. via 8-inch mains within the interior streets, as required, and irrigation sleeving at intersections and appropriate mid-block crossings to serve The Avenue landscaping improvements irrigation needs. Sizing of non-master planned facilities is subject to review and approval of the required Hydraulic Analysis. An initial Master Plan construction of recycled water improvements will be the construction of the 930 pressure zone (PZ) recycled water system in Archibald Avenue from southerly project limits to Riverside Drive, the Pressure Reducing Station (PRS) at Archibald & Chino Avenue, 1050 PZ pipes in Archibald, 1050 PZ pipes in Riverside Drive and on into RP-1. This above mentioned series of piping will tie into The Avenue via Schaefer, Ontario Ranch Road, etc. A recycled water loop must also be constructed in Haven Ave. from the southerly project limits to Riverside Dr. and in Riverside Dr. from Haven Ave, to RP-1 including the PRS stations per the Recycled Water Master Plan.

The Avenue (Subarea 18) Specific Plan shall comply with City Ordinance 2689 and make use of recycled water for all approved uses, including but not limited to irrigation of parks, schools, street landscaping, recreational trails, HOA maintained on-site common areas and commercial/industrial landscaping. An Engineering Report approved by the City and the California Department of Public Health is required prior to the use of recycled water.

4.2.3 Sewer

~~Initial Sewer service (Phase I Development sewer) for The Avenue will be provided by the City of Ontario and IEUA via the existing IEUA Eastern Trunk sewer within Archibald Avenue extending northerly from the existing Kimball interceptor trunk line (48-inch) to northerly of Chino Avenue. 33-inch and 36-inch mains are located in Archibald within The Avenue project between Ontario Ranch Road and Schaefer. The Archibald Eastern Trunk sewer will serve The Avenue project from Cucamonga Channel to Haven Avenue at the east boundary of the project. Sizing of non-master planned facilities is subject to review and approval of the required Hydraulic Analysis. A sewer study will be performed to demonstrate that the proposed sewer system will meet peak loading conditions. The ultimate sizing and alignment shall follow the most currently approved Master Plan. In order to assure conformance with Master Plan Design Criteria during the Implementation process: a Conceptual Technical Study shall be prepared and approved by the City prior to or concurrently with the entitlement submittal; and, a Final Technical Study shall be prepared and approved by the City prior to approval of Construction Drawings and Permits.~~

The 21-inch Haven Avenue Trunk Sewer line runs in Haven Avenue begins north of the Ontario Ranch Road intersection. The Ontario Ranch Road Trunk Sewer line (27-inch and 30-inch) runs in Ontario Ranch Road between Archibald Avenue and Haven Avenue. There is also a sewer line (18-inch, 15-inch and 12-inch 21-inch and 24-inch) to be located within Carpenter Avenue which will connect to the Kimball Interceptor at the County line. The Carpenter Avenue Trunk Sewer will extend northerly to Schaefer Avenue and will serve the Avenue project development area westerly of Cucamonga Channel and easterly of Vineyard Avenue.

New sewer facilities to be constructed as part of The Avenue will include: 12-inch sewer in La Avenida Drive from Archibald easterly to Turner; 10-inch sewer in La Avenida Drive from Archibald westerly to the Elementary school site; 10 inch sewer in Broadway Avenue from Ontario Ranch Road terminating near La Avenida Drive intersection; 12-inch sewer in Turner from La Avenida Drive intersection northerly to Schaefer.

A 12-inch sewer will be constructed in Ontario Ranch Road from Hellman westerly to join the master plan sewer in Carpenter Avenue. All remaining interior streets within The Avenue, when developed, will have 8-inch minimum sewer main lines as shown in Exhibit 23, "Sewer Master Plan." Master planned sewer main lines serving and surrounding the development shall be constructed prior to issuance of first occupancy. Initial sewer improvements shall be constructed between IEUA's Archibald Trunk and the development limits, including constructing that portion of Ontario Ranch Road sewer between Archibald and Haven.

4.2.4 Drainage

The New Model Colony Master Plan of Storm Drains report, prepared by LD King Engineers and updated NMC Improvements Hydrology Analysis provided by Stantec Engineers considered the entire Master Plan zoning area drainage analysis of which The Avenue (Planning Area 18) is included. The City of Ontario will be the maintenance agency for Master Planned and The Avenue storm drainage system facilities.

All Avenue drainage will eventually discharge into the existing Bellegrave County Line Drainage Channel facility located approximately 7,000-feet south of **La Avenida Drive**. The Master Planned improvements will utilize the existing Cucamonga Channel County of San Bernardino Flood Control facility, which drains north to south and joins the east-west Bellegrave County Line Drainage Channel. The Master Planned Storm Drain Improvements will construct a new network of storm drain lines within existing and proposed north-south streets extending northerly from the Bellegrave County Line Flood Control facility. Also, east-west storm drain lines will be built periodically joining the existing Cucamonga Channel Flood Channel facility. The Master Planned Storm Drain Improvements will include the following: an 84-inch storm drain within Haven fronting the easterly edge of **La Avenida Drive** and extending southerly joining the Bellegrave Flood Channel with a 96-inch line; a 66-inch storm drain within Turner, the Turner storm drain will extend southerly eventually joining the Bellegrave Flood Channel with a 96-inch line; Archibald Avenue accepts flows from a 36-inch line within Schaefer easterly of the Archibald intersection.

The Archibald main extends southerly eventually joining the Bellegrave Flood Channel with a 96-inch line. The Hellman storm drain accepts flows from a 42-inch line north of Schaefer.

The Hellman storm drain extends southerly through The Avenue as an 42-inch line and joins an 84-inch line within **Ontario Ranch Road**. The Hellman storm drain extends southerly to future Eucalyptus Street as a 96-inch line, then travels easterly on Eucalyptus as a 6' x 11' box culvert to join the existing Cucamonga Flood Channel. **Ontario Ranch Road** west of the Cucamonga Flood Channel has an 84-inch storm drain easterly of the Hellman intersection and 72-inch lines extending from west to east from Vineyard to Hellman. **Ontario Ranch Road**, between Archibald Avenue and Turner Avenue, contains 60-inch, 54-inch and 48-inch storm drain. A 48-inch storm drain extends easterly from the existing Cucamonga Channel within **Ontario Ranch Road** terminating mid-block between the channel and Archibald intersection.

Cucamonga Creek Channel

Storm drain facilities to be constructed as part of The Avenue will include: a 30-inch line in Carpenter from **Ontario Ranch Road** northerly to mid-block between Schaefer; a 36-inch line paralleling the easterly side of the existing Cucamonga Flood Channel to serve the Park/Elementary school sites and extending northerly to serve the future retail site adjacent and southerly of Schaefer; a 30-inch line within ~~The Avenue~~ **La Avenida Drive**— between Archibald and Turner — ~~extending northerly to La Avenida Drive intersection then easterly within La Avenida Drive to the Middle School site to provide service to the 10 acre School site;~~ the individual planning areas within The Avenue will have storm drain pick-up laterals (18-inch minimum) joining Master Planned Improvements and The Avenue backbone storm drain facilities.

Ultimate development of The Avenue requires construction of all proposed Master Planned Storm Drain Improvements. The existing Avenue site generally sheet flows from north to south. It is not anticipated that Grading of individual planning areas will be permitted, prior to completion of Master Planned Storm Drain Improvements due to the fact that the City of Ontario will not allow temporary stormwater runoff detention basins to be constructed for individual planning areas in The Avenue until downstream Master Planned storm drain facilities are constructed and functioning to provide necessary flood control for that tract map area.

4.2.5 Grading

The Avenue existing topography may be described as flatland terrain which gently slopes to the south varying from 0.6% to 1.1% across the site as shown in Exhibit 5, "Existing Topography". The high elevation is elevation 750 at the northeast corner of the site. The low elevation is 706 located at the intersection of Archibald and **Ontario Ranch Road** Streets. Existing land uses vary from vacant land to agricultural with the majority of land being existing or vacated dairy farm operation. The dairy farm operations contain many ponding areas for acceptance/ filtration of dairy livestock excrement runoff. The dairy farms on the site have varying thickness layers of manure which will require off-site disposal from The Avenue project. Due to the varied number of development ownership of The Avenue planning areas, it is anticipated that mass grading of the entire site will not occur. Individual planning area owners will be responsible for obtaining any rough grading and precise grading permits along with remedial grading, removal of manure deposits and dairy bog pond sediments disposal. If the Developer proposes temporary use of an existing agricultural well for purposes other than agriculture, such as grading, dust control, etc., the developer shall make a formal request to the City of Ontario for such use prior to issuance of permits for any construction activity. Upon approval, the Developer shall enter into an agreement with the City of Ontario and pay any applicable fees as set forth by the agreement.

Landscape Setback Swale System

4.2.6 NPDES Compliance

The grading and drainage of The Avenue Specific Plan area shall be designed to detain, filter and treat surface runoff, in a manner and combination which is practical, to comply with the most recent requirements of the San Bernardino County NPDES Stormwater Program's Water Quality Management (WQMP) for significant new development projects. The objective of the WQMP for this project is to minimize the detrimental effects of urbanization on the beneficial uses of receiving waters, including effects caused by increased pollutants and changes in hydrology. These effects may be minimized through the implementation of site designs that reduce runoff and pollutant transport by minimizing impervious surfaces and maximizing on-site infiltration, Source Control Best Management Practices (BMP's) and/or either on-site structural Treatment Control BMP's, or participation in regional or watershed-based Treatment Control BMP's. An alternative to the implementation of on-site Low Impact Development (LID) BMPs to retain/infiltrate and treat stormwater runoff is the utilization of the off-site, regional Mill Creek Wetland facility

for accomplishing water quality improvements in residential project runoff from this master planned community. All non-residential planning area projects within The Avenue will incorporate all required on-site LID BMPs, pursuant to the requirements of the current San Bernardino County Water Quality Management Plan.

Prior to the issuance of a grading or construction permit, all projects greater than 1 acre in size shall apply for coverage under the California General Permit To Discharge Storm Water Associated with Construction Activity, obtain a WDID# from the State Water Resources Control Board and prepare a Stormwater Pollution Prevention Plan (SWPPP) on the CASQA 2009 Template form and upload it to the State's SMART database system. A copy of each SWPPP document and WDID# Certification shall also be provided to the City of Ontario, prior to any construction permit issuance. The SWPPP will identify and detail all appropriate Best Management Practices (BMPs) to be implemented or installed during construction of the project.

In addition to the preparation of a SWPPP for construction-related activities, and as part of the approval of any grading plans within the Specific Plan Area, the applicant will be required to submit a Water Quality Management Plan (WQMP) on the regional model form provided by the City. The WQMP shall identify and detail all Site Design BMPs, Source Control BMPs and Treatment Control BMPs to be implemented or installed at this site in order to reduce storm water pollutants and site runoff.

The Mill Creek Wetland facility has been constructed and will be on line and functioning in June, 2014. The facility will serve as an alternative to on-site LID BMP implementation for residential tract developers that are members of the NMC Builders, LLC consortium and which have adequate reserved capacity in the regional facility for those planning areas. Out of a proposed 425 acres of residential development in The Avenue, 288 acres will be developed by NMC Builders members, ~~30~~ 20 acres of land will be utilized for public schools and 107 acres will developed by non-members, who will be required to make other arrangements or utilize another, future regional water quality facility, downstream of the project area. All non-residential planning area projects within The Avenue, including Public Schools, will incorporate on-site LID BMPs, in accordance with the regional NPDES Permit and the current San Bernardino County Water Quality Management Plan, and shall not rely on the regional wetlands facility for retention and treatment of runoff water.

All Priority Land Use (PLU) areas within the Specific Plan Area shall comply with the statewide Trash Provisions adopted by the State Water Resources Control Board (SWRCB) and trash requirements in the most current San Bernardino County Area-Wide MS4 Permit.

4.2.7 Solid Waste

The City of Ontario will provide solid waste collection services to The Avenue Specific Plan area. The following addresses additional solid waste issues:

- An integrated waste management plan is required and shall be submitted prior to DAB approval of each subdivision.
- Commercial – Developer shall comply with Municipal Code Sec. 6-3.314 Commercial Storage Standards, and Sec. 6-3.601 Business Recycling Plan.

- Apartment – For apartments using commercial bin service developer shall comply with Municipal Code Sec. 6-3.314 Commercial Storage Standards and Sec. 6-3.601 Business Recycling Plan.
- Residential – For curbside automated container service developer shall comply with Municipal Code Sec. 6-3.308.9(a) and (d), Residential Receptacles, Placement.
- Recycling Requirements – Developer shall comply with Municipal Code Article 6. Recycling Requirements for Specified Business Activity, Sec. 6-3.601 Business Recycling Plan, and Sec. 6-3.602 Construction and Demolition Recycling Plan.
- ~~Site Improvement Plans shall follow the City of Ontario refuse collections standards~~
- All project sites shall be designed to meet all the Integrated Waste Department's requirements, including the requirements for Sizing of Storage, Location of Collection Area, Accessibility for Collection Vehicles, and Collection of Sorted/Diverted Waste Types.
- Project shall follow the City of Ontario's latest "Solid Waste Department Refuse and Recycling Planning Manual".

4.2.8 Gas

The Gas Company will provide natural gas to the Project Site. Gas mains will be installed to the Project Site by the Gas Company, as necessary.

4.2.9 Electric

Southern California Edison will provide electricity to the plan area from existing facilities in the vicinity. Proposed new facilities to serve the project will be owned and operated by the City of Ontario and located underground.

4.2.10 Telephone

Verizon will provide telephone service to the plan area. The City will provide a fiberoptic network to the home, accommodating voice mail data, cable and video on demand. Proposed on-site facilities will be placed underground.

4.2.11 Cable Television

Adelphia will provide cable television service to the plan area. The City will provide coaxial/fiber cable to the home, accommodating cable television, internet services, voice mail data, cable and video on demand. Proposed on-site facilities will be placed underground.

4.2.12 Fiber Optics

Proposed Fiber Optics (conduits and fiber) will be placed underground within a duct and structure system to be installed by the Developer, as illustrated in Exhibit 19. The fiber and conduits along the backbone

streets shall be installed in a joint trench by each Developer as the last lane improvements are completed. In-tract fiber and conduit shall be installed by the Developer in joint trenches where possible. Maintenance of the installed system will be the responsibility of the City/Special District. Development of the Project requires the installation by the Developer of all fiber optic infrastructure necessary to service the Project as a standalone Development.

4.3 Community Facilities

4.3.1 Schools

The Mountain View School District serves the K-8 school's needs of the proposed The Avenue Specific Plan. The Chaffey Etiwanda Joint Union School District serves the school needs of grades 9-12 within the plan area. Colony High School is located to the north of the plan, for the high school students living in the plan area. In addition, the proposed The Avenue Specific Plan is providing sites for ~~both a ten (10) acre elementary school and an additional ten (10) acre school, and a twenty (20) acre middle school.~~

4.3.2 Library

The City of Ontario will provide library services to The Avenue Specific Plan area.

4.3.3 Fire

The City of Ontario will provide fire protection services to The Avenue Specific Plan area.

4.3.4 Police

The City of Ontario will provide police services to The Avenue Specific Plan area.

SPECIFIC PLAN

Section 5 - Development Regulations

5.1 General Provisions

- A. Development proposals within The Avenue Specific Plan shall be subject to the implementation procedures established herein. Whenever the provisions and development standards contained herein conflict with those contained in the City of Ontario Development Code, the provisions of The Avenue Specific Plan shall take precedence. On issues where the Specific Plan is silent the City of Ontario Development Code shall prevail.
- B. Severability - If any portion of these regulations is declared to be invalid or ineffective in whole or in part, such decision shall not affect the validity of the remaining portions thereof. The legislative body hereby declares that they would have enacted these regulations and each portion thereof irrespective of the fact that any one or more portions be declared invalid or ineffective.
- C. Unless otherwise provided, any ambiguity concerning the content or application of The Avenue Specific Plan shall be resolved by the Planning Director or his/her designee, hereinafter referred to as Director, in a manner consistent with the goals, policies, purpose and intent established in The Avenue Specific Plan.
- D. Any major deviation from the Design Guidelines (Section 6) within The Avenue Specific Plan shall require a Specific Plan Amendment. The Director shall determine whether a proposed change constitutes a major deviation.
- E. The meaning and construction of words, phrases, titles, and terms shall be the same as provided in the City of Ontario Development Code Article 2, "Definitions", unless otherwise specifically provided herein.

5.2 Applicability

The development regulations contained herein provide specific standards for land use development within the proposed The Avenue Specific Plan. Regulations address residential, retail and commercial and open space land uses. General landscaping regulations are also provided. Application of the following regulations is intended to encourage the most appropriate use of the land, ensure the highest quality of development, and protect the public health, safety, and general welfare. The adoption of The Avenue Specific Plan by ordinance will supercede otherwise applicable City of Ontario zoning regulations unless stated herein to the contrary. Whenever the provisions and development standards contained herein conflict with those contained in the City of Ontario Development Code, the provisions of The Avenue Specific Plan shall take precedence. Where The Avenue Specific Plan is silent, City codes shall apply.

5.3 Development Review Process

All development projects within the proposed The Avenue Specific Plan shall be subject to the Development Plan Review Process as established in Article 8 of the City's Development Code. Adoption of The Avenue Specific Plan by the City includes adoption of the Design Guidelines contained within Section 6 of The Avenue Specific Plan and which provide direction for the design of development projects within the plan area. Where the Design Guidelines are silent, the applicable design guidelines contained within the City's Development Code shall apply. The Design Guidelines are intended to be flexible in nature while establishing basic evaluation criteria for the review by the City of developer projects during design review.

Pursuant to these provisions, the Development Permit process constitutes a design review of project architecture, site plans, and landscape plans. All development project applications shall include a landscape and irrigation plan describing plant materials and their growth habits, plant size and spacing, methods of irrigation and landscaping maintenance, site plans, architectural elevations, floor plans, grading plans and other requirements as specified by the City. Development permits are approved with conditions of approval.

As the Specific Plan is Phased, the following minimum criteria shall be met for each Subdivision and Development of each Phase:

- For Domestic Water, all the Master Plan, Regional and Local Infrastructure identified in Section 4 and the Conceptual Domestic Water Plan for the Water Pressure Zone that the Phase is within shall be completed as part of the Phase's infrastructure requirements. Also, any domestic water infrastructure necessary to provide primary looping, secondary looping, and meet all hydraulic criteria and fire flow shall be completed as part of the Phase's infrastructure requirements.
- For Recycled Water, all the Master Plan, Regional and Local Infrastructure identified in Section 4 and the Conceptual Recycled Water Plan for the Recycled Water Pressure Zone that the Phase is within shall be completed as part of the Phase's infrastructure requirements. Also, any recycled water infrastructure necessary to provide primary looping, secondary looping, and meet all hydraulic criteria shall be completed as part of the Phase's infrastructure requirements.
- For Sewer, all the Master Plan, Regional and Local Infrastructure identified in Section 4 and the Conceptual Sewer Plan for the Master Plan Sewer Tributary Area that the Phase is within and upstream of shall be completed as part of the Phase's infrastructure requirements. Also, any sewer infrastructure necessary to meet all hydraulic criteria shall be completed as part of the Phase's infrastructure requirements.

5.3.1 Additional Entitlement Requirements

In order to ensure orderly expansion of the City Utility Systems and other City Infrastructure, the following Additional Entitlement Requirements are imposed upon all Subdivision Maps and Developments within the Specific Plan area.

5.3.1.1 Conceptual Design Report:

Prior to approval of any entitlement application (subdivision maps, Development Plan Reviews, etc.), a conceptual design report shall be prepared and submitted to the Development Agency Engineering Department and the Utilities Engineering Department for review and approval for the established extent of all public improvements required for the project. The study shall identify existing and future rights-of-ways (ROW) and infrastructure improvements and establish all vertical and horizontal alignments for each utility. The report shall include cross-sections, profiles, and any supporting details needed to demonstrate that utilities can be adequately accommodated in the public ROW. The study shall account for all utility conflicts, right-of-way variations, existing obstructions, and the timing of utility installation. This shall also include Water Sub-Area Master Plans (WSAMP) and Sewer Sub-Area Master Plans (SSAMP) to assure compliance with all Master Plan Design Criteria, including Hydraulic Design Criteria. Utilities cannot be located along an alignment that conflicts with existing conditions (e.g. electrical poles, private property, etc.) unless that applicant is accepting the responsibility of modifying the existing conditions (e.g. undergrounding, relocation, ROW acquisition, etc.).

5.3.1.2 Preliminary Design Report:

As a condition of entitlements (subdivision maps, Development Plan Reviews, etc.) within the Specific Plan and prior to submittal of Infrastructure Improvements Plans, a Preliminary Design Report (PDR) for all public infrastructure shall be submitted and approved by the Development Agency Engineering Department and the Utilities Engineering Department. The PDR shall include the following:

Conceptual Design Compliance: A discussion modifying or confirming the conceptual design established with the Project's Conceptual Design Report. The study shall confirm all rights-of-ways (ROW), infrastructure improvements, and vertical and horizontal alignments for each utility.

Street Cross Sections and Profiles: Street Cross Sections and Profiles shall be provided for each public street, private street and Public Utility Easement (PUE) containing a public utility and at any points along the alignments where the ROW varies. The cross sections shall show the location and size of each utility and shall annotate the property/ROW lines, the type of finished surface material, the distance of each utility from centerline, the depth from finished surface to top of pipe, and the distance between utilities (outside wall to outside wall).

Constructability Review: The report shall include a discussion of the constructability issues along the proposed alignment and identify the recommended construction methods that may be utilized. The study shall perform field investigation (field survey and potholing) in order to identify potential utility conflicts, right-of-way variations, existing obstructions, and constructability issues created by the timing of utility installation.

Supporting Details: The PDR shall include any supporting details needed to demonstrate that utilities can be adequately accommodated in the public ROW, including the placement of large appurtenances, clearance from existing obstructions, etc.

30% Design Drawings: The PDR findings shall be incorporated into a 30% design plan set and included in the PDR.

5.3.1.3 Utilities Systems Map (USM):

Prior to approval of any entitlement application (subdivision maps, Development Plan Reviews, etc.), as part of the entitlement application a Conceptual Utilities Systems Map (USM) shall be prepared and submitted to the Development Agency Engineering Department and the Utilities Engineering Department for review and approval. The USM is a summary plan sheet exhibit that shows all the public off-site infrastructure requirements and demands for the Development Project (and/or Subdivision), the on-site private infrastructure improvements, and the interaction between the public and private utilities systems. As a Condition of Approval for the Development Project (and/or Subdivision), the Conceptual Utilities Systems Map shall be updated into a Final Utilities Systems Map to reflect the changes that occur between entitlement and Final Plan and Permit Approval. Reference the Ontario Municipal Utilities Company Utilities Engineering Department's Utilities Systems Map (USM) Requirements for details.

5.3.1.4 Integrated Waste Management Report (IWMR) and Solid Waste Handling Plan (SWHP):

Prior to approval of any entitlement application (subdivision maps, Development Plan Reviews, etc.), as part of the entitlement application a Conceptual Integrated Waste Management Report (IWMR) and a Conceptual Solid Waste Handling Plan (SWHP) shall be prepared and submitted to the Development Agency Engineering Department and the Utilities Engineering Department for review and approval. The SWHP summary plan sheet exhibit that demonstrates the project site's design conformance with the Integrated Waste Department's requirements, including the requirements for Sizing of Storage, Location of Collection Areas, Accessibility for Collection Vehicles, and Collection of Sorted/Diverted Waste Types. The IWMR is a report that presents project specific information that is not able to be demonstrated within the Solid Waste Handling Plan, including discussions on: project solid waste operations; project compliance with all applicable laws, statues, policies, and requirements; and, conformance with all the Integrated Waste Department's requirements, including the requirements for Sizing of Storage, Location of Collection Areas, Accessibility for Collection Vehicles, and Collection of Sorted/Diverted Waste Types. As a Condition of Approval for the Development Project (and/or Subdivision), the Conceptual SWHP and the a Conceptual IWMR shall be updated into a Final SWHP and Final IWMR to reflect the changes that occur between entitlement and Final Plan and Permit Approval. The SWHP and IWMR may be required to be updated from whenever there are new occupants, new uses or changes to existing uses, Tenant Improvements, Business Licenses, and Certificates of Occupancy. Reference the Ontario Municipal Utilities Company Utilities Engineering Department's Integrated Waste Management Report (IWMR) and Solid Waste Handling Plan (SWHP) Requirements for details.

5.4 Development Regulations

The Avenue Specific Plan is adopted by ordinance and will serve as the implementation tool for the General Plan as well as the zoning for the Project Site. The Avenue Specific Plan Development Regulations address general provisions, permitted uses, and development standards for the plan area.

5.4.1 General Site Development Standards

The following general site development criteria shall apply to all land development proposed in The Avenue Specific Plan.

- A. Gross Acres - Except as otherwise indicated, gross acres for all development areas are measured to the centerline of streets.
- B. Grading - Development within the plan area shall utilize grading techniques as approved by the City of Ontario. Grading concepts shall respond to the Design Guidelines included in The Avenue Specific Plan which guide the development of land use toward the goal of providing for a livable community with streets and entries designed for walking and resident interaction. Additionally, the grading concepts should adhere to the following:
 1. Where slope conditions are present, the property shall be located at the top of a slope
 2. In areas adjacent to a ridge line or in moderate slope areas, dwelling units and structures should be sited to:
 - a. Use the natural ridge line as a backdrop for structures
 - b. Use landscape plant materials as a backdrop
 - c. Use structure to maximize concealment of cut slope
- C. Building Modification - Additions and/or projections into setback areas permitted by The Avenue Specific Plan shall match the architectural style of the primary unit and shall be constructed of the same materials and colors as the primary unit.
- D. Utilities - All new and existing public utility distribution lines of 34.5 kV or less shall be subsurface throughout the plan area.
- E. Technology - All homes and businesses shall accommodate the most modern technology for computer internet access, phone, fax, and television. Broadband fiber optics cable will be installed on all peripheral streets per the approved Master Plan.
- F. Density - The Avenue Specific Plan Land Use Plan establishes a maximum gross density average for each residential land use designation as indicated in Table 2 "Statistical Analysis". These densities are 4.6 dwelling units per gross acres for the Low Density Residential designation, **10.25 dwelling units per gross acres for the Low Medium Density Residential designation** and 12.0 dwelling units per gross acre for the Medium Density Residential designation.

G. Maximum Number of Dwelling Units - The maximum number of residential dwelling units permitted within The Avenue Specific Plan shall be 2,875 dwelling units.

H. Retaining walls - Exposed walls and fences facing roadways shall be no greater than six feet in height, except as necessary for acoustical purposes to satisfy the intent of the noise ordinance. Where retaining walls or fences face roadways, they shall be built, when feasible, of decorative materials consistent with the wall theme of the neighborhood.

Northerly Site Boundary along Schaefer Avenue, looking east

I. Temporary Uses - Temporary Uses shall be consistent with the Development Code requirements of Article 13 (page 13-46).

J. Satellite Dishes - Freestanding satellite dish antennas shall be in compliance with Article 32, Section 9.1.3289 of the Development Code.

K. Recreational Vehicle Storage - No recreational vehicle (RV) storage in front or corner side yards and no RV street parking for a period of more than 72 hours.

L. Dairy Separation Requirement for Residential District Development Standards Section – The following separation requirements from existing dairies/feed lots shall apply to new residential development or structures used for public assembly purposes from existing dairies/feed lots. A minimum 100' separation shall be required between new residential, commercial, or industrial development or structure used for public assembly and an existing animal feed trough, corral/pen or an existing dairy/feed lot including manure stockpiles and related wastewater detention basins. The 100-foot separation requirement may be satisfied by an off-site easement acceptable to the Planning Director with adjacent properties, submitted with the initial final map and recorded prior to or concurrent with the final map.

Typical single family detached residences

M. Product distribution requirements within Zones 1-5 (as shown on Exhibit 25, “Conceptual Product Distribution”) - Minimum number of product types per zone: 2. The following details the limitations on unit counts for products within a single zone or in a contiguous area of the same product(1). A contiguous area of one product type can not continue into an adjacent zone unless the unit count for that contiguous area conforms to the following limitations.

1. Single Family Detached (SFD):
 - a. Minimum number of dwelling units per product: 25
 - b. Maximum number of dwelling units per Product: 125
2. Single Family Attached (SFA):
 - a. Minimum number of dwelling units per product: 36
 - b. Maximum number of dwelling units per Product: 250
3. Multi-Family:
 - a. Minimum number of dwelling units: 200(2)
 - b. Maximum number of dwelling units: 400

N. Tandem Parking:

1. All vehicles must be registered with the HOA or management company. A copy of the registration for each vehicle showing the address, make model, vehicle year and color will be required upon registration.
2. No garage may be separately sold or assigned by an owner. A garage may be rented or leased to a non-owner solely in connection with the rental or lease of the respective unit.
3. All residents are required to use their garage space for parking their vehicles. Residents with more than two vehicles must register two vehicles for the garage spaces before a parking permit will be considered allowing parking on the private streets or parking bays within the project.
4. Anyone requesting a parking permit must also demonstrate that his/her garage is not being used for storage, or being used as a workshop or for any other purpose which would prevent the garage from being used to park two vehicles.

5. The secondary space (adjacent to habitable space) will be given 25% credit towards parking requirement.
6. Minimum size of tandem parking: 11'x38'.

O. Multi-family projects proposed within a gated neighborhood, may be subject to the following open space requirement, subject to review and approval of the Planning Department:

1. Ground Floor: A minimum contiguous area of 150 sq. ft. in area with no dimension less than 10 feet in any direction.
2. Balconies and Decks: Must have a minimum contiguous area of 50 sq. ft. in area with no dimension less than 5 feet in any direction.
3. Common Open Space: A minimum of 250 sq. ft. of common open space shall be provided per each unit. Common open space shall require a minimum contiguous area of 300 sq. ft. with no dimension less than 15 feet in any direction.

5.4.2 Residential Development Standards Tables

The development standards for proposed residential products at The Avenue are shown on the following pages (Table 3a-3n).

(2) Units of less than 200 may be approved with the review and approval of the Planning Director.

Table 3a - Product Type 1A Development Standards

Typical lot sizes: 55'x105', 60'x100', 60'x110' (5,500+ SF Lots)

Lot Criteria

Min. Lot Width at Front PL for Standard Lot	55'
Min. Lot Width on Corner	65'
Min. Lot Depth on Standard Lot	100'
Min. Lot Depth on Corner Lot	100'
Min. Lot Size	5,500 S.F.

NOTE: Lots within cul-de-sacs, standard knuckles or modified knuckle configurations shall provide a minimum 35-foot lot width at front property line and shall meet the minimum lot width established for the Planning Area at the building setback. All minimum side and rear yard setbacks shall be maintained at all times.

Minimum Setbacks

All front and corner side setbacks are measured from the property line at back of sidewalk.
All other setbacks are measured from property line unless otherwise noted.

Front Setbacks

Living Area	20'
Porch with Single Story Plate Line (2)	12'
Front Entry Garage (3)	18'
Turn In Garage with Single Story Plate Line	10' (Street Facing 18')

Side Setbacks (4)

From Interior PL (1)	5'
From Residential Street - First Story (6)	10'
From Residential Street - Porch	8'
Side for Garages (Min. 10' Between Garages)	3'
Garage to Back-of-Sidewalk	18'
Patio Cover	3'

Rear Setbacks

Main Structure	15'
Garage (Single Story Plate Line)	5'
Patio Cover	5'
Second Story Deck	10'
Accessory Structure	3'

Lot Coverage

Maximum Coverage	55%
------------------	-----

Maximum Building Height

Main Structure	35'
Accessory Structures	14'

Walls, Fences and Hedges

Maximum Height in "The Avenue" and/or front or corner side yard areas	3'
Maximum Height at all other Locations	6'
Maximum Height of Retaining Walls	3'
Maximum Height Solid Rear Yard Property Walls adjacent to Pocket Parks	3'

Parking

Minimum Number of Parking Spaces Required 2 Garage Spaces
Recreational Vehicle (RV) storage is prohibited in front or corner side yards. RV Street parking, over 72 hours, is prohibited.

Table 3b - Product Type 1B Development Standards

Typical lot sizes: 60'x85', 50'x110', 55'x90', 50'/55'x100', 55'x105' (4,250 - 5,775 SF Lots)

Lot Criteria

Min. Lot Width at Front PL for Standard Lot	50'
Min. Lot Width on Corner	55'
Min. Lot Depth on Standard Lot	85'
Min. Lot Depth on Corner Lot	85'
Min. Lot Size	4,250 S.F.

NOTE: Lots within cul-de-sacs, standard knuckles or modified knuckle configurations shall provide a minimum 35-foot lot width at front property line and shall meet the minimum lot width established for the Planning Area at the building setback. All minimum side and rear yard setbacks shall be maintained at all times.

Minimum Setbacks

All front and corner side setbacks are measured from the property line at back of sidewalk.
All other setbacks are measured from property line unless otherwise noted.

Front Setbacks

Living Area	12'
Porch with Single Story Plate Line (2)	8'
Front Entry Garage (3)	18'
Turn In Garage with Single Story Plate Line	10' (Street Facing 18')

Side Setbacks (4)

From Interior PL (1)	5'
From Residential Street - First Story (6), (7)	10'
From Residential Street - Porch	8'
Side for Garages (Min. 10' Between Garages)	3'
Garage to Back-of-Sidewalk	18'
Patio Cover	3'

Rear Setbacks

Main Structure	10'-15'	Max. 50% of the facade may be at 10'
Garage (Single Story Plate Line)	5'	
Patio Cover	5'	
Second Story Deck	10'	
Accessory Structure	3'

Parking	
Minimum Resident Parking Required:	
1.75 spaces per one-bedroom unit including 1 in a garage, 2 spaces per two-bedroom unit including 1 in a garage and 2.5 spaces per three or more bedroom unit including 1 in a garage.	
Minimum Guest Parking Required:	
1 Space for each 4 units under 50 on the building lot.	
1 Space for every 5 units between 51-100 units on the building lot. Public on-street parking may be counted toward guest requirement. Recreational Vehicle (RV) storage is prohibited in front or corner side yards. RV Street parking, over 72 hours, is prohibited.	

Footnotes:

- (1) Architectural projections may encroach a maximum of 3' into setbacks
- (2) The minimum depth of a porch shall be 7 feet with a minimum area of 70 S.F.
- (3) If front entry garages are adjacent there shall be a minimum of 3' garage face offset with the adjacent garage
- (4) Side yard slopes may not encroach more than 50% into side yard setback areas
- (5) Minimum 8' setback from the back of the sidewalk
- (6) Side setback measured from the property line at back of sidewalk excluding corner intersection cutoffs
- (7) Second story on corner lots is 15' average
- (8) Articulation on rear elevations of alley loaded projects to be City approved
- (9) Except at corner lot
- (10) Stepped walls allowed

SPECIFIC PLAN

Conceptual Product Distribution

The New Model Colony • Ontario, California

Exhibit 26 - Conceptual Product Distribution

5.4.3 Low Density Residential Permitted and Conditional Uses

This category includes the development of single family detached dwelling units. The purpose of the residential standards for single family detached housing is to establish the minimum criteria for the development of these product types on individual lots within the neighborhoods specified within the plan area.

A. Permitted Uses

1. Single family detached dwellings including live/work units and their accessory uses
2. Single family attached dwellings
3. Public or private parks
4. Recreational buildings including swimming pool
5. Child day care facilities serving up to seven (7) children (per State guidelines)
6. Schools
7. Accessory uses to include the following:
 - a. Garages
 - b. Granny Flats (i.e. Second Dwelling Units, in accordance the City's Zoning Code)
 - c. Home occupations
 - d. Swimming pools, spas, sports courts, and other similar outdoor recreational amenities
 - e. Patios and patio covers
 - f. Storage, garden structures, cabanas, and greenhouses
 - g. Monument signs
 - h. Temporary uses such as model home and subdivision sales trailers, temporary construction parking, offices, and facilities, real estate signs, signage indicating future development and directional signage
 - i. Second story additions to single family dwelling units

B. Conditionally Permitted Uses

1. Places of worship including but not limited to churches and synagogues
2. Child day care facilities serving eight (8) to 14 children (per State guidelines)

5.4.4 Low Medium Density Residential Permitted and Conditional Uses

This category includes the development of single-family and multi-family attached type dwelling units.

A. Permitted Uses

1. Single family detached dwellings including Cluster SFD and Mews SFD, single-family attached and multi-family attached dwellings
2. Public or private parks
3. Recreational buildings including swimming pool
4. Child day care facilities serving up to seven (7) children (per State guidelines)
5. Schools
6. Accessory uses to include the following:
 - a. Garages
 - b. Granny Flats (i.e. Second Dwelling Units, in accordance with City Zoning Code)
 - c. Home occupations
 - d. Swimming pools, spas, tennis courts, sports courts, and other similar outdoor recreational amenities
 - e. Patios and patio covers
 - f. Mailboxes
 - g. Community center buildings
 - h. Maintenance storage buildings
 - i. Monument signage
 - j. Temporary uses such as model units, sales offices, and subdivision sales trailers, temporary construction offices and facilities, real estate signs, signage indicating future
 - k. Second story additions to single dwelling units

B. Conditionally Permitted Uses

1. Places of worship including but not limited to churches and synagogues
2. Child day care facilities serving eight (8) to 14 children (per State guidelines)

5.4.5 Medium Density Residential Permitted and Conditional Uses

This category includes the development of single-family and multi-family attached type dwelling units.

C. Permitted Uses

1. Single family attached and multi-family attached dwellings
2. Public or private parks
3. Recreational buildings including swimming pool
4. Child day care facilities serving up to seven (7) children (per State guidelines)
5. Schools
6. Accessory uses to include the following:
 - a. Garages
 - b. Home occupations
 - c. Swimming pools, spas, tennis courts, sports courts, and other similar outdoor recreational amenities
 - d. Patios and patio covers
 - e. Mailboxes
 - f. Community center buildings
 - g. Maintenance storage buildings
 - h. Monument signage
 - i. Temporary uses such as model units, sales offices, and subdivision sales trailers, temporary construction offices and facilities, real estate signs, signage indicating future

B. Conditionally Permitted Uses

1. Places of worship including but not limited to churches and synagogues
2. Child day care facilities serving eight (8) to 14 children (per State guidelines)
3. Age-restricted/Senior Housing and apartments (MDR only)

5.4.6 Commercial Development Standards

Minimum Lot Area

Minimum lot size shall be large enough to accommodate the proposed use and meet all Development Standards as specified within the Specific Plan. Minimum site area shall be 4 acres; however, the site area may be less when developed as part of an integrated commercial center.

Building Setbacks

Building setbacks shall be determined by the hierarchy of streets (major arterial and local streets) and measured from PL for local streets and RW for Major Arterials. All setback areas are to be landscaped. These landscape area setbacks are:

From Ontario Ranch Road Right-Of-Way	35 feet
From Haven Avenue Right-Of-Way	14 feet
Archibald Avenue Right-Of-Way	19 feet
From Private or Local Street (from required 5' min. sidewalk)	10 feet
From Interior Property Line	0 feet
From Interior Property Line Adjacent to Residential District	25 feet (if adjacent to loading areas)

Maximum Development Floor Area Ratio (FAR) shall be 0.35.

Maximum Height shall be 35 feet, excluding architectural projections and focal elements such as towers and cupolas.

Loading Areas

All loading areas shall be screened from adjacent public streets, residential and open space use through the use of landscaping, earthen berms, and/or decorative walls or fencing. All storage including cartons, containers, materials, or trash shall be shielded from view within a building or area enclosed by a solid fence or wall not less than six feet in height.

Parking Setbacks

All parking setback areas are to be landscaped as follows:

From Ontario Ranch Road Right-Of-Way	35 feet
From Haven Avenue Right-Of-Way	14 feet
Archibald Avenue Right-Of-Way	19 feet
From Private or Local Street	10 feet
From Interior Property Line	5 feet
From Interior Property Line Adjacent to Residential District	5 feet

Wall and Fences

When a non-residential use adjoins a residential district, a 6-foot high decorative masonry wall shall be required at the interior side and/or rear property lines. Proposed walls in excess of 6 feet in height shall be designed to retain up to a maximum of 3 feet of earth. In no case, however shall a wall exceed an overall height of 9 feet (maximum 6-foot high wall on top of a maximum 3-foot height retaining wall).

5.4.7 Commercial Permitted and Conditional Uses

List of Permitted uses in the Commercial Zone:

- Administrative, Professional, and Other Offices
- Advertising Agency
- Animal Hospital/Veterinarian
- Antique Stores
- Art Galleries and Art Supply Store
- Auditoriums and Other Public Assembly Facilities
- Automotive Parts and Accessories Stores (Retail Sales Only)
- Automotive Services (i.e. tune-up, emission tests, batteries, etc. — no use of impact wrenches or other equipment that could create noise impacts)
- Bakery
- Banks, Credit Unions and other Depository Institutions
- Barber Shop and Beauty/Nail Salon
- Beauty Supply Store
- Book Stores
- Camera and Photographic Supply Store
- Catering establishments
- Charitable, Philanthropic, Service and other Non-Profit Organization Offices
- Cigar and other Tobacco Products Store
- Clothing and Accessory Stores
- Communications equipment — Refer to Development Code Section 9-1.3289
- Computer and Home Electronic Stores
- Computer, Home Electronics, and Small Home Appliances (when ancillary to another use)

Convenience Market (per Development Code Section 9-1.1305)

Dance/Studio (Instructional)

Delicatessen

Discount Variety Store

Dry Cleaners

Fast Food

Travel Agency
Alcoholic Beverage Sales
Ambulance Service (Office Only — No Storage of Vehicles)
Assisted Living/Congregate Care
Banks, Credit Unions and other Depository Institutions (with drive thru, see Development Ordinance Section 9-101305 D)
Banquet Facilities
Bar/Cocktail Lounge
Billiard Parlor/Pool Hall
Bowling Alley
Building Materials and Garden Supply
Car Wash — Full
Car Wash Self Service (Ancillary)
Charitable Distribution Services (i.e. food banks, etc.)
Check Cashing, Check/Payday Advance
Church
Commercial Day care
Convalescent Care Facility (w/continuous skilled nursing care)
Exterminating Service per Development Ordinance Section 9-1.1305 E
Fast Food with Drive-through (per Development Code, Section 9-10305D)
Funeral Parlor, Mortuary
Gas Stations (per Section 9-1.1305 G)
Health Club Gymnasium — over 2,000 square feet
Home Appliance Store

Liquor Store
Live Entertainment
Pawnshop/Pawnbroker
Pharmacies and Drug Stores with drive thru facilities
Simulated Shooting Games (Indoor)
Skating Rink
Substance Abuse Clinics/Facilities
Theater
Tire Stores
Video/Electronic Game Arcades (per Development Code Section 9-101305V)
Vocational/Trade Schools

5.5 Maintenance

The public and private improvements constructed within The Avenue Specific Plan will be maintained through a combination of public and private entities as described below and in Table 4, "Maintenance Responsibility Matrix".

5.5.1 Public Maintenance

1. All residential development areas will be dedicated as public streets (excluding ~~alley private drive~~ ways) to the City of Ontario and will be maintained by the City.
2. The SCE Corridor Trail within the SCE owned property will be constructed by the developers of the Specific Plan Area and maintained by the City.
3. The City will maintain landscaping of master-planned arterial streets and "curb-to-curb" on internal streets through the creation of an Operations and Maintenance Community Facilities District. Parkway improvements within the right-of-way of residential areas along interior streets and ~~alleys~~ **private drives** shall be maintained by Homeowners Associations. Parkway improvements along interior streets and driveways within the retail and commercial center shall be maintained by the property owners of each respective center.
4. Public storm drain, sewer, and water easements shall be dedicated to the City as deemed necessary by the City.
5. All on-site water, sewer, and storm drains within public streets or easements dedicated to the City shall be constructed by the developer and, upon acceptance, shall be maintained by the City.
6. Off-site infrastructure improvements such as water, sewer and storm drain facilities, will be constructed/installed by the developer and maintained by the City.
7. During the course of maintenance of public utilities (including storm drain) within private and public streets, the City will pave the streets and restore landscaping per City standards. Restoration of any enhancements above and beyond City standards, including but not limited to architectural, hardscaping and landscaping enhancements shall be the responsibility of the HOA or other entity maintaining those enhancements. This applies to all areas where public utilities are located including but not limited to public and private streets, gated communities, ~~alleys~~ **private drives**, etc.

8. Project Financing – The financing of construction, operation, and maintenance of public improvements and facilities (“the facilities”), and public services will include funding through a combination of financing mechanisms. Final determination as to the facilities to be constructed and as maintenance responsibilities, whether publicly or privately maintained, will be made prior to recordation of the final maps. In order for the project to be fiscally self-sufficient, the following financing options can be considered for implementation:

Facilities and Services

- Private capital investment for the construction of facilities.
- Community Facilities District (CFD) established pursuant to the Mello-Roos Community Facilities District Act of 1982, or other special district, to provide funding for the construction of a variety of public facilities and the provision of public services.

Operation and Maintenance

- By individual private property owner.
- By private, Property Owners or Home Owners Association.
- By Community Facilities District (CFD) established pursuant to the Mello-Roos Community Facilities District Act of 1982, or other special district.

5.5.2 Private Maintenance

A Master Homeowner association will be established for the maintenance of common area landscape improvements within the residential portion of The Avenue Specific Plan. Private improvements to be maintained by the homeowner association include:

- Private alleys and adjacent landscaping within the residential development areas
- Courts, parkways and landscaping within the residential areas
- Streets and Landscape areas that have architectural enhancements
- Walkways and common areas distinct to individual residential types and neighborhoods
- Recreational facilities including the country market
- Internal slopes fronting streets and slope areas in the rear of homes
- All internal open spaces, parks, and common areas at neighborhood entries
- Drives and on-site circulation within the retail and commercial areas

5.5.3 Maintenance Responsibility

Table 4 - Maintenance Responsibility Matrix

	City and/or Special District	Private Homeowners Association or Property Owners Association	Private Homeowners	Utility Entity
Master Plan Roadways (Ontario Ranch Road, Haven, Schaefer, Hellman)	X			
Interior Public Streets - Curb to Curb (Primary Entry St., Secondary Entry Streets, Neighborhood Streets)	X			
Traffic Signals and Street Lights in the public street right-of-way	X			
Traffic Control Signs	X			
Alleys including pavement area improvements between curb improvements		X		
Interior public streets-behind the curb improvements (sidewalk, parkway and monument signs)		X		
Parkways and Neighborhood Edges of Master Plan Roadways	X			
Off-site and on-site public water, sewer and storm drain improvements (excluding laterals) (Only those facilities in public roads and those in private streets within public utilities easements that meet public improvement design criteria) ⁽¹⁾	X			
On-site water, sewer, and storm drain improvements (improvements that are: private, laterals, and lines behind meters and/or DCDAs, improvements serving only one lot/parcel, not within public or private roads, not within public utility easements, or not meeting public improvement design criteria)		X	X	
Private Recreation Areas		X		
Pocket Parks		X		
Linear Parks		X		
Community Trail (SCE Corridor Trail)	X			
Front Yard/Corner Streetside Landscaping Areas (LDR)			X	
Front Yard/Corner Streetside Landscaping Areas (MDR)		X		
Private Interior Yard Walls		X	X	
Community Theme Wall (Outside Face for Graffiti Removal and Paint)	X

	City and/or Special District	Private Homeowners Association or Property Owners Association	Private Homeowners	Utility Entity
Community Theme Wall on Master Planned Roadways: Surface (interior) opposite streetside (Structural Integrity and Face Repair)		X		
Interior Tract Graffiti Removal		X		
Community/Neighborhood Entries (within the right-of-way)	X			
Parkways and Neighborhood Edge of all Master Plan Roadways	X			
Neighborhood Edge on all non-Master Plan Roadways		X		
Parkways of all Interior Project Streets (Including Landscaping, Medians, and Sidewalks) ⁽²⁾		X		
Alley Landscaping and Lighting		X		
Monument Signs (within Neighborhood edges on Master Plan Roadways)		X		
Monument Signs within tract entry		X		
Electricity and Natural Gas				X
Communications Systems	X			X
Police and Fire	X			
Fiber Optic Conduit (in NMC streets)	X			
Fiber Optic Conduit (in-tract streets)	X			
NPDES Facilities (off-site)/W.Q.M.P ⁽¹⁾	X			

⁽¹⁾ Only those facilities in public roads or easements

⁽²⁾ Only those facilities on private property

⁽³⁾ Including restoration work following public street repairs

5.6 Modifications and Plan Amendment Process

5.6.1 Minor Modifications

The following constitute minor modifications to The Avenue Specific Plan, not requiring a Specific Plan Amendment, and are subject to review and approval by the Zoning Administrator. The Zoning Administrator shall have the discretion to refer any such request for modification to the Planning Commission or the City Council.

- A. Change in utility and/or public service provider
- B. Adjustment of a neighborhood boundary provided the total acreage of the affected area does not increase or decrease by more than 15% the total acreage stated in the approved The Avenue Specific Plan
- C. Minor changes to landscape materials, wall materials, wall alignment, entry design, and streetscape design which are consistent with the conceptual design set forth in the design guidelines contained within The Avenue Specific Plan
- D. Minor changes to the Design Guidelines, which are intended to be conceptual in nature only, and are intended to be flexible in implementation
- E. Other modifications of a similar nature to those listed above, which are deemed minor by the Director, which are in keeping with the purpose and intent of the approved The Avenue Specific Plan and which are in conformance with the General Plan
- F. The Avenue Specific Plan land use plan allocates density to each Planning Area. Variations in allocation of density between the Planning Areas of The Avenue Specific Plan is permitted provided the variation does not exceed a net of 15% and the maximum dwelling unit count of 2,875 units established for the Specific Plan is not exceeded.

5.6.2 Specific Plan Amendments

Amendments to The Avenue Specific Plan may be requested by the applicant or by the City at any time pursuant to Section 65453(a) of the Government Code. Amendments shall be processed pursuant to the provisions of the Government Code for Specific Plan Amendments. In the event the proposed amendment requires supplemental environmental analysis pursuant to the California Environmental Quality Act (CEQA), the applicant(s) will be responsible for preparing the necessary CEQA documentation.

5.7 Airport Land Use Compatibility Planning Consistency

All development proposals or Specific Plan Amendments are required to be consistent with the Airport Land Use Compatibility Plans of Chino Airport and Ontario International Airport. The Project Site is located within the Airport Influence Areas of Chino Airport and Ontario International Airport (ONT). The ALUCP for ONT was adopted in April of 2011 and the project site is located outside noise and safety impact zones but is located within the Real Estate Transaction Disclosure zone due to overflight and does not place development restrictions on the property but does require disclosure to new property owners.

The Business and Professions Code Section 11010 and Civil Code Sections 1102.6, 1103.4, and 1353 require that, as part of many residential real estate transactions, information be disclosed regarding whether the property is situated within an AIA. The Business and Professions Code applies the disclosure requirement to the sale or lease of newly subdivided lands and condominium conversions and to the sale of certain existing residential property. The Civil Code applies the disclosure requirement to existing residential property transfers only when certain natural conditions (earthquake, fire, or flood hazards) warrant disclosure. State Law provides the following disclosure language:

“NOTICE OF AIRPORT IN VICINITY: This property is presently located in the vicinity of an airport, within what is known as an airport influence area. For that reason, the property may be subject to some of the annoyances or inconveniences associated with proximity to airport operations (for example: noise, vibration, or odors).

Individual sensitivities to those annoyances can vary from person to person. You may wish to consider what airport annoyances, if any, are associated with the property before you complete your purchase and determine whether they are acceptable to you.”

Section 6 - Design Guidelines

6.1 Introduction

All residential master planned communities seek to create a unique identity for their residents and the surrounding community. There are four main components in developing this character for The Avenue. These include:

- A strong, well defined and memorable site plan, emphasizing **La Avenida Drive** streetscape as a defining element
- Appropriate community amenities and facility design
- Attractive and timeless landscape architecture
- Complementary and purely themed residential architectural styles

In addition to quality site planning and facility design, the residential architectural design concept for The Avenue seeks to blend the traditional architectural styles found in the Pacific Southwest with contemporary lifestyles, building methods and technologies. The specific styles selected for this community include Spanish, Bungalow, California Ranch, Monterey and Cottage. The design aspects of each of these styles will be further described in the following guidelines.

As the individual architectural styles for each home are developed for the various neighborhoods, it is important that the underlying lifestyle defined by each architectural style is considered in the development of the floor plans to help maintain architectural authenticity. The creation of successful floor plans and elevations will always be a function of good design, coupled with the incorporation of contemporary lifestyles and building standards.

Builders may submit home designs using alternative architectural styles to those listed, provided they are consistent with the Specific Plan, and appropriate to the region, environment, and setting.

The architectural character of The Avenue should provide:

- A unique and interesting architectural heritage as the community develops
- Compatible and complementary styles, colors, materials and detailing
- Massing, setbacks and articulation which are appropriate and fundamentally sound
- Historical relevance and timelessness
- Adaptable and flexible to changing market desires

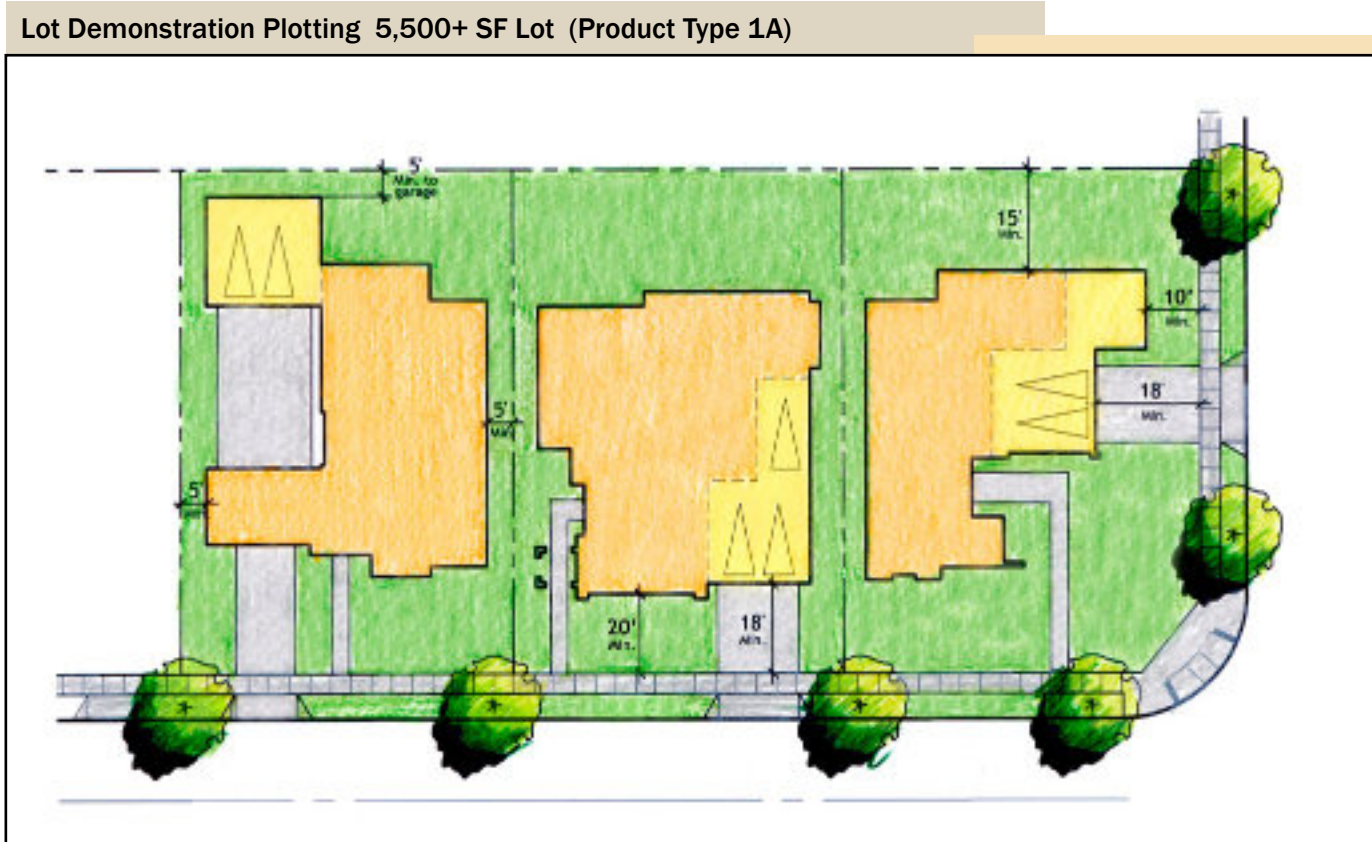

The following design guidelines address site design issues, and key elements of each architectural style.

6.2 Site Planning and Design

The first critical aspect of creating an attractive and successful residential community is proper site planning. Important components of site planning include building setbacks and plotting, architectural massing and articulation, roof forms and garage placement. These components must be successfully addressed regardless of the architectural styles selected

6.2.1 Setbacks and Plotting

The relationship of each building to the property lines, street frontages and to adjacent buildings should be carefully considered within each neighborhood. In addition to the minimum setback standards, variable front and rear setbacks should be incorporated into the plotting of each product type. Corner lots and critical edge conditions shall have increased setbacks to soften the impact of the architecture on the streetscape. These plot prototypes are for illustrative purposes. The Residential Development Standards (Table 3a-3j) will serve as zoning for the project upon adoption of The Avenue Specific Plan.

Lot Demonstration Plotting 4,250-5,775 SF Lot (Product Type 1B)

Lot Demonstration Plotting 3,200 - 5,600 SF Lot (Product Type 1C)

Lot Demonstration Plotting 0 ,000 - 0,000 SF Lot (Product Type 1D) - Public Street

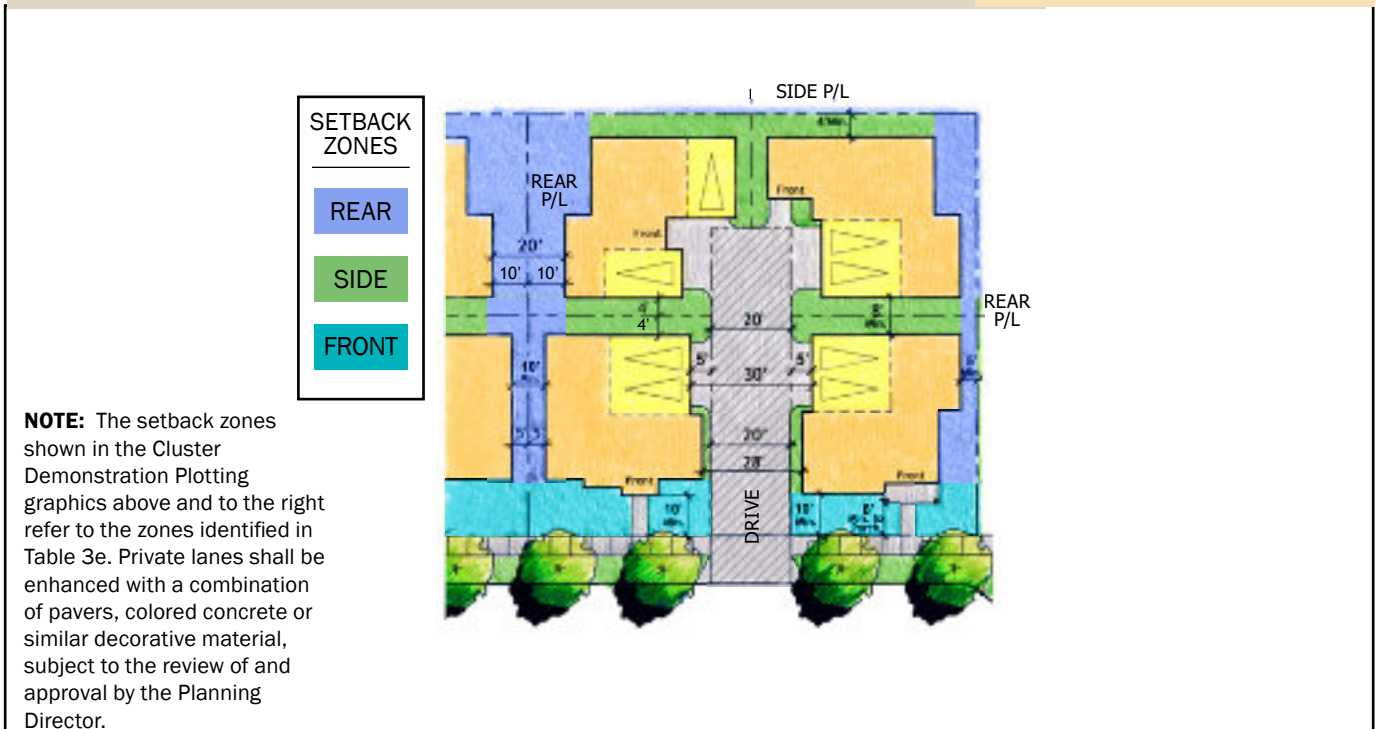

Lot Demonstration Plotting 0 ,000 - 0,000 SF Lot (Product Type 1D) - Private Drive

Lot Demonstration Plotting 2,380 - 3,600 SF Lot (Product Type 2)

SFD 4/6 Cluster Demonstration Plotting (Product Type 3a)

SFD 4/6 Cluster Demonstration Plotting (Product Type 3b)

SFD 4/6 Mews/Cluster Demonstration Plotting (Product Type 3c)

SFD 4/8 Mews Demonstration Plotting (Product Type 3d)

NOTE: The setback zones shown in the Cluster Demonstration Plotting graphics above and to the right refer to the zones identified in Table 3e. Private lanes shall be enhanced with a combination of pavers, colored concrete or similar decorative material, subject to the review of and approval by the Planning Director.

Duplex Demonstration Plotting (Product Type 4)

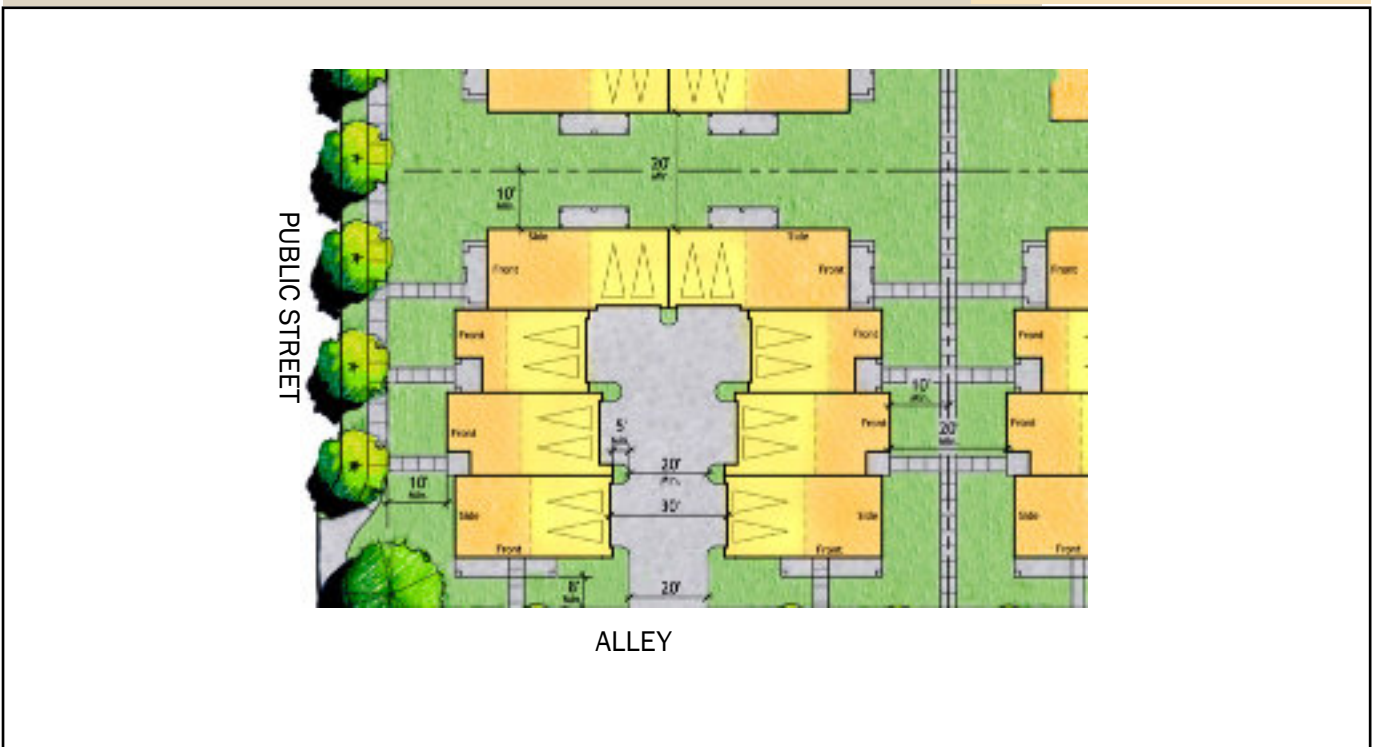

Triplex Demonstration Plotting (Product Type 5)

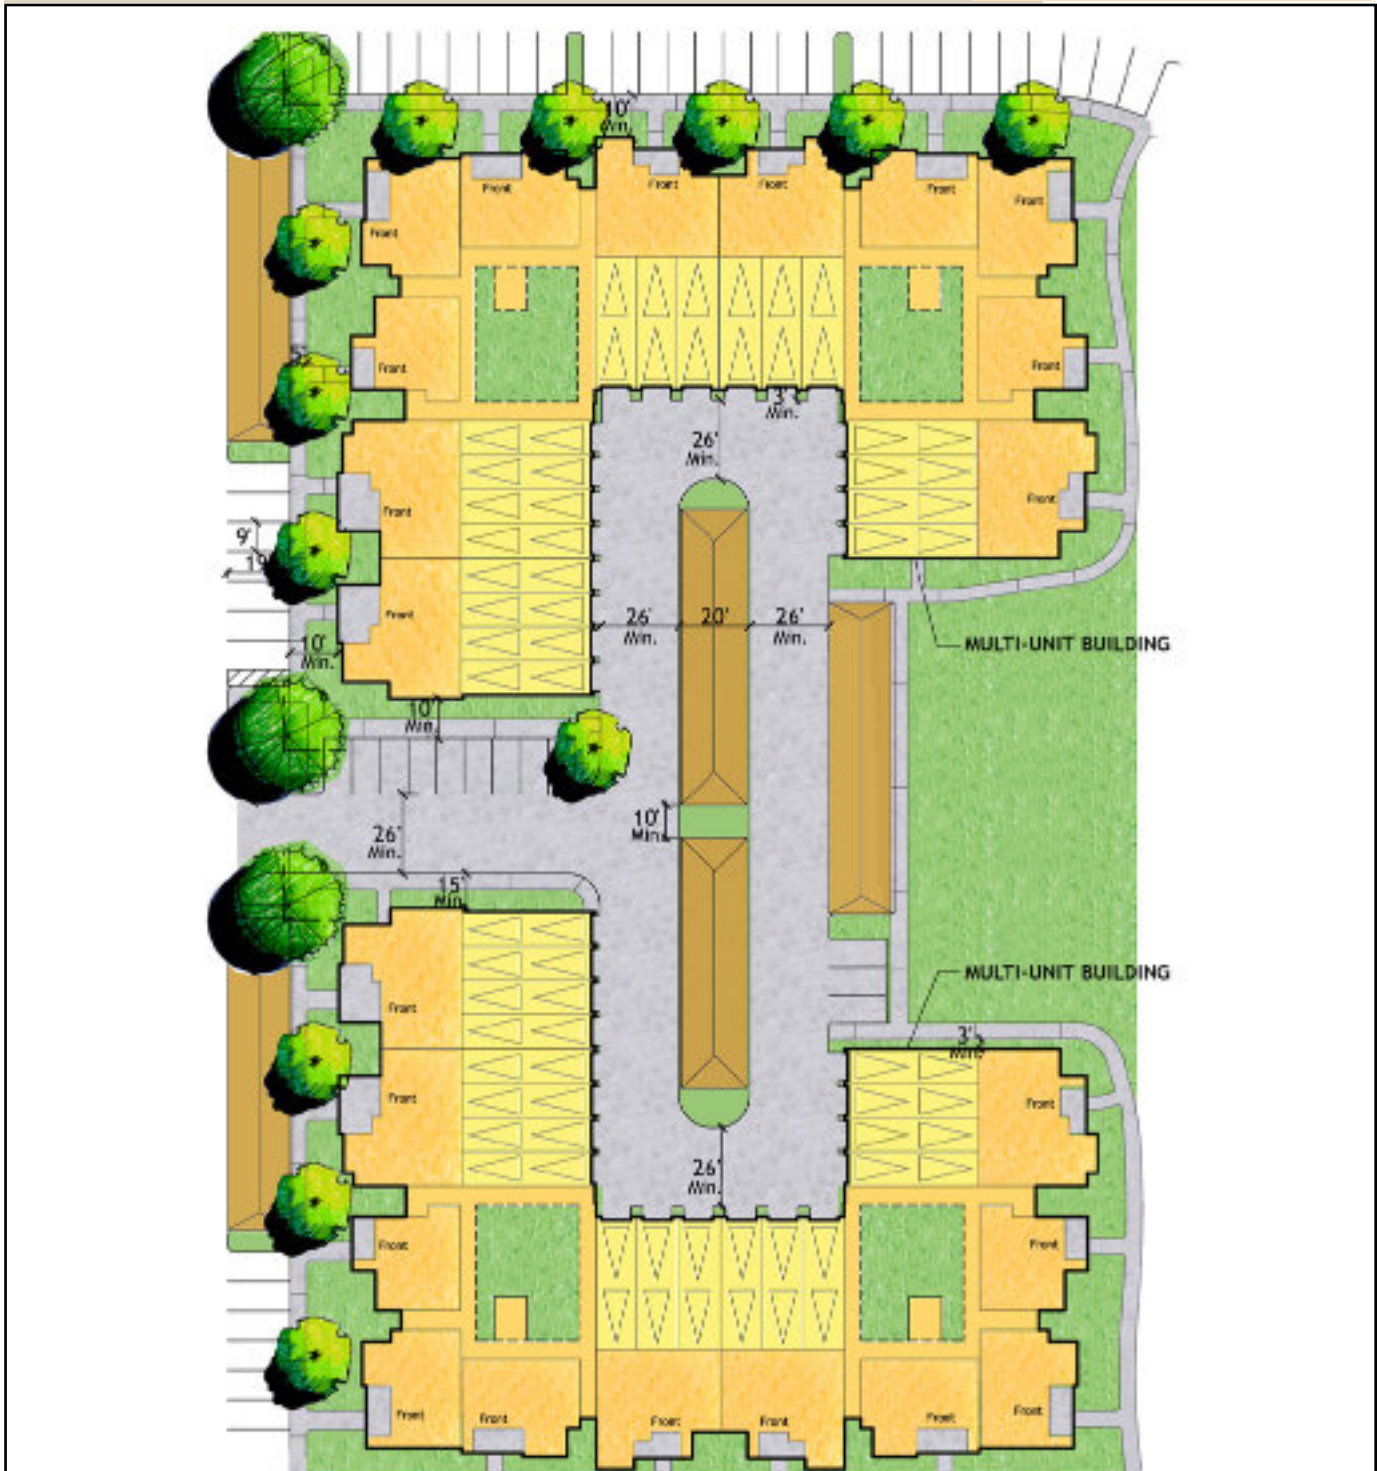

Rowtown Demonstration Plotting (Product Type 6)

Autocourt Demonstration Plotting (Product Type 7)

Autocourt (Greater than 20 DU/Ac) Demonstration Plotting (Product Type 8)

Parking shown is for conceptual purposes only. Tandem parking standards currently under review by the City of Ontario.

6.2.2 Architectural Massing

Building volumes shall be appropriately scaled to the individual lot sizes. The composition of the building mass shall include the incorporation of single-story elements into two-story buildings, variable setbacks along building elevations for porches, living and garage areas, the minimization of shear two-story façades, and the development of four-sided elevations through articulation and detailing.

Garage and Roof Articulation

Autocourt - Garage and Roof Articulation with Single Story Elements

6.2.3 Corner Home Placement

Special attention must be made to the treatment of architectural massing on corner lots and critical edge conditions.

Architectural elements such as porches, single story elevations, special façade materials and architectural fenestration should wrap around from front to side in these conditions whenever possible.

Wrap Around Porch and Architecture with Side Entry

Wrap Around Porch and Architecture with Side Entry

6.2.4 Roof Lines, Forms

Roof forms are critical in creating interest to the building mass. Roof forms and material finishes help blend the structures into the landscape through shadow patterns, texture, color variations and visual interruption of vertical walls and planes.

The roof forms, lines and ridges should be fenestrated and varied. Architectural features, roof intersections and roof pitches consistent with each style should be incorporated whenever possible.

Side Entry with Wrap Around Architecture

6.2.5 Garage Placement

The location, configuration and orientation of the garage on each lot are an important design element, both for the composition of the dwelling and its contribution to the streetscape.

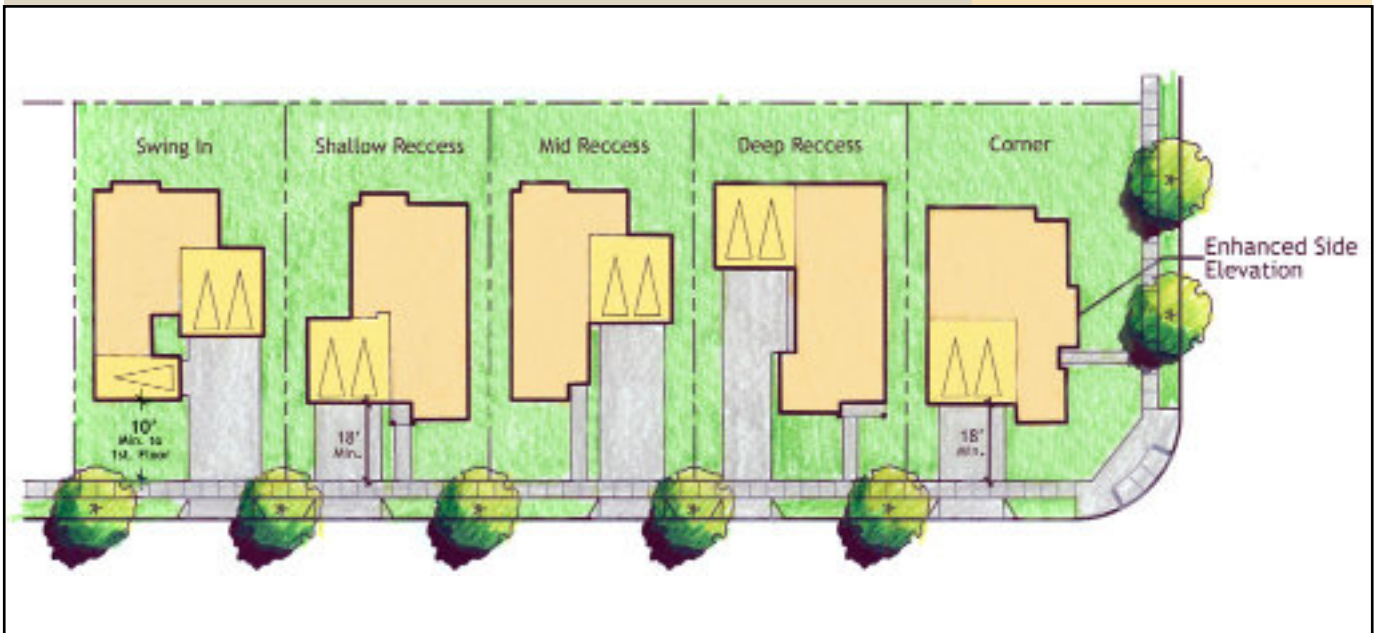

De-emphasizing the garage is important to community design. The goal is to emphasize the living areas of the home as they address the street. Placing living areas forward in lieu of a garage dominant front elevation encourages “eyes on the street” for neighborhood safety and security while establishing neighborhood orientation to the pedestrian as opposed to the automobile. Garage door patterns are encouraged to be varied among elevation types, and to reinforce the architectural theme of the dwelling.

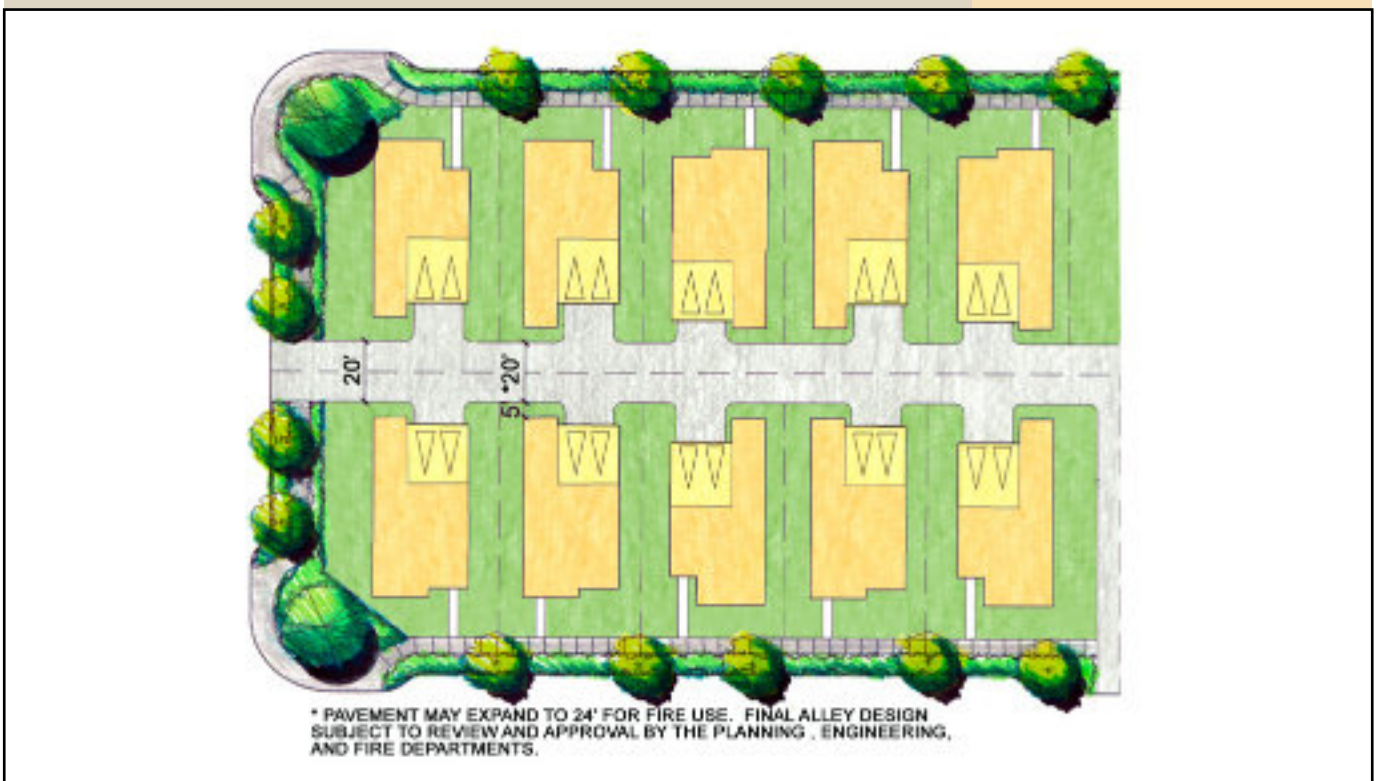

Side Entry with Wrap Around Architecture

The number of homes with the shallow recess garage condition should be limited to 25% of the total number of units in each builder’s plan package and shall be setback a minimum of 18-feet from property line.

Deep Recessed

Two Car Swing-In

6.3 Miscellaneous Architectural Elements

Each selected style of architecture has attributes specific to that style. There are architectural features that are particularly important from both a standpoint of helping define the architectural style and from providing lifestyle benefits. These items include porches, trellises and arbors and balconies.

Wrap Around Style

6.3.1 Porches

Sufficiently sized porches (minimum depth: 7', minimum area: 70 square feet) become key elements in creating active, social neighborhood, through the visual and conversational interaction that occurs between these elements and the streetscape.

They provide interest, shadow lines and architectural fenestration to the building.

Porches should be provided for various homes in each product area whenever feasible and should have the following attributes:

- Porches should be integrated into the architectural elevation and floor plan consistent with the particular design style
- At corner conditions, porches should wrap around or be designed into two sides of the building
- Porches should be of sufficient depth to allow chair and table placement (seven foot minimum depth at ground level is preferred but can be modified if necessary at side elevations)
- Porches should relate to the streetscape consistent with traditional design aspects

Stucco Detailing

6.3.2 Balconies

Balconies are part of many styles of architecture and can range in size from small decorative balustrades to large inviting verandas. Balconies are more flexible in size than porches and can serve many uses from more decorative, offering visual detail and architectural fenestration to accessible congregation spaces which become important outdoor rooms and overlooks.

Balconies are encouraged elements of the architecture but should adhere to the following principals:

- Balcony design and detailing should be consistent with the architectural style
- Balcony placement is encouraged towards the front of homes whenever feasible
- Balcony placement at rear or sides of homes should consider site plan and adjacent lot privacy issues

Wood Detailing

Balcony on a Multi-Family Building

*Wood Detailing*

6.3.3 Window Treatments

Window treatment is an important element in defining architectural styles and providing detail to buildings. Whether it is recessed or protruding, multi-paned or single paned, rectangular or arched, framed or not, all make a difference in the building character. The window treatment should be consistent with the style of architecture.

Window sizing and scale must be consistent with the architectural enframing. Use of shutters as window detailing and design style elements is encouraged but shutters should be properly sized to the window opening for authenticity.

*Iron Detailing**Recessed Window Detail**Window Surround*

6.3.4 Trellises and Arbors

Trellises and arbors are valuable architectural features for softening building façades, extending indoor rooms into the exterior landscape, and creating shelter from harsh sun and glare. Trellises are also encouraged in the design of each building but must also be consistent with the architectural style, be appropriately sized and scaled, and be constructed of material that will survive the harsh inland sun and hot, dry wind conditions.

Wood Trellis Over Entry Drive

6.4 Architectural Styles and Elements

The architectural character of The Avenue shall consist of the traditional styles found in the Pacific Southwest. These styles were developed over time as reactions to prevailing climate, locally available material, historical tradition and/ or architectural trends of the early twentieth century. Over time, these styles have often become blended in part with new interpretations and in response to modern technologies. While the community infrastructure, architecture, site planning, land design, and landscape architecture are the key factors in creating a unique and special place for The Avenue, the interpretation and execution of the individual architectural styles and residential product types will provide lasting value.

Simple Iron Trellis of Driveway

Each style has aspects relating to massing, articulation, roof form, and garage placement. The development of these styles in an appropriate manner requires incorporation of specific elements of each style.

The chosen styles complement one another through overall scale, massing, proportions, details, and the ability to establish a charming architectural backdrop that will age gracefully over time. The materials and colors of these home styles shall complement the overall landscape design of the neighborhoods. Each style shall be developed appropriate to the region, and address the needs and lifestyles of the residents.

Acceptable architecture styles for The Avenue homes include:

- Monterey
- Bungalow
- Spanish
- California Ranch
- Cottage
- Farmhouse
- Transitional

Note: Additional styles proposed by the homebuilder may be deemed acceptable by the City and Community Design Team.

The following guidelines have been developed by The Avenue Community Design Team in order to create a community with an appropriate diversity of architectural styles and design:

- A variety of styles and plans is encouraged
- The adjacent plotting of the same plan, either standard or reverse, should be discouraged
- A variety of plan orientations is encouraged
- No two adjacent homes shall utilize the same architectural styles

The styles on the following pages will provide the builder and their design consultants the tools to create architectural designs appropriate and authentic to each style.

6.4.1 Monterey

History and Character:

The Monterey style is a combination of Spanish Colonial construction methods and the basic two-story New England Colonial house.

Architects in the 1920's began to reintroduce the style and modify the elements to suit the period preferences. The signature cantilevered balcony on the front of the house may be a prelude to the porch that often surrounds or defines a private courtyard in the back of the house. The original houses used adobe wall construction. Detailing of the porches and the cornice is extremely simple. Rafters are often exposed, gable or hipped roofs are used, chimneys often anchor one end of the house, and flat paneled doors are used both on the ground floor and on the balcony, in addition to a more solid entry door.

General Attributes:

- Simple-box plan form
- Front-to-back gable roof
- Stucco finished walls
- Colonial-style windows with shutters and door trim
- Wrought iron or wood balcony railing
- Light exterior colors
- White or dark trim colors

Single Family

Autocourt Example

6.4.2 Bungalow

History and Character:

The Bungalow with its variations of the Craftsman style home evolved from the late 19th century American Arts and Crafts movement. These moderately detailed buildings are characterized by the use of hand-finished materials with a rusticated texture. Open porches, sloping roofs with deep overhangs, multiple gables, asymmetrical compositions, oversized first floor windows, expressive trim, rafters, brackets and porches characterize the Bungalow style.

General Attributes:

- Simple plan form massing and simple roof
- Intersecting gable roofs with overhang
- Stucco and/or horizontal siding
- Vertical multi-paned windows at front elevation
- Large picture window at front
- Porches with simple wood columns and railing
- Corbels
- White or dark stucco color
- White or dark color trim

The Avenue
SPECIFIC PLAN

6.4.3 Spanish

History and Character:

Spanish inspired homes began appearing at the turn of the 20th century in the form of the Mission Style, reflecting a loose adaptation of features often found in detailing from various influences, including Moorish and Spanish Colonial. Spanish Style is a catalog of styles unified by the order of arches, courtyards, strong form and mass, plain wall surfaces and tile roofs all derived from Mediterranean architectural styles. The Spanish style is most often characterized by an informal plan arrangement and massing. This informality reflects the natural composition of the farmhouses and small estates of Spain, which were not symmetrically composed.

General Attributes:

Some identifying features of this style are large distinctive (sometimes arched) windows on the front façade, red clay roofs and light colored stucco walls.

- Two story massing with one story element
- Simple hip or gable roof
- Barrel or 'S' shape concrete tile
- Stucco Finish
- Vertically hung multi-paned windows at front elevation
- Arched stucco column
- Light colors with dark trim
- Wrought iron accent

6.4.4 California Ranch

History and Character:

Reminiscent of the early ranchers and farmers of Southern California, the California Ranch Style was developed in response to their lifestyle, available materials and environmental considerations. The strong indoor/outdoor relationship is ideal for the temperature climate of the region and incorporates sliding glass doors, picture windows, terraces and secluded patios. These homes were influenced by Colonial, Spanish Colonial, Stick, Monterey, and Spanish Eclectic architecture; however, the detailing was simplified when adapted to the California Ranch Style.

General Attributes:

- Simple rectilinear form
- Gabled roof
- Long horizontal gable roofs
- Stucco or horizontal wood siding
- Simple column and railing at porches
- White or dark stucco colors
- White or dark color accent trim

The Avenue
SPECIFIC PLAN

ONTARIO, CALIFORNIA

The New Model Colony

6.4.5 Cottage

History and Character:

The Cottage style is based upon early twentieth century American interpretations of English architecture. The source for design originates from medieval English and French cottages, as well as from the country estates of Brittany and Normandy, larger manor homes, and rural village vernacular houses. The Cottage style captures a romantic and picturesque architecture, and American interpretations include houses with simple volumes most often with front facing gables that have steeply pitched roofs.

General Attributes:

- Asymmetrical massing
- Large simple roof planes
- Stucco finish
- Vertical windows
- Decorative stone or brick veneer
- White, off-white, light earth tone shades

6.4.6 Farmhouse

History and Character:

The Farmhouse style is based upon regional American interpretations of agrarian architecture. The source for design originates from rural residential homes in the early settlements in Midwestern and Southwestern areas of America. The Farmhouse style establishes a pastoral character, and recent interpretations include houses with simple building designs, gabled roof forms characterized by a moderate to steep pitch.

General Attributes:

- Simple rectangular massing
- Large simple roof planes
- Siding or Stucco building materials
- Vertical windows with decorative accent shutters
- Entry porches with low sloping shed roofs
- White or light earth tone shades with contrasting design elements

The Avenue
SPECIFIC PLAN

ONTARIO, CALIFORNIA

The New Model Colony

6.4.7 Transitional

History and Character:

The Transitional style is an interpretive style based upon historic European and American architecture. The design inspiration uses modern building forms and construction materials to develop more contemporary designs that reflect earlier period styles. The Transitional style incorporates clean lines and simplified architectural detailing to reinforce the intended character. This style includes interpretations of Spanish, Monterey, California Ranch and Farmhouse architecture.

General Attributes:

- Building massing to reinforce the intended period style
- Large simple roof planes, including asymmetrical roof forms and limited flat roofs.
- Horizontal siding or smooth stucco finish
- Square or vertically proportioned windows with simple or no trim details.
- Light exterior building shades with contrasting details such as wood trim/fascias, window frames, doors and simple window shutters.

6.5 Commercial Design Guidelines

6.5.1 Introduction

The Avenue Specific Plan area includes one (1) neighborhood center. This 10-acre center is at the southwest corner of **Ontario Ranch Road** and Haven Avenues. This neighborhood center will allow the homeowners of The Avenue access to shopping and employment opportunities nearby. Residents will have the ability to access services by foot, or ride their bicycles to work via pedestrian trails connecting the community to the neighborhood center.

Throughout the neighborhood center, appropriate landscaping, site planning and architectural design should be considered to create friendly and welcoming places to shop and work and shall continue the vision established in the residential community, including integrating pedestrian-friendly design.

In order to maintain the character of The Avenue, the neighborhood center is expected to be developed with a compatible and harmonious quality. These Avenue Commercial Design Guidelines will help direct the development of the area to enhance the pedestrian experience that positively contributes to the character of The Avenue Specific Plan area. These guidelines are not intended to be strictly enforced rules, but a tool in aiding the design process and are therefore general in nature. Developers of the neighborhood center will be required to submit their own supplemental design guidelines for City approval.

These commercial design guidelines are organized into the following:

- Site Planning
- Building Design
- Architectural Details
- Open Space and Landscaping

Pedestrian-friendly Commercial Retail

A. Guiding Principles

Guiding Principles for commercial design for The Avenue are:

Buildings should contribute to a qualitative nature of the overall neighborhood.

- Proper scale and proportions in massing and details should be used
- Pedestrian open spaces should be provided
- Massing and articulation should be varied
- Buildings shall be designed at a human-scale

Buildings should have an enduring quality.

- Design should draw inspiration from the rich and diverse Southern California architectural heritage
- Materials and colors typical to Southern California should be used
- Details and ornamentation should be authentic
- Design shall create an inviting place to shop and work

B. Review Process

The Commercial Design Guidelines are to be used as a general tool to guide the development of the neighborhood center within The Avenue. Final designs will be subject to the City of Ontario's approval. Additionally, more detailed design guidelines for each development will be required by the City prior to final approval. Refer to the City of Ontario Development Code or the Planning Department for further information regarding the review process.

6.5.2 Commercial Design Guidelines**C. Introduction**

The Neighborhood Center within The Avenue is intended to continue the pedestrian-friendly character established in the residential community. Appropriate site planning can de-emphasize the vehicle, creating a safe outdoor environment without ignoring the necessary needs of vehicular circulation. Through well executed planning, architecture, and landscape design, the Neighborhood Center can complement and integrate the residential community. Images within this section are for illustrative purposes and final plans must be submitted to, and approved by, the City.

Design shall create an inviting place to shop and work

D. Site Planning*Orientation*

Buildings should be oriented for optimal visibility from the street. Windows and entries should face the street avoiding blank walls dominating public views. Stores with entries not visible from the street may be oriented towards pedestrian open space and all primary entries should face onto a street or a connecting walkway.

Building clusterings are recommended to help define parking lot areas and encourage walking between stores. Building entries and storefronts should be positioned close to one another to reduce walking distances between them.

Driveways and Sidewalks

The site shall be provided with an adequate number of driveways to facilitate circulation and also reduce the traffic impact along the surrounding arterials. Pedestrian crossing distances should be minimized at driveways. All driveways and sidewalks shall be constructed per City Standards and to the satisfaction of the City Engineer. No decorative paving will be allowed in the public right of way unless otherwise approved by the City Engineer.

Street Frontage and Buildings

Streetside buildings, or those with no parking separating them from the street, should use windows and entry features to soften the building's appearance to the street.

Streetside Setbacks and Buildings

The sides of buildings along street edges shall be landscaped within the setback to soften the building's appearance as well as designed with windows or design elements. Refer to the City of Ontario Development Code for specific setback requirements.

Street Frontage and Parking Lots

Parking lots should generally be placed away from streets. Street frontages shall be broken up with buildings, landscaping, plazas, and other pedestrian features. Continuous parking lots along the street frontage should be avoided. Any parking along street edges shall be set back with a landscaped buffer which can be used to filter parking lot runoff. Continuous parking stalls shall be interrupted by landscaped islands no more than 10 stalls apart. Parking lots are encouraged to be interconnected rather than separated for each building. Separated parking lots encourage customers to drive from store to store.

Retail Orientation to Vehicular Travel Lanes and Parking

Service and Storage Areas

Loading docks, garages and storage areas are to be located behind or to the side of buildings siting onto secondary access and not primary streets. These features must be screened with walls and landscaping as much as possible from public view of streets, residences, pedestrians walkways and connecting trails. Loading docks and storage areas should not conflict with pedestrian walkways.

Refuse Containers, Utility and Mechanical Equipment

Refuse containers and equipment shall be easily accessed by service vehicles. They shall be screened from view of the streets, parking lots, and connecting walkways through roof forms, walls and/or landscaping.

Screening details should incorporate elements that are compatible to the architecture style of the buildings. Proper landscaping, including trellises, may also help to screen these elements. Equipment and enclosures shall not be located near pedestrian walkways. Roof-mounted equipment shall be screened by the roof/parapet.

Sidewalks

Sidewalks shall be located along natural pedestrian travel paths. Sidewalks should be a minimum of 6' wide along pedestrian pathways and a minimum of 8' wide along more heavily traveled commercial areas.

E. Building DesignMassing

With larger buildings, appropriate massing becomes more important to maintain the human-scale of the development and create a visually pleasing environment. Bay windows, stepped buildings, height changes and setback variations between stores help to break up large buildings as well as indicate entries and store locations to customers. Tower elements or monumental features are encouraged at focal points, such as corners, plazas, major entrances, or where walkways meet streets.

Architectural Massing and Materials

Varying setbacks along the front façade of buildings are recommended to create small outdoor public spaces for pedestrians to gather and sit.

Roof Forms

Hipped and gable roofs are encouraged. Roof pitches shall be compatible to the architectural style of the buildings. Flat roofs should vary in height and be accompanied by cornice, trim or other accent features.

Arcades and Awnings

Outdoor arcades along store fronts are encouraged over pedestrian walkways. Arcades may be used to connect separate buildings providing a more pleasing experience for pedestrians. Trellises or awnings may also be used to create a covered walkway to protect pedestrians from the sun and rain.

Entry Design

Building entries shall be prominent and easily identified. Various elements can be used to enhance the entry features including massing variation, materials and color change, change in roof form, and awnings. For smaller retail buildings, part of a cluster or strip, arcades, awnings and simple signage may be acceptable as entries.

No signs shall be placed in the public right-of-way and shall be in accordance with City standards regarding corner site distance.

Commercial Retail Massing, Material Change, Entry Design

Design Flexibility

Retail spaces exceeding 30,000 SF should be designed with the flexibility to be divisible into smaller retail spaces should future market demand change.

F. Architectural DetailsArchitectural Styles

A variety of compatible architectural styles should be used throughout the Neighborhood Center to create a sense of continuity and visual interest between the buildings. Related elements, such as trellises, planters, light-standards, windows, doors, etc. shall also adopt detailing that is compatible to the selected architectural styles. The selected styles of the Neighborhood Center do not necessarily need to be of any one of those specified for the residential community but shall be compatible with them.

Architectural styles shall derive from southern California and Ontario historic precedents. Modern and “high- tech” styles are not acceptable style choices. Acceptable styles generally respond to the region’s climate including such features as outdoor circulation, outdoor courtyards or plazas, recessed window frames, awnings, arcades, loggias, and trellises.

Building Wall Treatment

No wall should have a blank, uninterrupted length exceeding 20 feet without including one of the following:

- Change in texture
- Change in material
- Change in plane
- Lattice
- A tree or equivalent element

Façades that are visible from adjacent streets or walkways should display even greater visual interest by using architectural elements that break up the massing of large buildings, such as windows, arcades, awnings, porticos, and other architectural features.

Base And Top Treatments

Base and top treatments help to balance the “weight” of the building visually. Bases should appear to “ground” the building, while tops create a defined edge to the roofline. Possible treatment techniques are as follows:

Base:

- Natural materials
- Pre-cast materials
- Thicker walls
- Enriched landscaping with a mature height of at least 18”
- Other decorative, durable materials as approved by the City

Special materials, such as ceramic tile, granite and marble are encouraged at major entries.

Tops:

- Cornice treatments
- Stepped parapets
- Roof overhangs with brackets
- Textured materials

Colored “stripes” are not acceptable as the only treatment.

Exterior Materials

Recommended materials include, but are not limited to stucco, exterior plaster, brick, wood siding, tile, pre-cast concrete or stone. Exterior materials that appear pre-fabricated are not recommended. Selected materials and detailing should have an enduring appearance. Foam products should be avoided at the pedestrian level.

Roof Materials

Roofing materials that are generally acceptable include standing metal seam, concrete tile, tile and slate or slate-like materials. Asphalt or wood shingles are prohibited.

Colors

Color selection shall be consistent with the selected architecture style.

G. Commercial Site Landscape Requirements

The Neighborhood Center site will be developed both architecturally and through landscape treatments as an extension of The Avenue. The land plan encourages integration of the Neighborhood Center by providing for frontage on **Ontario Ranch Road** and Haven Avenues, while also incorporating a major community entry. Commercial uses appropriate to and compatible with The Avenue’s residential community will be encouraged.

Minimum Landscape Requirements

- Builder/developer shall refer to City of Ontario standards for the percentage of gross commercial site acreage required to be landscaped.
- All areas of the site not occupied by buildings, parking or otherwise utilized shall be landscaped with groundcover, turf or tree materials from the community plant list.
- Appropriate street trees should be utilized adjacent to street frontage integrating the site into the overall community setting.
- Side yard and rear service yard use areas should be screened with a combination of a six foot (6') wall and dense landscape buffer. Tubular steel fencing and gates should be used adjacent to interior residential streets to control access points.
- Accent tree entry planting should be incorporated at the site's vehicular access points.
- No shrubs higher than 3 feet and no tree canopy lower than 7 feet as to allow officers on patrol the ability to view the business, without obstructing their view.
- Plants by low-lying windows may have thorns as a deterrent.

Parking Areas

- Where a parking lot contains 10 or more parking spaces and is visible from a street, not less than 10-15% of the total area (excluding any perimeter landscaping), shall be landscaped. Such landscaping shall not be concentrated in any one location. A minimum of 50% of the plant material shall be canopy or shade trees and shrubs shall be 3' or less to provide clear visibility.
- All rows of parking spaces shall be provided with landscape islands at each row terminus to protect parked vehicles, ensure visibility, confine moving traffic to drive aisles and driveways, and provide space for landscaping. Within each row of parking spaces, landscape islands shall be placed to prevent more than 10 vehicles from being parked side-by-side in an abutting configuration. These landscape islands shall measure a minimum of five (5) feet in width, exclusive of curbs. Creation of large planting islands (tree groves) are encouraged as opposed to small pockets of individual trees.
- Planter islands for a single row of parking spaces shall be landscaped with at least one (1) tree and vegetative groundcover or turf. Planter islands for a double row of parking spaces shall contain not less than two (2) trees and vegetative groundcover or turf.
- Landscaped areas shall be delineated with a concrete curb which may have curb cuts to facilitate sheet flow runoff from parking lots to infiltrate the landscape planters.
- Parking area landscaping is required for the screening of large parking areas to limit their visual impact.
- When parking is located adjacent to a public street or interior residential street, a combination of landscaped berms and/or planting totaling three feet (3') high is to be used to screen views or parked cars.

Retail Plaza

- Wherever possible, pedestrian traffic should be separated from vehicular traffic by additional sidewalks. The parking lot should have crosswalks highlighted with decorative or varied texture paving.

H. Open Space and Landscaping

Site Accessories

Site accessories, such as recycling bins, bike racks, litter cans, planters, benches and transit shelters, should use materials and have an architectural character consistent with the overall project. These accessories should be graffiti-resistant with materials that are easy to clean and paint.

Connecting Walkways

Walkways throughout The Avenue's neighborhood center shall connect the various buildings to each other and to the sidewalks along adjacent arterials. Use of trellises, landscaping, seating areas and building placement adjacent to one another will encourage pedestrian activity within the center. A typical walkway shall be a minimum of 6' wide. In large parking lots, pedestrian walkways shall be provided within the median of at least one parking aisle for eight aisles of 20 stalls or more.

Pedestrian walkways that may also be used for emergency access must allow minimum clearance of 26' wide and 14' vertical clearance. Off-site connections will be provided from the neighborhood center to The Avenue's residential development.

Plazas

Plazas are encouraged to emphasize a pedestrian-friendly environment by creating locations within the Neighborhood Center that allow for people to gather. Plazas create a more inviting feeling for pedestrians, allowing them to feel safe from the vehicular-dominated parking lot. These outdoor places may include water features, landscaping, and other elements to create a comfortable place to sit. Plazas are encouraged where high levels of pedestrian activity are expected. Major entrances and nearby uses that allow for more interaction with the plaza such as delis, cafes, restaurants, bakeries and other food services are a few key examples.

Landscaping

Landscaping helps to soften the feel of the buildings and parking lot while enhancing the visual aspect of the site. The following landscaping techniques may be used:

1. Provide special landscaping treatment at all project and building entries.
2. Provide shade/canopy trees within parking areas.

Connecting Shaded Walkway

3. Use plants to define outdoor spaces such as along edges, outdoor plazas, or pathways between parking and building entrances.
4. Plantings shall provide a continuity of form across the entire project.

Outdoor Storage Areas

Outdoor storage areas should be incorporated into the design of a project to avoid visual impacts on the site. Outdoor storage areas shall be located away from the street, behind or to the side of buildings. Walls and landscaping shall be used to screen stored materials. Materials placed on palettes in front of buildings are not permitted.

Transit Shelters

Transit shelters should be incorporated into the design of neighborhood center. The design of transit related structures shall be integrated architecturally with the project through its color, materials and architectural style. Walkways shall be provided for easy accessibility by pedestrians moving to and from transit stops to the Neighborhood Center.

Fence and Wall Design

Chain-link fencing, barbed wire, corrugated metal fencing and tennis windscreens are not permitted. Fences and walls should be built with attractive, durable materials, including (but not limited to) wrought iron, textured concrete block, or formed concrete with reveals. Fences or walls should be consistent with architectural style, materials and designs used throughout the project.

Adjacent to residential areas walls and fences should not exceed a height of six feet (6') without being made of textured concrete block, interlocking "diamond" blocks, formed concrete with reveals, or similar materials to a maximum of eight feet (8') from grade.

Along streets, walls and fences should not exceed 36" in height and long expanses of uninterrupted fences and walls should be avoided. Use of openings, planter boxes, material changes, pilasters or posts are acceptable. Openings shall be provided to connect walkways directly to the street avoiding long, inconvenient walking paths. These pedestrian portals should be announced by pilasters, trellis, special landscaping, or other features.

Lighting

On-site lighting standards shall provide adequate illumination throughout the site during the nighttime hours. Lighting fixtures shall be designed to be compatible with the architectural styles selected for the project. All light standards should have an attractive base and top; overhead "cobrahead" standards are not permitted.

Along pedestrian walks, lighting fixtures should not exceed 12' in height and may include lighting within bollards. Pedestrian lighting shall provide appropriate illumination at a human scale without too much glare. Lighting within larger parking lots shall not exceed 25' in height providing enough visibility for customers

and employees to walk safely to their vehicles. The same bulb type shall be used for all parking lot and pedestrian lighting fixtures within the development. Service area lighting should be positioned so no bulbs can be seen from public view. Any street light within the public right-of-way shall be per City standards and to the satisfaction of the City Engineer.

G. Main Street Design Guidelines

Building Form and Massing:

- Building heights shall consist of a mix of building heights to provide visual interest.
- Tower elements and other vertical/prominent building features should be used to accentuate key elements such as building entries, pedestrian nodes, plazas or courtyards.
- Modulation and variation of building masses between adjacent buildings. Three and four story elevations should have varied massing and architecture, both in height and depth along the façade.

Materials and Colors:

- Materials and colors should be applied to create obvious and identifiable delineation between uses.
- All materials shall wrap architectural elements in their entirety, on primary elevations and where exposed to public spaces.
- Materials applied to any elevations shall turn the corner of a minimum of 8 feet, or to a logical termination point in relation to architectural features or massing.
- Rough cut, rustic appearances through the use of stone, brick, or siding is encouraged. Only finished materials are allowed, no exposed or untreated concrete masonry materials, unless consistent with the architectural style.

Exterior Design:

Building shall have articulation along auto and pedestrian corridors to generate pedestrian scaling and visual interest along the streetscape.

Main Street architecture, walkway and outdoor seating

- No single building shall have a singular wall plane or building height on the primary elevation.
- Front wall planes of commercial/mixed-use buildings, including retail/shop space veneer configurations, shall be articulated.
- Articulation can include, but is not limited to: 1) Vertical and horizontal offsets, 2) Color blocking and 3) appropriate use of detail elements.

- Mixed-use buildings, multi-tenant shop buildings with more than one ground floor tenant: no more than 66% of the front elevation may consist of a single contiguous wall plane on a tenant by tenant basis.

Primary exposures/elevations shall be appropriately detailed and articulated consistent with the architectural style and character of the development, as established by these guidelines.

- First-story pedestrian scale character and commercial retail exposure is crucial to business viability. In-line retail/commercial/service space shall be designed to optimization of space, exposure and aesthetic articulation.
- No adjacent mixed-use buildings shall have identical architectural appearance, or use of materials, or color palette unless pairing is integral feature of the project design theme.
- Projections, overhangs and recesses may be used to provide shadow articulations and scale to building elevations.
- At least 40% of ground floor of the primary exposure of an in-line/shop-space/free standing show use, excluding restaurants pads, shall be devoted to transparent windows and/or doors.

Main Street Edge (Section)

Roof Form and Slope:

Building height shall be varied to provide interest to the “Main Street” as viewed from community streets, open space, or other public spaces.

- Variety in roof forms, ridge heights and direction of gables is required.
- Although the majority of commercial roof area may be flat, visible elevations should be treated with sloping roof elements, including hips or gables forms (as appropriate to the primary architectural style) or parapet treatments.
- Architectural exposed roof materials shall be consist of flat, barrel, or “S” tile concrete or slate tiles or shakes. Metal roofs are permitted as feature elements consistent with the architectural style.

Main Street Edge (Plan)

Patio Dining:

Outdoor seating, in conjunction with business, shall be encouraged to enliven the street scene along commercial edges. Patio dining along retail storefronts have the dimensions:

- A minimum 20-foot area from building to parking area/drive aisle/interior Street. Patio seating area must have an internal minimum dimension of 5 feet clear, with an additional 2-foot buffer area (plant hedge or low fence).
- Minimum 6-foot sidewalk
- Minimum 5-foot landscape buffer or tree well
- Minimum 2-foot paving edge (Along parking area/drive aisle/interior Street).

Signage Guidelines:

A sign guideline section should be incorporated to promote an overall “sense of place” through signage that is architecturally integrated and visually interesting while conforming to applicable code requirements. The guidelines should include the following criteria:

- Signage Design Objectives
- General Sign Design and Limits
- Identity Signs
- Directional Signs
- Information Signs
- Regulation Signs
- Amenity Signs (Banners on light fixtures, etc..)
- Commercial, Retail and Residential Design Guidelines.
- Fabrication and Installation
- Sign Maintenance
- Sign Location
- Temporary Signs
- Sign Illumination

Landscape Design Guidelines:

To create a distinct and unified landscape character for “Main Street”, specific landscape design guidelines should be incorporated. The guidelines should include the following criteria:

- **Parking/Shopping Interface:** To provide a safe and comfortable pedestrian experience and reduce the presence of the parking area from shoppers with buffer planting.
- **Retail Plazas:** To provide active and passive pedestrian spaces that encourage user interaction; Fountains, stages, public art is encouraged for these spaces.
- To provide shaded and non shaded restaurant/outdoor eating and dining areas, use of awnings or umbrellas in west or south facing building exposures, planting as a way to provide a comfortable barrier and also allow for people watching (a 2-foot minimum plant barrier can be substituted for a rail).
- **Building Edge/Retail Shops:** Planting areas to create a buffer zone between the parking lot and promenade.

6.6 Landscape Design Guidelines

The Landscape Design Guidelines describe the key elements of the proposed landscape treatments within The Avenue Specific Plan area, which will develop over several years. These guidelines will help maintain a consistent design theme in a high quality, visually attractive and resource efficient framework.

The objectives of the Design Guidelines are:

- To provide guidance to developers and builders, as well as to engineers, architects, landscape architects and other professionals, as to the quality and character of the community and development of each planning area.
- To assure the City of Ontario that The Avenue will develop in accordance with the guidelines provided herein.
- To provide guidance to City decision makers in the review of future development projects in The Avenue.
- To provide guidance in formulating Covenants, Conditions and Restrictions.

These Landscape Design Guidelines are intended to be flexible and are, therefore, illustrative in nature. As a flexible document, the guidelines can, over time, accommodate changing community desires, economic conditions and the marketplace.

The General Landscape Guidelines address typical areas of importance and concern with regards to landscape architecture such as resource conservation, landscape lighting impacts and maintenance issues. The Plant Material Guidelines provide a specific list of plants compatible with the community design theme and the New Model Colony Streetscape Master Plan. The lists are organized by community elements and streetscape themes.

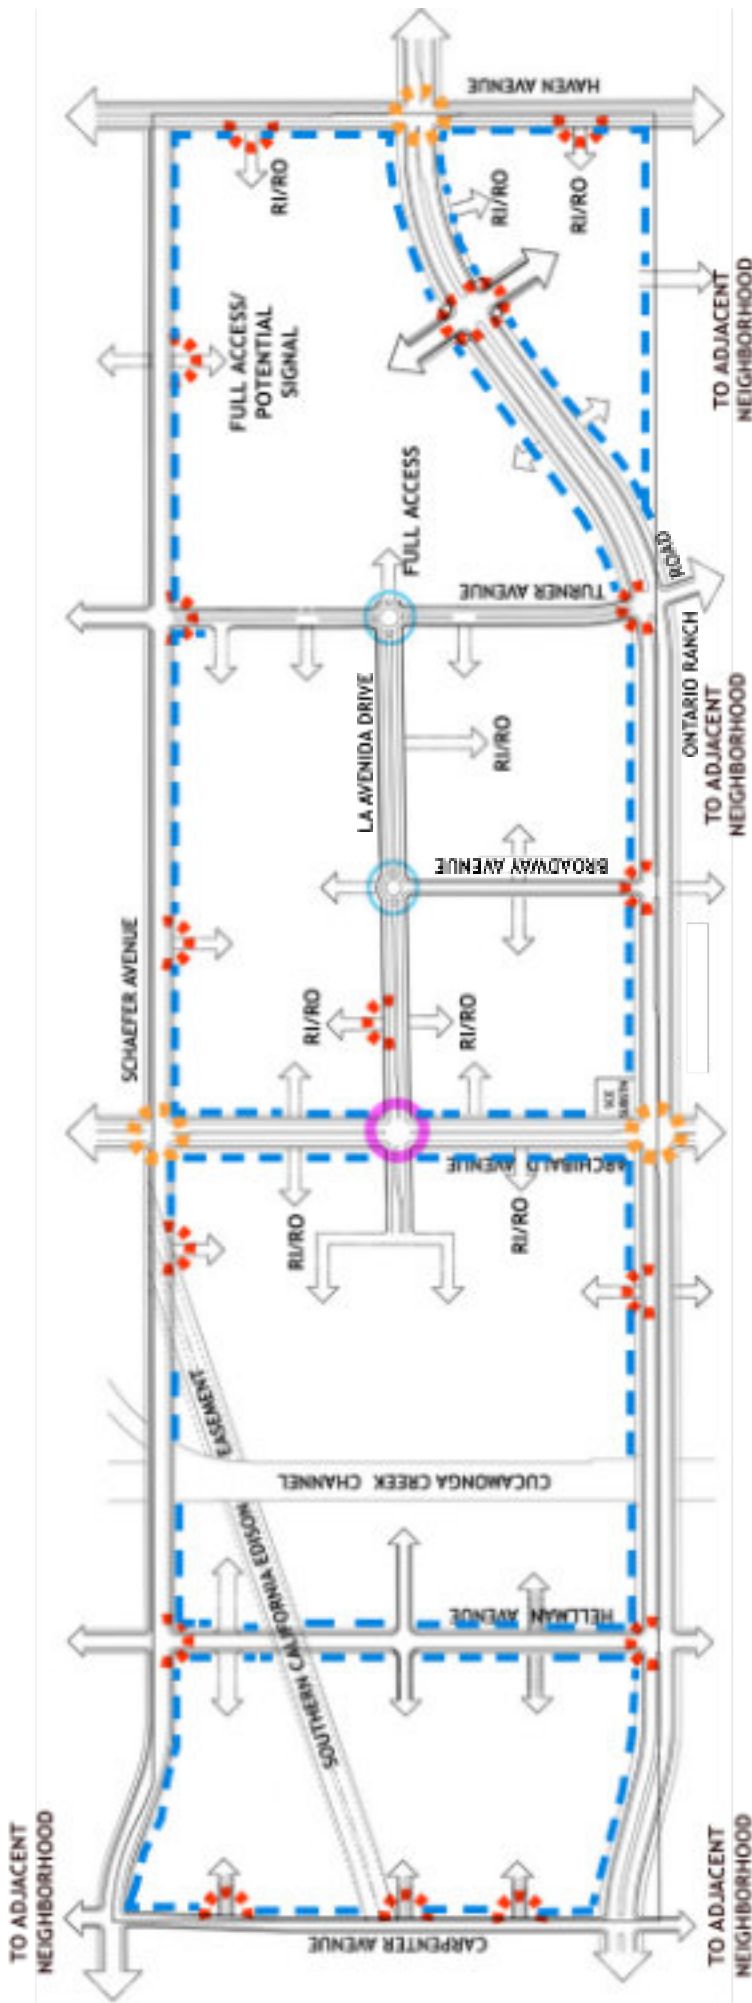

Although a great deal of specific design information is provided in these Landscape Design Guidelines, there will at times be a need for interpretation of the intent of the guidelines in keeping with the spirit of The Avenue's design theme. It is critical that these guidelines are followed in a manner consistent with this design theme, in order to create a unified landscape, while providing the opportunities for diversity and visual interest that are so apparent in the most successful residential communities in the City of Ontario.

6.6.1 Community Fences and Walls

Community fences and walls are a major visual element and help unify the appearance of the community. Community walls and fences have been carefully designed to complement the overall theme. They will be easy to maintain and provide a durable, long term edge enclosure defining "private" and "public" spaces. Community walls and fences shall not encroach into the public right-of-way unless permitted. The size and location of any monument, fence or wall that encroach into the public right-of-way shall require approval by the City Engineer.

An encroachment permit shall be obtained to construct any monument, fence or wall in the public right-of-way. Exhibit 26, "Entries, Intersections, and Community Walls" shows the conceptual location of community walls.

Design Guidelines

LEGEND

ROUNDABOUT

MAIN ENTRY

PRIMARY ENTRY

SECONDARY ENTRY

RI/RO

RIGHT IN/RIGHT OUT ONLY

--- COMMUNITY WALL

NOTE: The locations of entry points is conceptual. Precise locations will be determined as part of the tract map process.

NOTE: If a wall is proposed along the east side of Carpenter Avenue where the homes are plotted to rear onto Carpenter Avenue, a 10-foot wide landscape buffer shall be incorporated along the street frontage. The 10-foot landscape buffer shall be measured from back of sidewalk (ROW) (13-foot pathway + 10 foot landscape buffer = total 23-foot edge measured from curb face).

NOTE: No monuments or walls will be allowed in the public street right-of-way along backbone streets.

The Avenue

SPECIFIC PLAN

Entries, Intersections and Community Walls

The New Model Colony • Ontario, California

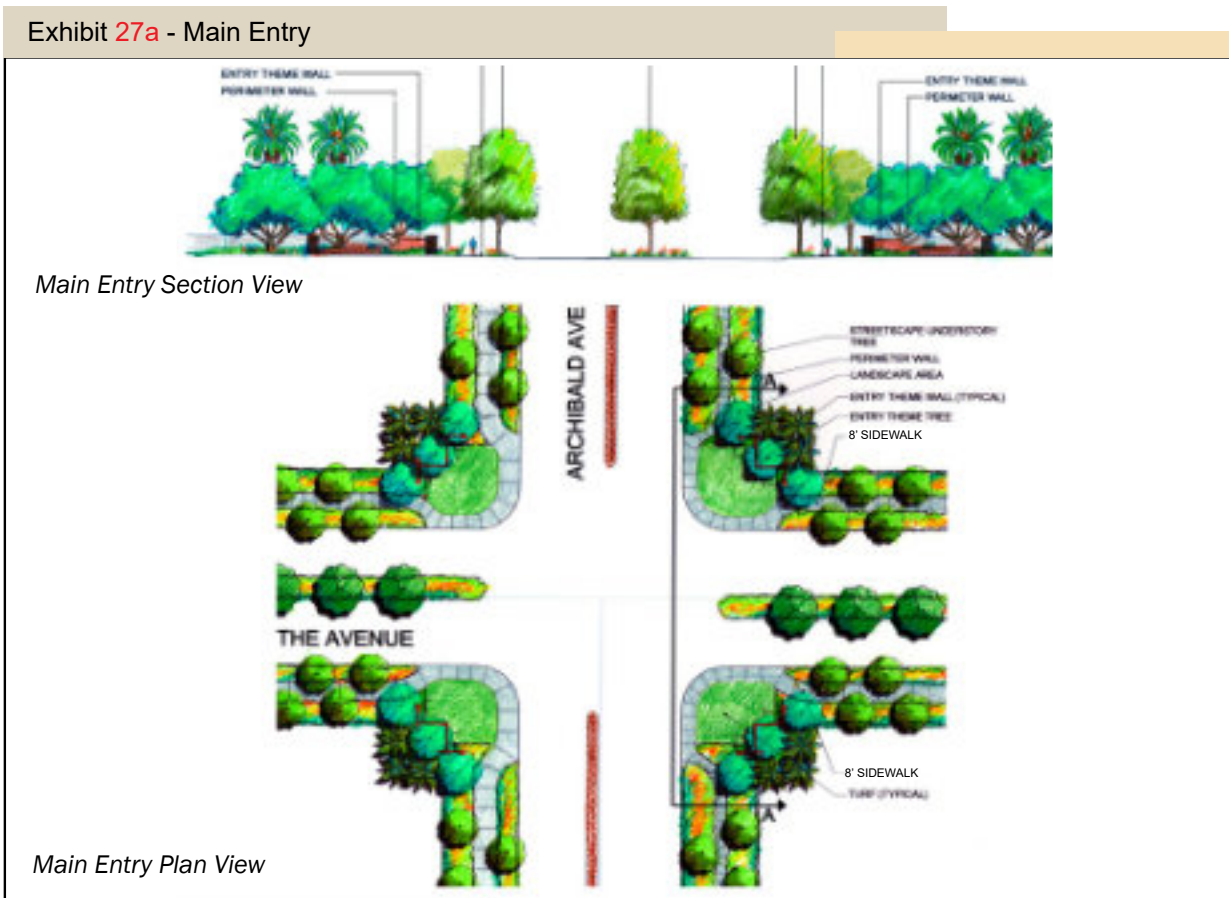

Exhibit 27 - Entries, Intersections and Community Walls

6.6.2 Entries

The entries and intersections within The Avenue establish the design theme for the community while reinforcing the design hierarchy and providing a reassurance of the community areas and boundaries. These features are created through a thematic blend of hardscape and planting schemes, and become the first impressions on all visitors and residents entering the colony. No monuments or walls will be allowed in the public street right-of-way along backbone streets. See Exhibit 26, “Entries, Intersections, and Community Walls” for specific locations of monumentation.

Main Entry

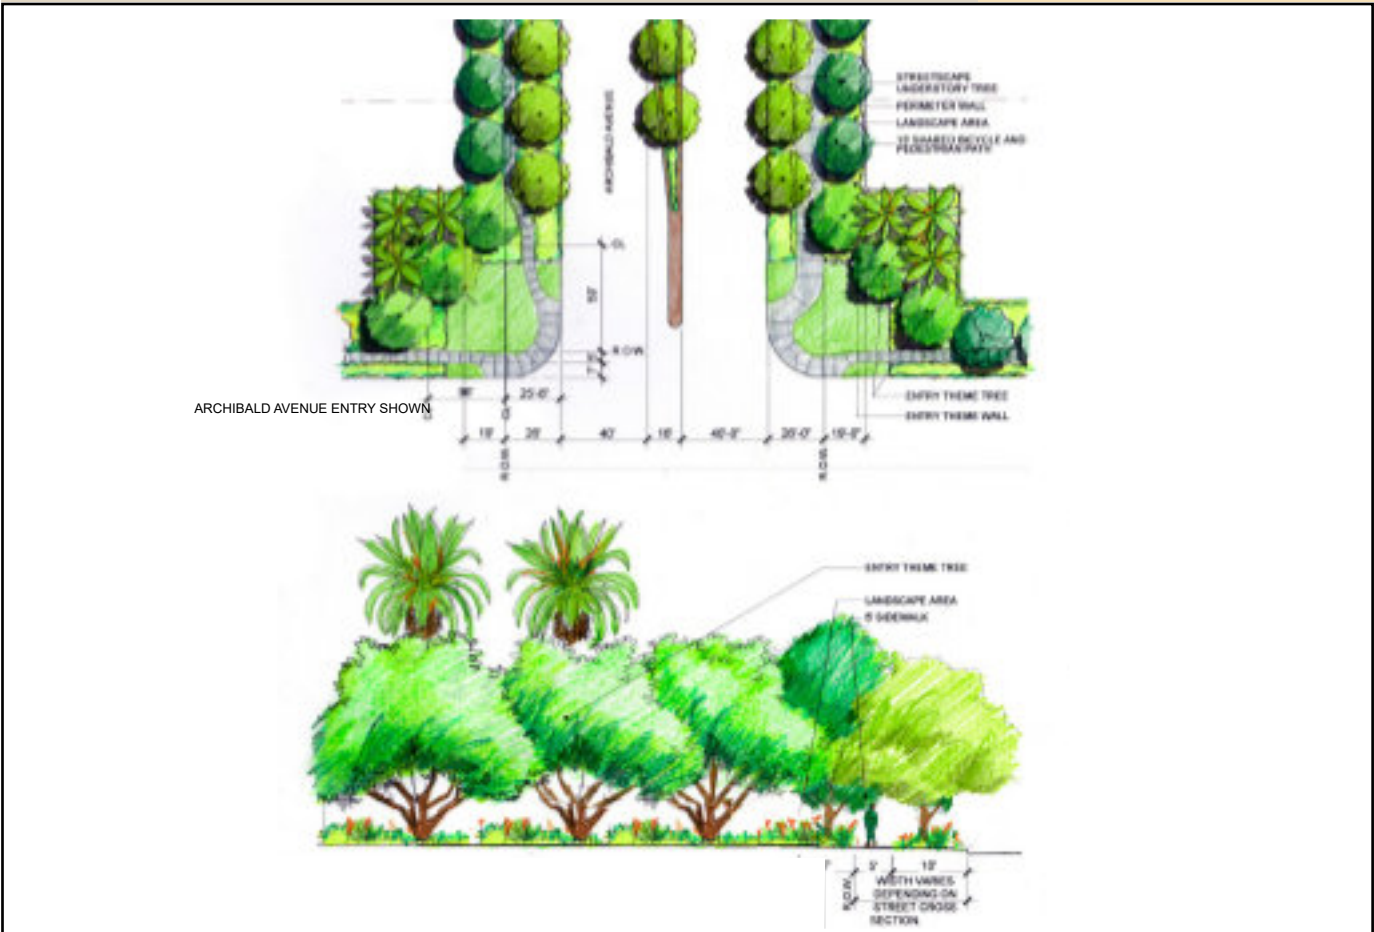

The Avenue is bordered by urban arterials on three sides. This allows easy access to neighborhoods throughout the community but also requires a carefully considered hierarchy and treatment of colony entries. The Main Entry provides a relaxed but strong sense of arrival and identity by utilizing soft open turf leading to stone veneered pilasters and a low planter wall. Clustered palms mixed with evergreen foliage trees and flowering shrubs will evoke the image of a classic Ontario community scene. The developer will be responsible for those improvements to the Main Entry as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project.

Primary Entries

These entries occur along the urban arterial and collectors throughout the community as shown in Exhibit 26, "Entries, Intersections and Community Walls". They will be smaller scale versions of the main entry and will contain minor sign monuments, theme walls and pilasters, simple attractive evergreen and deciduous tree planting and accent shrubs set behind a simple turf area. These entries will provide an important outlet and inlet for colony traffic to most efficiently access residential enclaves and other community elements. The developer will be responsible for those improvements to the Primary Entries as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project.

Exhibit 27b - Primary Entries

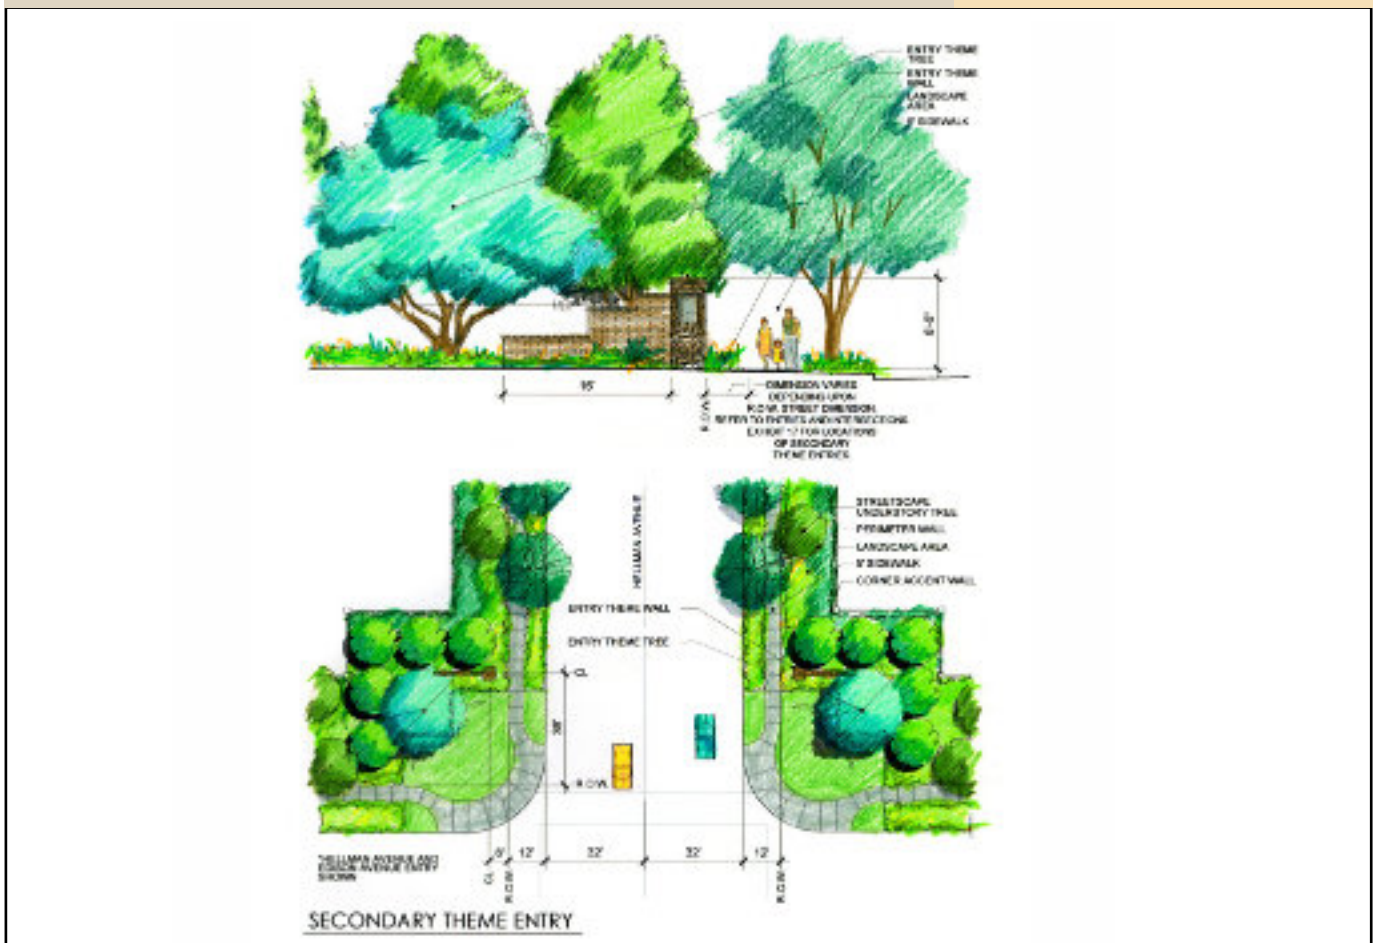

Secondary Entries

These entries will be the primary marketing and residential enclave access for the separate residential products within The Avenue as shown in Exhibit 26, “Entries, Intersections and Community Walls”. These entries occur from the internal road system and will be determined through the separate future planning of each enclave per the City of Ontario’s planning design standards and this Specific Plan document.

Simple identification signage and individualized landscape theming will be allowed. Signage may be permanent or temporary and is subject to review and approval by the master community developer. The signage and landscape materials must be compatible and complementary to The Avenue’s landscape design theme. Flexibility within this framework will allow visual diversity and individualization of the residential neighborhoods.

The developer will be responsible for those improvements to Archibald Avenue as determined by the City Engineer and pursuant to the mitigation measures identified in the EIR and/or the Conditions of Approval established on the approved tentative maps for the project.

Exhibit 27c - Secondary Entries

Solid Masonry Theme Wall

Solid masonry walls will be provided as rear and side yard enclosures where privacy is desired such as adjacent to streetscapes. The solid theme wall used within The Avenue will be a mortar washed painted slump block masonry unit. Pilasters will be placed at wall terminus points and as determined to be necessary for visual benefit.

Open Tubular Steel Fence

Tubular steel fencing will be used at residential interfaces to allow maximum view retention. Tubular steel fencing may also be used where an attractive open enclosure is necessary at park sites or recreation facilities.

Where feasible, the tubular steel fence will be interspersed with thematic community stone or masonry pilasters.

Combination Fence/Wall

This combination enclosure of a tubular steel fence mounted on a low solid masonry theme wall occurs where partial privacy is necessary, but permits some view opportunity. Pilasters shall occur at the intersections of rear and side property lines and shall be constructed of solid masonry theme wall materials.

Community Wood Fence

Wood fencing is acceptable when not adjacent to common open spaces such as school sites, parks or commercial sites. Wood fencing is allowed for front yard low (3'-6" high max.) decorative fencing. Wood fencing will not be permitted in rear or sides (masonry block only). Wood fence materials must be of sufficient quality to accept solid and semi-transparent stains required to help prevent rotting and weathering. No transparent stains will be allowed.

Interior Neighborhood Streetscene Walls

- Walls adjoining any interior neighborhood streetscene shall have a perimeter streetscene solid community theme treatment.
- The community solid theme wall shall be utilized at all residential corner lot side yards which parallel or are viewed from public streets.
- Wood fencing is permitted within the individual neighborhood provided the fencing is not readily visible from the community streetscenes, except as located behind the front yard setback.

The Avenue

Commercial, Institutional and Other Uses

Screen and security fences and walls are encouraged only in rear or side yards. Trash deposit areas shall be enclosed within a six foot (6') high gated trash enclosure wherever located.

Wall and Fence Heights

Residential, Institutional and Commercial Uses:

- Front yard wall heights must be compatible with the visual appearance and integrity of the front yard streetscene. Fences and walls in the front setback and street side setback shall not exceed three and one-half feet (3 ½') above grade. However, security fencing may be approved if there is a demonstrated need for security. The maximum height for this fencing shall be six feet (6') above grade. In this instance a combination wall/open fence enclosure shall be encouraged.
- Side and rear fences or walls shall not exceed a height of six feet (6').
- Pool Code: All fencing shall conform to the applicable City of Ontario pool code fencing requirements.

Wall and Fence Materials and Colors

All fences and walls within the private residential lots shall be designed and constructed as part of the overall architectural site design. All materials shall be durable and finished in textures and colors complementary to the overall architectural design.

- Permitted Wall Materials: Stone veneer, stucco (including stucco covered block), masonry, brick, slump block, block and wrought iron combination are acceptable.
- Conditionally Acceptable Wall and Fence Materials: Glass and/or heavy, break-resistant plastic are acceptable for use in fences and walls when necessary to preserve views while providing protection against winds, etc., if used in conjunction with the community solid theme wall.
- Prohibited Wall and Fence Materials: Barbed wire, wire, electrically charged fences, plain exposed precision block; plastic materials, corrugated metal, chain link and grape stake fencing are prohibited.
- Color and Special Wall and Fence Treatments: Walls may be left natural or covered with stucco, except plain precision block must be covered with stucco. Brick or slump block walls may be painted or covered with stucco, if desired. Stone surfaces shall remain natural or unpainted.
- Special Wall and Fence Regulations: A six foot (6') high minimum masonry wall shall be constructed on each property line prior to development of any commercial, industrial or business related use that adjoins any parcel specifically zoned for residential use or destined for open space or as a school site.

Special Wall and Fence Regulations

- A six foot (6') high masonry wall shall be constructed on each property line prior to development of any commercial/office related use that adjoins any parcel specifically zoned for residential use, or designed for open space or as a school site.
- All fences and walls connecting two (2) separate residential dwelling units shall be constructed of the same color and material and shall be compatible with the color and material of the architecture.
- Long walls should be broken up with landscaping, alignment offsets and material changes to relieve visual monotony. When possible, a three foot (3') minimum space should be left between paved areas and walls and fences to allow for vines and espaliers.
- All walls and/or fencing in commercial areas shall be planted with vines or screened by dense shrubbery.
- Brick walls or screening walls should have climbing plants or anti-graffiti elements such as anti-graffiti paint to prevent walls from being vandalized.
- If a wall is proposed along the east side of Carpenter Avenue where the homes are plotted to rear onto Carpenter Avenue, a 10-foot wide landscape buffer shall be incorporated along the street frontage. The 10-foot landscape buffer shall be measured from back of sidewalk (ROW) (13-foot parkway + 10 foot landscape buffer: Total 23-foot edge measured from curb face).

Typical residential streetscene

6.6.3 Local Streets/Residential Lot Frontage and Private Lot Landscaping

The local roads within The Avenue consist of private front or side yards of single family residences. Street trees and front and exterior side yards will be required to be installed by the residential enclave builder, however, the rear and interior side yards will be the responsibility of each individual homeowner.

Residential Lot Landscape Requirements

Each single-family dwelling/lot shall be provided with front yard landscaping and a permanent automatic irrigation in the front yard of each lot. At a minimum, a seeded turf lawn, appropriate shrubs and trees and an automatic irrigation system shall be provided. Furthermore, a variety of typical landscape designs shall be provided for use on each lot within the subdivision.

Multiple-family residential projects shall be provided with full landscape improvements throughout the development. At a minimum, a seeded turf lawn, appropriate shrubs and trees, and a permanent automatic irrigation system shall be provided.

Landscape and irrigation drawings of the entire project site must be submitted to the Building department in conjunction with construction plans. The plans shall be approved by the Planning Department and the Public Facilities Development Department prior to the issuance of building permits.

Those portions of a property which are not used for drive entries, parking, or approved outdoor uses shall be fully landscaped; all unpaved areas shall be landscaped; and all future development phase areas shall be hydroseeded.

Per City of Ontario's landscape Development Standards, each residential lot shall receive minimum of one (1) - 24" box size street tree planted in the right-of-way. Corner lots shall receive two (2) -24" box size street trees also planted in the right-of-way. Street trees planted in the right-of-way shall be thirty feet (30') maximum on center. Tree varieties shall be chosen from The Avenue's Plant Palette contained herein. Trees should be clustered near property lines to maximize their buffering effect and streetscene impact. One (1) species of tree shall be selected and approved for each residential street to maximize visual neighborhood identity. Deciduous or flowering evergreen accent trees which contrast with the chosen street trees are encouraged at cul-de-sacs, knuckles and intersections to provide seasonal emphasis and interest.

Residential Front Yard Requirements

A maximum of fifty percent (50%) of the front yard, excluding driveways and sidewalks may be seeded or sodded turf. A minimum of ten (10) 5 gallon shrubs, twenty (20) 1 gallon shrubs and an automatic irrigation system shall be installed by the builder/developer in the front yard of each residential lot. The turf, shrubs and irrigation shall be installed up to a property line from the curb face to the front of house and side yards. Side yard slopes over 3:1 surface gradient and three feet (3') in height should be planted with ground cover. Low slopes may be graded out to a less than 3:1 surface gradient and planted with turf.

A minimum of one (1) 15 gallon size tree shall be planted in the front yard of each residential lot in addition to the required street tree. These trees may match the street trees planted in the right-of-way and be located in proximity to said street trees in order to create a more harmonious effect. The trees may also contrast with the street tree and form backdrop tree clusters. Overall, the front yard scheme shall create a streetscene appearance of tree clusters meandering through the project and across streets.

6.6.4 General Landscape Guidelines

Individual homeowners shall be responsible for the maintenance of public street landscape frontage or side of their property unless otherwise identified within their legal ownership documents. Private homeowners shall also be responsible for all maintenance within their private lot area as well as fences and wall faces on their internal boundaries. For public and common area landscape maintenance responsibility refer to Table 4, "Maintenance Responsibility Matrix".

Outdoor Lighting

All street and commercial developments within The Avenue shall have uniform lighting standards with regard to style, materials and colors in order to ensure consistent design. Each residential development may develop its own lighting standards, provided that the selected lighting fixture style is used consistently throughout the project. Lighting fixtures shall be well integrated into the visual environment and the appropriate architectural theme. All lighting fixtures within The Avenue project area shall comply with the following regulations and provisions.

- All outdoor lighting, including spotlights, floodlights, electrical reflectors and other means of illumination for signs, structures, landscaping, parking, loading, unloading and similar areas shall be focused, directed and arranged to minimize glare and illumination of streets or adjoining property. Low intensity, energy conserving night lighting is preferred.
- Lights shall be unbreakable plastic, recessed or otherwise designed to reduce the problems associated with damage and replacement of fixtures. Fixtures shall be vandal proof.
- Neon and similar types of lighting are prohibited in all areas of The Avenue except in retail commercial developments.
- All exterior lighting designs should develop a sense of hierarchy by varying fixtures and illumination levels. Proper lighting helps to define the organization of streets and plazas; and also distinguishes vehicular and pedestrian circulation patterns. Community entry areas (both pedestrian and vehicular), public plazas, community facilities and highly used recreation areas shall be creatively lit to develop a sense of place and arrival.
- All exterior lighting designs shall address the issue of security. Parking lots, pedestrian walkways and building entrances shall be well lighted for security reasons.

- Street lighting should be metal halide to project true colors and clear visibility for safety and security reasons.
- All lighting is required to have anti-vandalism fixtures.
- Residential units will be required to have their addresses illuminated on their home as close to the front door as possible. In addition, an illuminated address on the garage door should be present if the garage door faces ~~an alley~~ a private drive. Also, the address numbers should be painted on the curb with white reflective paint on a black background. Each homeowner will be responsible for the maintenance of these numbers.
- All exterior lights should be shielded where feasible and focused to minimize spill light into the night sky or adjacent properties.
- No freestanding lighting fixtures shall exceed twenty-five feet (25') in height.
- Service area lighting shall be contained within the service yard boundaries and enclosure walls.
- The lighting concept of the entry monumentation features is to illuminate the sign graphics and to gently wash the walls and pilasters with light. Trees and other landscape features should be illuminated by concealed uplight fixtures.
- All electrical meter pedestals and light switch/control equipment shall be located with minimum public visibility if possible or shall be screened with appropriate plant materials.
- The level of on-site lighting as well as lighting fixtures, shall comply with any and all applicable requirements and policies of the City of Ontario. Energy conservation, safety and security should be emphasized when designing any light system.
- All community landscape common areas, public facilities, commercial sites, streetscapes, parks, schools and other areas may, at the discretion of the project developer or builders, contain area, accent sports or other night lighting entities.

Irrigation

All landscaped areas shall be watered with a permanent underground irrigation system. Irrigation systems which adjoin a separate maintenance responsibility area shall be designed in a manner to ensure complete water coverage between the areas.

Proper consideration of irrigation system design and installation in the climate extremes of The Avenue area is critical to the success of the landscape investment. In particular, the combined summer elements of heat and wind must be carefully considered in proper irrigation design and equipment selection.

Overhead spray irrigation systems shall be designed with head to head 100 percent double coverage at a minimum. Native and drought tolerant shrub areas will use a combination of spray (temporary) and drip or bubbler irrigation to shrubs and trees. All trees shall have a bubbler or spray irrigation system separate from shrubs and groundcovers. In addition, all irrigation systems shall run by an automatic irrigation controller operated by a centralized computer system with manufacturer to be selected by the Parks and maintenance Department.

Irrigation backflow prevention devices and controllers shall be located with minimum public visibility or shall be screened with appropriate plant materials.

- Reclaimed Water: Irrigation systems designed for use with both domestic and reclaimed water are encouraged (Refer to the city's New Model Colony Recycled Water Master Plan for additional information). All irrigation systems shall be designed for the eventual use of reclaimed water and/or conversion when available per current applicable standards.

Water Conservation Measures

- Drip and/or bubbler irrigation will be used where appropriate.
- Use of moisture sensors and/or central control irrigation systems may be incorporated where appropriate and feasible.
- Irrigation systems will be designed per AB 325 guidelines and/or the City of Ontario's Water Conservation Ordinance.
- Irrigation systems and plans will be prepared per landscape maintenance district or the City of Ontario's Landscape Development Standards.

Farming next to Flood Control Channel

- Place plants in similar hydro zone groupings to maximize efficient water use. Do not mix drought tolerant or native plants with ornamental plants that have dissimilar water requirements

6.6.5 Plant Material Guidelines

The Avenue will have a vastly different appearance from initial planting to several years into development. The quality of that appearance will depend on many factors including the initial selection of the plant material palette, soil preparation and installation, irrigation management and care and maintenance. All of these issues have been addressed in the preparation of the planting design theme and plant palette selection. A brief discussion of the planting approach and key issues follows:

General Landscape Requirements

- All areas required to be landscaped shall be planted with turf, groundcover, shrub or tree materials selected from the plant palette contained in these guidelines or other drought-tolerant or regionally appropriate species subject to the approval of Public Facilities Development.
- The owners of parcels which require landscape development shall consider any existing common landscape areas adjoining their property. Where feasible, landscape development shall reinforce or be compatible with such existing common area setting.

- Cut slopes equal to or greater than eight feet (8') in vertical height and fill slopes equal to or greater than five feet (5') in vertical height shall be planted with an erosion ground cover to protect the slope from erosion and instability. Slopes exceeding fifteen feet (15') in vertical height shall be planted with shrubs, spaced not more than ten feet (10') average on center or trees spaced not to exceed thirty feet (30') average on center or a combination of shrubs and trees at equivalent spacings, in addition to the groundcover. The plants selected and planting methods shall be suitable for the soil and climatic conditions.
- Reference should be made to the City of Ontario Landscape Development Standards for erosion control methods for slopes and other landscaped areas.
- Parkway Tree Planting: All street or parkway trees shall be planted so as to maintain adequate distance and shall maintain the following planting distances:
 - Ten feet (10') from all water and sewer lines, fire hydrants, light standards and power poles.
 - Five feet (5') from all flat hardscape (sidewalks, curbs, vaults, etc.) except as otherwise approved by the City.
 - Twenty-five feet (25') from street intersection beginning of curb returns (BCR).

Climate Constraints

Plant material palettes for The Avenue contained herein are compatible with the climatic setting of the area. The utilization of some materials, depending upon their site location, exposure and relationship to other influential factors may not be appropriate.

Planting Time

Due to the climate extremes of the area, the installation of plant materials during the coldest winter months (December through March) and the hottest summer/fall months (July through September) can be difficult. Container plant materials not acclimated to the area can easily suffer from damage or sun/heat exposure resulting in partial or entire foliage loss even through such materials are perfectly suited to the temperature ranges once established. If planting must be done during these difficult periods, plant establishment may be difficult and require a prolonged period of time, as well as additional replacement plants.

Horticultural Soils Test Requirements

Soil characteristics within The Avenue project may be variable. The owners of parcels which require landscape development shall procure a horticultural soils report in order to determine proper planting and maintenance requirements for proposed plant materials. Such a soils test shall be performed by a qualified agricultural laboratory and shall include a soil fertility and agricultural suitability analysis with pre-planting and post-planting recommendations.

Topography

The Avenue lies across a flat plain. There may be extreme cold conditions occurring during winter months. This will be affected by the development patterns of the community and are difficult to predict. The plant palette proposed may, on occasion, suffer adverse affects in certain areas of the community. Adjustments may need to be made at that time and other drought-tolerant or regionally appropriate species may be substituted subject to the approval of Public Facilities Development.

Drought Tolerance/Water Conserving Plant Material

Although a plant may be considered as drought tolerant or water conserving, that plant requires proper care, installation, watering and maintenance to maintain an optimum healthy condition.

- **Degrees of Drought Tolerance/Water Conservation:** There are degrees of drought tolerance with some plants able to withstand or go without water for a greater period of time than others. Water conserving plant material may not be drought tolerant but can thrive on low water amounts throughout the year once established.
- **Plant Installation Water Demand:** Drought tolerant plants like other plants, require more watering during the initial installation period and for at least a three month maintenance period following to become established. Therefore, if drought tolerant plants are installed in the warmer months more supplemental water will be required until the plant is established.
- **Deep Watering Practices:** Drought tolerant plants like most plants need the proper deep watering practices to encourage deep root system development. Drought tolerant plants with a shallow root system resulting from frequent light applications of water will not be drought tolerant. Checking the depth of water penetration into the soil with a soil probe or spade and adjusting irrigation run times enhance plant vigor and prevents plant loss from drought stress over saturation.
- **Warmer Months Water Application:** Although a plant is labeled drought tolerant, that does not necessarily mean it can survive without summer water, the plant may have low water requirements. Depending upon the plant, drought tolerant plants will have a better appearance and health during the warmer months with infrequent deep watering. Do not water during the heat of the day and avoid overhead watering; prolonged leaf wetting can promote disease.
- **Full Season Plant Water Requirements:** After drought tolerant plants have grown a full season, the water application rate should be diminished and the drought tolerant plant allowed to survive on less water.
- **Maintenance:** Drought tolerant and California native plants still need regular maintenance such as pruning, fertilizing, deep watering and checking for pests and diseases.

Deer Grass

Manzanita

Invasive Species

Non-native invasive plant species shall not be used in landscape plans. Controlled invasive non-native species shall include the following:

Non-native Acacia's (Acacia spp.)
 Tree of Heaven (Ailanthus altissima)
 Giant reed (Arundo donax)*
 Hottentot-fig (Carpobrotus edulis)
 Garland chrysanthemum (Chrysanthemum coronarium)*
 Pampas grass (Cortaderia atacamensis)*
 French broom (Cytisus monspessulans)
 Scotch broom (Cytisus scoparius)
 Crystal ice plant (Mesembryanthemum crystallinum)
 Small-flowered ice plant (Mesembryanthemum nodiflorum)
 Bermuda buttercup (Oxalis pes-caprae)*
 German ivy (Senecio mikanoides)
 Pink periwinkle (Vinca major)
 Tamarisk (Tamarix spp.)*
 Gorse (Ulex europaeus)

Ailanthus altissima

* Indicates a species that may not be used in any plant palettes, regardless of location in the development, due to its ability to readily spread via airborne seeds, rather than vegetatively.

Plant Pest and Disease Control

A consistent problem in ornamental and native planting schemes is the disease and pests which have affected trees and shrubs often in significant visual patterns through a community. Recent well documented problems include oleander scorch blight and several eucalyptus and olive problems, however, a series of other problems have occurred on an annual basis. There is no way to predict the occurrence of new pests or diseases, however, there are useful methods to limit the impact of outbreaks. These include the following:

- Maintain optimum plant health through soil preparation, water management and nutrient monitoring.
- Review community plant material on a regular basis to observe health problems due to disease or pest infestation and take appropriate action.
- Place plant material in appropriate planting areas and provide proper spacing consistent with the requirements of the plant species.
- Provide good cultural practices to maintain plant health and disease resistance with adequate mulch, sufficient air circulation and protection from mechanical injury from mowers and edgers.

The following Plant List is to provide design guidance and intent. While this list is not a comprehensive list of suitable plants for The Avenue, other drought-tolerant or regionally appropriate species, preferably from the low and moderate species of the WUCOLS (Water Use Classification of Landscape Species) classification system, may be substituted subject to the approval of Public Facilities Development.

Turfgrass and Seed:

Year round turf grass mixes as follows:

General turf areas:

100% Dwarf tall fescue blend - 10 lbs. per 1,000 s.f.

Park Site and Athletic areas:

Hybrid bermuda (seeded or stolonized)

Bermuda grass must be planted and mature prior to the dormant season.

RESOLUTION NO.

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PMTT19-015 (TTM 20298), A TENTATIVE TRACT MAP TO SUBDIVIDE 10.49 ACRES OF LAND INTO 106 NUMBERED LOTS AND 19 LETTERED LOTS, LOCATED AT THE NORTHEAST CORNER OF LA AVENIDA DRIVE AND MANITOBA PLACE, WITHIN THE PROPOSED LOW-MEDIUM DENSITY LAND USE DISTRICT OF THE AVENUE SPECIFIC PLAN, AND MAKING FINDINGS IN SUPPORT THEREOF—APN: 0218-652-27.

WHEREAS, Ontario Schaefer Holdings, LLC. (hereinafter referred to as "Applicant") has filed an Application for the approval of a Tentative Tract Map, File No. PMTT19-015 (TM 20298), as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 10.49 acres of vacant land generally located at the northeast corner of La Avenida Drive and Manitoba Place, currently within the Public School land use district of The Avenue Specific Plan; and

WHEREAS, the property to the north of the Project site is within the proposed Low-Medium Density Residential land use district of The Avenue Specific Plan and is vacant. The properties to the north, west, and south are within the Low-Density Residential land use district of The Avenue Specific Plan and are under construction with single-family homes. The property to the east is within the School land use district of The Avenue Specific Plan and is vacant; and

WHEREAS, the Tentative Tract Map proposes to subdivide 10.49 acres of land into 106 numbered lots and 19 lettered lots to facilitate the future residential development of the site; and

WHEREAS, A General Plan Amendment and Specific Plan Amendment, File Nos. PGPA19-008 and PSPA19-011 respectively, were filed in conjunction with the proposed Tentative Tract Map. The two applications consist of: [1] A General Plan Amendment (File No. PGPA19-008) to modify the Policy Plan (General Plan) Land Use Plan (Exhibit LU-01) component of The Ontario Plan, changing the land use designation on 10.49 acres of land, from Public School to Low-Medium Density Residential (5.1 – 11 du/ac), in conjunction with modification of the Future Buildout Table (Exhibit LU-03) to be consistent with the proposed land use designation change; and, [2] an amendment to The Avenue Specific Plan to change the land use designation for Planning Area 6B (PA-6B) from School to Low-Medium Density Residential, introduce Product Type 1D (2,700-3,500 square foot lots), and revise exhibits, maps, development standards, and other text throughout the Specific Plan to accommodate the proposed land use change; and

WHEREAS, The Avenue Specific Plan Environmental Impact Report (State Clearinghouse No. 2005071109) was certified on February 16, 2007, in which development and use of the Project site was discussed; and

WHEREAS, The Ontario Plan (File No. PGPA06-001) Environmental Impact Report (State Clearinghouse No. 2008101140) was certified on January 27, 2010 (hereinafter referred to as "Certified EIR"), in which development and use of the Project site was discussed; and

WHEREAS, the Planning Director of the City of Ontario prepared and approved for attachment to the certified Environmental Impact Report, an Addendum to the Certified EIR (hereinafter referred to as "EIR Addendum") in accordance with the requirements of the California Environmental Quality Act of 1970, together with State and local guidelines implementing said Act, all as amended to date (collectively referred to as "CEQA"); and

WHEREAS, the environmental impacts of this project were thoroughly analyzed in the EIR Addendum, which concluded that implementation of the Project could result in a number of significant effects on the environment that were previously analyzed in the Certified EIR, and that the Certified EIR identified mitigation measures that would reduce each of those significant effects to a less-than-significant level; and

WHEREAS, the City's "Local Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act — Public Resources Code Section 21000 et seq. — (hereinafter referred to as "CEQA") and an EIR Addendum has been prepared to determine possible environmental impacts; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and act on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (hereinafter referred to as "ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on October 19, 2020, the Development Advisory Board of the City of Ontario conducted a hearing to consider the Addendum and the Project, and concluded said hearing on that date, voting to issue Decision Nos. DAB20-054 and DAB20-055, respectively, recommending that the Planning Commission approve the Tentative Tract Map Application and recommend approval to City Council of the Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140); and

WHEREAS, on October 27, 2020, the Planning Commission issued a Resolution adopting the Tentative Tract Map Application, and recommending the City Council adopt the EIR Addendum through the related General Plan Amendment and Specific Plan Amendment, File Nos. PGPA19-008 and PSPA19-011, finding that the proposed Project introduces no new significant environmental impacts and applying all previously adopted mitigation measures to the Project, which were incorporated by reference; and

WHEREAS, on October 27, 2020, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: Housing Element Compliance. Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the decision-making authority for the Project, the Planning Commission finds that based upon the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan. The project site is one of the properties listed in the Available Land Inventory contained in

Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix, and the proposed project is consistent with the number of dwelling units (2,875) and density (2-12 du/ac) specified in the Available Land Inventory.

SECTION 2: *Ontario International Airport Land Use Compatibility Plan (“ALUCP”) Compliance.* The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the ALUCP, establishing the Airport Influence Area for Ontario International Airport (hereinafter referred to as “ONT”), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the decision-making authority for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ALUCP compatibility factors, including [1] Safety Criteria (ALUCP Table 2-2) and Safety Zones (ALUCP Map 2-2), [2] Noise Criteria (ALUCP Table 2-3) and Noise Impact Zones (ALUCP Map 2-3), [3] Airspace protection Zones (ALUCP Map 2-4), and [4] Overflight Notification Zones (ALUCP Map 2-5). As a result, the PLANNING COMMISSION, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ALUCP.

SECTION 3: *Concluding Facts and Reasons.* Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing, and upon the specific findings set forth in Sections 1 and 2, above, the Planning Commission hereby concludes as follows:

(1) ***The proposed Tentative Tract/Parcel Map is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, and applicable area and specific plans, and planned unit developments.*** The proposed Tentative Tract Map is proposed to be located within the Low-Medium Density Residential land use district of the Policy Plan Land Use Map, and the Low-Medium Density Residential land use district of The Avenue Specific Plan. With approval of related File Nos. PGPA19-008 and PSPA19-011, the proposed subdivision is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, as the project will contribute to providing “a spectrum of housing types and price ranges that match the jobs in the City, and that make it possible for people to live and work in Ontario and maintain a quality of life” (Goal LU1). Furthermore, the project will promote the City’s policy to “incorporate a variety of land uses and building types that

contribute to a complete community where residents at all stages of life, employers, workers, and visitors, have a wide spectrum of choices of where they can live, work, shop, and recreate within Ontario” (Policy LU1-6 *Complete Community*).

(2) ***The design or improvement of the proposed Tentative Tract Map is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, and applicable specific plans and planned unit developments.*** The proposed Tentative Tract Map is located within the Low-Medium Density Residential land use district of the Policy Plan Land Use Map, and the Low-Medium Density Residential land use district of The Avenue Specific Plan. With approval of related File Nos. PGPA19-008 and PSPA19-011, the proposed design or improvement of the subdivision will be consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, as the project will contribute to providing “[a] high level of design quality resulting in public spaces, streetscapes, and developments that are attractive, safe, functional and distinct” (Goal CD2). Furthermore, the project will promote the City’s policy to “create distinct residential neighborhoods that are functional, have a sense of community, emphasize livability and social interaction, and are uniquely identifiable places through such elements as:

- A pattern of smaller, walkable blocks that promote access, activity and safety;
- Variable setbacks and parcel sizes to accommodate a diversity of housing types;
- Traffic calming measures to slow traffic and promote walkability while maintaining acceptable fire protection and traffic flows;
- Floor plans that encourage views onto the street and de-emphasize the visual and physical dominance of garages (introducing the front porch as the “outdoor living room”), as appropriate; and
- Landscaped parkways, with sidewalks separated from the curb.” (Policy CD2-2 *Neighborhood Design*).

(3) ***The site is physically suitable for the type of development proposed.*** With approval of related File Nos. PGPA19-008 and PSPA19-011, the project site will meet the minimum lot area and dimensions of the Low-Medium Density Residential land use district of The Avenue Specific Plan, and will be physically suitable for the type of residential development proposed in terms of zoning, land use and development activity proposed, and existing and proposed site conditions.

(4) ***The site is physically suitable for the density/intensity of development proposed.*** The project site is proposed for residential development at a density of 10.10 du/ac. With approval of related File Nos. PGPA19-008 and PSPA19-011, the project site will meet the minimum lot area and dimensions of the Low-Medium Density Residential land use district of The Avenue Specific Plan and is physically suitable for this proposed density / intensity of development.

(5) ***The design of the subdivision or the proposed improvements thereon, are not likely to cause substantial environmental damage, or substantially and avoidably injure fish or wildlife, or their habitat.*** The project site is not located in an area that has been identified as containing species identified as a candidate, sensitive, or special status species in local or regional plans, policies or regulations or by the California Department of Fish and Wildlife or the U.S. Fish and Wildlife Service, nor does the site contain any riparian habitat or other sensitive natural community, and no wetland habitat is present on site; therefore, the design of the subdivision, or improvements proposed thereon, are not likely to cause substantial environmental damage, or substantially and avoidably injure fish or wildlife, or their habitat.

(6) ***The design of the subdivision, or the type of improvements thereon, are not likely to cause serious public health problems.*** The design of the proposed subdivision, and the residential improvements existing or proposed on the project site, are not likely to cause serious public health problems, as the project is not anticipated to involve the transport, use, or disposal of hazardous materials during either construction or project implementation, include the use of hazardous materials or volatile fuels, nor are there any known stationary commercial or industrial land uses within close proximity to the subject site that use/store hazardous materials to the extent that they would pose a significant hazard to visitors or occupants to the project site.

(7) ***The design of the subdivision, or the type of improvements thereon, will not conflict with easements acquired by the public at large for access through, or use of property within, the proposed subdivision.*** The proposed subdivision has provided for all necessary public easements and dedications for access through, or use of property within, the proposed subdivision. Furthermore, all such public easements and dedications have been designed pursuant to: (a) the requirements of the Policy Plan component of The Ontario Plan and applicable area plans; (b) applicable specific plans or planned unit developments; (c) applicable provisions of the City of Ontario Development Code; (d) applicable master plans and design guidelines of the City; and (e) applicable Standard Drawings of the City.

SECTION 4: Planning Commission Action. Based upon the findings and conclusions set forth in Sections 1 through 3, above, the Planning Commission hereby APPROVES the herein described Application, subject to each and every condition set forth in the Department reports attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 5: Indemnification. The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the

applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 6: Custodian of Records. The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 7: Certification to Adoption. The Secretary shall certify to the adoption of the Resolution.

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a regular meeting thereof held on the 27th day of October 2020, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

Jim Willoughby
Planning Commission Chairman

Project Description: A Tentative Tract Map to subdivide 10.49 acres of land into 106 numbered lots and 19 lettered lots, located at the northeast corner of La Avenida Drive and Manitoba Place, within the proposed Low-Medium Density land use district of The Avenue Specific Plan (APN: 0218-652-27); **submitted by Ontario Schaefer Holdings, LLC.**

Prepared By: Alexis Vaughn, Assistant Planner
Phone: 909.395.2416 (direct)
Email: avaughn@ontarioca.gov

The Planning Department, Land Development Section, conditions of approval applicable to the above-described Project, are listed below. The Project shall comply with each condition of approval listed below:

1.0 Standard Conditions of Approval. The project shall comply with the *Standard Conditions for New Development*, adopted by City Council Resolution No. 2017-027 on April 18, 2017. A copy of the *Standard Conditions for New Development* may be obtained from the Planning Department or City Clerk/Records Management Department.

2.0 Special Conditions of Approval. In addition to the *Standard Conditions for New Development* identified in condition no. 1.0, above, the project shall comply with the following special conditions of approval:

2.1 Time Limits.

(a) Tentative Tract Map approval shall become null and void 2 years following the effective date of application approval, unless the final parcel/tract map has been recorded, or a time extension has been approved by the Planning Commission pursuant to Development Code Section 2.02.025 (Time Limits and Extensions). This Permit does not supersede any individual time limits specified herein for performance of specific conditions or improvements.

2.2 Subdivision Map.

(a) The Final Tract Map shall be in conformance with the approved Tentative Tract Map on file with the City. Variations from the approved Tentative Tract Map may be reviewed and approved by the Planning Department. A substantial variation from the approved Tentative Tract Map may require review and approval by the Planning Commission, as determined by the Planning Director.

(b) Tentative Tract Map approval shall be subject to all conditions, requirements and recommendations from all other departments/agencies provided on the attached reports/memorandums.

(c) Pursuant to California Government Section 66474.9, the subdivider agrees that it will defend, indemnify, and hold harmless the City of Ontario or its agents, officers and employees from any

claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer of this subdivision, which action is brought within the time period provided for in Government Code Section 66499.37. The City of Ontario shall promptly notify the subdivider of any such claim, action or proceeding and the City of Ontario shall cooperate fully in the defense.

2.3 General Requirements. The Project shall comply with the following general requirements:

(a) All construction documentation shall be coordinated for consistency, including, but not limited to, architectural, structural, mechanical, electrical, plumbing, landscape and irrigation, grading, utility and street improvement plans. All such plans shall be consistent with the approved entitlement plans on file with the Planning Department.

(b) The project site shall be developed in conformance with the approved plans on file with the City. Any variation from the approved plans must be reviewed and approved by the Planning Department prior to building permit issuance.

(c) The herein-listed conditions of approval from all City departments shall be included in the construction plan set for project, which shall be maintained on site during project construction.

2.4 Landscaping.

(a) The Project shall provide and continuously maintain landscaping and irrigation systems in compliance with the provisions of Ontario Development Code Division 6.05 (Landscaping).

(b) Comply with the conditions of approval of the Planning Department; Landscape Planning Division.

(c) Landscaping shall not be installed until the Landscape and Irrigation Construction Documentation Plans required by Ontario Development Code Division 6.05 (Landscaping) have been approved by the Landscape Planning Division.

(d) Changes to approved Landscape and Irrigation Construction Documentation Plans, which affect the character or quantity of the plant material or irrigation system design, shall be resubmitted for approval of the revision by the Landscape Planning Division, prior to the commencement of the changes.

2.5 Walls and Fences. All Project walls and fences shall comply with the requirements of Ontario Development Code Division 6.02 (Walls, Fences and Obstructions).

2.6 Parking, Circulation and Access.

(a) The Project shall comply with the applicable off-street parking, loading and lighting requirements of City of Ontario Development Code Division 6.03 (Off-Street Parking and Loading).

(b) Areas provided to meet the City's parking requirements, including off-street parking and loading spaces, access drives, and maneuvering areas, shall not be used for the outdoor storage of materials and equipment, nor shall it be used for any other purpose than parking.

(c) The required number of off-street parking spaces and/or loading spaces shall be provided at the time of site and/or building occupancy. All parking and loading spaces shall be maintained in good condition for the duration of the building or use.

(d) Parking spaces specifically designated and conveniently located for use by the physically disabled shall be provided pursuant to current accessibility regulations contained in State law (CCR Title 24, Part 2, Chapters 2B71, and CVC Section 22507.8).

2.7 Covenants, Conditions and Restrictions (CC&Rs)/Mutual Access and Maintenance Agreements.

(a) CC&Rs shall be prepared for the Project and shall be recorded prior to the issuance of a building permit.

(b) The CC&Rs shall be in a form and contain provisions satisfactory to the City. The articles of incorporation for the property owners association and the CC&Rs shall be reviewed and approved by the City.

(c) CC&Rs shall ensure reciprocal parking and access between parcels.

(d) CC&Rs shall ensure reciprocal parking and access between parcels, and common maintenance of:

(i) Landscaping and irrigation systems within common areas;

(ii) Landscaping and irrigation systems within parkways adjacent to the project site, including that portion of any public highway right-of-way between the property line or right-of-way boundary line and the curb line and also the area enclosed within the curb lines of a median divider (Ontario Municipal Code Section 7-3.03), pursuant to Ontario Municipal Code Section 5-22-02;

(iii) Shared parking facilities and access drives; and

(iv) Utility and drainage easements.

(e) CC&Rs shall include authorization for the City's local law enforcement officers to enforce City and State traffic and penal codes within the project area.

(f) The CC&Rs shall grant the City of Ontario the right of enforcement of the CC&R provisions.

(g) A specific methodology/procedure shall be established within the CC&Rs for enforcement of its provisions by the City of Ontario, if adequate maintenance of the development does not occur, such as, but not limited to, provisions that would grant the City the right of access to correct maintenance issues and assess the property owners association for all costs incurred.

(h) The CC&R's for the Ventana development shall be established so as to allow for reciprocal resident amenity access by and between Ventana (TM 20265) and the adjacent Dorado development (TM 17931).

2.8 Disclosure Statements.

(a) A copy of the Public Report from the Department of Real Estate, prepared for the subdivision pursuant to Business and Professions Code Section 11000 et seq., shall be provided to each prospective buyer of the residential units and shall include a statement to the effect that:

(i) This tract is subject to noise from the Ontario International Airport and may be more severely impacted in the future.

(ii) Some of the property adjacent to this tract is zoned for agricultural uses and there could be fly, odor, or related problems due to the proximity of animals.

(iii) The area south of Riverside Drive lies within the San Bernardino County Agricultural Preserve. Dairies currently existing in that area are likely to remain for the foreseeable future.

(iv) This tract is part of a Landscape Maintenance District. The homeowner(s) will be assessed through their property taxes for the continuing maintenance of the district.

2.9 Development Agreement. All terms of the related Development Agreement (File No. PDA20-001) shall be followed, including, but not limited to, utilities, maintenance, and Development Impact Fees. Additionally, all required parkland fees shall be paid prior to building permit issuance.

2.10 Environmental Review.

(a) Staff has prepared an Addendum to The Ontario Plan (File No. PGPA06-001) EIR (SCH# 2008101140) certified by City Council on January 27, 2010. This application introduces no new significant environmental impacts, and all previously-adopted mitigation measures are a condition of project approval.

(b) If human remains are found during project grading/excavation/construction activities, the area shall not be disturbed until any required investigation is completed by the County Coroner and Native American consultation has been completed (if deemed applicable).

(c) If any archeological or paleontological resources are found during project grading/excavation/construction, the area shall not be disturbed until the significance of the resource is determined. If determined to be significant, the resource shall be recovered by a qualified archeologist or paleontologist consistent with current standards and guidelines, or other appropriate measures implemented.

(d) The applicant/developer shall submit in writing to the Gabrieleno Band of Mission Indians - Kizh Nation (the "Tribe" or the "Consulting Tribe" that was consulted on this project pursuant to Assembly Bill AB52 – SB18) a timeline of operations, including grading and construction, for review and approval by the Consulting Tribe prior to any ground-disturbing activities for the site. A copy of the correspondence shall be provided to the Planning Department. In addition, the following shall be complied with:

(i) The project developer shall retain a Native American Monitor of Gabrieleño Ancestry to conduct a Native American Indian Sensitivity Training for construction personnel prior to commencement of any excavation activities. The training session shall include a handout and focus on how to identify Native American resources encountered during earthmoving activities and the procedures followed if resources are discovered, the duties of the Native American Monitor of Gabrieleño Ancestry and the general steps the Monitor would follow in conducting a salvage investigation.

(ii) The project developer shall retain a Native American Monitor of Gabrieleño Ancestry to be on-site during all project-related, ground-disturbing construction activities (e.g., pavement removal, auguring, boring, grading, excavation, potholing, trenching, and grubbing) of previously undisturbed native soils to a maximum depth of 30 feet below ground surface. A copy of the executed contract shall be submitted to the City of Ontario Planning Department prior to the issuance of any grading permit (any ground-disturbing activity). At their discretion, a Native American Monitor of Gabrieleño Ancestry can be present during the removal of dairy manure to native soil, but not at the developers' expense.

(iii) A qualified archaeologist and a Native American Monitor of Gabrieleño Ancestry shall evaluate all archaeological resources unearthed by project construction activities. If the resources are Native American in origin, the Tribe shall coordinate with the developer regarding treatment and curation of these resources. Typically, the Tribe will request reburial or preservation for educational purposes. If archeological features are discovered, the archeologist shall report such findings to the Ontario Planning Director. If the archeological resources are found to be significant, the archeologist shall determine

the appropriate actions, in cooperation with the City that shall be taken for exploration and/or salvage in compliance with CEQA Guidelines Section 15064.5(f).

(iv) Prior to the start of ground disturbing activities, the developer shall arrange a designated site location within the footprint of the project for the respectful reburial of Tribal human remains and/or ceremonial objects. All human skeletal material discoveries shall be reported immediately to the County Coroner. The Native American Monitor shall immediately divert work a minimum of 50 feet from the discovery site and place an exclusion zone around the burial. The Native American Monitor shall notify the construction manager who shall contact the San Bernardino County Coroner. All construction activity shall be diverted while the San Bernardino County Coroner determines if the remains are Native American. The discovery shall be confidential and secure to prevent further disturbance. If Native American, the San Bernardino County Coroner shall notify the Native American Heritage Commission (NAHC) as mandated by state law who will then appoint a Most Likely Descendent. In the case where discovered human remains cannot be documented and recovered on the same day, the remains shall be covered with muslin cloth and a steel plate that can be moved by heavy equipment placed over the excavation opening to protect the remains. If this type of steel plate is not available, a 24-hour guard shall be posted outside working hours. The Tribe shall make every effort to recommend diverting the project and keep the remains in situ and protected. If the project cannot be diverted, it may be determined that burials will be removed. If data recovery is approved by the Tribe, documentation shall be taken, which includes at a minimum detailed descriptive notes and sketches. Additional types of documentation shall be approved by the Tribe for data recovery purposes. Cremations will either be removed in bulk or means necessary to ensure complete recovery of all material. If the discovery of human remains includes four (4) or more burials, the location is considered a cemetery and a separate treatment plan shall be created. The project developer shall consult with the Tribe regarding avoidance of all cemetery sites. Once complete, a final report of all activities shall be submitted to the NAHC.

(v) There shall be no Scientific study or the utilization of any invasive diagnostics on any Native American human remains.

(vi) If the San Bernardino County Coroner determines the remains represent a historic non-Native American burial, the burial shall be treated in the same manner of respect with agreement of the San Bernardino County Coroner. Reburial will be in an appropriate setting. If the San Bernardino County Coroner determines the remains to be modern, the San Bernardino County Coroner shall take custody of the remains.

(vii) Each occurrence of human remains and associated funerary objects shall be stored using opaque cloth bags. All human remains, funerary objects, sacred objects and objects of cultural patrimony shall be removed to a secure container on site if possible. These items shall be retained and reburied within six months of recovery. The site of reburial/repatriation shall be on the project site, but at a location agreed upon between the Tribe and the developer and protected in perpetuity. There shall be no publicity regarding any cultural materials recovered.

2.11 Indemnification. The applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer. The City of Ontario shall promptly notify the applicant of any such claim, action or proceeding, and the City of Ontario shall cooperate fully in the defense.

2.12 Additional Fees.

(a) Within 5 days following final application approval, the Notice of Determination (NOD) filing fee shall be provided to the Planning Department. The fee shall be paid by check, made payable to the "Clerk of the Board of Supervisors", which shall be forwarded to the San Bernardino County

Clerk of the Board of Supervisors, along with all applicable environmental forms/notices, pursuant to the requirements of the California Environmental Quality Act (CEQA). Failure to provide said fee within the time specified may result in a 180-day extension to the statute of limitations for the filing of a CEQA lawsuit.

(b) After the Project's entitlement approval, and prior to issuance of final building permits, the Planning Department's Plan Check and Inspection fees shall be paid at the rate established by resolution of the City Council.

2.13 Additional Requirements.

(a) Tract Map File No. PMTT19-015 approval is contingent on City Council approval of related General Plan Amendment File No. PGPA19-008, Specific Plan Amendment File No. PSPA19-011, and PDA20-001. No building permits shall be issued until final approval is obtained per above, and until all outstanding parkland fees are remitted.

 City Engineer

THIS PROJECT SHALL COMPLY WITH THE REQUIREMENTS SET FORTH IN THE GENERAL STANDARD CONDITIONS OF APPROVAL ADOPTED BY THE CITY COUNCIL (RESOLUTION NO. 2017-027) AND THE PROJECT SPECIFIC CONDITIONS OF APPROVAL SPECIFIED IN HEREIN. ONLY APPLICABLE CONDITIONS OF APPROVAL ARE CHECKED. THE APPLICANT SHALL BE RESPONSIBLE FOR THE COMPLETION OF ALL APPLICABLE CONDITIONS OF APPROVAL PRIOR TO FINAL MAP APPROVAL, ISSUANCE OF PERMITS AND/OR OCCUPANCY CLEARANCE, AS SPECIFIED IN THIS REPORT.

1. PRIOR TO FINAL MAP APPROVAL, APPLICANT SHALL: **Check When Complete**

- 1.01 Dedicate to the City of Ontario, the right-of-way (in fee simple), described below:**
 - a. Property line corner ‘cut-back’ required at the intersection of Manitoba Place and A Street; Calgary Street and B Street.**
- 1.02 Dedicate to the City of Ontario, the following easement(s):**
 - a. 56’ public utility easement along private A Street and private B Street.**
 - b. 32’ public utility easement along private Alleys A, B and J.**
 - c. 26’ public utility easement along private Alleys C, D, E, F, G, H, I, K, L and M.**
- 1.03 Restrict vehicular access to the site as follows:** _____
- 1.04 Vacate the following street(s) and/or easement(s):** _____
- 1.05 Submit a copy of a recorded private reciprocal use agreement or easement. The agreement or easement shall ensure, at a minimum, common ingress and egress and joint maintenance of all common access areas and drive aisles.**
- 1.06 Provide (original document) Covenants, Conditions and Restrictions (CC&Rs) as applicable to the project and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&Rs shall provide for, but not be limited to, common ingress and egress, joint maintenance responsibility for all common access improvements, common facilities, parking areas, utilities, median and landscaping improvements and drive approaches, in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project. The CC&Rs shall also address the maintenance and repair responsibility for public improvements/utilities (sewer, water, storm drain, recycled water, etc.) located within open space/easements. In the event of any maintenance or repair of these facilities, the City shall only restore disturbed areas to current City Standards. Also, identify all common use/ private utility systems and solid waste collection facilities and detail the Operations and Maintenance of these facilities. The Solid Waste Handling Plan, shall be included in the CC&R’s with a provision that the HOA will enforce the can collections placement requirements of this Plan.**
- 1.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at <http://tceplumecleanup.com/>), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume “Disclosure Letter”. Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658.**
- 1.08 File an application for Reapportionment of Assessment, together with payment of a reapportionment processing fee, for each existing assessment district listed below. Contact the Financial Services Department at (909) 395-2124 regarding this requirement.**

(1) _____

(2) _____

- 1.09 Prepare a fully executed Subdivision Agreement (on City approved format and forms) with accompanying security as required, or complete all public improvements.
- 1.10 Provide a monument bond (i.e. cash deposit) in an amount calculated by the City's approved cost estimate spreadsheet (available for download on the City's website: www.ci.ontario.ca.us) or as specified in writing by the applicant's Registered Engineer or Licensed Land Surveyor of Record and approved by the City Engineer, whichever is greater.
- 1.11 Provide a preliminary title report current to within 30 days.
- 1.12 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2353 to initiate the CFD application process.
- 1.13 New Model Colony (NMC) Developments:
 - 1) Provide evidence of final cancellation of Williamson Act contracts associated with this tract, prior to approval of any final subdivision map. Cancellation of contracts shall have been approved by the City Council.
 - 2) Provide evidence of sufficient storm water capacity availability equivalents (Certificate of Storm Water Treatment Equivalents).
 - 3) Provide evidence of sufficient water availability equivalents (Certificate of Net MDD Availability).
- 1.14 Other conditions:
 - a. The final map and dedications shall comply with the approved The Avenue Specific Plan, Development Agreement, and the conditions of approval for this tentative tract map.

2. PRIOR TO ISSUANCE OF ANY PERMITS, APPLICANT SHALL:

**A. GENERAL
 (Permits includes Grading, Building, Demolition and Encroachment)**

- 2.01 Record Tract Map No. 20298 pursuant to the Subdivision Map Act and in accordance with the City of Ontario Municipal Code.
- 2.02 Submit a duplicate photo mylar of the recorded map to the City Engineer's office.
- 2.03 Note that the subject parcel is a recognized parcel in the City of Ontario per TM-18419.
- 2.04 Note that the subject parcel is an 'unrecognized' parcel in the City of Ontario and shall require a Certificate of Compliance to be processed unless a deed is provided confirming the existence of the

- parcel prior to the date of _____.
- 2.05 Apply for a: Certificate of Compliance with a Record of Survey; Lot Line Adjustment
 Make a Dedication of Easement.
 - 2.06 Provide (original document) Covenants, Conditions and Restrictions (CC&R's), as applicable to the project, and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&R's shall provide for, but not be limited to, common ingress and egress, joint maintenance of all common access improvements, common facilities, parking areas, utilities and drive approaches in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project.
 - 2.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at <http://tceplumecleanup.com/>), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658.
 - 2.08 Submit a soils/geology report.**
 - 2.09 Other Agency Permit/Approval: Submit a copy of the approved permit and/or other form of approval of the project from the following agency or agencies:
 - State of California Department of Transportation (Caltrans)
 - San Bernardino County Road Department (SBCRD)
 - San Bernardino County Flood Control District (SBCFCD)
 - Federal Emergency Management Agency (FEMA)
 - Cucamonga Valley Water District (CVWD) for sewer/water service
 - United States Army Corps of Engineers (USACE)
 - California Department of Fish & Game
 - Inland Empire Utilities Agency (IEUA)
 - Other: _____
 - 2.10 Dedicate to the City of Ontario the right-of-way described below:
_____ feet on _____
Property line corner 'cut-back' required at the intersection of _____
and _____.
 - 2.11 Dedicate to the City of Ontario the following easement(s): _____

 - 2.12 New Model Colony (NMC) Developments:**
 - 1) Submit a copy of the permit from the San Bernardino County Health Department to the Engineering Department and the Ontario Municipal Utilities Company (OMUC) for the destruction/abandonment of the on-site water well. The well shall be destroyed/abandoned in accordance with the San Bernardino County Health Department guidelines.**
 - 2) Make a formal request to the City of Ontario Engineering Department for the proposed temporary use of an existing agricultural water well for purposes other than agriculture, such as grading, dust

control, etc. Upon approval, the Applicant shall enter into an agreement with the City of Ontario and pay any applicable fees as set forth by said agreement.

3) Design proposed retaining walls to retain up to a maximum of three (3) feet of earth. In no case shall a wall exceed an overall height of nine (9) feet (i.e. maximum 6-foot high wall on top of a maximum 3-foot high retaining wall.

- 2.13 Submit a security deposit to the Engineering Department to guarantee construction of the public improvements required herein valued at _____% of the approved construction cost estimate. Security deposit shall be in accordance with the City of Ontario Municipal Code. Security deposit will be eligible for release, in accordance with City procedure, upon completion and acceptance of said public improvements.
- 2.14 The applicant/developer shall submit all necessary survey documents prepared by a Licensed Surveyor registered in the State of California detailing all existing survey monuments in and around the project site. These documents are to be reviewed and approved by the City Survey Office.
- 2.15 **Pay all Development Impact Fees (DIF) to the Building Department. Storm Drain Development Impact Fee, shall be paid to the Building Department. Final fee shall be determined based on the approved site plan.**
- 2.16 **Other conditions:**
 - a. **All the required improvements for this tract shall be subject to completion of the required public improvements including public utilities beyond the tract limits as specified in The Avenue Specific Plan, the Development Agreement and the Conditions of Approval for TM-18419.**
 - b. **Final Utilities Systems Map (USM): Submit a Final Utilities Systems Map as part of the precise grading plans submittal that conforms to the Conceptual USM dated 08/20/2020 and meets all of the City's USM requirements. The final utility design shall comply with all DDW (CCR §64572) and City of Ontario separation requirements which include a minimum 10' horizontal separation, outside wall to outside wall, between water and sewer and a minimum 5' horizontal separation, outside wall to outside wall, between water and all other utilities.**

B. PUBLIC IMPROVEMENTS
 (See attached Exhibit 'A' for plan check submittal requirements.)

2.17 Design and construct full public improvements in accordance with the City of Ontario Municipal Code, current City standards and specifications, master plans and the adopted specific plan for the area, if any. These public improvements shall include, but not be limited to, the following (checked boxes):

Improvement	Manitoba Place	Private A and B Streets	Calgary Street	Private Alleys A and B
Curb and Gutter	<input type="checkbox"/> New; ___ ft. from C/L <input type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace	<input type="checkbox"/> New; ___ ft. from C/L <input type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace	<input type="checkbox"/> New; ___ ft. from C/L <input type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace	<input type="checkbox"/> New; ___ ft. from C/L <input type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace
AC Pavement	<input type="checkbox"/> Replacement <input type="checkbox"/> Widen ___ additional feet along frontage, including pavm't transitions	<input type="checkbox"/> Replacement <input type="checkbox"/> Widen ___ additional feet along frontage, including pavm't transitions	<input type="checkbox"/> Replacement <input type="checkbox"/> Widen ___ additional feet along frontage, including pavm't transitions	<input type="checkbox"/> Replacement <input type="checkbox"/> Widen ___ additional feet along frontage, including pavm't transitions

Removal of Improvements	_____	_____	_____	_____
Other Improvements	_____	_____	_____	_____

Specific notes for improvements listed in item no. 2.17, above: _____

- 2.18 Construct a 2" asphalt concrete (AC) grind and overlay on the following street(s): _____
- 2.19 Reconstruction of the full pavement structural section, per City of Ontario Standard Drawing number 1011, may be required based on the existing pavement condition and final street design. Minimum limits of reconstruction shall be along property frontage, from street centerline to curb/gutter.

- 2.20 Make arrangements with the Cucamonga Valley Water District (CVWD) to provide water service sewer service to the site. This property is within the area served by the CVWD and Applicant shall provide documentation to the City verifying that all required CVWD fees have been paid.
- 2.21 Overhead utilities shall be under-grounded, in accordance with Title 7 of the City's Municipal Code (Ordinance No. 2804 and 2892). Developer may pay in-lieu fee, approximately _____, for undergrounding of utilities in accordance with Section 7-7.303.e of the City's Municipal Code.
- 2.22 Other conditions:**
 - a. **The following streets may be under moratorium at the time of this development: La Avenida, Manitoba Place and Calgary Street. Any street cuts will require a 2" grind and overlay curb to curb 100' in each direction of the cut.**

C. SEWER

- 2.23 A 8 inch sewer main is available for connection by this project in Manitoba Place and Calgary Street (Ref: Sewer plan bar code: S15231 and S15232)**
- 2.24 Design and construct a sewer main extension. A sewer main is not available for direct connection. The closest main is approximately _____ feet away.
- 2.25 Submit documentation that shows expected peak loading values for modeling the impact of the subject project to the existing sewer system. The project site is within a deficient public sewer system area. Applicant shall be responsible for all costs associated with the preparation of the model. Based on the results of the analysis, Applicant may be required to mitigate the project impact to the deficient public sewer system, including, but not limited to, upgrading of existing sewer main(s), construction of new sewer main(s) or diversion of sewer discharge to another sewer.
- 2.26 Other conditions:**
 - a. **Infrastructure listed on Section 2.23 has not been accepted by the City. If there are outstanding improvements necessary to accept this project's sewer connection (by the time this development is underway), the applicant/developer shall be responsible to complete the necessary improvements.**
 - b. **The applicant/developer shall design and construct a sewer main extension on Calgary Street to service proposed lots 105 and 106.**
 - c. **Sewer Sub-Area Master Plans (SSAMP): Convert the Conceptual Sewer Sub-Area Master Plan dated 8/24/2020 in to a Final SSAMP pursuant to Section 4-8 of the Sewer Master Plan (SMP) and submitted to OMUC for review and approval with the first submittal of the sewer plans and prior to issuance of any permits.**
 - d. **The applicant/developer shall design and construct 8-inch (minimum) sewer mains (or approved size per Final SSAMP) throughout the Tract Map streets See Conceptual Utility Systems Map dated 08/20/2020 and Conceptual SSAMP dated 8/24/2020 for reference.**
 - e. **Sewer Capacity Fee: In order to accommodate the change in land use for The Avenue Specific Plan (Planning Area 6B), additional sewage flow capacity is required for the Project. OWNER shall pay the CITY the amount of Eleven Thousand Two Hundred Fifty Two Dollars (\$11,252) subject to the terms of the Development Agreement, and such payment shall be used by the CITY to purchase additional capacity from the Inland Empire Utilities Agency (IEUA) necessary to support Property development.**

D. WATER

- 2.27 **A 8 inch water main is available for connection by this project in in Manitoba Place and Calgary Street (Ref: Water plan bar code: W15432 and W15433)**
- 2.28 Design and construct a water main extension. A water main is not available for direct connection. The closest main is approximately _____ feet away.
- 2.29 **Other conditions:**
 - a. **Infrastructure listed on Section 2.27 has not been accepted by the City. If there are outstanding improvements necessary to accept this project's domestic water connection (by the time this development is underway), the applicant/developer shall be responsible to complete the necessary improvements.**
 - b. **The applicant/developer shall design and construct 8-inch water mains throughout the Tract Map streets. See Conceptual Utility Systems Map dated 08/20/2020 for reference.**

E. RECYCLED WATER

- 2.30 **A 8 inch recycled water main is available for connection by this project in La Avenida Drive. (Ref: Recycled Water plan bar code: P11501)**
- 2.31 **Design and construct an on-site recycled water system for this project. A recycled water main does exist in the vicinity of this project.**
- 2.32 Design and construct an on-site recycled water ready system for this project. A recycled water main does not currently exist in the vicinity of this project, but is planned for the near future. If Applicant would like to connect to this recycled water main when it becomes available, the cost for the connection shall be borne solely by the Applicant.
- 2.33 **Submit two (2) hard copies and one (1) electronic copy, in PDF format, of the Engineering Report (ER), for the use of recycled water, to the OMUC for review and subsequent submittal to the California Department of Public Health (CDPH) for final approval.**

Note: The OMUC and the CDPH review and approval process will be approximately three (3) months. Contact the Ontario Municipal Utilities Company at (909) 395-2647 regarding this requirement.
- 2.34 **Other conditions:**
 - a. **Infrastructure listed on Section 2.30 has not been accepted by the City. If there are outstanding improvements necessary to accept this project's recycled water connection (by the time this development is underway), the applicant/developer shall be responsible to complete the necessary improvements.**
 - b. **The applicant/developer shall design and construct an 8-inch recycled water main in Manitoba Place with a point of connection in La Avenida Drive, and extending past "A" Street to southern boundary of Lot A to serve proposed Lot A. See Conceptual USM dated 08/20/2020 for reference.**

F. TRAFFIC / TRANSPORTATION

- 2.35 Submit a focused traffic impact study, prepared and signed by a Traffic/Civil Engineer registered in the State of California. The study shall address, but not be limited to, the following issues as required by the City Engineer:
 - 1. On-site and off-site circulation
 - 2. Traffic level of service (LOS) at 'build-out' and future years
 - 3. Impact at specific intersections as selected by the City Engineer
- 2.36 New traffic signal installations shall be added to Southern California Edison (SCE) customer account number # 2-20-044-3877.

- 2.37 Other conditions:**
- a. **The applicant/developer shall design a modified choker and relocate an existing street light at the southeast corner of Calgary Street and B Street per exhibit provided on June 25, 2020.**

G. DRAINAGE / HYDROLOGY

- 2.38 A 36 and 24 inch storm drain main is available to accept flows from this project in Manitoba Place and Calgary Street respectively. (Ref: Storm Drain plan bar code: D13282 and D13283)**
- 2.39 Submit a hydrology study and drainage analysis, prepared and signed by a Civil Engineer registered in the State of California. The study shall be prepared in accordance with the San Bernardino County Hydrology Manual and City of Ontario standards and guidelines. Additional drainage facilities, including, but not limited to, improvements beyond the project frontage, may be required to be designed and constructed, by Applicant, as a result of the findings of this study.**
- 2.40 An adequate drainage facility to accept additional runoff from the site does not currently exist downstream of the project. Design and construct a storm water detention facility on the project site. 100 year post-development peak flow shall be attenuated such that it does not exceed 80% of pre-development peak flows, in accordance with the approved hydrology study and improvement plans.
- 2.41 Submit a copy of a recorded private drainage easement or drainage acceptance agreement to the Engineering Department for the acceptance of any increase to volume and/or concentration of historical drainage flows onto adjacent property, prior to approval of the grading plan for the project.
- 2.42 Comply with the City of Ontario Flood Damage Prevention Ordinance (Ordinance No. 2409). The project site or a portion of the project site is within the Special Flood Hazard Area (SFHA) as indicated on the Flood Insurance Rate Map (FIRM) and is subject to flooding during a 100 year frequency storm. The site plan shall be subject to the provisions of the National Flood Insurance Program.
- 2.43 Other conditions:**
- a. **Submit a hydrology study as noted in Section 2.39 above for the additional run-off due to the land use change.**
- b. **Infrastructure listed on Section 2.38 has not been accepted by the City. If there are outstanding improvements necessary to accept this project's storm drain connection (by the time this development is underway), the applicant/developer shall be responsible to complete the necessary improvements**

H. STORM WATER QUALITY / NATIONAL POLLUTANT DISCHARGE AND ELIMINATION SYSTEM (NPDES)

- 2.44 401 Water Quality Certification/404 Permit – Submit a copy of any applicable 401 Certification or 404 Permit for the subject project to the City project engineer. Development that will affect any body of surface water (i.e. lake, creek, open drainage channel, etc.) may require a 401 Water Quality Certification from the California Regional Water Quality Control Board, Santa Ana Region (RWQCB) and a 404 Permit from the United States Army Corps of Engineers (USACE). The groups of water bodies classified in these requirements are perennial (flow year round) and ephemeral (flow during rain conditions, only) and include, but are not limited to, direct connections into San Bernardino County Flood Control District (SBCFCD) channels. If a 401 Certification and/or a 404 Permit are not required, a letter confirming this from Applicant's engineer shall be submitted. Contact information: USACE (Los Angeles District) (213) 452-3414; RWQCB (951) 782-4130.
- 2.45 Submit a Water Quality Management Plan (WQMP). This plan shall be approved by the Engineering Department prior to approval of any grading plan. The WQMP shall be submitted, utilizing the current San Bernardino County Stormwater Program template, available at: <http://www.sbcounty.gov/dpw/land/npdes.asp>.**

- 2.46 Design and construct a Connector Pipe Trash Screen or equivalent Trash Treatment Control Device, per catch basin located within or accepting flows tributary of a Priority Land Use (PLU) area that meets the Full Capture System definition and specifications, and is on the Certified List of the State Water Resources Control Board. The device shall be adequately sized per catch basin and include a deflector screen with vector control access for abatement application, vertical support bars, and removable component to facilitate maintenance and cleaning.
- 2.47 Other conditions: _____

J. SPECIAL DISTRICTS

- 2.48 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2353 to initiate the CFD application process.
- 2.49 Other conditions: _____

K. FIBER OPTIC

- 2.50 Design and construct fiber optic system to provide access to the City's conduit and fiber optic system per the City's Fiber Optic Master Plan. Building entrance conduits shall start from the closest OntarioNet hand hole constructed along the project frontage in the ROW and shall terminate in the main telecommunications room for each building. Conduit infrastructure shall interconnect with the primary and/or secondary backbone fiber optic conduit system at the nearest OntarioNet hand hole.
- 2.51 Refer to the City's Fiber Optic Master Plan for design and layout guidelines. Contact the Broadband Operations Department at (909) 395-2000, regarding this requirement.

L. Solid Waste

- 2.52 Onsite solid waste shall be designed in accordance with the City's Solid Waste Manual location at:
<http://www.ontarioca.gov/municipal-utilities-company/solid-waste>
- 2.53 Other conditions:
 - a. Integrated Waste and Organics Recycling: This site shall comply with the requirements of State Assembly Bill AB 1826 and AB 341, the Integrated Waste Department, and the Refuse & Recycling Planning Manual. The City of Ontario is dedicated to meeting its diversion goals, please contact the Integrated Waste Department at (909) 395-2050 to start.
 - i. Each residential unit shall be provided with two (2) 96-gallon automated cans (refuse and recycling) and one (1) 32-gallon automated cans (organics) and corresponding storage and staging space.
 - ii. Organics Separation and Collection: Organic waste shall be diverted and collected separately from recycling and other refuse wastes.

- iii. **Install a three (3) Bin Trash Enclosure (a separate 4CY bin for refuse, recycling, and organic waste) for the park and community center, at a minimum unless otherwise approved by the Integrated Waste Division Manager. Automated can service may be considered through the submittal of a variance.**
 - iv. **All private haulers shall be formally approved and permitted by the City of Ontario Integrated Waste Department and shall comply with City regulations and code requirements. No private hauling is permitted for refuse collection.**
- b. **Solid Waste Collections: The Developer shall provide all buyers an informational disclosure with map exhibit showing the designated can placement locations for collections for their units. This informational disclosure with map exhibit shall be submitted with Precise Grading Plan for review and approval of Ontario Municipal Utility Company.**
- c. **Final Solid Waste Handling Plan (SWHP): Submit a Final SWHP as part of the precise grading plans submittal that conforms to the Conceptual SWHP dated 08/20/2020 and meets the City's SWHP requirements for OMUC review and approval. The Final SWHP shall reflect any site design changes needed to comply the final conditions of approval.**

3. PRIOR TO ISSUANCE OF A CERTIFICATE OF OCCUPANCY, APPLICANT SHALL:

- 3.01** Set new monuments in place of any monuments that have been damaged or destroyed as a result of construction of the subject project. Monuments shall be set in accordance with City of Ontario standards and to the satisfaction of the City Engineer.
- 3.02** Complete all requirements for recycled water usage.
 - 1) Procure from the OMUC a copy of the letter of confirmation from the California Department of Public Health (CDPH) that the Engineering Report (ER) has been reviewed and the subject site is approved for the use of recycled water.
 - 2) Obtain clearance from the OMUC confirming completion of recycled water improvements and passing of shutdown tests and cross connection inspection, upon availability/usage of recycled water.
 - 3) Complete education training of on-site personnel in the use of recycled water, in accordance with the ER, upon availability/usage of recycled water.
- 3.03** The applicant/developer shall submit all final survey documents prepared by a Licensed Surveyor registered in the State of California detailing all survey monuments that have been preserved, revised, adjusted or set along with any maps, corner records or Records of Survey needed to comply with these Conditions of Approvals and the latest edition of the California Professional Land Survey Act. These documents are to be reviewed and approved by the City Survey Office.
- 3.04** NMC Projects: For developments located at an intersection of any two collector or arterial streets, the applicant/developer shall set a monument if one does not already exist at that intersection. Contact the City Survey office for information on reference benchmarks, acceptable methodology and required submittals.
- 3.05** Confirm payment of all Development Impact Fees (DIF) to the Building Department.
- 3.06** Submit electronic copies (PDF and Auto CAD format) of all approved improvement plans, studies and reports (i.e. hydrology, traffic, WQMP, etc.).

4. PRIOR TO FINAL ACCEPTANCE, APPLICANT SHALL:

- 4.01** Complete all Conditions of Approval listed under Sections 1-3 above.
- 4.02** Pay all outstanding fees pursuant to the City of Ontario Municipal Code, including but not limited to, plan check fees, inspection fees and Development Impact Fees.
- 4.03** The applicant/developer shall submit a written request for the City's final acceptance of the project addressed to the City Project Engineer. The request shall state that all Conditions of Approval have been completed and shall be signed by the applicant/developer. Upon receipt of the request, review of the request shall be a minimum of 10 business days. Conditions of Approval that are deemed incomplete by the City will cause delays in the acceptance process.
- 4.04** Submit record drawings (mylar and PDF) for all public improvements identified within Section 2 of these Conditions of Approval.

EXHIBIT 'A'

**ENGINEERING DEPARTMENT
First Plan Check Submittal Checklist**

Project Number: Tract Map No. 20298

The following items are required to be included with the first plan check submittal:

1. **A copy of this check list**
2. **Payment of fee for Plan Checking**
3. **One (1) copy of Engineering Cost Estimate (on City form) with engineer's wet signature and stamp.**
4. **One (1) copy of project Conditions of Approval**
5. **Include a PDF (electronic submittal) of each required improvement plan at every submittal.**
6. **Two (2) sets of Potable and Recycled Water demand calculations (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size).**
7. **Three (3) sets of Public Street improvement plan with street cross-sections**
8. **Three (3) sets of Private Street improvement plan with street cross-sections**
9. **Four (4) sets of Public Water improvement plan (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size)**
10. **Four (4) sets of Recycled Water improvement plan (include recycled water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size and an exhibit showing the limits of areas being irrigated by each recycled water meter)**
11. **Four (4) sets of Public Sewer improvement plan**
12. **Five (5) sets of Public Storm Drain improvement plan**
13. **Three (3) sets of Public Street Light improvement plan**
14. **Three (3) sets of Signing and Striping improvement plan**
15. **Three (3) sets of Fiber Optic plan (include Auto CAD electronic submittal)**
16. **Three (3) sets of Dry Utility plans within public right-of-way (at a minimum the plans must show existing and ultimate right-of-way, curb and gutter, proposed utility location including centerline dimensions, wall to wall clearances between proposed utility and adjacent public line, street work repaired per Standard Drawing No. 1306. Include Auto CAD electronic submittal)**
17. **Three (3) sets of Traffic Signal improvement plan and One (1) copy of Traffic Signal Specifications with modified Special Provisions. Please contact the Traffic Division at (909) 395-2154 to obtain Traffic Signal Specifications.**
18. **Two (2) copies of Water Quality Management Plan (WQMP), including one (1) copy of the approved Preliminary WQMP (PWQMP).**
19. **One (1) copy of Hydrology/Drainage study**
20. **One (1) copy of Soils/Geology report**

21. **Payment for Final Map/Parcel Map processing fee**
22. **Three (3) copies of Final Map/Parcel Map**
23. **One (1) copy of approved Tentative Map**
24. **One (1) copy of Preliminary Title Report (current within 30 days)**
25. **One (1) copy of Traverse Closure Calculations**
26. **One (1) set of supporting documents and maps (legible copies): referenced improvement plans (full size), referenced record final maps/parcel maps (full size, 18"x26"), Assessor's Parcel map (full size, 11"x17"), recorded documents such as deeds, lot line adjustments, easements, etc.**
27. **Two (2) copies of Engineering Report and an electronic file (include PDF format electronic submittal) for recycled water use**
28. Other: _____

CITY OF ONTARIO

MEMORANDUM

TO: Alexis Vaughn, Assistant Planner
Planning Department

FROM: Paul Ehrman, Deputy Fire Chief/Fire Marshal
Fire Department

DATE: November 7, 2019

SUBJECT: PMTT19-015 – A Tentative Tract Map (TT 20298) to subdivide 10.49 acres of land into 110 numbered lots and 4 lettered lots located at the northeast corner of La Avenida Drive and Manitoba Place, within the School land use district of The Avenue Specific Plan (APNs: 0218-652-27).

-
- The plan **does** adequately address Fire Department requirements at this time.
- Standard Conditions of Approval apply, as stated below.
-

SITE AND BUILDING FEATURES:

- A. 2013 CBC Type of Construction: Type V-B wood frame
- B. Type of Roof Materials: non-rated
- C. Ground Floor Area(s): Various
- D. Number of Stories: Not Listed
- E. Total Square Footage: Various
- F. 2013 CBC Occupancy Classification(s): R-3, U

CONDITIONS OF APPROVAL:

1.0 GENERAL

- ☒ 1.1 The following are the Ontario Fire Department (“Fire Department”) requirements for this development project, based on the current edition of the California Fire Code (CFC), and the current versions of the Fire Prevention Standards (“Standards.”) It is recommended that the applicant or developer transmit a copy of these requirements to the on-site contractor(s) and that all questions or concerns be directed to the Bureau of Fire Prevention, at (909) 395-2029. For copies of Ontario Fire Department Standards please access the City of Ontario web site at www.ontarioca.gov, click on “Fire Department” and then on “Standards and Forms.”
- ☒ 1.2 These Fire Department conditions of approval are to be included on any and all construction drawings.

2.0 FIRE DEPARTMENT ACCESS

- ☒ 2.1 Fire Department vehicle access roadways shall be provided to within 150 ft. of all portions of the exterior walls of the first story of any building, unless specifically approved. Roadways shall be paved with an all-weather surface and shall be a minimum of twenty-four (24) ft. wide. See Standard #B-004.
- ☒ 2.2 In order to allow for adequate turning radius for emergency fire apparatus, all turns shall be designed to meet the minimum twenty five feet (25’) inside and forty-five feet (45’) outside turning radius per Standard #B-005.
- ☒ 2.3 Fire Department access roadways that exceed one hundred and fifty feet (150’) in length shall have an approved turn-around per Standard #B-002.
- ☒ 2.7 Any time PRIOR to on-site combustible construction and/or storage, a minimum twenty-four (24) ft. wide circulating all weather access roads shall be provided to within 150 ft. of all portions of the exterior walls of the first story of any building, unless specifically approved by fire department and other emergency services.

3.0 WATER SUPPLY

- ☒ 3.1 The required fire flow per Fire Department standards, based on the 2016 California Fire Code, Appendix B, is 1500 gallons per minute (g.p.m.) for 2 hours at a minimum of 20 pounds per square inch (p.s.i.) residual operating pressure.
- ☒ 3.2 Off-site (public) fire hydrants are required to be installed on all frontage streets, at a minimum spacing of three hundred foot (300’) apart, per Engineering Department specifications.
- ☒ 3.4 The public water supply, including water mains and fire hydrants, shall be tested and approved by the Engineering Department and Fire Department prior to combustible construction to assure availability and reliability for firefighting purposes.

4.0 FIRE PROTECTION SYSTEMS

- ☒ 4.3 An automatic fire sprinkler system is required. The system design shall be in accordance with National Fire Protection Association (NFPA) Standard 13 D. All new fire sprinkler systems, except those in single family dwellings, which contain twenty (20) sprinkler heads or more shall be monitored by an approved listed supervising station. An application along with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.

5.0 BUILDING CONSTRUCTION FEATURES

- ☒ 5.1 The developer/general contractor is to be responsible for reasonable periodic cleanup of the development during construction to avoid hazardous accumulations of combustible trash and debris both on and off the site.
- ☒ 5.2 Approved numbers or addresses shall be placed on all new and existing buildings in such a position as to be plainly visible and legible from the street or road fronting the property. Homes that do not front street shall be provided with an address entry sign at the street. Address numbers shall contrast with their background. See Section 9-1 6.06 of the Ontario Municipal Code and Standards #H-003 and #H-002.
- ☒ 5.3 Single station smoke alarms and carbon monoxide alarms are required to be installed per the California Building Code and the California Fire Code.
- ☒ 5.5 All residential chimneys shall be equipped with an approved spark arrester meeting the requirements of the California Building Code.

Project Name and Location:

The Avenue - Acre Subdivision into 114 Lots & Park
 NEC La Avenida & Manitoba

Applicant/Representative:

Jason Lee – JasonL@distinguishedhomes.com
 8101 E Kaiser Blvd, Ste. 140
 Anaheim Hills, CA 92808

A Tentative Tract Map (07/17/2020) has been approved with the consideration that the following conditions below be met upon submittal of the landscape construction documents.

A Tentative Tract Map (dated) has not been approved. Corrections noted below are required prior to DAB approval.

CONDITIONS OF APPROVAL:

1. Include response sheet with resubmittal.
2. Note for compaction to not be greater than 85% at landscape areas; all finished grades 1 ½" below finished surfaces; landscaped slopes to be max 3:1 – change proposed 2:1 slopes (section H-H and General Notes #12).

On Grading or Utility Construction Plans:

3. Storm water infiltration devices located in parkways or other landscape areas shall be routed to this department to be reviewed and approved prior to permit approval or installation. Storm water infiltration devices located in landscape areas shall be reviewed and approved by the Landscape Planning Division prior to installation.
4. Show infiltrating catch basins with two ¾" dia. holes in bottom set on 12" square of filter fabric wrapped gravel, located 5' or greater from buildings and 24" from sidewalk, add detail.
5. Show or note transformers shall be located in planter areas, and set back 3' from paving for small transformers less than 4' high and 5' setback for large transformer greater than 4' high. Locate on level grade. Coordinate with landscape plans.
6. Show or note backflow devices shall be located in planter areas, and set back min 3' from paving Locate on level grade. Coordinate with landscape plans.
7. Wall footings shall not restrict landscape; max 12" in front of footing with of 12" of cover.
8. Wall openings for drainage overflow shall be max 4" wide.
9. Provide a solid surface path from driveway to side yard gate for entry and trash bin access.
10. AC units shall be located in residential side yards, opposite the main back yard access path with gate, or a second gate and solid surface path on the opposite side added for access.

Broadband Operations	<i>Anna Vaca</i>	Sr. Systems Analyst	12/06/2019
Department	Signature	Title	Date

1. The City of Ontario is developing a fiber-optic telecommunications system throughout the city commonly known as OntarioNet. The fiber-optic telecommunications system is capable of providing advanced Internet/data services to homes and businesses in feasible areas within the city. OntarioNet will provide community related services including: traffic management; online civic services; meter reading; educational services; and a variety of other community services. OntarioNet and the high-speed data services it provides will keep the city on par with the modern workforce and ever changing lifestyles of the people and the community.
2. Communication systems proposed on-site facilities will be placed underground within a duct and structure system to be installed by the developer, as illustrated in Exhibit A, "Fiber Optics Plan". Maintenance of the installed system will be the responsibility of the City and/or Special District fiber optic entity and not that of the developer, private homeowners association or private homeowners. Development of the project requires the installation by the developer of all fiber optic infrastructure necessary to service the project as a standalone development.
3. The City requires public utility easement for fiber optics on all private aisles/alley ways.
4. Trenching, joint trenching, and boring shall be used to install the fiber-optic conduits. Fiber-optic conduit placement will generally be in a joint trench with Street Light conduits or in a separate trench/bore and in the Right-of-Way (ROW) generally placed behind the sidewalk. Resulting conduit placement will be on the north side of street and the east side of street based on the direction of the street. Properly sized handholes shall be placed along the conduit path no greater than 500-feet apart in major streets and no greater than 300-feet apart within in-tract community streets. Handholes shall be strategically placed to allow for efficient entrance into commercial buildings, and residential properties and multi-dwelling units.
5. Structured Wiring – An integrated structured wiring system (low-voltage wiring) provides infrastructure for today's technology applications and the framework for the future technology advances. Requirements and benefits of a structured wiring system include:
 - Residential (single-family and multi-family), commercial and industrial developments shall adhere to the City's Structured Wiring ordinance
 - Allows for uniform receipt & distribution of technology services
 - Ensures scalability of wiring for future technology advances
 - Provides consistent & identical wiring protocols throughout developments
 - Enables the property infrastructure to interface efficiently with broadband networks for highest bandwidth capacity
 - Adoption of these standards will minimize retrofitting required to ensure new property owners are capable of the latest technologies and services
6. Building Entrance (Multi-family) - Design and install fiber optic conduit at a minimum depth of 36 inches. Trenching shall be per City Standard for Commercial Buildings. (1) 2-inch HDPE SDR-11 (Smoothwall) roll pipe (Orange) duct. Install locate/tracer wires minimum 12AWG within conduit bank and fiber warning tape 18-inch above the uppermost duct.
7. Multi-family and commercial properties shall terminate conduit in an electrical room adjacent to the wall no less than five inches above the finished floor. A 20" width X length 36" space shall be reserved on the plywood wall for OntarioNet equipment. This space shall be labeled "OntarioNet Only". Ontario Conduit shall be labeled "OntarioNet"
8. A minimum 1.5-inch joint use telecommunications conduit with pull-rope from the multi-family or commercial building communal telecom/electrical room/closet to each multi-family or commercial building unit shall be installed. See Structured Wiring Checklist on City's website for additional details.
9. A Fiber Optics Improvement Design Plan sheet should be part of the Design Plan submission and should be provided in digital format (PDF) as well, on future revisions

Gabrieleno Band of Mission Indians – Kizh Nation

Historically known as The Gabrielino Tribal Council - San Gabriel Band of Mission Indians
recognized by the State of California as the aboriginal tribe of the Los Angeles basin

August 12, 2020

Dear Alexis Vaughn,

The mitigation measures should be specific to TCR for purposes of complying with CEQA therefore please utilize the attached mitigation measures for your project. Thank you

MM TCR-1 Prior to the commencement of any ground disturbing activity at the project site, the project applicant shall retain a Native American Monitor approved by the Gabrieleno Band of Mission Indians-Kizh Nation – the tribe that consulted on this project pursuant to Assembly Bill A52 (the “Tribe” or the “Consulting Tribe”). A copy of the executed contract shall be submitted to the City of Ontario Planning and Building Department prior to the issuance of any permit necessary to commence a ground-disturbing activity. The Tribal monitor will only be present on-site during the construction phases that involve ground-disturbing activities. Ground disturbing activities are defined by the Tribe as activities that may include, but are not limited to, pavement removal, potholing or auguring, grubbing, tree removals, boring, grading, excavation, drilling, and trenching, within the project area. The Tribal Monitor will complete daily monitoring logs that will provide descriptions of the day's activities, including construction activities, locations, soil, and any cultural materials identified. The on-site monitoring shall end when all ground-disturbing activities on the Project Site are completed, or when the Tribal Representatives and Tribal Monitor have indicated that all upcoming ground-disturbing activities at the Project Site have little to no potential for impacting Tribal Cultural Resources. Upon discovery of any Tribal Cultural Resources, construction activities shall cease in the immediate vicinity of the find (not less than the surrounding 100 feet) until the find can be assessed. All Tribal Cultural Resources unearthed by project activities shall be evaluated by the qualified archaeologist and Tribal monitor approved by the Consulting Tribe. If the resources are Native American in origin, the Consulting Tribe will retain it/them in the form and/or manner the Tribe deems appropriate, for educational, cultural and/or historic purposes. If human remains and/or grave goods are discovered or recognized at the Project Site, all ground disturbance shall immediately cease, and the county coroner shall be notified per Public Resources Code Section 5097.98, and Health & Safety Code Section 7050.5. Human remains and grave/burial goods shall be treated alike per California Public Resources Code section 5097.98(d)(1) and (2). Work may continue on other parts of the Project Site while evaluation and, if necessary, mitigation takes place (CEQA Guidelines Section 15064.5[f]). If a non-Native American resource is determined by the qualified archaeologist to constitute a “historical resource” or “unique archaeological resource,” time allotment and funding sufficient to allow for implementation of avoidance measures, or appropriate mitigation, must be available. The treatment plan established for the resources shall be in accordance with CEQA

Gabrieleno Band of Mission Indians – Kizh Nation
(626)5215827

PO Box 393
email: Admin@gabrielenoindians.org

Covina, CA 91723
website: www.gabrielenoindians.org

Guidelines Section 15064.5(f) for historical resources and PRC Sections 21083.2(b) for unique archaeological resources. Preservation in place (i.e., avoidance) is the preferred manner of treatment. If preservation in place is not feasible, treatment may include implementation of archaeological data recovery excavations to remove the resource along with subsequent laboratory processing and analysis. Any historic archaeological material that is not Native American in origin shall be curated at a public, non-profit institution with a research interest in the materials, such as the Natural History Museum of Los Angeles County or the Fowler Museum, if such an institution agrees to accept the material. If no institution accepts the archaeological material, it shall be offered to a local school or historical society in the area for educational purposes.

With respect,

Andrew Salas, Chairman

FILE NO(S): PDA20-001

SUBJECT: A Development Agreement (File No. PDA20-001) between the City of Ontario and Ontario Schaefer Holdings, LLC., to establish the terms and conditions for the development of Tentative Tract Map 20298 (File No. PMTT19-015), a 10.49 acre property located at the northeast corner of La Avenida Drive and Manitoba Place, within the proposed Low-Medium Density Residential land use district of The Avenue Specific Plan (APN: 0218-652-27). **Submitted by Ontario Schaefer Holdings, LLC. City Council action is required.**

PROPERTY OWNER: Ontario Schaefer Holdings, LLC., a Delaware limited liability company

RECOMMENDED ACTION: That the Planning Commission consider and recommend City Council adoption of an ordinance approving the Development Agreement (File No. PDA20-001) between the City of Ontario and Ontario Schaefer Holdings, LLC., pursuant to the facts and reasons contained in the staff report and attached resolution.

PROJECT SETTING: The project site is comprised of 10.49 acres of land located at the northeast corner of La Avenida and Manitoba Place, within the proposed low-medium density land use district of The Avenue Specific Plan, and is depicted in Figure 1: Project Location, below.

PROJECT ANALYSIS:

(1) Background — On February 16, 2007, the City Council approved The Avenue Specific Plan (File No. PSP05-003), which addressed potential development of approximately 568 acres of land including up to 2,875 residential units, 130,680 square feet of commercial space, pocket parks and public trails. On January 27, 2010, the City Council adopted a compressive update to The Ontario Plan (File No. PGPA06-001).

PC	10/27/20		Recommend
CC	11/17/20		Final

The Ontario Ranch financial commitments required for construction of properties within a specific plan are substantial. Therefore, in order to adequately forecast these costs and gain assurance that the project may proceed under the existing policies, rules and regulations, Ontario Schaefer Holdings, LLC ("Owner") has requested that the City enter into negotiations to create a Development Agreement ("Agreement").

In accordance with California Government Code Section 65865, which in part states that that "[a]ny city... may enter into a Development Agreement with any person having a legal or equitable interest in real property for the development of such property..." and California Government Code Section 65865.52, which in part states that "a Development Agreement shall specify the duration of the Agreement, the permitted uses of the property... and may include conditions, terms, restrictions..." the City of Ontario adopted Resolution No. 2002-100 setting forth the procedures and requirements for consideration of Development Agreements. Furthermore, the Financing and Construction Agreement with the NMC Builders, LLC (NMC Builders), requires those developments wishing to use the infrastructure it created to enter into Development Agreements with the City of Ontario. Pursuant to these procedures and requirements, staff entered into negotiations with the Owner to create a Development Agreement for consideration by the Planning Commission and City Council.

The proposed Agreement (File No. PDA20-001) is based upon the model Development Agreement that was developed in coordination with the City Attorney and legal counsel for NMC Builders. This model Development Agreement is consistent with the provisions of the Construction Agreement. The terms of the agreement between NMC Builders' members requires that members of the LLC enter into Development Agreements that are consistent with the provisions of the Construction Agreement.

(2) Staff Analysis — Originally, the 10.49-acre Property was part of a future school site, included with the adjacent property (approx. 10.22 acres) directly east, totaling approximately 20.71 acres. The Mountain View School District ("School District") recently conducted a school site analysis for Ontario Ranch, and concluded the School District needed approximately 10 acres of land to meet the educational needs for Ontario Ranch residents. Therefore, the Owner is proposing a General Plan Amendment (File No. PGPA19-008) to modify the Policy Plan (General Plan) Land Use Plan (Exhibit LU-01) component of The Ontario Plan, changing the land use designation on 10.49 acres of land, from School to Low-Medium Density Residential, in conjunction with modification of the Future Buildout Table (Exhibit LU-03) to be consistent with the proposed land use designation change, and an Amendment to The Avenue Specific Plan (File No. PSPA19-011), changing the land use designation on the project site, from School to Low-Medium Density Residential, generally located at the northeast corner of La Avenida Drive and Manitoba Place.

Additionally, the Owner is proposing an Agreement to include the 10.49-acre site within The Avenue Specific Plan to allow for the construction of necessary public infrastructure to serve the Property and quantify fees associated with Project development.

The Agreement proposes to include 10.49 acres of land within the proposed Low-Medium Density Residential land use district of The Avenue Specific Plan, as shown on the attached Exhibit "A". The Agreement grants the Owner a vested right to develop Tentative Tract Map 20298 (File No. PMTT19-015), provided the Owner complies with the terms and conditions of the Specific Plan and EIR.

The Tentative Tract Map 20298 (see Exhibit "B") is located at the northeast corner of La Avenida Drive and Manitoba Place, and proposes to subdivide approximately 10.49 acres of land into 106 numbered lots and 19 lettered lots for residential, public/private streets, landscaped neighborhood edges, and common open space purposes.

The term of the Agreement is for ten (10) years, with a five (5) year option to renew. The main points of the agreement address funding for all new City expenses created by the project, which includes: Development Impact Fees (DIF) for construction of public improvements (i.e. streets and bridges, sewer, water, storm drain and fiber); Public Service Funding to ensure adequate provisions of public services (police, fire and other public services); the creation of a Community Facilities District (CFD) for the maintenance of public facilities.

Staff finds that the Agreement is consistent with State law, The Ontario Plan, and the City's Development Agreement policies. As a result, staff is recommending approval of the application to the Planning Commission. If the Planning Commission finds the Development Agreement is acceptable, a recommendation of approval to the City Council would be appropriate.

COMPLIANCE WITH THE ONTARIO PLAN: The proposed project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan (TOP). More specifically, the goals and policies of TOP that are furthered by the proposed project are as follows:

(1) City Council Goals.

- Invest in the Growth and Evolution of the City's Economy
- Operate in a Businesslike Manner
- Pursue City's Goals and Objectives by Working with Other Governmental Agencies
- Focus Resources in Ontario's Commercial and Residential Neighborhoods
- Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
- Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in the New Model Colony

(2) Vision.

Distinctive Development:

- Commercial and Residential Development

➤ Development quality that is broadly recognized as distinctive and not exclusively tied to the general suburban character typical of much of Southern California.

(3) Governance.

Decision Making:

- Goal G1: Sustained decision-making that consistently moves Ontario towards its Vision by using The Ontario Plan as a framework for assessing choices.

➤ G1-2 Long-term Benefit. We require decisions to demonstrate and document how they add value to the community and support the Ontario Vision

(4) Policy Plan (General Plan)

Land Use Element:

- Goal LU1: A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.

➤ LU1-1 Strategic Growth. We concentrate growth in strategic locations that help create place and identity, maximize available and planned infrastructure, and foster the development of transit.

➤ LU1-6 Complete Community: We incorporate a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, employers, workers and visitors have a wide spectrum of choices of where they can live, work, shop and recreate within Ontario. (Refer to Complete Community Section of Community Economics Element).

- Goal LU2: Compatibility between a wide range of uses.

➤ LU2-6: Infrastructure Compatibility: We require infrastructure to be aesthetically pleasing and in context with the community character.

Housing Element:

- Goal H2: Diversity of types of quality housing that are affordable to a range of household income levels, accommodate changing demographics, and support and reinforce the economic sustainability of Ontario.

➤ H2-4 New Model Colony. We support a premier lifestyle community in the New Model Colony distinguished by diverse housing, highest design quality, and cohesive and highly amenitized neighborhoods.

➤ H2-5 Housing Design. We require architectural excellence through adherence to City design guidelines, thoughtful site planning, environmentally sustainable practices and other best practices.

Goal H5: A full range of housing types and community services that meet the special housing needs for all individuals and families in Ontario, regardless of income level, age or other status.

➤ H5-2 Family Housing. We support the development of larger rental apartments that are appropriate for families with children, including, as feasible, the provision of services, recreation and other amenities.

Community Economics Element:

▪ Goal CE1: A complete community that provides for all incomes and stages of life.

➤ CE1-6 Diversity of Housing. We collaborate with residents, housing providers and the development community to provide housing opportunities for every stage of life; we plan for a variety of housing types and price points to support our workforce, attract business and foster a balanced community.

▪ Goal CE2: A City of distinctive neighborhoods, districts, and corridors, where people choose to be.

➤ CE2-1 Development Projects. We require new development and redevelopment to create unique, high-quality places that add value to the community.

➤ CE2-2 Development Review. We require those proposing new development and redevelopment to demonstrate how their projects will create appropriately unique, functional and sustainable places that will compete well with their competition within the region.

➤ CE2-4 Protection of Investment. We require that new development and redevelopment protect existing investment by providing architecture and urban design of equal or greater quality.

➤ CE2-5 Private Maintenance. We require adequate maintenance, upkeep, and investment in private property because proper maintenance on private property protects property values.

Safety Element:

▪ Goal S1: Minimized risk of injury, loss of life, property damage and economic and social disruption caused by earthquake-induced and other geologic hazards.

➤ S1-1 Implementation of Regulations and Standards. We require that all new habitable structures be designed in accordance with the most recent California Building Code adopted by the City, including provisions regarding lateral forces and grading.

Community Design Element:

▪ Goal CD1: A dynamic, progressive city containing distinct neighborhoods and commercial districts that foster a positive sense of identity and belonging among residents, visitors, and businesses.

➤ CD1-1 City Identity. We take actions that are consistent with the City being a leading urban center in Southern California while recognizing the diverse character of our existing viable neighborhoods.

➤ CD1-2 Growth Areas. We require development in growth areas to be distinctive and unique places within which there are cohesive design themes.

➤ CD1-3 Neighborhood Improvement. We require viable existing residential and non-residential neighborhoods to be preserved, protected, and enhanced in accordance with our land use policies.

▪ Goal CD2: A high level of design quality resulting in public spaces, streetscapes, and developments that are attractive, safe, functional and distinct.

➤ CD2-1 Quality Architecture. We encourage all development projects to convey visual interest and character through:

- Building volume, massing, and height to provide appropriate scale and proportion;
- A true architectural style which is carried out in plan, section and elevation through all aspects of the building and site design and appropriate for its setting; and
- Exterior building materials that are visually interesting, high quality, durable, and appropriate for the architectural style.

➤ CD2-2 Neighborhood Design. We create distinct residential neighborhoods that are functional, have a sense of community, emphasize livability and social interaction, and are uniquely identifiable places through such elements as:

- A pattern of smaller, walkable blocks that promote access, activity and safety;

- Variable setbacks and parcel sizes to accommodate a diversity of housing types;
 - Traffic calming measures to slow traffic and promote walkability while maintaining acceptable fire protection and traffic flows;
 - Floor plans that encourage views onto the street and de-emphasize the visual and physical dominance of garages (introducing the front porch as the “outdoor living room”), as appropriate; and
 - Landscaped parkways, with sidewalks separated from the curb.
- CD2-7 Sustainability. We collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials and construction techniques.
- CD2-8 Safe Design. We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintenance of visibility and accessibility, and use of lighting.
- CD2-9 Landscape Design. We encourage durable landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits.
- CD2-10 Surface Parking Areas. We require parking areas visible to or used by the public to be landscaped in an aesthetically pleasing, safe and environmentally sensitive manner. Examples include shade trees, pervious surfaces, urban run-off capture and infiltration, and pedestrian paths to guide users through the parking field.
- CD2-11 Entry Statements. We encourage the inclusion of amenities, signage and landscaping at the entry to neighborhoods, commercial centers, mixed use areas, industrial developments, and public places that reinforce them as uniquely identifiable places.
- CD2-12 Site and Building Signage. We encourage the use of sign programs that utilize complementary materials, colors, and themes. Project signage should be designed to effectively communicate and direct users to various aspects of the development and complement the character of the structures.
- CD2-13 Entitlement Process. We work collaboratively with all stakeholders to ensure a high degree of certainty in the efficient review and timely processing of all development plans and permits.

- Goal CD3: Vibrant urban environments that are organized around intense buildings, pedestrian and transit areas, public plazas, and linkages between and within developments that are conveniently located, visually appealing and safe during all hours.

- CD3-1 Design. We require that pedestrian, vehicular, bicycle and equestrian circulation on both public and private property be coordinated and designed to maximize safety, comfort and aesthetics.

- CD3-2 Connectivity Between Streets, Sidewalks, Walkways and Plazas. We require landscaping and paving be used to optimize visual connectivity between streets, sidewalks, walkways and plazas for pedestrians.

- CD3-3 Building Entrances. We require all building entrances to be accessible and visible from adjacent streets, sidewalks or public open spaces.

- CD3-5 Paving. We require sidewalks and road surfaces to be of a type and quality that contributes to the appearance and utility of streets and public spaces.

- CD3-6 Landscaping. We utilize landscaping to enhance the aesthetics, functionality and sustainability of streetscapes, outdoor spaces and buildings.

- Goal CD5: A sustained level of maintenance and improvement of properties, buildings and infrastructure that protects the property values and encourages additional public and private investments.

- CD5-1 Maintenance of Buildings and Property. We require all public and privately owned buildings and property (including trails and easements) to be properly and consistently maintained.

- CD5-2 Maintenance of Infrastructure. We require the continual maintenance of infrastructure.

HOUSING ELEMENT COMPLIANCE: Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the recommending body for the Project, the Planning Commission finds that based upon the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan. The project site is one of the properties listed in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix, and the proposed project is consistent with the number of dwelling units (2,875) and density (2-12 du/ac) specified in the Available Land Inventory.

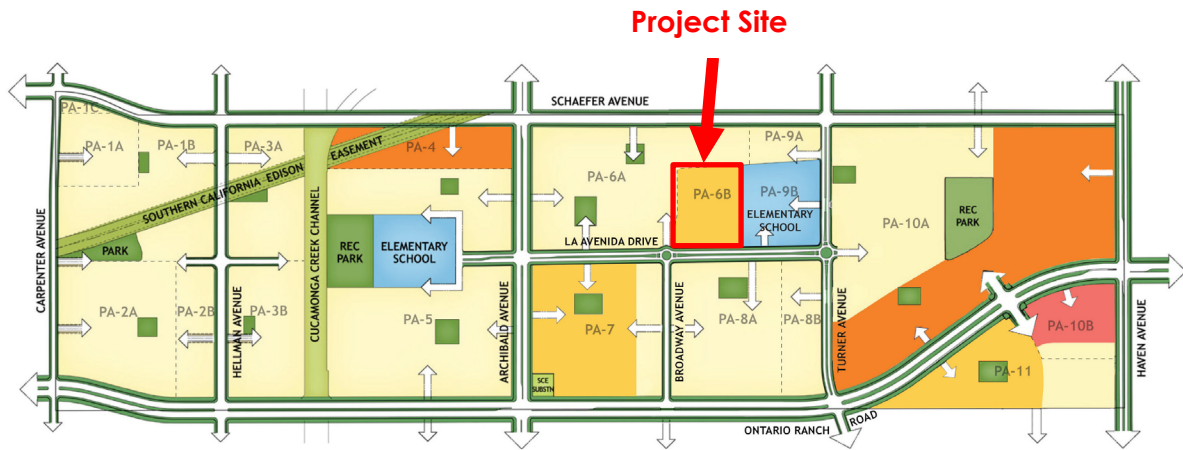

AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE: The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan ("ALUCP"), establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the ALUCP. Any special conditions of approval associated with uses in close proximity to the airport are included in the conditions of approval provided with the attached Resolution.

ENVIRONMENTAL REVIEW: The application is a project pursuant to the California Environmental Quality Act (Public Resources Code Section 21000 et seq.) ("CEQA") and an initial study has been prepared to determine possible environmental impacts. On the basis of the initial study, which indicated that all potential environmental impacts from the Project were less than significant or could be mitigated to a level of insignificance, a Mitigated Negative Declaration was prepared pursuant to CEQA, the State CEQA Guidelines and the City of Ontario Local CEQA Guidelines. Furthermore, to ensure that the mitigation measures are implemented, a Mitigation Monitoring and Reporting Program has been prepared for the Project pursuant to CEQA Guidelines Section 15097, which specifies responsible agencies/departments, monitoring frequency, timing and method of verification and possible sanctions for non-compliance with mitigation measures. The environmental documentation for this project is available for review at the Planning Department public counter. The environmental impacts of this project were previously reviewed in conjunction with an Addendum to The Ontario Plan (File No. PGPA06-001) EIR (SCH# 2008101140) adopted and certified by City Council on January 27, 2010. This Application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of project approval and are incorporated herein by this reference.

RESOLUTION NO.

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, RECOMMENDING THE CITY COUNCIL APPROVE A DEVELOPMENT AGREEMENT (FILE NO. PDA20-001) BETWEEN THE CITY OF ONTARIO AND ONTARIO SCHAEFER HOLDINGS, LLC, TO ESTABLISH THE TERMS AND CONDITIONS FOR THE DEVELOPMENT OF TENTATIVE TRACT MAP 20298 (FILE NO. PMTT19-015), A 10.49 ACRE PROPERTY LOCATED AT THE NORTHEAST CORNER OF LA AVENIDA DRIVE AND MANITOBA PLACE WITHIN THE PROPOSED LOW-MEDIUM DENSITY RESIDENTIAL LAND USE DISTRICT OF THE AVENUE SPECIFIC PLAN, AND MAKING FINDINGS IN SUPPORT THEREOF—APN: 0218-652-27.

WHEREAS, Ontario Schaefer Holdings, LLC ("Applicant") has filed an Application for the approval of a Development Agreement, File No. PDA20-001, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to approximately 10.49 acres of land generally located at the northeast corner of La Avenida and Manitoba Place within the proposed Low-Medium Density Residential land use district of The Avenue Specific Plan, and is presently vacant; and

WHEREAS, on February 16, 2007, the City Council adopted Ordinance No. 2851, approving The Avenue Specific Plan (File No. PSP05-003), which addressed potential development of approximately 568 acres of land, including up to 2,875 residential units, 130,680 square feet of commercial space, pocket parks and public trails; and

WHEREAS, on January 27, 2010, the City Council adopted Resolution Nos. 2010-003, 2010-004, 2010-005, 2010-006, approving a comprehensive update to The Ontario Plan (File No. PGPA06-001); and

WHEREAS, the Applicant is proposing a General Plan Amendment (File No. PGPA19-008) to modify the Policy Plan (General Plan) Land Use Plan (Exhibit LU-01) component of The Ontario Plan, changing the land use designation on 10.49 acres of land, from School to Low-Medium Density Residential, in conjunction with modification of the Future Buildout Table (Exhibit LU-03) to be consistent with the proposed land use designation change, and an Amendment to The Avenue Specific Plan (File No. PSPA19-011), changing the land use designation on the project site, from School to Low-Medium Density Residential, generally located at the northeast corner of La Avenida Drive and Manitoba Place; and

WHEREAS, the proposed entitlements require a Development Agreement to establish the terms and conditions of development for the Project; and

WHEREAS, a Tentative Tract Map 20298 (File No. PMTT19-015) to subdivide approximately 10.49 acres of land into 106 numbered lots and 19 lettered lots, located at the northeast corner of La Avenida Drive and Manitoba Place, within the proposed Low-Medium Density Residential land use district of The Avenue Specific Plan, has been submitted in conjunction with the Development Agreement; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act — Public Resources Code Section 21000 et seq. — (hereinafter referred to as "CEQA") and an initial study has been prepared to determine possible environmental impacts; and

WHEREAS, the environmental impacts of this project were previously reviewed in conjunction with File No. PGPA06-001, an Addendum to The Ontario Plan for which an Environmental Impact Report — State Clearinghouse No. 2008101140 — (hereinafter referred to as "Certified EIR") was adopted by the City Council on January 27, 2010, and this Application introduces no new significant environmental impacts; and

WHEREAS, the City's "Local Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and make recommendations to the City Council on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (hereinafter referred to as "ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing

procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on October 27, 2020, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: Environmental Determination and Findings. As the recommending authority for the Project, the Planning Commission has reviewed and considered the information contained in the previous Certified EIR and supporting documentation. Based upon the facts and information contained in the previous Certified EIR and supporting documentation, the Planning Commission finds as follows:

(1) The environmental impacts of this project were previously reviewed in conjunction with File No. PGPA06-001, a(n) Addendum to The Ontario Plan for which a Certified EIR was adopted by the City Council on January 27, 2010.

(2) The previous Certified EIR contains a complete and accurate reporting of the environmental impacts associated with the Project; and

(3) The previous Certified EIR was completed in compliance with CEQA and the Guidelines promulgated thereunder; and

(4) The previous Certified EIR reflects the independent judgment of the Planning Commission; and

(5) The proposed project will introduce no new significant environmental impacts beyond those previously analyzed in the previous Certified EIR, and all mitigation measures previously adopted with the Certified EIR, are incorporated herein by this reference.

SECTION 2: Subsequent or Supplemental Environmental Review Not Required. Based on the information presented to the Planning Commission, and the specific findings set forth in Section 1, above, the Planning Commission finds that the preparation of a subsequent or supplemental Certified EIR is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and.

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3: *Housing Element Compliance.* Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the recommending body for the Project, the Planning Commission finds that based upon the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan. The project site is one of the properties listed in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix, and the proposed project is consistent with the number of dwelling units (2,875) and density (2-12 du/ac) specified in the Available Land Inventory.

SECTION 4: *Ontario International Airport Land Use Compatibility Plan (“ALUCP”) Compliance.* The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual

development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the ALUCP, establishing the Airport Influence Area for Ontario International Airport (hereinafter referred to as "ONT"), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the recommending authority for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ALUCP compatibility factors, including [1] Safety Criteria (ALUCP Table 2-2) and Safety Zones (ALUCP Map 2-2), [2] Noise Criteria (ALUCP Table 2-3) and Noise Impact Zones (ALUCP Map 2-3), [3] Airspace protection Zones (ALUCP Map 2-4), and [4] Overflight Notification Zones (ALUCP Map 2-5). As a result, the PLANNING COMMISSION, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ALUCP.

SECTION 5: ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing, and upon the specific findings set forth in Section 1 through 4, above, the Planning Commission hereby concludes as follows:

a. The Development Agreement applies to approximately 10.49 acres of land located at the northeast corner of La Avenida Drive and Manitoba Place, within the proposed Low-Medium Density Residential land use district of The Avenue Specific Plan.

b. The Development Agreement establishes parameters for the development of the proposed Low-Medium Density Residential land use district of The Avenue Specific Plan. The Development Agreement also grants the Owner, the right to develop, the ability to quantify the fees; and establish the terms and conditions that apply to those projects. These terms and conditions are consistent with The Ontario Plan Policy Plan (General Plan), design guidelines and development standards for the proposed amendment (File No. PSPA19-011) to The Avenue Specific Plan.

c. The Agreement grants the Owner a vested right to develop Tentative Tract Map 20298 as long as the Owner, complies with the terms and conditions of the Specific Plan and EIR. Tentative Tract Map 20298 is located at the northeast corner of La Avenida Drive and Manitoba Place, and proposes to subdivide approximately 10.49 acres of land into 106 numbered lots and 19 lettered lots.

d. The Development Agreement has been prepared in conformance with the goals and policies of The Ontario Plan Policy Plan (General Plan); and

e. The Development Agreement does not conflict with the Land Use Policies of The Ontario Plan Policy Plan (General Plan) and will provide for development, within the district, in a manner consistent with the Policy Plan and with related development; and

f. This Development Agreement will promote the goals and objectives of the Land Use Element of the Policy Plan; and

g. This Development Agreement will not be materially injurious or detrimental to the adjacent properties and will have a significant impact on the environment or the surrounding properties. The environmental impacts of this project were previously analyzed in conjunction with File No. PGPA06-001, an Addendum to The Ontario Plan for which a Certified EIR was adopted by the City Council on January 27, 2010. All adopted mitigation measures of the related EIR shall be a condition of project approval and are incorporated herein by reference.

SECTION 6: Planning Commission Action. Based upon the findings and conclusions set forth in Sections 1 through 5, above, the Planning Commission hereby RECOMMENDS THE CITY COUNCIL APPROVE the herein described Application, subject to the Development Agreement (File No. PDA20-001) attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 7: Indemnification. The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 8: Custodian of Records. The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 9: Certification to Adoption. The Secretary shall certify to the adoption of the Resolution.

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a regular meeting thereof held on the 27th day of October 2020, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

DEVELOPMENT AGREEMENT FILE NO. PDA20-001

This Development Agreement (hereinafter "Agreement") is dated for reference purposes only as of the ____ day of _____, 2020 by and among the City of Ontario, a California municipal corporation (hereinafter "CITY"), and ONTARIO SCHAEFER HOLDINGS, LLC, a Delaware limited liability company (hereinafter "OWNER");

RECITALS

WHEREAS, CITY is authorized to enter into binding development agreements with persons having legal or equitable interests in real property for the development of such property, pursuant to Section 65864, et seq. of the Government Code; and

WHEREAS, OWNER has requested CITY to enter into a development agreement and proceedings have been taken in accordance with the rules and regulations of CITY; and

WHEREAS, by electing to enter into this Agreement, CITY shall bind future City Councils of CITY by the obligations specified herein and limit the future exercise of certain governmental and proprietary powers of CITY; and

WHEREAS, the terms and conditions of this Agreement have undergone extensive review by CITY and the City Council and have been found to be fair, just and reasonable; and

WHEREAS, the best interests of the citizens of the CITY and the public health, safety and welfare will be served by entering into this Agreement; and

WHEREAS, all of the procedures of the California Environmental Quality Act have been met with respect to the Project and The Avenue Specific Plan (State Clearinghouse No. 2005071109 (the "FEIR")). The City Council found and determined that the FEIR was prepared in accordance with the requirements of the California Environmental Quality Act and adequately describes the impacts of the project described in the FEIR, which included consideration of this Agreement; and

WHEREAS, this Agreement and the Project are consistent with the CITY's Comprehensive General Plan and The Avenue Specific Plan; and

WHEREAS, all actions taken and approvals given by CITY have been duly taken or approved in accordance with all applicable legal requirements for notice, public hearings, findings, votes, and other procedural matters; and

WHEREAS, development of the Property in accordance with this Agreement will provide substantial benefits to CITY and will further important policies and goals of CITY; and

WHEREAS, this Agreement will eliminate uncertainty in planning and provide for the orderly development of the Property, ensure progressive installation of necessary improvements, provide for public services appropriate to the development of the Project, and generally serve the purposes for which development agreements under Sections 65864 et seq. of the Government Code are intended; and

WHEREAS, OWNER has incurred and will in the future incur substantial costs in excess of the generally applicable requirements in order to assure vesting of legal rights to develop the Property in accordance with this Agreement.

WHEREAS, the Property is located in an area of the City of Ontario that has been known as the “New Model Colony” area and the New Model Colony area has now been renamed as “Ontario Ranch.”

WHEREAS, the property developer/owners are made aware of the South Archibald Trichloroethylene (TCE) Plume Disclosure Letter (Exhibit “G”). Property owner may wish to provide the attached Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T10000004658

COVENANTS

NOW, THEREFORE, in consideration of the above recitals and of the mutual covenants hereinafter contained and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

1. DEFINITIONS AND EXHIBITS.

1.1 Definitions. The following terms when used in this Agreement shall be defined as follows:

1.1.1 “Agreement” means this Development Agreement.

1.1.2 “CITY” means the City of Ontario, California, a California municipal corporation.

1.1.3 “Construction Agreement” means that certain Agreement for the Financing and Construction of Phases I and II Infrastructure Improvements to Serve an Easterly Portion of the New Model Colony, entered into between the CITY and NMC Builders as of the 4th day of October, 2005, and all amendments thereto and “Construction Agreement Amendment” means that First Amended and Restated Agreement for the Financing and Construction of Limited Infrastructure Improvements to Serve and

Easterly Portion of the New Model Colony entered into between the CITY and NMC Builders as of the 21st day of August 2012.

1.1.4 "Development" means the improvement of the Property for the purposes of completing the structures, improvements and facilities comprising the Project including, but not limited to: grading; the construction of public infrastructure and public facilities related to the Project whether located within or outside the Property; the construction of buildings and structures; and the installation of landscaping. "Development" does not include the maintenance, repair, reconstruction or redevelopment of any building, structure, improvement or facility after the construction and completion thereof.

1.1.5 "Development Approvals" means all permits and other entitlements for use subject to approval or issuance by CITY in connection with development of the Property including, but not limited to:

- (a) specific plans and specific plan amendments;
- (b) tentative and final subdivision and parcel maps;
- (c) development plan review;
- (d) conditional use permits (including model home use permits), public use permits and plot plans;
- (e) zoning;
- (f) grading and building permits.

1.1.7 "Development Impact Fee" means a monetary exaction, other than a tax or special assessment, whether characterized as a fee or a tax and whether established for a broad class of projects by legislation of general applicability or imposed on a specific project on an ad hoc basis, that is charged by a local agency to the applicant in connection with approval of a development project for the purpose of defraying all or a portion of the cost of public facilities related to the development project, and, for purposes of this Agreement only, includes fees collected under development agreements adopted pursuant to Article 2.5 of the Government Code (commencing with Section 65864) of Chapter 4, For purposes of this Agreement only, "Development Impact Fee" shall not include processing fees and charges imposed by CITY to cover the estimated actual costs to CITY of processing applications for Development Approvals or for monitoring compliance with any Development Approvals granted or issued, including, without limitation, fees for zoning variances; zoning changes; use permits; building inspections; building permits; filing and processing applications and petitions filed with the local agency formation commission or conducting preliminary proceedings or proceedings under the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000, Division 3 (commencing with Section 56000) of Title 5 of the Government Code; the processing of maps under the provisions of the Subdivision Map Act, Division 2 (commencing with Section 66410) of Title 7 of the Government

Code; or planning services under the authority of Chapter 3 (commencing with Section 65100) of Division 1 of Title 7 of the Government Code, fees and charges as described in Sections 51287, 56383, 57004, 65104, 65456, 65863.7, 65909.5, 66013, 66014, and 66451.2 of the Government Code, Sections 17951, 19132.3, and 19852 of the Health and Safety Code, Section 41901 of the Public Resources Code, and Section 21671.5 of the Public Utilities Code, as such codes may be amended or superceded, including by amendment or replacement.

1.1.8 “Development Plan” means the Existing Development Approvals and the Existing Land Use Regulations applicable to development of the Property.

1.1.9 “Effective Date” means the date that the ordinance approving this Agreement goes into effect.

1.1.10 “Existing Development Approvals” means all Development Approvals approved or issued prior to the Effective Date. Existing Development Approvals includes the Approvals incorporated herein as Exhibit “C” and all other Approvals which are a matter of public record on the Effective Date.

1.1.11 “Existing Land Use Regulations” means all Land Use Regulations in effect on the Effective Date. Existing Land Use Regulations includes the Regulations incorporated herein as Exhibit “D” and all other Land Use Regulations that are in effect and a matter of public record on the Effective Date.

1.1.12 “General Plan” means the General Plan adopted on January 27, 2010, by Resolution Nos. R2010-003, R2010-004, R2010-005 and R2010-006.

1.1.13 “Improvement” or “Improvements” means those public improvements required to support the development of the Project as described in the tract map conditions for Tract Map No. 20298 as further described in Exhibit “F”.

1.1.14 “Land Use Regulations” means all ordinances, resolutions, codes, rules, regulations and official policies of CITY governing the development and use of land, including, without limitation, the permitted use of land, the density or intensity of use, subdivision requirements, timing and phasing of development, the maximum height and size of buildings, the provisions for reservation or dedication of land for public purposes, and the design, improvement and construction standards and specifications applicable to the development of the Property. “Land Use Regulations” does not include any CITY ordinance, resolution, code, rule, regulation or official policy, governing:

- (a) the conduct of businesses, professions, and occupations;
- (b) taxes and assessments;
- (c) the control and abatement of nuisances;
- (d) the granting of encroachment permits and the conveyance of similar rights and interests that provide for the use of or the entry upon public property;

(e) the exercise of the power of eminent domain.

1.1.15 “Mortgagee” means a mortgagee of a mortgage, a beneficiary under a deed of trust or any other security-device lender, and their successors and assigns.

1.1.16 “Model Units” means a maximum of twelve (12) model units, private common recreation facilities and sales facilities constructed by OWNER prior to the construction of any Production Units and not offered for sale and occupancy for a period of time after the issuance of permits for Production Units.

1.1.17 “OWNER” means the persons and entities listed as owner on page 1 of this Agreement and their permitted successors in interest to all or any part of the Property.

1.1.18 “Production Unit(s)” means all units constructed for sale and occupancy by OWNER and excludes the specified number of Model Units constructed by OWNER for promotion of sales.

1.1.19 “Project” means the development of the Property contemplated by the Development Plan, as such Plan may be further defined, enhanced or modified pursuant to the provisions of this Agreement.

1.1.20 “Property” means the real property described on Exhibit “A” and shown on Exhibit “B” to this Agreement.

1.1.21 “Reservations of Authority” means the rights and authority excepted from the assurances and rights provided to OWNER under this Agreement and reserved to CITY under Section 3.6 of this Agreement.

1.1.22 “Specific Plan” means that certain specific plan adopted by the City Council, and entitled, “The Avenue Specific Plan.”

1.1.23 “Storm Water Treatment Capacity Availability” means a designated portion of the total Storm Water Treatment Capacity Availability made available through the completion of construction of a Phase of regional storm water treatment facilities by the NMC Builders LLC as described in the Construction Agreement Amendment. The amount, in acres, of Storm Water Treatment Capacity Availability required for the issuance of a grading permit shall be based upon the factors and assumptions listed in the Construction Agreement Amendment.

1.1.24 “Subsequent Development Approvals” means all Development Approvals required subsequent to the Effective Date in connection with development of the Property.

1.1.25 “Subsequent Land Use Regulations” means any Land Use Regulations adopted and effective after the Effective Date of this Agreement.

1.1.26 “Water Availability Equivalent (WAE)” means a designated portion of the total Net MDD made available through the construction of each Phase described in the Water Phasing Plan of the Construction Agreement. The number of Water Availability Equivalents (of portions thereof) required for the issuance of each building permit shall be based upon water demand factors and assumptions listed in the Construction Agreement and Construction Agreement Amendment as “Water Availability Equivalents by Land Use” for each land use category.

1.2 Exhibits. The following documents are attached to, and by this reference made a part of, this Agreement:

Exhibit “A” — Legal Description of the Property.

Exhibit “B” — Map showing Property and its location.

Exhibit “C” — Existing Development Approvals.

Exhibit “D” — Existing Land Use Regulations.

Exhibit “E” — Description of Infrastructure Improvements

Exhibit “F” — Depiction of Infrastructure Improvements

Exhibit “G” - Form of Plume Disclosure Letter

2. GENERAL PROVISIONS.

2.1 Binding Effect of Agreement. The Property is hereby made subject to this Agreement. Development of the Property is hereby authorized and shall be carried out only in accordance with the terms of this Agreement.

2.2 Ownership of Property. OWNER represents and covenants that it is the owner of the fee simple title to the Property or a portion thereof, or has the right to acquire fee simple title to the Property or a portion thereof from the current owner(s) thereof. To the extent OWNER does not own fee simple title to the Property, OWNER shall obtain written consent from the current fee owner of the Property agreeing to the terms of this Agreement and the recordation thereof.

2.3 Term. The term of this Agreement shall commence on the Effective Date and shall continue for an initial term of ten (10) years thereafter unless this term is modified or extended pursuant to the provisions of this Agreement. The term of this Agreement may be extended for an additional five (5) years following expiration of the initial ten (10) year term, provided the following have occurred:

(a) OWNER provides at least 180 days written notice to CITY prior to expiration of the initial term; and

(b) In non-mixed use and residential use only projects, the OWNER shall have obtained, as applicable, building permits for at least seventy percent (70%) of the actual number of residential units permitted under this Agreement; and

(c) OWNER is not then in uncured default of this Agreement.

2.4 Assignment.

2.4.1 Right to Assign. OWNER shall have the right to sell, transfer or assign the Property in whole or in part (provided that no such partial transfer shall violate the Subdivision Map Act, Government Code Section 66410, et seq.), to any person, partnership, limited liability company, joint venture, firm or corporation at any time during the term of this Agreement; provided, however, that any such sale, transfer or assignment shall include the assignment and assumption of the rights, duties and obligations arising under or from this Agreement and be made in strict compliance with the following:

(a) No sale, transfer or assignment of any right or interest under this Agreement shall be made unless made together with the sale, transfer or assignment of all or a part of the Property. OWNER may be required to provide disclosure that the Property is within the South Archibald Trichloroethylene (TCE) Plume. OWNER may wish to provide the attached Disclosure Letter (Exhibit "G") as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq.(b) Concurrent with any such sale, transfer or assignment, or within fifteen (15) business days thereafter, OWNER shall notify CITY's City Manager, in writing, of such sale, transfer or assignment and shall provide CITY with: (1) an executed agreement, in a form reasonably acceptable to CITY, by the purchaser, transferee or assignee and providing therein that the purchaser, transferee or assignee expressly and unconditionally assumes all the duties and obligations of OWNER under this Agreement with respect to the portion of the Property so sold, transferred or assigned; and (2) the payment of the applicable processing charge to cover the CITY's review and consideration of such sale, transfer or assignment.

(b) Any sale, transfer or assignment not made in strict compliance with the foregoing conditions shall constitute a default by OWNER under this Agreement. Notwithstanding the failure of any purchaser, transferee or assignee to execute the agreement required by Paragraph (a) of this Section 2.4.1, the burdens of this Agreement shall be binding upon such purchaser, transferee or assignee, but the benefits of this Agreement shall not inure to such purchaser, transferee or assignee until and unless such agreement is executed. The CITY's City Manager shall have the authority to review, consider and either approve, conditionally approve, or deny any proposed sale, transfer or assignment that is not made in compliance with this Section 2.4.

2.4.2 Release of Transferring Owner. Notwithstanding any sale, transfer or assignment, a transferring OWNER shall continue to be obligated under this Agreement unless such transferring owner is given a release in writing by CITY, which

release shall be provided by CITY upon the full satisfaction by such transferring owner of the following conditions:

(a) OWNER no longer has a legal or equitable interest in all or any part of the portion of the Property sold, transferred or assigned.

(b) OWNER is not then in default under this Agreement.

(c) OWNER has provided CITY with the notice and executed agreement required under Paragraph (b) of Section 2.4.1 above.

(d) The purchaser, transferee or assignee provides CITY with security equivalent to any security previously provided by OWNER to secure performance of its obligations hereunder.

2.4.3 Effect of Assignment and Release of Obligations. In the event of a sale, transfer or assignment pursuant to the provisions of Section 2.4.2 above:

(a) The assignee shall be liable for the performance of all obligations of OWNER with respect to transferred property, but shall have no obligations with respect to the portions of the Property, if any, not transferred (the "Retained Property").

(b) The owner of the Retained Property shall be liable for the performance of all obligations of OWNER with respect to Retained Property, but shall have no further obligations with respect to the transferred property.

(c) The assignee's exercise, use and enjoyment of the Property or portion thereof shall be subject to the terms of this Agreement to the same extent as if the assignee were the OWNER.

2.4.4 Subsequent Assignment. Any subsequent sale, transfer or assignment after an initial sale, transfer or assignment shall be made only in accordance with and subject to the terms and conditions of this Section 2.4.

2.4.5 Termination of Agreement with Respect to Individual Lots Upon Sale to Public and Completion of Construction. The provisions of Section 2.4.1 shall not apply to the sale or lease (for a period longer than one year) of any lot which has been finally subdivided and is individually (and not in "bulk") sold or leased to a member of the public or other ultimate user. Notwithstanding any other provisions of this Agreement, this Agreement shall terminate with respect to any lot and such lot shall be released and no longer be subject to this Agreement without the execution or recordation of any further document upon satisfaction of both of the following conditions:

(a) The lot has been finally subdivided and individually (and not in "bulk") sold or leased (for a period longer than one year) to a member of the public or other ultimate user; and,

(b) A certificate of occupancy has been issued for a building on the lot, and the fees set forth under Section 4 of this Agreement have been paid.

2.5 Amendment or Cancellation of Agreement. This Agreement may be amended or cancelled in whole or in part only in the manner provided for in Government Code Section 65868.1. Any amendment of this Agreement, which amendment has been requested by OWNER, shall be considered by the CITY only upon the payment of the applicable processing charge. This provision shall not limit any remedy of CITY or OWNER as provided by this Agreement. Either Party or successor in interest, may propose an amendment to or cancellation, in whole or in part, of this Agreement. Any amendment or cancellation shall be by mutual consent of the parties or their successors in interest except as provided otherwise in this Agreement or in Government Code Section 65865.1. For purposes of this Section, the term "successor in interest" shall mean any person having a legal or equitable interest in the whole of the Property, or any portion thereof as to which such person wishes to amend or cancel this Agreement. The procedure for proposing and adopting an amendment to, or cancellation of, in whole or in part, this Agreement shall be the same as the procedure for adopting and entering into this Agreement in the first instance. Notwithstanding the foregoing sentence, if the CITY initiates the proposed amendment to, or cancellation of, in whole or in part, this Agreement, CITY shall first give notice to the OWNER of its intention to initiate such proceedings at least sixty (60) days in advance of the giving the public notice of intention to consider the amendment or cancellation.

2.5.1 Amendment to Reflect Consistency With Future Amendments to the Construction Agreement. To the extent any future amendment to the Construction Agreement provides for modifications to rights or obligations that differ from or alter the same or similar rights or obligations contained in this Development Agreement, OWNER reserves the right to request an amendment to the Development Agreement to reflect any or all of such modifications.

2.6 Termination. This Agreement shall be deemed terminated and of no further effect upon the occurrence of any of the following events:

(a) Expiration of the stated term of this Agreement as set forth in Section 2.3, subject to Section 11.11.

(b) Entry of a final judgment setting aside, voiding or annulling the adoption of the ordinance approving this Agreement.

(c) The adoption of a referendum measure overriding or repealing the ordinance approving this Agreement.

(d) Completion of the Project in accordance with the terms of this Agreement including issuance of all required occupancy permits and acceptance by CITY or applicable public agency of all required dedications.

Termination of this Agreement shall not constitute termination of any other land use entitlements approved for the Property. Upon the termination of this Agreement, no party shall have any further right or obligation hereunder except with respect to any obligation to have been performed prior to such termination or with respect to any default in the performance of the provisions of this Agreement which has occurred prior to such termination or with respect to any obligations which are specifically set forth as surviving this Agreement. Upon such termination, any public facilities and services mitigation fees paid pursuant to Section 4.2 of this Agreement by OWNER to CITY for residential units on which construction has not yet begun shall be refunded to OWNER by CITY.

2.7 Notices.

(a) As used in this Agreement, "notice" includes, but is not limited to, the communication of notice, request, demand, approval, statement, report, acceptance, consent, waiver, appointment or other communication required or permitted hereunder.

(b) All notices shall be in writing and shall be considered given either: (i) when delivered in person, including, without limitation, by courier, to the recipient named below; or (ii) on the date of delivery shown on the return receipt, after deposit in the United States mail in a sealed envelope as either registered or certified mail with return receipt requested, and postage and postal charges prepaid, and addressed to the recipient named below. All notices shall be addressed as follows:

If to CITY:

Scott Ochoa, City Manager
City of Ontario
303 East "B" Street
Ontario, CA 91764

with a copy to:

Ruben Duran, City Attorney
Best Best & Krieger, LLP
2855 East Guasti Road, Suite 400
Ontario, CA 91761

If to OWNER:

Ontario Schaefer Holdings, LLC
c/o RCCD, Inc.
8101 E. Kaiser Blvd., Suite 140
Anaheim Hills, CA 92808
Attn: Richard Cisakowski
Phone: (714) 637-4405
Email:rc@distinguishedhomes.com

with a copy to:

Smiley Wang-Ekval, LLP
3200 Park Center Drive, Suite 250
Costa Mesa, CA 92626
Attn: Kraig C. Kilger, Esq.
Phone: (714) 445-1000
Email: kkilger@swelawfirm.com

(c) Either party may, by notice given at any time, require subsequent notices to be given to another person or entity, whether a party or an officer or representative of a party, or to a different address, or both. Notices given before actual receipt of notice of change shall not be invalidated by the change.

3. DEVELOPMENT OF THE PROPERTY.

3.1 Rights to Develop. Subject to the terms of this Agreement including the Reservations of Authority, OWNER shall have a vested right to develop the Property in accordance with, and to the extent of, the Development Plan. The Project shall remain subject to all Subsequent Development Approvals required to complete the Project as contemplated by the Development Plan. Except as otherwise provided in this Agreement, the permitted uses of the Property, the density and intensity of use, the maximum height and size of proposed buildings, and provisions for reservation and dedication of land for public purposes shall be those set forth in the Development Plan.

3.2 Effect of Agreement on Land Use Regulations. Except as otherwise provided under the terms of this Agreement including the Reservations of Authority, the rules, regulations and official policies governing permitted uses of the Property, the density and intensity of use of the Property, the maximum height and size of proposed buildings, and the design, improvement and construction standards and specifications applicable to development of the Property shall be the Existing Land Use Regulations. In connection with any Subsequent Development Approval, CITY shall exercise discretion in accordance with the same manner as it exercises its discretion under its police powers, including the Reservations of Authority set forth herein; provided however, that such discretion shall not prevent development of the Property for the uses and to the density or intensity of development set forth in this Agreement.

3.3 Timing of Development. The parties acknowledge that OWNER cannot at this time predict when or the rate at which phases of the Property will be developed. Such decisions depend upon numerous factors which are not within the control of OWNER, such as market orientation and demand, interest rates, absorption, completion and other similar factors. Since the California Supreme Court held in Pardee Construction Co. v. City of Camarillo (1984) 37 Ca1. 3d 465, that the failure of the parties therein to provide for the timing of development resulted in a later adopted initiative restricting the timing of development to prevail over such parties' agreement, it is the parties' intent to cure that deficiency by acknowledging and providing that OWNER shall have the right to develop the Property in such order and at such rate and

at such times as OWNER deems appropriate within the exercise of its subjective business judgment.

3.4 Requirement for Public Infrastructure Improvements. Development of the Property is contingent in part on the phasing of area-wide infrastructure improvements over which the OWNER has control. The issuance of building permits by CITY for Model Units and Production Units is, in general, contingent on OWNER's completion of needed infrastructure improvements as described in the attached Exhibit "E" and depicted in the attached Exhibit "F", and the availability of improvements and services to serve the Property.

3.4.1 Attached hereto as Exhibit "F" is a depiction of the infrastructure improvements needed for the development of the Property.

3.4.2 Subject to the prior submittal by OWNER and approval by CITY of a plan to provide sufficient public infrastructure for the construction of a maximum number of Twelve(12) Model Units, private common recreation facilities and sales facilities. CITY may issue a maximum of Twelve (12) building permits for Model Units, private common recreation facilities and sales facilities. The plan to be submitted by OWNER for CITY approval shall describe the utilities and other infrastructure necessary to provide sufficient fire protection and other public health and safety requirements for the Model Units and other facilities.

3.5 Changes and Amendments. The parties acknowledge that refinement and further development of the Project will require Subsequent Development Approvals and may demonstrate that changes are appropriate and mutually desirable in the Existing Development Approvals. In the event OWNER finds that a change in the Existing Development Approvals is necessary or appropriate, OWNER shall apply for a Subsequent Development Approval to effectuate such change and CITY shall process and act on such application in accordance with the Existing Land Use Regulations, except as otherwise provided by this Agreement including the Reservations of Authority. If approved, any such change in the Existing Development Approvals shall be incorporated herein as an addendum to Exhibit "C", and may be further changed from time to time as provided in this Section. Unless otherwise required by law, as determined in CITY's reasonable discretion, a change to the Existing Development Approvals shall be deemed "minor" and not require an amendment to this Agreement provided such change does not:

- (a) Alter the permitted uses of the Property as a whole; or,
 - (b) Increase the density or intensity of use of the Property as a whole;
- or,
- (c) Increase the maximum height and size of permitted buildings; or,
 - (d) Delete a requirement for the reservation or dedication of land for public purposes within the Property as a whole; or,

(e) Constitute a project requiring a subsequent or supplemental environmental impact report pursuant to Section 21166 of the Public Resources Code.

3.6 Reservations of Authority.

3.6.1 Limitations, Reservations and Exceptions. Notwithstanding any other provision of this Agreement, the CITY shall not be prevented from applying new rules, regulations and policies upon the OWNER, nor shall a development agreement prevent the CITY from denying or conditionally approving any subsequent development project application on the basis of such new rules, regulations and policies where the new rules, regulations and policies consist of the following:

- (a) Processing fees by CITY to cover costs of processing applications for development approvals or for monitoring compliance with any development approvals;
- (b) Procedural regulations relating to hearing bodies, petitions, applications, notices, findings, records and any other matter of procedure;
- (c) Regulations, policies and rules governing engineering and construction standards and specifications applicable to public and private improvements, including all uniform codes adopted by the CITY and any local amendments to those codes adopted by the CITY; provided however that, OWNER shall have a vested right to develop the Property in accordance with, and to the extent of, the standards and specifications that are expressly identified in the Specific Plan;
- (d) Regulations that may conflict with this Agreement and the Development Plan but that are reasonably necessary to protect the residents of the project and/or of the immediate community from a condition perilous to their health or safety;
- (e) Regulations that do not conflict with those rules, regulations and policies set forth in this Agreement or the Development Plan;
- (f) Regulations that may conflict but to which the OWNER consents.

3.6.2 Subsequent Development Approvals. This Agreement shall not prevent CITY, in acting on Subsequent Development Approvals, from applying Subsequent Land Use Regulations that do not conflict with the Development Plan, nor shall this Agreement prevent CITY from denying or conditionally approving any Subsequent Development Approvals on the basis of the Existing Land Use Regulations or any Subsequent Land Use Regulation not in conflict with the Development Plan.

3.6.3 Modification or Suspension by State or Federal Law. In the event that State or Federal laws or regulations, enacted after the Effective Date, prevent or preclude compliance with one or more of the provisions of this Agreement, such provisions of this Agreement shall be modified or suspended as may be necessary to comply with such State or Federal laws or regulations, provided, however, that this Agreement shall remain in full force and effect to the extent it is not inconsistent with such laws or regulations and to the extent such laws or regulations do not render such remaining provisions impractical to enforce. In the event OWNER alleges that such State or Federal laws or regulations preclude or prevent compliance with one or more provisions of this Agreement, and the CITY does not agree, the OWNER may, at its sole cost and expense, seek declaratory relief (or other similar non-monetary remedies); provided however, that nothing contained in this Section 3.6.3 shall impose on CITY any monetary liability for contesting such declaratory relief (or other similar non-monetary relief).

3.6.4 Intent. The parties acknowledge and agree that CITY is restricted in its authority to limit its police power by contract and that the foregoing limitations, reservations and exceptions are intended to reserve to CITY all of its police power which cannot be so limited. This Agreement shall be construed, contrary to its stated terms if necessary, to reserve to CITY all such power and authority which cannot be restricted by contract.

3.7 Public Works; Utilities. If OWNER is required by this Agreement to construct any public works facilities which will be dedicated to CITY or any other public agency upon completion, and if required by applicable laws to do so, OWNER shall perform such work in the same manner and subject to the same requirements as would be applicable to CITY or such other public agency should it have undertaken such construction. As a condition of development approval, OWNER shall connect the Project to all utilities necessary to provide adequate water, recycled water, sewer, gas, electric, and other utility service to the Project. As a further condition of development approval, OWNER shall contract with the CITY for CITY-owned or operated utilities for this purpose, for such price and on such terms as may be available to similarly situated customers in the CITY.

3.7.1 OWNER agrees that development of the Project shall require the construction of street improvements as described in Exhibit "E" and depicted in Exhibit "F". OWNER agrees that no building permits shall be issued by CITY for Production Units prior to completion of the street improvements as described in Exhibit "E" and depicted in Exhibit "F".

3.7.2 OWNER agrees that development of the Property shall require the extension of permanent water and recycled water utility infrastructure as described in Exhibit "E" and depicted in Exhibit "F" consisting generally of the construction of the extension of permanent water and recycled water utility improvements to serve the Property. OWNER agrees that no building permits shall be issued by CITY for Production Units prior to completion of the water and

recycled water Improvements as described in Exhibit “E” and depicted in Exhibit “F”. OWNER also agrees that recycled water shall be available and utilized by OWNER for all construction-related water uses including prior to, and during, any grading of the Property.

3.7.3 OWNER agrees that the development of the Property shall require the extension of permanent storm drain improvements, as described in the attached Exhibit “E” and depicted in Exhibit “F” consisting generally of the construction of the extension of storm drain improvements to serve the Property. OWNER agrees that no building permits shall be issued by CITY for Production Units prior to completion of the storm drain Improvements as described in Exhibit “E” and depicted in Exhibit “F”.

3.7.4 OWNER agrees that development of the Property shall require the extension of permanent sewer improvements, at OWNER’s sole cost and expense, as described in the attached Exhibit “E” and depicted in Exhibit “F” consisting generally of the construction of the extension of sewer infrastructure to serve the Property. OWNER agrees that no building permits shall be issued by CITY for Production Units prior to completion of the sewer improvements as described in Exhibit “E” and depicted in Exhibit “F”.

3.7.5 OWNER agrees that development of the Property shall require the extension of permanent fiber optic communications infrastructure, at OWNER’s sole cost and expense, as described in the attached Exhibit “E” and depicted in Exhibit “F” consisting generally of the construction of the extension of fiber optic communications infrastructure to serve the Property. OWNER agrees that no building permits shall be issued by CITY for Production Units prior to completion of the fiber optic communications infrastructure as described in Exhibit “E” and depicted in Exhibit “F”.

3.8 Acquisition of Offsite Provision of Real Property Interests. In any instance where OWNER is required by any Development Approval or Land Use Regulation and the Construction Agreement to construct any public improvement on land not owned by OWNER (“Offsite Improvements”), the CITY and OWNER shall cooperate in acquiring the necessary legal interest (“Offsite Property”) in accordance with the procedures set forth in Section 2.4 of the Construction Agreement. This Section 3.8 is not intended by the parties to impose upon the OWNER an enforceable duty to acquire land or construct any public improvements on land not owned by OWNER, except to the extent that the OWNER elects to proceed with the development of the Project, and then only in accordance with valid conditions imposed by the CITY upon the development of the Project under the Subdivision Map Act or other legal authority.

3.8.1 CITY Acquisition of Non-Construction Agreement Offsite Property. In the event OWNER is required to construct any public improvements on land not owned by OWNER, but such requirement is not based upon the Construction Agreement, Sections 3.8.1 and 3.8.2 shall control the acquisition of the necessary property interest(s) (“Non-Construction Agreement Offsite Property”).

If the OWNER is unable to acquire such Non-Construction Agreement Offsite Property, and following the written request from the OWNER to CITY, CITY agrees to use reasonable and diligent good faith efforts to acquire the Non-Construction Agreement Offsite Property from the owner or owners of record by negotiation to the extent permitted by law and consistent with this Agreement. If CITY is unable to acquire the Non-Construction Agreement Offsite Property by negotiation within thirty (30) days after OWNER'S written request, CITY shall, initiate proceedings utilizing its power of eminent domain to acquire that Non-Construction Agreement Subject Property at a public hearing noticed and conducted in accordance with California Code of Civil Procedure Section 1245.235 for the purpose of considering the adoption of a resolution of necessity concerning the Non-Construction Agreement Offsite Property, subject to the conditions set forth in this Section 3.8. The CITY and OWNER acknowledge that the timelines set forth in this Section 3.8.1 represent the maximum time periods which CITY and OWNER reasonably believe will be necessary to complete the acquisition of any Non-Construction Agreement Offsite Property. CITY agrees to use reasonable good faith efforts to complete the actions described within lesser time periods, to the extent that it is reasonably able to do so, consistent with the legal constraints imposed upon CITY.

3.8.2 Owner's Option to Terminate Proceedings. CITY shall provide written notice to OWNER no later than fifteen (15) days prior to making an offer to the owner of the Non-Construction Agreement Offsite Property. At any time within that fifteen (15) day period, OWNER may, at its option, notify CITY that it wants CITY to cease all acquisition proceedings with respect to that Non-Construction Agreement Offsite Property, whereupon CITY shall cease such proceedings. CITY shall provide written notice to OWNER no later than fifteen (15) days prior to the date of the hearing on CITY'S intent to consider the adoption of a resolution of necessity as to any Non-Construction Agreement Offsite Property. At any time within that fifteen (15) day period, OWNER may, at its option, notify CITY that it wants CITY to cease condemnation proceedings, whereupon CITY shall cease such proceedings. If OWNER does not notify CITY to cease condemnation proceedings within said fifteen (15) day period, then the CITY may proceed to consider and act upon the Non-Construction Agreement Offsite Property resolution of necessity. If CITY adopts such resolution of necessity, then CITY shall diligently institute condemnation proceedings and file a complaint in condemnation and seek an order of immediate possession with respect to the Non-Construction Agreement Offsite Property.

3.9 Regulation by Other Public Agencies. It is acknowledged by the parties that other public agencies not within the control of CITY possess authority to regulate aspects of the development of the Property separately from or jointly with CITY and this Agreement does not limit the authority of such other public agencies. CITY agrees to cooperate fully, at no cost to CITY, with OWNER in obtaining any required permits or compliance with the regulations of other public agencies provided such cooperation is not in conflict with any laws, regulations or policies of the CITY.

3.10 Tentative Tract Maps; Extension. With respect to applications by OWNER for tentative subdivision maps for portions of the Property, CITY agrees that OWNER may file and process tentative maps in accordance with Chapter 4.5 (commencing with Section 66498.1) of Division 2 of Title 7 of the California Government Code and the applicable provisions of CITY's subdivision ordinance, as the same may be amended from time to time. In accordance with the provisions of Section 66452.6 of the Government Code, each tentative subdivision map or tentative parcel map, heretofore or hereafter approved in connection with development of the Property, shall be deemed to have been granted an extension of time to and until the date that is five (5) years following the Effective Date.; The CITY's City Council may, in its discretion, extend any such map for an additional period of up to five (5) years beyond its original term, so long as the subdivider files a written request for an extension with the City prior to the expiration of the initial five (5) year term.

4. PUBLIC BENEFITS.

4.1 Intent. The parties acknowledge and agree that development of the Property will result in substantial public needs that will not be fully met by the Development Plan and further acknowledge and agree that this Agreement confers substantial private benefits on OWNER that should be balanced by commensurate public benefits. Accordingly, the parties intend to provide consideration to the public to balance the private benefits conferred on OWNER by providing more fully for the satisfaction of the public needs resulting from the Project.

4.2 Development Impact Fees.

4.2.1 Amount of Development Impact Fee. Development Impact Fees (DIF) shall be paid by OWNER. The Development Impact Fee amounts to be paid by OWNER shall be the amounts that are in effect at the time such amounts are due. Nothing contained in this Agreement shall affect the ability of the CITY to impose new Development Impact Fees or amend the amounts of existing Development Impact Fees. Additionally, nothing contained in this Agreement shall affect the ability of other public agencies that are not controlled by CITY to impose and amend, from time to time, Development Impact Fees established or imposed by such other public agencies, even though such Development Impact Fees may be collected by CITY.

4.2.2 Time of Payment. The Development Impact Fees required pursuant to Section 4.2.1 shall be paid to CITY prior to the issuance of building permit for each applicable residential or other unit, except for the Open Space and Habitat Acquisition Development Impact fee, which shall be paid by OWNER to CITY prior to the issuance of a grading permit. Deferral of the payment of Development Impact Fees may be granted pursuant to a separate agreement approved by City pursuant to City policy.

4.2.3 Parkland and Quimby Act Fees. Pursuant to the General Plan (Ontario Plan) Goal PR1, Policy PR1-5 (achievement of a park standard of 5 acres of

parkland per 1,000 residents) OWNER shall provide improved parks, developed in accordance with the City's park standards in an amount equal to two (2) acres per 1,000 of projected population without credit, reimbursement, offset or consideration from City. Such areas shall either be dedicated to the City or transferred to a homeowners' association. If approved by the CITY's City Manager, OWNER may satisfy this requirement through the development of non-public recreation facilities such as private recreational clubhouses or pool facilities. Credit for such private recreational facilities areas shall be limited to a maximum of 50% of the foregoing park development requirement. If OWNER's Project does not provide dedicated and developed park acreage equal to two (2) acres per 1,000 projected population, OWNER shall pay a fee in-lieu equal to the per acre estimated costs of acquisition and development of parkland in the City's Development Impact Fee for the calculated park acreage deficiency (e.g. Estimated Costs of Acquisition & Development multiplied by the Park Acreage deficiency). Such in-lieu fee shall be due and payable prior to issuance of the first building permit issued to OWNER and such in-lieu fee shall be based on the estimated costs of acquisition and development of parkland in the City's Development Impact Fee Program in effect at the time the payment becomes due and payable to the City. Any park dedication and/or improvements in excess of such two (2) acres per thousand standard, provided such park has been developed in accordance with the City's park standards and is open to the public generally, shall entitle OWNER to a credit toward its obligations under the Quimby Act (Gov. Code, § 64477) and the City's implementing ordinance and/or resolution (collectively "**Quimby Act Obligations**"), and to the extent OWNER's Quimby Act Obligations are satisfied, OWNER shall be entitled to have the City acquire such developed and publicly available parks as Non-Program Interests in accordance with Section 4.3.3 below.

4.3 Responsibility for Construction of Public Improvements.

4.3.1 Timely Construction of Public Infrastructure. The phasing of the areawide infrastructure construction within the New Model Colony will be as approved by the CITY. OWNER shall be responsible for the timely construction and completion of all public infrastructure required for the Project as shown on the attached Exhibit "F" and any and all tentative tract map conditions. Unless otherwise specified in the subdivision agreement/tract map conditions, all other required Improvements for each Tract Map, shall be completed and operational prior to, and as a condition precedent to, OWNER requesting and CITY's granting of the first building permit for production units for each such Tract Map. All Infrastructure and Improvements shall be completed as required by the Subdivision Agreement/Tract Map conditions for Tract Nos. 20298.

4.3.2 Construction of DIF Program Infrastructure (Construction Agreement). To the extent OWNER is required to construct and completes construction of public improvements that are included in CITY's Development Impact Fee Program and the Construction Agreement between CITY and NMC Builders LLC, CITY agrees that CITY shall issue DIF Credit in accordance with the provisions of the

Construction Agreement and any amendments thereto. Use of DIF Credit issued to OWNER as a member of NMC Builders LLC to offset OWNER's DIF payment obligations shall also be subject to the provisions of the Construction Agreement and any amendments thereto.

4.3.3 Construction of DIF Program Infrastructure (Non-Construction Agreement). To the extent OWNER is required to construct and completes construction of public improvements that are included in CITY's Development Impact Fee Program and such public improvements are not included the Construction Agreement between CITY and NMC Builders LLC, CITY agrees that CITY shall issue DIF Credit in accordance with the provisions of a separate Fee Credit Agreement between CITY and OWNER. Limitation on the use of DIF Credit issued to OWNER to offset OWNER's DIF payment obligations shall also be subject to the provisions of a separate Fee Credit Agreement. CITY and OWNER agree that the Fee Credit Agreement between CITY and OWNER shall comply with CITY's adopted policies applicable to such agreements.

4.4 Affordable Housing Requirement.

4.4.1 Affordable Housing- Number of Units. OWNER shall provide a minimum number of affordable housing units, equivalent to 10% of the OWNER's total approved residential units within the Project, that are affordable to very low, low and moderate income households. Such requirement for affordable housing shall be met through one, or a combination of one or more, of the options provided in the following Sections 4.3.2.1 through 4.3.2.1. For the purposes of this Section, any term not defined in this Agreement shall be as defined by California Community Redevelopment Law (California Health and Safety Code Section 33000 et seq.).

4.4.2 Affordability Spread. Of the total number of residential dwelling units specified in Section 4.4.1, to be constructed or rehabilitated pursuant to Sections 4.4.2.1 or 4.4.2.2 respectively, thirty percent (30%) shall be available to very low income, thirty percent (30%) shall be available to low income and forty percent (40%) shall be available to moderate income households. "**Households**" shall be as defined by California Health and Safety Code Section 50053.

4.4.2.1 New Construction. If OWNER elects to fully or partially satisfy the affordable housing requirement by the construction of new residential units, it shall construct and restrict the affordability of residential dwelling units within its Project or, at OWNER's option and with the approval of the City, within another project elsewhere within the City. The affordable units constructed shall be intermingled with other units as part of the Project, and shall be built to the same construction, design and aesthetic standards, as well as number of rooms, as other units constructed as part of that OWNER's Project. In addition, the percentage ratio of affordable units offered for sale versus those offered for rent shall equal the percentage ratio of other units offered for sale versus for rent within OWNER's Project. Such construction shall be completed no later than the date that is five (5)

years following the issuance of the first building permit for OWNER's Project; provided however that to the extent OWNER has not constructed the required percentage of units, based on the number of building permits for non-restricted units, OWNER shall, prior to the issuance of such building permits, provide security (in the form and substance approved by the City Manager and City Attorney) to City in order to ensure the faithful completion of such required percentage of construction of affordable units. If OWNER elects the option of constructing new affordable units, a detailed Affordable Housing Agreement specifying terms for the allowable monthly housing costs or rents (as applicable) and maintenance and occupancy standards shall be prepared, executed and recorded against such units as a condition to the issuance of a building permit. The Affordable Housing Agreement shall hold a recorded priority position senior to any other non-statutory lien or encumbrance affecting the unit.

4.4.2.2 Rehabilitation. If OWNER elects to fully or partially satisfy the affordable housing requirement by the substantial rehabilitation of existing residential units in the City, it shall substantially rehabilitate and restrict the affordability of, the number of residential units specified in Section 4.4.1, provided that such units shall be provided elsewhere within the City. The rehabilitation work shall be substantial and of high quality and shall also address any deferred property maintenance issues on the property. "**Substantial rehabilitation**" shall mean rehabilitated multi-family rented dwelling units with three or more units and the value of the rehabilitation constitutes 25 percent of the after rehabilitation value of the dwelling, inclusive of land value pursuant to Health and Safety Code Section 33413(b)(2)(A)(iii-iv) as such section exists as of the Effective Date. If OWNER chooses the option of rehabilitation of existing housing units within the City, a detailed Affordable Housing Agreement specifying the terms for the allowable month housing costs or rents (as applicable) and maintenance and occupancy standards shall be prepared, executed and recorded against such units as a condition to the issuance of a building permit. Such rehabilitation shall be completed no later than the date that is five (5) years following the issuance of the first building permit for OWNER's Project; provided however that to the extent OWNER has not rehabilitated the required percentage of units, based on the number of building permits, OWNER shall, prior to the issuance of such building permits, provide security (in the form and substance approved by the CITY's City Manager and City Attorney) to the City in order to ensure the faithful completion of such required percentage of rehabilitation.

4.4.2.3 In-Lieu Fee. If OWNER has not fully complied with the requirements of Section 4.3.1 by providing the minimum number of affordable units through the construction of new affordable units or by the substantial rehabilitation of existing units, shall pay an "**Affordability In-Lieu Fee**". If OWNER has not provided any affordable residential units by construction or rehabilitation, the Affordability In-Lieu fee shall be equal to

Two Dollars Sixty-Three Cents (\$2.63) per square foot of residential development within OWNER's Project or, if pre-paid as set forth below, Two Dollars Thirty Cents (\$2.30) per square foot of residential development within OWNER's Project. If OWNER has partially complied with the requirements of Section 4.4.1 by construction or rehabilitation of less than the minimum number of units, then the Affordability In-lieu Fee shall be recalculated and reduced in consideration of the number and type of affordable units provided. The Affordability In-Lieu Fee shall be paid by OWNER to City no later than prior to the issuance of each building permit within OWNER's Project based on the square footage of the residential unit for which such building permit is sought; provided however that OWNER may, at OWNER's election, pre-pay such Affordability In-Lieu Fee by paying such Affordability In-Lieu Fee within thirty (30) days following the earliest discretionary approval by the City for OWNER's Project, including, but not limited to, any general plan amendment, specific plan adoption, development agreement, tentative map approval, variance, conditional use permit, or resolution of intention to form any public financing mechanism. The Two Dollars, Sixty Three Cents (\$2.63) and the Two Dollars Thirty Centers (\$2.30) per square foot amounts shall automatically be increased annually, commencing on July 1, 2021, and automatically each July 1 thereafter. Such adjustment shall be based on the percentage increase (but no decrease) in the Consumer Price Index (Los Angeles-Anaheim-Riverside County), 1950-2001 (1982-84=100) over the preceding year. The pre-paid Affordability In-Lieu Fee shall be calculated based on the maximum floor area ratio (FAR) permitted within the General Plan and any applicable FAR contained within the Specific Plan, whichever is greater, and the Maximum Development Density. For purposes of this Agreement, "**Maximum Development Density**" shall be determined by multiplying the OWNER's Project's density for residential development potential as set forth in the General Plan or the Specific Plan, whichever is less, by the net acreage of land within OWNER's Project. All "Affordability In-Lieu Fees" collected by the City shall be used to promote the construction of affordable housing within the City.

4.4.2.4 Affordability Covenants. Prior to the issuance of the first building permit for any affordable unit, the City and OWNER shall enter into an Affordable Housing Agreement Affordability shall be assured for a period of forty-five (45) years for for-sale units and fifty-five (55) years for rentals. For rental units, base rents shall be established by the City and rental adjustments required by the City shall be performed on an annual basis. In addition, the Affordable Housing Agreement shall impose maximum occupancy limits of 2 occupants per bedroom plus 1 additional occupant per dwelling unit, and a requirement for the owner or tenant to properly maintain each dwelling unit.

4.4.2.5 Transfer of Affordable Project. No transfer of title to any affordable housing project shall occur without the prior written consent of the City. In

the event OWNER transfers title to any affordable housing project required to be constructed pursuant to this Agreement to a non-profit entity, or other entity, that receives an exemption from ad valorem real property taxes, the City shall be required to assure payment of an annual in lieu fee to the City on July 1 of each year equal to one-tenth of one percent (0.1%) of the assessed value of such project. The City may permit OWNER to satisfy this obligation by recorded covenants against the property and enforceable against said entity by the City. Any such covenants shall be approved by the Planning Director and the City Attorney.

4.5 Schools Obligations.

4.5.1 Written Evidence of Compliance with Schools Obligations.

OWNER shall, either through joint or individual agreements between OWNER and the applicable school district(s), satisfy its new school obligations. The new school obligations for the Mountain View School District in the Ontario Ranch area have been projected to include the acquisition or dedication of school sites for, and construction of, up to eight (8) schools. Of these eight (8) schools, six (6) are to be elementary (K-5) grade schools and two (2) are to be middle grade schools. The new school obligations for the Chaffey Joint Union High School District in the Ontario Ranch area have been projected to include the dedication of a school site for, and construction of, an additional high school. The new school obligations for the applicable school district shall be met by a combination of the following: (1) designating and dedicating school site(s) within the Property as set forth in the General Plan, and/or (2) paying school impact fees, (3) entering into a joint mitigation agreement or individual mitigation agreements, or (4) any combination of the foregoing. Written evidence of approval by the applicable school district that OWNER has met their school obligations may be required by the City as the condition to the issuance by the City of any entitlements for OWNER's Project. In the event OWNER is unable to provide such written evidence from the applicable school district(s), the City shall have the right to decline to honor any DIF Credit, Certificates of MDD Availability, Certificates of Storm Water Treatment Capacity Availability, or any combination thereof, presented by such OWNER, without liability to the City. To the extent that a joint mitigation agreement is approved by the applicable school district(s), and OWNER is a participant in good standing in such mitigation agreement, OWNER shall be deemed to have mitigated its new school obligations under this Section 4.5.

4.6 Public Services Funding Fee.

4.6.1 Requirement for Payment of Public Services Funding Fee. In order to ensure that the adequate provision of public services, including without limitation, police, fire and other public safety services, are available to the residents of each Project in a timely manner, OWNER shall pay to CITY a "**Public Services Funding Fee.**" The Public Services Funding Fee shall apply to residential and non-residential uses as set forth below.

4.6.2 Public Services Funding Fee Amount. OWNER shall pay a Public Services Funding fee in the total amount of Two Thousand One Hundred Twelve dollars (\$2,112.00) per residential dwelling unit. The Public Services Funding Fee shall be paid in one (1) installment within one hundred eighty (180) calendar days after the Effective Date or in two (2) installments, at OWNER's option, as follows:

4.6.2.1 First Installment (Residential uses). The First Installment of the Public Services Funding Fee shall be One Thousand Fifty-Six dollars (\$1,056) per residential dwelling unit. The First Installment shall be based upon the "**Maximum Development Density**" of the OWNER Project, as defined in Section 3.7.2.3 of the First Amended and Restated Construction Agreement. The First Installment shall be due and payable 30 days following the Effective Date.

If the First installment amount is not paid for all residential dwelling units within the Project (based on the Maximum Development Density, or the number of units described on "B Maps" if approved) by January 1, 2021, the amount of the First Installment shall be increased. Such increase shall be based on the percentage increase (but no decrease) in the Consumer Price Index (Los Angeles-Anaheim-Riverside County), 1950-2001 (1982-84=100) over the preceding year. Additionally, the amount shall be further increased automatically by the percentage increase in the Consumer Price Index (Los Angeles-Anaheim-Riverside) on each January 1 thereafter.

4.6.2.2 Second Installment (Residential Uses). The Second Installment of the Public Services Funding Fee shall be One Thousand Fifty-Six dollars (\$1,056) per residential unit. The Second Installment shall be paid at the time of the issuance of each building permit for the Project. The amount of the Second Installment shall increase automatically by percentage increase (but no decrease) in the Consumer Price Index (Los Angeles-Anaheim-Riverside County), 1950-2001 (1982-84=100) over the preceding year on January 1st of each year, beginning on January 1, 2021. OWNER may exercise the option to pay the Second Installment amount for all residential units, a portion of the residential units, or for the remainder of the residential units within OWNER's Project on or before each December 31st, before the Second Installment amount is automatically increased.

4.6.2.3 Single Installment (Non-residential Uses). A single installment payment of the Public Services Funding Fee shall be required in the amount of Sixty Three Cents (\$.63) per square foot of non-residential buildings. The single installment for non-residential uses shall be due and payable prior to the issuance of the building permit for a non-residential building. The amount of the Single Installment for non-residential uses shall automatically increase by percentage increase (but no decrease) in the Consumer Price Index (Los Angeles-Anaheim-Riverside County), 1950-2001 (1982-84=100) over the preceding year on January 1st of each year,

beginning on January 1, 2021. OWNER may exercise the option to pay any single installment amounts for the remainder of the non-residential square footage within the Project on or before December 31st, before the Single Installment amount is automatically increased.

4.7 Net MDD/Water Availability Equivalents.

4.7.1 NMC Builders LLC Membership. OWNER shall become a member of NMC Builders LLC, pursuant to the terms and conditions of the operating agreement of NMC Builders LLC. CITY acknowledges that the OWNER is a current "Member" of NMC Builders LLC. OWNER'S failure to maintain membership in NMC Builders LLC is and shall be a Default under this Agreement.

4.7.2 Assigned Net MDD/Water Availability Equivalents. The CITY has agreed with NMC Builders LLC to reserve exclusively for Members of NMC Builders, including OWNER, Net MDD made available through the construction of water system improvements funded by NMC Builders LLC. NMC Builders has assigned to OWNER its allocable share of the Net MDD issued by CITY. The provisions of the Construction Agreement Amendment requires that the CITY shall not approve a final tract map or issue building permits or certificates of occupancy for the area of development within the New Model Colony served by the water system improvements funded by NMC Builders LLC, except to the bearer of an Assignment of Net MDD Water Availability.

4.7.3 Use of Assigned Net MDD Water Availability. OWNER shall provide evidence of sufficient Net MDD Water Availability Equivalents (or portions thereof) prior to and as a condition precedent to, the CITY's approval of any and all tract maps for the Property. The amount of Net MDD Water Availability Equivalents required for CITY's approval of a tract map shall be based upon water demand factors and assumptions listed in Exhibit C-2R of the Construction Agreement Amendment as "Water Demand Equivalents by Land Use" for each land use category. CITY and OWNER agree that the Net MDD Water Availability has been determined to be 50.88 MDD.

4.7.4 Requirement for other Water System Improvements. A Certificate of Net MDD Availability is evidence only of available water capacity and does not satisfy any other conditions applicable to an OWNER's Project, including those relating to design and construction of master-planned potable water and recycled water transmission and distribution system for the respective pressure zone and other public infrastructure requirements.

4.8 Storm Water Capacity Availability.

4.8.1 Requirement for Storm Water Treatment Capacity Availability. OWNER shall provide evidence of sufficient Storm Water Treatment Capacity Availability

as reserved in a Certificate of Storm Water Treatment Capacity Availability the same manner and subject to the same limitations as provided for the assignment of Certificates of Net MDD Availability in Section 4.7.3 of this Agreement.

4.8.2 Use of Storm Water Treatment Capacity Availability. The amount of Storm Water Treatment Capacity Availability required for the issuance of a grading permit to OWNER shall be based upon the net residential acreage of the area to be graded regardless of the corresponding use. CITY and OWNER agree that the evidence of Storm Water Treatment Capacity Availability for the Project shall be based on the net acreage of OWNER's Project as defined in the Construction Agreement Amendment and as of the Effective Date such net acreage has been determined to be 10.49 acres.

4.8.3 Requirement for other Storm Water Improvements. The Certificate of Storm Water Treatment Capacity Availability is evidence only of available storm water treatment capacity and does not satisfy any other conditions applicable to a particular development project, including those relating to on-site water treatment, water quality, connection to the storm water collection system, or other public infrastructure requirements.

4.9 Maintenance of Open Space. OWNER shall provide for the ongoing maintenance of all park, common areas and open space areas within the Project as more particularly set forth in the Specific Plan, through a homeowners' association as approved by the CITY. Covenants, conditions and restrictions establishing any homeowners' association shall be approved by the Planning Director and City Attorney.

4.10 Compliance with Public Benefits Requirements.

4.10.1 Failure to Provide Public Benefits. In the event OWNER fails or refuses to comply with any condition referenced in Section 4.1 through 4.10, or challenges (whether administratively or through legal proceedings) the imposition of such conditions, OWNER shall be deemed in default of this Agreement pursuant to Section 8.4 hereof, thereby entitling the City to any and all remedies available to it, including, without limitation, the right of the City to withhold OWNER's Project-related building permits, certificates of occupancy, or discretionary approvals, without liability.

5. FINANCING OF PUBLIC IMPROVEMENTS.

5.1 Financing Mechanism(s). In accordance with the Memorandum of Agreement between the CITY and NMC Builders, CITY will cooperate with OWNER in the formation of a CFD, or CFDs, to include all of the Project, to provide a financing mechanism to reimburse the OWNER for funds paid to NMC Builders LLC for OWNER's share of the costs of public infrastructure pursuant to the Construction Agreement and to acquire other public facilities constructed by OWNER subject to the provisions of the Memorandum of Agreement between CITY and NMC Builders LLC.

Notwithstanding such reimbursements and acquisitions, OWNER shall remain entitled to DIF Credits as provided for in Article 3 of the Construction Agreement and/or as provided for in a separate Fee Credit Agreement between CITY and OWNER. OWNER agrees that, prior to the recordation of any tract map for the Property, the Property shall be included in a CFD to finance City services through annual special taxes that will initially be \$1,687.50 per Single Family Detached Dwelling Unit, \$1,462.41 per Multiple-Family Dwelling Unit, \$1,226.39 per Gated Apartment Community Dwelling Unit, and \$.32 per square foot for Non-Residential buildings. These amounts shall be subject to an automatic increase at a rate not to exceed four (4%) percent per year. CITY shall be the sole and exclusive lead agency in the formation of any CFD, assessment district or other public financing mechanism within the Property; provided however, that the proceeds of any such CFD, assessment district, or financing mechanism may be used, subject to restrictions that may be imposed by applicable law, for the purposes of acquiring, constructing or maintaining public facilities to be owned or operated by other public agencies, including, without limitation those facilities owned or operated by a school district. In addition to the rights of the CITY pursuant to section 5.1 hereof, CITY shall have the right, but not the obligation, to condition the formation of any CFD, assessment district or other public financing mechanism within the Property on the OWNER mitigating all Project-related impacts to the applicable school district(s) as required by such school district(s). Written evidence by such school district(s) may be required by the CITY as the condition to the formation of any CFD, assessment district or other public financing mechanism within the Property, or any steps preliminary thereto, including, without limitation, the adoption of any resolution of intention to form such CFD, assessment district or other public financing mechanism within the Property. It is not the intent of the parties hereto, by this provision, to prohibit or otherwise limit the City's ability to take any and all necessary steps requisite to the formation of the CFD to finance City services through annual special taxes as set forth in this Section 5.1. Formation of any CFD, assessment district or other public financing mechanism within the Property, shall be subject to CITY's ability to make all findings required by applicable law and complying with all applicable legal procedures and requirements including, without limitation, CITY's public financing district policies as such policies may be amended from time to time. Notwithstanding the foregoing, it is acknowledged and agreed by the parties that nothing contained in this Agreement shall be construed as requiring CITY or the CITY's City Council to form any such district or to issue and sell bonds.

6. REVIEW FOR COMPLIANCE.

6.1 Periodic and Special Reviews.

6.1.1 Time for and Initiation of Periodic Review. The CITY shall review this Agreement every twelve (12) months from the Effective Date in order to ascertain the good faith compliance by the OWNER with the terms of this Agreement. The OWNER shall submit an Annual Monitoring Report to CITY, in a form acceptable to the CITY's City Manager, along with any applicable processing charge within ten (10) days after each anniversary date of the Effective Date of this Agreement.

Within fifteen (15) days after the receipt of the Annual Monitoring Report, CITY shall review the Annual Monitoring Report. Prior to the expiration of the fifteen (15) day review period, CITY shall either issue a notice of continuing compliance or a notice of non-compliance and a notice of CITY's intent to conduct a Special Review pursuant to Sections 6.1.2 through 6.1.6. Issuance of a notice of continuing compliance may be issued by the CITY's City Manager or his designee.

6.1.2 Initiation of Special Review. A special review may be called either by agreement between the parties or by initiation in one or more of the following ways:

- (1) Recommendation of the CITY's planning staff;
- (2) Affirmative vote of at least four (4) members of the CITY's Planning Commission; or
- (3) Affirmative vote of at least three (3) members of the CITY's City Council.

6.1.3 Notice of Special Review. The CITY's City Manager shall begin the special review proceeding by giving notice that the CITY intends to undertake a special review of this Agreement to the OWNER. Such notice shall be given at least ten (10) days in advance of the time at which the matter will be considered by the CITY's Planning Commission.

6.1.4 Public Hearing. The CITY's Planning Commission shall conduct a hearing at which the OWNER must demonstrate good faith compliance with the terms of this Agreement. The burden of proof on this issue is upon the OWNER.

6.1.5 Findings Upon Public Hearing. The CITY's Planning Commission shall determine upon the basis of substantial evidence whether or not the OWNER has, for the period under review, complied in good faith with the terms and conditions of this Agreement.

6.1.6 Procedure Upon Findings.

(a) If the CITY's Planning Commission finds and determines on the basis of substantial evidence that the OWNER has complied in good faith with the terms and conditions of this Agreement during the period under review, the review for that period is concluded.

(b) If the CITY's Planning Commission finds and determines on the basis of substantial evidence that the OWNER has not complied in good faith with the terms and conditions of this Agreement during the period under review, the CITY's

Planning Commission may recommend to the CITY's City Council to modify or terminate this Agreement.

(c) The OWNER may appeal a determination pursuant to paragraph (b) to the CITY's City Council in accordance with the CITY's rule for consideration of appeals in zoning matters generally.

6.2 Proceedings Upon Modification or Termination. If, upon a finding under Section 6.1.6(b), the CITY determines to proceed with modification or termination of this Agreement, the CITY shall give notice to the property OWNER of its intention so to do. The notice shall contain:

(a) The time and place of the hearing;

(b) A statement as to whether or not the CITY proposes to terminate or to modify this Agreement; and

(c) Other information that the CITY considers necessary to inform the OWNER of the nature of the proceeding.

6.3 Hearing on Modification or Termination. At the time and place set for the hearing on modification or termination, the OWNER shall be given an opportunity to be heard. The OWNER shall be required to demonstrate good faith compliance with the terms and conditions of this Agreement. The burden of proof on this issue shall be on the OWNER. If the CITY's City Council finds, based upon substantial evidence in the administrative record, that the OWNER has not complied in good faith with the terms and conditions of the agreement, the CITY's City Council may terminate or modify this Agreement and impose those conditions to the action it takes as it considers necessary to protect the interests of the CITY. The decision of the CITY's City Council shall be final, subject only to judicial review pursuant to Section 1094.5 of the Code of Civil Procedure.

6.4 Certificate of Agreement Compliance. If, at the conclusion of a Periodic or Special Review, OWNER is found to be in compliance with this Agreement, CITY shall, upon written request by OWNER, issue a Certificate of Agreement Compliance ("Certificate") to OWNER stating that after the most recent Periodic or Special Review and based upon the information known or made known to the CITY's Planning Director and City Council that (1) this Agreement remains in effect and (2) OWNER is not in default. The Certificate shall be in recordable form, shall contain information necessary to communicate constructive record notice of the finding of compliance, shall state whether the Certificate is issued after a Periodic or Special Review and shall state the anticipated date of commencement of the next Periodic Review. OWNER may record the Certificate with the County Recorder. Whether or not the Certificate is relied upon by assignees or other transferees or OWNER, CITY shall not be bound by a Certificate if a default existed at the time of the Periodic or Special Review, but was concealed from or otherwise not known to the CITY's Planning Director or City Council.

7. [RESERVED]

8. DEFAULT AND REMEDIES.

8.1 Remedies in General. It is acknowledged by the parties that CITY would not have entered into this Agreement if it were to be liable in damages under this Agreement, or with respect to this Agreement or the application thereof.

In general, each of the parties hereto may pursue any remedy at law or equity available for the breach of any provision of this Agreement, except that CITY shall not be liable in damages to OWNER, or to any successor in interest of OWNER, or to any other person, and OWNER covenants not to sue for damages or claim any damages:

(a) For any breach of this Agreement or for any cause of action which arises out of this Agreement; or

(b) For the taking, impairment or restriction of any right or interest conveyed or provided under or pursuant to this Agreement; or

(c) Arising out of or connected with any dispute, controversy or issue regarding the application or interpretation or effect of the provisions of this Agreement.

8.2 Specific Performance. The parties acknowledge that money damages and remedies at law generally are inadequate and specific performance and other non-monetary relief are particularly appropriate remedies for the enforcement of this Agreement and should be available to all parties for the following reasons:

(a) Money damages are unavailable against CITY as provided in Section 8.1 above.

(b) Due to the size, nature and scope of the project, it may not be practical or possible to restore the Property to its natural condition once implementation of this Agreement has begun. After such implementation, OWNER may be foreclosed from other choices it may have had to utilize the Property or portions thereof. OWNER has invested significant time and resources and performed extensive planning and processing of the Project in agreeing to the terms of this Agreement and will be investing even more significant time and resources in implementing the Project in reliance upon the terms of this Agreement, and it is not possible to determine the sum of money which would adequately compensate OWNER for such efforts.

8.3 Release. Except for nondamage remedies, including the remedy of specific performance and judicial review as provided for in Section 6.5, OWNER, for itself, its successors and assignees, hereby releases the CITY, its officers, agents and employees from any and all claims, demands, actions, or suits of any kind or nature arising out of any liability, known or unknown, present or future, including, but not limited to, any claim or liability, based or asserted, pursuant to Article I, Section 19 of the California Constitution, the Fifth Amendment of the United States Constitution, or any other law or ordinance which seeks to impose any other liability or damage, whatsoever, upon the CITY because it entered into this Agreement or because of the terms of this Agreement.

8.4 Termination or Modification of Agreement for Default of OWNER. Subject to the provisions contained in Section 6.3 herein, CITY may terminate or modify this Agreement for any failure of OWNER to perform any material duty or obligation of OWNER under this Agreement, or to comply in good faith with the terms of this Agreement (hereinafter referred to as “default”); provided, however, CITY may terminate or modify this Agreement pursuant to this Section only after providing written notice to OWNER of default setting forth the nature of the default and the actions, if any, required by OWNER to cure such default and, where the default can be cured, OWNER has failed to take such actions and cure such default within 60 days after the effective date of such notice or, in the event that such default cannot be cured within such 60 day period but can be cured within a longer time, has failed to commence the actions necessary to cure such default within such 60 day period and to diligently proceed to complete such actions and cure such default.

8.5 Termination of Agreement for Default of CITY. OWNER may terminate this Agreement only in the event of a default by CITY in the performance of a material term of this Agreement and only after providing written notice to CITY of default setting forth the nature of the default and the actions, if any, required by CITY to cure such default and, where the default can be cured, CITY has failed to take such actions and cure such default within 60 days after the effective date of such notice or, in the event that such default cannot be cured within such 60 day period but can be cured within a longer time, has failed to commence the actions necessary to cure such default within such 60 day period and to diligently proceed to complete such actions and cure such default.

9. THIRD PARTY LITIGATION.

9.1 General Plan Litigation. CITY has determined that this Agreement is consistent with its General Plan, as such General Plan exists as of the Effective Date, and that the General Plan meets all requirements of law. OWNER has reviewed the General Plan and concurs with CITY’s determination. CITY shall have no liability in damages under this Agreement for any failure of CITY to perform under this Agreement or the inability of OWNER to develop the Property as contemplated by the Development Plan of this Agreement as the result of a judicial determination that on the Effective Date, or at any time thereafter, the General Plan, or portions thereof, are invalid or inadequate or not in compliance with law.

9.2 Third Party Litigation Concerning Agreement. OWNER shall defend, at its expense, including attorneys’ fees, indemnify, and hold harmless CITY, its agents, officers and employees from any claim, action or proceeding against CITY, its agents, officers, or employees to attack, set aside, void, or annul the approval of this Agreement or the approval of any permit granted pursuant to this Agreement. CITY shall promptly notify OWNER of any such claim, action or proceeding, and CITY shall cooperate in the defense. If CITY fails to promptly notify OWNER of any such claim, action or proceeding, or if CITY fails to cooperate in the defense, OWNER shall not thereafter be responsible to defend, indemnify, or hold harmless CITY. CITY may in its discretion participate in the defense of any such claim, action or proceeding.

9.3 Indemnity. In addition to the provisions of 9.2 above, OWNER shall indemnify and hold CITY, its officers, agents, employees and independent contractors free and harmless from any liability whatsoever, based or asserted upon any act or omission of OWNER, its officers, agents, employees, subcontractors and independent contractors, for property damage, bodily injury, or death (OWNER's employees included) or any other element of damage of any kind or nature, relating to or in any way connected with or arising from the activities contemplated hereunder, including, but not limited to, the study, design, engineering, construction, completion, failure and conveyance of the public improvements, save and except claims for damages arising through the sole active negligence or sole willful misconduct of CITY. OWNER shall defend, at its expense, including attorneys' fees, CITY, its officers, agents, employees and independent contractors in any legal action based upon such alleged acts or omissions. CITY may in its discretion participate in the defense of any such legal action.

9.4 Environment Assurances. OWNER shall indemnify and hold CITY, its officers, agents, and employees free and harmless from any liability, based or asserted, upon any act or omission of OWNER, its officers, agents, employees, subcontractors, predecessors in interest, successors, assigns and independent contractors for any violation of any federal, state or local law, ordinance or regulation relating to industrial hygiene or to environmental conditions on, under or about the Property, including, but not limited to, soil and groundwater conditions, and OWNER shall defend, at its expense, including attorneys' fees, CITY, its officers, agents and employees in any action based or asserted upon any such alleged act or omission. CITY may in its discretion participate in the defense of any such action.

9.5 Reservation of Rights. With respect to Sections 9.2, 9.3 and 9.4 herein, CITY reserves the right to either (1) approve the attorney(s) which OWNER selects, hires or otherwise engages to defend CITY hereunder, which approval shall not be unreasonably withheld, or (2) conduct its own defense, provided, however, that OWNER shall reimburse CITY forthwith for any and all reasonable expenses incurred for such defense, including attorneys' fees, upon billing and accounting therefor.

9.6 Survival. The provisions of this Sections 9.1 through 9.6, inclusive, shall survive the termination of this Agreement.

10. MORTGAGEE PROTECTION.

The parties hereto agree that this Agreement shall not prevent or limit OWNER, in any manner, at OWNER's sole discretion, from encumbering the Property or any portion thereof or any improvement thereon by any mortgage, deed of trust or other security device securing financing with respect to the Property. CITY acknowledges that the lenders providing such financing may require certain Agreement interpretations and modifications and agrees upon request, from time to time, to meet with OWNER and representatives of such lenders to negotiate in good faith any such request for interpretation or modification. CITY will not unreasonably withhold its consent to any such requested interpretation or modification provided such interpretation or

modification is consistent with the intent and purposes of this Agreement. Any Mortgagee of the Property shall be entitled to the following rights and privileges:

(a) Neither entering into this Agreement nor a breach of this Agreement shall defeat, render invalid, diminish or impair the lien of any mortgage on the Property made in good faith and for value, unless otherwise required by law.

(b) The Mortgagee of any mortgage or deed of trust encumbering the Property, or any part thereof, which Mortgagee, has submitted a request in writing to the CITY in the manner specified herein for giving notices, shall be entitled to receive written notification from CITY of any default by OWNER in the performance of OWNER's obligations under this Agreement.

(c) If CITY timely receives a request from a Mortgagee requesting a copy of any notice of default given to OWNER under the terms of this Agreement, CITY shall provide a copy of that notice to the Mortgagee within ten (10) days of sending the notice of default to OWNER. The Mortgagee shall have the right, but not the obligation, to cure the default during the remaining cure period allowed such party under this Agreement.

(d) Any Mortgagee who comes into possession of the Property, or any part thereof, pursuant to foreclosure of the mortgage or deed of trust, or deed in lieu of such foreclosure, shall take the Property, or part thereof, subject to the terms of this Agreement. Notwithstanding any other provision of this Agreement to the contrary, no Mortgagee shall have an obligation or duty under this Agreement to perform any of OWNER's obligations or other affirmative covenants of OWNER hereunder, or to guarantee such performance; provided, however, that to the extent that any covenant to be performed by OWNER is a condition precedent to the performance of a covenant by CITY, the performance thereof shall continue to be a condition precedent to CITY's performance hereunder, and further provided that any sale, transfer or assignment by any Mortgagee in possession shall be subject to the provisions of Section 2.4 of this Agreement.

11. MISCELLANEOUS PROVISIONS.

11.1 Recordation of Agreement. This Agreement and any amendment or cancellation thereof shall be recorded with the San Bernardino County Recorder by the City Clerk within the ten (10) days after the CITY executes this Agreement, as required by Section 65868.5 of the Government Code. If the parties to this Agreement or their successors in interest amend or cancel this Agreement as provided for herein and in Government Code Section 65868, or if the CITY terminates or modifies the agreement as provided for herein and in Government Code Section 65865.1 for failure of the applicant to comply in good faith with the terms or conditions of this Agreement, the City Clerk shall have notice of such action recorded with the San Bernardino County Recorder.

11.2 Entire Agreement. This Agreement sets forth and contains the entire understanding and agreement of the parties, and there are no oral or written

representations, understandings or ancillary covenants, undertakings or agreements which are not contained or expressly referred to herein. No testimony or evidence of any such representations, understandings or covenants shall be admissible in any proceeding of any kind or nature to interpret or determine the terms or conditions of this Agreement.

11.3 Severability. If any term, provision, covenant or condition of this Agreement shall be determined invalid, void or unenforceable, the remainder of this Agreement shall not be affected thereby to the extent such remaining provisions are not rendered impractical to perform taking into consideration the purposes of this Agreement. Notwithstanding the foregoing, the provision of the Public Benefits set forth in Section 4 of this Agreement, including the payment of the fees set forth therein, are essential elements of this Agreement and CITY would not have entered into this Agreement but for such provisions, and therefore in the event such provisions are determined to be invalid, void or unenforceable, this entire Agreement shall be null and void and of no force and effect whatsoever.

11.4 Interpretation and Governing Law. This Agreement and any dispute arising hereunder shall be governed and interpreted in accordance with the laws of the State of California. This Agreement shall be construed as a whole according to its fair language and common meaning to achieve the objectives and purposes of the parties hereto, and the rule of construction to the effect that ambiguities are to be resolved against the drafting party shall not be employed in interpreting this Agreement, all parties having been represented by counsel in the negotiation and preparation hereof.

11.5 Section Headings. All section headings and subheadings are inserted for convenience only and shall not affect any construction or interpretation of this Agreement.

11.6 Singular and Plural. As used herein, the singular of any word includes the plural.

11.7 Joint and Several Obligations. Subject to Section 2.4, if at any time during the term of this Agreement the Property is owned, in whole or in part, by more than one owner, all obligations of such owners under this Agreement shall be joint and several, and the default of any such owner shall be the default of all such owners. Notwithstanding the foregoing, no owner of a single lot which has been finally subdivided and sold to such owner as a member of the general public or otherwise as an ultimate user shall have any obligation under this Agreement except as provided under Section 4 hereof.

11.8 Time of Essence. Time is of the essence in the performance of the provisions of this Agreement as to which time is an element.

11.9 Waiver. Failure by a party to insist upon the strict performance of any of the provisions of this Agreement by the other party, or the failure by a party to exercise its rights upon the default of the other party, shall not constitute a waiver of such party's

right to insist and demand strict compliance by the other party with the terms of this Agreement thereafter.

11.10 No Third Party Beneficiaries. This Agreement is made and entered into for the sole protection and benefit of the parties and their successors and assigns. No other person shall have any right of action based upon any provision of this Agreement.

11.11 Force Majeure. Neither party shall be deemed to be in default where failure or delay in performance of any of its obligations under this Agreement is caused by floods, earthquakes, other Acts of God, fires, wars, riots or similar hostilities, strikes and other labor difficulties beyond the party's control, (including the party's employment force), government regulations, court actions (such as restraining orders or injunctions), or other causes beyond the party's control. If any such events shall occur, the term of this Agreement and the time for performance by either party of any of its obligations hereunder may be extended by the written agreement of the parties for the period of time that such events prevented such performance, provided that the term of this Agreement shall not be extended under any circumstances for more than five (5) years.

11.12 Mutual Covenants. The covenants contained herein are mutual covenants and also constitute conditions to the concurrent or subsequent performance by the party benefited thereby of the covenants to be performed hereunder by such benefited party.

11.13 Successors in Interest. The burdens of this Agreement shall be binding upon, and the benefits of this Agreement shall inure to, all successors in interest to the parties to this Agreement. All provisions of this Agreement shall be enforceable as equitable servitudes and constitute covenants running with the land. Each covenant to do or refrain from doing some act hereunder with regard to development of the Property: (a) is for the benefit of and is a burden upon every portion of the Property; (b) runs with the Property and each portion thereof; and, (c) is binding upon each party and each successor in interest during ownership of the Property or any portion thereof.

11.14 Counterparts. This Agreement may be executed by the parties in counterparts, which counterparts shall be construed together and have the same effect as if all of the parties had executed the same instrument.

11.15 Jurisdiction and Venue. Any action at law or in equity arising under this Agreement or brought by a party hereto for the purpose of enforcing, construing or determining the validity of any provision of this Agreement shall be filed and tried in the Superior Court of the County of San Bernardino, State of California, and the parties hereto waive all provisions of law providing for the filing, removal or change of venue to any other court.

11.16 Project as a Private Undertaking. It is specifically understood and agreed by and between the parties hereto that the development of the Project is a private development, that neither party is acting as the agent of the other in any respect hereunder, and that each party is an independent contracting entity with respect to the terms, covenants and conditions contained in this Agreement. No partnership, joint

venture or other association of any kind is formed by this Agreement. The only relationship between CITY and OWNER is that of a government entity regulating the development of private property and the owner of such property.

11.17 Further Actions and Instruments. Each of the parties shall cooperate with and provide reasonable assistance to the other to the extent contemplated hereunder in the performance of all obligations under this Agreement and the satisfaction of the conditions of this Agreement. Upon the request of either party at any time, the other party shall promptly execute, with acknowledgment or affidavit if reasonably required, and file or record such required instruments and writings and take any actions as may be reasonably necessary under the terms of this Agreement to carry out the intent and to fulfill the provisions of this Agreement or to evidence or consummate the transactions contemplated by this Agreement. The CITY's City Manager may delegate his powers and duties under this Agreement to an Assistant City Manager or other management level employee of the CITY.

11.18 Eminent Domain. No provision of this Agreement shall be construed to limit or restrict the exercise by CITY of its power of eminent domain.

11.19 Agent for Service of Process. In the event OWNER is not a resident of the State of California or it is an association, partnership or joint venture without a member, partner or joint venturer resident of the State of California, or it is a foreign corporation, then in any such event, OWNER shall file with the Planning Director, upon its execution of this Agreement, a designation of a natural person residing in the State of California, giving his or her name, residence and business addresses, as its agent for the purpose of service of process in any court action arising out of or based upon this Agreement, and the delivery to such agent of a copy of any process in any such action shall constitute valid service upon OWNER. If for any reason service of such process upon such agent is not feasible, then in such event OWNER may be personally served with such process out of this County and such service shall constitute valid service upon OWNER. OWNER is amenable to the process so served, submits to the jurisdiction of the Court so obtained and waives any and all objections and protests thereto. OWNER for itself, assigns and successors hereby waives the provisions of the Hague Convention (Convention on the Service Abroad of Judicial and Extra Judicial Documents in Civil or Commercial Matters, 20 U.S.T. 361, T.I.A.S. No. 6638).

11.20 Estoppel Certificate. Within thirty (30) business days following a written request by any of the parties, the other party shall execute and deliver to the requesting party a statement certifying that (i) either this Agreement is unmodified and in full force and effect or there have been specified (date and nature) modifications to the Agreement, but it remains in full force and effect as modified; and (ii) either there are no known current uncured defaults under this Agreement or that the responding party alleges that specified (date and nature) defaults exist. The statement shall also provide any other reasonable information requested. The failure to timely deliver this statement shall constitute a conclusive presumption that this Agreement is in full force and effect without modification except as may be represented by the requesting party and that there are no uncured defaults in the performance of the requesting party, except as may

be represented by the requesting party. OWNER shall pay to CITY all costs incurred by CITY in connection with the issuance of estoppel certificates under this Section 11.20 prior to CITY's issuance of such certificates.

11.21 Authority to Execute. The person or persons executing this Agreement on behalf of OWNER warrants and represents that he or she/they have the authority to execute this Agreement on behalf of his or her/their corporation, partnership or business entity and warrants and represents that he or she/they has/have the authority to bind OWNER to the performance of its obligations hereunder.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement on the day and year set forth below.

DISCLOSURE NOTICE
SOUTH ARCHIBALD TRICHLOROETHYLENE PLUME

Dear Property Owner/Developer/Applicant:

The City of Ontario ("City") has approved or will be approving development in the Ontario Ranch area in the next few years, subject to the appropriate and required statutory process. This letter is intended to serve as notice to all potential property owners of the existence of a groundwater plume, known as the South Archibald Trichloroethylene (TCE) Plume which may exist in, under or near owner's property.

The groundwater plume is in an area in the central Chino Basin south of the Pomona Freeway, west of Turner Avenue, east of Grove Avenue, and north of Kimball Avenue. The plume primarily consists of TCE, a discontinued industrial solvent, and is subject to a clean-up under the oversight and direction of the Santa Ana Regional Water Quality Control Board ("Regional Board").

The Regional Board's approved clean-up procedure involves the removal and treatment of groundwater containing TCE via groundwater wells to reduce the plume concentrations and control its migration. In addition, the City is providing potable water supplies for domestic purposes to residences with private domestic wells affected by the plume. Finally, the Regional Board will continue to monitor all impacted areas and private domestic wells to ensure that residents' health and the environment are properly safeguarded. These remedial actions are documented in a Remedial Action Plan approved by the Regional Board in September 2016.

Further and current information may be found on the Regional Board's Geotracker website at https://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658.

Property owners may wish to include this letter as a part of a Real Estate Transfer Disclosure under California Civil Code Section 1102 et seq.

FILE NO(S): PDA19-001

SUBJECT: A Development Agreement (File No. PDA19-001) between the City of Ontario and Euclid Land Venture, LLC, to establish the terms and conditions for the development of Tentative Parcel Map 20016 (File No. PMTT18-011), a 85.6 acre property located at the northeast corner of Merrill Avenue and Euclid Avenue, within the Industrial and Business Park land use districts of the Ontario Ranch Business Park Specific Plan (APNs: 1054-011-01, 1054-011-02, 1054-011-04; 1054-021-01, 1054-021-02; 1054-271-01, 1054-271-02, 1054-271-03, 1054-281-01, 1054-281-02, and 1054-281-03). **Submitted by Euclid Land Venture, LLC. City Council action is required.**

PROPERTY OWNER: Ronald & Kristine Pietersma Family Trust

RECOMMENDED ACTION: That the Planning Commission consider and recommend City Council adoption of an ordinance approving the Development Agreement (File No. PDA19-001) between the City of Ontario and Euclid Land Venture, LLC., pursuant to the facts and reasons contained in the staff report and attached resolution.

PROJECT SETTING: The project site is comprised of 85.6 acres of land located at the northeast corner of Merrill Avenue and Euclid Avenue, within the Industrial and Business Park land use districts of the Ontario Ranch Business Park Specific Plan, and is depicted in Figure 1: Project Location, below.

PROJECT ANALYSIS:

(1) Background — On September 15, 2020, the City Council approved the Environmental Impact Report (EIR) SCH#2019050018, and Ontario Ranch Business Park Specific Plan, File No. PSP18-002 (the “Specific Plan”) which addressed the proposed development of approximately 1,905,027 square feet of Industrial and Business Park uses.

Hearing Body	Date	Decision	Action
DAB	N/A	N/A	N/A
PC	10/27/2020		Recommend
CC	11/17/2020		Final

The Ontario Ranch financial commitments required for construction of properties within a specific plan are substantial. Therefore, in order to adequately forecast these costs and gain assurance that the project may proceed under the existing policies, rules and regulations, Euclid Land Venture, LLC ("Owner") has requested that the City enter into negotiations to create a Development Agreement ("Agreement").

In accordance with California Government Code Section 65865, which in part states that that "[a]ny city... may enter into a Development Agreement with any person having a legal or equitable interest in real property for the development of such property..." and California Government Code Section 65865.52, which in part states that "a Development Agreement shall specify the duration of the Agreement, the permitted uses of the property... and may include conditions, terms, restrictions..." the City of Ontario adopted Resolution No. 2002-100 setting forth the procedures and requirements for consideration of Development Agreements. Pursuant to these procedures and requirements, staff entered into negotiations with the Owner to create a Development Agreement for consideration by the Planning Commission and City Council.

The Agreement (File No. PDA19-001) is the first development agreement to be proposed outside of the NMC Builders' Construction Agreement development area and was established in coordination between the City Attorney and the Owner's legal counsel. The provisions of the Agreement are consistent with the commitments to assure adequate public infrastructure improvements are constructed or funded by the Owner.

(2) Staff Analysis – The Agreement proposes to include 85.6 acres of land within the Industrial and Business Park land use districts of the Specific Plan, as shown on the attached Exhibit "A". The Agreement grants the Owner a vested right to develop Tentative Parcel Map 20016 (File No. PMTT18-011), provided the Owner complies with the terms and conditions of the Specific Plan and EIR.

The Tentative Parcel Map 20016 (see Exhibit "B") is located at the northeast corner of Merrill Avenue and Euclid Avenue and proposes to subdivide 85.6 acres of land into eight (8) parcels to facilitate a Development Plan (File No. PDEV18-036) to construct three (3) Industrial buildings totaling 1,447,123 square feet, and five (5) Business Park buildings totaling 105,624 square feet.

The term of the Agreement is for ten (10) years, with a five (5) year option to renew. The main points of the agreement address funding for all new City expenses created by the project, which includes: Development Impact Fees (DIF) for construction of public improvements (i.e. streets and bridges, sewer, water, storm drain and fiber); funding a portion of Phase 2 Water Improvements; Public Service Funding to ensure adequate provisions of public services (police, fire and other public services); the creation of a Community Facilities District (CFD) for the maintenance of public facilities.

Staff finds that the Agreement is consistent with State law, The Ontario Plan, and the City's Development Agreement policies. As a result, staff is recommending approval of the

application to the Planning Commission. If the Planning Commission finds the Agreement is acceptable, a recommendation of approval to the City Council would be appropriate.

COMPLIANCE WITH THE ONTARIO PLAN: The proposed project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan (TOP). More specifically, the goals and policies of TOP that are furthered by the proposed project are as follows:

(1) City Council Goals.

- Invest in the Growth and Evolution of the City's Economy
- Operate in a Businesslike Manner
- Focus Resources in Ontario's Commercial and Residential Neighborhoods
- Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
 - Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in the New Model Colony

(2) Vision.

Distinctive Development:

- Commercial and Residential Development
 - Development quality that is broadly recognized as distinctive and not exclusively tied to the general suburban character typical of much of Southern California.

(3) Governance.

Decision Making:

- Goal G1: Sustained decision-making that consistently moves Ontario towards its Vision by using The Ontario Plan as a framework for assessing choices.
 - G1-2 Long-term Benefit. We require decisions to demonstrate and document how they add value to the community and support the Ontario Vision

(4) Policy Plan (General Plan)

Land Use Element:

- Goal LU1: A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.

➤ LU1-1 Strategic Growth. We concentrate growth in strategic locations that help create place and identity, maximize available and planned infrastructure, and foster the development of transit.

➤ LU1-6 Complete Community: We incorporate a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, employers, workers and visitors have a wide spectrum of choices of where they can live, work, shop and recreate within Ontario. (Refer to Complete Community Section of Community Economics Element).

- Goal LU2: Compatibility between a wide range of uses.

➤ LU2-6: Infrastructure Compatibility: We require infrastructure to be aesthetically pleasing and in context with the community character.

Community Economics Element:

➤ CE2-1 Development Projects. We require new development and redevelopment to create unique, high-quality places that add value to the community.

➤ CE2-2 Development Review. We require those proposing new development and redevelopment to demonstrate how their projects will create appropriately unique, functional and sustainable places that will compete well with their competition within the region.

➤ CE2-4 Protection of Investment. We require that new development and redevelopment protect existing investment by providing architecture and urban design of equal or greater quality.

➤ CE2-5 Private Maintenance. We require adequate maintenance, upkeep, and investment in private property because proper maintenance on private property protects property values.

Safety Element:

- Goal S1: Minimized risk of injury, loss of life, property damage and economic and social disruption caused by earthquake-induced and other geologic hazards.

➤ S1-1 Implementation of Regulations and Standards. We require that all new habitable structures be designed in accordance with the most recent California Building Code adopted by the City, including provisions regarding lateral forces and grading.

Community Design Element:

➤ CD1-2 Growth Areas. We require development in growth areas to be distinctive and unique places within which there are cohesive design themes.

➤ CD1-3 Neighborhood Improvement. We require viable existing residential and non-residential neighborhoods to be preserved, protected, and enhanced in accordance with our land use policies.

▪ Goal CD2: A high level of design quality resulting in public spaces, streetscapes, and developments that are attractive, safe, functional and distinct.

➤ CD2-1 Quality Architecture. We encourage all development projects to convey visual interest and character through:

- Building volume, massing, and height to provide appropriate scale and proportion;
- A true architectural style which is carried out in plan, section and elevation through all aspects of the building and site design and appropriate for its setting; and
- Exterior building materials that are visually interesting, high quality, durable, and appropriate for the architectural style.

➤ CD2-2 Neighborhood Design. We create distinct residential neighborhoods that are functional, have a sense of community, emphasize livability and social interaction, and are uniquely identifiable places through such elements as:

- A pattern of smaller, walkable blocks that promote access, activity and safety;
- Traffic calming measures to slow traffic and promote walkability while maintaining acceptable fire protection and traffic flows;
- Landscaped parkways, with sidewalks separated from the curb.

➤ CD2-7 Sustainability. We collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials and construction techniques.

➤ CD2-8 Safe Design. We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintenance of visibility and accessibility, and use of lighting.

➤ CD2-9 Landscape Design. We encourage durable landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits.

➤ CD2-10 Surface Parking Areas. We require parking areas visible to or used by the public to be landscaped in an aesthetically pleasing, safe and environmentally sensitive manner. Examples include shade trees, pervious surfaces, urban run-off capture and infiltration, and pedestrian paths to guide users through the parking field.

➤ CD2-11 Entry Statements. We encourage the inclusion of amenities, signage and landscaping at the entry to neighborhoods, commercial centers, mixed use areas, industrial developments, and public places that reinforce them as uniquely identifiable places.

➤ CD2-12 Site and Building Signage. We encourage the use of sign programs that utilize complementary materials, colors, and themes. Project signage should be designed to effectively communicate and direct users to various aspects of the development and complement the character of the structures.

➤ CD2-13 Entitlement Process. We work collaboratively with all stakeholders to ensure a high degree of certainty in the efficient review and timely processing of all development plans and permits.

▪ Goal CD3: Vibrant urban environments that are organized around intense buildings, pedestrian and transit areas, public plazas, and linkages between and within developments that are conveniently located, visually appealing and safe during all hours.

➤ CD3-1 Design. We require that pedestrian, vehicular, bicycle and equestrian circulation on both public and private property be coordinated and designed to maximize safety, comfort and aesthetics.

➤ CD3-2 Connectivity Between Streets, Sidewalks, Walkways and Plazas. We require landscaping and paving be used to optimize visual connectivity between streets, sidewalks, walkways and plazas for pedestrians.

➤ CD3-3 Building Entrances. We require all building entrances to be accessible and visible from adjacent streets, sidewalks or public open spaces.

➤ CD3-5 Paving. We require sidewalks and road surfaces to be of a type and quality that contributes to the appearance and utility of streets and public spaces.

➤ CD3-6 Landscaping. We utilize landscaping to enhance the aesthetics, functionality and sustainability of streetscapes, outdoor spaces and buildings.

▪ Goal CD5: A sustained level of maintenance and improvement of properties, buildings and infrastructure that protects the property values and encourages additional public and private investments.

➤ CD5-1 Maintenance of Buildings and Property. We require all public and privately owned buildings and property (including trails and easements) to be properly and consistently maintained.

➤ CD5-2 Maintenance of Infrastructure. We require the continual maintenance of infrastructure.

HOUSING ELEMENT COMPLIANCE: Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the recommending authority for the Project, the Planning Commission finds that based on the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE: The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan ("ALUCP"), establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the ALUCP. Any special conditions of approval associated with uses in close proximity to the airport are included in the conditions of approval provided with the attached Resolution. The project site is also located within the Airport Influence area of Chino Airport and is consistent with policies and criteria set forth within the 2011 California Airport Land Use Planning Handbook published by the California Department of Transportation, Division of Aeronautics

ENVIRONMENTAL REVIEW: The application is a project pursuant to the California Environmental Quality Act (Public Resources Code Section 21000 et seq.) ("CEQA") and an initial study has been prepared to determine possible environmental impacts. On the basis of the initial study, which indicated that all potential environmental impacts from the Project were less than significant or could be mitigated to a level of insignificance, a Mitigated Negative Declaration was prepared pursuant to CEQA, the State CEQA Guidelines and the City of Ontario Local CEQA Guidelines. Furthermore, to ensure that the mitigation measures are implemented, a Mitigation Monitoring and Reporting Program has been prepared for the Project pursuant to CEQA Guidelines Section 15097, which specifies responsible agencies/departments, monitoring frequency, timing and

method of verification and possible sanctions for non-compliance with mitigation measures. The environmental documentation for this project is available for review at the Planning Department public counter.

The environmental impacts of this project were previously reviewed in conjunction with the Ontario Ranch Business Park Specific Plan, for which a(n) EIR (SCH#2019050018) was adopted by the City Council on September 15, 2020. This Application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of project approval and are incorporated herein by this reference.

RESOLUTION NO.

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, RECOMMENDING CITY COUNCIL APPROVE A DEVELOPMENT AGREEMENT (FILE NO. PDA19-001), BETWEEN THE CITY OF ONTARIO AND EUCLID LAND VENTURE, LLC., TO ESTABLISH THE TERMS AND CONDITIONS FOR THE DEVELOPMENT OF TENTATIVE PARCEL MAP 20016 (FILE NO. PMTT18-011), A 85.6 ACRE PROPERTY LOCATED AT THE NORTHEAST CORNER OF MERRILL AVENUE AND EUCLID AVENUE, WITHIN THE INDUSTRIAL AND BUSINESS PARK LAND USE DISTRICTS OF THE ONTARIO RANCH BUSINESS PARK SPECIFIC PLAN AND MAKING FINDINGS IN SUPPORT THEREOF—APNS: 1054-011-01, 1054-011-02, 1054-011-04; 1054-021-01, 1054-021-02; 1054-271-01, 1054-271-02, 1054-271-03, 1054-281-01, 1054-281-02, AND 1054-281-03.

WHEREAS, Euclid Land Venture, LLC., ("Applicant") has filed an Application for the approval of a Development Agreement, File No. PDA19-001, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 85.6 acres of land generally located at the northeast corner of Merrill Avenue and Euclid Avenue, within the Industrial and Business Park land use districts of the Ontario Ranch Business Park Specific Plan, and is presently vacant; and

WHEREAS, on September 15, 2020, the City Council adopted Ordinance No. 3168, approving the Environmental Impact Report (SCH#2019050018) and Ontario Ranch Business Park Specific Plan ("Specific Plan"), which addressed the development of approximately 1,905,027 square feet of Industrial and Business Park uses; and

WHEREAS, a Tentative Parcel Map 20016 (File No. PMTT18-011) to subdivide approximately 85.6 acres of land into eight (8) parcels to facilitate a Development Plan (File No. PDEV18-036) to construct three (3) Industrial buildings totaling 1,447,123 square feet, and five (5) Business Park buildings totaling 105,624 square feet; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act — Public Resources Code Section 21000 et seq. — (hereinafter referred to as "CEQA") and an initial study has been prepared to determine possible environmental impacts; and

WHEREAS, the environmental impacts of this project were previously reviewed in conjunction with the Ontario Ranch Business Park Specific Plan (File No. PSP18-002), for which an Environmental Impact Report — State Clearinghouse No. 2019050018 —

(hereinafter referred to as "Certified EIR) was adopted by the City Council on September 15, 2020, and this Application introduces no new significant environmental impacts; and

WHEREAS, the City's "Local Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and make recommendations to the City Council on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (hereinafter referred to as "ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, the Project site is also located within the Airport Influence area of Chino Airport and is consistent with policies and criteria set forth within the 2011 California Airport Land Use Planning Handbook published by the California Department of Transportation, Division of Aeronautics; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on October 27, 2020, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: Environmental Determination and Findings. As the recommending authority for the Project, the Planning Commission has reviewed and considered the information contained in the previous Certified EIR and supporting documentation. Based upon the facts and information contained in the previous Certified EIR and supporting documentation, the Planning Commission finds as follows:

(1) The environmental impacts of this project were previously reviewed in conjunction with Ontario Ranch Business Park Specific Plan (File No. PSP18-002), for which a Certified EIR was adopted by the City Council on September 15, 2020.

(2) The previous Certified EIR contains a complete and accurate reporting of the environmental impacts associated with the Project; and

(3) The previous Certified EIR was completed in compliance with CEQA and the Guidelines promulgated thereunder; and

(4) The previous Certified EIR reflects the independent judgment of the Planning Commission; and

(5) The proposed project will introduce no new significant environmental impacts beyond those previously analyzed in the previous Certified EIR, and all mitigation measures previously adopted with the Certified EIR, are incorporated herein by this reference.

SECTION 2: Subsequent or Supplemental Environmental Review Not Required. Based on the information presented to the Planning Commission, and the specific findings set forth in Section 1, above, the Planning Commission finds that the preparation of a subsequent or supplemental Certified EIR is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3: *Housing Element Compliance.* Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the recommending authority for the Project, the Planning Commission finds that based on the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

SECTION 4: *Ontario International Airport Land Use Compatibility Plan (“ALUCP”) Compliance.* The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the ALUCP, establishing the Airport Influence Area for Ontario International Airport (hereinafter referred to as “ONT”), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the recommending authority for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ALUCP compatibility factors, including [1] Safety Criteria (ALUCP Table 2-2) and Safety Zones (ALUCP Map 2-2), [2] Noise Criteria (ALUCP Table 2-3) and Noise Impact Zones (ALUCP Map 2-3), [3] Airspace protection Zones (ALUCP

Map 2-4), and [4] Overflight Notification Zones (ALUCP Map 2-5). As a result, the PLANNING COMMISSION, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ALUCP. The project site is also located within the Airport Influence area of Chino Airport and is consistent with policies and criteria set forth within the 2011 California Airport Land Use Planning Handbook published by the California Department of Transportation, Division of Aeronautics

SECTION 5: *Concluding Facts and Reasons.* Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing, and upon the specific findings set forth in Section 1 through 4, above, the Planning Commission hereby concludes as follows:

a. The Development Agreement applies to approximately 85.6 acres of land located at the northeast corner of Merrill Avenue and Euclid Avenue, within the Industrial and Business Park land use districts of the Ontario Ranch Business Park Specific Plan; and

b. The Development Agreement establishes parameters for the development of the proposed Industrial and Business Park land use districts of the Ontario Ranch Business Park Specific Plan. The Development Agreement also grants the Owner, the right to develop, the ability to quantify the fees; and establish the terms and conditions that apply to those projects. These terms and conditions are consistent with The Ontario Plan Policy Plan (General Plan), design guidelines and development standards for the Ontario Ranch Business Park Specific Plan; and

c. The Agreement grants the Owner a vested right to develop Tentative Parcel Map 20016 (File No. PMTT18-011) as long as the Owner, complies with the terms and conditions of the Specific Plan and EIR. Tentative Parcel Map 20016 is located at the northeast corner of Merrill Avenue and Euclid Avenue, and proposes to subdivide approximately 85.6 acres of land into eight (8) parcels to facilitate a Development Plan (File No. PDEV18-036) to construct three (3) Industrial buildings totaling 1,447,123 square feet, and five (5) Business Park buildings totaling 105,624 square feet; and

d. The Development Agreement has been prepared in conformance with the goals and policies of The Ontario Plan Policy Plan (General Plan); and

e. The Development Agreement does not conflict with the Land Use Policies of The Ontario Plan Policy Plan (General Plan) and will provide for development, within the district, in a manner consistent with the Policy Plan and with related development; and

f. This Development Agreement will promote the goals and objectives of the Land Use Element of the Policy Plan; and

g. This Development Agreement will not be materially injurious or detrimental to the adjacent properties and will have a significant impact on the environment or the surrounding properties. The environmental impacts of this project were previously reviewed in conjunction with the Ontario Ranch Business Park Specific Plan, for which an EIR (SCH#2019050018) was adopted by the City Council on September 15, 2020. This Application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of project approval and are incorporated herein by this reference.

SECTION 6: Planning Commission Action. Based upon the findings and conclusions set forth in Sections 1 through 5, above, the Planning Commission hereby RECOMMENDS THE CITY COUNCIL APPROVE the herein described Application, subject to the Development Agreement (File No. PDA19-001) attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 7: Indemnification. The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 8: Custodian of Records. The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 9: Certification to Adoption. The Secretary shall certify to the adoption of the Resolution.

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a regular meeting thereof held on the 27th day of October 2020, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

_____ , 2020

San Bernardino County, California

DEVELOPMENT AGREEMENT NO. PDA19-001

This Development Agreement (hereinafter "Agreement") is dated for reference purposes only as of the ____ day of _____, 2020 by and among the City of Ontario, a California municipal corporation (hereinafter "CITY"), and Euclid Land Venture, LLC, a Delaware limited liability company (hereinafter "OWNER").

RECITALS

WHEREAS, CITY is authorized to enter into binding development agreements with persons having legal or equitable interests in real property for the development of such property, pursuant to Section 65864, et seq. of the Government Code and Section 4.01.015 of the Ontario Development Code; and

WHEREAS, OWNER has requested CITY to enter into a development agreement and proceedings have been taken in accordance with the rules and regulations of CITY; and

WHEREAS, by electing to enter into this Agreement, CITY shall bind future City Councils of CITY by the obligations specified herein and limit the future exercise of certain governmental and proprietary powers of CITY; and

WHEREAS, the terms and conditions of this Agreement have undergone extensive review by CITY and the City Council and have been found to be fair, just and reasonable; and

WHEREAS, the best interests of the citizens of the CITY and the public health, safety and welfare will be served by entering into this Agreement; and

WHEREAS, all of the procedures of the California Environmental Quality Act have been met with respect to the Project and the Agreement in that Ontario Ranch Business Park Specific Plan Environmental Impact Report (State Clearinghouse No. 2019050018 (the "FEIR")). The City Council found and determined that the FEIR was prepared in accordance with the requirements of the California Environmental Quality Act and adequately describes the impacts of the Project described in the FEIR, which included consideration of this Agreement; and

WHEREAS, this Agreement and the Project are consistent with the CITY's Comprehensive General Plan and the Ontario Ranch Business Park Specific Plan; and

WHEREAS, all actions taken and approvals given by CITY have been duly taken or approved in accordance with all applicable legal requirements for notice, public hearings, findings, votes, and other procedural matters; and

WHEREAS, development of the Project Site ("Property") in accordance with this Agreement will provide substantial benefits to CITY and will further important policies and goals of CITY; and

WHEREAS, this Agreement will eliminate uncertainty in planning and provide for the orderly development of the Property, ensure progressive installation of necessary improvements, provide for public services appropriate to the development of the Project,

and generally serve the purposes for which development agreements under Sections 65864 et seq. of the Government Code are intended; and

WHEREAS, OWNER has incurred and will in the future incur substantial costs in order to assure development of the Property in accordance with this Agreement; and

WHEREAS, OWNER has incurred and will in the future incur substantial costs in excess of the generally applicable requirements in order to assure vesting of legal rights to develop the Property in accordance with this Agreement.

COVENANTS

NOW, THEREFORE, in consideration of the above recitals and of the mutual covenants hereinafter contained and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

1. DEFINITIONS AND EXHIBITS.

1.1 **Definitions.** The following terms when used in this Agreement shall be defined as follows:

1.1.1 "Agreement" means this Development Agreement.

1.1.2 "CITY" means the City of Ontario, California, a California municipal corporation.

1.1.3 "Development" means the improvement of the Property for the purposes of completing the structures, improvements and facilities comprising the Project including, but not limited to: grading; the construction of public infrastructure and public facilities related to the Project whether located within or outside the Property; the construction of buildings and structures; and the installation of landscaping. "Development" does not include the maintenance, repair, reconstruction or redevelopment of any building, structure, improvement or facility after the construction and completion thereof.

1.1.4 "Development Approvals" means all permits and other entitlements for use subject to approval or issuance by CITY in connection with development of the Property including, but not limited to:

- (a) specific plans and specific plan amendments;
- (b) tentative and final subdivision and parcel maps;
- (c) development plan review.

1.1.5 "Development Exaction" means any requirement of CITY in connection with or pursuant to any Land Use Regulation or Development Approval for the dedication of land, the construction of improvements or public facilities, or the payment of fees in order to lessen, offset, mitigate or compensate for the impacts of development on the environment or other public interests.

1.1.6 "Development Impact Fee" means a monetary exaction, other than a tax or special assessment, whether characterized as a fee or a tax and whether established for a broad class of projects by legislation of general applicability or imposed on a specific

project on an ad hoc basis, that is charged by a local agency to the applicant in connection with approval of a development project for the purpose of defraying all or a portion of the cost of public facilities related to the development project, and, for purposes of this Agreement only, includes fees collected under development agreements adopted pursuant to Article 2.5 of the Government Code (commencing with Section 65864) of Chapter 4. For purposes of this Agreement only, "Development Impact Fee" shall not include processing fees and charges imposed by CITY to cover the estimated actual costs to CITY of processing applications for Development Approvals or for monitoring compliance with any Development Approvals granted or issued, including, without limitation, fees for zoning variances; zoning changes; use permits; building inspections; building permits; filing and processing applications and petitions filed with the local agency formation commission or conducting preliminary proceedings or proceedings under the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000, Division 3 (commencing with Section 56000) of Title 5 of the Government Code; the processing of maps under the provisions of the Subdivision Map Act, Division 2 (commencing with Section 66410) of Title 7 of the Government Code; or planning services under the authority of Chapter 3 (commencing with Section 65100) of Division 1 of Title 7 of the Government Code, fees and charges as described in Sections 51287, 56383, 57004, 65104, 65456, 65863.7, 65909.5, 66013, 66014, and 66451.2 of the Government Code, Sections 17951, 19132.3, and 19852 of the Health and Safety Code, Section 41901 of the Public Resources Code, and Section 21671.5 of the Public Utilities Code, as such codes may be amended or superseded, including by amendment or replacement.

1.1.7 "Development Plan" means the Existing Development Approvals and the Existing Land Use Regulations applicable to development of the Property.

1.1.8 "Effective Date" means the date that the ordinance approving this Agreement goes into effect.

1.1.9 "Existing Development Approvals" means all Development Approvals approved or issued on or prior to the Effective Date. Existing Development Approvals includes the Approvals incorporated herein as Exhibit "C" and all other Approvals which are a matter of public record on the Effective Date.

1.1.10 "Existing Land Use Regulations" means all Land Use Regulations in effect on the date of the first reading of the ordinance adopting and approving this Agreement. Existing Land Use Regulations includes the Regulations incorporated herein as Exhibit "D" and all other Land Use Regulations that are in effect and a matter of public record on such date.

1.1.11 "General Plan" means The Ontario Plan adopted on January 26, 2010, as amended up to the date of the first reading of the ordinance adopting and approving this Agreement.

1.1.12 "Improvement" or "Improvements" means those public improvements required to support the development of the Project as described in the Parcel Map conditions for Parcel Map No. 20016 ("Parcel Map") as further described in Exhibit "E" and depicted in Exhibit "F" (the "Infrastructure Improvements Exhibits").

1.1.13 "Land Use Regulations" means all ordinances, resolutions, codes, rules, regulations and official policies of CITY governing the development and use of land, including, without limitation, the permitted use of land, the density or intensity of use,

subdivision requirements, timing and phasing of development, the maximum height and size of buildings, the provisions for reservation or dedication of land for public purposes, and the design, improvement and construction standards and specifications applicable to the development of the Property. "Land Use Regulations" does not include any CITY ordinance, resolution, code, rule, regulation or official policy, governing:

- (a) the conduct of businesses, professions, and occupations;
- (b) taxes and assessments;
- (c) the control and abatement of nuisances;
- (d) the granting of encroachment permits and the conveyance of similar rights and interests that provide for the use of or the entry upon public property;
- (e) the exercise of the power of eminent domain.

1.1.14 "Mortgagee" means a mortgagee of a mortgage, a beneficiary under a deed of trust or any other security-device lender, and their successors and assigns.

1.1.15 "OWNER" means the persons and entities listed as owner on page 1 of this Agreement and their permitted successors in interest to all or any part of the Property.

1.1.16 "Owner Affiliate" shall mean, (i) any general or limited partnership in which OWNER is the managing general partner, or (ii) any limited liability company in which OWNER is the managing member.

1.1.17 "Project" means the development of the Property contemplated by the Development Plan, as such Plan may be further defined, enhanced or modified pursuant to the provisions of this Agreement.

1.1.18 "Property" means the real property described on Exhibit "A" and shown on Exhibit "B" to this Agreement.

1.1.19 "Reservations of Authority" means the rights and authority excepted from the assurances and rights provided to OWNER under this Agreement and reserved to CITY under Section 3.4 of this Agreement.

1.1.20 "Specific Plan" means that certain specific plan adopted by the City Council, and entitled, "Ontario Ranch Business Park Specific Plan."

1.1.21 "Subsequent Development Approvals" means all discretionary Development Approvals required subsequent to the Effective Date in connection with development of the Property.

1.1.22 "Subsequent Land Use Regulations" means any discretionary Land Use Regulations adopted and effective after the Effective Date of this Agreement.

1.2 Exhibits. The following documents are attached to, and by this reference made a part of, this Agreement:

Exhibit "A" — Legal Description of the Property.

Exhibit "B" — Map showing Property and its location.

Exhibit "C" — Existing Development Approvals.

Exhibit "D" — Existing Land Use Regulations.

Exhibit "E" — Description of Required Infrastructure Improvements

Exhibit "F" — Depiction of Infrastructure Improvements Exhibits

Exhibit "G" – Form of Certificate of DIF Credit to be issued by CITY

2. GENERAL PROVISIONS.

2.1 Binding Effect of Agreement. The Property is hereby made subject to this Agreement. Development of the Property is hereby authorized and shall be carried out only in accordance with the terms of this Agreement.

2.2 Ownership of Property. OWNER represents and covenants that it is the owner of the fee simple title to the Property or a portion thereof, or has the right to acquire fee simple title to the Property or a portion thereof from the current owner(s) thereof. To the extent OWNER does not own fee simple title to the Property, OWNER shall obtain written consent from the current fee owner of the Property agreeing to the terms of this Agreement and the recordation thereof.

2.3 Term. The term of this Agreement shall commence on the Effective Date and shall continue for an initial term of ten (10) years thereafter unless this term is modified or extended pursuant to the provisions of this Agreement. The term of this Agreement may be extended for an additional five (5) years following expiration of the initial ten (10) year term, provided the following have occurred:

- (a) OWNER provides at least 180 days written notice to CITY prior to expiration of the initial term; and
- (b) OWNER is not then in uncured default of this Agreement.

2.4 Assignment.

2.4.1 Right to Assign. OWNER shall have the right to sell, transfer or assign the Property in whole or in part (provided that no such partial transfer shall violate the Subdivision Map Act, Government Code Section 66410, et seq.), to any person, partnership, limited liability company, joint venture, firm or corporation at any time during the term of this Agreement; provided, however, that any such sale, transfer or assignment shall include the assignment and assumption of the rights, duties and obligations arising under or from this Agreement with respect to the portion of the Property sold and be made in strict compliance with the following:

(a) Except as expressly provided for herein, no sale, transfer or assignment of any right or interest under this Agreement shall be made unless made together with the sale, transfer or assignment of all or a part of the Property.

(b) Concurrent with any such sale, transfer or assignment, or within fifteen (15) business days thereafter, OWNER shall notify CITY's City Manager, in writing, of such

sale, transfer or assignment and shall provide CITY with: (1) an executed agreement, in a form reasonably acceptable to CITY, by the purchaser, transferee or assignee and providing therein that the purchaser, transferee or assignee expressly and unconditionally assumes all the duties and obligations of OWNER under this Agreement with respect to the portion of the Property so sold, transferred or assigned.

(c) Any sale, transfer or assignment not made in strict compliance with the foregoing conditions shall constitute a default by OWNER under this Agreement. Notwithstanding the failure of any purchaser, transferee or assignee to execute the agreement required by Paragraph (b) of this Subsection 2.4.1, the burdens of this Agreement shall be binding upon such purchaser, transferee or assignee, but the benefits of this Agreement shall not inure to such purchaser, transferee or assignee until and unless such agreement is executed. The City Manager shall have the authority to review, consider and either approve, conditionally approve, or deny any proposed sale, transfer or assignment that is not made in compliance with this section 2.4.

(d) Notwithstanding the foregoing, OWNER shall have the right to assign this Agreement to an Owner Affiliate subject to the notice requirements to CITY as described in Paragraph (b) of this Section 2.4.1, above.

2.4.2 Release of Transferring Owner. Notwithstanding any sale, transfer or assignment, a transferring OWNER shall continue to be obligated under this Agreement unless such transferring owner is given a release in writing by CITY, which release shall be provided by CITY upon the full satisfaction by such transferring owner of the following conditions:

(a) OWNER no longer has a legal or equitable interest in all or any part of the portion of the Property sold, transferred or assigned.

(b) OWNER is not then in default under this Agreement.

(c) OWNER has provided CITY with the notice and executed an agreement as required under Paragraph (b) of Subsection 2.4.1 above.

(d) The purchaser, transferee or assignee provides CITY with security equivalent to any security previously provided by OWNER (if any) to secure performance of its obligations hereunder which are to be performed upon portion of the Property sold, transferred or assigned.

2.4.3 Effect of Assignment and Release of Obligations. In the event of a sale, transfer or assignment pursuant to the provisions of Section 2.4.2 above:

(a) The assignee shall be liable for the performance of all obligations of OWNER with respect to transferred property, but shall have no obligations with respect to the portions of the Property, if any, not transferred (the "Retained Property").

(b) The owner of the Retained Property shall be liable for the performance of all obligations of OWNER with respect to Retained Property, but shall have no further obligations with respect to the transferred property.

(c) The assignee's exercise, use and enjoyment of the Property or portion thereof shall be subject to the terms of this Agreement to the same extent as if the assignee were the OWNER.

2.4.4 Subsequent Assignment. Any subsequent sale, transfer or assignment after an initial sale, transfer or assignment shall be made only in accordance with and subject to the terms and conditions of this Section 2.4.

2.4.5 Termination of Agreement with Respect to Individual Lots Upon Sale to Public and Completion of Construction. The provisions of Subsection 2.4.1 shall not apply to the sale or lease (for a period longer than one (1) year) of any parcel which has been finally subdivided and is individually (and not in "bulk") sold or leased to a member of the public or other ultimate user of the parcel. Notwithstanding any other provisions of this Agreement, this Agreement shall terminate with respect to any lot and such lot shall be released and no longer be subject to this Agreement without the execution or recordation of any further document upon satisfaction of both of the following conditions:

(a) The lot has been finally subdivided and individually (and not in "bulk") sold or leased (for a period longer than one (1) year) to a member of the public or other ultimate user; and,

(b) A certificate of occupancy has been issued for a building on the parcel, and the fees set forth under Section 4 of this Agreement have been paid.

2.4.6 Partial Assignment and Assumption. CITY and OWNER agree OWNER may partially assign its obligations and rights under this Agreement, and all amendments hereto, to a purchaser, transferee or assignee of a lot, which has been subdivided subject to provisions of a partial assignment and assumption agreement in a form approved by CITY. Any such complete and executed partial assignment and assumption of this Agreement shall be submitted to CITY for approval pursuant to Section 2.4.1 of this Agreement. Within thirty (30) days following such complete submittal, CITY shall review, and if the above conditions are satisfied, may approve the partial assignment and release and notify the purchase, transferee or assignee in writing thereof. No such release approved pursuant to this Subsection 2.4.6 shall cause, or otherwise affect, a release of OWNER from the duties and obligations under this Agreement that are retained by OWNER and excluded from the transfer or assignment.

2.5 Amendment or Cancellation of Agreement. This Agreement may be amended or cancelled in whole or in part only in the manner provided for in Government Code Section 65868.1. Any amendment of this Agreement, which amendment has been requested by OWNER, shall be considered by the CITY only upon the payment of the applicable processing charge. This provision shall not limit any remedy of CITY or OWNER as provided by this Agreement. Either party or successor in interest, may propose an amendment to or cancellation, in whole or in part, of this Agreement. Any amendment or cancellation shall be by mutual consent of the parties or their successors in interest except as provided otherwise in this Agreement or in Government Code Section 65865.1. For purposes of this section, the term "successor in interest" shall mean any person having a legal or equitable interest in the whole of the Property, or any portion thereof as to which such person wishes to amend or cancel this Agreement. The procedure for proposing and adopting an amendment to, or cancellation of, in whole or in part, this Agreement shall be the same as the procedure for adopting and entering into this Agreement in the

first instance. Notwithstanding the foregoing sentence, if the CITY initiates the proposed amendment to, or cancellation of, in whole or in part, this Agreement, CITY shall first give notice to the OWNER of its intention to initiate such proceedings at least sixty (60) days in advance of the giving the public notice of intention to consider the amendment or cancellation.

2.6 Minor Modification. Upon the written application of OWNER, minor modifications and changes to the Development Plan including modifications to building design or footprint (not affecting minimum setbacks), parking layout and design, and landscape area design may be approved by the Director of the Planning Department without the need to amend this Development Agreement. Other changes in the Development Plan shall be processed pursuant to the City Zoning Ordinance. It is also contemplated by City and OWNER that OWNER may, from time to time, seek amendments to one or more of the Development Approvals. Any such amendments are contemplated by City and OWNER as being within the scope of this Agreement as long as they are consistent with the Land Use Regulations and shall, upon approval by City, continue to constitute the Development Approvals as referenced herein. The parties agree that any such modifications or amendments shall not constitute an amendment to this Agreement nor require an amendment to this Agreement.

2.7 Termination. This Agreement shall be deemed terminated and of no further effect upon the occurrence of any of the following events:

- (a) Expiration of the stated term of this Agreement as set forth in Section 2.3.
- (b) Entry of a final judgment setting aside, voiding or annulling the adoption of the ordinance approving this Agreement.
- (c) The adoption of a referendum measure overriding or repealing the ordinance approving this Agreement.
- (d) Completion of the Project in accordance with the terms of this Agreement including issuance of all required occupancy permits and acceptance by CITY or applicable public agency of all required dedications.

Termination of this Agreement shall not constitute termination of any other land use entitlements approved for the Property. Upon the termination of this Agreement, no party shall have any further right or obligation hereunder except with respect to any obligation to have been performed prior to such termination or with respect to any default in the performance of the provisions of this Agreement which has occurred prior to such termination or with respect to any obligations which are specifically set forth as surviving this Agreement. Upon such termination, any public facilities and services mitigation fees paid pursuant to Section 4.2 of this Agreement by OWNER to CITY on which construction has not yet begun shall be refunded to OWNER by CITY within ten (10) business days.

2.8 Notices.

(a) As used in this Agreement, "notice" includes, but is not limited to, the communication of notice, request, demand, approval, statement, report, acceptance, consent, waiver, appointment or other communication required or permitted hereunder.

(b) All notices shall be in writing and shall be considered given either: (i) when delivered in person, including, without limitation, by courier, to the recipient named below; or (ii) on the date of delivery shown on the return receipt, after deposit in the United States mail in a sealed envelope as either registered or certified mail with return receipt requested, and postage and postal charges prepaid, and addressed to the recipient named below. All notices shall be addressed as follows:

If to CITY:

Scott Ochoa, City Manager
City of Ontario
303 East "B" Street
Ontario, CA 91764

with a copy to:

Ruben Duran, City Attorney
City of Ontario
303 East "B" Street
Ontario, CA 91764

If to OWNER:

Euclid Land Venture, LLC
c/o Real Estate Development Associates, LLC
4450 MacArthur Boulevard, Suite 100
Newport Beach, CA 92660
Attn: Jason Krotts
Email: jkrotts@redallc.com
Phone: (949) 216-7300

With a copy to:

Allen Matkins Leck Gamble Mallory & Natsis LLP
1900 Main Street, Fifth Floor
Irvine, California 92614
Attn: Matthew R. Fogt, Esq.
Email: mfogt@allenmatkins.com
Phone: 949-851-5453

Either party may, by notice given at any time, require subsequent notices to be given to another person or entity, whether a party or an officer or representative of a party, or to a different address, or both. Notices given before actual receipt of notice of change shall not be invalidated by the change.

3. DEVELOPMENT OF THE PROPERTY.

3.1 Rights to Develop. Subject to the terms of this Agreement including the Reservations of Authority in Section 3.4, OWNER shall have a vested right to develop the Property in accordance with, and to the extent of, the Development Plan. The Project shall remain subject to all Subsequent Development Approvals required to complete the Project as contemplated by the Development Plan. Except as otherwise provided in this Agreement, the permitted uses of the Property, the density and intensity of use, the

maximum height and size of proposed buildings, and provisions for reservation and dedication of land for public purposes shall be those set forth in the Development Plan.

3.2 Effect of Agreement on Land Use Regulations. Except as otherwise provided under the terms of this Agreement including the Reservations of Authority in Section 3.4, the rules, regulations and official policies governing permitted uses of the Property, the density and intensity of use of the Property, the maximum height and size of proposed buildings, and the design, improvement and construction standards and specifications applicable to development of the Property shall be the Existing Land Use Regulations. In connection with any Subsequent Development Approval, CITY shall exercise discretion in accordance with the same manner as it exercises its discretion under its police powers, including the Reservations of Authority set forth herein; provided however, that such discretion shall not prevent development of the Property for the uses and to the density or intensity of development set forth in this Agreement.

3.3 Timing of Development. The parties acknowledge that OWNER cannot at this time predict when or the rate at which phases of the Property will be developed. Such decisions depend upon numerous factors which are not within the control of OWNER, such as market orientation and demand, interest rates, absorption, completion and other similar factors. Since the California Supreme Court held in Pardee Construction Co. v. City of Camarillo (1984) 37 Cal. 3d 465, that the failure of the parties therein to provide for the timing of development resulted in a later adopted initiative restricting the timing of development to prevail over such parties' agreement, it is the parties' intent to cure that deficiency by acknowledging and providing that OWNER shall have the right to develop the Property in such order and at such rate and at such times as OWNER deems appropriate within the exercise of its subjective business judgment.

3.3.1 Infrastructure Improvement Exhibits. Attached hereto as Exhibits "E" and "F" are a description and a depiction, respectfully, of the Infrastructure Improvements needed for the development of the Property (the "Infrastructure Improvement Exhibits").

3.4 Reservations of Authority.

3.4.1 Limitations, Reservations and Exceptions. Notwithstanding any other provision of this Agreement, the CITY shall not be prevented from applying new rules, regulations and policies upon the OWNER, nor shall a development agreement prevent the CITY from denying or conditionally approving any subsequent development project application on the basis of such new rules, regulations and policies where the new rules, regulations and policies consist of the following:

(a) Processing fees by CITY to cover costs of processing applications for development approvals or for monitoring compliance with any development approvals;

(b) Procedural regulations relating to hearing bodies, petitions, applications, notices, findings, records and any other matter of procedure;

(c) Regulations, policies and rules governing engineering and construction standards and specifications applicable to public and private improvements, including all uniform codes adopted by the CITY and any local amendments to those codes adopted by the CITY; provided however that, OWNER shall have a vested right to develop the Property in accordance with, and to the extent of, the standards and specifications that

are expressly identified in the Specific Plan and the building codes in effect as of the Effective Date;

(d) Regulations that may conflict with this Agreement and the Development Plan but that are reasonably necessary to protect the occupants of the Project and/or of the immediate community from a condition perilous to their health or safety;

(e) Regulations that do not conflict with those rules, regulations and policies set forth in this Agreement or the Development Plan and which do not impose additional obligations, costs, and expenses on Owner or the Project;

(f) Regulations that may conflict with this Agreement but to which the OWNER consents.

3.4.2 Subsequent Development Approvals. This Agreement shall not prevent CITY, in acting on Subsequent Development Approvals, from applying Subsequent Land Use Regulations that do not conflict with the Development Plan and/or the Existing Development Approvals, nor shall this Agreement prevent CITY from denying or conditionally approving any Subsequent Development Approval on the basis of the Existing Land Use Regulations or any Subsequent Land Use Regulation not in conflict with the Development Plan and/or the Existing Development Approvals.

3.4.3 Modification or Suspension by State or Federal Law. In the event that State or Federal laws or regulations, enacted after the Effective Date of this Agreement, prevent or preclude compliance with one or more of the provisions of this Agreement, such provisions of this Agreement shall be modified or suspended as may be necessary to comply with such State or Federal laws or regulations, provided, however, that this Agreement shall remain in full force and effect to the extent it is not inconsistent with such laws or regulations and to the extent such laws or regulations do not render such remaining provisions impractical to enforce. In the event OWNER alleges that such State or Federal laws or regulations preclude or prevent compliance with one or more provisions of this Agreement, and the CITY does not agree, the OWNER may, at its sole cost and expense, seek declaratory relief (or other similar non-monetary remedies); provided however, that nothing contained in this Section 3.4.3 shall impose on CITY any monetary liability for contesting such declaratory relief (or other similar non-monetary relief).

3.4.4 Intent. The parties acknowledge and agree that CITY is restricted in its authority to limit its police power by contract and that the foregoing limitations, reservations and exceptions are intended to reserve to CITY all of its police power which cannot be so limited. This Agreement shall be construed, contrary to its stated terms if necessary, to reserve to CITY all such power and authority which cannot be restricted by contract.

3.5 Public Works; Utilities. If OWNER is required by this Agreement or a condition of Project approval to construct any public works facilities which will be dedicated to CITY or any other public agency upon completion, and if required by applicable laws to do so, OWNER shall perform such work in the same manner and subject to the same requirements as would be applicable to CITY or such other public agency should it have undertaken such construction. As a condition of development approval, OWNER shall connect the Project to all utilities necessary to provide adequate water, recycled water, sewer, gas, electric, and other utility services necessary for the Project. As a further

condition of development approval, OWNER shall to the extent possible contract with the CITY for CITY-owned or operated utilities for this purpose, for such price and on such terms as may be available to similarly situated customers in the CITY.

3.5.1 OWNER agrees that development of the Project shall require the construction of storm drain Improvements from the Property as described in Exhibit E and depicted in Exhibit F. OWNER shall be responsible for the construction of the storm drain Improvements, as described in Exhibit E and depicted in Exhibit F. OWNER and CITY agree that CITY may issue grading, building permits and other required permits for OWNER to initiate construction of structures for the Property according to plans approved by CITY, and OWNER agrees that OWNER shall not request and CITY shall not issue a final occupancy permit for any buildings prior to completion of the storm drain Improvements described in Exhibit E and depicted in Exhibit F. OWNER may request, and CITY may issue in its reasonable discretion, temporary certificates of occupancy on a building-by-building basis prior to completion of the storm drain improvements.

3.5.2 OWNER agrees that development of the Project shall require the construction of street Improvements as described in Exhibit E and depicted in Exhibit F. OWNER and CITY agree that CITY may issue grading, building permits and other required permits for OWNER to initiate construction of structures for the Property according to plans approved by CITY, and OWNER agrees that OWNER shall not request, and CITY shall not issue a final occupancy permit for any buildings on the Property prior to Substantial Completion of the street Improvements as described in Exhibit E and depicted in Exhibit F. For purposes of the foregoing, street Improvements shall be deemed "Substantially Complete" even if the final lift of pavement has not been completed (i.e., Owner may install the final lift after completion of all other construction). OWNER may request, and CITY may issue in its reasonable discretion, temporary certificates of occupancy on a building-by-building basis prior to completion and subject to final acceptance by CITY of the street Improvements. OWNER agrees that the street improvements shall be completed and subject to final acceptance by CITY prior to the release of any security for the construction of the street improvements. OWNER and CITY agree that a portion of the street Improvements described in Exhibit E and depicted in Exhibit F may be constructed by others, or pursuant to a cooperative agreement with others. If such street Improvements are constructed by others, or in cooperation with others, and are completed and accepted by CITY prior to OWNER's request to CITY of the required grading, building or other required permits for OWNER to initiate construction of structures for the Property, then OWNER shall not be required to construct those street Improvements constructed and completed by others and accepted by CITY.

3.5.3 OWNER agrees that development of the Property shall require the extension of permanent master planned potable water utility Improvements to serve the Property as described in Exhibit E and depicted in Exhibit F. OWNER and CITY agree that CITY may issue grading, building permits and other required permits for OWNER to initiate construction of structures for the Property according to plans approved by CITY and OWNER agrees that OWNER shall not request and CITY shall not issue a final occupancy permit for any buildings on the Property until the completion of the potable water improvements, the Phase 2A Water Improvements, and the Interim Chino Avenue Loop described in Exhibit E, and depicted in Exhibit F. OWNER may request, and CITY may issue in its reasonable discretion, temporary certificates of occupancy on a building-by-building basis prior to completion of the Phase 2A Water Improvements, and the Interim Chino Avenue Loop, if there is available permanent potable water service from a

minimum of one (1) point of connection and sufficient redundant water is available for fire protection purposes for any buildings while under construction. If sufficient redundant water is not available for fire protection purposes for any building, OWNER shall provide an alternative solution for redundant fire protection purposes and such alternative solution shall be approved at the discretion of the CITY. OWNER and CITY agree that a portion of the water improvements described in Exhibit E and depicted in Exhibit F may be constructed by others, or pursuant to a cooperative agreement with others. If such water improvements are constructed by others, or in cooperation with others, and are completed and accepted by CITY prior to OWNER's request to CITY of the required grading, building or other required permits for OWNER to initiate construction of structures for the Property, then OWNER shall not be required to construct those water improvements constructed and completed by others and accepted by CITY.

3.5.4 OWNER agrees that development of the Property shall require the construction of permanent master planned sewer Improvements to serve the Property as described in Exhibit E and depicted in Exhibit F. OWNER and CITY agree that CITY may issue grading, building permits and other required permits for OWNER to initiate construction of structures for the Property according to plans approved by CITY, and OWNER agrees that OWNER shall not request and CITY shall not issue a final occupancy permit for any buildings prior to completion of the sewer improvements described in Exhibit E and depicted in Exhibit F. OWNER may request, and CITY may issue in its reasonable discretion, temporary certificates of occupancy on a building-by-building basis prior to the completion of the sewer improvements described in Exhibit E and depicted in Exhibit F. OWNER and CITY agree that a portion of the sewer Improvements described in Exhibit E and depicted in Exhibit F may be constructed by others, or pursuant to a cooperative agreement with others. If such sewer Improvements are constructed by others, or in cooperation with others, and are completed and accepted by CITY prior to OWNER's request to CITY of the required grading, building or other required permits for OWNER to initiate construction of structures for the Property, then OWNER shall not be required to construct those sewer Improvements constructed and completed by others and accepted by CITY.

3.5.5 OWNER agrees that development of the Property shall require the extension of permanent master planned recycled water utility improvements to serve the Property, as described in Exhibit E and depicted in Exhibit F. OWNER and CITY agree that the City may issue grading, and other required sitework permits for OWNER to initiate grading of the Property according to plans approved by CITY upon completion of sufficient recycled water improvements to serve the Property from at least one point of connection. OWNER agrees that OWNER shall not request, and CITY shall not issue a final occupancy permit for any buildings on the Property until the completion of the recycled water improvements described in Exhibit E and depicted in Exhibit F. CITY agrees that OWNER may request that CITY issue temporary occupancy on a building-by-building basis prior to completion of recycled water improvements if there is available a permanent recycled water service connection and sufficient recycled water is available. OWNER and CITY agree that OWNER may, in lieu of utilizing recycled water during grading and construction, utilize water from existing agricultural wells on the Property subject to the terms of a separate Well Use Agreement between CITY and OWNER. OWNER and CITY agree that all, or a portion of, the permanent master planned recycled water utility Improvements described in Exhibit E and depicted in Exhibit F may be constructed by others. If such recycled water utility Improvements are constructed by others and completed and accepted by CITY prior to OWNER'S request to CITY of the required

grading, building, or other required permits for OWNER to initiate construction of structures for the Property, then OWNER shall not be required to construct those permanent master planned recycled water utility Improvements.

3.5.6 OWNER agrees that development of the Property shall require the extension of permanent master planned fiber optic communications infrastructure to serve the Property, as described in the attached Exhibit E and depicted in Exhibit F. OWNER and CITY agree that CITY may issue grading, building permits and other required permits for OWNER to initiate construction of structures for the Property according to plans approved by CITY and OWNER agrees that OWNER shall not request and CITY shall not issue a final occupancy permit for any buildings prior to completion of the fiber optic communications infrastructure, as described in Exhibit E and depicted in Exhibit F. OWNER may request, and CITY may issue in its reasonable discretion, temporary certificates of occupancy on a building-by-building basis prior to the completion of the fiber optic communications infrastructure, as described in Exhibit E and depicted in Exhibit F. OWNER and CITY agree that all, or a portion of, the permanent master planned fiber optic communications infrastructure described in Exhibit E and depicted in Exhibit F may be constructed by others. If such fiber optic communications infrastructure is constructed by others and completed and accepted by CITY prior to OWNER'S request to CITY of the required grading, building, or other required permits for OWNER to initiate construction of structures for the Property, then OWNER shall not be required to construct such permanent master planned fiber optic communications infrastructure.

3.5.7 For the improvements described in Sections 1(h), 2(a) and 2(b) of the attached Exhibit E for which OWNER pays a fee in lieu of actual construction by OWNER, such obligation shall be deemed satisfied once OWNER has paid such fee in full and the CITY shall not hold up a final occupancy permit for any buildings based on the actual completion of any such improvements.

3.6 Acquisition of Offsite Provision of Real Property Interests. In any instance where OWNER is required by any Development Approval or Land Use Regulation to construct any public improvement on land not owned by OWNER ("Offsite Improvements"), the CITY and OWNER shall cooperate in acquiring the necessary legal interest ("Offsite Property") as described below in Section 3.7. This Section 3.6 is not intended by the parties to impose upon the OWNER an enforceable duty to acquire land or construct any public improvements on land not owned by OWNER, except to the extent that the OWNER elects to proceed with the development of the Project, and then only in accordance with valid conditions imposed by the CITY upon the development of the Project under the Subdivision Map Act or other legal authority.

3.7 Real Property Interests.

3.7.1 CITY Acquisition of Offsite Property. In the event OWNER is required to construct any public improvements on land not owned by OWNER, Sections 3.7.1 and 3.7.2 shall control the acquisition of the Offsite Property. If the OWNER is unable to acquire such Offsite Property, and following the written request from the OWNER to CITY, CITY agrees to use reasonable and diligent good faith efforts to acquire the Offsite Property from the owner or owners of record by negotiation to the extent permitted by law and consistent with this Agreement. If CITY is unable to acquire the Offsite Property by negotiation within thirty (30) days after OWNER'S written request, CITY shall, initiate proceedings utilizing its power of eminent domain to acquire the Offsite Property at a

public hearing noticed and conducted in accordance with California Code of Civil Procedure Section 1245.235 for the purpose of considering the adoption of a resolution of necessity concerning the Offsite Property, subject to the conditions set forth in this Section 3.6.1. The CITY and OWNER acknowledge that the timelines set forth in this Section 3.6.1 represent the maximum time periods which CITY and OWNER reasonably believe will be necessary to complete the acquisition of any Offsite Property. CITY agrees to use reasonable good faith efforts to complete the actions described within lesser time periods, to the extent that it is reasonably able to do so, consistent with the legal constraints imposed upon CITY.

3.7.2 Owner's Option to Terminate Proceedings. CITY shall provide written notice to OWNER no later than fifteen (15) days prior to making an offer to the owner of the Offsite Property. At any time within that fifteen (15) day period, OWNER may, at its option, notify CITY that it wants CITY to cease all acquisition proceedings with respect to that Offsite Property, whereupon CITY shall cease such proceedings. CITY shall provide written notice to OWNER no later than fifteen (15) days prior to the date of the hearing on CITY's intent to consider the adoption of a resolution of necessity as to any Offsite Property. At any time within that fifteen (15) day period, OWNER may, at its option, notify CITY that it wants CITY to cease condemnation proceedings, whereupon CITY shall cease such proceedings. If OWNER does not notify CITY to cease condemnation proceedings within said fifteen (15) day period, then the CITY may proceed to consider and act upon the Offsite Property resolution of necessity. If CITY adopts such resolution of necessity, then CITY shall diligently institute condemnation proceedings and file a complaint in condemnation and seek an order of immediate possession with respect to the Offsite Property.

3.8 Regulation by Other Public Agencies. It is acknowledged by the parties that other public agencies not within the control of CITY possess authority to regulate aspects of the development of the Property separately from or jointly with CITY and this Agreement does not limit the authority of such other public agencies. CITY agrees to cooperate fully, at no cost to CITY, with OWNER in obtaining any required permits or compliance with the regulations of other public agencies provided such cooperation is not in conflict with any laws, regulations or policies of the CITY.

3.9 Tentative Parcel Maps. With respect to applications by OWNER for tentative parcel maps for portions of the Property, CITY agrees that OWNER may file and process tentative maps in accordance with Chapter 4.5 (commencing with Section 66498.1) of Division 2 of Title 7 of the California Government Code and the applicable provisions of CITY's subdivision ordinance, as the same may be amended from time to time. In accordance with the provisions of Section 66452.6 of the Government Code, each tentative subdivision map or tentative parcel map, heretofore or hereafter approved in connection with development of the Property, shall be deemed to have been granted an extension of time to and until the expiration, cancellation, or termination of this Agreement.

3.10 Specific Plan Charge. Pursuant to Government Code section 65456, the City Council may consider adopting a specific plan charge upon persons seeking CITY approvals that are required to be consistent with the Specific Plan. Any such charges shall, in the aggregate, defray, but not exceed, the estimated cost of preparation, adoption, and administration of the Specific Plan, including costs incurred pursuant to the California Environmental Quality Act (Pub. Resources Code, §§ 21000 et seq.). As nearly

as can be estimated, the charges shall be a prorated amount in accordance with the applicant's relative benefit derived from the Specific Plan. If such charges are adopted, the CITY shall use such charges to reimburse the OWNER who originally paid the cost of preparing the Specific Plan, including costs incurred pursuant to the California Environmental Quality Act (Pub. Resources Code, §§ 21000 et seq.) to the extent the OWNER paid more than its relative benefit from the Specific Plan. Such charges, if adopted, shall be imposed on persons seeking CITY approvals that are required to be consistent with the Specific Plan, to the extent such person(s) has/have not entered into a reimbursement agreement with, and satisfactory to, the person(s) originally responsible for the cost of preparing the Specific Plan, including costs incurred pursuant to CEQA.

4. PUBLIC BENEFITS.

4.1 Intent. The parties acknowledge and agree that development of the Property will result in public needs that will not be fully met by the Development Plan and further acknowledge and agree that this Agreement confers private benefits on OWNER that should be balanced by commensurate public benefits. Accordingly, the parties intend to provide consideration to the public to balance the private benefits conferred on OWNER by providing more fully for the satisfaction of the public needs resulting from the Project.

4.2 Development Impact Fees.

4.2.1 Amount of Development Impact Fee. Development Impact Fees (DIF) shall be paid by OWNER. The Development Impact Fee amounts to be paid by OWNER shall be the amounts that are in effect at the time such amounts are due. Nothing contained in this Agreement shall affect the ability of the CITY to impose new Development Impact Fees or amend the amounts of existing Development Impact Fees. Additionally, nothing contained in this Agreement shall affect the ability of other public agencies that are not controlled by CITY to impose and amend, from time to time, Development Impact Fees established or imposed by such other public agencies, even though such Development Impact Fees may be collected by CITY.

4.2.2 Time of Payment. The Development Impact Fees required pursuant to Subsection 4.2.1 shall be paid to CITY prior to the issuance of building permit for each applicable building (subject to the application/use of available fee deferrals or credits), except for the Species, Habitat Conservation, and Open Space Mitigation Development Impact Fee, which shall be paid by OWNER to CITY prior to the issuance of a grading permit. Notwithstanding the foregoing, OWNER is eligible to defer the payment(s) of DIF subject to a separate DIF Deferral Agreement between CITY and OWNER. CITY and OWNER agree that the DIF Deferral Agreement between CITY and OWNER shall comply with CITY's adopted policies applicable to such deferral agreements.

4.3 Responsibility for Construction of Public Improvements.

4.3.1 Timely Construction of Public Infrastructure. The phasing of the area wide infrastructure construction within the vicinity of the Project shall be as approved by the CITY. OWNER shall be responsible for the timely construction and completion of all public infrastructure required for the Project as described in Exhibit E and depicted in Exhibit F and any and all parcel map conditions. Unless otherwise specified in the Parcel Map conditions, and subject to the provisions of Section 3.5 and 3.6, all other required Improvements for each parcel map, shall be completed and operational prior to, and as a condition precedent to, OWNER requesting and CITY's granting of a final occupancy

permit for any buildings to be constructed on the Property. All Infrastructure and Improvements shall be completed as required by the Subdivision Agreement/Parcel Map conditions for Parcel Map No. 20016.

4.3.2 Construction of Public Infrastructure by Third Parties. CITY and OWNER acknowledge that a portion of the Improvements described in Exhibit E and depicted in Exhibit F are necessary for the development of surrounding properties within the Ontario Ranch and the other property owners are also obligated to construct the Improvements or portions thereof. As such, CITY agrees that OWNER's obligation to construct the Improvements may be satisfied by third party owners pursuant to separate written agreements between OWNER and said third party undertaking the construction of the Improvements. Nothing in this Agreement shall be construed to prohibit the coordination of the construction of the Improvements between private parties, including the allocation of costs for the construction of the Improvements. Notwithstanding anything to the contrary herein, any applicable DIF Credits may be transferred and assigned from one (1) party to another with respect to the construction of the Improvements and such transfer or assignment shall not require the conveyance of any real property.

4.3.3 Availability and Use of Recycled Water. OWNER agrees that recycled water shall be available and utilized by OWNER for all construction-related water uses including prior to, and during, any grading of the Property. OWNER and CITY agree that OWNER may, in-lieu of utilizing recycled water during grading and construction, utilize water from existing agricultural wells on the Property subject to the terms of a separate Well Use Agreement between the CITY and OWNER.

4.3.4 Construction of DIF Program Infrastructure. To the extent OWNER is required to construct and completes construction of public improvements that are included in CITY's Development Impact Fee Program CITY agrees that CITY shall issue DIF Credit in accordance with the provisions of a separate Fee Credit Agreement between CITY and OWNER. Limitations on the use of DIF Credit issued to OWNER to offset OWNER's DIF payment obligations shall also be subject to the provisions of a separate Fee Credit Agreement. OWNER will be eligible to receive DIF Credit from OWNER's construction of DIF Program Infrastructure. Any such DIF Credit shall be subject to a Fee Credit Agreement between CITY and OWNER. CITY and OWNER agree that the Fee Credit Agreement between CITY and OWNER shall comply with CITY's adopted policies applicable to such agreements.

4.4 Public Services Funding Fee.

4.4.1 Requirement for Payment of Public Services Funding Fee. In order to ensure that the adequate provision of public services, including without limitation, police, fire and other public safety services, are available to each Project in a timely manner, OWNER shall pay to CITY a "Public Services Funding Fee." The Public Services Funding Fee shall apply to residential and non-residential uses as set forth below.

4.4.2 Public Services Funding Fee Amount. OWNER shall pay a Public Services Funding fee in a single installment payment in the amount of Sixty-Three Cents (\$.63) per square foot of each non-residential building. The single installment for non-residential uses shall be due and payable on a building-by-building basis prior to the issuance of the building permit for a non-residential building. The amount of the Single Installment for non-residential uses shall automatically increase by percentage increase

(but no decrease) in the Consumer Price Index (Los Angeles-Anaheim-Riverside County), 1950-2001 (1982-84=100) over the preceding year on January 1st of each year, beginning on January 1, 2021. OWNER may exercise the option to pay any single installment amounts for the remainder of the non-residential square footage within the Project on or before December 31st, before the Single Installment amount is automatically increased

4.5 Water Availability.

4.5.1 Water Availability. The Property requires the completion of the Phase 2 Water Improvements (Phase 2A and 2B) for permanent water system capacity and supply. Until the Phase 2 Water Improvements are fully constructed and completed, OWNER acknowledges that the Project shall have sufficient water capacity and supply on an interim basis made available through the construction of the Potable Water Improvements, the Phase 2A Water Improvements, and the Interim Chino Avenue Loop described in Exhibit E and depicted in Exhibit F. OWNER acknowledges and agrees that the CITY shall not issue final certificates of occupancy for the Project until the completion of the Potable Water Improvements, the Phase 2A Water Improvements, and the Interim Chino Avenue Loop, described in Exhibit E and depicted in Exhibit F.

4.5.2 DIF Credit for Phase 2 Water Improvements. Within thirty (30) days of OWNER's payment of the Phase 2A Water Payment, described in Exhibit E, item 2(a), CITY shall issue a certificate of DIF Credit which may be used to offset OWNER's DIF obligations in the Regional Water DIF Category. The form of the Certificate of DIF Credit shall be as described in Exhibit G, attached hereto and incorporated herein. OWNER acknowledges that any Regional Water DIF Credit issued to OWNER shall not be used to satisfy a Phase 2A Water Payment and may only be used to offset OWNER's DIF obligations in the Regional Water DIF Category.

4.5.3 Additional Contributions for Phase 2 Water Improvements. The CITY acknowledges and agrees that CITY shall require new development within the Ontario Ranch area served by the Phase 2 Water Improvements to participate in the funding of the Phase 2 Water Improvements. OWNER acknowledges and agrees that the CITY has the right to conduct a review of the water demand, capacity, and supply within the Ontario Ranch area served by the Phase 2 Water Improvements to ensure the adequate provision of permanent water supply and storage, including a review of the available funding for the construction of, or continuation of the construction of, the Phase 2 Water Improvements. The CITY anticipates conducting such reviews on an annual basis but may conduct such reviews at any time. If at any time following such a review, the CITY determines that there is not sufficient funding for the construction of, or continuation of the construction of, the Phase 2 Water Improvements necessary to support current and anticipated future development within the Ontario Ranch area served by the Phase 2 Water Improvements, OWNER agrees to cooperate with the CITY in determining such additional contribution payment necessary from the OWNER to the CITY to initiate construction of, or continue construction of, the Phase 2 Water Improvements. The CITY shall determine OWNER's additional contribution amount and such amount shall be due and payable to the CITY within thirty (30) days of written notice from the CITY to OWNER, subject to Exhibit E, Section 2(c).

4.6 Compliance with Public Benefits Requirements.

4.6.1 Failure to Provide Public Benefits. In the event OWNER fails or refuses to comply with any condition referenced in Section 4.1 through 4.6, or challenges (whether administratively or through legal proceedings) the imposition of such conditions, OWNER shall be deemed in default of this Agreement pursuant to Section 8 hereof, thereby entitling the City to any and all remedies available to it, including, without limitation, the right of the City to withhold OWNER's Project-related building permits, certificates of occupancy, or discretionary approvals, without liability. Nothing herein shall waive Owner's right to assert a default (or failure to perform) by the City has excused Owner's performance under this Agreement.

5. FINANCING OF PUBLIC IMPROVEMENTS.

5.1 Financing Mechanism(s). OWNER agrees that, prior to the recordation of any Parcel Map, the property subject to such Parcel Map shall be included in a CFD to finance City services through annual special taxes that will initially be Thirty-One Cents (\$.31) per square foot for non-residential buildings. These amounts shall be subject to an automatic increase at a rate not to exceed four (4%) percent per year. Depending on the fiscal year that the CFD is formed and the CFD tax is levied, the annual special taxes may be higher. CITY shall be the sole and exclusive lead agency in the formation of any CFD, assessment district or other public financing mechanism within the Property; provided however, that the proceeds of any such CFD, assessment district, or financing mechanism may be used, subject to restrictions that may be imposed by applicable law, for the purposes of acquiring, constructing or maintaining public facilities to be owned or operated by other public agencies, including, without limitation those facilities owned or operated by a school district. In addition to the rights of the CITY pursuant to section 5.1 hereof, CITY shall have the right, but not the obligation, to condition the formation of any CFD, assessment district or other public financing mechanism within the Property on the OWNER mitigating all Project-related impacts to the applicable school district(s) as required by such school district(s). Written evidence by such school district(s) may be required by the CITY as the condition to the formation of any CFD, assessment district or other public financing mechanism within the Property, or any steps preliminary thereto, including, without limitation, the adoption of any resolution of intention to form such CFD, assessment district or other public financing mechanism within the Property. It is not the intent of the parties hereto, by this provision, to prohibit or otherwise limit the City's ability to take any and all necessary steps requisite to the formation of the CFD to finance City services through annual special taxes as set forth in this Section 5.1. Formation of any CFD, assessment district or other public financing mechanism within the Property, shall be subject to CITY's ability to make all findings required by applicable law and complying with all applicable legal procedures and requirements including, without limitation, CITY's public financing district policies as such policies may be amended from time to time. Notwithstanding the foregoing, it is acknowledged and agreed by the parties that nothing contained in this Agreement shall be construed as requiring CITY or the City Council to form any such district.

6. REVIEW FOR COMPLIANCE.

6.1 Periodic and Special Reviews.

6.1.1 Time for and Initiation of Periodic Review. The CITY shall review this Agreement every twelve (12) months from the Effective Date in order to ascertain the good faith compliance by the OWNER with the terms of this Agreement. The OWNER shall submit an Annual Monitoring Report to CITY, in a form acceptable to the City Manager, along with any applicable processing charge within ten (10) days after each anniversary date of the Effective Date of this Agreement. Within fifteen (15) days after the receipt of the Annual Monitoring Report, CITY shall review the Annual Monitoring Report. Prior to the expiration of the fifteen (15) day review period, CITY shall either issue a notice of continuing compliance or a notice of non-compliance and a notice of CITY's intent to conduct a Special Review pursuant to Sections 6.1.2 through 6.1.6. Issuance of a notice of continuing compliance may be issued by the City Manager or his designee.

6.1.2 Initiation of Special Review. A special review may be called either by agreement between the parties or by initiation in one or more of the following ways:

- (a) Recommendation of the Planning staff;
- (b) Affirmative vote of at least four (4) members of the Planning Commission; or
- (c) Affirmative vote of at least three (3) members of the City Council.

6.1.3 Notice of Special Review. The City Manager shall begin the special review proceeding by giving notice that the CITY intends to undertake a special review of this Agreement to the OWNER. Such notice shall be given at least ten (10) days in advance of the time at which the matter will be considered by the Planning Commission.

6.1.4 Public Hearing. The Planning Commission shall conduct a hearing at which the OWNER must demonstrate good faith compliance with the terms of this Agreement. The burden of proof on this issue is upon the OWNER.

6.1.5 Findings Upon Public Hearing. The Planning Commission shall determine upon the basis of substantial evidence whether or not the OWNER has, for the period under review, complied in good faith with the terms and conditions of this Agreement.

6.1.6 Procedure Upon Findings.

(a) If the Planning Commission finds and determines on the basis of substantial evidence that the OWNER has complied in good faith with the terms and conditions of this Agreement during the period under review, the review for that period is concluded.

(b) If the Planning Commission finds and determines on the basis of substantial evidence that the OWNER has not complied in good faith with the terms and conditions of this Agreement during the period under review, the Planning Commission may recommend to the City Council to modify or terminate this Agreement.

(c) The OWNER may appeal a determination pursuant to paragraph (b) to the City Council in accordance with the CITY's rule for consideration of appeals in zoning matters generally.

6.2 Proceedings Upon Modification or Termination. If, upon a finding under Section 6.1.6(b), the CITY determines to proceed with modification or termination of this Agreement, the CITY shall give notice to the property OWNER of its intention so to do. The notice shall contain:

- (a) The time and place of the hearing;
- (b) A statement as to whether or not the CITY proposes to terminate or to modify this Agreement; and
- (c) Other information that the CITY considers necessary to inform the OWNER of the nature of the proceeding.

6.3 Hearing on Modification or Termination. At the time and place set for the hearing on modification or termination, the OWNER shall be given an opportunity to be heard. The OWNER shall be required to demonstrate good faith compliance with the terms and conditions of this Agreement. The burden of proof on this issue shall be on the OWNER. If the City Council finds, based upon substantial evidence in the administrative record, that the OWNER has not complied in good faith with the terms and conditions of the agreement, the City Council may terminate this Agreement or modify this Agreement and impose those conditions to the action it takes as it considers necessary to protect the interests of the CITY. The decision of the City Council shall be final, subject only to judicial review pursuant to Section 1094.5 of the Code of Civil Procedure.

6.4 Certificate of Agreement Compliance. If, at the conclusion of a Periodic or Special Review, OWNER is found to be in compliance with this Agreement, CITY shall, upon written request by OWNER, issue a Certificate of Agreement Compliance ("Certificate") to OWNER stating that after the most recent Periodic or Special Review and based upon the information known or made known to the Planning Director and City Council that (1) this Agreement remains in effect and (2) OWNER is not in default. The Certificate shall be in recordable form, shall contain information necessary to communicate constructive record notice of the finding of compliance, shall state whether the Certificate is issued after a Periodic or Special Review and shall state the anticipated date of commencement of the next Periodic Review. OWNER may record the Certificate with the County Recorder. Whether or not the Certificate is relied upon by assignees or other transferees or OWNER, CITY shall not be bound by a Certificate if a default existed at the time of the Periodic or Special Review, but was concealed from or otherwise not known to the Planning Director or City Council.

7. [OMITTED]

8. DEFAULT AND REMEDIES.

8.1 Remedies in General. It is acknowledged by the parties that CITY would not have entered into this Agreement if it were to be liable in damages under this Agreement, or with respect to this Agreement or the application thereof. In general, each of the parties hereto may pursue any remedy at law or equity available for the breach of any provision of this Agreement, except that CITY shall not be liable in damages to OWNER, or to any successor in interest of OWNER, or to any other person, and OWNER covenants not to sue for damages or claim any damages:

- (a) For any breach of this Agreement or for any cause of action which arises out of this Agreement; or
- (b) For the taking, impairment or restriction of any right or interest conveyed or provided under or pursuant to this Agreement; or
- (c) Arising out of or connected with any dispute, controversy or issue regarding the application or interpretation or effect of the provisions of this Agreement.

8.2 Specific Performance. The parties acknowledge that money damages and remedies at law generally are inadequate and specific performance and other non-monetary relief are particularly appropriate remedies for the enforcement of this Agreement and should be available to all parties for the following reasons:

- (a) Money damages are unavailable against CITY as provided in Section 8.1 above.
- (b) Due to the size, nature and scope of the Project, it may not be practical or possible to restore the Property to its natural condition once implementation of this Agreement has begun. After such implementation, OWNER may be foreclosed from other choices it may have had to utilize the Property or portions thereof. OWNER has invested significant time and resources and performed extensive planning and processing of the Project in agreeing to the terms of this Agreement and will be investing even more significant time and resources in implementing the Project in reliance upon the terms of this Agreement, and it is not possible to determine the sum of money which would adequately compensate OWNER for such efforts.

8.3 Release. Except for non-damage remedies, including the remedy of specific performance and judicial review as provided for in Section 6.5, OWNER, for itself, its successors and assignees, hereby releases the CITY, its officers, agents and employees from any and all claims, demands, actions, or suits of any kind or nature arising out of any liability, known or unknown, present or future, including, but not limited to, any claim or liability, based or asserted, pursuant to Article I, Section 19 of the California Constitution, the Fifth Amendment of the United States Constitution, or any other law or ordinance which seeks to impose any other liability or damage, whatsoever, upon the CITY because it entered into this Agreement or because of the terms of this Agreement.

8.4 Termination or Modification of Agreement for Default of OWNER. Subject to the provisions contained in Subsection 6.3 herein, CITY may terminate or modify this Agreement for any failure of OWNER to perform any material duty or obligation of OWNER under this Agreement, or to comply in good faith with the terms of this Agreement (hereinafter referred to as "default"); provided, however, CITY may terminate or modify this Agreement pursuant to this Section only after providing written notice to OWNER of default setting forth the nature of the default and the actions, if any, required by OWNER to cure such default and, where the default can be cured, OWNER has failed to take such actions and cure such default within 60 days after the effective date of such notice or, in the event that such default cannot be cured within such 60 day period but can be cured within a longer time, has failed to commence the actions necessary to cure such default within such 60 day period and to diligently proceed to complete such actions and cure such default.

8.5 Termination of Agreement for Default of CITY. OWNER may terminate this Agreement only in the event of a default by CITY in the performance of a material term of this Agreement and only after providing written notice to CITY of default setting forth the nature of the default and the actions, if any, required by CITY to cure such default and, where the default can be cured, CITY has failed to take such actions and cure such default within 60 days after the effective date of such notice or, in the event that such default cannot be cured within such 60 day period but can be cured within a longer time, has failed to commence the actions necessary to cure such default within such 60 day period and to diligently proceed to complete such actions and cure such default.

9. THIRD PARTY LITIGATION.

9.1 General Plan Litigation. CITY has determined that this Agreement is consistent with the General Plan, as such General Plan exists as of the Effective Date ("General Plan"), and that the General Plan meets all requirements of law. OWNER has reviewed the General Plan and concurs with CITY's determination. CITY shall have no liability in damages under this Agreement for any failure of CITY to perform under this Agreement or the inability of OWNER to develop the Property as contemplated by the Development Plan or this Agreement as the result of a judicial determination that on the Effective Date, or at any time thereafter, the General Plan, or portions thereof, are invalid or inadequate or not in compliance with law.

9.2 Third Party Litigation Concerning Agreement. OWNER shall defend, at its expense, including attorneys' fees, indemnify, and hold harmless CITY, its agents, officers and employees from any claim, action or proceeding against CITY, its agents, officers, or employees to attack, set aside, void, or annul the approval of this Agreement or the approval of any permit granted pursuant to this Agreement. CITY shall promptly notify OWNER of any such claim, action or proceeding, and CITY shall cooperate in the defense. If CITY fails to promptly notify OWNER of any such claim, action or proceeding, or if CITY fails to cooperate in the defense, OWNER shall not thereafter be responsible to defend, indemnify, or hold harmless CITY. CITY may in its discretion participate in the defense of any such claim, action or proceeding.

9.3 Indemnity. In addition to the provisions of Section 10.2 above, OWNER shall indemnify and hold CITY, its officers, agents, employees and independent contractors free and harmless from any liability whatsoever, based or asserted upon any act or omission of OWNER, its officers, agents, employees, subcontractors and independent contractors, for property damage, bodily injury, or death (OWNER's employees included) or any other element of damage of any kind or nature, to the extent relating to or in any way connected with or arising from the activities contemplated hereunder, including, but not limited to, the study, design, engineering, construction, completion, failure and conveyance of the public improvements, save and except claims for damages arising through the sole active negligence or sole willful misconduct of CITY. OWNER shall defend, at its expense, including attorneys' fees, CITY, its officers, agents, employees and independent contractors in any legal action based upon such alleged acts or omissions. CITY may in its discretion participate in the defense of any such legal action.

9.4 Environment Assurances. OWNER shall indemnify and hold CITY, its officers, agents, and employees free and harmless from any liability, to the extent based or asserted, upon any act or omission of OWNER, its officers, agents, employees, subcontractors, predecessors in interest, successors, assigns and independent

contractors for any violation of any federal, state or local law, ordinance or regulation relating to industrial hygiene or to environmental conditions on, under or about the Property during OWNER'S period of ownership of the Property, including, but not limited to, soil and groundwater conditions caused by OWNER, and OWNER shall defend, at its expense, including attorneys' fees, CITY, its officers, agents and employees in any action based or asserted upon any such alleged act or omission. CITY may in its discretion participate in the defense of any such action.

9.5 Reservation of Rights. With respect to Sections 9.2, 9.3 and 9.4 herein, CITY reserves the right to either (1) approve the attorney(s) which OWNER selects, hires or otherwise engages to defend CITY hereunder, which approval shall not be unreasonably withheld, or (2) conduct its own defense, provided, however, that OWNER shall reimburse CITY forthwith for any and all reasonable expenses incurred for such defense, including attorneys' fees, upon billing and accounting therefor.

9.6 Survival. The provisions of this Sections 9.1 through 9.6, inclusive, shall survive the termination of this Agreement.

10. MORTGAGEE PROTECTION.

10.1 Mortgagee Protection. The parties hereto agree that this Agreement shall not prevent or limit OWNER, in any manner, at OWNER's sole discretion, from encumbering the Property or any portion thereof or any improvement thereon by any mortgage, deed of trust or other security device securing financing with respect to the Property. CITY acknowledges that the lenders providing such financing may require certain Agreement interpretations and modifications and agrees upon request, from time to time, to meet with OWNER and representatives of such lenders to negotiate in good faith any such request for interpretation or modification. CITY will not unreasonably withhold its consent to any such requested interpretation or modification provided such interpretation or modification is consistent with the intent and purposes of this Agreement. Any Mortgagee of the Property shall be entitled to the following rights and privileges:

(a) Neither entering into this Agreement nor a breach of this Agreement shall defeat, render invalid, diminish or impair the lien of any mortgage on the Property made in good faith and for value, unless otherwise required by law.

(b) The Mortgagee of any mortgage or deed of trust encumbering the Property, or any part thereof, which Mortgagee, has submitted a request in writing to the CITY in the manner specified herein for giving notices, shall be entitled to receive written notification from CITY of any default by OWNER in the performance of OWNER's obligations under this Agreement.

(c) If CITY timely receives a request from a Mortgagee requesting a copy of any notice of default given to OWNER under the terms of this Agreement, CITY shall provide a copy of that notice to the Mortgagee within ten (10) days of sending the notice of default to OWNER. The Mortgagee shall have the right, but not the obligation, to cure the default during the remaining cure period allowed such party under this Agreement.

(d) Any Mortgagee who comes into possession of the Property, or any part thereof, pursuant to foreclosure of the mortgage or deed of trust, or deed in lieu of such foreclosure, shall take the Property, or part thereof, subject to the terms of this Agreement. Notwithstanding any other provision of this Agreement to the contrary, no Mortgagee shall

have an obligation or duty under this Agreement to perform any of OWNER's obligations or other affirmative covenants of OWNER hereunder, or to guarantee such performance; provided, however, that to the extent that any covenant to be performed by OWNER is a condition precedent to the performance of a covenant by CITY, the performance thereof shall continue to be a condition precedent to CITY's performance hereunder, and further provided that any sale, transfer or assignment by any Mortgagee in possession shall be subject to the provisions of Section 2.4 of this Agreement

(e) In the event of a default by Owner, any Mortgagee shall have the right to remedy, or cause to be remedied, such default within sixty (60) days following the later to occur of (i) the date of Mortgagee's receipt of the notice referred to in Section 10.1(b) above, or (ii) the expiration of the period provided herein for Owner to remedy or cure such default, and City shall accept such performance by or at the insistence of the Mortgagee as if the same had been timely made by Owner; provided, however, that (i) if such default is not capable of being cured within the timeframes set forth in this Section and Mortgagee commences to cure the default within such timeframes, then Mortgagee shall have such additional time as is required to cure the default so long as Mortgagee diligently prosecutes the cure to completion and (ii) if possession of the Property (or portion thereof) is required to effectuate such cure or remedy, the Mortgagee shall be deemed to have timely cured or remedied if it commences the proceedings necessary to obtain possession thereof within sixty (60) days after receipt of the copy of the notice, diligently pursues such proceedings to completion, and, after obtaining possession, diligently completes such cure or remedy.

11. MISCELLANEOUS PROVISIONS.

11.1 Recordation of Agreement. This Agreement and any amendment or cancellation thereof shall be recorded with the San Bernardino County Recorder by the City Clerk within the ten (10) days after the CITY executes this Agreement, as required by Section 65868.5 of the Government Code. If the parties to this Agreement or their successors in interest amend or cancel this Agreement as provided for herein and in Government Code Section 65868, or if the CITY terminates or modifies the agreement as provided for herein and in Government Code Section 65865.1 for failure of the applicant to comply in good faith with the terms or conditions of this Agreement, the City Clerk shall have notice of such action recorded with the San Bernardino County Recorder.

11.2 Entire Agreement. This Agreement sets forth and contains the entire understanding and agreement of the parties, and there are no oral or written representations, understandings or ancillary covenants, undertakings or agreements which are not contained or expressly referred to herein. No testimony or evidence of any such representations, understandings or covenants shall be admissible in any proceeding of any kind or nature to interpret or determine the terms or conditions of this Agreement.

11.3 Severability. If any term, provision, covenant or condition of this Agreement shall be determined invalid, void or unenforceable, the remainder of this Agreement shall not be affected thereby to the extent such remaining provisions are not rendered impractical to perform taking into consideration the purposes of this Agreement. Notwithstanding the foregoing, the provision of the Public Benefits set forth in Section 4 of this Agreement, including the payment of the fees set forth therein, are essential elements of this Agreement and CITY would not have entered into this Agreement but for such provisions, and therefore in the event such provisions are determined to be invalid, void or

unenforceable, this entire Agreement shall be null and void and of no force and effect whatsoever.

11.4 Interpretation and Governing Law. This Agreement and any dispute arising hereunder shall be governed and interpreted in accordance with the laws of the State of California. This Agreement shall be construed as a whole according to its fair language and common meaning to achieve the objectives and purposes of the parties hereto, and the rule of construction to the effect that ambiguities are to be resolved against the drafting party shall not be employed in interpreting this Agreement, all parties having been represented by counsel in the negotiation and preparation hereof.

11.5 Section Headings. All section headings and subheadings are inserted for convenience only and shall not affect any construction or interpretation of this Agreement.

11.6 Singular and Plural. As used herein, the singular of any word includes the plural.

11.7 Joint and Several Obligations. Subject to Section 2.4, if at any time during the term of this Agreement the Property is owned, in whole or in part, by more than one owner, all obligations of such owners under this Agreement shall be joint and several, and the default of any such owner shall be the default of all such owners. Notwithstanding the foregoing, no owner of a single lot which has been finally subdivided and sold to such owner as a member of the general public or otherwise as an ultimate user shall have any obligation under this Agreement except as provided under Section 4 hereof.

11.8 Time of Essence. Time is of the essence in the performance of the provisions of this Agreement as to which time is an element.

11.9 Waiver. Failure by a party to insist upon the strict performance of any of the provisions of this Agreement by the other party, or the failure by a party to exercise its rights upon the default of the other party, shall not constitute a waiver of such party's right to insist and demand strict compliance by the other party with the terms of this Agreement thereafter.

11.10 No Third-Party Beneficiaries. This Agreement is made and entered into for the sole protection and benefit of the parties and their successors and assigns. No other person shall have any right of action based upon any provision of this Agreement.

11.11 Force Majeure. Neither party shall be deemed to be in default where failure or delay in performance of any of its obligations under this Agreement is caused by floods, earthquakes, other Acts of God, fires, wars, riots or similar hostilities, strikes and other labor difficulties beyond the party's control, (including the party's employment force), government regulations, court actions (such as restraining orders or injunctions), or other causes beyond the party's control. If any such events shall occur, the term of this Agreement and the time for performance by either party of any of its obligations hereunder may be extended by the written agreement of the parties for the period of time that such events prevented such performance, provided that the term of this Agreement shall not be extended under any circumstances for more than five (5) years.

11.12 Mutual Covenants. The covenants contained herein are mutual covenants and also constitute conditions to the concurrent or subsequent performance by the party benefited thereby of the covenants to be performed hereunder by such benefited party.

11.13 Successors in Interest. The burdens of this Agreement shall be binding upon, and the benefits of this Agreement shall inure to, all successors in interest to the parties to this Agreement. All provisions of this Agreement shall be enforceable as equitable servitudes and constitute covenants running with the land. Each covenant to do or refrain from doing some act hereunder with regard to development of the Property: (a) is for the benefit of and is a burden upon every portion of the Property; (b) runs with the Property and each portion thereof; and, (c) is binding upon each party and each successor in interest during ownership of the Property or any portion thereof.

11.14 Counterparts. This Agreement may be executed by the parties in counterparts, which counterparts shall be construed together and have the same effect as if all of the parties had executed the same instrument.

11.15 Jurisdiction and Venue. Any action at law or in equity arising under this Agreement or brought by a party hereto for the purpose of enforcing, construing or determining the validity of any provision of this Agreement shall be filed and tried in the Superior Court of the County of San Bernardino, State of California, and the parties hereto waive all provisions of law providing for the filing, removal or change of venue to any other court.

11.16 Project as a Private Undertaking. It is specifically understood and agreed by and between the parties hereto that the development of the Project is a private development, that neither party is acting as the agent of the other in any respect hereunder, and that each party is an independent contracting entity with respect to the terms, covenants and conditions contained in this Agreement. No partnership, joint venture or other association of any kind is formed by this Agreement. The only relationship between CITY and OWNER is that of a government entity regulating the development of private property and the owner of such property.

11.17 Further Actions and Instruments. Each of the parties shall cooperate with and provide reasonable assistance to the other to the extent contemplated hereunder in the performance of all obligations under this Agreement and the satisfaction of the conditions of this Agreement. Upon the request of either party at any time, the other party shall promptly execute, with acknowledgment or affidavit if reasonably required, and file or record such required instruments and writings and take any actions as may be reasonably necessary under the terms of this Agreement to carry out the intent and to fulfill the provisions of this Agreement or to evidence or consummate the transactions contemplated by this Agreement. The City Manager may delegate his powers and duties under this Agreement to an Assistant City Manager or other management level employee of the CITY.

11.18 Eminent Domain. No provision of this Agreement shall be construed to limit or restrict the exercise by CITY of its power of eminent domain.

11.19 Agent for Service of Process. In the event OWNER is not a resident of the State of California or it is an association, partnership or joint venture without a member, partner or joint venturer resident of the State of California, or it is a foreign corporation, then in any such event, OWNER shall file with the Planning Director, upon its execution of this Agreement, a designation of a natural person residing in the State of California, giving his or her name, residence and business addresses, as its agent for the purpose of service of process in any court action arising out of or based upon this Agreement, and the delivery to such agent of a copy of any process in any such action shall constitute valid

service upon OWNER. If for any reason service of such process upon such agent is not feasible, then in such event OWNER may be personally served with such process out of this County and such service shall constitute valid service upon OWNER. OWNER is amenable to the process so served, submits to the jurisdiction of the Court so obtained and waives any and all objections and protests thereto.

11.20 Estoppel Certificate. Within thirty (30) business days following a written request by any of the parties, the other party shall execute and deliver to the requesting party a statement certifying that (i) either this Agreement is unmodified and in full force and effect or there have been specified (date and nature) modifications to the Agreement, but it remains in full force and effect as modified; and (ii) either there are no known current uncured defaults under this Agreement or that the responding party alleges that specified (date and nature) defaults exist. The statement shall also provide any other reasonable information requested. The failure to timely deliver this statement shall constitute a conclusive presumption that this Agreement is in full force and effect without modification except as may be represented by the requesting party and that there are no uncured defaults in the performance of the requesting party, except as may be represented by the requesting party. OWNER shall pay to CITY all costs incurred by CITY in connection with the issuance of estoppel certificates requested by Owner under this Section 11.20 prior to CITY's issuance of such certificates.

11.21 Authority to Execute. The person or persons executing this Agreement on behalf of OWNER warrants and represents that he or she/they have the authority to execute this Agreement on behalf of his or her/their corporation, partnership or business entity and warrants and represents that he or she/they has/have the authority to bind OWNER to the performance of its obligations hereunder.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement on the day and year set forth below.

DESCRIPTION OF REQUIRED IMPROVEMENTS

1. OWNER shall design, construct, and complete the following Improvements, Potable Water (WT), Storm Drain (SD), Streets (ST), Sewer (SW), Recycled Water (RW), and Fiber Optics (FO), as described, prior to OWNER’s request for final occupancy of the first building:
 - a. WT on Euclid Avenue between Eucalyptus Avenue and Merrill Avenue (Local Water DIF Project WT-011).
 - b. WT on Sultana Avenue between Eucalyptus Avenue and Merrill Avenue.
 - c. WT on Eucalyptus Avenue between Euclid Avenue and Grove Avenue (Local Water DIF Project WT-011).
 - d. WT on Eucalyptus Avenue between Grove Avenue and Carpenter Avenue (*Regional Water DIF Project, portion of Phase 2A Water*).
 - e. WT on Merrill Avenue between Euclid Avenue and Walker Avenue (Local Water DIF Project WT-011).
 - f. WT on Walker Avenue between Eucalyptus Avenue and Merrill Avenue (Local Water DIF Project WT-011).
 - g. SD onsite detention shall be designed, constructed, and completed by OWNER prior to issuance of the first building permit. However, OWNER is eligible to request from CITY a grading permit prior to the completion of the SD onsite detention.
 - h. OWNER shall contribute to the construction of the ultimate Euclid Avenue SD connection, south of Merrill Avenue. OWNER shall participate in funding the construction of the ultimate Euclid Avenue SD connection, south of Merrill Avenue. OWNER shall pay the CITY within thirty (30) days of the execution of the Agreement, in the amount of Two Million Four Hundred Forty Six Thousand One Hundred Ninety One Dollars (\$2,446,191) in recognition of OWNER’s contribution to the ultimate Euclid Avenue SD connection south of Merrill Avenue. Upon OWNER’s full and complete payment to CITY, the CITY shall issue a Certificate of DIF Credit in the Regional Storm Drain Category equal to the contribution amount

paid to the CITY. Such Regional Storm Drain Certificate shall be issued by CITY within thirty (30) days of the receipt of such required payment. OWNER shall also mitigate flooding of existing storm drain facilities downstream of the Project site, in the City of Chino, caused by the Project, to the satisfaction and approval of the City of Chino and the City Engineer.

- i. SD on Euclid Avenue from Eucalyptus Avenue to Merrill Avenue.
- j. SD on Eucalyptus Avenue between Euclid Avenue and Sultana Avenue.
- k. SD on Sultana Avenue between Eucalyptus Avenue and Merrill Avenue.
- l. SD on Merrill Avenue between Euclid Avenue and Sultana Avenue.
- m. As part of the SD improvements the OWNER shall be responsible for the Plan and Profile drawings of the ultimate SD improvements downstream on Euclid Avenue from Merrill Avenue to the ultimate point of connection south to Pine Avenue, in the City of Chino, to the satisfaction of the City Engineer.
- n. SD bleeder line or alternative interim connection at the discretion of the City on Euclid Ave south of Merrill Ave. This shall connect to the SD on Merrill Ave between Euclid Ave and Sultana Avenue.
- o. Two (2) Debris Separation Baffle Boxes at the intersections of Euclid Avenue and Merrill Avenue.
- p. Full half ST improvements on the south half and circulation lane improvements on the north half of Eucalyptus Avenue from Euclid Avenue to Sultana Avenue.
- q. Full half ST improvements on both sides of Merrill Avenue between Euclid Avenue and Sultana Avenue.
- r. Full half ST improvements on Euclid Avenue between Eucalyptus Avenue and Merrill Avenue.
- s. Full half ST improvements on the west side and circulation lane improvements on the east side of Sultana Avenue between Eucalyptus Avenue and Merrill Avenue.

- t. Modifications to existing traffic signals at intersections of Euclid/Eucalyptus Avenues and Euclid/Merrill Avenues.
 - u. Bus rapid transit (BRT) improvements along Euclid Avenue.
 - v. Traffic Signal at Sultana/Eucalyptus Avenues.
 - w. Traffic Signal at Sultana/Merrill Avenues.
 - x. SW (Western Trunk Sewer) in Euclid Avenue (or through the Chino Airport) between Kimball Avenue and Merrill Avenue (Regional Sewer DIF Project SW-002).
 - y. SW (Western Trunk Sewer) on Merrill Avenue between Euclid Avenue and Sultana Avenue (Regional Sewer DIF Project SW-002).
 - z. SW in Euclid Avenue between Merrill Avenue and Eucalyptus Avenue (Local Sewer DIF Project SW-011).
 - aa. SW in Sultana Avenue between Merrill Avenue and Eucalyptus Avenue.
 - bb. RW in Euclid Avenue between IEUA point of connection on Eucalyptus Avenue and Merrill Avenue.
 - cc. RW in Merrill Avenue between Euclid Avenue and Sultana Avenue.
 - dd. RW in Sultana Avenue between Merrill Avenue and IEUA point of connection on Eucalyptus Avenue.
 - ee. FO on Eucalyptus Avenue between Euclid Avenue and Sultana Avenue.
 - ff. FO on Euclid Avenue between Eucalyptus Avenue and Merrill Avenue.
 - gg. FO on Merrill Avenue between Euclid Avenue and Sultana Avenue.
2. CITY shall design, construct, and complete the Phase 2 Water (WT) Improvements and Interim Chino Avenue Loop. The Phase 2 Water Improvements will be constructed by the CITY in phases, with the initial improvements, designated as Phase 2A Water Improvements, Interim Chino Avenue Loop, and Phase 2B Water Improvements as described below.

- a. Phase 2A Water Improvements shall consist of the following:
 - i. WT on Grove Avenue between Eucalyptus Avenue and Chino Avenue (Regional Water DIF Project WT-010).
- b. Interim Chino Avenue Loop shall consist of the following:
 - i. WT on Chino Avenue between Cucamonga Channel and Grove Avenue, which will provide the second point of connection from the 1010 Pressure Zone (Local Water DIF Project WT-009).
 - ii. Pressure Reducing Station at Grove Avenue and Chino Avenue, which will provide the second point of connection from 1010 Pressure Zone (Future Local Water DIF Project WT-009).

OWNER shall pay one hundred percent (100%) of the costs to construct the Phase 2A Improvements and the Interim Chino Avenue Loop, within forty-five (45) days prior to the CITY's award of contract, and such payment shall be the "Phase 2A Water Payment". The costs in the foregoing sentence shall equal the actual bid amount of the awarded contracts for the work, plus fifteen percent (15%). Upon OWNER's full and complete payment to CITY, the CITY shall issue a Certificate of DIF Credit in the Regional Water Category and/or the Local Adjacent Water Category, as appropriate. Each DIF Water Certificate shall be issued by CITY within thirty (30) days of the receipt of such required payment.

- c. Phase 2B Water Improvements shall consist of the following:
 - i. WT on Francis Street between Grove Avenue and Bon View Avenue (Regional Water DIF Project WT-010).
 - ii. WT on Bon View Avenue between Francis Street and the Bon View Reservoir Site (Regional Water DIF Project WT-010).
 - iii. WT – Nine (9) Million Gallon reservoir at Bon View Reservoir Site (Regional Water DIF Project WT-014).
 - iv. WT – Two (2) Groundwater Production Wells in vicinity of Bon View Reservoir Site (Regional Water DIF Project WT-007).

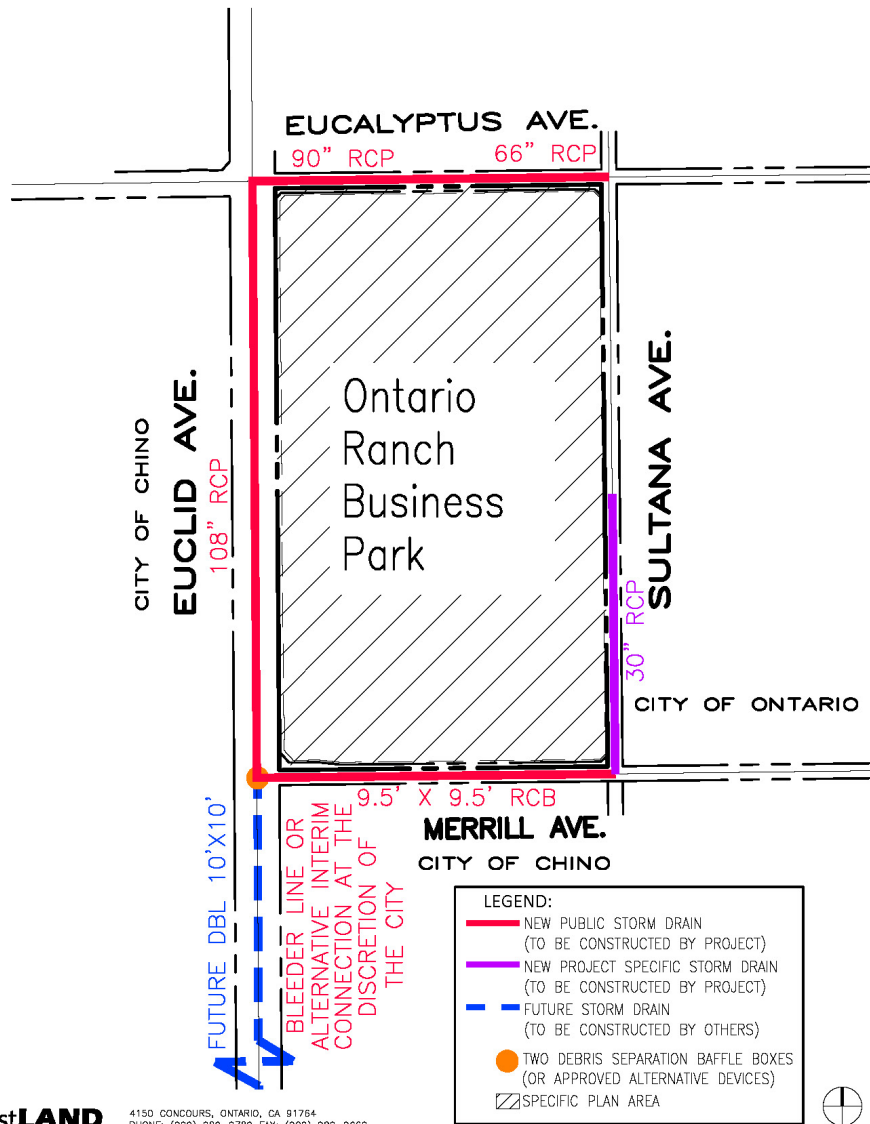

- v. WT on Grove Avenue between Chino Avenue and Francis Street (Regional Water DIF Project WT-010). The final design and alignment north of Riverside Drive is subject to change at the reasonable discretion of the CITY.

The Phase 2B Water Improvements will be constructed by the CITY and funded by future developers. In recognition of OWNER's payment towards funding one hundred percent (100%) of the Phase 2A Water Improvements and Interim Chino Avenue Loop, the OWNER's obligation to participate in the funding of the Phase 2B Water Improvements shall not be required for the Property. CITY and OWNER mutually agree and understand, that with completion of Phase 2A and the Interim Chino Avenue Loop, the project will be utilizing interim water supply and storage capacity from the 1010' Pressure Zone and that other developers will be required to participate in the funding of future Phase 2 Water Improvements to support the permanent water supply and storage needs of future development within Ontario Ranch.

FORM OF CERTIFICATE OF REGIONAL DIF CREDIT

Pursuant to Section 4.5.2 of this Agreement by and between the City of Ontario and _____, dated _____, 20__, the terms and definitions of which are hereby incorporated herein by this reference and hereinafter called the "Development Agreement", the City of Ontario hereby certifies that OWNER is entitled to the following amount and nature of DIF Credits in the Regional Water DIF Infrastructure Category:

Amount of Credit: \$ _____

Scott Ochoa, City Manager

Dated: _____

FILE NOS: PMTT18-011 and PDEV18-036

SUBJECT: A Tentative Parcel Map (File No. PMTT18-011 / PM 20016) to subdivide 85.6 acres of land into eight parcels to facilitate a Development Plan (File No. PDEV18-036) to construct three Industrial buildings totaling 1,447,123 square feet and five Business Park buildings totaling 105,624 square feet, located at the northeast corner of Merrill and Euclid Avenues, within the Industrial and Business Park land use districts of the Ontario Ranch Business Park Specific Plan; submitted by Euclid Land Venture, LLC.

PROPERTY OWNER: Pietersma Family Trust

RECOMMENDED ACTION: That the Planning Commission consider and approve File Nos. PMTT18-011 and PDEV19-036, pursuant to the facts and reasons contained in the staff report and attached resolutions, and subject to the conditions of approval contained in the attached departmental reports.

PROJECT SETTING: The project site is comprised of 85.6 acres of agricultural/dairy and vacant land located at the northeast corner of Merrill and Euclid Avenues, within the Industrial and Business Park land use districts of the Ontario Ranch Business Park Specific Plan, and is depicted in Figure 1: Project Location, below. The property to the north of the project site is currently developed with a plant nursery and dairy, and is located within the SP (Specific Plan)/AG (Agricultural Overlay) zoning district (NMC West Mixed Use District of the Policy Plan Land Use Plan). The property to the south consists of developed lands with Chino Airport, located within the City of Chino. The property east of the project site is developed with a dairy and single-family residence and is located within the SP (Specific Plan)/AG (Agricultural Overlay) zoning district (Low-Medium Density Residential and Business Park districts of the Policy Plan Land Use Plan). The property to the west, across Euclid Avenue, is in the City of Chino and consists of vacant and residentially

developed lands. The existing surrounding land uses, zoning, and general plan and specific plan land use designations are summarized in the "Surrounding Zoning & Land Uses" table located in the Technical Appendix of this report.

PROJECT ANALYSIS:

(1) Background — The Ontario Ranch Business Park Specific Plan (File No. PSP18-002) was approved, and the related Environmental Impact Report ("EIR"; SCH# 2019050018) was certified, by the City Council on September 15, 2020. The Ontario Ranch Business Park Specific Plan ("ORBP SP") established the land use designations, development standards, and design guidelines on 85.6 acres of land, which included the potential development of up to 1,905,027 square feet of industrial and business park development.

In 2010, The Ontario Plan ("TOP") was adopted, which set forth the land use pattern for the City to achieve its Vision. With the adoption of the related TOP amendment (File No. PGPA18-008), Business Park and Industrial land use designations were assigned to the Project site.

On November 13, 2018, the applicant submitted a Tentative Parcel Map (File No. PMTT18-011) and a Development Plan (File No. PDEV18-036) to facilitate the construction of three industrial buildings totaling 1,447,123 square feet and five business park buildings totaling 105,624 square feet.

On October 19, 2020, the Development Advisory Board ("DAB") conducted a hearing to consider the Tentative Parcel Map and Development Plan, and concluded the hearing, voting to recommend that the Planning Commission approve the Applications subject to conditions of approval, which are included as attachments to the Planning Commission resolutions.

(2) Tentative Parcel Map – The proposed Tentative Parcel Map will subdivide the Project site into eight parcels (see Exhibit B – Tentative Parcel Map) to facilitate the construction of three industrial buildings, five business park buildings, and associated on-site and off-site improvements and landscape areas.

(3) Site Design/Building Layout — The rectangular project site will predominantly orient smaller business park buildings (buildings 4 thru 8, less than 125,000 square feet) along the frontages of Euclid Avenue and Eucalyptus Avenue. The larger industrial buildings (buildings 1 thru 3) will be sited toward the interior of the site, facing other future industrial uses to the east, along Sultana Avenue, and to the south, within Chino Airport, along Merrill Avenue.

(4) Site Access/Circulation — The Project site will be accessible from all four surrounding streets. Two access driveway points will be provided along Euclid Avenue (between Parcels 3 and 4 and Parcels 4 and 5) for trucks and passenger vehicle access (pending Caltrans review and approval). Two points of access from Eucalyptus Avenue (between Parcels 6 and 7 and Parcels 7 and 8) are provided for trucks and passenger

vehicles. Along Sultana Avenue, four driveway access points (between Parcels 8 and 1, and Parcels 1 and 2 and at the southeast area of Parcel 2) will be provided for truck entries and passenger vehicle entries. One point of access for trucks and passenger vehicles from Merrill Avenue will be provided (between Parcels 2 and 3). Reciprocal parking and circulation access will be available throughout the project site to accommodate all buildings.

(5) Parking — All future land uses will be required to meet all Development Code and ORBP SP parking standards and regulations. Conceptual parking of the site provides for a variety of parking solutions, depending on the ultimate user, with a total of 1,150 parking spaces shown. Alternative parking plans have been provided, which convert excess truck trailer spaces into passenger vehicle spaces, as needed, for a potential total of 1,607 parking spaces. The conceptual parking plan has been calculated under the “Warehousing and Distribution” rate per Table 4.4 of the ORBP SP. The required and provided parking has been summarized below in Table A.

Table A: Parking Summary						
Bldg. No.	Type of Use	Building Area	Trailer Parking		Vehicle Spaces	
			Required	Provided	Required	Provided
1	Warehouse / Distribution	595,770 SF	21	102	308	303 (*495)

(6) Architecture — The architectural theme of the ORBP SP area as a whole incorporates a Contemporary Architectural style, and each planning area (business park and industrial park) will be complementary of one another. The proposed buildings are of concrete tilt-up construction, and all eight buildings incorporate a common architectural design theme, with enhanced elements and treatments located at office entries and along street-facing elevations (see Exhibit D – Typical Elevations, and Attachment A for the complete Building Elevations Package). Architectural elements for

all buildings include smooth-painted concrete in white and gray tones, with horizontal and vertical reveals, storefronts with clear anodized mullions and blue reflective glazing, formliners with random plank vertical panels, and metal canopies. Mechanical equipment will be roof-mounted and obscured from public view by parapet walls. Loading/dock areas will be screened from public view by 14-foot high concrete tilt-up screen walls that have been designed to be complementary to the building architecture.

(7) Landscaping — The ORBP SP requires a minimum 10 percent landscape coverage be provided for buildings within the Industrial land use district, and minimum 15 percent landscape coverage be provided for buildings within the Business Park land use district. Eleven percent landscape coverage has been provided for the Industrial land use district, and 15 percent has been provided for the Business Park land use district, meeting the required minimum landscape coverage. The Project provides substantial landscaping along the full perimeter of the site, with extra buffering provided along Euclid Avenue (see Exhibit E – Conceptual Landscape Plan). Interior to the site, landscaping is provided adjacent to buildings and throughout parking lot and drive aisle areas to soften the appearance of these areas and provide additional shading for these areas.

The Project includes right-of-way improvements (street, curb, gutter, sidewalk, and parkway) along the surrounding streets. The proposed on-site and off-site landscape improvements will assist toward creating a walkable, safe area for pedestrians to access the Project site. A landscaped median, multi-purpose trail and neighborhood edge will be installed along Euclid Avenue. A multi-purpose trail and neighborhood edge will also be installed along Eucalyptus and Merrill Avenues.

The landscape plan incorporates an assortment of 24- to 48-inch box trees, such as cedar, redbud, willow, cypress, oak, pistache, sycamore, pine, pepper, and box varieties. The project will also incorporate low-water usage and drought-tolerant shrubs and groundcovers. Additionally, each building will have access to employee break areas, with benches, tables, and shade trees.

(8) Signage — All future signage will be subject to review and approval of a comprehensive sign program for the Specific Plan area. The sign program will facilitate integration of the signs with the overall site and building design to create a unified visual statement and provide for flexible application of sign regulations in the design and display of multiple signs. Key provisions will include an entry monument at the northeast corner of Euclid and Merrill Avenues to identify the Ontario Ranch area and/or the Ontario Ranch Business Park; center and tenant identification signage, including traffic and wayfinding signs, building signs, and secondary monumentation; and visitor and directional signage.

(9) Utilities (drainage, sewer) — To serve the proposed industrial development, the Project will be required to construct infrastructure improvements per the Development Agreement (File No. PDA19-001) and requirements of the ORBP SP. Furthermore, the Applicant has submitted a Preliminary Water Quality Management Plan (“PWQMP”), which establishes the Project’s compliance with storm water discharge/water quality

requirements. The PWQMP includes site design measures that capture runoff and pollutant transport by minimizing impervious surfaces and maximizes low impact development ("LID") best management practices ("BMPs"), such as retention and infiltration, biotreatment, and evapotranspiration. The PWQMP proposes the use of underground stormwater retention chambers where downstream landscape areas are limited and installation of stormwater drywells in detention areas. The applicant also proposes to install gravity separator devices for pretreatment of sediment, trash/litter, oil, and grease.

COMPLIANCE WITH THE ONTARIO PLAN: The proposed project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan (TOP). More specifically, the goals and policies of TOP that are furthered by the proposed project are as follows:

(1) City Council Goals.

- Invest in the Growth and Evolution of the City's Economy
- Operate in a Businesslike Manner
- Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
- Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in the New Model Colony

(2) Vision.

Distinctive Development:

➤ Development quality that is broadly recognized as distinctive and not exclusively tied to the general suburban character typical of much of Southern California.

(3) Governance.

Decision Making:

▪ Goal G1: Sustained decision-making that consistently moves Ontario towards its Vision by using The Ontario Plan as a framework for assessing choices.

➤ G1-2 Long-term Benefit. We require decisions to demonstrate and document how they add value to the community and support the Ontario Vision.

(4) Policy Plan (General Plan)

Land Use Element:

➤ LU1-1 Strategic Growth. We concentrate growth in strategic locations that help create place and identity, maximize available and planned infrastructure, and foster the development of transit.

➤ LU1-6 Complete Community: We incorporate a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, employers, workers and visitors have a wide spectrum of choices of where they can live, work, shop and recreate within Ontario. (Refer to Complete Community Section of Community Economics Element).

- Goal LU2: Compatibility between a wide range of uses.

➤ LU2-6: Infrastructure Compatibility: We require infrastructure to be aesthetically pleasing and in context with the community character.

Community Economics Element:

- Goal CE1: A complete community that provides for all incomes and stages of life.

- Goal CE2: A City of distinctive neighborhoods, districts, and corridors, where people choose to be.

➤ CE2-1 Development Projects. We require new development and redevelopment to create unique, high-quality places that add value to the community.

➤ CE2-2 Development Review. We require those proposing new development and redevelopment to demonstrate how their projects will create appropriately unique, functional and sustainable places that will compete well with their competition within the region.

➤ CE2-4 Protection of Investment. We require that new development and redevelopment protect existing investment by providing architecture and urban design of equal or greater quality.

➤ CE2-5 Private Maintenance. We require adequate maintenance, upkeep, and investment in private property because proper maintenance on private property protects property values.

Safety Element:

- Goal S1: Minimized risk of injury, loss of life, property damage and economic and social disruption caused by earthquake-induced and other geologic hazards.

➤ S1-1 Implementation of Regulations and Standards. We require that all new habitable structures be designed in accordance with the most recent California Building Code adopted by the City, including provisions regarding lateral forces and grading.

Community Design Element:

▪ Goal CD1: A dynamic, progressive city containing distinct neighborhoods and commercial districts that foster a positive sense of identity and belonging among residents, visitors, and businesses.

➤ CD1-1 City Identity. We take actions that are consistent with the City being a leading urban center in Southern California while recognizing the diverse character of our existing viable neighborhoods.

➤ CD1-2 Growth Areas. We require development in growth areas to be distinctive and unique places within which there are cohesive design themes.

➤ CD1-3 Neighborhood Improvement. We require viable existing residential and non-residential neighborhoods to be preserved, protected, and enhanced in accordance with our land use policies.

▪ Goal CD2: A high level of design quality resulting in public spaces, streetscapes, and developments that are attractive, safe, functional and distinct.

➤ CD2-1 Quality Architecture. We encourage all development projects to convey visual interest and character through:

- Building volume, massing, and height to provide appropriate scale and proportion;
- A true architectural style which is carried out in plan, section and elevation through all aspects of the building and site design and appropriate for its setting; and
- Exterior building materials that are visually interesting, high quality, durable, and appropriate for the architectural style.

➤ CD2-7 Sustainability. We collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials and construction techniques.

➤ CD2-8 Safe Design. We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintenance of visibility and accessibility, and use of lighting.

➤ CD2-9 Landscape Design. We encourage durable landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits.

➤ CD2-10 Surface Parking Areas. We require parking areas visible to or used by the public to be landscaped in an aesthetically pleasing, safe and environmentally sensitive manner. Examples include shade trees, pervious surfaces, urban run-off capture and infiltration, and pedestrian paths to guide users through the parking field.

➤ CD2-11 Entry Statements. We encourage the inclusion of amenities, signage and landscaping at the entry to neighborhoods, commercial centers, mixed use areas, industrial developments, and public places that reinforce them as uniquely identifiable places.

➤ CD2-12 Site and Building Signage. We encourage the use of sign programs that utilize complementary materials, colors, and themes. Project signage should be designed to effectively communicate and direct users to various aspects of the development and complement the character of the structures.

➤ CD2-13 Entitlement Process. We work collaboratively with all stakeholders to ensure a high degree of certainty in the efficient review and timely processing of all development plans and permits.

▪ Goal CD3: Vibrant urban environments that are organized around intense buildings, pedestrian and transit areas, public plazas, and linkages between and within developments that are conveniently located, visually appealing and safe during all hours.

➤ CD3-1 Design. We require that pedestrian, vehicular, bicycle and equestrian circulation on both public and private property be coordinated and designed to maximize safety, comfort and aesthetics.

➤ CD3-3 Building Entrances. We require all building entrances to be accessible and visible from adjacent streets, sidewalks or public open spaces.

➤ CD3-5 Paving. We require sidewalks and road surfaces to be of a type and quality that contributes to the appearance and utility of streets and public spaces.

➤ CD3-6 Landscaping. We utilize landscaping to enhance the aesthetics, functionality and sustainability of streetscapes, outdoor spaces and buildings.

▪ Goal CD5: A sustained level of maintenance and improvement of properties, buildings and infrastructure that protects the property values and encourages additional public and private investments.

➤ CD5-1 Maintenance of Buildings and Property. We require all public and privately owned buildings and property (including trails and easements) to be properly and consistently maintained.

➤ CD5-2 Maintenance of Infrastructure. We require the continual maintenance of infrastructure.

HOUSING ELEMENT COMPLIANCE: The project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE: The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land Use Compatibility Plan ("ALUCP"), establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. The proposed project is located within both the Airport Influence Area of Ontario International Airport and Airport Influence Area of Chino Airport and was evaluated and found to be consistent with the policies and criteria of the ALUCP, with conditions. Any special conditions of approval associated with uses in close proximity to the airport are included in the conditions of approval provided with the attached Resolution.

ENVIRONMENTAL REVIEW: The environmental impacts of this project were previously reviewed in conjunction with the Ontario Ranch Business Park Specific Plan (File No. PSP18-002), for which an Environmental Impact Report (SCH# 2019050018) was adopted by the City Council on September 15, 2020. This Application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of project approval and are incorporated herein by this reference.

CONDITIONS OF APPROVAL: See attached department reports.

TECHNICAL APPENDIX:

Surrounding Zoning and Land Use:

	<i>Existing Land Use</i>	<i>General Plan Designation</i>	<i>Zoning Designation</i>	<i>Specific Plan Land Use</i>

RESOLUTION NO.

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PMTT18-011 (TPM 20016), A TENTATIVE PARCEL MAP TO SUBDIVIDE 85.6 ACRES OF LAND INTO EIGHT PARCELS, LOCATED AT THE NORTHEAST CORNER OF MERRILL AND EUCLID AVENUES, WITHIN THE INDUSTRIAL AND BUSINESS PARK LAND USE DISTRICTS OF THE ONTARIO RANCH BUSINESS PARK SPECIFIC PLAN, AND MAKING FINDINGS IN SUPPORT THEREOF— APNS: 1054-011-01, 1054-011-02, 1054-011-04; 1054-021-01, 1054-021-02; 1054-271-01, 1054-271-02, 1054-271-03, 1054-281-01, 1054-281-02, AND 1054-281-03.

WHEREAS, Euclid Land Venture, LLC. ("Applicant") has filed an Application for the approval of a Tentative Parcel Map, File No. PMTT18-011 (TPM 20016), as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 85.6 acres of land generally located at the northeast corner of Merrill and Euclid Avenues, within the Industrial and Business Park land use districts of the Ontario Ranch Business Park Specific Plan; and

WHEREAS, the property to the north of the project site is currently developed with a plant nursery and dairy and is located within the SP (Specific Plan) / AG (Agricultural Overlay) zoning district (NMC West Mixed Use District of the Policy Plan Land Use Plan). The property to the south consists of developed lands with Chino Airport, located within the City of Chino. The property east of the project site is developed with a dairy and single-family residence and is located within the SP (Specific Plan)/AG (Agricultural Overlay) zoning district (Low-Medium Density Residential and Business Park districts of the Policy Plan Land Use Plan). The property to the west, across Euclid Avenue, is in the City of Chino and consists of vacant and residentially developed lands; and

WHEREAS, the Tentative Parcel Map proposes to subdivide 85.6 acres of land into eight parcels to facilitate the development of three industrial buildings and five business park buildings; and

WHEREAS, the Tentative Parcel Map was filed in conjunction with a Development Plan application (File No. PDEV18-036) to construct 105,624 square feet of business park and 1,447,123 square feet of industrial buildings; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act — Public Resources Code Section 21000 et seq. — (hereinafter referred to as "CEQA"); and

WHEREAS, the environmental impacts of this project were previously reviewed in conjunction with File No. PSP18-002, the Ontario Ranch Business Park Specific Plan for which an EIR (SCH# 2019050018) — (hereinafter referred to as "Certified EIR") was adopted by the City Council on September 15, 2020, and this Application introduces no new significant environmental impacts; and

WHEREAS, the City's "Local Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and act on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (hereinafter referred to as "ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on October 19, 2020, the Development Advisory Board of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date, voting to issue Decision No. DAB20-056, recommending the Planning Commission approve the Application; and

WHEREAS, on October 27, 2020, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: Environmental Determination and Findings. As the decision-making authority for the Project, the Planning Commission has reviewed and considered the information contained in the previous Certified EIR and supporting documentation. Based upon the facts and information contained in the previous Certified EIR and supporting documentation, the Planning Commission finds as follows:

(1) The environmental impacts of this project were previously reviewed in conjunction with File No. PSP18-002, the Ontario Ranch Business Park Specific Plan for which a Certified EIR was adopted by the City Council on September 15, 2020.

(2) The previous Certified EIR contains a complete and accurate reporting of the environmental impacts associated with the Project; and

(3) The previous Certified EIR was completed in compliance with CEQA and the Guidelines promulgated thereunder; and

(4) The previous Certified EIR reflects the independent judgment of the Planning Commission; and

(5) The proposed project will introduce no new significant environmental impacts beyond those previously analyzed in the previous Certified EIR, and all mitigation measures previously adopted with the Certified EIR, are incorporated herein by this reference.

SECTION 2: Subsequent or Supplemental Environmental Review Not Required. Based on the information presented to the Planning Commission, and the specific findings set forth in Section 1, above, the Planning Commission finds that the preparation of a subsequent or supplemental Certified EIR is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the

Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and.

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3: *Housing Element Compliance.* Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the decision-making authority for the Project, the Planning Commission finds that based on the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

SECTION 4: *Ontario International Airport Land Use Compatibility Plan (“ALUCP”) Compliance.* The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the ALUCP, establishing the Airport Influence Area for Ontario International Airport (hereinafter referred to as “ONT”), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the decision-making authority for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting

documentation against the ALUCP compatibility factors, including [1] Safety Criteria (ALUCP Table 2-2) and Safety Zones (ALUCP Map 2-2), [2] Noise Criteria (ALUCP Table 2-3) and Noise Impact Zones (ALUCP Map 2-3), [3] Airspace protection Zones (ALUCP Map 2-4), and [4] Overflight Notification Zones (ALUCP Map 2-5). As a result, the PLANNING COMMISSION, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ALUCP.

SECTION 5: Concluding Facts and Reasons. Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing, and upon the specific findings set forth in Section 1 through 4, above, the Planning Commission hereby concludes as follows:

(1) ***The proposed Tentative Tract/Parcel Map is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, and applicable area and specific plans, and planned unit developments.*** The proposed Tentative Parcel Map is located within the Business Park (0.6 FAR) and Industrial (0.55 FAR) land use districts of the Policy Plan Land Use Map, and the Business Park and Industrial zoning districts of the Ontario Ranch Business Park Specific Plan. The proposed subdivision is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, as the project will contribute to the establishment of “[a] dynamic, progressive city containing distinct neighborhoods and commercial districts that foster a positive sense of identity and belonging among residents, visitors, and businesses” (Goal CD1). Furthermore, the project will promote the City’s policy to “take actions that are consistent with the City being a leading urban center in Southern California while recognizing the diverse character of our existing viable neighborhoods” (Policy CD1-1 City Identity).

(2) ***The design or improvement of the proposed Tentative Tract/Parcel Map is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, and applicable specific plans and planned unit developments.*** The proposed Tentative Parcel Map is located within the Business Park (0.6 FAR) and Industrial (0.55 FAR) land use districts of the Policy Plan Land Use Map, and the Business Park and Industrial zoning districts of the Ontario Ranch Business Park Specific Plan. The proposed design or improvement of the subdivision is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, as the project will provide “[a] high level of design quality resulting in public spaces, streetscapes, and developments that are attractive, safe, functional and distinct (Goal CD2). Furthermore, the project will promote the City’s policy to “collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping and buildings to reduce energy demand

through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials and construction techniques” (Policy CD2-7 Sustainability).

(3) ***The site is physically suitable for the type of development proposed.*** The project site meets the minimum lot area and dimensions of the Business Park and Industrial zoning districts of the Ontario Ranch Business Park Specific Plan, and is physically suitable for the type of industrial development proposed in terms of zoning, land use and development activity proposed, and existing and proposed site conditions.

(4) ***The site is physically suitable for the density/intensity of development proposed.*** The project site is proposed for industrial development at a floor area ratio of up to 0.45 FAR for the Business Park land use district and 0.54 FAR for the Industrial land use district, per the provisions of the previously-approved Ontario Ranch Business Park Specific Plan Certified EIR. The project site meets the minimum lot area and dimensions of the Business Park and Industrial zoning districts of the Ontario Ranch Business Park Specific Plan and is physically suitable for this proposed intensity of development.

(5) ***The design of the subdivision or the proposed improvements thereon, are not likely to cause substantial environmental damage, or substantially and avoidably injure fish or wildlife, or their habitat.*** The project site is not located in an area that has been identified as containing species identified as a candidate, sensitive, or special status species in local or regional plans, policies or regulations or by the California Department of Fish and Wildlife or the U.S. Fish and Wildlife Service, nor does the site contain any riparian habitat or other sensitive natural community, and no wetland habitat is present on site; therefore, the design of the subdivision, or improvements proposed thereon, are not likely to cause substantial environmental damage, or substantially and avoidably injure fish or wildlife, or their habitat.

(6) ***The design of the subdivision, or the type of improvements thereon, are not likely to cause serious public health problems.*** The design of the proposed subdivision, and the business park and industrial improvements existing or proposed on the project site, are not likely to cause serious public health problems, as The project is not anticipated to involve the transport, use, or disposal of hazardous materials during either construction or project implementation, include the use of hazardous materials or volatile fuels, nor are there any known stationary commercial or industrial land uses within close proximity to the subject site that use/store hazardous materials to the extent that they would pose a significant hazard to visitors or occupants to the project site.

(7) ***The design of the subdivision, or the type of improvements thereon, will not conflict with easements acquired by the public at large for access through, or use of property within, the proposed subdivision.*** The proposed subdivision has

provided for all necessary public easements and dedications for access through, or use of property within, the proposed subdivision. Furthermore, all such public easements and dedications have been designed pursuant to: (a) the requirements of the Policy Plan component of The Ontario Plan and applicable area plans; (b) applicable specific plans or planned unit developments; (c) applicable provisions of the City of Ontario Development Code; (d) applicable master plans and design guidelines of the City; and (e) applicable Standard Drawings of the City.

SECTION 6: *Planning Commission Action.* Based upon the findings and conclusions set forth in Sections 1 through 5, above, the Planning Commission hereby APPROVES the herein described Application, subject to each and every condition set forth in the Department reports attached hereto as “Attachment A,” and incorporated herein by this reference.

SECTION 7: *Indemnification.* The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 8: *Custodian of Records.* The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East “B” Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 9: *Certification to Adoption.* The Secretary shall certify to the adoption of the Resolution.

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a regular meeting thereof held on the 27th day of October 2020, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

Jim Willoughby
Planning Commission Chairman

Project Description: A Parcel Map (File No. PMTT18-011, TPM20016) to subdivide 85.6 acres of land into eight parcels, located at the northeast corner of Merrill and Euclid Avenues, within the Industrial and Business Park land use districts of the Ontario Ranch Business Park Specific Plan (APNs: 1054-011-01, 1054-011-02, 1054-011-04; 1054-021-01, 1054-021-02; 1054-271-01, 1054-271-02, 1054-271-03, 1054-281-01, 1054-281-02, and 1054-281-03); **submitted by Euclid Land Venture, LLC.**

Prepared By: Alexis Vaughn, Assistant Planner
Phone: 909.395.2416 (direct)
Email: avaughn@ontarioca.gov

The Planning Department, Land Development Section, conditions of approval applicable to the above-described Project, are listed below. The Project shall comply with each condition of approval listed below:

1.0 Standard Conditions of Approval. The project shall comply with the *Standard Conditions for New Development*, adopted by City Council Resolution No. 2017-027 on April 18, 2017. A copy of the *Standard Conditions for New Development* may be obtained from the Planning Department or City Clerk/Records Management Department.

2.0 Special Conditions of Approval. In addition to the *Standard Conditions for New Development* identified in condition no. 1.0, above, the project shall comply with the following special conditions of approval:

2.1 Time Limits.

(a) Tentative Parcel/Tract Map approval shall become null and void 2 years following the effective date of application approval, unless the final parcel/tract map has been recorded, or a time extension has been approved by the Planning Commission pursuant to Development Code Section 2.02.025 (Time Limits and Extensions). This Permit does not supersede any individual time limits specified herein for performance of specific conditions or improvements.

2.2 Subdivision Map.

(a) The Final Parcel Map shall be in conformance with the approved Tentative Parcel Map on file with the City. Variations from the approved Tentative Parcel Map may be reviewed and approved by the Planning Department. A substantial variation from the approved Tentative Parcel Map may require review and approval by the Planning Commission, as determined by the Planning Director.

(b) Tentative Parcel Map approval shall be subject to all conditions, requirements and recommendations from all other departments/agencies provided on the attached reports/memorandums.

(c) Pursuant to California Government Section 66474.9, the subdivider agrees that it will defend, indemnify, and hold harmless the City of Ontario or its agents, officers and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer of this subdivision, which action is brought within the time period provided for in Government Code Section 66499.37. The City of Ontario shall promptly notify the subdivider of any such claim, action or proceeding and the City of Ontario shall cooperate fully in the defense.

2.3 General Requirements. The Project shall comply with the following general requirements:

(a) All construction documentation shall be coordinated for consistency, including, but not limited to, architectural, structural, mechanical, electrical, plumbing, landscape and irrigation, grading, utility and street improvement plans. All such plans shall be consistent with the approved entitlement plans on file with the Planning Department.

(b) The project site shall be developed in conformance with the approved plans on file with the City. Any variation from the approved plans must be reviewed and approved by the Planning Department prior to building permit issuance.

(c) The herein-listed conditions of approval from all City departments shall be included in the construction plan set for project, which shall be maintained on site during project construction.

2.4 Landscaping.

(a) The Project shall provide and continuously maintain landscaping and irrigation systems in compliance with the provisions of Ontario Development Code Division 6.05 (Landscaping).

(b) Comply with the conditions of approval of the Planning Department; Landscape Planning Division.

(c) Landscaping shall not be installed until the Landscape and Irrigation Construction Documentation Plans required by Ontario Development Code Division 6.05 (Landscaping) have been approved by the Landscape Planning Division.

(d) Changes to approved Landscape and Irrigation Construction Documentation Plans, which affect the character or quantity of the plant material or irrigation system design, shall be resubmitted for approval of the revision by the Landscape Planning Division, prior to the commencement of the changes.

2.5 Walls and Fences. All Project walls and fences shall comply with the requirements of Ontario Development Code Division 6.02 (Walls, Fences and Obstructions).

2.6 Parking, Circulation and Access.

(a) The Project shall comply with the applicable off-street parking, loading and lighting requirements of City of Ontario Development Code Division 6.03 (Off-Street Parking and Loading).

(b) All drive approaches shall be provided with an enhanced pavement treatment. The enhanced paving shall extend from the back of the approach apron, into the site, to the first intersecting drive aisle or parking space.

(c) Areas provided to meet the City's parking requirements, including off-street parking and loading spaces, access drives, and maneuvering areas, shall not be used for the outdoor storage of materials and equipment, nor shall it be used for any other purpose than parking.

(d) The required number of off-street parking spaces and/or loading spaces shall be provided at the time of site and/or building occupancy. All parking and loading spaces shall be maintained in good condition for the duration of the building or use.

(e) Parking spaces specifically designated and conveniently located for use by the physically disabled shall be provided pursuant to current accessibility regulations contained in State law (CCR Title 24, Part 2, Chapters 2B71, and CVC Section 22507.8).

(f) Bicycle parking facilities, including bicycle racks, lockers, and other secure facilities, shall be provided in conjunction with development projects pursuant to current regulations contained in CALGreen (CAC Title 24, Part 11).

2.7 Covenants, Conditions and Restrictions (CC&Rs)/Mutual Access and Maintenance Agreements.

(a) CC&Rs shall be prepared for the Project and shall be recorded prior to the issuance of a building permit.

(b) The CC&Rs shall be in a form and contain provisions satisfactory to the City. The articles of incorporation for the property owners association and the CC&Rs shall be reviewed and approved by the City.

(c) CC&Rs shall ensure reciprocal parking and access between parcels, and common maintenance of:

- (i)** Landscaping and irrigation systems within common areas;
- (ii)** Landscaping and irrigation systems within parkways adjacent to the project site, including that portion of any public highway right-of-way between the property line or right-of-way boundary line and the curb line and also the area enclosed within the curb lines of a median divider (Ontario Municipal Code Section 7-3.03), pursuant to Ontario Municipal Code Section 5-22-02;
- (iii)** Shared parking facilities and access drives; and
- (iv)** Utility and drainage easements.

(d) CC&Rs shall include authorization for the City's local law enforcement officers to enforce City and State traffic and penal codes within the project area.

(e) The CC&Rs shall grant the City of Ontario the right of enforcement of the CC&R provisions.

(f) A specific methodology/procedure shall be established within the CC&Rs for enforcement of its provisions by the City of Ontario, if adequate maintenance of the development does not occur, such as, but not limited to, provisions that would grant the City the right of access to correct maintenance issues and assess the property owners association for all costs incurred.

2.8 Environmental Review.

(a) The environmental impacts of this project were previously reviewed in conjunction with File No. PSP18-002, the Ontario Ranch Business Park Specific Plan for which an EIR (SCH# 2019050018) was previously adopted by the City Council on September 15, 2020. This application introduces no new significant environmental impacts. The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. The previously adopted mitigation measures shall be a condition of project approval, and are incorporated herein by this reference.

(b) If human remains are found during project grading/excavation/construction activities, the area shall not be disturbed until any required investigation is completed by the County Coroner and Native American consultation has been completed (if deemed applicable).

(c) If any archeological or paleontological resources are found during project grading/excavation/construction, the area shall not be disturbed until the significance of the resource is determined. If determined to be significant, the resource shall be recovered by a qualified archeologist or paleontologist consistent with current standards and guidelines, or other appropriate measures implemented.

2.9 Indemnification. The applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer. The City of Ontario shall promptly notify the applicant of any such claim, action or proceeding, and the City of Ontario shall cooperate fully in the defense.

2.10 Additional Fees.

(a) Within 5 days following final application approval, the Notice of Determination (NOD) filing fee shall be provided to the Planning Department. The fee shall be paid by check, made payable to the "Clerk of the Board of Supervisors", which shall be forwarded to the San Bernardino County Clerk of the Board of Supervisors, along with all applicable environmental forms/notices, pursuant to the requirements of the California Environmental Quality Act (CEQA). Failure to provide said fee within the time specified may result in a 180-day extension to the statute of limitations for the filing of a CEQA lawsuit.

(b) After the Project's entitlement approval, and prior to issuance of final building permits, the Planning Department's Plan Check and Inspection fees shall be paid at the rate established by resolution of the City Council.

2.11 Additional Requirements.

(a) Tract Map File No. PMTT18-011 approval is contingent on Planning Commission approval of related Development Plan File No PDEV18-036 and Development Agreement File No PDA19-001.

(b) All mitigation and monitoring reports required as part of the Ontario Ranch Business Park Specific Plan EIR shall be submitted to the designated departments as per the listed schedule, prior to permit issuance.

THIS PROJECT SHALL COMPLY WITH THE REQUIREMENTS SET FORTH IN THE GENERAL STANDARD CONDITIONS OF APPROVAL ADOPTED BY THE CITY COUNCIL (RESOLUTION NO. 2017-027) AND THE PROJECT SPECIFIC CONDITIONS OF APPROVAL SPECIFIED IN HEREIN. ONLY APPLICABLE CONDITIONS OF APPROVAL ARE CHECKED. THE APPLICANT SHALL BE RESPONSIBLE FOR THE COMPLETION OF ALL APPLICABLE CONDITIONS OF APPROVAL PRIOR TO PARCEL MAP APPROVAL, ISSUANCE OF PERMITS AND/OR OCCUPANCY CLEARANCE, AS SPECIFIED IN THIS REPORT.

1. PRIOR TO PARCEL MAP APPROVAL, APPLICANT SHALL: Check When Complete

- 1.01 Dedicate to the City of Ontario, the right-of-way in fee simple, described below:
 1. Merrill Avenue to the ultimate half street right-of-way width of 54 feet along the project frontage
 2. Eucalyptus Avenue to the ultimate half street right-of-way width of 54 feet along the project frontage
 3. An additional 35' from the ultimate right-of-way of Euclid Avenue along the project frontage for a 50' neighborhood edge
 4. An additional 23' from the ultimate right-of-way of Merrill Avenue along the project frontage for a 35' neighborhood edge
 5. An additional 23' from the ultimate right-of-way of Eucalyptus Avenue along the project frontage for a 35' neighborhood edge
 6. Property line corner 'cut-back' required at all street intersections within the project boundaries

- 1.02 Dedicate to the City of Ontario, the following easement(s): _____

- 1.03 Restrict vehicular access to the site as follows: _____
- 1.04 Vacate the following street(s) and/or easement(s):
 1. All interfering on-site easements shall be quitclaimed, vacated, and/or submit non-interference letter from affected owner/utility company. See COA 1.14-3.

- 1.05 Submit a copy of a recorded private reciprocal use agreement or easement. The agreement or easement shall ensure, at a minimum, common ingress and egress and joint maintenance of all common access areas and drive aisles.

- 1.06 Provide (original document) Covenants, Conditions and Restrictions (CC&Rs) as applicable to the project and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&Rs shall provide for, but not be limited to, common ingress and egress, joint maintenance responsibility for all common access improvements, common facilities, parking areas, utilities, median and landscaping improvements and drive approaches, in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project. The CC&Rs shall also address the maintenance and repair responsibility for public improvements/utilities (sewer, water, storm drain, recycled water, etc.) located within open space/easements. In the event of any maintenance or repair of these facilities, the City shall only restore disturbed areas to current City Standards.

- 1.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at <http://tceplumecleanup.com/>), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658.

- 1.08 File an application for Reapportionment of Assessment, together with payment of a reapportionment processing fee, for each existing assessment district listed below. Contact the Financial Services Department at (909) 395-2124 regarding this requirement.
- (1) _____
- (2) _____
- 1.09 Prepare a fully executed Subdivision Agreement (on City approved format and forms) with accompanying security as required, or complete all public improvements.
- 1.10 Provide a monument bond (i.e. cash deposit) in an amount calculated by the City's approved cost estimate spreadsheet (available for download on the City's website: www.ci.ontario.ca.us) or as specified in writing by the applicant's Registered Engineer or Licensed Land Surveyor of Record and approved by the City Engineer, whichever is greater.
- 1.11 Provide a preliminary title report current to within 30 days.
- 1.12 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2353 to initiate the CFD application process.
- 1.13 **New Model Colony (NMC) Developments:**
- 1) Provide evidence of final cancellation of Williamson Act contracts associated with this tract, prior to approval of any final subdivision map. Cancellation of contracts shall have been approved by the City Council.
- 2) Provide evidence of sufficient storm water capacity availability equivalents (Certificate of Storm Water Treatment Equivalents).
- 3) Provide evidence of sufficient water availability equivalents (Certificate of Net MDD Availability).
- 1.14 **Other conditions:**
- 1. Provide private easements for utilities, cross lot drainage, blanket emergency access and reciprocal access across all parcels in favor of all parcels (as needed).
- 2. The Parcel Map shall comply with the approved Ontario Ranch Business Park Specific Plan, the Development Agreement and the Conditions of Approval for this Tentative Parcel Map.
- 3. Applicant/developer shall obtain all off-site right-of-way/easements necessary to construct the required public improvements identified within Section 2 of these Conditions of Approval.

2. PRIOR TO ISSUANCE OF ANY PERMITS, APPLICANT SHALL:

**A. GENERAL
 (Permits includes Grading, Building, Demolition and Encroachment)**

- 2.01 Record Parcel Map No. 20016 pursuant to the Subdivision Map Act and in accordance with the City of Ontario Municipal Code.
- 2.02 Submit a duplicate photo mylar of the recorded map to the City Engineer's office.

- 2.03 Note that the subject parcel is a recognized parcel in the City of Ontario per _____
- 2.04 Note that the subject parcel is an 'unrecognized' parcel in the City of Ontario and shall require a Certificate of Compliance to be processed unless a deed is provided confirming the existence of the parcel prior to the date of _____
- 2.05 Apply for a: Certificate of Compliance with a Record of Survey; Lot Line Adjustment
 Make a Dedication of Easement.
- 2.06 Provide (original document) Covenants, Conditions and Restrictions (CC&R's), as applicable to the project, and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&R's shall provide for, but not be limited to, common ingress and egress, joint maintenance of all common access improvements, common facilities, parking areas, utilities and drive approaches in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project.
- 2.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at <http://tceplumecleanup.com/>), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658.
- 2.08 **Submit a soils/geology report.**
- 2.09 **Other Agency Permit/Approval: Submit a copy of the approved permit and/or other form of approval of the project from the following agency or agencies:**
 - State of California Department of Transportation (Caltrans) – for any improvements encroaching into their right-of-way on Euclid Ave (State Route 83)**
 - San Bernardino County Road Department (SBCRD)
 - San Bernardino County Flood Control District (SBCFCD)
 - Federal Emergency Management Agency (FEMA)
 - Cucamonga Valley Water District (CVWD) for sewer/water service
 - United States Army Corps of Engineers (USACE)
 - California Department of Fish & Game
 - Inland Empire Utilities Agency (IEUA) – for sewer connection at Kimball & Euclid Aves and the recycled water connection at Eucalyptus & Sultana Aves and Eucalyptus & Euclid Aves**
 - Other:**
 - **County of San Bernardino Department of Airport – for any improvements encroaching into their property**
 - **City of Chino – for any improvements encroaching into their right-of-way**
- 2.10 Dedicate to the City of Ontario the right-of-way described below:
 _____ feet on _____
 Property line corner 'cut-back' required at the intersection of _____
 and _____
- 2.11 Dedicate to the City of Ontario the following easement(s): _____

- 2.12 New Model Colony (NMC) Developments:**
 - 1) Submit a copy of the permit from the San Bernardino County Health Department to the Engineering Department and the Ontario Municipal Utilities Company (OMUC) for the destruction/abandonment of the on-site water well. The well shall be destroyed/abandoned in accordance with the San Bernardino County Health Department guidelines.**
 - 2) Make a formal request to the City of Ontario Engineering Department for the proposed temporary use of an existing agricultural water well for purposes other than agriculture, such as grading, dust control, etc. Upon approval, the Applicant shall enter into an agreement with the City of Ontario and pay any applicable fees as set forth by said agreement.**
 - 3) Design proposed retaining walls to retain up to a maximum of three (3) feet of earth. In no case shall a wall exceed an overall height of nine (9) feet (i.e. maximum 6-foot high wall on top of a maximum 3-foot high retaining wall.**
- 2.13** Submit a security deposit to the Engineering Department to guarantee construction of the public improvements required herein valued at _____% of the approved construction cost estimate. Security deposit shall be in accordance with the City of Ontario Municipal Code. Security deposit will be eligible for release, in accordance with City procedure, upon completion and acceptance of said public improvements.
- 2.14** The applicant/developer shall submit all necessary survey documents prepared by a Licensed Surveyor registered in the State of California detailing all existing survey monuments in and around the project site. These documents are to be reviewed and approved by the City Survey Office.
- 2.15** Pay all Development Impact Fees (DIF) to the Building Department. Storm Drain Development Impact Fee, approximately \$3,367,196, shall be paid to the Building Department. Final fee shall be determined based on the approved site plan.
- 2.16** Other conditions: _____

B. PUBLIC IMPROVEMENTS
 (See attached Exhibit 'A' for plan check submittal requirements.)

2.17 Design and construct full public improvements in accordance with the City of Ontario Municipal Code, current City standards and specifications, master plans and the adopted specific plan for the area, if any. These public improvements shall include, but not be limited to, the following (checked boxes):

Improvement	Merrill Avenue	Eucalyptus Avenue	Sultana Avenue	Euclid Avenue
Curb and Gutter	<input checked="" type="checkbox"/> New; 42 ft. from C/L <input type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace	<input checked="" type="checkbox"/> New; 42 ft. from C/L <input type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace	<input checked="" type="checkbox"/> New; 24 ft. from C/L <input type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace	<input checked="" type="checkbox"/> New; 52 ft. from C/L <input type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace

Removal of Improvements	_____ _____ _____	_____ _____ _____	_____ _____ _____	_____ _____ _____
Other Improvements	_____ _____ _____	_____ _____ _____	_____ _____ _____	_____ _____ _____

Specific notes for improvements listed in item no. 2.17, above:

- A. Pavement widening will be required on the south side within the City of Chino. Coordinate with the City on those requirements. Please note, if the existing Merrill Ave pavement is not consistent with current pavement standards, it will be required to be removed and replaced to be brought up to current standards.
- B. A 14' circulation lane and a 5' paved shoulder are required on the north side. Please note, if the existing Eucalyptus Ave pavement is not consistent with current pavement standards, it will be required to be removed and replaced to be brought up to current standards.
- C. A 14' circulation lane and a 5' paved shoulder are required on the east side.

- D. If the existing Euclid Ave pavement is not consistent with current pavement standards, it will be required to be removed and replaced to be brought up to current standards.
- E. The location and number of proposed drive approaches are to be reviewed and approved by Caltrans.
- F. Includes neighborhood edge.
- G. These improvements are partially in the City of Ontario and City of Chino.
- H. All master planned utilities shall be designed and installed to the ultimate condition.

- 2.18 Construct a 2" asphalt concrete (AC) grind and overlay on the following street(s): _____
- 2.19 Reconstruction of the full pavement structural section, per City of Ontario Standard Drawing number 1011, may be required based on the existing pavement condition and final street design. Minimum limits of reconstruction shall be along property frontage, from street centerline to curb/gutter.
- 2.20 Make arrangements with the Cucamonga Valley Water District (CVWD) to provide water service sewer service to the site. This property is within the area served by the CVWD and Applicant shall provide documentation to the City verifying that all required CVWD fees have been paid.
- 2.21 Overhead utilities shall be under-grounded, in accordance with Title 7 of the City's Municipal Code (Ordinance No. 2804 and 2892).
- 2.22 Other conditions: _____

C. SEWER

- 2.23 A _____ inch sewer main is available for connection by this project in _____ (Ref: Sewer plan bar code: _____)
- 2.24 Design and construct a sewer main extension. A sewer main is not available for direct connection. The closest main is approximately 5,280 feet away.
- 2.25 Submit documentation that shows expected peak loading values for modeling the impact of the subject project to the existing sewer system. The project site is within a deficient public sewer system area. Applicant shall be responsible for all costs associated with the preparation of the model. Based on the results of the analysis, Applicant may be required to mitigate the project impact to the deficient public sewer system, including, but not limited to, upgrading of existing sewer main(s), construction of new sewer main(s) or diversion of sewer discharge to another sewer.
- 2.26 Other conditions:

Design and install Master Plan Sewer Improvements per Exhibits E and F of the Development Agreement as follows:

- A. Install a Master Plan 21-inch sewer main in Euclid Ave between Eucalyptus Ave and Merrill Ave.
- B. Install a Master Plan 30-inch sewer main in Merrill Ave between Sultana Ave and Euclid Ave.
- C. Install a Master Plan 36-inch sewer main in Euclid Avenue between Merrill Avenue and Kimball Avenue with a connection to the existing 60-inch or 54-inch IEUA Kimball Interceptor Trunk Sewer main at Kimball Ave.
- D. Install an 8-inch sewer main in Sultana Ave from the point of connection for Parcel 8 to Merrill Ave.
- E. The Sultana Ave sewer main design shall follow the TPM 20016 Sanitary Sewer Analysis, dated 07/14/2020, and any deviation from this design shall require the Sewer Analysis to be updated and resubmitted to OMUC for review and approval.
- F. The proposed sewer point of connection for this Parcel map is in Kimball Ave to the 60-inch or 54-inch IEUA Kimball Interceptor Trunk Sewer main. The proposed sewer connection requires approval of a new sewer Regional Connection from the Inland Empire Utilities Agency (IEUA). The applicant must satisfy the following requirements for the proposed Sewer System Point of Connection:
 - i. Regional Connection Approval: The applicant shall submit a written request letter to the City for a new Regional Sewer Connection. The request letter shall include:

an exhibit that shows the tributary area of the Regional Connection; the proposed sewer system main connection through the proposed Regional Connection; IEUA record drawing number, station number and manhole number or the connection point; and a plan and profile detail of the manhole connection and any modification proposed to the manhole. Once received from the applicant, the City will request the new Regional Connection from IEUA. If approved by IEUA, the applicant shall be responsible for meeting all terms, conditions, standards, and requirements IEUA has for the Regional Connection.

- G. Each occupant of the building, or units, shall apply for a Wastewater Discharge Permit for their Establishment, and shall comply with all the requirements of their Wastewater Discharge Permit. Requirements of Wastewater Discharge Permit may include, but not limited to including possibly installing a monitoring manhole, clarifier, or other sewer pretreatment equipment.

D. WATER

- 2.27 A _____ inch water main is available for connection by this project in _____ (Ref: Water plan bar code: _____)
- 2.28 Design and construct a water main extension. A water main is not available for direct connection. The closest main is approximately 13,200 feet away.
- 2.29 Other conditions:

Unless otherwise indicated, design and install Master Plan Potable Water Improvements per Exhibits E and F of the Development Agreement as follows:

- A. Install a Master Plan 24-inch 925 PZ potable water main in Eucalyptus Ave between Carpenter Ave and Grove Ave with a connection to the existing 24-inch 925 PZ potable water main in Eucalyptus Ave.
- B. Install a Master Plan 16-inch 925 PZ potable water main in Eucalyptus Ave between Grove Ave and Euclid Ave.
- C. Install a Master Plan 16-inch 925 PZ potable water main in Euclid Ave between Eucalyptus Ave and Merrill Ave.
- D. Install a Master Plan 16-inch 925 PZ potable water main in Merrill Avenue between Euclid Avenue and Walker Avenue.
- E. Install a Master Plan 16-inch 925 PZ potable water main in Walker Ave between Merrill Ave and Eucalyptus Ave.
- F. Install a Master Plan 30" to 42" 925 PZ potable water main in Grove Ave between Eucalyptus Ave and Chino Ave.
- G. Install a Master Plan 18-inch 1010 PZ potable water main in Chino Ave between Grove Ave and the Cucamonga Creek Channel with a connection to the existing 18-inch 1010 PZ potable water main just west of the Cucamonga Creek Channel.
- H. Install an Interim 1010 PZ to 925 PZ pressure reducing station at the intersection of Grove Ave and Chino Ave.
- I. Phase 2 Water Infrastructure Improvements North of Chino Avenue: The following potable water mains/facilities (final alignments subject to change) are required by the Project, but the Project shall contribute towards the design and construction as described within the Development Agreement:
 - i. Install a Master Plan 42-inch 925 PZ Potable Water main in Grove Avenue between Chino Avenue and Francis Avenue.
 - ii. Install a Master Plan 42-inch 925 PZ Potable Water main in Francis Avenue between Grove Avenue and Bon View Avenue.
 - iii. Install a Master Plan 42-inch 925 PZ Potable Water main in Bon View Avenue between Francis Avenue and Bon View Reservoir Site.
 - iv. Install a Master Plan 9-million gallon reservoir on the Bon View Reservoir Site, two 2,500 GPM groundwater production wells with any treatment necessary to meet water quality standards, and the 16-inch and 24-inch collection mains from the wells to the reservoirs.
- J. Existing 30-inch IEUA Recycled Water main in Eucalyptus Avenue: Pursuant to the Ontario Ranch Business Park Utilities System Map, dated 09/14/2020, the project shall ensure that the PW line maintains all minimum cover and separation requirements from the existing IEUA RW line, especially at PW crossings of the IEUA RW line. This may entail adjusting the vertical alignment of the existing IEUA RW line or the proposed

street grades subject to the approval of the City Engineer and IEUA.

E. RECYCLED WATER

- 2.30 A _____ inch recycled water main is available for connection by this project in _____. (Ref: Recycled Water plan bar code: _____)
- 2.31 **Design and construct an on-site recycled water system for this project. A recycled water main does exist in the vicinity of this project.**
- 2.32 Design and construct an on-site recycled water ready system for this project. A recycled water main does not currently exist in the vicinity of this project, but is planned for the near future. If Applicant would like to connect to this recycled water main when it becomes available, the cost for the connection shall be borne solely by the Applicant.
- 2.33 **Submit two (2) hard copies and one (1) electronic copy, in PDF format, of the Engineering Report (ER), for the use of recycled water, to the OMUC for review and subsequent submittal to the California Department of Public Health (CDPH) for final approval.**

Note: The OMUC and the CDPH review and approval process will be approximately three (3) months. Contact the Ontario Municipal Utilities Company at (909) 395-2647 regarding this requirement.

- 2.34 **Other conditions:**

Design and install Master Plan Recycled Water Improvements per Exhibits E and F of the Development Agreement as follows:

- A. **Install a Master Plan 8-inch 930 PZ recycled water main in Euclid Ave between Eucalyptus Ave and Merrill Ave with a connection to the existing 30-inch IEUA Recycled Water main in Eucalyptus Ave.**
- B. **Install a Master Plan 8-inch 930 PZ recycled water main in Merrill Ave between Euclid Ave and Sultana Ave.**
- C. **Install an 8-inch 930 PZ recycled water main in Sultana Ave between Merrill Ave and Eucalyptus Ave with a connection to the existing 30-inch IEUA recycled water main in Eucalyptus Ave.**

F. TRAFFIC / TRANSPORTATION

- 2.35 Submit a focused traffic impact study, prepared and signed by a Traffic/Civil Engineer registered in the State of California. The study shall address, but not be limited to, the following issues as required by the City Engineer:
 - 1. On-site and off-site circulation
 - 2. Traffic level of service (LOS) at 'build-out' and future years
 - 3. Impact at specific intersections as selected by the City Engineer
- 2.36 **New traffic signal installations shall be added to Southern California Edison (SCE) customer account number # 2-20-044-3877.**
- 2.37 **Other conditions:**
 - A. **Euclid Ave (State Route 83) is under the jurisdiction of the California Department of Transportation (Caltrans). The Applicant/Developer is solely responsible to ascertain Caltrans requirements for Project approval and permit issuance.**
 - B. **Perform all mitigation measures and operational improvements in accordance with the Traffic Impact Analysis by Urban Crossroads dated July 24, 2019, and to the satisfaction of the City Engineer.**
 - C. **Design and construct new traffic signal on Sultana Ave at Eucalyptus Ave and Merrill Ave. The new traffic signal shall include video detection, CCTV, interconnect cable and conduit, emergency vehicle preemption systems and bicycle detection to the satisfaction of the City Engineer. All new signal equipment shall be installed at its ultimate location.**
 - D. **Design and construct modifications to the existing traffic signal on Euclid Ave at Eucalyptus Ave and Euclid Ave at Merrill Ave. The traffic signal modification shall address relocation of any equipment including video detection, CCTV, interconnect**

- cable and conduit, emergency vehicle preemption systems, and bicycle detection to the satisfaction of the City Engineer. All new signal equipment shall be installed at its ultimate location.
- E. Euclid Ave and Merrill Ave are designated truck routes in the City of Ontario. The Applicant/Developer shall be responsible to design and construct concrete pavement at the following intersections in accordance with City of Ontario Standard Drawing No. 1207:
 - i. Euclid Ave at Eucalyptus Ave
 - ii. Euclid Ave at Merrill Ave
 - F. Proposed driveways on Euclid Ave shall be restricted to right-in/right-out access only. On-site signage and pavement markings shall be provided for driveway access restrictions.
 - G. Design and construct all driveway approaches in accordance with City of Ontario Standard Drawing No. 1204 for Commercial Driveway Approach. No decorative concrete shall be allowed in the public street right-of-way.
 - H. Design and construct a bus pad to serve future stop on the south side of Eucalyptus Ave, east of Euclid Ave. Pad shall be designed in accordance with Omnitrans requirements and to the satisfaction of the City Engineer.
 - I. Design and construct a bus pad to serve future stop on the north side of Merrill Avenue, West of Sultana Avenue. Pad shall be designed in accordance with Omnitrans requirements and to the satisfaction of the City Engineer.
 - J. Design and construct a bus turnout on the east side Euclid Ave, north of Merrill Ave. Bus turnout shall be designed in accordance with Omnitrans requirements and to the satisfaction of the City Engineer.
 - K. Engineer-of-record shall meet with City Engineering staff prior to starting signing and striping, traffic signal, and street lighting design.
 - L. The applicant/developer shall obtain all rights-of-way necessary to construct all required improvements.
 - M. All landscaping, block walls, and other obstructions shall be compatible with the stopping sight distance requirements per City of Ontario Standard Drawing No. 1309.

G. DRAINAGE / HYDROLOGY

- 2.38 A _____ inch storm drain main is available to accept flows from this project in _____.
 (Ref: Storm Drain plan bar code: _____)
- 2.39 Submit a hydrology study and drainage analysis, prepared and signed by a Civil Engineer registered in the State of California. The study shall be prepared in accordance with the San Bernardino County Hydrology Manual and City of Ontario standards and guidelines. Additional drainage facilities, including, but not limited to, improvements beyond the project frontage, may be required to be designed and constructed, by Applicant, as a result of the findings of this study.
- 2.40 An adequate drainage facility to accept additional runoff from the site does not currently exist downstream of the project. Design and construct a storm water detention facility on the project site. 100 year post-development peak flow shall be attenuated such that it does not exceed 80% of pre-development peak flows, in accordance with the approved hydrology study and improvement plans.
- 2.41 Submit a copy of a recorded private drainage easement or drainage acceptance agreement to the Engineering Department for the acceptance of any increase to volume and/or concentration of historical drainage flows onto adjacent property, prior to approval of the grading plan for the project.
- 2.42 Comply with the City of Ontario Flood Damage Prevention Ordinance (Ordinance No. 2409). The project site or a portion of the project site is within the Special Flood Hazard Area (SFHA) as indicated on the Flood Insurance Rate Map (FIRM) and is subject to flooding during a 100 year frequency storm. The site plan shall be subject to the provisions of the National Flood Insurance Program.

2.43 Other conditions:

Design and construct Master Plan Storm Drain Improvements per Exhibits E and F of the Development Agreement as follows:

- A. Design and construct a 9.5'x 9.5' RCB storm drain line on Merrill Ave from Euclid Ave to Sultana Ave consistent with the Master Plan of Drainage.
- B. Design and construct a 66" to 90" storm drain line on Eucalyptus Ave from Euclid Ave to Sultana Ave consistent with the Master Plan of Drainage.
- C. Design and construct a 30" storm drain line on Sultana Ave from Eucalyptus Ave to Merrill Ave.
- D. Design and construct a 108" storm drain line on Euclid Ave from Eucalyptus Ave to Merrill Ave consistent with the Master Plan of Drainage.
- E. Pay an in-lieu fee of \$2,446,191 for the construction of the ultimate storm drain improvements on Euclid Ave south of Merrill Ave.
- F. Mitigate flooding of existing storm drain facilities downstream of the project site, in the City of Chino, caused by the project, to the satisfaction and approval of the City of Chino and City of Ontario.
- G. Applicant/Developer shall be responsible for the plan and profile drawings of the ultimate storm drain improvements on Euclid Ave from Merrill Ave to ultimate point of connection south to Pine Avenue, in the City of Chino, to the satisfaction of the City Engineer.
- H. Design and construct storm drain bleeder line or alternative interim connection at the discretion of the City on Euclid Ave south of Merrill Ave. This shall connect to the storm drain lines on Merrill Ave e/o Euclid Ave and Euclid Ave n/o Merrill Ave.

H. STORM WATER QUALITY / NATIONAL POLLUTANT DISCHARGE AND ELIMINATION SYSTEM (NPDES)

2.44 401 Water Quality Certification/404 Permit – Submit a copy of any applicable 401 Certification or 404 Permit for the subject project to the City project engineer. Development that will affect any body of surface water (i.e. lake, creek, open drainage channel, etc.) may require a 401 Water Quality Certification from the California Regional Water Quality Control Board, Santa Ana Region (RWQCB) and a 404 Permit from the United States Army Corps of Engineers (USACE). The groups of water bodies classified in these requirements are perennial (flow year round) and ephemeral (flow during rain conditions, only) and include, but are not limited to, direct connections into San Bernardino County Flood Control District (SBCFCD) channels.
 If a 401 Certification and/or a 404 Permit are not required, a letter confirming this from Applicant's engineer shall be submitted.
 Contact information: USACE (Los Angeles District) (213) 452-3414; RWQCB (951) 782-4130.

2.45 **Submit a Water Quality Management Plan (WQMP). This plan shall be approved by the Engineering Department prior to approval of any grading plan. The WQMP shall be submitted, utilizing the current San Bernardino County Stormwater Program template, available at: <http://www.sbcounty.gov/dpw/land/npdes.asp>.**

2.46 Design and construct a Connector Pipe Trash Screen or equivalent Trash Treatment Control Device, per catch basin located within or accepting flows tributary of a Priority Land Use (PLU) area that meets the Full Capture System definition and specifications, and is on the Certified List of the State Water Resources Control Board. The device shall be adequately sized per catch basin and include a deflector screen with vector control access for abatement application, vertical support bars, and removable component to facilitate maintenance and cleaning.

2.47 Other conditions:

- A. Design and construct two (2) debris separation baffle boxes or equivalent alternative approved devices to satisfy the statewide trash mandate at the intersection of Euclid Ave and Merrill Ave.

J. SPECIAL DISTRICTS

- 2.48 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2353 to initiate the CFD application process.
- 2.49 Other conditions: _____

K. FIBER OPTIC

- 2.50 Design and construct fiber optic system to provide access to the City’s conduit and fiber optic system per the City’s Fiber Optic Master Plan. Building entrance conduits shall start from the closest OntarioNet hand hole constructed along the project frontage in the ROW and shall terminate in the main telecommunications room for each building. Conduit infrastructure shall interconnect with the primary and/or secondary backbone fiber optic conduit system at the nearest OntarioNet hand hole. Limits of work are generally located along the project frontages of Merrill Ave, Eucalyptus Ave, and Euclid Ave.
- 2.51 Refer to the City’s Fiber Optic Master Plan for design and layout guidelines. Contact the Broadband Operations Department at (909) 395-2000, regarding this requirement.

L. Solid Waste

- 2.52 Onsite solid waste shall be designed in accordance with the City’s Solid Waste Manual location at:
<http://www.ontarioca.gov/municipal-utilities-company/solid-waste>
- 2.53 Other conditions:
 - A. Final Solid Waste Handling Plan (SWHP): The TPM 20016 Conceptual Solid Waste Handling Plan dated 05/20/20, shall be updated to meet all conditions and revised into a Final SWHP. Prior to approval of the any building permits, a Final Solid Waste Handling Plan Sheet shall be submitted accompanying the Precise Grading Plan Submittal to the City/OMUC for review and approval. See *Solid Waste Handling Plan (SWHP) Requirements document* for details.
 - i. Organics Separation and Collection: This site shall comply with the Requirements of State Assembly Bill AB1826, which requires organic waste to be diverted and collected separately from recycling and other refuse wastes.
 - ii. At minimum this site requires a trash enclosure sized to store three 4-cubic-yard bins (one for refuse, one for recycling, and one for organics) for each potential office area of each building.
 - B. Final Integrated Waste Management Report (IWMR): The applicant shall submit a Final Integrated Waste Management Report for review and approval with the Precise Grading Plan. This report shall address the management of all integrated waste (Refuse, Recycling, Organics, etc.). The IWMR shall demonstrate compliance with the *“Integrated Waste Management Report Requirements”* document.

3. PRIOR TO ISSUANCE OF A CERTIFICATE OF OCCUPANCY, APPLICANT SHALL:

- 3.01 Set new monuments in place of any monuments that have been damaged or destroyed as a result of construction of the subject project. Monuments shall be set in accordance with City of Ontario standards and to the satisfaction of the City Engineer.

- 3.02 Complete all requirements for recycled water usage.**
 - 1) Procure from the OMUC a copy of the letter of confirmation from the California Department of Public Health (CDPH) that the Engineering Report (ER) has been reviewed and the subject site is approved for the use of recycled water.**
 - 2) Obtain clearance from the OMUC confirming completion of recycled water improvements and passing of shutdown tests and cross connection inspection, upon availability/usage of recycled water.**
 - 3) Complete education training of on-site personnel in the use of recycled water, in accordance with the ER, upon availability/usage of recycled water.**
- 3.03 The applicant/developer shall submit all final survey documents prepared by a Licensed Surveyor registered in the State of California detailing all survey monuments that have been preserved, revised, adjusted or set along with any maps, corner records or Records of Survey needed to comply with these Conditions of Approvals and the latest edition of the California Professional Land Survey Act. These documents are to be reviewed and approved by the City Survey Office.**
- 3.04 NMC Projects: For developments located at an intersection of any two collector or arterial streets, the applicant/developer shall set a monument if one does not already exist at that intersection. Contact the City Survey office for information on reference benchmarks, acceptable methodology and required submittals.**
- 3.05 Confirm payment of all Development Impact Fees (DIF) to the Building Department.**
- 3.06 Submit electronic copies (PDF and Auto CAD format) of all approved improvement plans, studies and reports (i.e. hydrology, traffic, WQMP, etc.).**

4. PRIOR TO FINAL ACCEPTANCE, APPLICANT SHALL:

- 4.01 Complete all Conditions of Approval listed under Sections 1-3 above.**
- 4.02 Pay all outstanding fees pursuant to the City of Ontario Municipal Code, including but not limited to, plan check fees, inspection fees and Development Impact Fees.**
- 4.03 The applicant/developer shall submit a written request for the City's final acceptance of the project addressed to the City Project Engineer. The request shall state that all Conditions of Approval have been completed and shall be signed by the applicant/developer. Upon receipt of the request, review of the request shall be a minimum of 10 business days. Conditions of Approval that are deemed incomplete by the City will cause delays in the acceptance process.**
- 4.04 Submit record drawings (mylar and PDF) for all public improvements identified within Section 2 of these Conditions of Approval.**

EXHIBIT 'A'

ENGINEERING DEPARTMENT First Plan Check Submittal Checklist

Project Number: PMTT18-011, PDEV18-036, and/or Parcel Map No. 20016

The following items are required to be included with the first plan check submittal:

1. **A copy of this check list**
2. **Payment of fee for Plan Checking**
3. **One (1) copy of Engineering Cost Estimate (on City form) with engineer's wet signature and stamp.**
4. **One (1) copy of project Conditions of Approval**
5. **Include a PDF (electronic submittal) of each required improvement plan at every submittal.**
6. **Two (2) sets of Potable and Recycled Water demand calculations (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size).**
7. **Three (3) sets of Public Street improvement plan with street cross-sections**
8. **Three (3) sets of Private Street improvement plan with street cross-sections**
9. **Four (4) sets of Public Water improvement plan (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size)**
10. **Four (4) sets of Recycled Water improvement plan (include recycled water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size and an exhibit showing the limits of areas being irrigated by each recycled water meter)**
11. **Four (4) sets of Public Sewer improvement plan**
12. **Five (5) sets of Public Storm Drain improvement plan**
13. **Three (3) sets of Public Street Light improvement plan**
14. **Three (3) sets of Signing and Striping improvement plan**
15. **Three (3) sets of Fiber Optic plan (include Auto CAD electronic submittal)**
16. **Three (3) sets of Dry Utility plans within public right-of-way (at a minimum the plans must show existing and ultimate right-of-way, curb and gutter, proposed utility location including centerline dimensions, wall to wall clearances between proposed utility and adjacent public line, street work repaired per Standard Drawing No. 1306. Include Auto CAD electronic submittal)**
17. **Three (3) sets of Traffic Signal improvement plan and One (1) copy of Traffic Signal Specifications with modified Special Provisions. Please contact the Traffic Division at (909) 395-2154 to obtain Traffic Signal Specifications.**
18. **Two (2) copies of Water Quality Management Plan (WQMP), including one (1) copy of the approved Preliminary WQMP (PWQMP).**
19. **One (1) copy of Hydrology/Drainage study**
20. **One (1) copy of Soils/Geology report**

- 21. **Payment for Final Map/Parcel Map processing fee**
- 22. **Three (3) copies of Final Map/Parcel Map**
- 23. **One (1) copy of approved Tentative Map**
- 24. **One (1) copy of Preliminary Title Report (current within 30 days)**
- 25. **One (1) copy of Traverse Closure Calculations**
- 26. **One (1) set of supporting documents and maps (legible copies): referenced improvement plans (full size), referenced record final maps/parcel maps (full size, 18"x26"), Assessor's Parcel map (full size, 11"x17"), recorded documents such as deeds, lot line adjustments, easements, etc.**
- 27. **Two (2) copies of Engineering Report and an electronic file (include PDF format electronic submittal) for recycled water use**
- 28. **Other:** _____

CITY OF ONTARIO

MEMORANDUM

TO: PLANNING DEPARTMENT, Henry Noh
FROM: BUILDING DEPARTMENT, Kevin Shear
DATE: January 7, 2019
SUBJECT: PMTT18-011

-
- The plan **does** adequately address the departmental concerns at this time.
- No comments
- Report below.

Conditions of Approval

1. Standard Conditions of Approval apply.

KS:lm

CITY OF ONTARIO

MEMORANDUM

TO: Henry Noh, Senior Planner
Planning Department

FROM: Paul Ehrman, Deputy Fire Chief/Fire Marshal
Fire Department

DATE: January 10, 2019

SUBJECT: PMTT18-011 – A Parcel Map to subdivide 84.1 acres of land into 11 parcels located at the northeast corner of Merrill and Euclid Avenues, within the Ontario Ranch Commerce Center Specific Plan West (APNs: 1054-011-01, -02, -04; 1054-021-01, -02; 1054-271-01, -02, -03; and 1054-281-01, -02, -03).
Related Files: PDEV18-011; PSP18-002

-
- The plan **does** adequately address Fire Department requirements at this time.
- Standard Conditions of Approval apply. Refer to PDEV18-011.

CITY OF ONTARIO

MEMORANDUM

TO: Scott Murphy, Development Director
Cathy Wahlstrom, Planning Director
Diane Ayala, Advanced Planning Division
Charity Hernandez, Economic Development
Kevin Shear, Building Official
Khoi Do, Assistant City Engineer
Carolyn Bell, Landscape Planning Division
Ahmed Aly, Municipal Utility Company
Doug Sorel, Police Department
Paul Ehrman, Deputy Fire Chief/Fire Marshal
Jay Bautista, T. E., Traffic/Transportation Manager
Lorena Mejia, Airport Planning
Eric Woosley, Engineering/NPDES
Joe De Sousa, Code Enforcement (Copy of memo only)
Jimmy Chang, IT Department

FROM: Henry Noh, Senior Planner

DATE: January 02, 2019

SUBJECT: FILE #: PMTT18-011

Finance Acct#:

The following project has been submitted for review. Please send one (1) copy and email one (1) copy of your DAB report to the Planning Department by **Wednesday, January 16, 2019**.

- Note:
- Only DAB action is required
 - Both DAB and Planning Commission actions are required
 - Only Planning Commission action is required
 - DAB, Planning Commission and City Council actions are required
 - Only Zoning Administrator action is required

PROJECT DESCRIPTION: A Parcel Map to subdivide 84.1 acres of land into 11 parcels located at the northeast corner of Merrill and Euclid Avenues, within the Ontario Ranch Commerce Center Specific Plan West (APNs: 1054-011-01, -02, -04; 1054-021-01, -02; 1054-271-01, -02, -03; and 1054-281-01, -02, -03).

CONSISTENCY DETERMINATION

This proposed Project is: Exempt from the ALUCP Consistent Consistent with Conditions Inconsistent

The proposed project is located within the Airport Influence Area of Ontario International Airport (ONT) and was evaluated and found to be consistent with the policies and criteria of the Airport Land Use Compatibility Plan (ALUCP) for ONT.

The proposed project is located within the Airport Influence Area of Chino Airport and was evaluated and found to be consistent with the policies and criteria as established by the California Airport Land Use Planning Handbook for Chino Airport provided the following conditions are met:

CONSISTENCY DETERMINATION REPORT

CD No.: 2018-074
PALU No.: _____

PROJECT CONDITIONS

The project is located within Safety Zone 6 the Chino Airport Influence Area, the project shall comply with the attached conditions.

1. The project shall maintain a minimum of 10% open land for the project net area. The project shall provide 8.4 acres of open land.
2. Open Land must have a minimum dimensions of (75 feet by 300 feet). Open Land area must be free of structures and other major obstacles such as walls, large trees or poles (greater than 4 inches in diameter, measured 4 feet above the ground), and overhead wires.
4. The attached open space exhibit identifies Eucalyptus Avenue and Merrill Avenue for being the primary acceptable locations to meet open land requirements.
5. The attached open land exhibit also identifies the interior truck yards as an acceptable location for meeting the open land requirements. The area within the truck yard designated for open land shall be free of permanent structures and other major obstacles such as walls, large trees or poles (greater than 4 inches in diameter, measured 4 feet above the ground), and overhead wires.
6. The maximum height limit for the project site is 130 feet and as such, any construction equipment such as cranes or any other equipment/permanent structures exceeding 130 feet in height will need a determination of "No Hazard" from the FAA. An FAA Form 7460-1 for any temporary objects will need to be filed with the FAA and approved prior to operating such equipment on the project site during construction.

RESOLUTION NO.

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PDEV18-036, A DEVELOPMENT PLAN TO CONSTRUCT THREE INDUSTRIAL BUILDINGS TOTALING 1,447,123 SQUARE FEET AND FIVE BUSINESS PARK BUILDINGS TOTALING 105,624 SQUARE FEET, LOCATED AT THE NORTHEAST CORNER OF MERRILL AND EUCLID AVENUES, WITHIN THE INDUSTRIAL AND BUSINESS PARK LAND USE DISTRICTS OF THE ONTARIO RANCH BUSINESS PARK SPECIFIC PLAN, AND MAKING FINDINGS IN SUPPORT THEREOF— APNS: 1054-011-01, 1054-011-02, 1054-011-04; 1054-021-01, 1054-021-02; 1054-271-01, 1054-271-02, 1054-271-03, 1054-281-01, 1054-281-02, AND 1054-281-03.

WHEREAS, Euclid Land Venture, LLC. ("Applicant") has filed an Application for the approval of a Development Plan, File No. PDEV18-036, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 85.6 acres of land generally located at the northeast corner of Merrill and Euclid Avenues, within the Industrial and Business Park land use districts of the Ontario Ranch Business Park Specific Plan; and

WHEREAS, the property to the north of the project site is currently developed with a plant nursery and dairy and is located within the SP (Specific Plan) / AG (Agricultural Overlay) zoning district (NMC West Mixed Use District of the Policy Plan Land Use Plan). The property to the south consists of developed lands with Chino Airport, located within the City of Chino. The property east of the project site is developed with a dairy and single-family residence and is located within the SP (Specific Plan)/AG (Agricultural Overlay) zoning district (Low-Medium Density Residential and Business Park districts of the Policy Plan Land Use Plan). The property to the west, across Euclid Avenue, is in the City of Chino and consists of vacant and residentially developed lands; and

WHEREAS, the Development Plan proposes to construct five business park buildings totaling 105,624 square feet and three industrial buildings totaling 1,447,123 square feet; and

WHEREAS, the Development Plan was filed in conjunction with a Tentative Parcel Map (File No. PMTT18-011) to subdivide 85.6 acres of land into 8 parcels to facilitate the development of the subject site; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act — Public Resources Code Section 21000 et seq. — (hereinafter referred to as "CEQA"); and

WHEREAS, the environmental impacts of this project were previously reviewed in conjunction with File No. PSP18-002, the Ontario Ranch Business Park Specific Plan for which an EIR (SCH# 2019050018) — (hereinafter referred to as "Certified EIR") was adopted by the City Council on September 15, 2020, and this Application introduces no new significant environmental impacts; and

WHEREAS, the City's "Local Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and act on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (hereinafter referred to as "ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on October 19, 2020, the Development Advisory Board of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date, voting to issue Decision No. DAB20-057, recommending the Planning Commission approve the Application; and

WHEREAS, on October 27, 2020, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: Environmental Determination and Findings. As the decision-making authority for the Project, the Planning Commission has reviewed and considered the information contained in the previous Certified EIR and supporting documentation. Based upon the facts and information contained in the previous Certified EIR and supporting documentation, the Planning Commission finds as follows:

- (1) The environmental impacts of this project were previously reviewed in conjunction with File No. PSP18-002, the Ontario Ranch Business Park Specific Plan for which a Certified EIR was adopted by the City Council on September 15, 2020.
- (2) The previous Certified EIR contains a complete and accurate reporting of the environmental impacts associated with the Project; and
- (3) The previous Certified EIR was completed in compliance with CEQA and the Guidelines promulgated thereunder; and
- (4) The previous Certified EIR reflects the independent judgment of the Planning Commission; and
- (5) The proposed project will introduce no new significant environmental impacts beyond those previously analyzed in the previous Certified EIR, and all mitigation measures previously adopted with the Certified EIR, are incorporated herein by this reference.

SECTION 2: Subsequent or Supplemental Environmental Review Not Required. Based on the information presented to the Planning Commission, and the specific findings set forth in Section 1, above, the Planning Commission finds that the preparation of a subsequent or supplemental Certified EIR is not required for the Project, as the Project:

- (1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and
- (2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the

Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and.

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3: *Housing Element Compliance.* Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the decision-making authority for the Project, the Planning Commission finds that based on the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

SECTION 4: *Ontario International Airport Land Use Compatibility Plan (“ALUCP”) Compliance.* The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the ALUCP, establishing the Airport Influence Area for Ontario International Airport (hereinafter referred to as “ONT”), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the decision-making authority for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting

documentation against the ALUCP compatibility factors, including [1] Safety Criteria (ALUCP Table 2-2) and Safety Zones (ALUCP Map 2-2), [2] Noise Criteria (ALUCP Table 2-3) and Noise Impact Zones (ALUCP Map 2-3), [3] Airspace protection Zones (ALUCP Map 2-4), and [4] Overflight Notification Zones (ALUCP Map 2-5). As a result, the PLANNING COMMISSION, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ALUCP.

SECTION 5: *Concluding Facts and Reasons.* Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing, and upon the specific findings set forth in Section 1 through 4, above, the Planning Commission hereby concludes as follows:

(1) ***The proposed development at the proposed location is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan.*** The proposed Project is located within the Business Park (0.6 FAR) and Industrial (0.55 FAR) land use districts of the Policy Plan Land Use Map, and the Business Park and Industrial zoning districts of the Ontario Ranch Business Park Specific Plan. With approval of related file PMTT18-011, the development standards and conditions under which the proposed Project will be constructed and maintained, is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan.

(2) ***The proposed development is compatible with those on adjoining sites in relation to location of buildings, with particular attention to privacy, views, any physical constraint identified on the site and the characteristics of the area in which the site is located.*** With approval of related file number PMTT18-011 and implementation of the Project's conditions of approval, the Project has been designed consistent with the requirements of the City of Ontario Development Code and Business Park and Industrial zoning districts of the Ontario Ranch Business Park Specific Plan, including standards relative to the particular land use proposed (business park and industrial), as-well-as building intensity, building and parking setbacks, building height, number of off-street parking and loading spaces, on-site and off-site landscaping, and fences, walls and obstructions.

(3) ***The proposed development will complement and/or improve upon the quality of existing development in the vicinity of the project and the minimum safeguards necessary to protect the public health, safety and general welfare have been required of the proposed project.*** The Planning Commission has required certain safeguards, and impose certain conditions of approval, which have been established to ensure that: [i] the purposes of the Business Park and Industrial zoning districts of the

Ontario Ranch Business Park Specific Plan are maintained; [ii] the project will not endanger the public health, safety or general welfare; [iii] the project will not result in any significant environmental impacts; [iv] the project will be in harmony with the area in which it is located; and [v] the project will be in full conformity with the Vision, City Council Priorities and Policy Plan components of The Ontario Plan, and the Business Park and Industrial zoning districts of the Ontario Ranch Business Park Specific Plan. With approval of related File No. PMTT18-011, the Project will complement and improve upon the quality of existing development in the vicinity of the Project site and provide continuity over the developing business park/industrial corridor running along the southern side of Eucalyptus Avenue. The Project site is currently partially vacant and partially with dairy/agricultural uses, and the proposed development will provide additional business park and industrial business placement options for the greater Ontario community.

(4) ***The proposed development is consistent with the development standards and design guidelines set forth in the Development Code, or applicable specific plan or planned unit development.*** The proposed Project has been reviewed for consistency with the general The proposed Project has been reviewed for consistency with the general development standards and guidelines of the Ontario Ranch Business Park Specific Plan that are applicable to the proposed Project, including building intensity, building and parking setbacks, building height, amount of off-street parking and loading spaces, parking lot dimensions, design and landscaping, bicycle parking, on-site landscaping, and fences and walls, as-well-as those development standards and guidelines specifically related to the particular land use being proposed (business park and industrial). As a result of this review, the Planning Commission has determined that the Project, when implemented in conjunction with the conditions of approval and related Tentative Parcel Map File No. PMTT18-011, will be consistent with the development standards and guidelines described in the Ontario Ranch Business Park Specific Plan.

SECTION 6: Planning Commission Action. Based upon the findings and conclusions set forth in Sections 1 through 5, above, the Planning Commission hereby APPROVES the herein described Application, subject to each and every condition set forth in the Department reports attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 7: Indemnification. The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 8: Custodian of Records. The documents and materials that constitute the record of proceedings on which these findings have been based are located

at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 9: **Certification to Adoption.** The Secretary shall certify to the adoption of the Resolution.

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a regular meeting thereof held on the 27th day of October 2020, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

The Planning Department, Land Development Section, conditions of approval applicable to the above-described Project, are listed below. The Project shall comply with each condition of approval listed below:

1.0 Standard Conditions of Approval. The project shall comply with the *Standard Conditions for New Development*, adopted by City Council Resolution No. 2017-027 on April 18, 2017. A copy of the *Standard Conditions for New Development* may be obtained from the Planning Department or City Clerk/Records Management Department.

2.0 Special Conditions of Approval. In addition to the *Standard Conditions for New Development* identified in condition no. 1.0, above, the project shall comply with the following special conditions of approval:

2.1 Time Limits.

(a) Development Plan approval shall become null and void 2 years following the effective date of application approval, unless a building permit is issued and construction is commenced, and diligently pursued toward completion, or a time extension has been approved by the Planning Director. This condition does not supersede any individual time limits specified herein, or any other departmental conditions of approval applicable to the Project, for the performance of specific conditions or improvements.

2.2 General Requirements. The Project shall comply with the following general requirements:

(a) All construction documentation shall be coordinated for consistency, including, but not limited to, architectural, structural, mechanical, electrical, plumbing, landscape and irrigation, grading, utility and street improvement plans. All such plans shall be consistent with the approved entitlement plans on file with the Planning Department.

(b) The project site shall be developed in conformance with the approved plans on file with the City. Any variation from the approved plans must be reviewed and approved by the Planning Department prior to building permit issuance.

(c) The herein-listed conditions of approval from all City departments shall be included in the construction plan set for project, which shall be maintained on site during project construction.

2.3 Landscaping.

(a) The Project shall provide and continuously maintain landscaping and irrigation systems in compliance with the provisions of Ontario Development Code Division 6.05 (Landscaping).

(b) Comply with the conditions of approval of the Planning Department; Landscape Planning Division.

(c) Landscaping shall not be installed until the Landscape and Irrigation Construction Documentation Plans required by Ontario Development Code Division 6.05 (Landscaping) have been approved by the Landscape Planning Division.

(d) Changes to approved Landscape and Irrigation Construction Documentation Plans, which affect the character or quantity of the plant material or irrigation system design, shall be resubmitted for approval of the revision by the Landscape Planning Division, prior to the commencement of the changes.

2.4 Walls and Fences. All Project walls and fences shall comply with the requirements of Ontario Development Code Division 6.02 (Walls, Fences and Obstructions).

2.5 Parking, Circulation and Access.

(a) The Project shall comply with the applicable off-street parking, loading and lighting requirements of City of Ontario Development Code Division 6.03 (Off-Street Parking and Loading).

(b) All drive approaches shall be provided with an enhanced pavement treatment. The enhanced paving shall extend from the back of the approach apron, into the site, to the first intersecting drive aisle or parking space.

(c) Areas provided to meet the City's parking requirements, including off-street parking and loading spaces, access drives, and maneuvering areas, shall not be used for the outdoor storage of materials and equipment, nor shall it be used for any other purpose than parking.

(d) The required number of off-street parking spaces and/or loading spaces shall be provided at the time of site and/or building occupancy. All parking and loading spaces shall be maintained in good condition for the duration of the building or use.

(e) Parking spaces specifically designated and conveniently located for use by the physically disabled shall be provided pursuant to current accessibility regulations contained in State law (CCR Title 24, Part 2, Chapters 2B71, and CVC Section 22507.8).

(f) Bicycle parking facilities, including bicycle racks, lockers, and other secure facilities, shall be provided in conjunction with development projects pursuant to current regulations contained in CALGreen (CAC Title 24, Part 11).

2.6 Outdoor Loading and Storage Areas.

(a) Loading facilities shall be designed and constructed pursuant to Development Code Division 6.03 (Off-Street Parking and Loading).

(b) Areas designated for off-street parking, loading, and vehicular circulation and maneuvering, shall not be used for the outdoor storage of materials or equipment.

(c) Outdoor loading and storage areas, and loading doors, shall be screened from public view pursuant to the requirements of Development Code Paragraph 6.02.025.A.2 (Screening of Outdoor Loading and Storage Areas, and Loading Doors) Et Seq.

(d) Outdoor loading and storage areas shall be provided with gates that are view-obstructing by one of the following methods:

(i) Construct gates with a perforated metal sheet affixed to the inside of the gate surface (50 percent screen); or

(ii) Construct gates with minimum one-inch square tube steel pickets spaced at maximum 2-inches apart.

(e) The minimum gate height for screen wall openings shall be established based upon the corresponding wall height, as follows:

Screen Wall Height	Minimum Gate Height
14 feet:	10 feet
12 feet:	9 feet
10 feet:	8 feet
8 feet:	8 feet
6 feet:	6 feet

2.7 Site Lighting.

(a) All off-street parking facilities shall be provided with nighttime security lighting pursuant to Ontario Municipal Code Section 4-11.08 (Special Residential Building Provisions) and Section 4-11.09 (Special Commercial/Industrial Building Provisions), designed to confine emitted light to the parking areas. Parking facilities shall be lighted from sunset until sunrise, daily, and shall be operated by a photocell switch.

(b) Unless intended as part of a master lighting program, no operation, activity, or lighting fixture shall create illumination on any adjacent property.

2.8 Mechanical and Rooftop Equipment.

(a) All exterior roof-mounted mechanical, heating and air conditioning equipment, and all appurtenances thereto, shall be completely screened from public view by parapet walls or roof screens that are architecturally treated so as to be consistent with the building architecture.

(b) All ground-mounted utility equipment and structures, such as tanks, transformers, HVAC equipment, and backflow prevention devices, shall be located out of view from a public street, or adequately screened through the use of landscaping and/or decorative low garden walls.

2.9 Security Standards. The Project shall comply with all applicable requirements of Ontario Municipal Code Title 4 (Public Safety), Chapter 11 (Security Standards for Buildings).

2.10 Signs. All Project signage shall comply with the requirements of Ontario Development Code Division 8.1 (Sign Regulations).

2.11 Sound Attenuation. The Project shall be constructed and operated in a manner so as not to exceed the maximum interior and exterior noised levels set forth in Ontario Municipal Code Title 5 (Public Welfare, Morals, and Conduct), Chapter 29 (Noise).

2.12 Environmental Review.

(a) The environmental impacts of this project were previously reviewed in conjunction with File No. PSP18-002, the Ontario Ranch Business Park Specific Plan for which an EIR (SCH# 2019050018) was previously adopted by the City Council on September 15, 2020. This application introduces no new significant environmental impacts. The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. The previously adopted mitigation measures shall be a condition of project approval, and are incorporated herein by this reference.

(b) If human remains are found during project grading/excavation/construction activities, the area shall not be disturbed until any required investigation is completed by the County Coroner and Native American consultation has been completed (if deemed applicable).

(c) If any archeological or paleontological resources are found during project grading/excavation/construction, the area shall not be disturbed until the significance of the resource is determined. If determined to be significant, the resource shall be recovered by a qualified archeologist or paleontologist consistent with current standards and guidelines, or other appropriate measures implemented.

2.13 Indemnification. The applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer. The City of Ontario shall promptly notify the applicant of any such claim, action or proceeding, and the City of Ontario shall cooperate fully in the defense.

2.14 Additional Fees.

(a) Within 5 days following final application approval, the Notice of Determination (NOD) filing fee shall be provided to the Planning Department. The fee shall be paid by check, made payable to the "Clerk of the Board of Supervisors", which shall be forwarded to the San Bernardino County Clerk of the Board of Supervisors, along with all applicable environmental forms/notices, pursuant to the requirements of the California Environmental Quality Act (CEQA). Failure to provide said fee within the time specified may result in a 180-day extension to the statute of limitations for the filing of a CEQA lawsuit.

(b) After the Project's entitlement approval, and prior to issuance of final building permits, the Planning Department's Plan Check and Inspection fees shall be paid at the rate established by resolution of the City Council.

2.15 Additional Requirements.

(a) Development Plan File No PDEV18-036 approval is contingent on Planning Commission approval of related Tract Map File No. PMTT18-011 and Development Agreement File No PDA19-001.

Conditions of Approval

1. Standard Conditions of Approval apply.

KS:lr

CITY OF ONTARIO

MEMORANDUM

TO: Henry No, Senior Planner
Planning Department

FROM: Paul Ehrman, Deputy Fire Chief/Fire Marshal
Fire Department

DATE: November 26, 2018

SUBJECT: PDEV18-036 - A Development Plan to construct 8 industrial building totaling 3,661,861 square feet on 84.1 acres of land within Planning Area (Business Park) and Planning Area 2 (Industrial) of the proposed Ontario Ranch Commerce Center West Specific Plan, bounded by Eucalyptus Avenue to the north, Merrill Avenue to the south, Sultana Avenue to the east and Euclid Avenue to the west. APNs: 1054-011-01,02 & 04, 1054-021-01, 02, & 03, 1054-271-01, 1054281-01, 02 & 03.

-
- The plan **does** adequately address Fire Department requirements at this time.
- Standard Conditions of Approval apply, as stated below.
-

SITE AND BUILDING FEATURES:

- A. 2016 CBC Type of Construction: Not listed (Assumed 11B)
- B. Type of Roof Materials: Panelized
- C. Ground Floor Area(s): Varies 96,400 Sq. Ft. to 588,200 Sq. Ft
- D. Number of Stories: 1
- E. Total Square Footage: Varies
- F. 2016 CBC Occupancy Classification(s): Varies

CONDITIONS OF APPROVAL:

1.0 GENERAL

- ☒ 1.1 The following are the Ontario Fire Department (“Fire Department”) requirements for this development project, based on the current edition of the California Fire Code (CFC), and the current versions of the Fire Prevention Standards (“Standards.”) It is recommended that the applicant or developer transmit a copy of these requirements to the on-site contractor(s) and that all questions or concerns be directed to the Bureau of Fire Prevention, at (909) 395-2029. For copies of Ontario Fire Department Standards please access the City of Ontario web site at www.ontarioca.gov, click on “Fire Department” and then on “Standards and Forms.”
- ☒ 1.2 These Fire Department conditions of approval are to be included on any and all construction drawings.

2.0 FIRE DEPARTMENT ACCESS

- ☒ 2.1 Fire Department vehicle access roadways shall be provided to within 150 ft. of all portions of the exterior walls of the first story of any building, unless specifically approved. Roadways shall be paved with an all-weather surface and shall be a minimum of twenty-four (24) ft. wide. See Standard #B-004.
- ☒ 2.2 In order to allow for adequate turning radius for emergency fire apparatus, all turns shall be designed to meet the minimum twenty five feet (25’) inside and forty-five feet (45’) outside turning radius per Standard #B-005.
- ☒ 2.3 Fire Department access roadways that exceed one hundred and fifty feet (150’) in length shall have an approved turn-around per Standard #B-002.
- ☒ 2.4 Access drive aisles which cross property lines shall be provided with CC&Rs, access easements, or reciprocating agreements, and shall be recorded on the titles of affected properties, and copies of same shall be provided at the time of building plan check.
- ☒ 2.5 "No Parking-Fire Lane" signs and /or red painted curbs with lettering are required to be installed in interior access roadways, in locations where vehicle parking would obstruct the minimum clear width requirement. Installation shall be per Standard #B-001.
- ☒ 2.6 Security gates or other barriers on fire access roadways shall be provided with a Knox brand key switch or padlock to allow Fire Department access. See Standards #B-003, B-004 and H-001.
- ☒ 2.7 Any time PRIOR to on-site combustible construction and/or storage, a minimum twenty-six (26) ft. wide circulating all weather access roads shall be provided to within 150 ft. of all portions of the exterior walls of the first story of any building, unless specifically approved by fire department and other emergency services..

3.0 WATER SUPPLY

- ☒ 3.1 The required fire flow per Fire Department standards, based on the 2016 California Fire Code, Appendix B, is 4000 gallons per minute (g.p.m.) for 4 hours at a minimum of 20 pounds per square inch (p.s.i.) residual operating pressure.
- ☒ 3.2 Off-site (public) fire hydrants are required to be installed on all frontage streets, at a minimum spacing of three hundred foot (300') apart, per Engineering Department specifications.
- ☒ 3.3 Buildings that exceed 100,000 square feet in floor area shall provide an onsite looped fire protection water line around the building(s.) The loops shall be required to have two or more points of connection from a public circulating water main.
- ☒ 3.4 The water supply, including water mains and fire hydrants, shall be tested and approved by the Engineering Department and Fire Department prior to combustible construction to assure availability and reliability for firefighting purposes.

4.0 FIRE PROTECTION SYSTEMS

- ☒ 4.1 On-site private fire hydrants are required per Standard #D-005, and identified in accordance with Standard #D-002. Installation and location(s) are subject to the approval of the Fire Department. An application with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.
- ☒ 4.2 Underground fire mains which cross property lines shall be provided with CC & R, easements, or reciprocating agreements, and shall be recorded on the titles of affected properties, and copies of same shall be provided at the time of fire department plan check. The shared use of private fire mains or fire pumps is allowable only between immediately adjacent properties and shall not cross any public street.
- ☒ 4.3 An automatic fire sprinkler system is required. The system design shall be in accordance with National Fire Protection Association (NFPA) Standard Choose an item.. All new fire sprinkler systems, except those in single family dwellings, which contain twenty (20) sprinkler heads or more shall be monitored by an approved listed supervising station. An application along with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.
- ☒ 4.5 Fire Department Connections (FDC) shall be located on the address side of the building within one hundred fifty feet (150') of a public fire hydrant on the same side of the street. Provide identification for all fire sprinkler control valves and fire department connections per Standard #D-007. Raised curbs adjacent to Fire Department connection(s) shall be painted red, five feet either side, per City standards.
- ☒ 4.6 A fire alarm system is required. The system design shall be in accordance with National Fire Protection Association (NFPA) Standard 72. An application along with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.

- ☒ 4.7 Portable fire extinguishers are required to be installed prior to occupancy per Standard #C-001. Please contact the Fire Prevention Bureau to determine the exact number, type and placement required.
- ☒ 4.9 Hose valves with one and one half inch (1 ½”) connections will be required on the roof of structures greater than 100,000 Sq. Ft, in locations acceptable to the Fire Department. These hose valves shall take their water supply from the automatic fire sprinkler systems, and shall be included in the design submitted for these systems. Identification shall be provided for all hose valves per Standard #D-004.

5.0 BUILDING CONSTRUCTION FEATURES

- ☒ 5.1 The developer/general contractor is to be responsible for reasonable periodic cleanup of the development during construction to avoid hazardous accumulations of combustible trash and debris both on and off the site.
- ☒ 5.2 Approved numbers or addresses shall be placed on all new and existing buildings in such a position as to be plainly visible and legible from the street or road fronting the property. Multi-tenant or building projects shall have addresses and/or suite numbers provided on the rear of the building. Address numbers shall contrast with their background. See Section 9-1 6.06 of the Ontario Municipal Code and Standards #H-003 and #H-002.
- ☒ 5.4 Multiple unit building complexes shall have building directories provided at the main entrances. The directories shall be designed to the requirements of the Fire Department, see Section 9-1 6.06 of the Ontario Municipal Code and Standard #H-003.
- ☒ 5.6 Knox ® brand key-box(es) shall be installed in location(s) acceptable to the Fire Department. All Knox boxes shall be monitored for tamper by the building fire alarm system. See Standard #H-001 for specific requirements.
- ☒ 5.7 Placards shall be installed in acceptable locations on buildings that store, use or handle hazardous materials in excess of the quantities specified in the CFC. Placards shall meet the requirements of National Fire Protection Association (NFPA) Standard 704.

6.0 OTHER SPECIAL USES

- ☒ 6.1 The storage, use, dispensing, or handling of any hazardous materials shall be approved by the Fire Department, and adequate fire protection features shall be required. If hazardous materials are proposed, a Fire Department Hazardous Materials Information Packet, including Disclosure Form and Information Worksheet, shall be completed and submitted with Material Safety Data Sheets to the Fire Department along with building construction plans.
- ☒ 6.2 Any High Piled Storage, or storage of combustible materials greater than twelve (12’) feet in height for ordinary (Class I-IV) commodities or storage greater than six feet (6’) in height of high hazard (Group A plastics, rubber tires, flammable liquids, etc.) shall be approved by the Fire Department, and adequate fire protection features shall be required. If High Piled Storage is proposed, a Fire Department High Piled Storage Worksheet shall be completed and detailed racking plans or floor plans submitted prior to occupancy of the building.

- ☒ 6.3 Underground fuel tanks, their associated piping and dispensers shall be reviewed, approved, and permitted by Ontario Building Department, Ontario Fire Department, and San Bernardino County Fire Department Hazardous Materials Division. In fueling facilities, an exterior emergency pump shut-off switch shall be provided.

DAB MEETING DATE: October 19, 2020

PROJECT NAME / DESCRIPTION: PM-20016, a Tentative Parcel Map to subdivide 84.1 acres of land into eight (8) parcels within the Ontario Ranch Business Park Specific Plan

LOCATION: Northeast corner of Merrill and Euclid Avenues

APPLICANT: Real Estate Development Associates (REDA)

REVIEWED BY:  Raymond Lee, P.E. 10-7-20
Assistant City Engineer Date

APPROVED BY:  Khoi Do, P.E. 10-7-20
City Engineer Date

THIS PROJECT SHALL COMPLY WITH THE REQUIREMENTS SET FORTH IN THE GENERAL STANDARD CONDITIONS OF APPROVAL ADOPTED BY THE CITY COUNCIL (RESOLUTION NO. 2017-027) AND THE PROJECT SPECIFIC CONDITIONS OF APPROVAL SPECIFIED IN HEREIN. ONLY APPLICABLE CONDITIONS OF APPROVAL ARE CHECKED. THE APPLICANT SHALL BE RESPONSIBLE FOR THE COMPLETION OF ALL APPLICABLE CONDITIONS OF APPROVAL PRIOR TO PARCEL MAP APPROVAL, ISSUANCE OF PERMITS AND/OR OCCUPANCY CLEARANCE, AS SPECIFIED IN THIS REPORT.

1. PRIOR TO PARCEL MAP APPROVAL, APPLICANT SHALL: Check When Complete

- 1.01 Dedicate to the City of Ontario, the right-of-way in fee simple, described below:
 - 1. Merrill Avenue to the ultimate half street right-of-way width of 54 feet along the project frontage
 - 2. Eucalyptus Avenue to the ultimate half street right-of-way width of 54 feet along the project frontage
 - 3. An additional 35' from the ultimate right-of-way of Euclid Avenue along the project frontage for a 50' neighborhood edge
 - 4. An additional 23' from the ultimate right-of-way of Merrill Avenue along the project frontage for a 35' neighborhood edge
 - 5. An additional 23' from the ultimate right-of-way of Eucalyptus Avenue along the project frontage for a 35' neighborhood edge
 - 6. Property line corner 'cut-back' required at all street intersections within the project boundaries

- 1.02 Dedicate to the City of Ontario, the following easement(s): _____

- 1.03 Restrict vehicular access to the site as follows: _____

- 1.04 Vacate the following street(s) and/or easement(s):
 - 1. All interfering on-site easements shall be quitclaimed, vacated, and/or submit non-interference letter from affected owner/utility company. See COA 1.14-3.

- 1.05 Submit a copy of a recorded private reciprocal use agreement or easement. The agreement or easement shall ensure, at a minimum, common ingress and egress and joint maintenance of all common access areas and drive aisles.

- 1.06 Provide (original document) Covenants, Conditions and Restrictions (CC&Rs) as applicable to the project and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&Rs shall provide for, but not be limited to, common ingress and egress, joint maintenance responsibility for all common access improvements, common facilities, parking areas, utilities, median and landscaping improvements and drive approaches, in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project. The CC&Rs shall also address the maintenance and repair responsibility for public improvements/utilities (sewer, water, storm drain, recycled water, etc.) located within open space/easements. In the event of any maintenance or repair of these facilities, the City shall only restore disturbed areas to current City Standards.

- 1.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at <http://tceplumecleanup.com/>), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658.

- 1.08 File an application for Reapportionment of Assessment, together with payment of a reapportionment processing fee, for each existing assessment district listed below. Contact the Financial Services Department at (909) 395-2124 regarding this requirement.
- (1) _____
- (2) _____
- 1.09 Prepare a fully executed Subdivision Agreement (on City approved format and forms) with accompanying security as required, or complete all public improvements.
- 1.10 Provide a monument bond (i.e. cash deposit) in an amount calculated by the City's approved cost estimate spreadsheet (available for download on the City's website: www.ci.ontario.ca.us) or as specified in writing by the applicant's Registered Engineer or Licensed Land Surveyor of Record and approved by the City Engineer, whichever is greater.
- 1.11 Provide a preliminary title report current to within 30 days.
- 1.12 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2353 to initiate the CFD application process.
- 1.13 **New Model Colony (NMC) Developments:**
- 1) Provide evidence of final cancellation of Williamson Act contracts associated with this tract, prior to approval of any final subdivision map. Cancellation of contracts shall have been approved by the City Council.
- 2) Provide evidence of sufficient storm water capacity availability equivalents (Certificate of Storm Water Treatment Equivalents).
- 3) Provide evidence of sufficient water availability equivalents (Certificate of Net MDD Availability).
- 1.14 **Other conditions:**
- 1. Provide private easements for utilities, cross lot drainage, blanket emergency access and reciprocal access across all parcels in favor of all parcels (as needed).
- 2. The Parcel Map shall comply with the approved Ontario Ranch Business Park Specific Plan, the Development Agreement and the Conditions of Approval for this Tentative Parcel Map.
- 3. Applicant/developer shall obtain all off-site right-of-way/easements necessary to construct the required public improvements identified within Section 2 of these Conditions of Approval.

2. PRIOR TO ISSUANCE OF ANY PERMITS, APPLICANT SHALL:

**A. GENERAL
 (Permits includes Grading, Building, Demolition and Encroachment)**

- 2.01 Record Parcel Map No. 20016 pursuant to the Subdivision Map Act and in accordance with the City of Ontario Municipal Code.
- 2.02 Submit a duplicate photo mylar of the recorded map to the City Engineer's office.

- 2.03 Note that the subject parcel is a recognized parcel in the City of Ontario per _____
- 2.04 Note that the subject parcel is an 'unrecognized' parcel in the City of Ontario and shall require a Certificate of Compliance to be processed unless a deed is provided confirming the existence of the parcel prior to the date of _____
- 2.05 Apply for a: Certificate of Compliance with a Record of Survey; Lot Line Adjustment
 Make a Dedication of Easement.
- 2.06 Provide (original document) Covenants, Conditions and Restrictions (CC&R's), as applicable to the project, and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&R's shall provide for, but not be limited to, common ingress and egress, joint maintenance of all common access improvements, common facilities, parking areas, utilities and drive approaches in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project.
- 2.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at <http://tceplumecleanup.com/>), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658.
- 2.08 **Submit a soils/geology report.**
- 2.09 **Other Agency Permit/Approval: Submit a copy of the approved permit and/or other form of approval of the project from the following agency or agencies:**
 - State of California Department of Transportation (Caltrans) – for any improvements encroaching into their right-of-way on Euclid Ave (State Route 83)**
 - San Bernardino County Road Department (SBCRD)
 - San Bernardino County Flood Control District (SBCFCD)
 - Federal Emergency Management Agency (FEMA)
 - Cucamonga Valley Water District (CVWD) for sewer/water service
 - United States Army Corps of Engineers (USACE)
 - California Department of Fish & Game
 - Inland Empire Utilities Agency (IEUA) – for sewer connection at Kimball & Euclid Aves and the recycled water connection at Eucalyptus & Sultana Aves and Eucalyptus & Euclid Aves**
 - Other:**
 - **County of San Bernardino Department of Airport – for any improvements encroaching into their property**
 - **City of Chino – for any improvements encroaching into their right-of-way**
- 2.10 Dedicate to the City of Ontario the right-of-way described below:
 _____ feet on _____
 Property line corner 'cut-back' required at the intersection of _____
 and _____
- 2.11 Dedicate to the City of Ontario the following easement(s): _____

- 2.12 New Model Colony (NMC) Developments:**
 - 1) Submit a copy of the permit from the San Bernardino County Health Department to the Engineering Department and the Ontario Municipal Utilities Company (OMUC) for the destruction/abandonment of the on-site water well. The well shall be destroyed/abandoned in accordance with the San Bernardino County Health Department guidelines.**
 - 2) Make a formal request to the City of Ontario Engineering Department for the proposed temporary use of an existing agricultural water well for purposes other than agriculture, such as grading, dust control, etc. Upon approval, the Applicant shall enter into an agreement with the City of Ontario and pay any applicable fees as set forth by said agreement.**
 - 3) Design proposed retaining walls to retain up to a maximum of three (3) feet of earth. In no case shall a wall exceed an overall height of nine (9) feet (i.e. maximum 6-foot high wall on top of a maximum 3-foot high retaining wall.**
- 2.13** Submit a security deposit to the Engineering Department to guarantee construction of the public improvements required herein valued at _____% of the approved construction cost estimate. Security deposit shall be in accordance with the City of Ontario Municipal Code. Security deposit will be eligible for release, in accordance with City procedure, upon completion and acceptance of said public improvements.
- 2.14** The applicant/developer shall submit all necessary survey documents prepared by a Licensed Surveyor registered in the State of California detailing all existing survey monuments in and around the project site. These documents are to be reviewed and approved by the City Survey Office.
- 2.15** Pay all Development Impact Fees (DIF) to the Building Department. Storm Drain Development Impact Fee, approximately \$3,367,196, shall be paid to the Building Department. Final fee shall be determined based on the approved site plan.
- 2.16** Other conditions: _____

B. PUBLIC IMPROVEMENTS
 (See attached Exhibit 'A' for plan check submittal requirements.)

2.17 Design and construct full public improvements in accordance with the City of Ontario Municipal Code, current City standards and specifications, master plans and the adopted specific plan for the area, if any. These public improvements shall include, but not be limited to, the following (checked boxes):

Improvement	Merrill Avenue	Eucalyptus Avenue	Sultana Avenue	Euclid Avenue
Curb and Gutter	<input checked="" type="checkbox"/> New; 42 ft. from C/L <input type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace	<input checked="" type="checkbox"/> New; 42 ft. from C/L <input type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace	<input checked="" type="checkbox"/> New; 24 ft. from C/L <input type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace	<input checked="" type="checkbox"/> New; 52 ft. from C/L <input type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace
AC Pavement	<input checked="" type="checkbox"/> Replacement <input checked="" type="checkbox"/> Widen 47 additional feet along frontage, including pavm't transitions (A)	<input checked="" type="checkbox"/> Replacement <input checked="" type="checkbox"/> Widen 48 additional feet along frontage, including pavm't transitions (B)	<input type="checkbox"/> Replacement <input checked="" type="checkbox"/> Widen 43 feet; along project frontage, including pavm't transitions (C)	<input checked="" type="checkbox"/> Replacement <input checked="" type="checkbox"/> Widen 36 additional feet along frontage, including pavm't transitions (D)
PCC Pavement (Truck Route Only)	<input checked="" type="checkbox"/> New <input type="checkbox"/> Modify existing	<input type="checkbox"/> New <input type="checkbox"/> Modify existing	<input type="checkbox"/> New <input type="checkbox"/> Modify existing	<input checked="" type="checkbox"/> New <input type="checkbox"/> Modify existing
Drive Approach	<input checked="" type="checkbox"/> New <input type="checkbox"/> Remove and replace	<input checked="" type="checkbox"/> New <input type="checkbox"/> Remove and replace	<input checked="" type="checkbox"/> New <input type="checkbox"/> Remove and replace	<input checked="" type="checkbox"/> New (E) <input type="checkbox"/> Remove and replace
Sidewalk	<input checked="" type="checkbox"/> New <input type="checkbox"/> Remove and replace	<input checked="" type="checkbox"/> New <input type="checkbox"/> Remove and replace	<input checked="" type="checkbox"/> New <input type="checkbox"/> Remove and replace	<input checked="" type="checkbox"/> New <input type="checkbox"/> Remove and replace
ADA Access Ramp	<input checked="" type="checkbox"/> New <input type="checkbox"/> Remove and replace	<input checked="" type="checkbox"/> New <input type="checkbox"/> Remove and replace	<input checked="" type="checkbox"/> New <input type="checkbox"/> Remove and replace	<input checked="" type="checkbox"/> New <input type="checkbox"/> Remove and replace
Parkway	<input checked="" type="checkbox"/> Trees (F) <input checked="" type="checkbox"/> Landscaping (w/irrigation) (F)	<input checked="" type="checkbox"/> Trees (F) <input checked="" type="checkbox"/> Landscaping (w/irrigation) (F)	<input checked="" type="checkbox"/> Trees <input checked="" type="checkbox"/> Landscaping (w/irrigation)	<input checked="" type="checkbox"/> Trees (F) <input checked="" type="checkbox"/> Landscaping (w/irrigation) (F)
Raised Landscaped Median	<input type="checkbox"/> New <input type="checkbox"/> Remove and replace	<input type="checkbox"/> New <input type="checkbox"/> Remove and replace	<input type="checkbox"/> New <input type="checkbox"/> Remove and replace	<input checked="" type="checkbox"/> New (G) <input type="checkbox"/> Remove and replace
Fire Hydrant	<input checked="" type="checkbox"/> New <input type="checkbox"/> Relocation	<input checked="" type="checkbox"/> New <input type="checkbox"/> Relocation	<input checked="" type="checkbox"/> New <input type="checkbox"/> Relocation	<input checked="" type="checkbox"/> New <input type="checkbox"/> Relocation

Sewer (see Sec. 2.C)	<input checked="" type="checkbox"/> Main <input checked="" type="checkbox"/> Lateral	<input type="checkbox"/> Main <input type="checkbox"/> Lateral	<input checked="" type="checkbox"/> Main <input checked="" type="checkbox"/> Lateral	<input checked="" type="checkbox"/> Main <input checked="" type="checkbox"/> Lateral
Water (see Sec. 2.D)	<input checked="" type="checkbox"/> Main <input checked="" type="checkbox"/> Service	<input checked="" type="checkbox"/> Main <input checked="" type="checkbox"/> Service	<input checked="" type="checkbox"/> Main <input checked="" type="checkbox"/> Service	<input checked="" type="checkbox"/> Main <input checked="" type="checkbox"/> Service
Recycled Water (see Sec. 2.E)	<input checked="" type="checkbox"/> Main <input checked="" type="checkbox"/> Service	<input type="checkbox"/> Main <input checked="" type="checkbox"/> Service	<input checked="" type="checkbox"/> Main <input checked="" type="checkbox"/> Service	<input checked="" type="checkbox"/> Main <input checked="" type="checkbox"/> Service
Traffic Signal System (see Sec. 2.F)	<input checked="" type="checkbox"/> New <input checked="" type="checkbox"/> Modify existing	<input checked="" type="checkbox"/> New <input type="checkbox"/> Modify existing	<input checked="" type="checkbox"/> New <input type="checkbox"/> Modify existing	<input checked="" type="checkbox"/> New <input checked="" type="checkbox"/> Modify existing

Removal of Improvements	_____ _____ _____	_____ _____ _____	_____ _____ _____	_____ _____ _____
Other Improvements	_____ _____ _____	_____ _____ _____	_____ _____ _____	_____ _____ _____

Specific notes for improvements listed in item no. 2.17, above:

- A. Pavement widening will be required on the south side within the City of Chino. Coordinate with the City on those requirements. Please note, if the existing Merrill Ave pavement is not consistent with current pavement standards, it will be required to be removed and replaced to be brought up to current standards.
- B. A 14' circulation lane and a 5' paved shoulder are required on the north side. Please note, if the existing Eucalyptus Ave pavement is not consistent with current pavement standards, it will be required to be removed and replaced to be brought up to current standards.
- C. A 14' circulation lane and a 5' paved shoulder are required on the east side.

- D. If the existing Euclid Ave pavement is not consistent with current pavement standards, it will be required to be removed and replaced to be brought up to current standards.
- E. The location and number of proposed drive approaches are to be reviewed and approved by Caltrans.
- F. Includes neighborhood edge.
- G. These improvements are partially in the City of Ontario and City of Chino.
- H. All master planned utilities shall be designed and installed to the ultimate condition.

- 2.18 Construct a 2" asphalt concrete (AC) grind and overlay on the following street(s): _____
- 2.19 Reconstruction of the full pavement structural section, per City of Ontario Standard Drawing number 1011, may be required based on the existing pavement condition and final street design. Minimum limits of reconstruction shall be along property frontage, from street centerline to curb/gutter.
- 2.20 Make arrangements with the Cucamonga Valley Water District (CVWD) to provide water service sewer service to the site. This property is within the area served by the CVWD and Applicant shall provide documentation to the City verifying that all required CVWD fees have been paid.
- 2.21 Overhead utilities shall be under-grounded, in accordance with Title 7 of the City's Municipal Code (Ordinance No. 2804 and 2892).
- 2.22 Other conditions: _____

C. SEWER

- 2.23 A _____ inch sewer main is available for connection by this project in _____ (Ref: Sewer plan bar code: _____)
- 2.24 Design and construct a sewer main extension. A sewer main is not available for direct connection. The closest main is approximately 5,280 feet away.
- 2.25 Submit documentation that shows expected peak loading values for modeling the impact of the subject project to the existing sewer system. The project site is within a deficient public sewer system area. Applicant shall be responsible for all costs associated with the preparation of the model. Based on the results of the analysis, Applicant may be required to mitigate the project impact to the deficient public sewer system, including, but not limited to, upgrading of existing sewer main(s), construction of new sewer main(s) or diversion of sewer discharge to another sewer.
- 2.26 Other conditions:

Design and install Master Plan Sewer Improvements per Exhibits E and F of the Development Agreement as follows:

- A. Install a Master Plan 21-inch sewer main in Euclid Ave between Eucalyptus Ave and Merrill Ave.
- B. Install a Master Plan 30-inch sewer main in Merrill Ave between Sultana Ave and Euclid Ave.
- C. Install a Master Plan 36-inch sewer main in Euclid Avenue between Merrill Avenue and Kimball Avenue with a connection to the existing 60-inch or 54-inch IEUA Kimball Interceptor Trunk Sewer main at Kimball Ave.
- D. Install an 8-inch sewer main in Sultana Ave from the point of connection for Parcel 8 to Merrill Ave.
- E. The Sultana Ave sewer main design shall follow the TPM 20016 Sanitary Sewer Analysis, dated 07/14/2020, and any deviation from this design shall require the Sewer Analysis to be updated and resubmitted to OMUC for review and approval.
- F. The proposed sewer point of connection for this Parcel map is in Kimball Ave to the 60-inch or 54-inch IEUA Kimball Interceptor Trunk Sewer main. The proposed sewer connection requires approval of a new sewer Regional Connection from the Inland Empire Utilities Agency (IEUA). The applicant must satisfy the following requirements for the proposed Sewer System Point of Connection:
 - i. Regional Connection Approval: The applicant shall submit a written request letter to the City for a new Regional Sewer Connection. The request letter shall include:

an exhibit that shows the tributary area of the Regional Connection; the proposed sewer system main connection through the proposed Regional Connection; IEUA record drawing number, station number and manhole number or the connection point; and a plan and profile detail of the manhole connection and any modification proposed to the manhole. Once received from the applicant, the City will request the new Regional Connection from IEUA. If approved by IEUA, the applicant shall be responsible for meeting all terms, conditions, standards, and requirements IEUA has for the Regional Connection.

- G. Each occupant of the building, or units, shall apply for a Wastewater Discharge Permit for their Establishment, and shall comply with all the requirements of their Wastewater Discharge Permit. Requirements of Wastewater Discharge Permit may include, but not limited to including possibly installing a monitoring manhole, clarifier, or other sewer pretreatment equipment.

D. WATER

- 2.27 A _____ inch water main is available for connection by this project in _____ (Ref: Water plan bar code: _____)
- 2.28 Design and construct a water main extension. A water main is not available for direct connection. The closest main is approximately 13,200 feet away.
- 2.29 Other conditions:

Unless otherwise indicated, design and install Master Plan Potable Water Improvements per Exhibits E and F of the Development Agreement as follows:

- A. Install a Master Plan 24-inch 925 PZ potable water main in Eucalyptus Ave between Carpenter Ave and Grove Ave with a connection to the existing 24-inch 925 PZ potable water main in Eucalyptus Ave.
- B. Install a Master Plan 16-inch 925 PZ potable water main in Eucalyptus Ave between Grove Ave and Euclid Ave.
- C. Install a Master Plan 16-inch 925 PZ potable water main in Euclid Ave between Eucalyptus Ave and Merrill Ave.
- D. Install a Master Plan 16-inch 925 PZ potable water main in Merrill Avenue between Euclid Avenue and Walker Avenue.
- E. Install a Master Plan 16-inch 925 PZ potable water main in Walker Ave between Merrill Ave and Eucalyptus Ave.
- F. Install a Master Plan 30" to 42" 925 PZ potable water main in Grove Ave between Eucalyptus Ave and Chino Ave.
- G. Install a Master Plan 18-inch 1010 PZ potable water main in Chino Ave between Grove Ave and the Cucamonga Creek Channel with a connection to the existing 18-inch 1010 PZ potable water main just west of the Cucamonga Creek Channel.
- H. Install an Interim 1010 PZ to 925 PZ pressure reducing station at the intersection of Grove Ave and Chino Ave.
- I. Phase 2 Water Infrastructure Improvements North of Chino Avenue: The following potable water mains/facilities (final alignments subject to change) are required by the Project, but the Project shall contribute towards the design and construction as described within the Development Agreement:
 - i. Install a Master Plan 42-inch 925 PZ Potable Water main in Grove Avenue between Chino Avenue and Francis Avenue.
 - ii. Install a Master Plan 42-inch 925 PZ Potable Water main in Francis Avenue between Grove Avenue and Bon View Avenue.
 - iii. Install a Master Plan 42-inch 925 PZ Potable Water main in Bon View Avenue between Francis Avenue and Bon View Reservoir Site.
 - iv. Install a Master Plan 9-million gallon reservoir on the Bon View Reservoir Site, two 2,500 GPM groundwater production wells with any treatment necessary to meet water quality standards, and the 16-inch and 24-inch collection mains from the wells to the reservoirs.
- J. Existing 30-inch IEUA Recycled Water main in Eucalyptus Avenue: Pursuant to the Ontario Ranch Business Park Utilities System Map, dated 09/14/2020, the project shall ensure that the PW line maintains all minimum cover and separation requirements from the existing IEUA RW line, especially at PW crossings of the IEUA RW line. This may entail adjusting the vertical alignment of the existing IEUA RW line or the proposed

street grades subject to the approval of the City Engineer and IEUA.

E. RECYCLED WATER

- 2.30 A _____ inch recycled water main is available for connection by this project in _____. (Ref: Recycled Water plan bar code: _____)
- 2.31 Design and construct an on-site recycled water system for this project. A recycled water main does exist in the vicinity of this project.
- 2.32 Design and construct an on-site recycled water ready system for this project. A recycled water main does not currently exist in the vicinity of this project, but is planned for the near future. If Applicant would like to connect to this recycled water main when it becomes available, the cost for the connection shall be borne solely by the Applicant.
- 2.33 Submit two (2) hard copies and one (1) electronic copy, in PDF format, of the Engineering Report (ER), for the use of recycled water, to the OMUC for review and subsequent submittal to the California Department of Public Health (CDPH) for final approval.

Note: The OMUC and the CDPH review and approval process will be approximately three (3) months. Contact the Ontario Municipal Utilities Company at (909) 395-2647 regarding this requirement.

- 2.34 Other conditions:

Design and install Master Plan Recycled Water Improvements per Exhibits E and F of the Development Agreement as follows:

- A. Install a Master Plan 8-inch 930 PZ recycled water main in Euclid Ave between Eucalyptus Ave and Merrill Ave with a connection to the existing 30-inch IEUA Recycled Water main in Eucalyptus Ave.
- B. Install a Master Plan 8-inch 930 PZ recycled water main in Merrill Ave between Euclid Ave and Sultana Ave.
- C. Install an 8-inch 930 PZ recycled water main in Sultana Ave between Merrill Ave and Eucalyptus Ave with a connection to the existing 30-inch IEUA recycled water main in Eucalyptus Ave.

F. TRAFFIC / TRANSPORTATION

- 2.35 Submit a focused traffic impact study, prepared and signed by a Traffic/Civil Engineer registered in the State of California. The study shall address, but not be limited to, the following issues as required by the City Engineer:
 - 1. On-site and off-site circulation
 - 2. Traffic level of service (LOS) at 'build-out' and future years
 - 3. Impact at specific intersections as selected by the City Engineer
- 2.36 New traffic signal installations shall be added to Southern California Edison (SCE) customer account number # 2-20-044-3877.
- 2.37 Other conditions:
 - A. Euclid Ave (State Route 83) is under the jurisdiction of the California Department of Transportation (Caltrans). The Applicant/Developer is solely responsible to ascertain Caltrans requirements for Project approval and permit issuance.
 - B. Perform all mitigation measures and operational improvements in accordance with the Traffic Impact Analysis by Urban Crossroads dated July 24, 2019, and to the satisfaction of the City Engineer.
 - C. Design and construct new traffic signal on Sultana Ave at Eucalyptus Ave and Merrill Ave. The new traffic signal shall include video detection, CCTV, interconnect cable and conduit, emergency vehicle preemption systems and bicycle detection to the satisfaction of the City Engineer. All new signal equipment shall be installed at its ultimate location.
 - D. Design and construct modifications to the existing traffic signal on Euclid Ave at Eucalyptus Ave and Euclid Ave at Merrill Ave. The traffic signal modification shall address relocation of any equipment including video detection, CCTV, interconnect

- cable and conduit, emergency vehicle preemption systems, and bicycle detection to the satisfaction of the City Engineer. All new signal equipment shall be installed at its ultimate location.
- E. Euclid Ave and Merrill Ave are designated truck routes in the City of Ontario. The Applicant/Developer shall be responsible to design and construct concrete pavement at the following intersections in accordance with City of Ontario Standard Drawing No. 1207:
 - i. Euclid Ave at Eucalyptus Ave
 - ii. Euclid Ave at Merrill Ave
 - F. Proposed driveways on Euclid Ave shall be restricted to right-in/right-out access only. On-site signage and pavement markings shall be provided for driveway access restrictions.
 - G. Design and construct all driveway approaches in accordance with City of Ontario Standard Drawing No. 1204 for Commercial Driveway Approach. No decorative concrete shall be allowed in the public street right-of-way.
 - H. Design and construct a bus pad to serve future stop on the south side of Eucalyptus Ave, east of Euclid Ave. Pad shall be designed in accordance with Omnitrans requirements and to the satisfaction of the City Engineer.
 - I. Design and construct a bus pad to serve future stop on the north side of Merrill Avenue, West of Sultana Avenue. Pad shall be designed in accordance with Omnitrans requirements and to the satisfaction of the City Engineer.
 - J. Design and construct a bus turnout on the east side Euclid Ave, north of Merrill Ave. Bus turnout shall be designed in accordance with Omnitrans requirements and to the satisfaction of the City Engineer.
 - K. Engineer-of-record shall meet with City Engineering staff prior to starting signing and striping, traffic signal, and street lighting design.
 - L. The applicant/developer shall obtain all rights-of-way necessary to construct all required improvements.
 - M. All landscaping, block walls, and other obstructions shall be compatible with the stopping sight distance requirements per City of Ontario Standard Drawing No. 1309.

G. DRAINAGE / HYDROLOGY

- 2.38 A _____ inch storm drain main is available to accept flows from this project in _____.
 (Ref: Storm Drain plan bar code: _____)
- 2.39 Submit a hydrology study and drainage analysis, prepared and signed by a Civil Engineer registered in the State of California. The study shall be prepared in accordance with the San Bernardino County Hydrology Manual and City of Ontario standards and guidelines. Additional drainage facilities, including, but not limited to, improvements beyond the project frontage, may be required to be designed and constructed, by Applicant, as a result of the findings of this study.
- 2.40 An adequate drainage facility to accept additional runoff from the site does not currently exist downstream of the project. Design and construct a storm water detention facility on the project site. 100 year post-development peak flow shall be attenuated such that it does not exceed 80% of pre-development peak flows, in accordance with the approved hydrology study and improvement plans.
- 2.41 Submit a copy of a recorded private drainage easement or drainage acceptance agreement to the Engineering Department for the acceptance of any increase to volume and/or concentration of historical drainage flows onto adjacent property, prior to approval of the grading plan for the project.
- 2.42 Comply with the City of Ontario Flood Damage Prevention Ordinance (Ordinance No. 2409). The project site or a portion of the project site is within the Special Flood Hazard Area (SFHA) as indicated on the Flood Insurance Rate Map (FIRM) and is subject to flooding during a 100 year frequency storm. The site plan shall be subject to the provisions of the National Flood Insurance Program.

2.43 Other conditions:

Design and construct Master Plan Storm Drain Improvements per Exhibits E and F of the Development Agreement as follows:

- A. Design and construct a 9.5'x 9.5' RCB storm drain line on Merrill Ave from Euclid Ave to Sultana Ave consistent with the Master Plan of Drainage.
- B. Design and construct a 66" to 90" storm drain line on Eucalyptus Ave from Euclid Ave to Sultana Ave consistent with the Master Plan of Drainage.
- C. Design and construct a 30" storm drain line on Sultana Ave from Eucalyptus Ave to Merrill Ave.
- D. Design and construct a 108" storm drain line on Euclid Ave from Eucalyptus Ave to Merrill Ave consistent with the Master Plan of Drainage.
- E. Pay an in-lieu fee of \$2,446,191 for the construction of the ultimate storm drain improvements on Euclid Ave south of Merrill Ave.
- F. Mitigate flooding of existing storm drain facilities downstream of the project site, in the City of Chino, caused by the project, to the satisfaction and approval of the City of Chino and City of Ontario.
- G. Applicant/Developer shall be responsible for the plan and profile drawings of the ultimate storm drain improvements on Euclid Ave from Merrill Ave to ultimate point of connection south to Pine Avenue, in the City of Chino, to the satisfaction of the City Engineer.
- H. Design and construct storm drain bleeder line or alternative interim connection at the discretion of the City on Euclid Ave south of Merrill Ave. This shall connect to the storm drain lines on Merrill Ave e/o Euclid Ave and Euclid Ave n/o Merrill Ave.

H. STORM WATER QUALITY / NATIONAL POLLUTANT DISCHARGE AND ELIMINATION SYSTEM (NPDES)

2.44 401 Water Quality Certification/404 Permit – Submit a copy of any applicable 401 Certification or 404 Permit for the subject project to the City project engineer. Development that will affect any body of surface water (i.e. lake, creek, open drainage channel, etc.) may require a 401 Water Quality Certification from the California Regional Water Quality Control Board, Santa Ana Region (RWQCB) and a 404 Permit from the United States Army Corps of Engineers (USACE). The groups of water bodies classified in these requirements are perennial (flow year round) and ephemeral (flow during rain conditions, only) and include, but are not limited to, direct connections into San Bernardino County Flood Control District (SBCFCD) channels.
If a 401 Certification and/or a 404 Permit are not required, a letter confirming this from Applicant's engineer shall be submitted.
Contact information: USACE (Los Angeles District) (213) 452-3414; RWQCB (951) 782-4130.

2.45 **Submit a Water Quality Management Plan (WQMP). This plan shall be approved by the Engineering Department prior to approval of any grading plan. The WQMP shall be submitted, utilizing the current San Bernardino County Stormwater Program template, available at: <http://www.sbcounty.gov/dpw/land/npdes.asp>.**

2.46 Design and construct a Connector Pipe Trash Screen or equivalent Trash Treatment Control Device, per catch basin located within or accepting flows tributary of a Priority Land Use (PLU) area that meets the Full Capture System definition and specifications, and is on the Certified List of the State Water Resources Control Board. The device shall be adequately sized per catch basin and include a deflector screen with vector control access for abatement application, vertical support bars, and removable component to facilitate maintenance and cleaning.

2.47 Other conditions:

- A. Design and construct two (2) debris separation baffle boxes or equivalent alternative approved devices to satisfy the statewide trash mandate at the intersection of Euclid Ave and Merrill Ave.

J. SPECIAL DISTRICTS

- 2.48 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2353 to initiate the CFD application process.
- 2.49 Other conditions: _____

K. FIBER OPTIC

- 2.50 Design and construct fiber optic system to provide access to the City's conduit and fiber optic system per the City's Fiber Optic Master Plan. Building entrance conduits shall start from the closest OntarioNet hand hole constructed along the project frontage in the ROW and shall terminate in the main telecommunications room for each building. Conduit infrastructure shall interconnect with the primary and/or secondary backbone fiber optic conduit system at the nearest OntarioNet hand hole. Limits of work are generally located along the project frontages of Merrill Ave, Eucalyptus Ave, and Euclid Ave.
- 2.51 Refer to the City's Fiber Optic Master Plan for design and layout guidelines. Contact the Broadband Operations Department at (909) 395-2000, regarding this requirement.

L. Solid Waste

- 2.52 Onsite solid waste shall be designed in accordance with the City's Solid Waste Manual location at:
<http://www.ontarioca.gov/municipal-utilities-company/solid-waste>
- 2.53 Other conditions:
 - A. Final Solid Waste Handling Plan (SWHP): The TPM 20016 Conceptual Solid Waste Handling Plan dated 05/20/20, shall be updated to meet all conditions and revised into a Final SWHP. Prior to approval of the any building permits, a Final Solid Waste Handling Plan Sheet shall be submitted accompanying the Precise Grading Plan Submittal to the City/OMUC for review and approval. See *Solid Waste Handling Plan (SWHP) Requirements document* for details.
 - i. Organics Separation and Collection: This site shall comply with the Requirements of State Assembly Bill AB1826, which requires organic waste to be diverted and collected separately from recycling and other refuse wastes.
 - ii. At minimum this site requires a trash enclosure sized to store three 4-cubic-yard bins (one for refuse, one for recycling, and one for organics) for each potential office area of each building.
 - B. Final Integrated Waste Management Report (IWMR): The applicant shall submit a Final Integrated Waste Management Report for review and approval with the Precise Grading Plan. This report shall address the management of all integrated waste (Refuse, Recycling, Organics, etc.). The IWMR shall demonstrate compliance with the "Integrated Waste Management Report Requirements" document.

3. PRIOR TO ISSUANCE OF A CERTIFICATE OF OCCUPANCY, APPLICANT SHALL:

- 3.01 Set new monuments in place of any monuments that have been damaged or destroyed as a result of construction of the subject project. Monuments shall be set in accordance with City of Ontario standards and to the satisfaction of the City Engineer.

- 3.02 Complete all requirements for recycled water usage.**
 - 1) Procure from the OMUC a copy of the letter of confirmation from the California Department of Public Health (CDPH) that the Engineering Report (ER) has been reviewed and the subject site is approved for the use of recycled water.
 - 2) Obtain clearance from the OMUC confirming completion of recycled water improvements and passing of shutdown tests and cross connection inspection, upon availability/usage of recycled water.
 - 3) Complete education training of on-site personnel in the use of recycled water, in accordance with the ER, upon availability/usage of recycled water.
- 3.03 The applicant/developer shall submit all final survey documents prepared by a Licensed Surveyor registered in the State of California detailing all survey monuments that have been preserved, revised, adjusted or set along with any maps, corner records or Records of Survey needed to comply with these Conditions of Approvals and the latest edition of the California Professional Land Survey Act. These documents are to be reviewed and approved by the City Survey Office.**
- 3.04 NMC Projects: For developments located at an intersection of any two collector or arterial streets, the applicant/developer shall set a monument if one does not already exist at that intersection. Contact the City Survey office for information on reference benchmarks, acceptable methodology and required submittals.**
- 3.05 Confirm payment of all Development Impact Fees (DIF) to the Building Department.**
- 3.06 Submit electronic copies (PDF and Auto CAD format) of all approved improvement plans, studies and reports (i.e. hydrology, traffic, WQMP, etc.).**

4. PRIOR TO FINAL ACCEPTANCE, APPLICANT SHALL:

- 4.01 Complete all Conditions of Approval listed under Sections 1-3 above.**
- 4.02 Pay all outstanding fees pursuant to the City of Ontario Municipal Code, including but not limited to, plan check fees, inspection fees and Development Impact Fees.**
- 4.03 The applicant/developer shall submit a written request for the City's final acceptance of the project addressed to the City Project Engineer. The request shall state that all Conditions of Approval have been completed and shall be signed by the applicant/developer. Upon receipt of the request, review of the request shall be a minimum of 10 business days. Conditions of Approval that are deemed incomplete by the City will cause delays in the acceptance process.**
- 4.04 Submit record drawings (mylar and PDF) for all public improvements identified within Section 2 of these Conditions of Approval.**

EXHIBIT 'A'

**ENGINEERING DEPARTMENT
First Plan Check Submittal Checklist**

Project Number: PMTT18-011, PDEV18-036, and/or Parcel Map No. 20016

The following items are required to be included with the first plan check submittal:

1. **A copy of this check list**
2. **Payment of fee for Plan Checking**
3. **One (1) copy of Engineering Cost Estimate (on City form) with engineer's wet signature and stamp.**
4. **One (1) copy of project Conditions of Approval**
5. **Include a PDF (electronic submittal) of each required improvement plan at every submittal.**
6. **Two (2) sets of Potable and Recycled Water demand calculations (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size).**
7. **Three (3) sets of Public Street improvement plan with street cross-sections**
8. **Three (3) sets of Private Street improvement plan with street cross-sections**
9. **Four (4) sets of Public Water improvement plan (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size)**
10. **Four (4) sets of Recycled Water improvement plan (include recycled water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size and an exhibit showing the limits of areas being irrigated by each recycled water meter)**
11. **Four (4) sets of Public Sewer improvement plan**
12. **Five (5) sets of Public Storm Drain improvement plan**
13. **Three (3) sets of Public Street Light improvement plan**
14. **Three (3) sets of Signing and Striping improvement plan**
15. **Three (3) sets of Fiber Optic plan (include Auto CAD electronic submittal)**
16. **Three (3) sets of Dry Utility plans within public right-of-way (at a minimum the plans must show existing and ultimate right-of-way, curb and gutter, proposed utility location including centerline dimensions, wall to wall clearances between proposed utility and adjacent public line, street work repaired per Standard Drawing No. 1306. Include Auto CAD electronic submittal)**
17. **Three (3) sets of Traffic Signal improvement plan and One (1) copy of Traffic Signal Specifications with modified Special Provisions. Please contact the Traffic Division at (909) 395-2154 to obtain Traffic Signal Specifications.**
18. **Two (2) copies of Water Quality Management Plan (WQMP), including one (1) copy of the approved Preliminary WQMP (PWQMP).**
19. **One (1) copy of Hydrology/Drainage study**
20. **One (1) copy of Soils/Geology report**

- 21. **Payment for Final Map/Parcel Map processing fee**
- 22. **Three (3) copies of Final Map/Parcel Map**
- 23. **One (1) copy of approved Tentative Map**
- 24. **One (1) copy of Preliminary Title Report (current within 30 days)**
- 25. **One (1) copy of Traverse Closure Calculations**
- 26. **One (1) set of supporting documents and maps (legible copies): referenced improvement plans (full size), referenced record final maps/parcel maps (full size, 18"x26"), Assessor's Parcel map (full size, 11"x17"), recorded documents such as deeds, lot line adjustments, easements, etc.**
- 27. **Two (2) copies of Engineering Report and an electronic file (include PDF format electronic submittal) for recycled water use**
- 28. **Other:** _____

CITY OF ONTARIO

MEMORANDUM

TO: Henry Noh, Planning Department

FROM: Douglas Sorel, Police Department

DATE: November 21, 2018

SUBJECT: PDEV18-036 – A DEVELOPMENT PLAN TO CONSTRUCT EIGHT BUILDINGS AT THE NORTH-EAST CORNER OF EUCLID AVENUE AND MERRILL AVENUE

The “Standard Conditions of Approval” contained in Resolution No. 2017-027 apply. The applicant shall read and be thoroughly familiar with these conditions, including, but not limited to, the requirements below.

- Required lighting for walkways, driveways, doorways, parking lots, hallways, stairwells, and other areas used by the public shall be provided. Lights shall operate via photosensor. Photometrics shall be provided to the Police Department and include the types of fixtures proposed and demonstrate that such fixtures meet the vandal-resistant requirement. Planned landscaping shall not obstruct lighting.
- Rooftop addresses shall be installed on the buildings as stated in the Standard Conditions. The numbers should be installed away from any rooftop obstructions and located as close to the main entrance to each building as possible. Addresses shall be painted in reflective white paint on a flat black background and oriented with the bottom of the numbers towards the addressed street.
- The Applicant shall comply with all construction site security requirements as stated in OMC Section 4-11.11.

Additionally, the Ontario Police Department places the following conditions on the project:

- Each digit of the rooftop addresses shall be a minimum 6 feet tall and 2 foot wide.

The Applicant is invited to contact Douglas Sorel at (909) 408-1873 with any questions or concerns regarding these conditions.

<input checked="" type="checkbox"/>	A Preliminary Landscape Plan (dated 5/11/2020) meets the Standard Conditions for New Development and has been approved with the consideration that the following conditions below be met upon submittal of the landscape construction documents.
-------------------------------------	---

<input type="checkbox"/>	A Preliminary Landscape Plan (dated) has not been approved. Corrections noted below are required prior to Preliminary Landscape Plan approval.
--------------------------	---

A RESPONSE SHEET IS REQUIRED WITH RESUBMITTAL OR PLANS WILL BE RETURNED AS INCOMPLETE

Previous Comments Civil/Site Plans

1. Show corner ramp and sidewalk per city standard drawing 1213, with max 10' or 13' of ramp and sidewalk behind at corners; show a minimum 4' of concrete behind the ramp, maximum 6' to reduce expanse of concrete at corners.
2. Add Note: for compaction to be no greater than 85% at landscape areas. All finished grades at 1 1/2" below finished surfaces. Slopes to be maximum 3:1. Revise all 2:1 slopes.
3. Storm water infiltration devices located in landscape areas shall be reviewed and plans approved by the Landscape Planning Division prior to permit issuance. Any storm water devices in parkway areas shall not displace street trees.
4. Adjust DG trail to end prior to the corners to allow for monumentation and a safer transition to corner ramp. OK to end parkway landscape before corner utilities.
5. After a project's entitlement approval, the applicant shall pay all applicable fees for landscape plan check and inspections at a rate established by resolution of the City Council. Fees are:

Plan Check—5 or more acres.....	\$2,326.00
Inspection—Construction (up to 3 inspections per phase).....	<u>\$278.00</u>
Total.....	\$2,604.00
Inspection—Field – any additional.....	\$83.00

CONSISTENCY DETERMINATION REPORT

CD No.: 2018-074
PALU No.: _____

PROJECT CONDITIONS

The project is located within Safety Zone 6 the Chino Airport Influence Area, the project shall comply with the attached conditions.

1. The project shall maintain a minimum of 10% open land for the project net area. The project shall provide 8.4 acres of open land.
2. Open Land must have a minimum dimensions of (75 feet by 300 feet). Open Land area must be free of structures and other major obstacles such as walls, large trees or poles (greater than 4 inches in diameter, measured 4 feet above the ground), and overhead wires.
4. The attached open space exhibit identifies Eucalyptus Avenue and Merrill Avenue for being the primary acceptable locations to meet open land requirements.
5. The attached open land exhibit also identifies the interior truck yards as an acceptable location for meeting the open land requirements. The area within the truck yard designated for open land shall be free of permanent structures and other major obstacles such as walls, large trees or poles (greater than 4 inches in diameter, measured 4 feet above the ground), and overhead wires.
6. The maximum height limit for the project site is 130 feet and as such, any construction equipment such as cranes or any other equipment/permanent structures exceeding 130 feet in height will need a determination of "No Hazard" from the FAA. An FAA Form 7460-1 for any temporary objects will need to be filed with the FAA and approved prior to operating such equipment on the project site during construction.

FILE NOS: PMTT20-001 and PDEV20-001

SUBJECT: A Tentative Parcel Map (File No. PMTT20-001/TPM 20187) to subdivide 15.74 acres of land into four parcels in conjunction with a Development Plan (File No. PDEV20-001) to construct four industrial buildings totaling 355,254 square feet, located at the southeast corner of Grove Avenue and Francis Street, within the Business Park land use district of the Grove Avenue Specific Plan; (APNs: 0113-451-14 & 0113-451-27) **submitted by EBS Realty Partners, LLC.**

PROPERTY OWNER: PSIP EBS FRANCIS, LLC

RECOMMENDED ACTION: That the Planning Commission consider and approve File Nos. PMTT20-001 (TPM 20187) and PDEV20-001, pursuant to the facts and reasons contained in the staff report and attached resolutions, and subject to the conditions of approval contained in the attached departmental reports.

PROJECT SETTING: The project site is comprised of 15.74 acres of land located at southeast corner of Grove Avenue and Francis Street, within the Business Park land use district of the Grove Avenue Specific Plan and is depicted in Figure 1: Project Location, below. The Project site is comprised of two contiguous lots. The northern parcel (APN: 0113-451-27) is presently vacant and the southern parcel (APN: 0113-451-14; 1945 South Grove Avenue) was developed in phases during the 1970s and 1980s, with an industrial building that is approximately 105,000 square feet in size, in conjunction with a private athletic field (soccer field, baseball field, basketball court, and paved court areas) that was utilized by the company to provide on-site recreational activities for their employees. The existing surrounding land uses, zoning, and general plan and specific plan land use designations are summarized in the "Surrounding Zoning & Land Uses" table located in the Technical Appendix of this report.

PROJECT ANALYSIS:

(1) Background — On May 18, 1993, the City Council approved the Grove Avenue Specific Plan (File No. 4388-SP) and certified the Grove Avenue Corridor Specific Plan Environmental Impact Report (EIR 90-2). The Grove Avenue Specific Plan established the land use designations, development standards, and design guidelines for approximately 250 acres of land, which included the potential development of 2.9 million square feet of light industrial, office/commercial, and commercial land uses.

In 2010, The Ontario Plan ("TOP") was adopted by the City Council, approving the Policy Plan (general plan) Land Use Plan (Exhibit LU-01) that changed the land use designations of several properties within certain areas of the Grove Avenue Specific Plan, to Business Park. To date, the City has been processing land use changes within Specific Plans, on an as needed basis, to achieve consistency with TOP when new development projects are proposed. The adoption of TOP changed the Policy Plan land use designation of the Project site (1935 South Grove Avenue) from Commercial to Business Park.

On January 28, 2020, the Applicant submitted two applications, a Development Plan and Tentative Parcel Map (File Nos. PDEV20-001 and PMTT20-001), which include the property located at 1945 South Grove Avenue. To facilitate the proposed applications, a Specific Plan Amendment (File No. PSPA20-004) was processed and approved by the City Council on August 18, 2020, that changed the Grove Avenue Specific Plan land use designation for 1945 South Grove Avenue, from Office/Commercial to Business Park, establishing consistency with TOP and facilitating the proposed industrial project applications described below.

- A Tentative Parcel Map (File No. PMTT20-001/TPM 20187) to subdivide 15.74 acres of land into four parcels.
- A Development Plan (File No. PDEV20-001) to construct four industrial buildings totaling 355,254 square feet.

(2) Tentative Parcel Map — The proposed Tentative Parcel Map will subdivide the Project site into four parcels (see Exhibit B – Tentative Parcel Map, attached) to facilitate the construction of four industrial buildings totaling 355,254 square feet. The parcels range in size from 2.1 to 5.6 acres, as shown in the Tentative Parcel Map summary table. The minimum parcel size required for the Business Park land use district of the Grove Avenue Specific Plan is one acre, which the Project exceeds.

Tentative Parcel Map 20187 Summary Table	
Parcel No.	AC
1	2.489 AC
2	2.129 AC
3	5.617 AC
4	5.508 AC
TOTAL	15.74 AC

(3) Site Design/Building Layout — Proposed, is the construction of four industrial buildings totaling 355,254 square feet on two lots totaling 15.74 acres in area. The building sizes range from 52,584 to 124,012 square feet and the Project has an overall Floor Area Ratio ("FAR") of 0.52. The

Project will provide parking along the western property line (facing Grove Avenue), adjacent to each building's office area and between each of the proposed buildings. The Project will provide 12-foot high tilt-up screen walls to screen tractor-trailer loading areas from Grove Avenue and an 8-foot high decorative tubular steel fence will be provided along the east, north and south property lines to secure the property.

The Applicant is proposing to develop the site in two phases (see Exhibit C – Site Plan, attached), allowing the tenant of the existing building the ability to remain on-site until their lease terminates at the end of 2021 or during the construction of Phase 1. Phase 1 includes the construction and associated right-of-way improvements with Buildings 1, 2, and 3, and does not impact the existing site conditions, access, or parking of the existing building, as shown on Exhibit C1 – Phase 1 Site Plan, attached. Phase 1 includes interim improvements between Building 1 and the existing building, which includes the construction of a 34-foot wide drive aisle in an east-west direction, to provide emergency vehicle access around Building 1. Improvements also include a 6-foot wide landscape planter adjacent to Building 1 that will remain in Phase 2, and a 5-foot wide planter located along the southern property line of Building 1 (Parcel 3), that will demarcate the existing building site from the northern portion of the site. Phase 2 includes the demolition of the existing building and the construction of Building 4, as shown on Exhibit C2 – Phase 2 Site Plan, attached. Phase 2 improvements include the reconfiguration of the areas between Building 1 and Building 4, which consists of double-loaded parking, with a 26-foot wide drive aisle. The development characteristics of each proposed building is described below.

- Building 1 (Parcel 3 – Phase 1) is an interior lot located north of the existing building and consists of a 124,012 square foot warehouse/distribution building, having a FAR of 0.51. Building 1 is oriented east-west, with dock-high loading doors facing north, and office entries facing west, toward Grove Avenue. The building has been designed with one office area located at the northwest corner of the building. The building is setback approximately 88 feet from the west property line (Grove Avenue), 40 feet from the south property line, approximately 70 feet from the north property line, and 41 feet from the east property line.

The yard area will be screened from view of public streets by the proposed building. The north facing portion of the building was designed in a U-shaped configuration to screen the tractor-trailer loading areas. The building wall containing the dock-high loading doors is recessed approximately 60 feet behind the main building line, fully blocking the view of loading activities from the public street.

- Building 2 (Parcel 2 – Phase 1) is centrally located on the Project site and consists of a 52,584 square foot warehouse/distribution building, having a FAR of 0.57. Building 3 is oriented east-west, with dock high loading doors facing north, and the office entry is located at the northwest corner of the proposed building. The building is setback approximately 80 feet from the north property line, one-foot

from the south property line, 40 feet from the west property line (facing Grove Avenue), and 4 feet from the east property line.

The yard area will be screened from view of public streets by a 12-foot high screen wall with view-obstructing gates. In addition, the north-facing portion of the building was designed in a L-shaped configuration to screen the tractor-trailer loading areas. Like Building 1, the building wall containing the dock-high doors is recessed approximately 60 feet behind the main building line, abating views of any loading activities from the public street.

- Building 3 (Parcel 1 – Phase 1) is located at the northwest corner of the Project site, directly north of Building 2. The building has been designed to mirror Building 2's site and floor plan layout, with dock-high loading doors facing Building 2's dock-high loading doors. Building 3 consists of a 59,023 square foot warehouse/distribution building, having a FAR of 0.54. Building 3 is oriented east-west, with dock-high loading doors facing south, and the office entry located at the southeast corner of the proposed building. The building is setback approximately 20 feet from the north property line (facing Francis Street), approximately 78 feet from the south property line, 40 feet from the west property line (facing Grove Avenue), and 4 feet from the east property line.

The tractor-trailer yard area will be screened from view of public streets by a 12-foot high screen wall, with view-obstructing gates. In addition, the south facing portion of the building was designed in a L-shaped configuration to screen the tractor-trailer loading areas. The building wall containing the dock-high doors is recessed approximately 60 feet behind the main building line, abating views of any loading activities from the public street.

- Building 4 (Parcel 4 – Phase 2) occupies the southern portion of the Project site (existing building location), south of Building 3, and is a reverse of the Building 3 site plan. Building 4, consists of a 119,635 square foot warehouse/distribution building, having a FAR of 0.50, and is orientated in an east-west direction, with dock-high loading areas facing south, and an office entry located at the southwest corner of the proposed building. The building is setback approximately 40 feet from the north property line, approximately 75 feet from the south property line, 88 feet from the west property line (facing Grove Avenue), and approximately 41 feet from the east property line.

The yard area will be screened from view of public streets by a 12-foot high screen wall, with view-obstructing gates. In addition, the south-facing portion of the building was designed in a U-shaped configuration, screening the tractor-trailer loading areas from public view. The building wall containing the dock-high loading doors is recessed approximately 60 feet behind the main building line, abating views of any loading activities from the public street.

(4) Site Access/Circulation — The Project site will have four access points from Grove Avenue (see Exhibit C – Site Plan, attached). Buildings 2 and 3, located on the northern portion of the Project site, will have one point of access from Grove Avenue via a 50-foot wide shared driveway that is located approximately 300 feet south of the Francis Street. Building 1 will have primary access from Grove Avenue, via a 40-foot wide driveway located approximately 650 feet south of Grove Street, and a shared 30-foot wide driveway centered between Buildings 1 and 4. In addition to the shared driveway, Building 4 will take primary access from Grove Avenue, via a 40-foot wide driveway located at southwest corner of Project site.

A 26-foot wide north-south drive aisle is proposed along the western portion of the site, between Buildings 1 and 4 connecting double-loaded parking lots across the Grove Avenue frontage, while maintaining a 20-foot landscape setback. Due to the expansive widths and lengths of Buildings 1 and 4, the internal drive-aisles all exceed the minimum 26-foot wide fire emergency access lane requirement, providing adequate maneuvering and access for emergency and solid waste vehicles throughout the Project site.

(5) Parking — The Grove Avenue Specific Plan refers to the Ontario Development Code for parking requirements. The Project (Phases 1 and 2) have provided off-street parking pursuant to the “Warehouse and Distribution” parking standards specified in the Development Code. The Project (build-out Phases 1 and 2) requires a total of 259 parking spaces and 360 parking spaces have been provided, as shown in Table A: Parking Summary, below. Phase 1, which includes parking for Buildings 1, 2, and 3, requires a total of 149 parking spaces and 167 parking spaces will be provided. The existing building and site conditions currently provides 206 parking stalls that will remain in place to serve the existing tenant. Sufficient parking will be provided for the Project for both Phases 1 and 2. The Parking Summary table reflects the Project’s ultimate condition at build-out of both phases.

Table A: Parking Summary						
Bldg. No.	Type of Use	Building Area	Trailer Parking		Vehicle Spaces	
			Required	Provided	Required	Provided
1	Warehouse / Distribution	124,012 SF	4	4	93	139

4	Warehouse / Distribution	119,635 SF	4	4	89	135
Total:					259	360

(6) Architecture — The proposed buildings are of concrete tilt-up construction and all four buildings incorporate the same architectural design theme, with enhanced elements and treatments located at office entries and along street facing elevations (see Exhibit D – Elevations, attached). Architectural elements for all buildings include smooth-

painted concrete in white and grey, and blue and tan tones, tile with a wood grain finish, horizontal and vertical reveals, storefronts with clear anodized aluminum mullions and blue glazing, steel canopies at the main office entries and over second-story windows, and recessed panel sections with contrasting colors. The mechanical equipment will be roof-mounted and obscured from public view by the parapet walls. Staff believes that the proposed Project illustrates the type of high-quality architecture promoted by the Development Code and Grove Avenue Specific Plan. This is exemplified through the use of:

- Articulation in the building footprint, incorporating a combination of recessed and popped-out wall areas;
- Articulation in the building parapet/roof line, which serves to accentuate the building's entries and breaks up large expanses of building wall;
- Variations in building massing; and
- Incorporation of base and top treatments defined by changes in color and horizontal/vertical reveals.

(7) Landscaping — The Project provides an overall landscape coverage of 13.6 percent and requires a minimum 10 percent for interior parcels and 15 percent for corner parcels which have been exceeded, as shown in Table B: Landscape Coverage Percentages, below. The Project provides substantial landscaping along Grove Avenue and Francis Street, at each office element and throughout the parking areas (see Exhibit E – Landscape Plan, attached). The Project includes right-of-way improvements (street widening, curb, gutter, sidewalk, and parkway) along Grove Avenue and Francis Street. The proposed on-site and off-site landscape improvements will assist toward creating a walkable safe area for pedestrians to access the Project site.

The landscape plan incorporates 24-inch box Arizona Sycamore trees in the right-of-way along Grove Avenue and 24-inch box Chinese Elm trees along Francis Street. A combination of 48-inch, 36-inch, 24-inch box, and 15-gallon accent and shade trees will be provided on the Project site, the tree species include Forest Pansy Redbud, Italian Cypress, Chinese Pistache, Coast Live Oak and Brisbane Box. The landscape plan also includes a variety of shrubs, grasses, and groundcovers that are low water usage and drought tolerant, to be planted throughout the Project site. Moreover, each building will be conditioned to include an employee break area, with benches, tables, and shade trees.

Table B: Landscape Coverage Percentages			
Parcel No.	Bldg. No.	Required Landscape Coverage (in %)	Proposed Landscape Coverage (in %)
1	3	10%	10.1%
2	2	10%	14.1%
3	1	15%	19.2%
4	4	10%	10.9%
Total:			13.6%

(8) Traffic Study — The Grove Avenue Specific Plan allows a 0.40 FAR within the Business Park land use district; however, an increase in FAR is permitted if the traffic generating characteristics of the Project do not exceed the number of trips assumed in the Environmental Impact Report (EIR) prepared for the Grove Avenue Specific Plan (adopted by City Council on May 18, 1993). A Traffic Assessment was prepared by the Ganddini Group (dated December 6, 2019), for the Project to support the increase in FAR from 0.40 to 0.52. The Traffic Assessment concluded that the number of trips proposed for the Project will generate approximately 1,714 fewer daily PCE trips compared to the maximum allowable development under the Grove Avenue Specific Plan EIR, including 115 fewer PCE trips during the AM peak hour and 83 fewer PCE trips during the PM peak hour. Furthermore, in 2010, The Ontario Plan ("TOP") and EIR were adopted by the City Council, which approved the land use designation change of several properties within the Grove Avenue Specific Plan, including the Project site, to Business Park. The maximum FAR allowed for the Business Park land use designation is 0.60 FAR, which this Project does not exceed.

(9) Environmental Assessment — A Phase I Environmental Site Assessment (Dated: August 27, 2019) and Phase II Soil Vapor Survey (Dated: October 15, 2019) were prepared by Centec Engineering, due to the previous and existing industrial uses on-site. The Phase I Assessment found that the businesses utilized hazardous materials and generated hazardous wastes over the years; however, there were no underground storage tanks, clarifiers, sumps, plating activities, or other significant issues of environmental concern identified for the subject property. The Phase II, Soil Vapor Survey was prepared by Centec Engineering to determine if significant hazardous waste conditions may be present from current and former industrial manufacturing activities at the site. The investigation was intended to determine if chlorinated solvents, such as PCE, TCE, or other volatile organic compounds ("VOCs") potentially associated with spray booths, injection machines and other industrial activities may be present. Centec Engineering conducted 19 sampling locations in two events, on October 2 and October 10, 2019, which concluded that no further investigations were warranted or recommended based upon the scope and limitations of the Federal EPA and State of California DTSC for evaluating environmental conditions of a property.

(10) Utilities (drainage, sewer) — All necessary public utilities are available to the Project site. Furthermore, the Applicant has submitted a Preliminary Water Quality Management Plan ("PWQMP"), which establishes both Projects' compliance with storm water discharge/water quality requirements. The PWQMP includes site design measures that capture runoff and pollutant transport by minimizing impervious surfaces and maximizes low impact development ("LID") best management practices ("BMPs"), such as retention and infiltration, biotreatment, and evapotranspiration. The PWQMP proposes the use of an underground stormwater infiltration system within the tractor-trailer courtyard areas of each building. Any overflow drainage will be conveyed to a parkway culvert located at southwest corner of the Project site onto Grove Avenue.

COMPLIANCE WITH THE ONTARIO PLAN: The proposed project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan

(General Plan), and City Council Priorities components of The Ontario Plan (TOP). More specifically, the goals and policies of TOP that are furthered by the proposed project are as follows:

(1) City Council Goals.

- Invest in the Growth and Evolution of the City's Economy
- Maintain the Current High Level of Public Safety
- Operate in a Businesslike Manner
- Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

(2) Governance.

Decision Making:

- Goal G1: Sustained decision-making that consistently moves Ontario towards its Vision by using The Ontario Plan as a framework for assessing choices.
 - G1-2 Long-term Benefit. We require decisions to demonstrate and document how they add value to the community and support the Ontario Vision

(3) Policy Plan (General Plan)

Land Use Element:

- Goal LU1: A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.
 - LU1-1 Strategic Growth. We concentrate growth in strategic locations that help create place and identity, maximize available and planned infrastructure, and foster the development of transit.
 - LU1-6 Complete Community: We incorporate a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, employers, workers and visitors have a wide spectrum of choices of where they can live, work, shop and recreate within Ontario. (Refer to Complete Community Section of Community Economics Element).
 - Goal LU2: Compatibility between a wide range of uses.
 - LU2-6: Infrastructure Compatibility: We require infrastructure to be aesthetically pleasing and in context with the community character.

Community Economics Element:

- Goal CE2: A City of distinctive neighborhoods, districts, and corridors, where people choose to be.

- CE2-1 Development Projects. We require new development and redevelopment to create unique, high-quality places that add value to the community.

- CE2-2 Development Review. We require those proposing new development and redevelopment to demonstrate how their projects will create appropriately unique, functional and sustainable places that will compete well with their competition within the region.

- CE2-4 Protection of Investment. We require that new development and redevelopment protect existing investment by providing architecture and urban design of equal or greater quality.

- CE2-5 Private Maintenance. We require adequate maintenance, upkeep, and investment in private property because proper maintenance on private property protects property values.

Safety Element:

- Goal S1: Minimized risk of injury, loss of life, property damage and economic and social disruption caused by earthquake-induced and other geologic hazards.

- S1-1 Implementation of Regulations and Standards. We require that all new habitable structures be designed in accordance with the most recent California Building Code adopted by the City, including provisions regarding lateral forces and grading.

Community Design Element:

- CD2-1 Quality Architecture. We encourage all development projects to convey visual interest and character through:

- Building volume, massing, and height to provide appropriate scale and proportion;
- A true architectural style which is carried out in plan, section and elevation through all aspects of the building and site design and appropriate for its setting; and
- Exterior building materials that are visually interesting, high quality, durable, and appropriate for the architectural style.

- CD2-7 Sustainability. We collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials and construction techniques.

➤ CD2-8 Safe Design. We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintenance of visibility and accessibility, and use of lighting.

➤ CD2-9 Landscape Design. We encourage durable landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits.

➤ CD2-10 Surface Parking Areas. We require parking areas visible to or used by the public to be landscaped in an aesthetically pleasing, safe and environmentally sensitive manner. Examples include shade trees, pervious surfaces, urban run-off capture and infiltration, and pedestrian paths to guide users through the parking field.

➤ CD2-11 Entry Statements. We encourage the inclusion of amenities, signage and landscaping at the entry to neighborhoods, commercial centers, mixed use areas, industrial developments, and public places that reinforce them as uniquely identifiable places.

➤ CD2-12 Site and Building Signage. We encourage the use of sign programs that utilize complementary materials, colors, and themes. Project signage should be designed to effectively communicate and direct users to various aspects of the development and complement the character of the structures.

➤ CD2-13 Entitlement Process. We work collaboratively with all stakeholders to ensure a high degree of certainty in the efficient review and timely processing of all development plans and permits.

▪ Goal CD3: Vibrant urban environments that are organized around intense buildings, pedestrian and transit areas, public plazas, and linkages between and within developments that are conveniently located, visually appealing and safe during all hours.

➤ CD3-1 Design. We require that pedestrian, vehicular, bicycle and equestrian circulation on both public and private property be coordinated and designed to maximize safety, comfort and aesthetics.

➤ CD3-2 Connectivity Between Streets, Sidewalks, Walkways and Plazas. We require landscaping and paving be used to optimize visual connectivity between streets, sidewalks, walkways and plazas for pedestrians.

➤ CD3-3 Building Entrances. We require all building entrances to be accessible and visible from adjacent streets, sidewalks or public open spaces.

- CD3-5 Paving. We require sidewalks and road surfaces to be of a type and quality that contributes to the appearance and utility of streets and public spaces.
- CD3-6 Landscaping. We utilize landscaping to enhance the aesthetics, functionality and sustainability of streetscapes, outdoor spaces and buildings.
 - Goal CD5: A sustained level of maintenance and improvement of properties, buildings and infrastructure that protects the property values and encourages additional public and private investments.
- CD5-1 Maintenance of Buildings and Property. We require all public and privately owned buildings and property (including trails and easements) to be properly and consistently maintained.
- CD5-2 Maintenance of Infrastructure. We require the continual maintenance of infrastructure.

HOUSING ELEMENT COMPLIANCE: The project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE: The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan ("ALUCP"), establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the ALUCP. Any special conditions of approval associated with uses in close proximity to the airport are included in the conditions of approval provided with the attached Resolution.

ENVIRONMENTAL REVIEW: The environmental impacts of this project were previously reviewed in conjunction with The Ontario Plan, File No. PGPA06-001, for which a(n) Environmental Impact Report (State Clearinghouse No. 2008101140) was adopted by the City Council on January 27, 2010. This Application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of project approval and are incorporated herein by this reference.

CONDITIONS OF APPROVAL: See attached department reports.

TECHNICAL APPENDIX:

Surrounding Zoning and Land Use:

	Existing Land Use	General Plan Designation	Zoning Designation	Specific Plan Land Use

RESOLUTION NO.

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PMTT20-001 (TPM 20187), A TENTATIVE PARCEL MAP TO SUBDIVIDE 15.74 ACRES OF LAND INTO FOUR PARCELS, LOCATED AT THE SOUTHEAST CORNER OF GROVE AVENUE AND FRANCIS STREET, WITHIN THE BUSINESS PARK AND LIGHT INDUSTRIAL LAND USE DISTRICTS OF THE GROVE AVENUE SPECIFIC PLAN, AND MAKING FINDINGS IN SUPPORT THEREOF—APNS: 113-451-14 & 113-451-27.

WHEREAS, EBS REALTY PARTNERS, LLC. ("Applicant") has filed an Application for the approval of a Tentative Parcel Map, File No. PMTT20-001 (TPM 20187), as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 15.74 acres of land generally located at the southeast corner of Grove Avenue and Francis Street, within the Business Park land use designation of the Grove Avenue Specific Plan, the northern parcel is presently vacant and the southern parcel is developed with an industrial building that is approximately 105,000 square feet in size, in conjunction with a private athletic field; and

WHEREAS, the property to the north of the Project site is within the Business Park and Commercial land use districts of the Grove Avenue Specific Plan and is developed with a Business Park. The property to the east is within the Business Park land use district of the Grove Avenue Specific Plan and the IG (General Industrial) zoning district and is developed with warehouse and manufacturing land uses. The property to the south is within the Business Park land use district of the Grove Avenue Specific Plan and is developed with warehouse and manufacturing land uses. The property to the west is within the Business Park and Commercial land use districts of the Grove Avenue Specific Plan and is developed with a fast-food restaurant, warehouse, and manufacturing land uses; and

WHEREAS, the proposed Tentative Parcel Map will subdivide the Project site into four parcels to facilitate the construction of four industrial buildings totaling 355,254 square feet. The parcels range in size from 2.1 to 5.6 acres. The minimum parcel size required for the Business Park land use district of the Grove Avenue Specific Plan is one acre, which the Project exceeds; and

WHEREAS, a Development Plan, File No. PDEV20-001, was filed in conjunction with the proposed Tentative Parcel Map to construct four industrial buildings totaling 355,254 square feet; and

WHEREAS, the environmental impacts of this project were previously reviewed in conjunction with File No. PGPA06-001, The Ontario Plan for which an Environmental Impact Report (State Clearinghouse No. 2008101140) was adopted by the City Council on January 27, 2010, and this Application introduces no new significant environmental impacts; and

WHEREAS, the City's "Local Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and act on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan ("ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on October 19, 2020, the Development Advisory Board of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date, voting to issue Decision No. DAB20-064, recommending the Planning Commission approve the Application; and

WHEREAS, on October 27, 2020, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred. NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: *Environmental Determination and Findings.* As the decision-making authority for the Project, the Planning Commission has reviewed and considered the information contained in the previous Certified EIR and supporting documentation. Based upon the facts and information contained in the previous Certified EIR and supporting documentation, the Planning Commission finds as follows:

(1) The environmental impacts of this project were previously reviewed in conjunction with File No. PGPA06-001, The Ontario Plan for which an Environmental Impact Report (State Clearinghouse No. 2008101140) was adopted by the City Council on January 27, 2010.

(2) The previous Certified EIR contains a complete and accurate reporting of the environmental impacts associated with the Project; and

(3) The previous Certified EIR was completed in compliance with CEQA and the Guidelines promulgated thereunder; and

(4) The previous Certified EIR reflects the independent judgment of the Planning Commission; and

(5) The proposed project will introduce no new significant environmental impacts beyond those previously analyzed in the previous Certified EIR, and all mitigation measures previously adopted with the Certified EIR, are incorporated herein by this reference.

SECTION 2: *Subsequent or Supplemental Environmental Review Not Required.* Based on the information presented to the Planning Commission, and the specific findings set forth in Section 1, above, the Planning Commission finds that the preparation of a subsequent or supplemental Certified EIR is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the

Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3: *Housing Element Compliance.* Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the decision-making authority for the Project, the Planning Commission finds that based on the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

SECTION 4: *Ontario International Airport Land Use Compatibility Plan (“ALUCP”) Compliance.* The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the ALUCP, establishing the Airport Influence Area for Ontario International Airport (hereinafter referred to as “ONT”), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the decision-making authority for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting

documentation against the ALUCP compatibility factors, including [1] Safety Criteria (ALUCP Table 2-2) and Safety Zones (ALUCP Map 2-2), [2] Noise Criteria (ALUCP Table 2-3) and Noise Impact Zones (ALUCP Map 2-3), [3] Airspace protection Zones (ALUCP Map 2-4), and [4] Overflight Notification Zones (ALUCP Map 2-5). As a result, the PLANNING COMMISSION, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ALUCP.

SECTION 5: *Concluding Facts and Reasons.* Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing, and upon the specific findings set forth in Section 1 through 4, above, the Planning Commission hereby concludes as follows:

(1) ***The proposed Tentative Parcel Map is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, and applicable area and specific plans, and planned unit developments.*** The proposed Tentative Parcel Map is located within the Business Park land use district of the Policy Plan Land Use Map, and the Business Park land use designation of the Grove Avenue Specific Plan. The proposed subdivision is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, as the Project will contribute to the establishment of “[a] dynamic, progressive city containing distinct neighborhoods and commercial districts that foster a positive sense of identity and belonging among residents, visitors, and businesses” (Goal CD1). Furthermore, the Project will promote the City’s policy to “take actions that are consistent with the City being a leading urban center in Southern California while recognizing the diverse character of our existing viable neighborhoods” (Policy CD1-1 City Identity).

(2) ***The design or improvement of the proposed Tentative Parcel Map is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, and applicable specific plans and planned unit developments.*** The proposed Tentative Parcel Map is located within the Business Park land use district of the Policy Plan Land Use Map, and the Business Park land use designation of the Grove Avenue Specific Plan. The proposed design or improvement of the subdivision is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, as the Project will provide “[a] high level of design quality resulting in public spaces, streetscapes, and developments that are attractive, safe, functional and distinct (Goal CD2). Furthermore, the Project will promote the City’s policy to “collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar

and natural ventilation, building form, mechanical and structural systems, building materials and construction techniques” (Policy CD2-7 Sustainability).

(3) ***The site is physically suitable for the type of development proposed.*** The Project site meets the minimum lot area and dimensions of the Business Park land use designation of the Grove Avenue Specific Plan and is physically suitable for the type of industrial development proposed in terms of zoning, land use and development activity proposed, and existing and proposed site conditions.

(4) ***The site is physically suitable for the density/intensity of development proposed.*** The Project site is proposed for industrial development at with an overall floor area ratio of 0.52. The Project site meets the minimum lot area and dimensions of the Business Park land use designation of the Grove Avenue Specific Plan and is physically suitable for this proposed intensity of development.

(5) ***The design of the subdivision or the proposed improvements thereon, are not likely to cause substantial environmental damage, or substantially and avoidably injure fish or wildlife, or their habitat.*** The project site is not located in an area that has been identified as containing species identified as a candidate, sensitive, or special status species in local or regional plans, policies or regulations or by the California Department of Fish and Wildlife or the U.S. Fish and Wildlife Service, nor does the site contain any riparian habitat or other sensitive natural community, and no wetland habitat is present on site; therefore, the design of the subdivision, or improvements proposed thereon, are not likely to cause substantial environmental damage, or substantially and avoidably injure fish or wildlife, or their habitat.

(6) ***The design of the subdivision, or the type of improvements thereon, are not likely to cause serious public health problems.*** The design of the proposed subdivision, and the right-of-way street improvements existing or proposed on the project site, are not likely to cause serious public health problems, as the project is not anticipated to involve the transport, use, or disposal of hazardous materials during either construction or project implementation, include the use of hazardous materials or volatile fuels, nor are there any known stationary commercial or industrial land uses within close proximity to the subject site that use/store hazardous materials to the extent that they would pose a significant hazard to visitors or occupants to the project site.

(7) ***The design of the subdivision, or the type of improvements thereon, will not conflict with easements acquired by the public at large for access through, or use of property within, the proposed subdivision.*** The proposed subdivision has provided for all necessary public easements and dedications for access through, or use of property within, the proposed subdivision. Furthermore, all such public easements and dedications have been designed pursuant to: (a) the requirements of the Policy Plan component of The Ontario Plan and applicable area plans; (b) applicable specific plans

or planned unit developments; (c) applicable provisions of the City of Ontario Development Code; (d) applicable master plans and design guidelines of the City; and (e) applicable Standard Drawings of the City.

SECTION 6: *Planning Commission Action.* Based upon the findings and conclusions set forth in Sections 1 through 5, above, the Planning Commission hereby APPROVES the herein described Application, subject to each and every condition set forth in the Department reports attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 7: *Indemnification.* The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 8: *Custodian of Records.* The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 9: *Certification to Adoption.* The Secretary shall certify to the adoption of the Resolution.

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a regular meeting thereof held on the 27th day of October 2020, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

Project Description: A Tentative Parcel Map (TPM 20187) to subdivide 15.74 acres of land into 4 parcels located on at the southeast corner of Grove Avenue and Francis Street, within the Business Park land use district of the Grove Avenue Specific Plan (APNs: 113-451-14 & 113-451-27); **submitted by EBS Realty Partners, LLC.**

Prepared By: Lorena Mejia, Senior Planner
Phone: 909.395.2276 (direct)
Email: lmejia@ontarioca.gov

The Planning Department, Land Development Section, conditions of approval applicable to the above-described Project, are listed below. The Project shall comply with each condition of approval listed below:

1.0 Standard Conditions of Approval. The project shall comply with the *Standard Conditions for New Development*, adopted by City Council Resolution No. 2017-027 on April 18, 2017. A copy of the *Standard Conditions for New Development* may be obtained from the Planning Department or City Clerk/Records Management Department.

2.0 Special Conditions of Approval. In addition to the *Standard Conditions for New Development* identified in condition no. 1.0, above, the project shall comply with the following special conditions of approval:

2.1 Time Limits.

(a) Tentative Parcel Map approval shall become null and void 2 years following the effective date of application approval, unless the final parcel/tract map has been recorded, or a time extension has been approved by the Planning Commission pursuant to Development Code Section 2.02.025 (Time Limits and Extensions). This Permit does not supersede any individual time limits specified herein for performance of specific conditions or improvements.

2.2 Subdivision Map.

(a) The Final Parcel Map shall be in conformance with the approved Tentative Parcel Map on file with the City. Variations from the approved Tentative Parcel Map may be reviewed and approved by the Planning Department. A substantial variation from the approved Tentative Parcel Map may require review and approval by the Planning Commission, as determined by the Planning Director.

(b) Tentative Parcel Map approval shall be subject to all conditions, requirements and recommendations from all other departments/agencies provided on the attached reports/memorandums.

(c) Pursuant to California Government Section 66474.9, the subdivider agrees that it will defend, indemnify, and hold harmless the City of Ontario or its agents, officers and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer of this subdivision, which action is brought within the time period provided for in Government Code Section 66499.37. The City of Ontario shall promptly notify the subdivider of any such claim, action or proceeding and the City of Ontario shall cooperate fully in the defense.

2.3 General Requirements. The Project shall comply with the following general requirements:

(a) All construction documentation shall be coordinated for consistency, including, but not limited to, architectural, structural, mechanical, electrical, plumbing, landscape and irrigation, grading, utility and street improvement plans. All such plans shall be consistent with the approved entitlement plans on file with the Planning Department.

(b) The project site shall be developed in conformance with the approved plans on file with the City. Any variation from the approved plans must be reviewed and approved by the Planning Department prior to building permit issuance.

(c) The herein-listed conditions of approval from all City departments shall be included in the construction plan set for project, which shall be maintained on site during project construction.

2.4 Covenants, Conditions and Restrictions (CC&Rs)/Mutual Access and Maintenance Agreements.

(a) CC&Rs shall be prepared for the Project and shall be recorded prior to the issuance of a building permit.

(b) The CC&Rs shall be in a form and contain provisions satisfactory to the City. The articles of incorporation for the property owners association and the CC&Rs shall be reviewed and approved by the City.

(c) CC&Rs shall ensure reciprocal parking and access between parcels.

(d) CC&Rs shall ensure reciprocal parking and access between parcels, and common maintenance of:

(i) Landscaping and irrigation systems within common areas;

(ii) Landscaping and irrigation systems within parkways adjacent to the project site, including that portion of any public highway right-of-way between the property line or right-of-way boundary line and the curb line and also the area enclosed within the curb lines of a median divider (Ontario Municipal Code Section 7-3.03), pursuant to Ontario Municipal Code Section 5-22-02;

(iii) Shared parking facilities and access drives; and

(iv) Utility and drainage easements.

(e) CC&Rs shall include authorization for the City's local law enforcement officers to enforce City and State traffic and penal codes within the project area.

(f) The CC&Rs shall grant the City of Ontario the right of enforcement of the CC&R provisions.

(g) A specific methodology/procedure shall be established within the CC&Rs for enforcement of its provisions by the City of Ontario, if adequate maintenance of the development does not

occur, such as, but not limited to, provisions that would grant the City the right of access to correct maintenance issues and assess the property owners association for all costs incurred.

2.5 Environmental Review.

(a) The environmental impacts of this project were reviewed in conjunction with **The Ontario Plan Environmental Impact Report**, certified by the Ontario City Council on January 27, 2010, in conjunction with File No. PGPA06-001 (City Council Resolution No. 2010-006). This application introduces no new significant environmental impacts. The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. This Application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of project approval, and are incorporated herein by this reference. All previously adopted mitigation measures shall be a condition of project approval, as they are applicable, and are incorporated herein by this reference.

(b) If human remains are found during project grading/excavation/construction activities, the area shall not be disturbed until any required investigation is completed by the County Coroner and Native American consultation has been completed (if deemed applicable).

(c) If any archeological or paleontological resources are found during project grading/excavation/construction, the area shall not be disturbed until the significance of the resource is determined. If determined to be significant, the resource shall be recovered by a qualified archeologist or paleontologist consistent with current standards and guidelines, or other appropriate measures implemented.

2.6 Indemnification. The applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer. The City of Ontario shall promptly notify the applicant of any such claim, action or proceeding, and the City of Ontario shall cooperate fully in the defense.

2.7 Additional Fees.

(a) Within 5 days following final application approval, the Notice of Determination (NOD) filing fee shall be provided to the Planning Department. The fee shall be paid by check, made payable to the "Clerk of the Board of Supervisors", which shall be forwarded to the San Bernardino County Clerk of the Board of Supervisors, along with all applicable environmental forms/notices, pursuant to the requirements of the California Environmental Quality Act (CEQA). Failure to provide said fee within the time specified may result in a 180-day extension to the statute of limitations for the filing of a CEQA lawsuit.

(b) After the Project's entitlement approval, and prior to issuance of final building permits, the Planning Department's Plan Check and Inspection fees shall be paid at the rate established by resolution of the City Council.

DAB MEETING DATE: October 19, 2020

PROJECT NAME / DESCRIPTION: PM-20187, a Tentative Parcel Map to subdivide 15.74 acres of land into four (4) parcels within the Grove Avenue Specific Plan

LOCATION: Southeast corner of Grove Avenue and Francis Street

APPLICANT: EBS Realty Partners

REVIEWED BY: Raymond Lee 10/6/20
 Raymond Lee, P.E. Date
 Assistant City Engineer

APPROVED BY: Khoi Do 10-7-20
 Khoi Do, P.E. Date
 City Engineer

THIS PROJECT SHALL COMPLY WITH THE REQUIREMENTS SET FORTH IN THE GENERAL STANDARD CONDITIONS OF APPROVAL ADOPTED BY THE CITY COUNCIL (RESOLUTION NO. 2017-027) AND THE PROJECT SPECIFIC CONDITIONS OF APPROVAL SPECIFIED IN HEREIN. ONLY APPLICABLE CONDITIONS OF APPROVAL ARE CHECKED. THE APPLICANT SHALL BE RESPONSIBLE FOR THE COMPLETION OF ALL APPLICABLE CONDITIONS OF APPROVAL PRIOR TO PARCEL MAP APPROVAL, ISSUANCE OF PERMITS AND/OR OCCUPANCY CLEARANCE, AS SPECIFIED IN THIS REPORT.

1. PRIOR TO PARCEL MAP APPROVAL, APPLICANT SHALL: Check When Complete

- 1.01 Dedicate to the City of Ontario, the right-of-way, described below:**
 - A. Property line corner 'cut-back' required at the southeast corner of Grove Ave and Francis St.**
- 1.02 Dedicate to the City of Ontario, the following easement(s):** _____
- 1.03 Restrict vehicular access to the site as follows:** _____
- 1.04 Vacate the following street(s) and/or easement(s):**
 - A. All interfering on-site easements shall be quitclaimed, vacated, and/or submit non-interference letter from affected owner/utility company.**
 - B. Existing 12.5 feet wide easement along the east side of Parcels 3 and 4 for railroad and incidental purposes to the City of Ontario**
- 1.05 Submit a copy of a recorded private reciprocal use agreement or easement. The agreement or easement shall ensure, at a minimum, common ingress and egress and joint maintenance of all common access areas and drive aisles. See COA 1.14B.**
- 1.06 Provide (original document) Covenants, Conditions and Restrictions (CC&Rs) as applicable to the project and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&Rs shall provide for, but not be limited to, common ingress and egress, joint maintenance responsibility for all common access improvements, common facilities, parking areas, utilities, median and landscaping improvements and drive approaches, in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project. The CC&Rs shall also address the maintenance and repair responsibility for public improvements/utilities (sewer, water, storm drain, recycled water, etc.) located within open space/easements. In the event of any maintenance or repair of these facilities, the City shall only restore disturbed areas to current City Standards.**
- 1.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at <http://tceplumecleanup.com/>), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658.**
- 1.08 File an application for Reapportionment of Assessment, together with payment of a reapportionment processing fee, for each existing assessment district listed below. Contact the Financial Services Department at (909) 395-2124 regarding this requirement.**
 - (1) _____
 - (2) _____

- 1.09 Prepare a fully executed Subdivision Agreement (on City approved format and forms) with accompanying security as required, or complete all public improvements.
- 1.10 Provide a monument bond (i.e. cash deposit) in an amount calculated by the City's approved cost estimate spreadsheet (available for download on the City's website: www.ci.ontario.ca.us) or as specified in writing by the applicant's Registered Engineer or Licensed Land Surveyor of Record and approved by the City Engineer, whichever is greater.
- 1.11 Provide a preliminary title report current to within 30 days.
- 1.12 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2353 to initiate the CFD application process.
- 1.13 New Model Colony (NMC) Developments:
 - 1) Provide evidence of final cancellation of Williamson Act contracts associated with this tract, prior to approval of any final subdivision map. Cancellation of contracts shall have been approved by the City Council.
 - 2) Provide evidence of sufficient storm water capacity availability equivalents (Certificate of Storm Water Treatment Equivalents).
 - 3) Provide evidence of sufficient water availability equivalents (Certificate of Net MDD Availability).
- 1.14 Other conditions:
 - A. Obtain all off-site rights-of-way/easements necessary to construct the required public improvements identified within Section 2 of these Conditions of Approval.
 - B. Provide private easements for utilities, cross lot drainage, blanket emergency access and reciprocal access across all parcels in favor of all parcels (as needed).
 - C. A 5 feet wide easement for sewer purposes for the benefit of Parcel 2 of Parcel Map No. 2566 through Parcel 1. See COA 2.26A.

2. PRIOR TO ISSUANCE OF ANY PERMITS, APPLICANT SHALL:

**A. GENERAL
 (Permits Includes Grading, Building, Demolition and Encroachment)**

- 2.01 Record Parcel Map No. 20187 pursuant to the Subdivision Map Act and in accordance with the City of Ontario Municipal Code.
- 2.02 Submit a duplicate photo mylar of the recorded map to the City Engineer's office.
- 2.03 Note that the subject parcel is a recognized parcel in the City of Ontario per _____
- 2.04 Note that the subject parcel is an 'unrecognized' parcel in the City of Ontario and shall require a Certificate of Compliance to be processed unless a deed is provided confirming the existence of the parcel prior to the date of _____
- 2.05 Apply for a: Certificate of Compliance with a Record of Survey; Lot Line Adjustment
 - Make a Dedication of Easement.

- 2.06 Provide (original document) Covenants, Conditions and Restrictions (CC&R's), as applicable to the project, and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&R's shall provide for, but not be limited to, common ingress and egress, joint maintenance of all common access improvements, common facilities, parking areas, utilities and drive approaches in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project.

- 2.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at <http://tceplumecleanup.com/>), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658.

- 2.08 **Submit a soils/geology report.**

- 2.09 **Other Agency Permit/Approval: Submit a copy of the approved permit and/or other form of approval of the project from the following agency or agencies:**
 - State of California Department of Transportation (Caltrans)
 - San Bernardino County Road Department (SBCRD)
 - San Bernardino County Flood Control District (SBCFCD)
 - Federal Emergency Management Agency (FEMA)
 - Cucamonga Valley Water District (CVWD) for sewer/water service
 - United States Army Corps of Engineers (USACE)
 - California Department of Fish & Game
 - Inland Empire Utilities Agency (IEUA)
 - Other:**
 - **Southern California Edison (SCE) – for any improvements encroaching into their easements/property**

- 2.10 Dedicate to the City of Ontario the right-of-way described below:

_____ feet on _____

Property line corner 'cut-back' required at the intersection of _____ and _____.

- 2.11 Dedicate to the City of Ontario the following easement(s): _____

- 2.12 **New Model Colony (NMC) Developments:**
 - 1) Submit a copy of the permit from the San Bernardino County Health Department to the Engineering Department and the Ontario Municipal Utilities Company (OMUC) for the destruction/abandonment of the on-site water well. The well shall be destroyed/abandoned in accordance with the San Bernardino County Health Department guidelines.
 - 2) Make a formal request to the City of Ontario Engineering Department for the proposed temporary use of an existing agricultural water well for purposes other than agriculture, such as grading, dust control, etc. Upon approval, the Applicant shall enter into an agreement with the City of Ontario and pay any applicable fees as set forth by said agreement.

- 3) Design proposed retaining walls to retain up to a maximum of three (3) feet of earth. In no case shall a wall exceed an overall height of nine (9) feet (i.e. maximum 6-foot high wall on top of a maximum 3-foot high retaining wall.
- 2.13 Submit a security deposit to the Engineering Department to guarantee construction of the public improvements required herein valued at _____% of the approved construction cost estimate. Security deposit shall be in accordance with the City of Ontario Municipal Code. Security deposit will be eligible for release, in accordance with City procedure, upon completion and acceptance of said public improvements.
- 2.14 **The applicant/developer shall submit all necessary survey documents prepared by a Licensed Surveyor registered in the State of California detailing all existing survey monuments in and around the project site. These documents are to be reviewed and approved by the City Survey Office.**
- 2.15 **Pay all Development Impact Fees (DIF) to the Building Department. Storm Drain Development Impact Fee, approximately \$355,965, shall be paid to the Building Department. Final fee shall be determined based on the approved site plan.**
- 2.16 Other conditions: _____

B. PUBLIC IMPROVEMENTS

(See attached Exhibit 'A' for plan check submittal requirements.)

- 2.17 Design and construct full public improvements in accordance with the City of Ontario Municipal Code, current City standards and specifications, master plans and the adopted specific plan for the area, if any. These public improvements shall include, but not be limited to, the following (checked boxes):

Improvement	Grove Avenue	Francis Street	Street 3	Street 4
Curb and Gutter	<input type="checkbox"/> New; ___ ft. from C/L <input checked="" type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace	<input type="checkbox"/> New; ___ ft. from C/L <input checked="" type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace	<input type="checkbox"/> New; ___ ft. from C/L <input type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace	<input type="checkbox"/> New; ___ ft. from C/L <input type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace

Removal of Improvements	_____	_____	_____	_____
Other Improvements	_____	_____	_____	_____

Specific notes for improvements listed in item no. 2.17, above:

- A. Remove existing driveway approaches and replace with sidewalk per City Std. No. 1209.**
- B. Remove and replace the existing sidewalk ramp at the SEC of Grove Ave and Francis St to meet current City standards. This includes but is not limited to providing a curb return radius of 45-ft and constructing modifications to the existing traffic signal on Grove Ave and Francis St.**

2.18 Construct a 2" asphalt concrete (AC) grind and overlay on the following street(s): _____

- 2.19 **Reconstruction of the full pavement structural section, per City of Ontario Standard Drawing number 1011, may be required based on the existing pavement condition and final street design. Minimum limits of reconstruction shall be along property frontage, from street centerline to curb/gutter.**
- 2.20 Make arrangements with the Cucamonga Valley Water District (CVWD) to provide water service sewer service to the site. This property is within the area served by the CVWD and Applicant shall provide documentation to the City verifying that all required CVWD fees have been paid.
- 2.21 Overhead utilities shall be under-grounded, in accordance with Title 7 of the City's Municipal Code (Ordinance No. 2804 and 2892). Developer may pay in-lieu fee, approximately _____, for undergrounding of utilities in accordance with Section 7-7.303.e of the City's Municipal Code.
- 2.22 Other conditions: _____

C. SEWER

- 2.23 **A 10-inch sewer main is available for connection by this project in Grove Ave. (Ref: Sewer plan bar code: S11695)**
- 2.24 Design and construct a sewer main extension. A sewer main is not available for direct connection. The closest main is approximately _____ feet away.
- 2.25 Submit documentation that shows expected peak loading values for modeling the impact of the subject project to the existing sewer system. The project site is within a deficient public sewer system area. Applicant shall be responsible for all costs associated with the preparation of the model. Based on the results of the analysis, Applicant may be required to mitigate the project impact to the deficient public sewer system, including, but not limited to, upgrading of existing sewer main(s), construction of new sewer main(s) or diversion of sewer discharge to another sewer.
- 2.26 **Other conditions:**
 - A. **Existing Private Sewer and Easement Relocation: Relocate existing private sewer lateral serving adjacent property to the east and provide a new private sewer easement along the portion on private property. See COA 1.14C.**
 - B. **Sewer Services: No infiltration flow may be introduced into the public sewer system. Relocate sewer laterals and private sewer systems so that they are not located under or within infiltration areas, detention/retention areas, or bioswales.**

D. WATER

- 2.27 **A 12-inch water main is available for connection by this project in Grove Ave. (Ref: Water plan bar code: W11990)**
- 2.28 Design and construct a water main extension. A water main is not available for direct connection. The closest main is approximately _____ feet away.
- 2.29 Other conditions: _____

E. RECYCLED WATER

- 2.30 A _____ inch recycled water main is available for connection by this project in _____. (Ref: Recycled Water plan bar code: _____)
- 2.31 Design and construct an on-site recycled water system for this project. A recycled water main does exist in the vicinity of this project.
- 2.32 **Design and construct an on-site recycled water ready system for this project. A recycled water main does not currently exist in the vicinity of this project, but is planned for the near future. If Applicant would like to connect to this recycled water main when it becomes available, the cost for the connection shall be borne solely by the Applicant.**

- 2.33 Submit two (2) hard copies and one (1) electronic copy, in PDF format, of the Engineering Report (ER), for the use of recycled water, to the OMUC for review and subsequent submittal to the California Department of Public Health (CDPH) for final approval.

Note: The OMUC and the CDPH review and approval process will be approximately three (3) months. Contact the Ontario Municipal Utilities Company at (909) 395-2647 regarding this requirement.

- 2.34 Other conditions: _____

F. TRAFFIC / TRANSPORTATION

- 2.35 Submit a focused traffic impact study, prepared and signed by a Traffic/Civil Engineer registered in the State of California. The study shall address, but not be limited to, the following issues as required by the City Engineer:
 - 1. On-site and off-site circulation
 - 2. Traffic level of service (LOS) at 'build-out' and future years
 - 3. Impact at specific intersections as selected by the City Engineer

- 2.36 New traffic signal installations shall be added to Southern California Edison (SCE) customer account number # 2-20-044-3877.

- 2.37 Other conditions:
 - A. Design and construct modifications to the existing traffic signal on Grove Ave and Francis St. The traffic signal modification shall address relocation or upgrade of any affected equipment including poles, video detection, CCTV, interconnect cable and conduit, emergency vehicle preemption systems, and bicycle detection to the satisfaction of the City Engineer. All new signal equipment shall be installed at its ultimate location, unless precluded by right-of-way limitations.
 - B. Design and construct in-fill public street lights and retrofit existing street lights along its project frontage. Street lighting shall be LED-type and in accordance with City's Traffic and Transportation Design Guidelines
 - C. Design and construct proposed driveways in accordance with City of Ontario Standard Drawing No. 1204 for Commercial Driveway.

G. DRAINAGE / HYDROLOGY

- 2.38 A _____ inch storm drain main is available to accept flows from this project in _____.
(Ref: Storm Drain plan bar code: _____)

- 2.39 Submit a hydrology study and drainage analysis, prepared and signed by a Civil Engineer registered in the State of California. The study shall be prepared in accordance with the San Bernardino County Hydrology Manual and City of Ontario standards and guidelines. Additional drainage facilities, including, but not limited to, improvements beyond the project frontage, may be required to be designed and constructed, by Applicant, as a result of the findings of this study.

- 2.40 An adequate drainage facility to accept additional runoff from the site does not currently exist downstream of the project. Design and construct a storm water detention facility on the project site. 100 year post-development peak flow shall be attenuated such that it does not exceed 80% of pre-development peak flows, in accordance with the approved hydrology study and improvement plans.

- 2.41 Submit a copy of a recorded private drainage easement or drainage acceptance agreement to the Engineering Department for the acceptance of any increase to volume and/or concentration of historical drainage flows onto adjacent property, prior to approval of the grading plan for the project.

- 2.42 Comply with the City of Ontario Flood Damage Prevention Ordinance (Ordinance No. 2409). The project site or a portion of the project site is within the Special Flood Hazard Area (SFHA) as indicated on the Flood Insurance Rate Map (FIRM) and is subject to flooding during a 100 year frequency storm. The site plan shall be subject to the provisions of the National Flood Insurance Program.

2.43 Other conditions: _____

H. STORM WATER QUALITY / NATIONAL POLLUTANT DISCHARGE AND ELIMINATION SYSTEM (NPDES)

2.44 401 Water Quality Certification/404 Permit – Submit a copy of any applicable 401 Certification or 404 Permit for the subject project to the City project engineer. Development that will affect any body of surface water (i.e. lake, creek, open drainage channel, etc.) may require a 401 Water Quality Certification from the California Regional Water Quality Control Board, Santa Ana Region (RWQCB) and a 404 Permit from the United States Army Corps of Engineers (USACE). The groups of water bodies classified in these requirements are perennial (flow year round) and ephemeral (flow during rain conditions, only) and include, but are not limited to, direct connections into San Bernardino County Flood Control District (SBCFCD) channels.
If a 401 Certification and/or a 404 Permit are not required, a letter confirming this from Applicant's engineer shall be submitted.
Contact information: USACE (Los Angeles District) (213) 452-3414; RWQCB (951) 782-4130.

2.45 **Submit a Water Quality Management Plan (WQMP). This plan shall be approved by the Engineering Department prior to approval of any grading plan. The WQMP shall be submitted, utilizing the current San Bernardino County Stormwater Program template, available at: <http://www.sbcounty.gov/dpw/land/npdes.asp>.**

2.46 Design and construct a Connector Pipe Trash Screen or equivalent Trash Treatment Control Device, per catch basin located within or accepting flows tributary of a Priority Land Use (PLU) area that meets the Full Capture System definition and specifications, and is on the Certified List of the State Water Resources Control Board. The device shall be adequately sized per catch basin and include a deflector screen with vector control access for abatement application, vertical support bars, and removable component to facilitate maintenance and cleaning.

2.47 Other conditions: _____

J. SPECIAL DISTRICTS

2.48 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2353 to initiate the CFD application process.

2.49 Other conditions: _____

K. FIBER OPTIC

2.50 **Design and construct fiber optic system to provide access to the City's conduit and fiber optic system per the City's Fiber Optic Master Plan. Building entrance conduits shall start from the closest OntarioNet hand hole constructed along the project frontage in the ROW and shall terminate in the main telecommunications room for each building. Conduit infrastructure shall interconnect with the primary and/or secondary backbone fiber optic conduit system at the nearest OntarioNet hand hole. Limits of work are generally located along the project frontages of Grove Ave and Francis St.**

2.51 **Refer to the City's Fiber Optic Master Plan for design and layout guidelines. Contact the Broadband Operations Department at (909) 395-2000, regarding this requirement.**

L. Solid Waste

- 2.52** Onsite solid waste shall be designed in accordance with the City's Solid Waste Manual location at:
<http://www.ontarioca.gov/municipal-utilities-company/solid-waste>
- 2.53** Other conditions:
 - A. Prior to approval of any building permits, submit a Final Solid Waste Handling Plan Sheet accompanying the Precise Grading Plan Submittal to the City/OMUC for review and approval. See Solid Waste Handling Plan (SWHP) Requirements document for details.
 - i. Organics Separation and Collection: This site shall comply with the Requirements of State Assembly Bill AB1826, which requires organic waste to be diverted and collected separately from recycling and other refuse wastes.
 - B. The applicant shall submit a Final Integrated Waste Management Report that complies with the "Integrated Waste Management Report Requirements" document for review and approval with the Precise Grading Plan. This report shall address the management of all integrated waste (Refuse, Recycling, Organics, etc.) generated by the project.

3. PRIOR TO ISSUANCE OF A CERTIFICATE OF OCCUPANCY, APPLICANT SHALL:

- 3.01** Set new monuments in place of any monuments that have been damaged or destroyed as a result of construction of the subject project. Monuments shall be set in accordance with City of Ontario standards and to the satisfaction of the City Engineer.
- 3.02** Complete all requirements for recycled water usage.
 - 1) Procure from the OMUC a copy of the letter of confirmation from the California Department of Public Health (CDPH) that the Engineering Report (ER) has been reviewed and the subject site is approved for the use of recycled water.
 - 2) Obtain clearance from the OMUC confirming completion of recycled water improvements and passing of shutdown tests and cross connection inspection, upon availability/usage of recycled water.
 - 3) Complete education training of on-site personnel in the use of recycled water, in accordance with the ER, upon availability/usage of recycled water.
- 3.03** The applicant/developer shall submit all final survey documents prepared by a Licensed Surveyor registered in the State of California detailing all survey monuments that have been preserved, revised, adjusted or set along with any maps, corner records or Records of Survey needed to comply with these Conditions of Approvals and the latest edition of the California Professional Land Survey Act. These documents are to be reviewed and approved by the City Survey Office.
- 3.04** NMC Projects: For developments located at an intersection of any two collector or arterial streets, the applicant/developer shall set a monument if one does not already exist at that intersection. Contact the City Survey office for information on reference benchmarks, acceptable methodology and required submittals.
- 3.05** Confirm payment of all Development Impact Fees (DIF) to the Building Department.
- 3.06** Submit electronic copies (PDF and Auto CAD format) of all approved improvement plans, studies and reports (i.e. hydrology, traffic, WQMP, etc.).

4. PRIOR TO FINAL ACCEPTANCE, APPLICANT SHALL:

- 4.01** Complete all Conditions of Approval listed under Sections 1-3 above.

- 4.02 Pay all outstanding fees pursuant to the City of Ontario Municipal Code, including but not limited to, plan check fees, inspection fees and Development Impact Fees.**
- 4.03 The applicant/developer shall submit a written request for the City's final acceptance of the project addressed to the City Project Engineer. The request shall state that all Conditions of Approval have been completed and shall be signed by the applicant/developer. Upon receipt of the request, review of the request shall be a minimum of 10 business days. Conditions of Approval that are deemed incomplete by the City will cause delays in the acceptance process.**

EXHIBIT 'A'

ENGINEERING DEPARTMENT First Plan Check Submittal Checklist

Project Number: PDEV20-001, PMTT20-001, and/or Parcel Map No. 20187

The following items are required to be included with the first plan check submittal:

1. **A copy of this check list**
2. **Payment of fee for Plan Checking**
3. **One (1) copy of Engineering Cost Estimate (on City form) with engineer's wet signature and stamp.**
4. **One (1) copy of project Conditions of Approval**
5. **Include a PDF (electronic submittal) of each required improvement plan at every submittal.**
6. **Two (2) sets of Potable and Recycled Water demand calculations (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size).**
7. **Three (3) sets of Public Street improvement plan with street cross-sections**
8. **Three (3) sets of Private Street improvement plan with street cross-sections**
9. **Four (4) sets of Public Water improvement plan (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size)**
10. **Four (4) sets of Recycled Water improvement plan (include recycled water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size and an exhibit showing the limits of areas being irrigated by each recycled water meter)**
11. **Four (4) sets of Public Sewer improvement plan**
12. **Five (5) sets of Public Storm Drain improvement plan**
13. **Three (3) sets of Public Street Light improvement plan**
14. **Three (3) sets of Signing and Striping improvement plan**
15. **Three (3) sets of Fiber Optic plan (include Auto CAD electronic submittal)**
16. **Three (3) sets of Dry Utility plans within public right-of-way (at a minimum the plans must show existing and ultimate right-of-way, curb and gutter, proposed utility location including centerline dimensions, wall to wall clearances between proposed utility and adjacent public line, street work repaired per Standard Drawing No. 1306. Include Auto CAD electronic submittal)**
17. **Three (3) sets of Traffic Signal improvement plan and One (1) copy of Traffic Signal Specifications with modified Special Provisions. Please contact the Traffic Division at (909) 395-2154 to obtain Traffic Signal Specifications.**
18. **Two (2) copies of Water Quality Management Plan (WQMP), including one (1) copy of the approved Preliminary WQMP (PWQMP).**
19. **One (1) copy of Hydrology/Drainage study**
20. **One (1) copy of Soils/Geology report**

21. **Payment for Final Map/Parcel Map processing fee**
22. **Three (3) copies of Final Map/Parcel Map**
23. **One (1) copy of approved Tentative Map**
24. **One (1) copy of Preliminary Title Report (current within 30 days)**
25. **One (1) copy of Traverse Closure Calculations**
26. **One (1) set of supporting documents and maps (legible copies): referenced improvement plans (full size), referenced record final maps/parcel maps (full size, 18"x26"), Assessor's Parcel map (full size, 11"x17"), recorded documents such as deeds, lot line adjustments, easements, etc.**
27. Two (2) copies of Engineering Report and an electronic file (include PDF format electronic submittal) for recycled water use
28. Other: _____

RESOLUTION NO.

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PDEV20-001, A DEVELOPMENT PLAN TO CONSTRUCT FOUR INDUSTRIAL BUILDINGS TOTALING 355,254 SQUARE FEET, LOCATED AT THE SOUTHEAST CORNER OF GROVE AVENUE AND FRANCIS STREET WITHIN THE BUSINESS PARK LAND USE DESIGNATION OF THE GROVE AVENUE SPECIFIC PLAN, AND MAKING FINDINGS IN SUPPORT THEREOF— APNS: 113-451-14 & 113-451-27.

WHEREAS, EBS REALTY PARTNERS, LLC. ("Applicant") has filed an Application for the approval of a Development Plan, File No. PDEV20-001, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 15.74 acres of land generally located at the southeast corner of Grove Avenue and Francis Street, within the Business Park land use designation of the Grove Avenue Specific Plan, the northern parcel is presently vacant and the southern parcel is developed with an industrial building that is approximately 105,000 square feet in size, in conjunction with a private athletic field; and

WHEREAS, the property to the north of the Project site is within the Business Park and Commercial land use districts of the Grove Avenue Specific Plan and is developed with a Business Park. The property to the east is within the Business Park land use district of the Grove Avenue Specific Plan and the IG (General Industrial) zoning district and is developed with warehouse and manufacturing land uses. The property to the south is within the Business Park land use district of the Grove Avenue Specific Plan and is developed with warehouse and manufacturing land uses. The property to the west is within the Business Park and Commercial land use districts of the Grove Avenue Specific Plan and is developed with a fast-food restaurant, warehouse, and manufacturing land uses; and

WHEREAS, the applicant is proposing the construction of four industrial buildings totaling 355,254 square feet on two lots totaling 15.74 acres in area. The building sizes range from 52,584 to 124,012 square feet and the Project has an overall Floor Area Ratio ("FAR") of 0.52. The Project will provide parking along the western property line (facing Grove Avenue), adjacent to each building's office area and between each of the proposed buildings. The Project will provide 12-foot high tilt-up screen walls to screen tractor-trailer loading areas from Grove Avenue and an 8-foot high decorative tubular steel fence will be provided along the east, north and south property lines to secure the property; and

WHEREAS, the applicant is proposing to develop the site in two phases, in order to allow the tenant of the existing building the ability to remain on-site until their lease terminates at the end of 2021 or during the construction of Phase 1; and

WHEREAS, Phase 1 includes the construction and associated right-of-way improvements with Buildings 1, 2, and 3, and does not impact the existing site conditions, access, or parking of the existing building. Phase 1 includes interim improvements between Building 1 and the existing building, which includes the construction of a 34-foot wide drive aisle in an east-west direction, to provide emergency vehicle access around Building 1. Improvements also include a 6-foot wide landscape planter adjacent to Building 1 that will remain in Phase 2, and a 5-foot wide planter located along the southern property line of Building 1 (Parcel 3), that will demarcate the existing building site from the northern portion of the site; and

WHEREAS, Phase 2 includes the demolition of the existing building and the construction of Building 4. Phase 2 improvements include the reconfiguration of the areas between Building 1 and Building 4, which consists of double-loaded parking with a 26-foot wide drive aisle; and

WHEREAS, the Project site will have four access points from Grove Avenue. Buildings 2 and 3, located on the northern portion of the Project site, will have one point of access from Grove Avenue via a 50-foot wide shared driveway that is located approximately 300 feet south of the Francis Street. Building 1 will have primary access from Grove Avenue, via a 40-foot wide driveway located approximately 650 feet south of Grove Street, and a shared 30-foot wide driveway centered between Buildings 1 and 4. In addition to the shared driveway, Building 4 will take primary access from Grove Avenue, via a 40-foot wide driveway located at southwest corner of Project site; and

WHEREAS, the Grove Avenue Specific Plan refers to the Ontario Development Code for parking requirements. The Project (Phases 1 and 2) have provided off-street parking pursuant to the "Warehouse and Distribution" parking standards specified in the Development Code. The Project (build-out Phases 1 and 2) requires a total of 259 parking spaces and 360 parking spaces have been provided. Phase 1, which includes parking for Buildings 1, 2, and 3, requires a total of 149 parking spaces and 167 parking spaces will be provided. The existing building and site conditions currently provides 206 parking stalls that will remain in place to serve the existing tenant. Sufficient parking will be provided for Phases 1 and 2 of the Project; and

WHEREAS, the proposed buildings are of concrete tilt-up construction and all four buildings incorporate the same architectural design theme, with enhanced elements and treatments located at office entries and along street facing elevations. Architectural elements for all buildings include smooth-painted concrete in white and grey, and blue and tan tones, tile with a wood grain finish, horizontal and vertical reveals, storefronts with clear anodized aluminum mullions and blue glazing, steel canopies at the main office entries and over second-story windows, and recessed panel sections with contrasting colors. The mechanical equipment will be roof-mounted and obscured from public view by the parapet walls; and

WHEREAS, the Project provides an overall landscape coverage of 13.6 percent and requires a minimum 10 percent for interior parcels and 15 percent for corner parcels which have been exceeded. The Project provides substantial landscaping along Grove Avenue and Francis Street, at each office element and throughout the parking areas; and

WHEREAS, the Grove Avenue Specific Plan allows a 0.40 FAR within the Business Park land use district; however, an increase in FAR is permitted if the traffic generating characteristics of the Project do not exceed the number of trips assumed in the Environmental Impact Report (EIR) prepared for the Grove Avenue Specific Plan (adopted by City Council on May 18, 1993). A Traffic Assessment was prepared the Ganddini Group (dated December 6, 2019), for the Project to support the increase in FAR from 0.40 to 0.52. The Traffic Assessment concluded that the number of trips proposed for the Project will generate approximately 1,714 fewer daily PCE trips compared to the maximum allowable development under the Grove Avenue Specific Plan EIR, including 115 fewer PCE trips during the AM peak hour and 83 fewer PCE trips during the PM peak hour. Furthermore, in 2010, The Ontario Plan ("TOP") and EIR were adopted by the City Council, which approved the land use designation change of several properties within the Grove Avenue Specific Plan, including the Project site, to Business Park. The maximum FAR allowed for the Business Park land use designation is 0.60 FAR, which this Project does not exceed; and

WHEREAS, a Phase I Environmental Site Assessment (Dated: August 27, 2019) and Phase II Soil Vaper Survey (Dated: October 15, 2019) were prepared by Centec Engineering, due to the previous and existing industrial uses on-site. The Phase I Assessment found that the businesses utilized hazardous materials and generated hazardous wastes over the years; however, there were no underground storage tanks, clarifiers, sumps, plating activities, or other significant issues of environmental concern identified for the subject property. The Phase II, Soil Vaper Survey was prepared by Centec Engineering to determine if significant hazardous waste conditions may be present from current and former industrial manufacturing activities at the site. The investigation was intended to determine if chlorinated solvents, such as PCE, TCE, or other volatile organic compounds ("VOCs") potentially associated with spray booths, injection machines and other industrial activities may be present. Centec Engineering conducted 19 sampling locations in two events, on October 2 and October 10, 2019, which concluded that no further investigations were warranted or recommended based upon the scope and limitations of the Federal EPA and State of California DTSC for evaluating environmental conditions of a property; and

WHEREAS, all necessary public utilities are available to the Project site. Furthermore, the Applicant has submitted a Preliminary Water Quality Management Plan ("PWQMP"), which establishes both Projects' compliance with storm water discharge/water quality requirements. The PWQMP includes site design measures that capture runoff and pollutant transport by minimizing impervious surfaces and maximizes

low impact development (“LID”) best management practices (“BMPs”), such as retention and infiltration, biotreatment, and evapotranspiration. The PWQMP proposes the use of an underground stormwater infiltration system within the tractor-trailer courtyard areas of each building. Any overflow drainage will be conveyed to a parkway culvert located at southwest corner of the Project site onto Grove Avenue; and

WHEREAS, a Tentative Parcel Map, File No. PMTT20-001 (TPM 20187), was filed in conjunction with the proposed Development Plan to subdivide 15.74 acres of land into 4 numbered parcels; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act — Public Resources Code Section 21000 et seq. — (hereinafter referred to as "CEQA") and an initial study has been prepared to determine possible environmental impacts; and

WHEREAS, the environmental impacts of this project were previously reviewed in conjunction with File No. PGPA06-001, The Ontario Plan for which an Environmental Impact Report (State Clearinghouse No. 2008101140) was adopted by the City Council on January 27, 2010, and this Application introduces no new significant environmental impacts; and

WHEREAS, the City's "Local Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and act on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (hereinafter referred to as “ALUCP”), which applies only to jurisdictions within San

Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on October 19, 2020, the Development Advisory Board of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date, voting to issue Decision No. DAB20-065, recommending the Planning Commission approve the Application; and

WHEREAS, on October 27, 2020, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: Environmental Determination and Findings. As the decision-making authority for the Project, the Planning Commission has reviewed and considered the information contained in the previous Certified EIR and supporting documentation. Based upon the facts and information contained in the previous Certified EIR and supporting documentation, the Planning Commission finds as follows:

(1) The environmental impacts of this project were previously reviewed in conjunction with File No. PGPA06-001, The Ontario Plan for which an Environmental Impact Report (State Clearinghouse No. 2008101140) was adopted by the City Council on January 27, 2010.

(2) The previous Certified EIR contains a complete and accurate reporting of the environmental impacts associated with the Project; and

(3) The previous Certified EIR was completed in compliance with CEQA and the Guidelines promulgated thereunder; and

(4) The previous Certified EIR reflects the independent judgment of the Planning Commission; and

(5) The proposed project will introduce no new significant environmental impacts beyond those previously analyzed in the previous Certified EIR, and all mitigation measures previously adopted with the Certified EIR, are incorporated herein by this reference.

SECTION 2: Subsequent or Supplemental Environmental Review Not Required. Based on the information presented to the Planning Commission, and the specific findings set forth in Section 1, above, the Planning Commission finds that the preparation of a subsequent or supplemental Certified EIR is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3: Housing Element Compliance. Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the decision-making authority for the Project, the Planning Commission finds that based on the facts and information contained in the Application and supporting documentation,

at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

SECTION 4: *Ontario International Airport Land Use Compatibility Plan (“ALUCP”) Compliance.* The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the ALUCP, establishing the Airport Influence Area for Ontario International Airport (hereinafter referred to as “ONT”), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the decision-making authority for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ALUCP compatibility factors, including [1] Safety Criteria (ALUCP Table 2-2) and Safety Zones (ALUCP Map 2-2), [2] Noise Criteria (ALUCP Table 2-3) and Noise Impact Zones (ALUCP Map 2-3), [3] Airspace protection Zones (ALUCP Map 2-4), and [4] Overflight Notification Zones (ALUCP Map 2-5). As a result, the PLANNING COMMISSION, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ALUCP.

SECTION 5: *Concluding Facts and Reasons.* Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing, and upon the specific findings set forth in Section 1 through 4, above, the Planning Commission hereby concludes as follows:

(1) ***The proposed development at the proposed location is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan.*** The proposed Project is located within the Business Park land use district of the Policy Plan Land Use Map, and the Business Park land use designation of the Grove Avenue Specific Plan. The development standards and conditions under which the proposed Project will be constructed and maintained, is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan.

(2) ***The proposed development is compatible with those on adjoining sites in relation to location of buildings, with particular attention to privacy, views,***

any physical constraint identified on the site and the characteristics of the area in which the site is located. The Project has been designed consistent with the requirements of the City of Ontario Development Code and the Business Park land use designation of the Grove Avenue Specific Plan, including standards relative to the particular land use proposed (industrial), as-well-as building intensity, building and parking setbacks, building height, number of off-street parking and loading spaces, on-site and off-site landscaping, and fences, walls and obstructions.

(3) **The proposed development will complement and/or improve upon the quality of existing development in the vicinity of the project and the minimum safeguards necessary to protect the public health, safety and general welfare have been required of the proposed project.** The Development Advisory Board has required certain safeguards, and impose certain conditions of approval, which have been established to ensure that: [i] the purposes of the Grove Avenue Specific Plan are maintained; [ii] the Project will not endanger the public health, safety or general welfare; [iii] the Project will not result in any significant environmental impacts; [iv] the Project will be in harmony with the area in which it is located; and [v] the Project will be in full conformity with the Vision, City Council Priorities and Policy Plan components of The Ontario Plan, and the Grove Avenue Specific Plan.

(4) **The proposed development is consistent with the development standards and design guidelines set forth in the Development Code, or applicable specific plan or planned unit development.** The proposed Project has been reviewed for consistency with the general development standards and guidelines of the Grove Avenue Specific Plan that are applicable to the proposed Project, including building intensity, building and parking setbacks, building height, amount of off-street parking and loading spaces, parking lot dimensions, design and landscaping, bicycle parking, on-site landscaping, and fences and walls, as-well-as those development standards and guidelines specifically related to the particular land use being proposed (Industrial). As a result of this review, the Development Advisory Board has determined that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the development standards and guidelines described in the Grove Avenue Specific Plan.

SECTION 6: Planning Commission Action. Based upon the findings and conclusions set forth in Sections 1 through 5, above, the Planning Commission hereby APPROVES the herein described Application, subject to each and every condition set forth in the Department reports attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 7: Indemnification. The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the

applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 8: *Custodian of Records.* The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 9: *Certification to Adoption.* The Secretary shall certify to the adoption of the Resolution.

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a regular meeting thereof held on the 27th day of October 2020, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

Jim Willoughby
Planning Commission Chairman

Project Description: A Development Plan to construct 4 industrial buildings totaling 355,254 square feet on 15.74 acres of land located at the southeast corner of Grove Avenue and Francis Street within the Business Park land use designation of the Grove Avenue Specific Plan (APN(s): 113-451-14 & 113-451-27); **submitted by EBS Realty Partners, LLC.**

Prepared By: Lorena Mejia, Senior Planner
Phone: 909.395.2276 (direct)
Email: lmejia@ontarioca.gov

The Planning Department, Land Development Section, conditions of approval applicable to the above-described Project, are listed below. The Project shall comply with each condition of approval listed below:

1.0 Standard Conditions of Approval. The project shall comply with the *Standard Conditions for New Development*, adopted by City Council Resolution No. 2017-027 on April 18, 2017. A copy of the *Standard Conditions for New Development* may be obtained from the Planning Department or City Clerk/Records Management Department.

2.0 Special Conditions of Approval. In addition to the *Standard Conditions for New Development* identified in condition no. 1.0, above, the project shall comply with the following special conditions of approval:

2.1 Time Limits.

(a) Development Plan approval shall become null and void 2 years following the effective date of application approval, unless a building permit is issued and construction is commenced, and diligently pursued toward completion, or a time extension has been approved by the Planning Director. This condition does not supersede any individual time limits specified herein, or any other departmental conditions of approval applicable to the Project, for the performance of specific conditions or improvements.

2.2 General Requirements. The Project shall comply with the following general requirements:

(a) All construction documentation shall be coordinated for consistency, including, but not limited to, architectural, structural, mechanical, electrical, plumbing, landscape and irrigation, grading, utility and street improvement plans. All such plans shall be consistent with the approved entitlement plans on file with the Planning Department.

(b) The project site shall be developed in conformance with the approved plans on file with the City. Any variation from the approved plans must be reviewed and approved by the Planning Department prior to building permit issuance.

(c) The herein-listed conditions of approval from all City departments shall be included in the construction plan set for project, which shall be maintained on site during project construction.

2.3 Landscaping.

(a) The Project shall provide and continuously maintain landscaping and irrigation systems in compliance with the provisions of Ontario Development Code Division 6.05 (Landscaping).

(b) Comply with the conditions of approval of the Planning Department; Landscape Planning Division.

(c) Landscaping shall not be installed until the Landscape and Irrigation Construction Documentation Plans required by Ontario Development Code Division 6.05 (Landscaping) have been approved by the Landscape Planning Division.

(d) Changes to approved Landscape and Irrigation Construction Documentation Plans, which affect the character or quantity of the plant material or irrigation system design, shall be resubmitted for approval of the revision by the Landscape Planning Division, prior to the commencement of the changes.

2.4 Walls and Fences. All Project walls and fences shall comply with the requirements of Ontario Development Code Division 6.02 (Walls, Fences and Obstructions).

2.5 Parking, Circulation and Access.

(a) The Project shall comply with the applicable off-street parking, loading and lighting requirements of City of Ontario Development Code Division 6.03 (Off-Street Parking and Loading).

(b) All drive approaches shall be provided with an enhanced pavement treatment. The enhanced paving shall extend from the back of the approach apron, into the site, to the first intersecting drive aisle or parking space.

(c) Areas provided to meet the City's parking requirements, including off-street parking and loading spaces, access drives, and maneuvering areas, shall not be used for the outdoor storage of materials and equipment, nor shall it be used for any other purpose than parking.

(d) The required number of off-street parking spaces and/or loading spaces shall be provided at the time of site and/or building occupancy. All parking and loading spaces shall be maintained in good condition for the duration of the building or use.

(e) Parking spaces specifically designated and conveniently located for use by the physically disabled shall be provided pursuant to current accessibility regulations contained in State law (CCR Title 24, Part 2, Chapters 2B71, and CVC Section 22507.8).

(f) Bicycle parking facilities, including bicycle racks, lockers, and other secure facilities, shall be provided in conjunction with development projects pursuant to current regulations contained in CALGreen (CAC Title 24, Part 11).

2.6 Outdoor Loading and Storage Areas.

(a) Loading facilities shall be designed and constructed pursuant to Development Code Division 6.03 (Off-Street Parking and Loading).

(b) Areas designated for off-street parking, loading, and vehicular circulation and maneuvering, shall not be used for the outdoor storage of materials or equipment.

(c) Outdoor loading and storage areas, and loading doors, shall be screened from public view pursuant to the requirements of Development Code Paragraph 6.02.025.A.2 (Screening of Outdoor Loading and Storage Areas, and Loading Doors) Et Seq.

(d) Outdoor loading and storage areas shall be provided with gates that are view-obstructing by one of the following methods:

(i) Construct gates with a perforated metal sheet affixed to the inside of the gate surface (50 percent screen); or

(ii) Construct gates with minimum one-inch square tube steel pickets spaced at maximum 2-inches apart.

(e) The minimum gate height for screen wall openings shall be established based upon the corresponding wall height, as follows:

Screen Wall Height	Minimum Gate Height
14 feet:	10 feet
12 feet:	9 feet
10 feet:	8 feet
8 feet:	8 feet
6 feet:	6 feet

2.7 Site Lighting.

(a) All off-street parking facilities shall be provided with nighttime security lighting pursuant to Ontario Municipal Code Section 4-11.08 (Special Residential Building Provisions) and Section 4-11.09 (Special Commercial/Industrial Building Provisions), designed to confine emitted light to the parking areas. Parking facilities shall be lighted from sunset until sunrise, daily, and shall be operated by a photocell switch.

(b) Unless intended as part of a master lighting program, no operation, activity, or lighting fixture shall create illumination on any adjacent property.

2.8 Mechanical and Rooftop Equipment.

(a) All exterior roof-mounted mechanical, heating and air conditioning equipment, and all appurtenances thereto, shall be completely screened from public view by parapet walls or roof screens that are architecturally treated so as to be consistent with the building architecture.

(b) All ground-mounted utility equipment and structures, such as tanks, transformers, HVAC equipment, and backflow prevention devices, shall be located out of view from a public street, or adequately screened through the use of landscaping and/or decorative low garden walls.

2.9 Security Standards. The Project shall comply with all applicable requirements of Ontario Municipal Code Title 4 (Public Safety), Chapter 11 (Security Standards for Buildings).

2.10 Signs. All Project signage shall comply with the requirements of Ontario Development Code Division 8.1 (Sign Regulations).

2.11 Sound Attenuation. The Project shall be constructed and operated in a manner so as not to exceed the maximum interior and exterior noised levels set forth in Ontario Municipal Code Title 5 (Public Welfare, Morals, and Conduct), Chapter 29 (Noise).

2.12 Covenants, Conditions and Restrictions (CC&Rs)/Mutual Access and Maintenance Agreements.

(a) CC&Rs shall be prepared for the Project and shall be recorded prior to the issuance of a building permit.

(b) The CC&Rs shall be in a form and contain provisions satisfactory to the City. The articles of incorporation for the property owners association and the CC&Rs shall be reviewed and approved by the City.

(c) CC&Rs shall ensure reciprocal parking and access between parcels.

(d) CC&Rs shall ensure reciprocal parking and access between parcels, and common maintenance of:

(i) Landscaping and irrigation systems within common areas;

(ii) Landscaping and irrigation systems within parkways adjacent to the project site, including that portion of any public highway right-of-way between the property line or right-of-way boundary line and the curb line and also the area enclosed within the curb lines of a median divider (Ontario Municipal Code Section 7-3.03), pursuant to Ontario Municipal Code Section 5-22-02;

(iii) Shared parking facilities and access drives; and

(iv) Utility and drainage easements.

(e) CC&Rs shall include authorization for the City's local law enforcement officers to enforce City and State traffic and penal codes within the project area.

(f) The CC&Rs shall grant the City of Ontario the right of enforcement of the CC&R provisions.

(g) A specific methodology/procedure shall be established within the CC&Rs for enforcement of its provisions by the City of Ontario, if adequate maintenance of the development does not occur, such as, but not limited to, provisions that would grant the City the right of access to correct maintenance issues and assess the property owners association for all costs incurred.

2.13 Environmental Review.

(a) The environmental impacts of this project were reviewed in conjunction with **The Ontario Plan Environmental Impact Report**, certified by the Ontario City Council on January 27, 2010, in conjunction with File No. PGPA06-001 (City Council Resolution No. 2010-006). This application introduces no new significant environmental impacts. The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. This Application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of project approval, and are incorporated herein by this reference. All previously adopted mitigation measures shall be a condition of project approval, as they are applicable, and are incorporated herein by this reference.

(b) If human remains are found during project grading/excavation/construction activities, the area shall not be disturbed until any required investigation is completed by the County Coroner and Native American consultation has been completed (if deemed applicable).

(c) If any archeological or paleontological resources are found during project grading/excavation/construction, the area shall not be disturbed until the significance of the resource is determined. If determined to be significant, the resource shall be recovered by a qualified archeologist or paleontologist consistent with current standards and guidelines, or other appropriate measures implemented.

2.14 Indemnification. The applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer. The City of Ontario shall promptly notify the applicant of any such claim, action or proceeding, and the City of Ontario shall cooperate fully in the defense.

2.15 Additional Fees.

(a) Within 5 days following final application approval, the Notice of Determination (NOD) filing fee shall be provided to the Planning Department. The fee shall be paid by check, made payable to the "Clerk of the Board of Supervisors", which shall be forwarded to the San Bernardino County Clerk of the Board of Supervisors, along with all applicable environmental forms/notices, pursuant to the requirements of the California Environmental Quality Act (CEQA). Failure to provide said fee within the time specified may result in a 180-day extension to the statute of limitations for the filing of a CEQA lawsuit.

(b) After the Project's entitlement approval, and prior to issuance of final building permits, the Planning Department's Plan Check and Inspection fees shall be paid at the rate established by resolution of the City Council.

2.16 Tribal Consultation Conditions.

(a) The project developer shall retain a Native American Monitor of Gabrieleño Ancestry (the "Tribe" or the "Consulting Tribe" that was consulted on this project pursuant to Assembly Bill A52 - SB18) to conduct a Native American Indian Sensitivity Training for construction personnel prior to commencement of any excavation activities. The training session shall include a handout and focus on how to identify Native American resources encountered during earthmoving activities and the procedures followed if resources are discovered, the duties of the Native American Monitor of Gabrieleño Ancestry and the general steps the Monitor would follow in conducting a salvage investigation.

(b) The project developer shall retain a Native American Monitor of Gabrieleño Ancestry (the "Tribe" or the "Consulting Tribe" that was consulted on this project pursuant to Assembly Bill A52 - SB18) to be on-site during all project-related, ground-disturbing construction activities (e.g., pavement removal, auguring, boring, grading, excavation, potholing, trenching, and grubbing) of previously undisturbed native soils to a maximum depth of 30 feet below ground surface. A copy of the executed contract shall be submitted to the City of Ontario Planning Department prior to the issuance of any grading permit (any ground-disturbing activity). At their discretion, a Native American Monitor of Gabrieleño Ancestry can be present during the removal of dairy manure to native soil, but not at the developers' expense.

(c) A qualified archaeologist and a Native American Monitor of Gabrieleño Ancestry (the "Tribe" or the "Consulting Tribe" that was consulted on this project pursuant to Assembly Bill A52 - SB18) shall evaluate all archaeological resources unearthed by project construction activities. If the resources are Native American in origin, the Tribe shall coordinate with the developer regarding treatment

and curation of these resources. Typically, the Tribe will request reburial or preservation for educational purposes. If archeological features are discovered, the archeologist shall report such findings to the Ontario Planning Director. If the archeological resources are found to be significant, the archeologist shall determine the appropriate actions, in cooperation with the City that shall be taken for exploration and/or salvage in compliance with CEQA Guidelines Section 15064.5(f).

(d) Prior to the start of ground disturbing activities, the developer shall arrange a designated site location within the footprint of the project for the respectful reburial of Tribal human remains and/or ceremonial objects. All human skeletal material discoveries shall be reported immediately to the County Coroner. The Native American Monitor shall immediately divert work a minimum of 50 feet from the discovery site and place an exclusion zone around the burial. The Native American Monitor shall notify the construction manager who shall contact the San Bernardino County Coroner. All construction activity shall be diverted while the San Bernardino County Coroner determines if the remains are Native American. The discovery shall be confidential and secure to prevent further disturbance. If Native American, the San Bernardino County Coroner shall notify the Native American Heritage Commission (NAHC) as mandated by state law who will then appoint a Most Likely Descendent. In the case where discovered human remains cannot be documented and recovered on the same day, the remains shall be covered with muslin cloth and a steel plate that can be moved by heavy equipment placed over the excavation opening to protect the remains. If this type of steel plate is not available, a 24-hour guard shall be posted outside working hours. The Tribe shall make every effort to recommend diverting the project and keep the remains in situ and protected. If the project cannot be diverted, it may be determined that burials will be removed. If data recovery is approved by the Tribe, documentation shall be taken, which includes at a minimum detailed descriptive notes and sketches. Additional types of documentation shall be approved by the Tribe for data recovery purposes. Cremations will either be removed in bulk or means necessary to ensure complete recovery of all material. If the discovery of human remains includes four (4) or more burials, the location is considered a cemetery and a separate treatment plan shall be created. The project developer shall consult with the Tribe regarding avoidance of all cemetery sites. Once complete, a final report of all activities shall be submitted to the NAHC.

(e) There shall be no Scientific study or the utilization of any invasive diagnostics on any Native American human remains.

(f) If the San Bernardino County Coroner determines the remains represent a historic non-Native American burial, the burial shall be treated in the same manner of respect with agreement of the San Bernardino County Coroner. Reburial will be in an appropriate setting. If the San Bernardino County Coroner determines the remains to be modern, the San Bernardino County Coroner shall take custody of the remains.

(g) Each occurrence of human remains and associated funerary objects shall be stored using opaque cloth bags. All human remains, funerary objects, sacred objects and objects of cultural patrimony shall be removed to a secure container on site if possible. These items shall be retained and reburied within six months of recovery. The site of reburial/repatriation shall be on the project site, but at a location agreed upon between the Tribe and the developer and protected in perpetuity. There shall be no publicity regarding any cultural materials recovered.

2.17 Additional Requirements.

(a) The Ontario Climate Action Plan (CAP) requires new development to be 25% more efficient. The applicant has elected to utilize the Screening Tables provided in the CAP instead of preparing separate emissions calculations. By electing to utilize the Screening Tables the applicant shall be required to garner a minimum of 100 points to be consistent with the reduction quantities outlined in the CAP. The applicant shall identify on the construction drawings the items identified in the Screening Tables.

(b) Each employee break area shall include seating and a shade tree.

ENGINEERING DEPARTMENT CONDITIONS OF APPROVAL

APPROVED BY: Khoi Do 10-7-20
 Khoi Do, P.E. Date
 City Engineer

THIS PROJECT SHALL COMPLY WITH THE REQUIREMENTS SET FORTH IN THE GENERAL STANDARD CONDITIONS OF APPROVAL ADOPTED BY THE CITY COUNCIL (RESOLUTION NO. 2017-027) AND THE PROJECT SPECIFIC CONDITIONS OF APPROVAL SPECIFIED IN HEREIN. ONLY APPLICABLE CONDITIONS OF APPROVAL ARE CHECKED. THE APPLICANT SHALL BE RESPONSIBLE FOR THE COMPLETION OF ALL APPLICABLE CONDITIONS OF APPROVAL PRIOR TO PARCEL MAP APPROVAL, ISSUANCE OF PERMITS AND/OR OCCUPANCY CLEARANCE, AS SPECIFIED IN THIS REPORT.

1. PRIOR TO PARCEL MAP APPROVAL, APPLICANT SHALL: Check When Complete

- 1.01 Dedicate to the City of Ontario, the right-of-way, described below:**
 - A. Property line corner 'cut-back' required at the southeast corner of Grove Ave and Francis St.**
- 1.02 Dedicate to the City of Ontario, the following easement(s):** _____
- 1.03 Restrict vehicular access to the site as follows:** _____
- 1.04 Vacate the following street(s) and/or easement(s):**
 - A. All interfering on-site easements shall be quitclaimed, vacated, and/or submit non-interference letter from affected owner/utility company.**
 - B. Existing 12.5 feet wide easement along the east side of Parcels 3 and 4 for railroad and incidental purposes to the City of Ontario**
- 1.05 Submit a copy of a recorded private reciprocal use agreement or easement. The agreement or easement shall ensure, at a minimum, common ingress and egress and joint maintenance of all common access areas and drive aisles. See COA 1.14B.**
- 1.06 Provide (original document) Covenants, Conditions and Restrictions (CC&Rs) as applicable to the project and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&Rs shall provide for, but not be limited to, common ingress and egress, joint maintenance responsibility for all common access improvements, common facilities, parking areas, utilities, median and landscaping improvements and drive approaches, in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project. The CC&Rs shall also address the maintenance and repair responsibility for public improvements/utilities (sewer, water, storm drain, recycled water, etc.) located within open space/easements. In the event of any maintenance or repair of these facilities, the City shall only restore disturbed areas to current City Standards.**
- 1.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at <http://tceplumecleanup.com/>), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658.**
- 1.08 File an application for Reapportionment of Assessment, together with payment of a reapportionment processing fee, for each existing assessment district listed below. Contact the Financial Services Department at (909) 395-2124 regarding this requirement.**
 - (1) _____
 - (2) _____

- 1.09 Prepare a fully executed Subdivision Agreement (on City approved format and forms) with accompanying security as required, or complete all public improvements.
- 1.10 Provide a monument bond (i.e. cash deposit) in an amount calculated by the City's approved cost estimate spreadsheet (available for download on the City's website: www.ci.ontario.ca.us) or as specified in writing by the applicant's Registered Engineer or Licensed Land Surveyor of Record and approved by the City Engineer, whichever is greater.
- 1.11 Provide a preliminary title report current to within 30 days.
- 1.12 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2353 to initiate the CFD application process.
- 1.13 New Model Colony (NMC) Developments:
 - 1) Provide evidence of final cancellation of Williamson Act contracts associated with this tract, prior to approval of any final subdivision map. Cancellation of contracts shall have been approved by the City Council.
 - 2) Provide evidence of sufficient storm water capacity availability equivalents (Certificate of Storm Water Treatment Equivalents).
 - 3) Provide evidence of sufficient water availability equivalents (Certificate of Net MDD Availability).
- 1.14 Other conditions:
 - A. Obtain all off-site rights-of-way/easements necessary to construct the required public improvements identified within Section 2 of these Conditions of Approval.
 - B. Provide private easements for utilities, cross lot drainage, blanket emergency access and reciprocal access across all parcels in favor of all parcels (as needed).
 - C. A 5 feet wide easement for sewer purposes for the benefit of Parcel 2 of Parcel Map No. 2566 through Parcel 1. See COA 2.26A.

2. PRIOR TO ISSUANCE OF ANY PERMITS, APPLICANT SHALL:

**A. GENERAL
 (Permits Includes Grading, Building, Demolition and Encroachment)**

- 2.01 Record Parcel Map No. 20187 pursuant to the Subdivision Map Act and in accordance with the City of Ontario Municipal Code.
- 2.02 Submit a duplicate photo mylar of the recorded map to the City Engineer's office.
- 2.03 Note that the subject parcel is a recognized parcel in the City of Ontario per _____
- 2.04 Note that the subject parcel is an 'unrecognized' parcel in the City of Ontario and shall require a Certificate of Compliance to be processed unless a deed is provided confirming the existence of the parcel prior to the date of _____
- 2.05 Apply for a: Certificate of Compliance with a Record of Survey; Lot Line Adjustment
 - Make a Dedication of Easement.

- 2.06 Provide (original document) Covenants, Conditions and Restrictions (CC&R's), as applicable to the project, and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&R's shall provide for, but not be limited to, common ingress and egress, joint maintenance of all common access improvements, common facilities, parking areas, utilities and drive approaches in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project.

- 2.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at <http://tceplumecleanup.com/>), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658.

- 2.08 **Submit a soils/geology report.**

- 2.09 **Other Agency Permit/Approval: Submit a copy of the approved permit and/or other form of approval of the project from the following agency or agencies:**
 - State of California Department of Transportation (Caltrans)
 - San Bernardino County Road Department (SBCRD)
 - San Bernardino County Flood Control District (SBCFCD)
 - Federal Emergency Management Agency (FEMA)
 - Cucamonga Valley Water District (CVWD) for sewer/water service
 - United States Army Corps of Engineers (USACE)
 - California Department of Fish & Game
 - Inland Empire Utilities Agency (IEUA)
 - Other:**
 - **Southern California Edison (SCE) – for any improvements encroaching into their easements/property**

- 2.10 Dedicate to the City of Ontario the right-of-way described below:

_____ feet on _____

Property line corner 'cut-back' required at the intersection of _____ and _____.

- 2.11 Dedicate to the City of Ontario the following easement(s): _____

- 2.12 **New Model Colony (NMC) Developments:**
 - 1) Submit a copy of the permit from the San Bernardino County Health Department to the Engineering Department and the Ontario Municipal Utilities Company (OMUC) for the destruction/abandonment of the on-site water well. The well shall be destroyed/abandoned in accordance with the San Bernardino County Health Department guidelines.
 - 2) Make a formal request to the City of Ontario Engineering Department for the proposed temporary use of an existing agricultural water well for purposes other than agriculture, such as grading, dust control, etc. Upon approval, the Applicant shall enter into an agreement with the City of Ontario and pay any applicable fees as set forth by said agreement.

- 3) Design proposed retaining walls to retain up to a maximum of three (3) feet of earth. In no case shall a wall exceed an overall height of nine (9) feet (i.e. maximum 6-foot high wall on top of a maximum 3-foot high retaining wall.

- 2.13 Submit a security deposit to the Engineering Department to guarantee construction of the public improvements required herein valued at _____% of the approved construction cost estimate. Security deposit shall be in accordance with the City of Ontario Municipal Code. Security deposit will be eligible for release, in accordance with City procedure, upon completion and acceptance of said public improvements.

- 2.14 **The applicant/developer shall submit all necessary survey documents prepared by a Licensed Surveyor registered in the State of California detailing all existing survey monuments in and around the project site. These documents are to be reviewed and approved by the City Survey Office.**

- 2.15 **Pay all Development Impact Fees (DIF) to the Building Department. Storm Drain Development Impact Fee, approximately \$355,965, shall be paid to the Building Department. Final fee shall be determined based on the approved site plan.**

- 2.16 Other conditions: _____

B. PUBLIC IMPROVEMENTS

(See attached Exhibit 'A' for plan check submittal requirements.)

- 2.17 Design and construct full public improvements in accordance with the City of Ontario Municipal Code, current City standards and specifications, master plans and the adopted specific plan for the area, if any. These public improvements shall include, but not be limited to, the following (checked boxes):

Improvement	Grove Avenue	Francis Street	Street 3	Street 4
Curb and Gutter	<input type="checkbox"/> New; ___ ft. from C/L <input checked="" type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace	<input type="checkbox"/> New; ___ ft. from C/L <input checked="" type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace	<input type="checkbox"/> New; ___ ft. from C/L <input type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace	<input type="checkbox"/> New; ___ ft. from C/L <input type="checkbox"/> Replace damaged <input type="checkbox"/> Remove and replace

Removal of Improvements	_____	_____	_____	_____
Other Improvements	_____	_____	_____	_____

Specific notes for improvements listed in item no. 2.17, above:

- A. Remove existing driveway approaches and replace with sidewalk per City Std. No. 1209.**
- B. Remove and replace the existing sidewalk ramp at the SEC of Grove Ave and Francis St to meet current City standards. This includes but is not limited to providing a curb return radius of 45-ft and constructing modifications to the existing traffic signal on Grove Ave and Francis St.**

2.18 Construct a 2" asphalt concrete (AC) grind and overlay on the following street(s): _____

- 2.19 **Reconstruction of the full pavement structural section, per City of Ontario Standard Drawing number 1011, may be required based on the existing pavement condition and final street design. Minimum limits of reconstruction shall be along property frontage, from street centerline to curb/gutter.**
- 2.20 Make arrangements with the Cucamonga Valley Water District (CVWD) to provide water service sewer service to the site. This property is within the area served by the CVWD and Applicant shall provide documentation to the City verifying that all required CVWD fees have been paid.
- 2.21 Overhead utilities shall be under-grounded, in accordance with Title 7 of the City's Municipal Code (Ordinance No. 2804 and 2892). Developer may pay in-lieu fee, approximately _____, for undergrounding of utilities in accordance with Section 7-7.303.e of the City's Municipal Code.
- 2.22 Other conditions: _____

C. SEWER

- 2.23 **A 10-inch sewer main is available for connection by this project in Grove Ave. (Ref: Sewer plan bar code: S11695)**
- 2.24 Design and construct a sewer main extension. A sewer main is not available for direct connection. The closest main is approximately _____ feet away.
- 2.25 Submit documentation that shows expected peak loading values for modeling the impact of the subject project to the existing sewer system. The project site is within a deficient public sewer system area. Applicant shall be responsible for all costs associated with the preparation of the model. Based on the results of the analysis, Applicant may be required to mitigate the project impact to the deficient public sewer system, including, but not limited to, upgrading of existing sewer main(s), construction of new sewer main(s) or diversion of sewer discharge to another sewer.
- 2.26 **Other conditions:**
 - A. **Existing Private Sewer and Easement Relocation: Relocate existing private sewer lateral serving adjacent property to the east and provide a new private sewer easement along the portion on private property. See COA 1.14C.**
 - B. **Sewer Services: No infiltration flow may be introduced into the public sewer system. Relocate sewer laterals and private sewer systems so that they are not located under or within infiltration areas, detention/retention areas, or bioswales.**

D. WATER

- 2.27 **A 12-inch water main is available for connection by this project in Grove Ave. (Ref: Water plan bar code: W11990)**
- 2.28 Design and construct a water main extension. A water main is not available for direct connection. The closest main is approximately _____ feet away.
- 2.29 Other conditions: _____

E. RECYCLED WATER

- 2.30 A _____ inch recycled water main is available for connection by this project in _____. (Ref: Recycled Water plan bar code: _____)
- 2.31 Design and construct an on-site recycled water system for this project. A recycled water main does exist in the vicinity of this project.
- 2.32 **Design and construct an on-site recycled water ready system for this project. A recycled water main does not currently exist in the vicinity of this project, but is planned for the near future. If Applicant would like to connect to this recycled water main when it becomes available, the cost for the connection shall be borne solely by the Applicant.**

- 2.33 Submit two (2) hard copies and one (1) electronic copy, in PDF format, of the Engineering Report (ER), for the use of recycled water, to the OMUC for review and subsequent submittal to the California Department of Public Health (CDPH) for final approval.

Note: The OMUC and the CDPH review and approval process will be approximately three (3) months. Contact the Ontario Municipal Utilities Company at (909) 395-2647 regarding this requirement.

- 2.34 Other conditions: _____

F. TRAFFIC / TRANSPORTATION

- 2.35 Submit a focused traffic impact study, prepared and signed by a Traffic/Civil Engineer registered in the State of California. The study shall address, but not be limited to, the following issues as required by the City Engineer:
 - 1. On-site and off-site circulation
 - 2. Traffic level of service (LOS) at 'build-out' and future years
 - 3. Impact at specific intersections as selected by the City Engineer

- 2.36 New traffic signal installations shall be added to Southern California Edison (SCE) customer account number # 2-20-044-3877.

- 2.37 Other conditions:
 - A. Design and construct modifications to the existing traffic signal on Grove Ave and Francis St. The traffic signal modification shall address relocation or upgrade of any affected equipment including poles, video detection, CCTV, interconnect cable and conduit, emergency vehicle preemption systems, and bicycle detection to the satisfaction of the City Engineer. All new signal equipment shall be installed at its ultimate location, unless precluded by right-of-way limitations.
 - B. Design and construct in-fill public street lights and retrofit existing street lights along its project frontage. Street lighting shall be LED-type and in accordance with City's Traffic and Transportation Design Guidelines
 - C. Design and construct proposed driveways in accordance with City of Ontario Standard Drawing No. 1204 for Commercial Driveway.

G. DRAINAGE / HYDROLOGY

- 2.38 A _____ inch storm drain main is available to accept flows from this project in _____.
(Ref: Storm Drain plan bar code: _____)

- 2.39 Submit a hydrology study and drainage analysis, prepared and signed by a Civil Engineer registered in the State of California. The study shall be prepared in accordance with the San Bernardino County Hydrology Manual and City of Ontario standards and guidelines. Additional drainage facilities, including, but not limited to, improvements beyond the project frontage, may be required to be designed and constructed, by Applicant, as a result of the findings of this study.

- 2.40 An adequate drainage facility to accept additional runoff from the site does not currently exist downstream of the project. Design and construct a storm water detention facility on the project site. 100 year post-development peak flow shall be attenuated such that it does not exceed 80% of pre-development peak flows, in accordance with the approved hydrology study and improvement plans.

- 2.41 Submit a copy of a recorded private drainage easement or drainage acceptance agreement to the Engineering Department for the acceptance of any increase to volume and/or concentration of historical drainage flows onto adjacent property, prior to approval of the grading plan for the project.

- 2.42 Comply with the City of Ontario Flood Damage Prevention Ordinance (Ordinance No. 2409). The project site or a portion of the project site is within the Special Flood Hazard Area (SFHA) as indicated on the Flood Insurance Rate Map (FIRM) and is subject to flooding during a 100 year frequency storm. The site plan shall be subject to the provisions of the National Flood Insurance Program.

2.43 Other conditions: _____

H. STORM WATER QUALITY / NATIONAL POLLUTANT DISCHARGE AND ELIMINATION SYSTEM (NPDES)

2.44 401 Water Quality Certification/404 Permit – Submit a copy of any applicable 401 Certification or 404 Permit for the subject project to the City project engineer. Development that will affect any body of surface water (i.e. lake, creek, open drainage channel, etc.) may require a 401 Water Quality Certification from the California Regional Water Quality Control Board, Santa Ana Region (RWQCB) and a 404 Permit from the United States Army Corps of Engineers (USACE). The groups of water bodies classified in these requirements are perennial (flow year round) and ephemeral (flow during rain conditions, only) and include, but are not limited to, direct connections into San Bernardino County Flood Control District (SBCFCD) channels.
If a 401 Certification and/or a 404 Permit are not required, a letter confirming this from Applicant's engineer shall be submitted.
Contact information: USACE (Los Angeles District) (213) 452-3414; RWQCB (951) 782-4130.

2.45 **Submit a Water Quality Management Plan (WQMP). This plan shall be approved by the Engineering Department prior to approval of any grading plan. The WQMP shall be submitted, utilizing the current San Bernardino County Stormwater Program template, available at: <http://www.sbcounty.gov/dpw/land/npdes.asp>.**

2.46 Design and construct a Connector Pipe Trash Screen or equivalent Trash Treatment Control Device, per catch basin located within or accepting flows tributary of a Priority Land Use (PLU) area that meets the Full Capture System definition and specifications, and is on the Certified List of the State Water Resources Control Board. The device shall be adequately sized per catch basin and include a deflector screen with vector control access for abatement application, vertical support bars, and removable component to facilitate maintenance and cleaning.

2.47 Other conditions: _____

J. SPECIAL DISTRICTS

2.48 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2353 to initiate the CFD application process.

2.49 Other conditions: _____

K. FIBER OPTIC

2.50 **Design and construct fiber optic system to provide access to the City's conduit and fiber optic system per the City's Fiber Optic Master Plan. Building entrance conduits shall start from the closest OntarioNet hand hole constructed along the project frontage in the ROW and shall terminate in the main telecommunications room for each building. Conduit infrastructure shall interconnect with the primary and/or secondary backbone fiber optic conduit system at the nearest OntarioNet hand hole. Limits of work are generally located along the project frontages of Grove Ave and Francis St.**

2.51 **Refer to the City's Fiber Optic Master Plan for design and layout guidelines. Contact the Broadband Operations Department at (909) 395-2000, regarding this requirement.**

L. Solid Waste

- 2.52** Onsite solid waste shall be designed in accordance with the City's Solid Waste Manual location at:
<http://www.ontarioca.gov/municipal-utilities-company/solid-waste>
- 2.53** Other conditions:
 - A. Prior to approval of any building permits, submit a Final Solid Waste Handling Plan Sheet accompanying the Precise Grading Plan Submittal to the City/OMUC for review and approval. See Solid Waste Handling Plan (SWHP) Requirements document for details.
 - i. Organics Separation and Collection: This site shall comply with the Requirements of State Assembly Bill AB1826, which requires organic waste to be diverted and collected separately from recycling and other refuse wastes.
 - B. The applicant shall submit a Final Integrated Waste Management Report that complies with the "Integrated Waste Management Report Requirements" document for review and approval with the Precise Grading Plan. This report shall address the management of all integrated waste (Refuse, Recycling, Organics, etc.) generated by the project.

3. PRIOR TO ISSUANCE OF A CERTIFICATE OF OCCUPANCY, APPLICANT SHALL:

- 3.01** Set new monuments in place of any monuments that have been damaged or destroyed as a result of construction of the subject project. Monuments shall be set in accordance with City of Ontario standards and to the satisfaction of the City Engineer.
- 3.02** Complete all requirements for recycled water usage.
 - 1) Procure from the OMUC a copy of the letter of confirmation from the California Department of Public Health (CDPH) that the Engineering Report (ER) has been reviewed and the subject site is approved for the use of recycled water.
 - 2) Obtain clearance from the OMUC confirming completion of recycled water improvements and passing of shutdown tests and cross connection inspection, upon availability/usage of recycled water.
 - 3) Complete education training of on-site personnel in the use of recycled water, in accordance with the ER, upon availability/usage of recycled water.
- 3.03** The applicant/developer shall submit all final survey documents prepared by a Licensed Surveyor registered in the State of California detailing all survey monuments that have been preserved, revised, adjusted or set along with any maps, corner records or Records of Survey needed to comply with these Conditions of Approvals and the latest edition of the California Professional Land Survey Act. These documents are to be reviewed and approved by the City Survey Office.
- 3.04** NMC Projects: For developments located at an intersection of any two collector or arterial streets, the applicant/developer shall set a monument if one does not already exist at that intersection. Contact the City Survey office for information on reference benchmarks, acceptable methodology and required submittals.
- 3.05** Confirm payment of all Development Impact Fees (DIF) to the Building Department.
- 3.06** Submit electronic copies (PDF and Auto CAD format) of all approved improvement plans, studies and reports (i.e. hydrology, traffic, WQMP, etc.).

4. PRIOR TO FINAL ACCEPTANCE, APPLICANT SHALL:

- 4.01** Complete all Conditions of Approval listed under Sections 1-3 above.

- 4.02 Pay all outstanding fees pursuant to the City of Ontario Municipal Code, including but not limited to, plan check fees, inspection fees and Development Impact Fees.**
- 4.03 The applicant/developer shall submit a written request for the City's final acceptance of the project addressed to the City Project Engineer. The request shall state that all Conditions of Approval have been completed and shall be signed by the applicant/developer. Upon receipt of the request, review of the request shall be a minimum of 10 business days. Conditions of Approval that are deemed incomplete by the City will cause delays in the acceptance process.**

EXHIBIT 'A'

ENGINEERING DEPARTMENT First Plan Check Submittal Checklist

Project Number: PDEV20-001, PMTT20-001, and/or Parcel Map No. 20187

The following items are required to be included with the first plan check submittal:

1. **A copy of this check list**
2. **Payment of fee for Plan Checking**
3. **One (1) copy of Engineering Cost Estimate (on City form) with engineer's wet signature and stamp.**
4. **One (1) copy of project Conditions of Approval**
5. **Include a PDF (electronic submittal) of each required improvement plan at every submittal.**
6. Two (2) sets of Potable and Recycled Water demand calculations (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size).
7. Three (3) sets of Public Street improvement plan with street cross-sections
8. Three (3) sets of Private Street improvement plan with street cross-sections
9. Four (4) sets of Public Water improvement plan (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size)
10. Four (4) sets of Recycled Water improvement plan (include recycled water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size and an exhibit showing the limits of areas being irrigated by each recycled water meter)
11. Four (4) sets of Public Sewer improvement plan
12. Five (5) sets of Public Storm Drain improvement plan
13. **Three (3) sets of Public Street Light improvement plan**
14. Three (3) sets of Signing and Striping improvement plan
15. **Three (3) sets of Fiber Optic plan (include Auto CAD electronic submittal)**
16. **Three (3) sets of Dry Utility plans within public right-of-way (at a minimum the plans must show existing and ultimate right-of-way, curb and gutter, proposed utility location including centerline dimensions, wall to wall clearances between proposed utility and adjacent public line, street work repaired per Standard Drawing No. 1306. Include Auto CAD electronic submittal)**
17. **Three (3) sets of Traffic Signal improvement plan and One (1) copy of Traffic Signal Specifications with modified Special Provisions. Please contact the Traffic Division at (909) 395-2154 to obtain Traffic Signal Specifications.**
18. **Two (2) copies of Water Quality Management Plan (WQMP), including one (1) copy of the approved Preliminary WQMP (PWQMP).**
19. **One (1) copy of Hydrology/Drainage study**
20. **One (1) copy of Soils/Geology report**

21. **Payment for Final Map/Parcel Map processing fee**
22. **Three (3) copies of Final Map/Parcel Map**
23. **One (1) copy of approved Tentative Map**
24. **One (1) copy of Preliminary Title Report (current within 30 days)**
25. **One (1) copy of Traverse Closure Calculations**
26. **One (1) set of supporting documents and maps (legible copies): referenced improvement plans (full size), referenced record final maps/parcel maps (full size, 18"x26"), Assessor's Parcel map (full size, 11"x17"), recorded documents such as deeds, lot line adjustments, easements, etc.**
27. Two (2) copies of Engineering Report and an electronic file (include PDF format electronic submittal) for recycled water use
28. Other: _____

Lorena Mejia

Project Name and Location:

4 Industrial Bldgs – Grove Ave Specific Plan
 SE corner of Grove Ave and Francis Street

Applicant/Representative:

EBS Realty Partners LLC
 1300 N Bristol Suite 290
 Newport Beach, CA 92660

<input checked="" type="checkbox"/>	A Preliminary Landscape Plan (dated 09/10/20) meets the Standard Conditions for New Development and has been approved with the consideration that the following conditions below be met upon submittal of the landscape construction documents.
<input type="checkbox"/>	A Preliminary Landscape Plan (dated) has not been approved. Corrections noted below are required prior to Preliminary Landscape Plan approval.

A RESPONSE SHEET IS REQUIRED WITH RESUBMITTAL OR PLANS WILL BE RETURNED AS INCOMPLETE.
 Landscape construction plans with plan check number may be emailed to landscapeplancheck@ontarioca.gov
DIGITAL SUBMITTALS MUST BE 10MB OR LESS.

Civil/ Site Plans

1. Provide an arborist report, and tree inventory for existing trees include genus, species, trunk diameter, canopy width, and condition. Show and note existing trees in good condition to remain and note trees proposed to be removed. Include existing trees within 15' of adjacent property that would be affected by new walls, footings, or on-site tree planting. Add tree protection notes on construction and demo plans to protect trees to remain. Replacement and mitigation for removed trees shall be equal to trunk diameter of heritage trees removed per the Development Code Tree Preservation Policy and Protection Measures, section 6.05.020. A total of 707 inches of tree replacement is required to be mitigated.
2. Show on demo plans and landscape construction plans trees to be preserved, removed, or mitigation measures for trees removed, such as:
 - a. New 15 gallon trees min 1" diameter trunk, in addition to trees required.
 - b. New 24" box trees min 1.5" diameter trunk, in addition to trees required.
 - c. Upsizing trees on the plan one size larger such as 15 gallon to 24" box, or 24" to 36" box size.
 - d. Monetary value of the trees removed as identified in the "Guide for Plant Appraisal", approved certified arborist plant appraiser, or may be equal to the value of the installation cost of planting, fertilizing, staking and irrigating 15 gallon trees, (100\$ each) to the City of Ontario Historic Preservation Fund for city tree planting or city approved combination of the above items.
3. Show corner ramp and sidewalk per city standard drawing 1213 with max 10' or 13' of ramp and sidewalk behind at corners.
4. Note for compaction to be no greater than 85% at landscape areas. All finished grades at 1 1/2" below finished surfaces. Slopes to be maximum 3:1.

5. Show outdoor employee break area with table or bench and shade trees on the south and west sides.

Landscape Plans

6. Show corner ramp and sidewalk per city standard drawing 1213.
7. Show enhanced paving at drive entries and employee outdoor break areas.
8. Coordinate with civil and Engineering Department for parkway locations (behind the sidewalk).
9. Provide evergreen or deciduous background trees along Grove Avenue to contrast with street trees and triangularly space between them.
10. Limit use of succulents and aloes to protected accent areas.
11. Call out all fences and walls, materials proposed, and heights.
12. Show outdoor employee break area with table or bench and shade trees on the south and west sides.
13. After a project's entitlement approval, the applicant shall pay all applicable fees for landscape plan check and inspections at a rate established by resolution of the City Council. Fees are:

Plan Check—5 or more acres.....	\$2,791.00
Inspection—Construction (up to 3 inspections per phase).....	<u>\$600.00</u>
Total.....	\$3,391.00
Inspection—Field – any additional.....	\$83.00

Landscape construction plans with building permit number for plan check may be emailed to landscapeplancheck@ontarioca.gov

CITY OF ONTARIO

MEMORANDUM

TO: Lorena Mejia, Senior Planner

FROM: Officer Emily Hernandez, Police Department

DATE: February 25, 2020

SUBJECT: PDEV20-001- A DEVELOPMENT PLAN TO CONSTRUCT 4 INDUSTRIAL BUILDINGS TOTALING 355,254 SQUARE FEET, LOCATED AT THE SOUTHEAST CORNER OF GROVE AVENUE AND FRANCIS STREET.

The “Standard Conditions of Approval” contained in Resolution No. 2017-027 apply. The applicant shall read and be thoroughly familiar with these conditions, including, but not limited to, the requirements below.

- Required lighting for all walkways, driveways, doorways, parking lots, hallways and other areas used by the public shall be provided. Lights shall operate via photosensor. Photometrics shall be provided to the Police Department and include the types of fixtures proposed and demonstrate that such fixtures meet the vandal-resistant requirement. Planned landscaping shall not obstruct lighting.
- Rooftop addresses shall be installed on the buildings as stated in the Standard Conditions. The numbers shall be at a minimum 6 feet tall and 2 foot wide, in reflective white paint on a flat black background, and oriented with the bottom of the numbers towards the addressed street. Associated letters shall also be included.
- First floor common stairwells shall be constructed so as to either allow for visibility through the stairwell risers or to prohibit public access to the areas behind stairwells.
- The Applicant shall comply with construction site security requirements as stated in the Standard Conditions.

The Applicant is invited to contact Officer Emily Hernandez at (909) 408-1755 with any questions or concerns regarding these conditions.

CITY OF ONTARIO

MEMORANDUM

TO: Lorena Mejia, Senior Planner
Planning Department

FROM: Paul Ehrman, Deputy Fire Chief/Fire Marshal
Fire Department

DATE: February 18, 2020

SUBJECT: PDEV20-001 – A Development Plan to construct 4 industrial buildings totaling 355,254 square feet on 15.74 acres of land located at the southeast corner of Grove Avenue and Francis Street, within the Office/Commercial land use district of the Grove Avenue Specific Plan (APNs: 0113-451-14 and 0113-451-27). Related File: PMTT20-001.

-
- The plan **does** adequately address Fire Department requirements at this time.
- Standard Conditions of Approval apply, as stated below.

SITE AND BUILDING FEATURES:

- A. 2016 CBC Type of Construction: Type III-B
- B. Type of Roof Materials: Panelized
- C. Ground Floor Area(s): Varies, 3 Buildings – Largest being 120,821 Sq. Ft.
- D. Number of Stories: 1 with Mezzanine
- E. Total Square Footage: 3 Buildings totaling 228,886 Sq. Ft.
- F. 2016 CBC Occupancy Classification(s): S

CONDITIONS OF APPROVAL:

1.0 GENERAL

- ☒ 1.1 The following are the Ontario Fire Department (“Fire Department”) requirements for this development project, based on the current edition of the California Fire Code (CFC), and the current versions of the Fire Prevention Standards (“Standards.”) It is recommended that the applicant or developer transmit a copy of these requirements to the on-site contractor(s) and that all questions or concerns be directed to the Bureau of Fire Prevention, at (909) 395-2029. For copies of Ontario Fire Department Standards please access the City of Ontario web site at www.ontarioca.gov, click on “Fire Department” and then on “Standards and Forms.”
- ☒ 1.2 These Fire Department conditions of approval are to be included on any and all construction drawings.

2.0 FIRE DEPARTMENT ACCESS

- ☒ 2.1 Fire Department vehicle access roadways shall be provided to within 150 ft. of all portions of the exterior walls of the first story of any building, unless specifically approved. Roadways shall be paved with an all-weather surface and shall be a minimum of twenty-four (24) ft. wide. See Standard #B-004.
- ☒ 2.2 In order to allow for adequate turning radius for emergency fire apparatus, all turns shall be designed to meet the minimum twenty five feet (25’) inside and forty-five feet (45’) outside turning radius per Standard #B-005.
- ☒ 2.3 Fire Department access roadways that exceed one hundred and fifty feet (150’) in length shall have an approved turn-around per Standard #B-002.
- ☒ 2.4 Access drive aisles which cross property lines shall be provided with CC&Rs, access easements, or reciprocating agreements, and shall be recorded on the titles of affected properties, and copies of same shall be provided at the time of building plan check.
- ☒ 2.5 "No Parking-Fire Lane" signs and /or red painted curbs with lettering are required to be installed in interior access roadways, in locations where vehicle parking would obstruct the minimum clear width requirement. Installation shall be per Standard #B-001.
- ☒ 2.6 Security gates or other barriers on fire access roadways shall be provided with a Knox brand key switch or padlock to allow Fire Department access. See Standards #B-003, B-004 and H-001.
- ☒ 2.7 Any time PRIOR to on-site combustible construction and/or storage, a minimum twenty-four (24) ft. wide circulating all weather access roads shall be provided to within 150 ft. of all portions of the exterior walls of the first story of any building, unless specifically approved by Fire Department and other emergency services.

3.0 WATER SUPPLY

- ☒ 3.1 The required fire flow per Fire Department standards, based on the 2016 California Fire Code, Appendix B, is 3750 gallons per minute (g.p.m.) for 4 hours at a minimum of 20 pounds per square inch (p.s.i.) residual operating pressure.
- ☒ 3.2 Off-site (public) fire hydrants are required to be installed on all frontage streets, at a minimum spacing of three hundred foot (300') apart, per Engineering Department specifications.
- ☒ 3.3 Buildings that exceed 100,000 square feet in floor area shall provide an onsite looped fire protection water line around the building(s.) The loops shall be required to have two or more points of connection from a public circulating water main.
- ☒ 3.4 The water supply, including water mains and fire hydrants, shall be tested and approved by the Engineering Department and Fire Department prior to combustible construction to assure availability and reliability for firefighting purposes.

4.0 FIRE PROTECTION SYSTEMS

- ☒ 4.2 Underground fire mains which cross property lines shall be provided with CC & R, easements, or reciprocating agreements, and shall be recorded on the titles of affected properties, and copies of same shall be provided at the time of Fire Department plan check. The shared use of private fire mains or fire pumps is allowable only between immediately adjacent properties and shall not cross any public street.
- ☒ 4.3 An automatic fire sprinkler system is required. The system design shall be in accordance with National Fire Protection Association (NFPA) Standard. All new fire sprinkler systems, except those in single family dwellings, which contain twenty (20) sprinkler heads or more shall be monitored by an approved listed supervising station. An application along with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.
- ☒ 4.5 Fire Department Connections (FDC) shall be located on the address side of the building within one hundred fifty feet (150') of a public fire hydrant on the same side of the street. Provide identification for all fire sprinkler control valves and Fire Department connections per Standard #D-007. Raised curbs adjacent to Fire Department connection(s) shall be painted red, five feet either side, per City standards.
- ☒ 4.6 A fire alarm system is required. The system design shall be in accordance with National Fire Protection Association (NFPA) Standard 72. An application along with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.
- ☒ 4.7 Portable fire extinguishers are required to be installed prior to occupancy per Standard #C-001. Please contact the Fire Prevention Bureau to determine the exact number, type and placement required.

5.0 BUILDING CONSTRUCTION FEATURES

- ☒ 5.1 The developer/general contractor is to be responsible for reasonable periodic cleanup of the development during construction to avoid hazardous accumulations of combustible trash and debris both on and off the site.
- ☒ 5.2 Approved numbers or addresses shall be placed on all new and existing buildings in such a position as to be plainly visible and legible from the street or road fronting the property. Multi-tenant or building projects shall have addresses and/or suite numbers provided on the rear of the building. Address numbers shall contrast with their background. See Section 9-1 6.06 of the Ontario Municipal Code and Standards #H-003 and #H-002.
- ☒ 5.4 Multiple unit building complexes shall have building directories provided at the main entrances. The directories shall be designed to the requirements of the Fire Department, see Section 9-1 6.06 of the Ontario Municipal Code and Standard #H-003.
- ☒ 5.6 Knox ® brand key-box(es) shall be installed in location(s) acceptable to the Fire Department. All Knox boxes shall be monitored for tamper by the building fire alarm system. See Standard #H-001 for specific requirements.
- ☒ 5.7 Placards shall be installed in acceptable locations on buildings that store, use or handle hazardous materials in excess of the quantities specified in the CFC. Placards shall meet the requirements of National Fire Protection Association (NFPA) Standard 704.

6.0 OTHER SPECIAL USES

- ☒ 6.1 The storage, use, dispensing, or handling of any hazardous materials shall be approved by the Fire Department, and adequate fire protection features shall be required. If hazardous materials are proposed, a Fire Department Hazardous Materials Information Packet, including Disclosure Form and Information Worksheet, shall be completed and submitted with Material Safety Data Sheets to the Fire Department along with building construction plans.
- ☒ 6.2 Any High Piled Storage, or storage of combustible materials greater than twelve (12') feet in height for ordinary (Class I-IV) commodities or storage greater than six feet (6') in height of high hazard (Group A plastics, rubber tires, flammable liquids, etc.) shall be approved by the Fire Department, and adequate fire protection features shall be required. If High Piled Storage is proposed, a Fire Department High Piled Storage Worksheet shall be completed and detailed racking plans or floor plans submitted prior to occupancy of the building.
- ☒ 6.3 Underground fuel tanks, their associated piping and dispensers shall be reviewed, approved, and permitted by Ontario Building Department, Ontario Fire Department, and San Bernardino County Fire Department Hazardous Materials Division. In fueling facilities, an exterior emergency pump shut-off switch shall be provided.

The following project has been submitted for review. Please send one (1) copy and email one (1) copy of your DAB report to the Planning Department by .

- Note:**
- Only DAB action is required
 - Both DAB and Planning Commission actions are required
 - Only Planning Commission action is required
 - DAB, Planning Commission and City Council actions are required
 - Only Zoning Administrator action is required

PROJECT DESCRIPTION: A Development Plan to construct 4 industrial buildings totaling 206,886 square feet on 15.74 acres of land located at the southeast corner of Grove Ave and Francis Street, within the Office/Commercial land use district of the Grove Avenue Specific Plan (APN(s): 0113-451-14 & 0113-451-27). Related File(s): PMTT20-001.

The plan does adequately address the departmental concerns at this time.

- No comments
- Report attached (1 copy and email 1 copy)
- Standard Conditions of Approval apply

The plan does not adequately address the departmental concerns.

- The conditions contained in the attached report must be met prior to scheduling for Development Advisory Board.

Broadband Operations	<i>Anna Vaca</i>	Sr. Systems Analyst	03/02/2020
Department	Signature	Title	Date

1. The City of Ontario is developing a fiber-optic telecommunications system throughout the city commonly known as OntarioNet. The fiber-optic telecommunications system is capable of providing advanced Internet/data services to homes and businesses in feasible areas within the city. OntarioNet will provide community related services including: traffic management; online civic services; meter reading; educational services; and a variety of other community services. OntarioNet and the high-speed data services it provides will keep the city on par with the modern workforce and ever changing lifestyles of the people and the community.
2. Communication systems proposed for on-site facilities will be placed underground within a duct and structure system to be installed by the developer. Maintenance of the installed system will be the responsibility of the City and/or Special District fiber optic entity and not that of the developer, private homeowners association or private homeowners. Development of the project requires the installation by the developer of all fiber optic infrastructure necessary to service the project as a standalone development.
3. The City requires public utility easement for fiber optics on all private aisles/alley ways.
4. Trenching, joint trenching, and boring shall be used to install the fiber-optic conduits. Fiber-optic conduit placement will generally be in a joint trench with Street Light conduits or in a separate trench/bore and in the Right-of-Way (ROW) generally placed behind the sidewalk. Resulting conduit placement generally, will be on the north side of street and the east side of street based on the direction of the street. Properly sized handholes shall be placed along the conduit path no greater than 500-feet apart in major streets and no greater than 300-feet apart within in-tract community streets. Handholes shall be strategically placed to allow for efficient entrance into commercial buildings, and residential properties and multi-dwelling units.
5. Structured Wiring – An integrated structured wiring system (low-voltage wiring) provides infrastructure for today's technology applications and the framework for the future technology advances. Requirements and benefits of a structured wiring system include:
 - Residential (single-family and multi-family), commercial and industrial developments shall adhere to the City's Structured Wiring ordinance
 - Allows for uniform receipt & distribution of technology services
 - Ensures scalability of wiring for future technology advances
 - Provides consistent & identical wiring protocols throughout developments
 - Enables the property infrastructure to interface efficiently with broadband networks for highest bandwidth capacity
 - Adoption of these standards will minimize retrofitting required to ensure new property owners are capable of the latest technologies and services
6. Building Entrance (Multi-family) - Design and install fiber optic conduit at a minimum depth of 36 inches. Trenching shall be per City Standard for Commercial Buildings. (1) 2-inch HDPE SDR-11 (Smoothwall) roll pipe (Orange) duct. Install locate/tracer wires minimum 12AWG within conduit bank and fiber warning tape 18-inch above the uppermost duct.
7. Multi-family and commercial properties shall terminate conduit in an electrical room adjacent to the wall no less than five inches above the finished floor. A 20" width X length 36" space shall be reserved on the plywood wall for OntarioNet equipment. This space shall be labeled "OntarioNet Only". Ontario Conduit shall be labeled "OntarioNet"
8. A minimum 1.5-inch joint use telecommunications conduit with pull-rope from the multi-family or commercial building communal telecom/electrical room/closet to each multi-family or commercial building unit shall be installed. See Structured Wiring Checklist on City's website for additional details.
9. A Fiber Optics Improvement Design Plan sheet should be part of the Design Plan submission and should be provided in digital format (PDF) as well, on future revisions

PC	10/27/2020		Recommend/ Final
CC	11/17/2020		Final

(3) Resolutions approving File Nos. PMTT19-018 (PM 20177), PDEV19-059, PDEV20-012, PCUP20-009 and PDEV20-013, pursuant to the facts and reasons contained in the staff report and attached resolutions, and subject to the conditions of approval contained in the attached departmental reports.

PROJECT SETTING: The project site is comprised of 41.35 acres of land located at the northwest corner of Riverside Drive and Milliken Avenue, within the CC (Community Commercial) and IL (Light Industrial) zoning districts and is depicted in Figure 1: Project Location. The Project site is comprised of three lots. The northern parcel is undeveloped and has been historically used for agricultural purposes (vineyard). The center parcel is developed with a wine shop (San Antonio Winery), restaurant, church, small animal farm, and vineyard. The southern parcel is presently vacant. The existing surrounding land uses, zoning, and general plan and specific plan land use designations are summarized in the "Surrounding Zoning & Land Uses" table located in the Technical Appendix of this report.

PROJECT ANALYSIS:

(1) Background — The Tuscana Village Specific Plan (File No. PSP09-001) and related Mitigated Negative Declaration ("MND") were approved by the City Council on June 5, 2012. The Tuscana Village Specific Plan established the land use designations, development standards, and design guidelines for the 20-acre Project site. The specific plan allowed for the potential development of 200 residential dwelling units and approximately 871,000 square feet of commercial development. The Applicant has requested that the City rescind the Tuscana Village Specific Plan, eliminate the existing residential land use designation, reduce the amount of commercial designated property, and incorporate an industrial land use designation to facilitate the construction of the proposed industrial and commercial developments, described below.

On October 9, 2019, the applicant submitted six applications to facilitate the development of the proposed industrial and commercial development, which include:

Figure 1: Project Location

- A General Plan Amendment (File No. PGPA19-007) to modify the Policy Plan (General Plan) Land Use Plan (Exhibit LU-01) component of The Ontario Plan, changing the land use designation on 41.35 acres of land from Mixed Use, to 7.6 acres of General Commercial and 33.75 acres of Industrial designated properties.
- A Specific Plan Amendment (File No. PSPA19-010) to rescind of the Tuscana Village Specific Plan.
- A Zone Change (File No. PZC19-002) on 41.35 acres of land to change the zoning designations from LDR-5 (Low Density Residential), CC (Community Commercial), and SP (Specific Plan), to 33.75 acres of IL (Light Industrial) and 7.6 acres of CC(Community Commercial) designated properties.
- A Tentative Parcel Map (File No. PMTT19-018/TPM 20177) to subdivide approximately 20 acres of land into 7 parcels within the proposed CC (Community Commercial) and IL (Light Industrial) zoning districts.
- A Development Plan (File No. PDEV19-059) to construct 3 industrial buildings totaling 295,991 square feet on approximately 13 acres of land within the proposed IL (Light Industrial) zoning district.

On April 24, 2020, the applicant submitted a Development Plan (File No. PDEV20-012) to construct a 3,062 square foot convenience store (7-Eleven) with fuel sales and an ancillary drive-thru car wash, in conjunction with a Conditional Use Permit (File No. PCUP20-009) to establish alcoholic beverage sales for off-premises consumption, limited to beer and wine (Type 20 ABC license), on 1.27 acres of land located within the proposed CC (Community Commercial) zoning district.

On June 3, 2020, the applicant submitted a Development Plan (File No. PDEV20-013) to construct a 2,490 square foot commercial building for a fast food restaurant (Starbucks) with a drive-thru facility on 1.18 acres of land located within the proposed CC (Community Commercial) zoning district.

On October 19, 2020, the Development Advisory Board ("DAB") conducted a hearing to consider the Tentative Parcel Map, three Development Plans and Conditional Use Permit, and concluded the hearing, voting to recommend that the Planning Commission approve the Applications subject to conditions of approval, which are included as attachments to the Planning Commission resolutions.

(2) General Plan Amendment ("GPA") — To accommodate the proposed Tentative Parcel Map and Development Plan applications, the GPA (File No. PGPA19-007) will revise Exhibit LU-01 Land Use Plan, changing the land use designation on 41.35 acres of land from Mixed-Use, to 7.6 acres of General Commercial and 33.75 acres of Industrial, as shown in Figure 2: General Plan Amendment. The GPA will also modify the Future

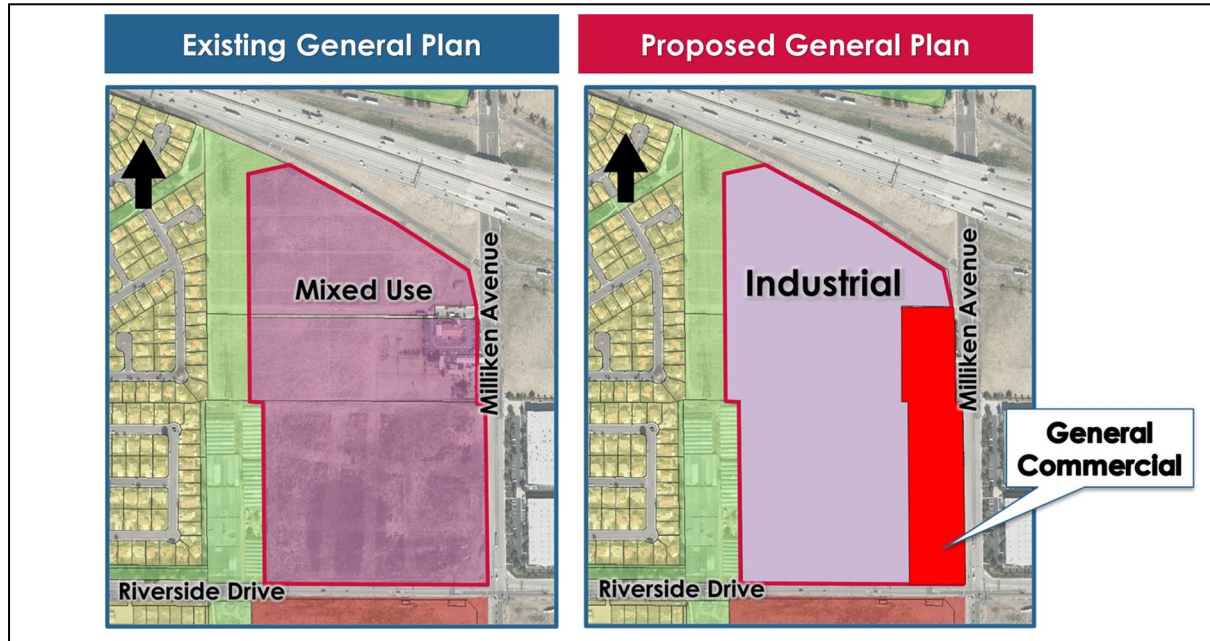

Figure 2: General Plan Amendment

Buildout Table (Exhibit LU-03), as shown in Exhibit B of this report, to be consistent with the proposed land use designation changes.

(a) General Commercial Land Uses – The GPA includes changes to Figure LU-03: Future Buildout, to reflect the proposed land use designation changes (Exhibit A - Amended LU-03: Future Buildout Table). The proposed land use designation change would eliminate 41 acres (TOP gross acres) of Mixed-Use designated land that includes 924,234 square feet of potential commercial/office space (based on a 0.25 FAR retail and 1.5 FAR office) and the loss of 185 residential units (based on 25 du/ac). The amendment would add 7 acres (TOP gross acres) of General Commercial designated land and 99,317 square feet of potential commercial space (based on a 0.30 FAR). The increase of commercial space represents a negligible 1.6 percent increase in building area over the 31 million square feet of commercial (retail\office) space that is existing and/or planned throughout the City.

(b) Industrial/Business Park Land Uses – The proposed GPA includes the addition of 33 acres (TOP gross acres) of Industrial land and 800,197 square feet of potential industrial space (based on a 0.55 FAR). The net gain of industrial space represents a negligible 0.5 percent increase in building area over the 181 million square feet of industrial/business park space that is existing and/or planned throughout the City.

(c) Residential Land Uses – The proposed GPA includes the elimination of approximately 7.3 acres of land allocated for 185 residential units at 25 dwelling units per acre. Senate Bill 330 – Housing Accountability Act (Government Code Section 65589.5 et seq.) ("SB 330") was passed by the California Legislature, signed by the Governor, and became effective on January 1, 2020. The bill prohibits changing the general plan land

use designation, specific plan land use designation, or zoning of residential parcels to a less intense use. As a result, any project proposing to eliminate any residential land uses are required to replace those units and demonstrate a “no net loss” of residential capacity. To address the removal of 185 low-moderate residential units and demonstrate a “no net loss,” and that the Project is compliant with SB 330, on December 17, 2019, the City Council approved an Amendment to the Meredith International Centre Specific Plan (File No. PSPA19-002) to establish a Mixed-Use Overlay district on 22.39 acres of land within a portion of Planning Area 2 (Urban Commercial) land use district, located at the southeast corner of Vineyard Avenue and Inland Empire Boulevard. The Specific Plan amendment provided for an additional 925 residential units at a density of 41 dwelling units per acre, which resulted in a surplus of residential units within the City. The loss of 185 units under the current Policy Plan designation will be directly offset by the addition of 925 units, resulting in a no net loss of residential units, and maintaining compliance requirements with SB330.

(3) Zone Change/Specific Plan Amendment (“SPA”) — To accommodate the proposed Development Plan applications, the proposed Zone Change (File No. PZC19-002) will modify the zoning designations on 41.35 acres of land from LDR-5 (Low Density Residential), CC (Community Commercial), and SP (Specific Plan), to 33.75 acres of IL (Light Industrial) and 7.6 acres of CC (Community Commercial). The 7.6 acres of CC (Community Commercial) land will be located along Milliken Avenue, at the northeast corner of the Project site. The 33.75 acres of IL (Light Industrial) zoned property occupies the majority of the project site to the north, south, and west, as shown in Figure 3: Zone

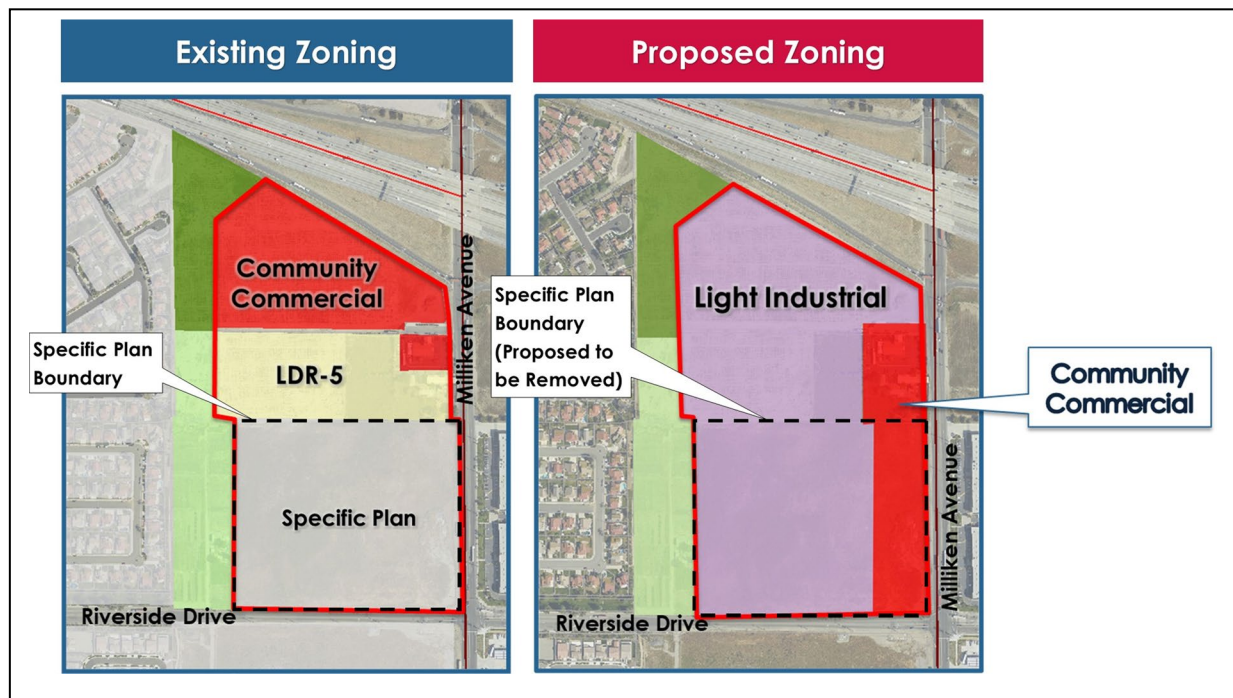

Figure 3: Zone Change

Change, above. The proposed buildings are envisioned to allow for warehousing or light manufacturing uses. Heavy manufacturing uses will not be allowed.

The Tuscana Village Specific Plan (File No. PSP09-001) occupies the southern portion of the overall Project site, encompassing 20-acres of land. The proposed SPA will rescind the existing Tuscana Village Specific Plan, which will result in the elimination of residential land uses, reduce the amount of commercially designated land from 12.1 acres to 5 acres (Community Commercial), and incorporate 15 acres of Light Industrial land uses.

(4) Tentative Parcel Map — The proposed Tentative Parcel Map will subdivide the Project site into 7 numbered lots and one lettered lot (see Exhibit C—Tentative Parcel Map, attached) to facilitate the construction of three industrial buildings totaling 295,991 square feet and two commercial developments. The parcels are located within two proposed zoning districts and range in size from 0.99 to 7.93 acres, as shown in the Tentative Parcel Map summary table, below.

Tentative Parcel Map 20177 Summary Table				
Parcel No.	Proposed General Plan Land Use Designation	Proposed Zoning District	Proposed Project File No. / Land Use	Acres
1	Industrial	IL (Light Industrial)	PDEV19-059 Industrial	2.8
2	Industrial	IL (Light Industrial)	PDEV19-059 Industrial	2.5
3	Industrial	IL (Light Industrial)	PDEV19-059 Industrial	7.93
4	General Commercial	CC (Community Commercial)	PDEV20-012 Commercial (7-Eleven)	1.27
5	General Commercial	CC (Community Commercial)	No project submittal Commercial	0.57
6	General Commercial	CC (Community Commercial)	No project submittal Commercial	0.99
7	General Commercial	CC (Community Commercial)	PDEV20-013 Commercial (Starbucks)	1.18
	Street Dedication			2.76
Total			18.82 acres (20 acres w/out dedication)	

The 3 industrial parcels (Parcels 1-3) exceed the minimum lot area requirement of 10,000 square feet (0.23 acres) of the Light Industrial land use district. The 4 commercial parcels (Parcels 4-7) also exceed the minimum lot area requirement of 10,000 square feet (0.23 acres) of the Community Commercial land use district. The proposed Tentative Parcel Map will facilitate the construction of internal public/private streets (“A” Street and “B” Street) and common drive aisles that will serve the commercial and industrial land uses of the overall Project site. Proposed, is a 40-foot wide public street (“A” Street - 66-foot right-of-way) that runs north-south through the Project site and is accessed from Riverside

Drive, approximately 600 feet west of Milliken Avenue. The public street is proposed to extend north, beyond the Project site, and terminate in a cul-de-sac to be constructed with future development, as shown on Exhibit D – Conceptual Site Plan, attached. A private street (“B” Street) is proposed along the northern property line, which runs east-west, with access from Milliken Avenue, located approximately 800 feet north of Riverside Drive. “B” Street intersects with “A” Street and transitions into a drive aisle, west of “A” Street. The commercial and Industrial portions of the Project site will have three access points from Riverside Drive (2 driveways and “A” Street), and two access points from Milliken Avenue (“B” Street and driveway).

(5) Development Plan PDEV19-059 (Industrial)

(a) Site Design/Building Layout — Proposed, is the construction of three industrial buildings totaling 295,991 square feet on three rectangular-shaped lots totaling 13.19 acres in area. The building sizes range from 54,475 to 179,160 square feet and the Project has an overall Floor Area Ratio (“FAR”) of 0.52.

The proposed buildings occupy the western portion of the Project site. Buildings 1 and 2 are located east of “A” Street and Building 3 is located west of “A” Street (see Exhibit D1— Industrial Site Plan, attached). A description of each building is provided below.

- Building 1 (Parcel 1) is located at the southeast corner of Riverside Drive and “A” Street and consists of a 62,356 square foot warehouse/distribution building, having a FAR of 0.51. Building 1 is oriented east-west, with dock-high loading doors and the building’s office entry facing north. The building has been designed with one office area located at the northwest corner of the building.

The building is setback approximately 10 feet from the west property line (“A” Street), approximately 22 feet from the south property line, approximately 140 feet from the north property line, and 56 feet from the east property line. Building 1 parking lots are located along the east property line and at the northwest corner of the parcel, adjacent to the office area.

The yard area will be screened from view of public streets to the south, by the proposed building. Street views from the east and west are mitigated by 14-foot high screen walls with view-obstructing gates.

- Building 2 (Parcel 2) is located at the northeast corner of “A” and “B” Streets and consists of a 54,475 square foot warehouse/distribution building, having a FAR of 0.50. Building 2 is oriented east to west, with dock high loading doors facing south. The office entry is located at the southwest corner of the proposed building.

The proposed building is setback approximately 60 feet from the north property line (facing “B” Street), approximately 30 feet from the south property line, approximately 10 feet west property line (facing “A” Street), and approximately

10 feet from the east property line. Building 2 parking lots will be located along the east property line and at the southwest corner of the parcel, adjacent to the office area.

The yard area will be screened from view of public streets on the north, by the proposed building. Street views from the east and west are mitigated by 14-foot high screen walls with view-obstructing gates.

- Building 3 (Parcel 3) is located at the southwest corner of Riverside Drive and "A" Street, and occupies the western portion of the industrial Project site, directly east of Buildings 1 and 2. Building 3 consists of a 179,160 square foot warehouse/distribution building, having a FAR of 0.52. Building 3 is oriented north-south, with dock-high loading doors facing east. Office entries are located at the southeast and northeast corners of the proposed building.

The proposed building is setback approximately 40 feet from the north property line, approximately 90 feet from the south property line (facing Riverside Drive), and 40 feet from the west property line (facing Creekside Residential Community).and the setback from the east property line (facing "A" Street), varies from approximately 38 feet to 180 feet. Off-street parking for Building 3 is provided along the southern and northern property lines, adjacent to each office area.

The tractor-trailer yard area will be screened from view of public streets by a 14-foot high screen wall, with view-obstructing gates. In addition, the east facing portion of the building was designed in a U-shaped configuration. The building wall containing the dock-high doors is recessed approximately 70 feet behind the main building line, abating possible views of any loading activities from the public street.

(b) Site Access/Circulation — The Industrial portion of the Project site will have three access points from Riverside Drive (2 driveways and "A" Street), and one access point from Milliken Avenue ("B" Street). Buildings 1 and 2, will have access from "A" Street, via a 50-foot wide shared driveway, centrally located between Parcels 1 and 2. Building 1 has a secondary access point from Riverside Drive, via a 40-foot wide driveway located at the southeast corner of the parcel, approximately 250 feet west of Milliken Avenue.

Building 3 has access from "A" Street, via a 40-foot wide driveway centrally located for tractor-trailer access via a 40-foot wide driveway located at the northeast corner of Parcel 3. Building 3 has a third access point from Riverside Drive, via a 26-foot wide driveway located at the southwest corner of Parcel 3. Due to the expansive width and length of Building 3, a 26-foot wide connecting drive-aisle is proposed along the western and northern property lines, to meet fire emergency access lane requirements

(c) Parking — The Project has provided off-street parking pursuant to the “Warehouse and Distribution” parking standards specified in the Development Code. The Project requires a total of 186 parking spaces, as shown in Table A: Parking Summary, below, which has been provided.

Table A: Parking Summary						
Bldg. No.	Type of Use	Building Area	Trailer Parking		Vehicle Spaces	
			Required	Provided	Required	Provided
1	Warehouse / Distribution	62,356 SF	1	1	44	44
2	Warehouse / Distribution	54,475 SF	1	1	42	42
3	Warehouse / Distribution	179,160 SF	5	17	100	100
Parking Totals:					186	186

(d) Architecture — The proposed buildings are of concrete tilt-up construction and all five buildings incorporate the same architectural design theme, incorporating enhanced elements and treatments at office entries and along street facing elevations (see Exhibit D2—Industrial Elevations, attached). Architectural elements for all buildings include smooth-painted concrete in white, grey, and tan tones, with horizontal and vertical reveals, storefronts with clear anodized aluminum mullions and blue glazing, metal canopies, arched windows at the main office entries, and recessed panel sections with contrasting colors. The mechanical equipment will be roof-mounted and obscured from public view by the parapet walls. Staff believes that the proposed Project illustrates the type of high-quality architecture promoted by the Development Code and Edenglen Specific Plan. This is exemplified through the use of:

- Articulation in the building footprint, incorporating a combination of recessed and popped-out wall areas;
- Articulation in the building parapet/roof line, which serves to accentuate the building’s entries and breaks up large expanses of building wall;
- Variations in building massing; and
- Incorporation of base and top treatments defined by changes in color and horizontal/vertical reveals.

(e) Landscaping — The Project provides an overall landscape coverage of 15 percent, consisting of 15.9 percent for Building 1, 13.6 percent for Building 2, and 15.1 percent for Building 3. The Project provides substantial landscaping along Riverside Drive, “A” Street, “B” Street, at each office element, throughout the parking areas, and along the western property line (see Exhibit D3—Industrial Landscape Plan, attached). The Project includes right-of-way improvements (street widening, curb, gutter, sidewalk, and parkway) along Riverside Drive. The proposed on-site and off-site landscape

improvements will assist towards creating a walkable safe area for pedestrians to access the Project site.

The landscape plan incorporates 24 and 36-inch box shade trees in the right-of-way, including London Plane trees along Riverside Drive and Tipuana Tipu trees on "A" Street. A combination of 48-inch, 36-inch, 24-inch box, and 15-gallon accent and shade trees will be provided on the Project site, the tree species include Paperbark, Chinese Elm, Holly Oak, Crape Myrtle, Southern Live Oak and Mondell Pine Trees. The landscape plan also includes a variety of shrubs, grasses, and groundcovers that are low water usage and drought tolerant, to be planted throughout the Project site. Moreover, each building will incorporate either one or two employee break areas, with benches, tables, and shade trees.

(6) Development Plan PDEV20-012 (7-Eleven) and Conditional Use Permit PCUP20-009

(a) Site Design/Building Layout — Proposed, is the construction of a 3,062 square foot convenience store (7-Eleven), an ancillary drive-thru car wash (991 SF), and fueling station in conjunction with a Conditional Use Permit (File No. PCUP20-009) to establish alcoholic beverage sales for a Type 20 ABC license (Off-Sale Beer and Wine) located at the northwest corner of Riverside Drive and Milliken Avenue (see Exhibit E— 7-Eleven Site Plan, attached). The Project occupies Parcel 4 of the proposed Tentative Parcel Map (File No. PMTT19-018/TPM 20177). The convenience store is centered along the northern property line, with the front entrance facing south, toward Riverside Drive. The ancillary car wash is attached on the north side of the convenience store building, with the tunnel entrance facing east and exit facing west.

The building is setback approximately 170 feet from the south (Riverside Drive) property line, approximately 85 feet from the east (Milliken Avenue) property line, 64 feet from the west (interior) property line, and 16 feet from the north (interior) property line. Parking for employees and customers has been provided immediately south of the building and along the south property line. The proposed convenience store floor plan includes a food sales area, cashier area, walk-in coolers, storage area, office, two restrooms, and electrical room (see Exhibit E1— 7-Eleven Convenience Store Floor Plan, attached).

The 86-foot by 36-foot fuel canopy is centrally located on the southern portion of the Project site, directly south of the convenience store, and contains six fuel dispensing islands. The overall canopy height is 19 feet with a 14.5-foot interior clear height. A two-way drive aisle, with adequate truck maneuvering, surrounding the fuel canopy has been provided to accommodate standard vehicles, trash trucks, and truck-tractor trailers. The fuel canopy will be located approximately 60 feet south of the convenience store, approximately 83 feet from the east (Milliken Avenue) property line, approximately 50 feet from the west interior property line, and approximately 45 feet from the south (Riverside Drive) property line.

(b) Site Access/Circulation — The Project site will have one access point from Riverside Drive, via a 40-foot wide driveway located at the southeast corner of Parcel 1, approximately 250 feet west of Milliken Avenue. The site will also have two points of access from Milliken Avenue, including "B" Street, as well as a 40-foot wide driveway located approximately 150 feet north of the Riverside Drive, on Parcel 4 (7-Eleven). The Project will also be accessed by a 26-foot wide common drive-aisle that runs north-south between the commercial and industrial land uses.

(c) Parking — The Project has provided the required off-street parking pursuant to the "Self-Serve and Full Service Fueling" and "General Convenience Retail Store" parking standards specified in the Development Code. The Project requires a total of 17 off-street parking spaces, and 27 spaces have been provided, exceeding the minimum requirements. The off-street parking calculations for the proposed uses are shown on Table A: Parking Summary, below.

Table A: Parking Summary				
Type of Use	Building Area (SF)	Parking Ratio	Spaces Required	Spaces Provided
Self-Serve and Full Service Fueling		3 spaces minimum; plus, parking requirements for combination uses (e.g., convenience store, food services, motor vehicle repair, etc.). Fueling stations operating in conjunction with other uses may be granted shared parking credit at the rate of one space for each fuel dispenser. <i>*Credit: 12 spaces (one per fuel dispenser)</i>	3	*12
Ancillary Car wash	991	1 per 500 SF (APA PAS Report 510/511 Parking Standards)	2	2
General Convenience Retail Store	3,062 SF	4 spaces per 1,000 SF (0.004/SF) of GFA	12	13
TOTAL	4,053 SF		17	27

(d) Architecture — The architectural style of the proposed convenience store consists of a Tuscan design, with a simple box form, and incorporates a stone veneer that surrounds the main entrance and at the base of the building, flat roofs with parapet detailing, and color blocking. The mixture of building materials proposed includes smooth stucco finishes, aluminum canopies with a dark bronze anodized finish, crown molding at the top of the building's parapet, blue tinted glazing for the windows and storefronts, and metal trellises with vine pockets to provide additional landscaping to soften the building. The fuel canopy has been designed to complement the convenience store, incorporating architectural enhancements at the lower one-half of the columns (see Exhibits E2—7-Eleven Elevations, attached).

The mechanical equipment will be roof-mounted and obscured from public view by parapet walls and, if necessary, equipment screens, which will incorporate design

features consistent with the building's architecture. Staff believes that the proposed Project illustrates the type of high-quality architecture promoted by the Development Code. This is exemplified through the use of:

- Articulation in the building footprint, incorporating a combination of recessed and popped-out wall areas;
- Articulation in the building parapet/roof line, which serves to accentuate the building's entries and breaks up large expanses of building wall;
- A mix of exterior materials, finishes and fixtures; and
- Incorporation of base and top treatments defined by changes in color, materials, and recessed wall areas. Designed to ensure that massing and proportion, along with its colors and architectural detailing, are consistent on all building walls, giving a four-sided (360-degree) appearance.

(e) Landscaping — A substantial landscaped area has been provided along the Project's Riverside Drive and Milliken Avenue street frontages. The Development Code requires fueling stations to provide a minimum 20 percent landscape coverage and 34 percent landscape coverage has been provided (see Exhibit E3— 7-Eleven Conceptual Landscape Plan, attached). The Project includes right-of-way improvements (street widening, curb, gutter, sidewalk, and parkway) along Riverside Drive and Milliken Avenue. A combination of 48-inch, 36-inch, and 24-inch box, and 15-gallon accent and shade trees will be provided on the Project site. The landscape plan also includes a variety of shrubs, grasses, and groundcovers that are low water usage and drought tolerant, to be planted throughout the Project site. Moreover, the proposed on-site and off-site landscape improvements will assist towards creating a walkable safe area for pedestrians to access the Project site.

(f) CUP Proposed Operations — The proposed CUP will allow for the sales of beer and wine for off-premises consumption. The proposed hours of operations for the convenience store is 24 hours per day, 7 days per week. The store's main entrance is centered along the southern elevation and the alcohol sales display area will be located within northwest corner of the building (see Exhibit E1—7-Eleven Convenience Store Floor Plan, attached). The applicant is proposing to occupy three coolers for beer and wine, totaling 24 square feet, which occupies less than 2 percent of the building's gross floor area. There will be approximately 10 to 15 full-time employees, with 2 to 4 employees per shift.

The Applicant will adopt extra security measures to ensure customers do not drink on site and will install signs to enforce no consumption of alcoholic beverages on-site. Employees engaged in the sales of alcoholic beverages will be required to complete a training program approved by ABC and the City of Ontario Police Department.

Furthermore, the Police Department has conditioned the sale of alcoholic beverages to occur only between the hours 6:00 AM and 2:00 AM, daily.

(g) ABC License Concentrations — The California Department of Alcoholic Beverage Control ("ABC") is the controlling State entity with authority to grant, renew, and revoke all ABC licenses. ABC determines how many on-sale and off-sale alcoholic beverage license types should be issued per Census Tract, based upon their populations. The Project site is located within Census Tract 127, which is over-concentrated with off-sale alcoholic beverage licenses. The department of Alcoholic Beverage Control allows for 2 off-sale alcohol licenses, and there are currently 9 active off-sale alcohol licenses within Census Tract 127; however, Development Code Section 5.03.025.F.4 grants the Approving Authority to make a determination of Public Convenience or Necessity ("PCN"), thereby allowing the issuance of additional ABC licenses within overconcentrated census tracts.

The PCN findings require that proposed retail alcohol licenses not be located within a high crime area. A high crime is defined as an area characterized by a high ratio of Police Department calls for alcohol-related incidences. The immediate area (one-half mile radius of Project site) shall not exceed 20 percent greater calls for service than when compared to Citywide incidents. The City of Ontario had a total of 310 calls for service related to alcohol-related reports Citywide, including, but not limited to, driving while intoxicated or under the influence, alcohol violations, and drunk in public within the last 12 months. Within a one-half mile radius of the Project site, there were a total of 5 alcohol-related incidences in the past year, which amounts to 1.6 percent of alcohol-related incidences, which does not exceed the maximum 20 percent allowed by the Development Code for alcohol-related incidences near the CUP location. Therefore, in this case, the Planning Commission may make a PCN determination and grant the requested CUP.

(h) CUP Land Use Compatibility — A CUP is required for the retail sale of alcoholic beverages whether intended for consumption on or off premises. A review is required to ensure the compatibility of adjacent uses by identifying potential nuisance activities and establishing measures for mitigation accordingly. The introduction of alcoholic beverage sales, within the proposed 7-Eleven convenience store with fuel sales, will provide further convenience to customers and will not intensify the land use. Therefore, staff believes that the recommended Conditions of Approval will sufficiently mitigate any potential impacts that may be associated with the proposed alcoholic beverage sales.

(7) Development Plan PDEV20-013 (Starbucks)

(a) Site Design/Building Layout — Proposed, is the construction of a 2,490 square commercial building for a fast-food restaurant (Starbucks) with a drive-thru facility, located at the northwest corner of Riverside Drive and Milliken Avenue. The Project occupies Parcel 7 of the proposed Tentative Parcel Map. The fast-food restaurant

building is centered along the northern portion of the property, oriented in an east-west configuration, with the front entrance facing south, toward the parking lot.

The building is setback approximately 130 feet from the south property line, approximately 66 feet from the east (Milliken Avenue) property line, approximately 47 feet from the west property line, and approximately 75 feet from the north property line. Parking for employees and customers has been provided immediately to the south of the building.

The entrance to the drive-thru is located at the southeast corner of the Project site and will circulate from south to north, turning toward an east/west direction and terminating along the western building elevation. The Project provides drive-thru lane stacking for 13 vehicles (see Exhibit F— Starbucks Site Plan, attached).

(b) Site Access/Circulation — The commercial portion of the Project site will have one access point from Riverside Drive, via a 40-foot wide driveway located at the southeast corner of Parcel 1, approximately 250 feet west of Milliken Avenue. Two points of access will be provided from Milliken Avenue, including “B” Street and via 40-foot wide driveway located approximately 150 feet north of Riverside Drive. A fourth point of vehicular access will be provided by a 26-foot wide common drive-aisle that runs north-south between the commercial and industrial land uses, which will serve as the primary access for Starbucks.

(c) Parking — As shown in the Parking Summary Table, below, the project is required to provide a minimum of 20 off-street parking spaces pursuant to the off-street parking standards specified in the City’s Development Code. The project proposes to provide a total of 32 off-street parking spaces, exceeding the minimum off-street parking requirements, as shown in the table below.

Parking Table Summary				
<i>Type of Use</i>	<i>Building Area</i>	<i>Parking Ratio</i>	<i>Spaces Required</i>	<i>Spaces Provided</i>
<i>Fast Food Restaurants</i>	2,490 SF 312 LF of drive-thru lane	13.3 spaces per 1,000 SF of GFA. Restaurants with drive-thru may be credited one space for each 24 lineal feet of drive-thru lane behind the pickup window (13 drive-thru spaces credit)	20	32
TOTAL			20	32

(d) Architecture — The architectural style of the proposed Starbucks consists of a Tuscan design, with a combination of gable tower elements, the use of a stone and brick veneer to treat tower elements and columns, flat roofs with parapet detailing, and color blocking. The mixture of building materials proposed includes smooth stucco finishes with a white and tan color palette, metal canopies with an aged bronze finish, light blue tinted glazing for windows and storefronts, distressed reclaimed wood planks, and metal

trellises with vine pockets to provide additional landscaping to soften the building (see Exhibits F1—Starbucks Elevations, attached). The drive-thru canopy, located along the west elevation, has been designed to complement the architectural style of the building and includes columns with a brick veneer and an overhead wood trellis with a teak finish.

The mechanical equipment will be roof-mounted and obscured from public view by parapet walls and, if necessary, equipment screens, which will incorporate design features consistent with the building's architecture. Staff believes that the proposed project illustrates the type of high-quality architecture promoted by the Development Code. This is exemplified through the use of:

- Articulation in the building footprint, incorporating a combination of recessed and popped-out wall areas;
- Articulation in the building parapet/roof line, which serves to accentuate the building's entries and breaks up large expanses of building wall;
- A mix of exterior materials, finishes and fixtures; and
- Incorporation of base and top treatments defined by changes in color, materials and recessed wall areas. Additionally, the building has been designed to ensure that its massing and proportion, along with its colors and architectural detailing, are consistent on all building walls, giving a four-sided (360-degree) appearance

(e) Landscaping — The Development Code requires a minimum 13 percent landscape coverage and 23.5 percent landscape coverage has been provided for the Project (see Exhibit F2—Starbucks Conceptual Landscape Plan, attached). The Project includes right-of-way improvements (street widening, curb, gutter, sidewalk, and parkway) along Milliken Avenue. A combination of 48-inch, 36-inch, 24-inch box, and 15-gallon accent and shade trees will be provided on the Project site. The landscape plan also includes a variety of shrubs, grasses, and groundcovers that are low water usage and drought tolerant, to be planted throughout the Project site. Moreover, the proposed on-site and off-site landscape improvements will assist towards creating a walkable safe area for pedestrians to access the Project site.

(8) Signage — The Project requires the submittal of a Sign Program application prior to the installation of any signage at the site. The conceptual sign locations and design have been included into the site plan and proposed building elevations for reference. The Project will also include a City of Ontario monument sign located on the southeast corner of the Project site.

(9) Community Meetings — The Planning Department conducted a virtual community meeting via Zoom on September 10, 2020, to discuss the proposed subject applications. Eleven members of community logged into the Zoom meeting and 6 residents provided comments/questions during the meeting. Additionally, the Planning

Department received two emails in opposition to the proposed Project (Attachment A – Community Member Comments, see attached). Below is a list of concerns raised by the community.

(i) The lack of viable/substantial commercial shopping centers (grocery stores and full-service restaurants) in the immediate area. In addition, the reduction of commercial land areas will result in substandard commercial uses, such as gas stations, convenience stores and fast-food restaurants. Residents commented that the retail viability studies focus on short term conditions instead of long-term neighborhood serving commercial.

The applicant provided a retail market study (Attachment B: Retail Market Study, see attached) prepared by The Concord Group (Dated: December 19, 2019). The Market Study focused on achievable rental rates based on current and historical retail trends. The study looked at land uses, number of households, traffic within a 1, 3, and 5-mile radius from the Project site, which concluded that retail demand was insufficient and could not be supported at the Project site, due to lack of demand and an oversupply of retail space. Supported uses included a gas station and fast-food restaurants, due to traffic counts associated with the 60 freeway on/off ramps located north of the Project site.

(ii) Opposition to the GPA and SPA that would allow the construction of large industrial buildings adjacent to the Creekside community. Residents want to preserve the existing General Plan land use designation of Mixed-use and the Tuscana Village Specific Plan to remain in place.

In response to community comments, the buildings have been designed to have an office-like appearance and the western building elevation has been enhanced to provide an attractive view from the adjacent residential development. Large plant/trees will be used along the western property line to create a more visually appealing view from the residential community. The landscape planter along the western property line is approximately 7 feet wide. Additional landscape planters are provided directly adjacent to Building 3, approximately 6 to 12 feet wide.

(iii) With the recent Planning Commission approval of the Crowe industrial project to the south, concerns were raised about the potential concentration of industrial uses adjacent to both the Edenglen and Creekside communities.

(iv) Opposition to the proposed 7-Eleven, gas station, and the proposed CUP for off-sale beer and wine within proximity to Colony High School and residential land uses.

The service of alcoholic beverage sales is intended for customers 21 years of age and over only. The Applicant has been given Police Department Conditions of Approval and ABC regulations, including but not limited to the following: hours of operation; alcoholic

beverage sales designated area; age restrictions; and training class or a certified responsible beverage service class within six months for all employees.

(v) Overall issues related to noise, air quality, and truck traffic near existing residential neighborhoods and schools.

In response to community comments/concerns, the related Development Plan (File No, PDEV19-059) has been designed to minimize noise impacts to the residents. The truck yard for Building 3 has been oriented away from the western property line and faces east. This design feature, in conjunction with the 270-foot SCE utility corridor that separates the proposed Project from residential properties to the west, will substantially diminish any noise impacts to the adjacent residential community.

A noise study was completed by Urban Crossroads (October 2020) that analyzed operational noise impact increases along the eastern property line of the Creekside residential community. Urban Crossroads measured existing noise levels on October 10, 2019 and modeled the increased noise that will be generated by the proposed operations at the property. The study concluded that the operation of a typical warehouse distribution center would be up to 39 dBA less than the City Standards (65 dBA daytime and 45 dBA nighttime). Furthermore, the placement of the buildings will assist in the reduction of traffic noise that currently exist from Milliken Avenue and help reduce wind and dust impacts on the existing residential community, from seasonal Santa Ana winds.

(vi) Inquiries were expressed regarding the proposed infrastructure, street improvements, bike lanes, and any proposed pedestrian connections to the San Antonio Winery and Juanchos restaurant.

The street frontages along Riverside Drive and Milliken Avenue will be improved (curb, gutter, and sidewalk). The Project will also provide new public and private streets that with full right-of-way street improvements, including sidewalk/pedestrian paths, to the nearby San Antonio Winery and Juanchos restaurant.

(vii) Comments were expressed about vagrancy and illegal dumping in the immediate area, as well as existing truck traffic on Riverside Drive and overnight truck parking on Mill Creek Avenue.

The street frontages along Riverside Drive and Milliken Avenue will be improved (curb, gutter, and sidewalk) and no parking will be allowed. The development of the Project site will create more eyes on the street and discourage illegal uses. Also, on-site security patrol will be provided for the property and assist in preventing any undesirable use of the property at night or weekends, alerting law enforcement of any illegal activity occurring off-site and within the immediate area.

(10) Health Risk Assessment — The Applicant was required to prepare a Health Risk Assessment (“HRA”) to determine whether the proposed Project would pose a health risk to the existing residential land uses. The HRA prepared by Urban Crossroads (Dated: October 5, 2020) analyzed the cancer burden estimates as well as the Project operational Toxic Air Contaminants (“TACs”) impact from Diesel Particulate Matter (“DPM”) emissions. Both analyses concluded that these factors would be less than significant; therefore, no mitigation is required for the Project beyond that which was previously analyzed in The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140), as certified by the Ontario City Council on January 27, 2010. Furthermore, the Project was designed to minimize any potential impacts to existing residential development. Additionally, the Project has been conditioned to have trucks travel east, towards Hamner/Milliken Avenue, when exiting the site. Trucks shall not be allowed to utilize Riverside Drive west of the Project site, to access or exit the Project site.

(11) Utilities (drainage, sewer) — To serve the proposed industrial development, the Project will be required to construct infrastructure improvements. Furthermore, the Applicant has submitted a Preliminary Water Quality Management Plan (PWQMP), which establishes both Projects’ compliance with storm water discharge/water quality requirements. The PWQMP includes site design measures that capture runoff and pollutant transport by minimizing impervious surfaces and maximizes low impact development (LID) best management practices (BMPs), such as retention and infiltration, biotreatment, and evapotranspiration. The PWQMP proposes the use of underground stormwater infiltration system within the tractor-trailer courtyard areas of each building and parking lots. Any overflow drainage will be conveyed to a storm drain connection located at the south end of the Project site.

COMPLIANCE WITH THE ONTARIO PLAN: The proposed project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan (TOP). More specifically, the goals and policies of TOP that are furthered by the proposed project are as follows:

(1) City Council Goals.

- Invest in the Growth and Evolution of the City’s Economy
- Maintain the Current High Level of Public Safety
- Operate in a Businesslike Manner
- Focus Resources in Ontario’s Commercial and Residential Neighborhoods
- Invest in the City’s Infrastructure (Water, Streets, Sewers, Parks, Storm Drains

and Public Facilities)

(2) Vision.

Distinctive Development:

- Commercial and Residential Development

➤ Development quality that is broadly recognized as distinctive and not exclusively tied to the general suburban character typical of much of Southern California.

(3) Governance.

Decision Making:

▪ Goal G1: Sustained decision-making that consistently moves Ontario towards its Vision by using The Ontario Plan as a framework for assessing choices.

➤ G1-2 Long-term Benefit. We require decisions to demonstrate and document how they add value to the community and support the Ontario Vision

(4) Policy Plan (General Plan)

Land Use Element:

▪ Goal LU1: A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.

➤ LU1-1 Strategic Growth. We concentrate growth in strategic locations that help create place and identity, maximize available and planned infrastructure, and foster the development of transit.

➤ LU1-6 Complete Community: We incorporate a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, employers, workers and visitors have a wide spectrum of choices of where they can live, work, shop and recreate within Ontario. (Refer to Complete Community Section of Community Economics Element).

▪ Goal LU2: Compatibility between a wide range of uses.

➤ LU2-6: Infrastructure Compatibility: We require infrastructure to be aesthetically pleasing and in context with the community character.

Community Economics Element:

▪ Goal CE1: A complete community that provides for all incomes and stages of life.

▪ Goal CE2: A City of distinctive neighborhoods, districts, and corridors, where people choose to be.

➤ CE2-1 Development Projects. We require new development and redevelopment to create unique, high-quality places that add value to the community.

➤ CE2-2 Development Review. We require those proposing new development and redevelopment to demonstrate how their projects will create appropriately unique, functional and sustainable places that will compete well with their competition within the region.

➤ CE2-4 Protection of Investment. We require that new development and redevelopment protect existing investment by providing architecture and urban design of equal or greater quality.

➤ CE2-5 Private Maintenance. We require adequate maintenance, upkeep, and investment in private property because proper maintenance on private property protects property values.

Safety Element:

▪ Goal S1: Minimized risk of injury, loss of life, property damage and economic and social disruption caused by earthquake-induced and other geologic hazards.

➤ S1-1 Implementation of Regulations and Standards. We require that all new habitable structures be designed in accordance with the most recent California Building Code adopted by the City, including provisions regarding lateral forces and grading.

Community Design Element:

▪ Goal CD1: A dynamic, progressive city containing distinct neighborhoods and commercial districts that foster a positive sense of identity and belonging among residents, visitors, and businesses.

➤ CD1-1 City Identity. We take actions that are consistent with the City being a leading urban center in Southern California while recognizing the diverse character of our existing viable neighborhoods.

➤ CD1-2 Growth Areas. We require development in growth areas to be distinctive and unique places within which there are cohesive design themes.

➤ CD1-3 Neighborhood Improvement. We require viable existing residential and non-residential neighborhoods to be preserved, protected, and enhanced in accordance with our land use policies.

▪ Goal CD2: A high level of design quality resulting in public spaces, streetscapes, and developments that are attractive, safe, functional and distinct.

➤ CD2-1 Quality Architecture. We encourage all development projects to convey visual interest and character through:

- Building volume, massing, and height to provide appropriate scale and proportion;
- A true architectural style which is carried out in plan, section and elevation through all aspects of the building and site design and appropriate for its setting; and
- Exterior building materials that are visually interesting, high quality, durable, and appropriate for the architectural style.

➤ CD2-7 Sustainability. We collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials and construction techniques.

➤ CD2-8 Safe Design. We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintenance of visibility and accessibility, and use of lighting.

➤ CD2-9 Landscape Design. We encourage durable landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits.

➤ CD2-10 Surface Parking Areas. We require parking areas visible to or used by the public to be landscaped in an aesthetically pleasing, safe and environmentally sensitive manner. Examples include shade trees, pervious surfaces, urban run-off capture and infiltration, and pedestrian paths to guide users through the parking field.

➤ CD2-11 Entry Statements. We encourage the inclusion of amenities, signage and landscaping at the entry to neighborhoods, commercial centers, mixed use areas, industrial developments, and public places that reinforce them as uniquely identifiable places.

➤ CD2-12 Site and Building Signage. We encourage the use of sign programs that utilize complementary materials, colors, and themes. Project signage should be designed to effectively communicate and direct users to various aspects of the development and complement the character of the structures.

➤ CD2-13 Entitlement Process. We work collaboratively with all stakeholders to ensure a high degree of certainty in the efficient review and timely processing of all development plans and permits.

- Goal CD3: Vibrant urban environments that are organized around intense buildings, pedestrian and transit areas, public plazas, and linkages between and within developments that are conveniently located, visually appealing and safe during all hours.

- CD3-1 Design. We require that pedestrian, vehicular, bicycle and equestrian circulation on both public and private property be coordinated and designed to maximize safety, comfort and aesthetics.

- CD3-2 Connectivity Between Streets, Sidewalks, Walkways and Plazas. We require landscaping and paving be used to optimize visual connectivity between streets, sidewalks, walkways and plazas for pedestrians.

- CD3-3 Building Entrances. We require all building entrances to be accessible and visible from adjacent streets, sidewalks or public open spaces.

- CD3-5 Paving. We require sidewalks and road surfaces to be of a type and quality that contributes to the appearance and utility of streets and public spaces.

- CD3-6 Landscaping. We utilize landscaping to enhance the aesthetics, functionality and sustainability of streetscapes, outdoor spaces and buildings.

- Goal CD5: A sustained level of maintenance and improvement of properties, buildings and infrastructure that protects the property values and encourages additional public and private investments.

- CD5-1 Maintenance of Buildings and Property. We require all public and privately owned buildings and property (including trails and easements) to be properly and consistently maintained.

- CD5-2 Maintenance of Infrastructure. We require the continual maintenance of infrastructure.

HOUSING ELEMENT COMPLIANCE: Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the recommending body for the Project, the Planning Commission finds that based on the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the Project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the Project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

Senate Bill 330 – Housing Accountability Act (Government Code Section 65589.5 et seq.) ("SB 330") was passed by the California Legislature, signed by the Governor and became effective on January 1, 2020. The bill is the result of the Legislature's extensive findings

regarding the California “housing supply crisis” with “housing demand far outstripping supply.”

SB 330 amended Government Code Sections 65589.5, adding Government Code Sections 65940, 65943 and 65950, and repealed and readopted Sections 65906.5, 65913.10 and 65941.1. To summarize, no city may disapprove a residential housing development project for low- to moderate-income households (as defined therein) unless it makes a finding that the housing development project “would have a specific, adverse impact upon the public health or safety, and there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact without rendering the development unaffordable to low- and moderate-income households...” such as where the housing development project is proposed on land “which does not have adequate water or wastewater facilities to serve the project.” (Government Code Section 65589.5(d)(2), (4)).

In addition, the legislation adds Chapter 12 to Division 1 of Title 7 of the Government Code (Section 66300 et seq.) that applies to “affected cities,” which are identified as cities in urbanized areas as determined by the most recent census. In accordance with SB 330, the Department of Community Development and Housing (“HCD”) has prepared a list of affected cities and has determined that Ontario is an “affected city.” Therefore, pursuant to Government Code section 66300(b)(1)(A) and (b):

(b) (1) Notwithstanding any other law except as provided in subdivision (i), with respect to land where housing is an allowable use, an affected city shall not enact a development policy, standard, or condition that would have any of the following effects:

(A) Changing the general plan land use designation, specific plan land use designation, or zoning of a parcel or parcels of property to a less intensive use or reducing the intensity of land use within an existing general plan land use designation, specific plan land use designation, or zoning district below what was allowed under the land use designation and zoning ordinances of the affected county or affected city, as applicable, as in effect on January 1, 2018...”

except when approved by HCD or when the following exception is set out in Government Code Section 66300(i)(1) applies:

(i) (1) This section does not prohibit an affected county or an affected city from changing a land use designation or zoning ordinance to a less intensive use if the city or county concurrently changes the development standards, policies, and conditions applicable to other parcels within the jurisdiction to ensure that there is no net loss in residential capacity.

As discussed in the Background section of the staff report, a General Plan Amendment (GPA) is proposed to change the site's land use designations from Mixed-Use to General

Commercial and Industrial. The GPA would eliminate the Mixed-Use allowable housing, thereby theoretically eliminating 185 units (as allocated by TOP LU-03 Build-out Table, which had an assumed density of up to 25 dwelling units per acre).

To address the removal of 185 low-moderate residential units at a density of 25 dwelling units per acre and demonstrate a “no net loss,” and demonstrate the Project is in compliance with provisions of Section 66300(i)(1) have been met and there is no net loss of residential capacity. On December 17, 2019, the City Council approved an Amendment to the Meredith International Centre Specific Plan (File No. PSPA19-002) to establish a Mixed-Use Overlay district on 22.39 acres of land within a portion of Planning Area 2 (Urban Commercial) land use district, located at the southeast corner of Vineyard Avenue and Inland Empire Boulevard. The Meredith International Centre Specific Plan is listed in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix. The Specific Plan allowed 800 dwelling units at a density of 37 dwelling units per acre, which have all been constructed. The Specific Plan amendment approved in December 2019 provides for an additional 925 residential units at a density of 41 dwelling units per acre, which will add 925 units to the Available Land Inventory Table. The Addendum to the Meredith International Centre Specific Plan Amendment Environmental Impact Report (SCH# 2014051020), approved on December 17, 2019, supports that change in the Specific Plan, which results in a surplus of 925 residential units within the City. On March 30, 2020, the City Council approved a General Plan Amendment to TOP Policy Plan Future Buildout Table (Exhibit LU-03) to reflect the addition of 925 residential units, assumed density and intensity for the Mixed-Use/Meredith section of the Buildout Table. The loss of 185 units under the current Policy Plan designation will be directly offset by the addition of 925 units, resulting in a no net loss of residential units.

AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE: The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan (“ALUCP”), establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the ALUCP. Any special conditions of approval associated with uses in close proximity to the airport are included in the conditions of approval provided with the attached Resolution.

ENVIRONMENTAL REVIEW: Staff has prepared an Addendum to The Ontario Plan (File No. PGPA06-001) EIR (SCH# 2008101140) certified by City Council on January 27, 2010. This

application introduces no new significant environmental impacts, and all previously-adopted mitigation measures are a condition of project approval.

Approval of this Project is contingent upon City Council approving the General Plan Amendment (File No. PGPA19-007), Tuscana Village Specific Plan (File No. PSPA19-010), Zone Change (File No. PZC19-002) and EIR Addendum.

CONDITIONS OF APPROVAL: See attached department reports.

Notes

- Historically, citywide buildout levels do not achieve the maximum allowable density/intensity on every parcel and are, on average, lower than allowed by the Policy Plan. Accordingly, the buildout projections in this Policy Plan do not assume buildout at the maximum density or intensity and instead are adjusted downward. To view the buildout assumptions, access the Methodology report.
- Acres are given as adjusted gross acreages, which do not include the right-of-way for roadways, flood control facilities, or railroads.
- Assumed Density/Intensity includes both residential density, expressed as units per acre, and non-residential intensity, expressed as floor area ratio (FAR), which is the amount of building square feet in relation to the size of the lot.
- Projections of population by residential designation are based on a persons-per-household factor that varies by housing type. For more information, access the Methodology report.
- To view the factors used to generate the number of employees by land use category, access the Methodology report.
- Acreages and corresponding buildout estimates for these designations do not reflect underlying land uses within the Business Park, Industrial and Commercial Overlays. Estimates for these areas are included within the corresponding Business Park, Industrial and General Commercial categories.

Attachment A—Community Member Comments

Lorena Mejia

From: D'Andre Lampkin <dlampkin@lampkinfoundation.org>
Sent: Tuesday, September 15, 2020 1:20 PM
To: Lorena Mejia
Subject: Opposition to General Plan Amendment (File No. PGPA19-007)

Hi Lorena Mejia,

I am once again writing to express my opposition to the proposed site plan and general plan amendment, otherwise known as File No. PGPA19-007. I opposed the development on the same grounds that I opposed the proposed site plan for the southwest corner of Hamner Avenue and Riverside Drive.

I had previously predicted in public comments and in writing that the longer Creekside residents wait for promises of nearby retail space, the more it is likely the promise is not to be kept. In the last planning commission meeting, I spoke on a similar issue and did not complete my comments verbally because I overheard members of the commission speaking over me. While I thought it was rude and sent a clear signal to the public that the commission does not take the communities concern seriously, I decided to engage the process within the rules established by law.

I would have attended the community forum for File No. PGPA19-007, however, I received the notice just 2 hours before the start of the meeting. I was unable to rearrange my schedule to attend virtually. Judging by my last experience at the city planning meeting, I suspect the Planning Commission is FOR this latest proposal.

I find it interesting that members of the Planning Commission tout remembering what was promised to Creekside and Edenglen residents. They shared stories about walking the neighbors and hearing residents express a desire to have retail space. But they later contradicted those “fond memories” by voting for more light-industrial projects and reducing (if not eliminating altogether) commercial retail. It even appears preparations are being made to abandon the plans for mix use (commercial, residential, retail) zoning around San Antonio Winery. I meant what I said in the chat and it was not an attempt to be “mean” (as described by a planning commission member who expressed NO opinion about members spoke over me during my time for public comment). – that the longer residents wait, the less likely they will get what they were promised.

While I understand developer market reports suggest there is a lack of demand for retail space, I don't believe enough energy is being put into enticing potential retailers to come into the area. Furthermore, promises by the developer to bring the public infrastructure to standard should not mean automatic approval. They should be encouraged to address the wants and desires of the residents who have to live around the project. Otherwise, we will continue to spend our money in Eastvale, contribute to the economy or neighboring cities, and loose longtime residents when they realize plans that brought to them Creekside are no longer possible.

There's also the issue of residents not being aware of how to engage the process since all meetings are now online. I'm in agreement with other residents when they say not everyone understands the online platform to attend meetings. This is evidenced by parents inability to assist their children with virtual schooling, recent polls that suggest a significant amount of residents do not possess an adequate home computer, and discomfort with downloading or uploading platforms needed to participate.

Subject: Hamner and Riverside Development(s) [Toscana Square?] - Creekside Communities

Hello all,

There are many reasons why the Hamner and Riverside development should not be amended to an industrial use which I will list below:

1. Creekside and Southeast Ontario should not bear the environmental nor tax generating burden for the City of Ontario. This project is against environmental justice principles and should be modified or reconsidered altogether. The developer has the burden to perform due diligence and bring the best tenants to the table. Please: The City of Ontario needs to have high standards for what the developer is bringing to the table even if the developer has to go back and make some changes.

2. Southeast Ontario is FOR Mixed Used and Commercial NOT light industrial.

3. Increased air pollution - The 60 and 15 fwy areas have some of the lowest air quality in southern california. It is well documented and the South Coast Air Quality Management District has more information. I am also including a link below from the California Air Resources Board regarding PM 2.5 particulate matter pollution generated by diesel trucks: <https://ww2.arb.ca.gov/resources/overview-diesel-exhaust-and-health> [ww2.arb.ca.gov]

4. There are already 3 large industrial buildings in the area that bring in high truck traffic:

1. Walmart
2. Amazon
3. Grainger

5. Increased truck traffic will increase noise and environmental pollution.

6. Mixed Use will bring in foot traffic to the area, making this part of the city much more appealing and healthier for residents. There is also a need for restaurants and better markets in the area.

7. There are many children and schools in the area that would be affected by the increased traffic, and pollution.

My wife, Lina Angel, and I are against this proposed amendment to the existing general plan and ask for any applications requesting a zone change, development plan, or amendment to be denied. We would like to hear creative solutions from the developer that would satisfy residents' concerns.

Thank you,

Gerald Angel and Lina Angel

RETAIL LAND USE EVALUATION FOR A MIXED-
USE SITE IN ONTARIO, CALIFORNIA

DRAFT REPORT
DECEMBER 19, 2019

PREPARED FOR: ORBIS REAL ESTATE

Memorandum

To: Orbis Real Estate
From: THE CONCORD GROUP
Re: Retail Land Use Evaluation for a Mixed-Use Site in Ontario, California

Summary of Conclusions

Orbis Real Estate. ("The Owner") has been evaluating their proposed mixed-use parcel at the southern portion of Ontario along Hammer Avenue and East Riverside Drive ("the Site", "the Property"). Currently the site hosts is vacant but is planned for industrial and retail uses. The Concord Group ("TCG") was approached to evaluate the retail portion of the parcel which accounts for about 4.5 acres. The following conclusion was derived from the statistical analysis of current and historical retail trends in a 1, 3, and 5 mile radius from the site.

Current households in the three mile radius total 14,940, which only accounts for 28.6% of total 5 Mile Radius Households (52,928). In both the 3 and 5 mile radius these households are spending less than half of total retail sales in the market. This retail inflow indicates a large portion of sales are from outside the traditional retail market areas and is most likely due to the highly traversed freeways (60 and 15 freeways). The total retail sales in the three mile radius totaled \$1.7 billion in 2017 with 570 million coming from existing households, a share of 34% (76% sales inflow). The inflow of retail sales is not projected to slow over the next 15 years and households in the three mile are expected to grow by 8.2% (1,437) annually over the next five years (Exhibit 2).

With the strong retail inflow and projected local retail increase over the next five years. TCG evaluated the historical retail square footage to identify any trends with sales and growth. Annual new retail developments have totaled approximately 100,000 square feet or retail in the 5 mile radius over the last five years, with 43% (42,700) captured within the 3 mile retail trade area ("RTA"). The higher share of retail development is along the same trend of the increased household share of the 3 mile relative to the 5 mile RTA. In addition, Occupancies have remained high with only 3-4% vacancy rates over the last five years as opposed to the 7-8% around prior cycle (2007-2009). This is partially due to the increase in retail expenditures and partially due to the lower retail lease rates. Lease rates were around \$28-29 annually in the 5 mile RTA from 2001-2009 and are currently \$21 (an average loss of 1.2% over the last ten years). Retail rates in the last five years, have increased in the 3 mile radius by 8.8% (\$1.31) in the 3 mile RTA. These factors indicate the great recession had a strong negative impact on rents and

THE CONCORD GROUP

lease-rates but that the market has remain stable for the last five years with growth projections remaining constant (Exhibit 3).

More locally the 60 and 15 freeways average around 150,000 daily vehicle uses around the 60-15 intersection, which is proximate to the Subject Site. A sizeable portion of residual traffic emanates from these freeways along Hamner Avenue with an average of 14,000 daily vehicles. These traffic users are mostly attempting to bypass any traffic delays from the freeways that typically congest around peak pre- and post-work hours. Recently some new developments have been constructed to utilize the strong traffic counts with nearby gas station and convenience store (Extra mile) developed in the last year. Additionally, further south along Hamner Ave (outside of Ontario City limits) there is a small retail node planned including some strip retail and a Starbucks. Fast food and Gas station retail highly benefit from the high traffic counts, proximity to transit oriented freeways, and visibility.

All of the above mentioned supports the development of retail, but TCG also evaluated the likelihood of supportable rents for development. To achieve rent recommendations TCG identified 11 comparable with regards to their location, size, tenant, rents, and vintage. The annual average rents of the comparables was around \$19.88 per square foot (\$1.65 monthly). Rents indicated are of Triple Net Rents. Two key comparables were isolated that were similar in location and tenant type to the Subject Site. These comparable are Galaxy Hamburgers (fast food) and Shell (gas station). The two key comps are equidistant to a 60 freeway on/off ramp, leasable square footage, and daily traffic counts (14,657) but with older vintage being built in 1994 and 1992 respectively. Galaxy Hamburgers achieves annual per square foot rents of \$23.50 (\$1.96 monthly) and the Shell gas station achieves rents of \$21.50 (\$1.79 monthly).

Utilizing the comparable rents, and historical trends TCG concluded the likelihood of fast food to achieve annual per square foot rents of \$24.60 (\$2.05) and \$22.80 (\$1.90 monthly) for a Gas Station. These recommendations are higher than most existing retail in the 3 mile RTA due to the vintage, and proximity to both 60/15 freeways (Exhibits 7 & 8). The land value portion of the parcel is valued at \$1.5 million in 2019 dollars and based off TCG recommended revenue and expected costs. The following pages include all the specifics of TCG's.

**TRAFFIC COUNTS
SURROUNDING AREAS
DECEMBER 2019**

Daily traffic counts along the nearby freeway entrances/exits exceed over 150,000 cars per day. Current road traffic counts peaking around 14,500 daily cars along the portion of Hamner Avenue adjacent to the Subject Site. With quick access to and from the 15/60 freeways along with high daily traffic counts. Retail targeted towards commuters would be desirable for this subject site location.

KEY COMPARABLES
ONTARIO, CALIFORNIA
DECEMBER 2019

Key	Tenant	Tenant Type	Address	Building Square Feet	Annual Rent (\$)	Year Built	Number of Access Points	Surrounding Daily Traffic Counts	Distance to Freeway	Surrounding Uses
1	Galaxy Hamburgers	Fast Food	2150 S Archibald Ave	3,823	\$23.50	NNN	1	14,657	0.1 Miles (60 Freeway)	Retail & Residential
2	Shell	Gas Station	2215 S Archibald Ave	1,800	\$21.50	NNN	2	14,657	0.1 Miles (60 Freeway)	Residential & Park

The Subject site is comparable to the chosen comparables in many ways. The subject site shares in proximity to the 60 freeway, daily traffic counts, number of access points, city location, and target tenants. The Subject site currently sits in a slightly inferior surrounding area position, but benefits from proximity to an additional freeway (I-15). Overall the Subject Site should be expected to have comparable rents to the two analogues provided.

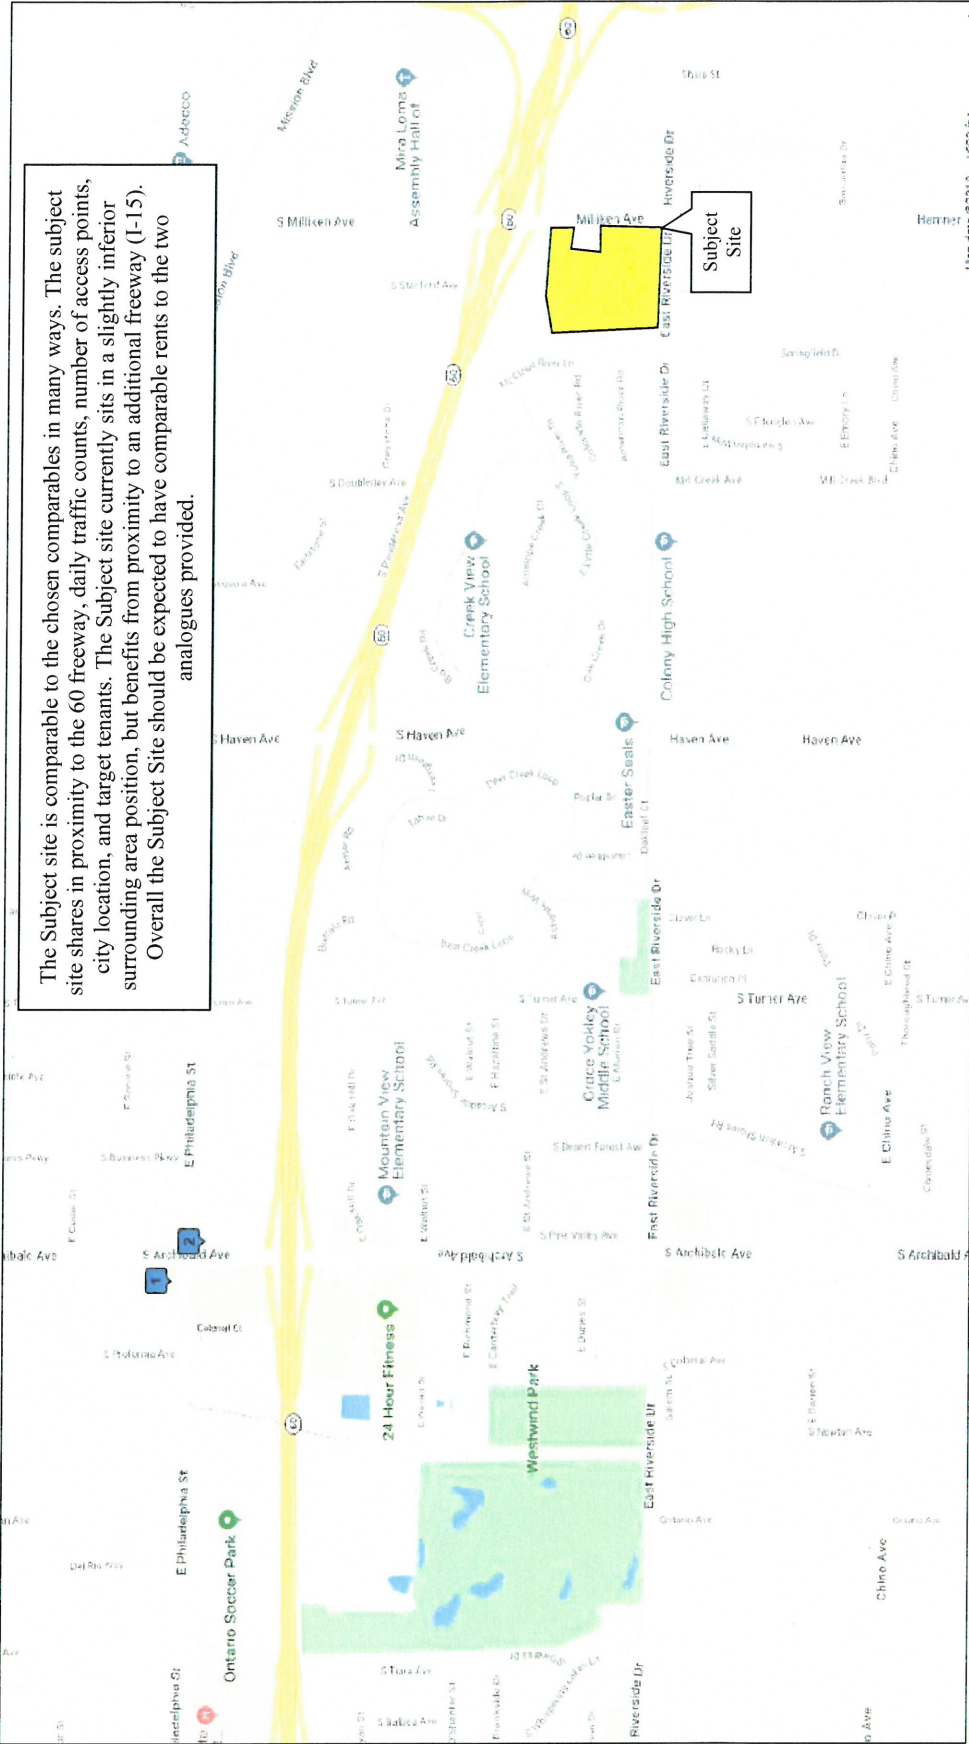

EXHIBIT 7

RETAIL RECOMMENDATIONS
TOSCANA SQUARE, ONTARIO CALIFORNIA
DECEMBER 2019

Project Summary

Location:

- Located proximate the southwestern connection of the 60 and 15 freeways
- Alongside the northwestern Hamner Avenue and East Riverside Drive

Description:

- 4.5 Acres apart of a 33.57 acre parcel (predominately industrial w/ office)
- Retail preliminarily planned for a gas station, potential space for a 7/11 type and a separate building targeting around 17,200 square feet with a drive through

Market Opportunity

- Marketability:**
- **Visibility** - Retail frontage benefits greatly from freeway visibility from the 15 and 60 freeways
 - **Proximity to Freeways** - High traffic counts warrant desirable location for gas and fast casual foods targeting commuters

TCG Recommendations

Key Comparable

- Key comparable Galaxy Hamburgers and Shell in Ontario (Exhibit 6), both are in comparable locations, tenants and proximity to freeways with a slightly better surroundings but older vintage and only close to one freeway (60)

Target Tenants:

- Target tenants include gas station, fast casual food, and a convenience store

Positioning Rationale:

Triple Net Rate (\$/SF)	
TCG - Fast Food	TCG - Gas Station
/month	/month
\$2.05	\$1.90
/year	
\$24.60	\$22.80

- Slight premium to key comparable due to additional freeway proximity
- Tenant improvement rates will vary depending on type of tenant, sales volume, and the nature of negotiation; however, based on broker interviews, TCG concluded that \$50-\$70/SF in tenant improvement is the average for top-of-market rates
- Tenant improvement rates provide an opportunity to raise tenant lease rates and vice-versa

RESOLUTION NO.

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, RECOMMENDING THE CITY COUNCIL APPROVE AN ADDENDUM TO THE ONTARIO PLAN (TOP) CERTIFIED ENVIRONMENTAL IMPACT REPORT (SCH # 2008101140), PURSUANT TO THE REQUIREMENTS OF THE CALIFORNIA ENVIRONMENTAL QUALITY ACT, AS AMENDED, FOR FILE NO. PGPA06-001

WHEREAS, TOSCANA SQUARE, LLC. (hereinafter referred to as "Applicant") has filed an Application for the approval of a General Plan Amendment, Specific Plan Amendment, Zone Change, a Tentative Parcel Map, three Development Plans and a Conditional Use Permit, File Nos. PGPA19-007, PSPA19-010, PZC19-002, PMTT19-018, PDEV19-059, PDEV20-012, PCUP20-009 and PDEV20-013, which consists of: [1] A General Plan Amendment (File No. PGPA19-007) to modify the Policy Plan (General Plan) Land Use Plan (Exhibit LU-01) component of The Ontario Plan, changing the land use designation on 41.35 acres of land from Mixed Use (Hamner/SR-60 Area 12) to 7.6 acres of General Commercial and 33.75 acres of Industrial, and modify the Future Buildout Table (Exhibit LU-03) to be consistent with the proposed land use designation changes; [2] A Specific Plan Amendment (File No. PSPA19-010) rescinding the Tuscana Village Specific Plan; [3] A Zone Change (File No. PZC19-002) on 41.35 acres of land from LDR-5 (Low Density Residential – 2.1 to 5.0 du/ac), CC (Community Commercial), and SP (Specific Plan), to 33.75 acres of IL (Light Industrial) and 7.6 acres of CC (Community Commercial); [4] A Tentative Parcel Map (File No. PMTT19-018/TPM 20177) to subdivide approximately 20 acres of land into 7 parcels; [5] A Development Plan (File No. PDEV19-059) to construct 3 industrial buildings totaling 295,991 square feet on 13.19 acres of land; [6] A Development Plan (File No. PDEV20-012) to construct a 3,062 square foot convenience store (7-Eleven) with fuel sales and ancillary drive-thru car wash, in conjunction with a Conditional Use Permit (File No. PCUP20-009) to establish alcoholic beverage sales for off-premises consumption, limited to beer and wine (Type 20 ABC license), on 1.27 acres of land; [7] A Development Plan (File No. PDEV20-013) to construct a 2,490 square foot commercial building for a fast food restaurant (Starbucks) with a drive-thru facility on 1.18 acres of land. The Project site is located on the northwest corner of Riverside Drive and Milliken Avenue, in the City of Ontario, California (hereinafter referred to as "Application" or "Project"); and

WHEREAS, The Ontario Plan (File No. PGPA06-001) Environmental Impact Report (State Clearinghouse No. 2008101140) was certified on January 27, 2010 (hereinafter referred to as "Certified EIR"), in which development and use of the Project site was discussed; and

WHEREAS, the Planning Director of the City of Ontario has prepared and approved for attachment to the certified Environmental Impact Report, an Addendum to the Certified EIR (hereinafter referred to as "EIR Addendum") in accordance with the requirements of the California Environmental Quality Act of 1970, together with State and

Planning Commission Resolution

Page 2

local guidelines implementing said Act, all as amended to date (collectively referred to as "CEQA"); and

WHEREAS, the EIR Addendum concluded that implementation of the Project could result in a number of significant effects on the environment that were previously analyzed in the Certified EIR, and that the Certified EIR identified mitigation measures that would reduce each of those significant effects to a less-than-significant level; and

WHEREAS, pursuant to State CEQA Guidelines Section 15164(a), a lead agency shall prepare an addendum to a previously certified EIR if some changes or additions are necessary to a project, but the preparation of a subsequent or supplemental EIR is not required; and

WHEREAS, the City determined that none of the conditions requiring preparation of a subsequent or supplemental EIR would occur from the Project, and that preparation of an Addendum to the Certified EIR was appropriate; and

WHEREAS, the City of Ontario is the lead agency on the Project, and the Planning Commission is the recommending authority for the requested approval to construct and otherwise undertake the Project; and

WHEREAS, the Planning Commission has reviewed and considered the EIR Addendum for the Project, has concluded that none of the conditions requiring preparation of a subsequent or supplemental EIR have occurred, and intends to take actions on the Project in compliance with CEQA and state and local guidelines implementing CEQA; and

WHEREAS, approval of this Project is contingent upon City Council approving a General Plan Amendment (File No. PGPA19-007), an amendment to the Tuscana Village Specific Plan (File No. PSPA19-010), a Zone Change (File No. PZC19-002) and an EIR Addendum to The Ontario Plan (File No. PGPA06-001) Environmental Impact Report (State Clearinghouse No. SCH# 2008101140) that was certified on January 27, 2010; and

WHEREAS, the EIR Addendum for the Project is on file in the Planning Department, located at 303 East B Street, Ontario, CA 91764, are available for inspection by any interested person at that location and are, by this reference, incorporated into this Resolution as if fully set forth herein; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: Environmental Determination and Findings. As the recommending authority for the Project, The Planning Commission has reviewed and considered the information contained in the administrative record for the Project. Based upon the facts and information contained in the administrative record, including all written and oral evidence presented to the Planning Commission, the Planning Commission finds as follows:

(1) The environmental impacts of this project were reviewed in conjunction with an Addendum to The Ontario Plan Environmental Impact Report Environmental Impact Report (State Clearinghouse No. 2008101140), certified by the Ontario City Council on January 27, 2010, in conjunction with File No. PGPA06-001.

(2) The EIR Addendum and administrative record have been completed in compliance with CEQA, the State CEQA Guidelines, and the City of Ontario Local CEQA Guidelines; and

(3) The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. This Application introduces no new significant environmental impacts.

(4) All previously adopted mitigation measures shall be a condition of project approval, as they are applicable to the Project, and are incorporated herein by this reference.

(5) The EIR Addendum contains a complete and accurate reporting of the environmental impacts associated with the Project, and reflects the independent judgment of the Planning Commission; and

(6) There is no substantial evidence in the administrative record supporting a fair argument that the project may result in significant environmental impacts; and

SECTION 2: Additional Environmental Review Not Required. Based on the Addendum, all related information presented to the Planning Commission, and the specific findings set forth in Section 1, above, the Planning Commission finds that the preparation of a subsequent or supplemental Environmental Impact Report is not required for the Project, as the Project:

October 27, 2020

Page 4

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and.

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3: Planning Commission Action. Based upon the findings and conclusions set forth in Sections 1 and 2, above, the Planning Commission hereby recommends the City Council finds that based upon the entire record of proceedings before it, and all information received, that there is no substantial evidence that the Project will constitute substantial changes to the Certified EIR, and does hereby approve the EIR Addendum, attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 4: Indemnification. The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 5: *Custodian of Records.* The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East “B” Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 6: *Certification to Adoption.* The Secretary shall certify to the adoption of the Resolution.

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a regular meeting thereof held on the 27th day of October 2020, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

1.0 INTRODUCTION

1.0 INTRODUCTION

1.1 ADDENDUM PROJECT OVERVIEW

This Addendum compares and analyzes the impacts associated with an amendment to the Ontario Policy Plan and a zone change to permit industrial and commercial uses on approximately 45 acres that currently have a General Plan land use designation of Mixed Use and Open Space Non-Recreation. The site is zoned Specific Plan, Low Density Residential (LDR-5), Community Commercial, and Open Space Recreation.

The Addendum Project site is located at the northwest corner of Milliken Avenue and Riverside Drive in the City of Ontario. The location of the site is illustrated at Figure 1.1-1, *Addendum Project Location*.

To the extent possible, this document addresses impacts associated with the development of the entire 45 acres; however, development plans have only been finalized for the southern 20 acres (referred to herein as The Vine Project). For clarity purposes, all references in this document to the Addendum Project refer to the entire 45-acre Project site. Alternatively, any reference to The Vine Project refers only to the southern 20 acres of the Addendum Project site.¹

¹ It is noted that, with the exception of the Hydrology Study and WQMP, all technical analyses referenced in this Addendum reflect buildout of the entire Addendum site, regardless of title. Additionally, the technical analyses may refer to the site by a previous name (Toscana Square); Regardless, the results of the analyses remain unchanged.

NOT TO SCALE

Source: Google Earth, Applied Planning, Inc.

For analysis purposes, the Addendum Project considered herein is assumed to include approximately 697,150 square feet of light industrial uses; and up to approximately 26,700 square feet of commercial/retail/restaurant uses within the approximately 45-acre Project site. Of this total, The Vine Project proposes the development of up to 295,991 square feet of industrial uses and up to 16,543 square feet of commercial uses. The Addendum Project would result in an Industrial Floor Area Ratio (FAR) of 0.47, and a Commercial FAR of 0.08.²

1.2 ADDENDUM PURPOSE AND SUMMARY

The focus and purpose of this document is to determine if the Addendum Project described herein would result in new or substantially different environmental impacts than those considered and addressed in The Ontario Plan EIR (Certified EIR). To these ends, this Addendum defines, describes, compares, and contrasts potential environmental impacts of the Addendum Project in the context of the environmental impacts assessed in the Certified EIR.

In so doing, this Addendum substantiates consistency with applicable California Environmental Quality Act (CEQA) Guidelines provisions addressing preparation of an Addendum to a previously Certified EIR.

In these regards, as presented at *CEQA Guidelines* Section 15164, an Addendum to a Certified EIR may be prepared if only minor technical changes or additions are necessary and none of the conditions described in Section 15162, calling for the preparation of a subsequent or supplemental EIR, have occurred. Further, Public Resources Code Section 21166 prohibits preparation of a subsequent or supplemental EIR for a certified project

² Certain of the supporting technical studies appended to this Addendum were prepared early in the development concept process and have evaluated a larger development area and/or larger building footprints than are currently proposed. In these instances, the supporting technical studies have overestimated rather than underestimated potential environmental impacts of the Addendum Project. Within this Addendum, likely maximum impacts are evaluated for all environmental topics. At the discretion of the City, uses differing from those evaluated here, and that could result in substantially different impacts than the uses evaluated herein would be subject to additional CEQA environmental analysis. Ultimate scope and configuration of the Addendum Project uses would be as approved by the City.

unless substantial project changes are proposed requiring major revisions to the Certified EIR; a substantial change in circumstances has occurred requiring major revisions to the Certified EIR; or new information becomes available requiring major revisions to the Certified EIR. None of these conditions apply to the Addendum Project.

Based upon the information provided herein, the Addendum Project would not result in any new significant impacts, nor a substantial increase in the severity of any previously-identified environmental impact considered in the Certified EIR. Therefore, an Addendum to the Certified EIR is the appropriate document that will comply with CEQA requirements for the Project.

1.3 DOCUMENT ORGANIZATION

This Addendum is presented in five sections, as follows:

- **Section 1.0, *Introduction***, provides an overview of the Addendum Project, its context, and environmental documentation applicable to the proposed development.
- **Section 2.0, *Project Description***, presents the Addendum Project in greater detail.
- **Section 3.0, *Environmental Checklist***, presents the analysis of potential environmental impacts of the Addendum Project. The analysis considers potential effects of the Addendum Project relative to those addressed in the Certified EIR.
- **Section 4.0, *Determination***, presents the determination regarding the appropriate environmental document for the Addendum Project.
- **Section 5.0, *Mitigation Summary***, contains a table summarizing mitigation from the Certified EIR, and presents any newly required mitigation or modified mitigation.

1.4 CONCLUSION

This Addendum substantiates that implementation and operation of the Addendum Project land uses described and evaluated herein would not result in any significant new, different, additional, or substantially increased environmental impacts than were previously considered and addressed in the Certified EIR.

The environmental assessment of the Addendum Project does not require any major revision of the Certified EIR, nor would the Addendum Project result in conditions that would require preparation of a Subsequent or Supplemental EIR.

2.0 PROJECT DESCRIPTION

2.0 PROJECT DESCRIPTION

2.1 INTRODUCTION

As previously mentioned, this document addresses impacts associated with the development of the entire 45-acre Addendum site to the extent possible; however, development plans have only been finalized for the southern 20 acres (The Vine Project).

The Addendum Project considered herein would implement up to approximately 697,150 square feet of light industrial uses; and up to approximately 26,700 square feet of commercial/retail/restaurant uses. Of this total, The Vine Project proposes the development of up to 295,991 square feet of industrial uses and up to 16,543 square feet of commercial uses.

Within this Addendum, likely maximum impacts are evaluated for all environmental topics. At the discretion of the City, uses differing from those evaluated here, and that could result in substantially different impacts than the uses evaluated herein would be subject to additional CEQA environmental analysis. Ultimate scope and configuration of the Addendum Project uses would be as approved by the City.

2.2 EXISTING AND PROPOSED LAND USE DESIGNATIONS

Existing and proposed land use designations are described below. Please refer also to Figures 2.2-1 and 2.2-2.

Addendum Project Site

The existing Policy Plan (General Plan) Land Use and Zoning designations of the site would be amended to allow for the development of land uses proposed under the Addendum Project. Tables 2.2-1 and 2.2-2 detail the amended designations.

Table 2.2-1
Existing and Proposed Land Use Designations

Parcel	Existing TOP Land Use Designation	Existing Acreage	Proposed TOP Land Use Designation	Proposed Acreage
1083-361-01	Mixed Use	20.0	Industrial General Commercial	15.0 5.0
1083-361-04	Mixed Use	9.4	Industrial General Commercial	6.8 2.6
1083-361-07	Mixed Use Open Space Non-Recreation	11.95 3.75	Industrial Open Space Non-Recreation	11.95 3.75
Total				45.1

Table 2.2-2
Existing and Proposed Zoning Designations

Parcel	Existing Zoning Designation	Existing Acreage	Proposed Zoning Designation	Proposed Acreage
1083-361-01	Specific Plan	20.0	IL, Light Industrial CC, Community Commercial	15.0 5.0
1083-361-04	LDR-5, Low Density Residential CC, Community Commercial	8.1 1.3	IL, Light Industrial CC, Community Commercial	6.8 2.6
1083-361-07	CC, Community Commercial OS-R, Open Space Recreation	11.95 3.75	IL, Light Industrial OS-R, Open Space Recreation	11.95 3.75
Total				45.1

Table 2.2-3 presents a comparison between the maximum allowable FAR assumed within the General Plan and what is being proposed by the Addendum Project.

Table 2.2-3
Comparison of Assumed and Proposed FAR

Land Use	General Plan Assumption (Maximum Allowable)	Proposed Addendum Project
Industrial	n/a	0.47 FAR - 697,150 square feet
Commercial	0.25 FAR - 254,499 square feet	0.08 FAR - 26,700 square feet
Office	1.5 FAR - 669,735 square feet	n/a
Residential	25 du/ac - 185 units total	n/a
Total	924,234 square feet	723,850 square feet

Surrounding Properties

Policy Plan Land Use and Zoning designations of surrounding properties are summarized below. The Addendum Project would not affect Land Use and Zoning designations of these properties.

North

SR-60 (Pomona) freeway/Caltrans Right-of-Way

South

Policy Plan Land Use Designation: General Commercial
Zoning: Specific Plan

East

City of Eastvale General Plan: Business Park
City of Eastvale Zoning: C-P-S - Scenic Highway Commercial (southerly adjacent to SR-60); I-P - Industrial Park (northerly of East Riverside Drive)

West

Policy Plan Land Use Designation: Open Space - Non Recreation
Zoning: "UC" (Utilities Corridor)

2.3 EXISTING LAND USES

Existing land uses are described below, and are illustrated at Figure 2.3-1.

Project Site

A wine shop and tasting room, restaurant, church, and small animal farm, are located adjacent to Milliken Avenue. The remainder of the site is either planted with grapevines or vacant.

Surrounding Properties

Existing land uses of surrounding properties are summarized below. The Addendum Project would not affect surrounding property land uses.

NOT TO SCALE

Source: Google Earth, Applied Planning, Inc.

----- Addendum Project Boundary

North

SR-60 (Pomona) freeway/Caltrans Right-of-Way.

South

Southerly of the Project site, across East Riverside Drive, properties are currently vacant and undeveloped but are approved for Specific Plan Community Commercial uses (Edenglen Specific Plan).

East

Easterly of the Addendum site, across Milliken Avenue, properties are within the City of Eastvale and developed with light industrial uses; adjacent to the northerly portions of the Project site are vacant and undeveloped City of Eastvale properties.

West

An existing SCE easement defines the westerly Project boundary. A non-operational commercial nursery is located within the SCE easement adjacent to the southern 20 acres of the Project site. Single family homes (Creekside) are located westerly of the SCE easement.

2.4 LAND USE CONCEPT

The Addendum Project considered herein would implement industrial, commercial/retail/restaurant, and open space uses on an approximately 45-acre site. The Land Use Concept locates commercial/retail/restaurant uses in the easterly portion of the Project site along the Milliken Avenue frontage. Proposed industrial uses would be located in the westerly portion of the site. The open space uses/SCE easement along the western property line would remain in place. This configuration optimizes recognition of the proposed commercial/retail/restaurant uses from adjacent Milliken Avenue, and acts to screen the proposed light industrial uses from public views.

As no development plans are currently proposed in the northern portion of the Addendum site, Figure 2.4-1 illustrates the Conceptual Land Use Plan for The Vine Project only.

NOT TO SCALE

Source: HPA Architecture, Google Earth, Applied Planning, Inc.

----- Addendum Project Boundary

2.4.1 Access and Circulation

Regional access to the Project site and surrounding areas is provided by State Route 60. Preliminary concepts indicate local access to the southerly portions of the Addendum Project would be provided via by two driveways on Milliken Avenue and an additional driveway on Riverside Drive. Proposed driveway access to the northerly portions of the Project site from adjacent Milliken Avenue is as-yet undefined.

Access within the Project site would be provided by a new internal roadway, Street A. Street A will have a 66-foot right-of-way, including a 5-foot sidewalk and 8-foot landscaped parkway. Ultimate driveway locations, configurations, and internal circulation plans for the Addendum Project would conform to City requirements based on detailed site plans.

As part of The Vine Project, both Milliken Avenue and Riverside Drive would be improved adjacent to the site. Milliken Avenue is a designated 8-Lane Divided Arterial. Adjacent to the Project site, the western street section will be 71 feet of right-of-way, including a 7-foot (half) raised median, 51 feet of pavement, 5-foot sidewalk, and 8-foot landscaped parkway. Riverside Drive is a designated 6-Lane Standard Arterial. The northside street section for Riverside Drive, from the western Project limits to A Street, will be a 54-foot half section including a 4-foot (half) raised median, a 7-foot landscaped planter area, and a 5-foot sidewalk. East of A Street, the half section expands to a 64-foot half section. The additional 10 feet will be used to accommodate turn lanes at the easterly approach to the intersection of Riverside Drive and Milliken Avenue.

Cross Sections for Street A, Milliken Avenue, and Riverside Drive are presented as Figures 2.4-2 through 2.4-4. All roads, drive aisles, and access points implemented under the Project would conform to City engineering standards and City Fire Department requirements.

2.4.2 Parking

The Project will adhere to the parking requirements set forth by the City of Ontario Development Code. Parking assignments and design of parking areas within the site are subject to City review and approval.

Source: Kimley-Horn and Associates, Inc.

RIVERSIDE DRIVE
WESTERLY BOUNDARY TO STREET "A"
 (N.T.S.)

RIVERSIDE DRIVE
STREET "A" TO HAMNER AVE
 (N.T.S.)

Source: Kimley-Horn and Associates, Inc.

2.4.3 Landscape/Streetscape

All landscaping/streetscaping would comply with applicable provisions of the City Municipal Code. The implemented landscape/streetscape concept would act to enhance perception of the site as developed under the Project, and to screen views of the site interior from off-site vantages. Landscape and streetscape elements would provide shade and visual interest, define entry/access points, and accentuate site and architectural features.

2.4.4 Infrastructure/Utilities

The following discussions summarize the infrastructure/utility plans for the Addendum Project. Please also refer to Figure 2.4-5, *Utilities Plan*.

2.4.4.1 Water Services

Domestic water will be provided by the City of Ontario. The Project site lies within the Phillips Street Pressure Zone, also known as the 1010' Zone. The Project will connect to existing 1010' Zone water lines in the immediate vicinity, including the existing 12-inch and 18-inch water lines located in Riverside Drive, and the 18-inch, 24-inch, and 42-inch lines currently located in Milliken Avenue.

Within the Project site, a 12-inch mainline will be installed within both A Street and B Street, and connect to existing water lines located within the surrounding roadways.

2.4.4.2 Recycled Water Services

An existing 8-inch recycled water line is located in Riverside Drive, located along the southern Project boundary. As part of the Project, an 8-inch line will be installed within both A Street and B Street. A stub will be constructed for future development to the north. All interior irrigation systems will feed off this line.

Recycled water will be supplied in the future by Inland Empire Utilities Agency (IEUA) from their facilities at Westwind Park. These lines will be charged with domestic water until such time as recycled water is available from IEUA.

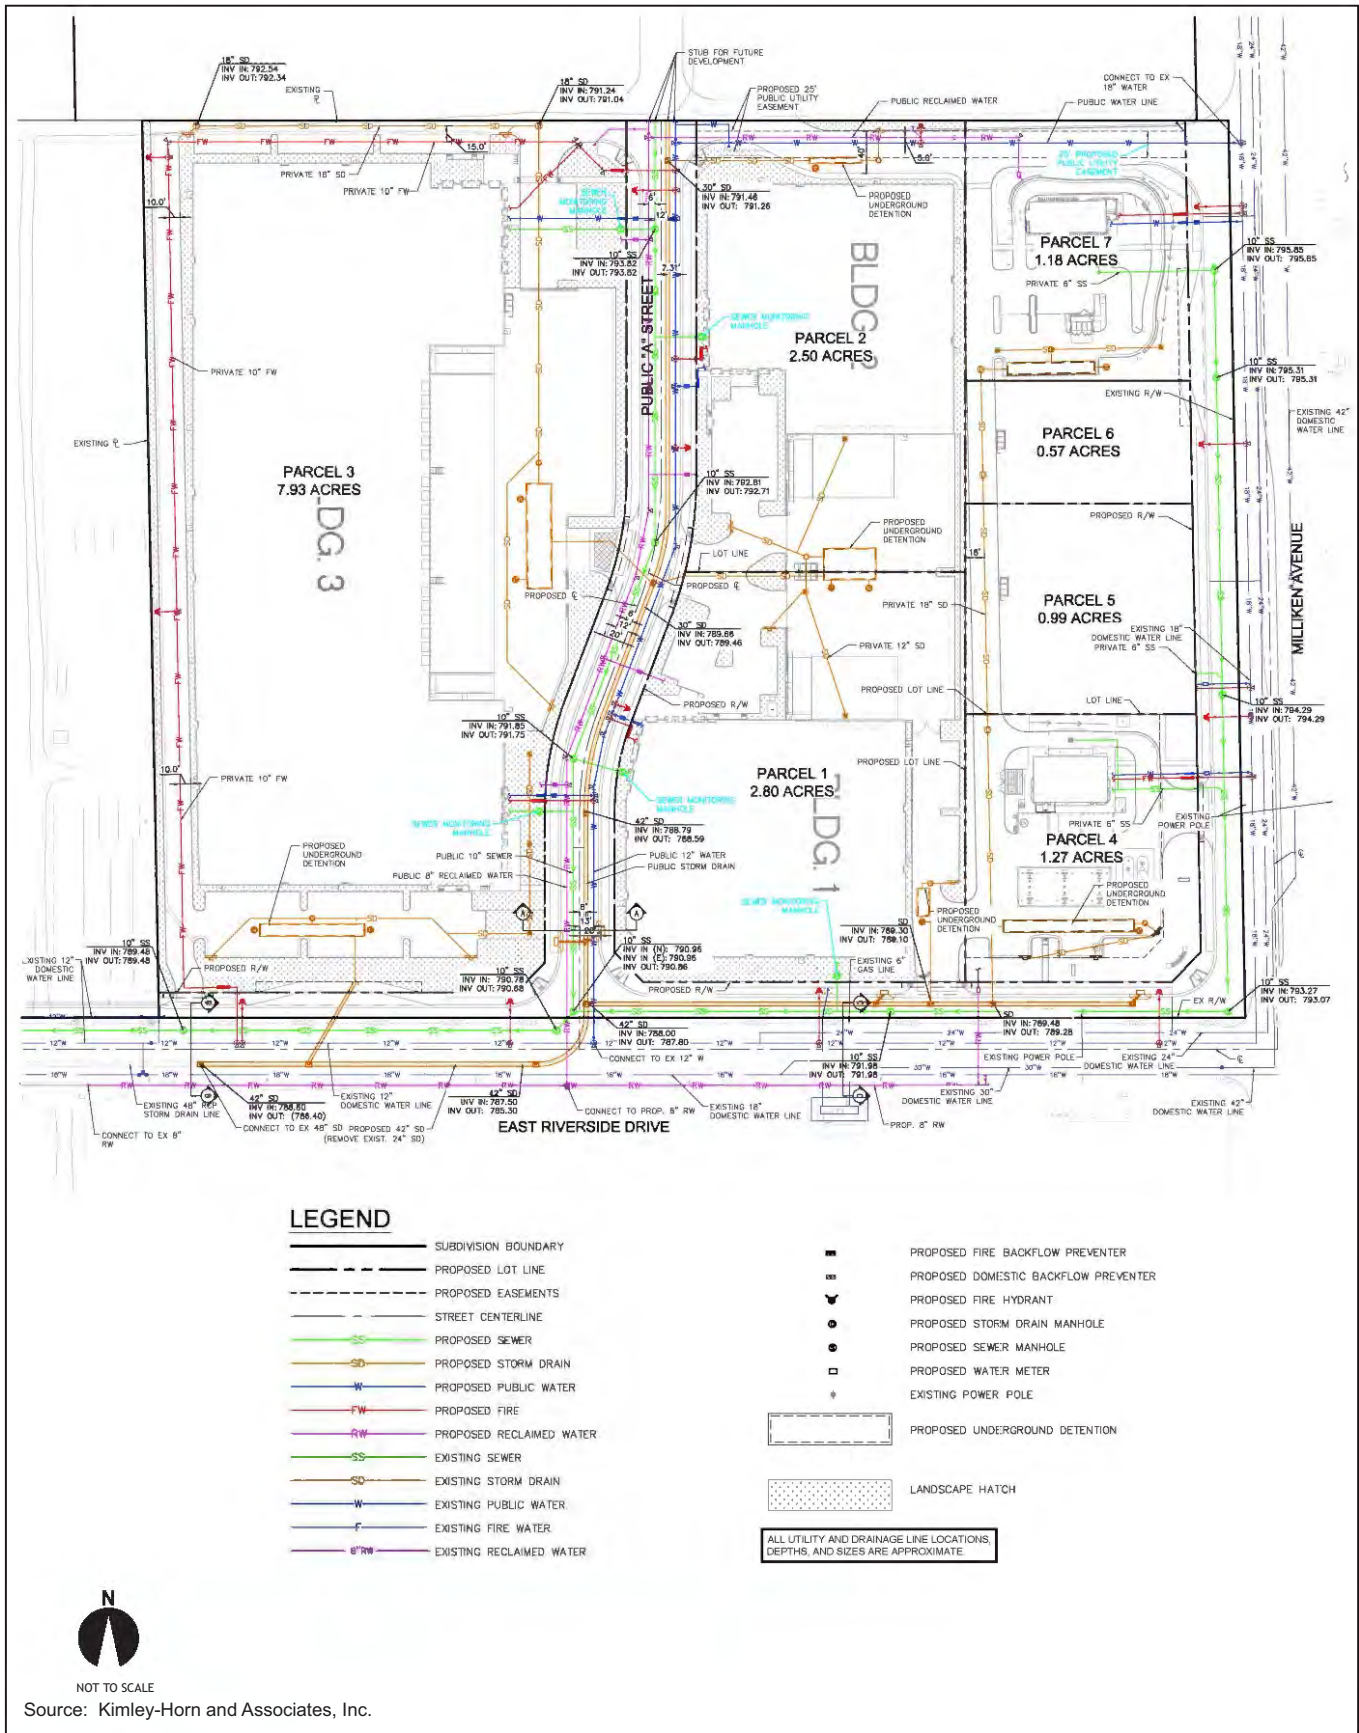

Figure 2.4-5
Utilities Plan

2.4.4.3 Sewer Services

Sewer service will be provided by the City of Ontario consistent with the City's Sewer Master Plan. An existing 10-inch sewer line is located within Riverside Drive, coming from the west and currently terminating at the easterly edge of the SCE Easement. As part of the Project, this line will be extended easterly along Riverside Drive to Milliken Avenue. Additional lines will be installed in Milliken Avenue and A Street.

2.4.4.4 Stormwater Management System

Drainage from the Project area flows into the County Line Channel along Bellgrave Avenue, as shown in the City Master Plan of Drainage. Presently, there is an existing 48-inch storm drain in Riverside Drive extending to the westerly edge of the Project site that ultimately connects to the Channel. This line will be extended along Riverside Drive. A 42-inch line will be installed within A Street, and stubbed for future development to the north. Several storm drain laterals will be located throughout the Project site utilizing an underground storage system.

2.4.4.5 Solid Waste Management

The City of Ontario provides solid waste collection services for the City and will service the site.

2.4.4.6 Electricity

Southern California Edison will provide electricity to the site from existing facilities in the vicinity. Proposed new facilities will be owned and operated by Southern California Edison and located underground.

2.4.4.7 Natural Gas

The Gas Company will provide natural gas to the site. Gas mains will be installed to the site by the Gas Company as necessary.

2.4.4.8 Communications Services

Communications services, including wired and wireless telephone and internet services are available through numerous private providers and would be provided on an as-needed basis. To the extent practical and consistent with City Conditions of Approval, existing and proposed wires, conductors, conduits, raceways, and similar communications improvements within the Project area would be installed underground. Any necessary surface-mounted equipment, e.g., terminal boxes, transformers, meters, service cabinets, etc., would be screened and would conform to City building setback requirements.

2.4.5 Energy Efficiency/Sustainability

Energy-saving and sustainable design features and operational programs would be incorporated into all facilities developed pursuant to The Vine Project. The Project would be required to comply with incumbent energy efficiency and performance standards established under the CALGreen Code.

2.4.6 Construction Area Traffic Management Plan

Temporary and short-term traffic detours and traffic disruptions could result during construction activities including implementation of access and circulation improvements noted above. Accordingly, the Applicant would be responsible for the preparation and submittal of a Construction Area Traffic Management Plan (Plan). Typical elements and information incorporated in the Plan would include, but not be limited to:

- **Name of on-site construction superintendent and contact phone number.**
- **Identification of Construction Contract Responsibilities** - For example, for excavation and grading activities, describe the approximate depth of excavation, and quantity of soil import/export (if any).
- **Identification and Description of Truck Routes** - to include the number of trucks and their staging location(s) (if any).
- **Identification and Description of Material Storage Locations (if any).**

- **Location and Description of Construction Trailer (if any).**
- **Identification and Description of Traffic Controls** - Traffic controls shall be provided per the Manual of Uniform Traffic Control Devices (MUTCD) if the occupation or closure of any traffic lanes, parking lanes, parkways or any other public right-of-way is required. If the right-of-way occupation requires configurations or controls not identified in the MUTCD, a separate traffic control plan must be submitted to the City for review and approval. All right-of-way encroachments would require permitting through the City.
- **Identification and Description of Parking** - Estimate the number of workers and identify parking areas for their vehicles.
- **Identification and Description of Maintenance Measures** - Identify and describe measures taken to ensure that the work site and public right-of-way would be maintained (including dust control).

The Plan would be reviewed and approved by the City prior to the issuance of the first building permit. The Plan and its requirements would also be required to be provided to all contractors as one component of building plan/contract document packages.

2.4.7 Opening Year

For the purposes of this analysis, the Project Opening Year is defined as mid-2021, by which time all proposed uses are assumed to be complete, occupied, and operational.

2.5 PROJECT OBJECTIVES

The primary goal of the Addendum Project is the development of the subject site with a productive mix of industrial and commercial uses. Complementary objectives include the following:

- Create an integrated development that provides a range of employment opportunities for residents in surrounding areas.

- Create a planned development wherein commercial uses would benefit from the site's freeway visibility.
- Locate commercial shopping and service uses proximate to underserved residential uses.
- Provide an industrial park supporting varied warehouse distribution and industrial tenants.
- Provide safe and convenient access for trucks in a manner that minimizes any potential disruption to residential areas.
- Facilitate goods movement locally, regionally, nationally, and internationally.
- Establish new development that would further the City's near-term and long-range fiscal goals.

2.6 DISCRETIONARY APPROVALS and PERMITS

Discretionary actions, permits, and related consultation(s) necessary to approve and implement the Project include, but are not limited to, the following.

2.6.1 Lead Agency Discretionary Actions and Permits

- CEQA Compliance;
- Adoption of this Addendum;
- Approval of a General Plan Amendment;
- Approval of a Specific Plan Amendment;
- Approval of a Zone Change;
- Approval of Tentative Parcel Maps; and
- Approval of Development Plans.

2.6.2 Other Consultation and Permits

Anticipated consultation and permits necessary to realize the Addendum Project would likely include, but are not limited to, the following:

- Permitting may be required by/through the Regional Water Quality Control Board (RWQCB) pursuant to requirements of the City's National Pollutant Discharge Elimination System (NPDES) Permit.

- Permitting may be required by/through the South Coast Air Quality Management District (SCAQMD) for certain equipment or land uses that may be implemented pursuant to the Addendum Project.
- Permitting (i.e., utility construction and connection permits) from affected utility purveyors.
- Other ministerial permits necessary to realize all on and offsite improvements related to the development of the site.

3.0 ENVIRONMENTAL CHECKLIST

ENVIRONMENTAL CHECKLIST

2020 Addendum to The Ontario Plan Certified EIR (SCH No. 2008101140)

General Note: The CEQA Initial Study Checklist categories and topics presented below conform to the suggested content presented in the *2019 CEQA Guidelines*, Appendix G. In certain instances, the 2019 CEQA Initial Study Checklist content differs from that presented in the Certified EIR. Additional or new environmental topics considered in the 2019 CEQA Initial Study Checklist, and not reflected in the Certified EIR, are recognized in the discussions below. Other Certified EIR discussions have been restructured or paraphrased to align with the format and content of the 2019 CEQA Initial Study Checklist, with no substantial effect on environmental findings or conclusions.

1. AESTHETICS

Except as provided in Public Resources Code Section 21099, would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Have a substantial adverse effect on a scenic vista?					X	
b) Substantially damage visible scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?					X	
c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point.) If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?					X	
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?					X	

Substantiation:

a-d) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR acknowledges that buildout of the City would affect the visual character of the City. However, the Certified EIR concludes that compliance with the City Municipal Code, as well as applicable policies presented within the Policy Plan, would ensure impacts in this regard would be less-than-significant. (Certified EIR pp. 5.1-7 – 5.1-17).

Certified EIR Mitigation Measures: None.

Addendum Project: Final designs of the Project facilities including, but not limited to, the proposed buildings, landscape/hardscape features, and lighting configurations would be required to conform to all applicable City design and development standards, and would be subject to City review and approval. Conformance with City design and development standards would ensure that the Addendum Project would not substantially degrade scenic vistas, scenic resources, and the existing visual character or quality of the area. No new or substantially increased aesthetic impacts would occur as a result of the Addendum Project.

Addendum Project Mitigation Measures: None.

Sources: *The Ontario Plan Draft Environmental Impact Report, State Clearinghouse No. 2008101140* (The Planning Center) April 2009; Addendum Project Design Concepts.

2. AGRICULTURE AND FORESTRY RESOURCES

<p>In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest protocols adopted by the California Air Resources Board. Would the project:</p>	<p>Substantial Change in Project Requiring Major MND Revisions</p>	<p>Substantial Change in Circumstances Requiring Major MND Revisions</p>	<p>New Information Showing Greater Significant Effects than Previous MND</p>	<p>New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND</p>	<p>No Changes or New Information Requiring Preparation of an MND or EIR or EIR</p>	<p>No Impact</p>
<p>a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance, as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?</p>					<p>X</p>	
<p>b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?</p>					<p>X</p>	
<p>c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 1220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?</p>					<p>X</p>	
<p>d) Result in the loss of forest land or conversion of forest land to non-forest use?</p>					<p>X</p>	
<p>e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland to non-agricultural use, or conversion of forest land to non-forest use?</p>					<p>X</p>	

Substantiation:

a) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR notes that implementation of The Ontario Plan would potentially convert all of the City's Important Farmland to non-farmland uses, and have significant and unavoidable impacts in this regard. (Certified EIR pp. 5.2-9 – 5.2-10).

Certified EIR Mitigation Measures: The Certified EIR examined several alternatives designed to result in increased preservation of agricultural land, including the retention of on-site agricultural uses, the replacement of agricultural resources off-site, the relocation of Prime Farmland topsoil, the establishment of conservation easements or preserves, and the transfer of development rights. However, no feasible alternatives or mitigation measures were identified to minimize this significant impact.

Addendum Project: No Prime Farmland, Unique Farmland, or Farmland of Statewide Importance is located within the Addendum site. Implementation of the Addendum Project would not result in impacts to agricultural lands beyond those previously addressed by the Certified EIR. On this basis, the Addendum Project's conversion of Prime Farmland to non-agricultural use is considered less-than-significant. No changed or new information has been identified to indicate that any potential Farmland impacts resulting from the Addendum Project would be different from those previously determined.

Addendum Project Mitigation Measures: None.

b) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR noted that implementation of The Ontario Plan would affect all active Williamson Act contracts within the City, and concluded that impacts to these resources would be significant and unavoidable. (Certified EIR p. 5.2-10).

Certified EIR Mitigation Measures: The Certified EIR identified no feasible alternatives or mitigation measures to minimize this significant impact.

Addendum Project: No Williamson Act contracts are in place for the subject site. The Addendum Project will therefore not conflict with any existing agricultural zoning designations, nor affect any existing Williamson Act contract(s).

Addendum Project Mitigation Measures: None.

c) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: This environmental topical concern has been added to the *CEQA Guidelines Appendix G, Environmental Checklist Form* since the adoption of the Certified EIR and was therefore not specifically addressed in the Certified EIR.

Certified EIR Mitigation Measures: Not Applicable.

Addendum Project: The Addendum Project site is not zoned for forest land, timberland, or timberland zoned Timberland Production. The Project would therefore have no impact on forest land or timberland.

Addendum Project Mitigation Measures: None.

d) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: Similar to Checklist Item c, above, this question has been added to the *CEQA Guidelines Appendix G, Environmental Checklist Form* since the adoption of the Certified EIR and was therefore not specifically addressed in the Certified EIR.

Certified EIR Mitigation Measures: Not Applicable.

Addendum Project: No forest land is located on the Addendum Project site or in the vicinity. The Addendum Project would therefore have no impact on forest land.

Addendum Project Mitigation Measures: None.

e) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: Similar to Checklist Items c and d, above, this question has been added to the *CEQA Guidelines Appendix G, Environmental Checklist Form* since the adoption of the Certified EIR and was therefore not specifically addressed in the Certified EIR.

Certified EIR Mitigation Measures: Not Applicable.

Addendum Project: The Addendum Project does not require or propose other changes to the environment which could result in the conversion of farm land or forest land to other uses. The Addendum Project would therefore have no impact on the existing environment that could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use.

Addendum Project Mitigation Measures: None.

Sources: *The Ontario Plan Draft Environmental Impact Report, State Clearinghouse No. 2008101140* (The Planning Center) April 2009; Addendum Project Design Concepts.

3. AIR QUALITY

Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Conflict with or obstruct implementation of the applicable air quality plan?					X	

Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?					X	
c) Expose sensitive receptors to substantial pollutant concentrations?					X	
d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?					X	

Substantiation:

Information regarding the Addendum Project presented below is summarized in part from the Project Air Quality/Greenhouse Gas Assessment (AQ/GHG Analysis)¹ which is presented at Attachment A of this Addendum.

a) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR determined that The Ontario Plan would be inconsistent with the AQMP because air pollutant emissions associated with buildout of the City would cumulatively contribute to the nonattainment designations in the South Coast Air Basin (SCAB). Furthermore, buildout of the City consistent with The Ontario Plan would exceed current estimates of population, employment, and VMT for Ontario and therefore these emissions are not included in the current regional emissions inventory for the SCAB. For these reasons, the Certified EIR concluded that The Ontario Plan would result in significant impacts in this regard.

Certified EIR Mitigation Measures: The Certified EIR determined that, while the Goals and Policies included in the Policy Plan would facilitate continued City cooperation with

¹ *The Vine Air Quality, Greenhouse Gas & Health Risk Assessment Memorandum* (Urban Crossroads, Inc.) October 5, 2020.

the South Coast Air Quality Management District (SCAQMD) and Southern California Association of Governments (SCAG) to achieve regional air quality improvement goals, no mitigation measures are available that would reduce impacts associated with consistency with the Air Quality Management Plan (AQMP).

Addendum Project: Although the Addendum Project would amend the site's current land use designations, the Addendum Project would not substantively increase or otherwise alter the development intensities beyond that currently anticipated for the subject site under the Policy Plan. Moreover, the Addendum Project uses would result in fewer emissions than would result from development of the subject site pursuant to the Policy Plan. On this basis, when compared to the Certified EIR findings, no new or substantially increased AQMP consistency impacts would occur under the Addendum Project.

Addendum Project Mitigation Measures: None.

b) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR determined that buildout of The Ontario Plan may generate short-term and long-term emissions that exceed South Coast Air Quality Management District's regional significance thresholds for VOC, CO, NO_x, PM₁₀, and PM_{2.5} and cumulatively contribute to the SCAB nonattainment designations for O₃, PM₁₀ and PM_{2.5}. Even with the implementation of mitigation measures, impacts were considered significant and unavoidable.

Certified EIR Mitigation Measures:

3-1 *The City of Ontario Building Department shall require that all new construction projects incorporate all feasible mitigation measures to reduce air quality emissions. Potential measures shall be incorporated as conditions of approval for a project and may include:*

- *Requiring fugitive dust control measures that exceed South Coast Air Quality Management District's Rule 403, such as:*

- *Requiring use of nontoxic soil stabilizers to reduce wind erosion.*
- *Applying water every four hours to active soil-disturbing activities.*
- *Tarping and/or maintaining a minimum of 24 inches of freeboard on trucks hauling dirt, sand, soil, or other loose materials.*
- *Using construction equipment rated by the United States Environmental Protection Agency as having Tier 3 or higher exhaust emission limits.*
- *Ensuring construction equipment is properly serviced and maintained to the manufacturer's standards.*
- *Limiting nonessential idling of construction equipment to no more than five consecutive minutes.*
- *Using Super-Compliant VOC paints for coating of architectural surfaces whenever possible. A list of Super-Compliant architectural coating manufactures can be found on the South Coast Air Quality Management District's website at:*
http://www.aqmd.gov/prdas/brochures/Super-Compliant_AIM.pdf.

3-2 *The City of Ontario shall evaluate new development proposals within the City and require all developments to include access or linkages to alternative modes of transportation, such as transit stops, bike paths, and/or pedestrian paths (e.g., sidewalks).*

Addendum Project: The SCAQMD has developed regional significance thresholds for regulated pollutants, and indicates that any projects in the SCAB with daily emissions that exceed any of the indicated thresholds should be considered as having an individually and cumulatively significant air quality impact. The following discussions compare the regional significance thresholds with the emissions associated with the Addendum Project.

Construction Emissions

Construction activities associated with the Project would result in emissions of carbon monoxide (CO), Volatile Organic Compounds (VOCs), Nitrogen Oxides (NOX), Sulfur Oxides (SOX), particulate matter ≤ 10 microns (PM₁₀), and particulate matter ≤ 2.5 microns (PM_{2.5}). Table 3-1 presents the emissions expected to be generated by construction of the Addendum Project.

Table 3-1
Regional Construction Emissions Summary

Phase	Emissions (lbs./day)					
	VOC	NO _x	CO	SO _x	PM ₁₀	PM _{2.5}
<i>Summer</i>						
2021	48.62	82.28	81.50	0.26	23.51	9.99
<i>Winter</i>						
2021	48.68	82.11	75.18	0.25	23.51	9.99
Maximum Daily Emissions	48.68	82.28	81.50	0.26	23.51	9.99
SCAQMD Regional Threshold	75	100	550	150	150	55
Threshold Exceeded?	NO	NO	NO	NO	NO	NO

Source: The Vine Air Quality, Greenhouse Gas & Health Risk Assessment Memorandum (Urban Crossroads, Inc.) October 5, 2020.

As shown above, emissions resulting from the Addendum Project construction would not exceed criteria pollutant thresholds established by the SCAQMD for emissions of any criteria pollutant.

Operational Emissions

Operational activities associated with the Project would result in emissions of CO, VOCs, NO_x, SO_x, PM₁₀, and PM_{2.5}. Operational related emissions are expected from the following primary sources: area source emissions, energy source emissions, mobile source emissions, and on-site equipment emissions. Table 3-2 presents the emissions expected to be generated by operations of the Addendum Project.

Table 3-2
Operational Emissions Summary

Operational Activities	Emissions (lbs./day)					
	VOC	NO _x	CO	SO _x	PM ₁₀	PM _{2.5}
<i>Summer</i>						
Area Source	16.64	1.8E-03	0.20	1.00e-05	7.0e-04	7.0e-04
Energy Source	0.58	5.23	4.40	0.03	0.40	0.40
Mobile Source	16.85	60.72	157.60	0.45	42.46	11.73
On-Site Equipment	0.27	3.09	1.54	6.34E-03	0.10	0.10
Maximum Daily Emissions	34.34	69.05	163.74	0.49	42.96	12.23
SCAQMD Regional Threshold	55	55	550	150	150	55
Threshold Exceeded?	NO	YES	NO	NO	NO	NO
<i>Winter</i>						
Area Source	16.64	1.8E-03	0.20	1.00e-05	7.0e-04	7.0e-04
Energy Source	0.58	5.23	4.40	0.03	0.40	0.40
Mobile Source	15.53	62.66	137.08	0.42	42.45	11.73
On-Site Equipment	0.27	3.09	1.54	6.34E-03	0.10	0.10
Maximum Daily Emissions	33.02	70.98	143.22	0.46	42.95	12.22
SCAQMD Regional Threshold	55	55	550	150	150	55
Threshold Exceeded?	NO	YES	NO	NO	NO	NO

Source: *The Vine Air Quality, Greenhouse Gas & Health Risk Assessment Memorandum* (Urban Crossroads, Inc.) October 5, 2020.

As shown above, Addendum Project operational emissions would exceed the SCAQMD regional thresholds of significance for emissions of NO_x.

Table 3-3 compares peak operational-source criteria pollutant emissions assumed within the Certified EIR with peak operational-source criteria pollutant emissions generated by the Addendum Project.

Table 3-3
Operational Emissions Comparison

Operational Activities	Emissions (lbs./day)					
	VOC	NO _x	CO	SO _x	PM ₁₀	PM _{2.5}
<i>Summer</i>						
Addendum Project	34.34	69.05	163.74	0.49	42.96	12.23
Certified EIR	102.42	198.04	460.14	1.23	100.93	28.34
Variance	-68.08	-128.99	-296.40	-0.74	-57.97	-16.11
<i>Winter</i>						
Addendum Project	33.02	70.98	143.22	0.46	42.95	12.22
Certified EIR	97.34	203.84	412.16	1.15	100.92	28.34
Variance	-64.32	-132.86	-268.94	-0.69	-57.97	-16.12

Source: The Vine Air Quality, Greenhouse Gas & Health Risk Assessment Memorandum (Urban Crossroads, Inc.) October 5, 2020.

As indicated, emissions generated by the Addendum Project would generally result in a net decrease in peak operational-source criteria pollutant emissions when compared to peak operational-source criteria pollutant emissions assumed within the Certified EIR. NO_x exceedances that would occur under the Addendum Project are considered and addressed within the Certified EIR. As such, the Addendum Project would not result in new or substantively different or substantively increased operational-source air quality impacts.

Addendum Project Mitigation Measures: None.

c) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR concluded that development pursuant to the Policy Plan would result in significant and unavoidable air quality impacts due to elevated concentrations of air pollutants at sensitive receptors. (Certified EIR, p. 5.3-26).

Certified EIR Mitigation Measures:

3-3 *The City of Ontario shall evaluate new development proposals within the City for potential incompatibilities with regard to the California Air Resources Board's Air Quality and Land Use Handbook: A Community Health Perspective (April 2005). New development*

that is inconsistent with the recommended buffer distances shall only be approved if all feasible mitigation measures, such as high efficiency Minimum Efficiency Reporting Value filters have been incorporated into the project design to protect future sensitive receptors from harmful concentrations of air pollutants as a result of proximity to existing air pollution sources.

Addendum Project: The following discussions evaluate the potential for the Addendum Project to expose sensitive receptors to substantial pollutant concentrations.

Localized Emissions

The SCAQMD has established that impacts to air quality are significant if there is a potential to contribute or cause localized exceedances of the federal and/or state ambient air quality standards (NAAQS/CAAQS). Collectively, these are referred to as Localized Significance Thresholds (LSTs). LSTs represent the maximum emissions from a project that will not cause or contribute to an exceedance of the most stringent applicable federal or state ambient air quality standard at the sensitive receptor.

Receptor locations are off-site locations where individuals may be exposed to emissions from Project activities. Sensitive receptors in the study area include existing residential homes and an educational use, as described below. Refer also to Exhibit C of the AQ/GHG Analysis.

- R1: Located approximately 196 feet west of the Project site, R1 represents an existing residential home located at 3977 Yuba River Drive in the City of Ontario.
- R2: Location R2 represents the existing single-family residential home at 2913 McCloud River Lane located roughly 285 feet west of the Project site in the City of Ontario.
- R3: Located approximately 287 feet west of the Project site across the power transmission lines, R3 represents an existing residential home at 2965 McCloud River Lane in the City of Ontario.
- R4: Location R4 represents the Colony High School located approximately 1,731 feet south west of the Project site at 3850 E Riverside Drive.

R5: Located approximately 294 feet south of the Project site across E Riverside Drive, R5 represents an existing single-family residential home at 4097 E Auburn Way in the City of Ontario.

Tables 3-4 and 3-5 identify the localized construction and operational impacts at the nearest receptor location in the vicinity of the Addendum Project site.

Table 3-4
Construction Localized Significance Summary

Activity	Emissions (lbs./day)			
	NO _x	CO	PM ₁₀	PM _{2.5}
<i>Demolition</i>				
Maximum Daily Emissions	31.44	21.57	2.25	1.55
SCAQMD Localized Threshold	118	863	20	7
Threshold Exceeded?	NO	NO	NO	NO
<i>Site Preparation</i>				
Maximum Daily Emissions	60.79	21.85	14.46	8.38
SCAQMD Localized Threshold	220	1,713	39	12
Threshold Exceeded?	NO	NO	NO	NO
<i>Grading</i>				
Maximum Daily Emissions	56.54	31.23	21.31	9.35
SCAQMD Localized Threshold	237	1,873	45	12
Threshold Exceeded?	NO	NO	NO	NO

Table 3-5
Operational Localized Significance Summary

	Emissions (lbs./day)			
	NO _x	CO	PM ₁₀	PM _{2.5}
Maximum Daily Emissions	11.45	12.99	2.62	1.09
SCAQMD Localized Threshold	270	2,193	14	3
Threshold Exceeded?	NO	NO	NO	NO

Source: *The Vine Air Quality, Greenhouse Gas & Health Risk Assessment Memorandum* (Urban Crossroads, Inc.) October 5, 2020.

As shown above, emissions resulting from the Project construction and operation will not exceed the numerical thresholds of significance established by the SCAQMD for any criteria pollutant.

Health Risk Assessment

The AQ/GHG Analysis also evaluated the potential mobile-source health risk impacts to receptors (residents or workers) associated with the development of the Addendum Project. Health risk exposures were modeled in accordance with the guidelines in the SCAQMD's Health Risk Assessment Guidance for Analyzing Cancer Risks from Mobile Source Diesel Idling Emissions for CEQA Air Quality Analysis.

The analysis evaluates potential health risk impacts that could result from exposure to Toxic Air Contaminants (TACs), including diesel particulate matter (DPM) generated by heavy-duty diesel trucks and from emissions of benzene, hexane, methyl tert-butyl ether, toluene, and xylene associated with gasoline dispensing from the Addendum Project.

At the maximally exposed individual receptor (MEIR), the maximum incremental cancer risk attributable to the Addendum Project is estimated at 1.43 in one million, which is less than the SCAQMD threshold of 10 in one million. At this same location, non-cancer risks were estimated to be 0.002, which would not exceed the applicable SCAQMD threshold of 1.0.

Based on the preceding, the Addendum Project would not expose sensitive receptors to substantial pollutant concentrations. No new or substantially increased impacts in this regard would occur as a result of the Addendum Project.

Addendum Project Mitigation Measures: None.

d) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR concluded that development pursuant to The Policy Plan would result in significant and unavoidable temporary odor impacts

associated with transition of agricultural lands to nonagricultural uses. (Certified EIR, p. 5.3-28).

Certified Mitigation Measures: No feasible mitigation.

Addendum Project: The Addendum Project does not propose or require transition of agricultural lands to nonagricultural uses, nor is the subject site affected by proximate agricultural use odor sources. Further, construction-source and operational-source odor impacts that may result from the Addendum Project are controlled as a byproduct of hazardous/potentially hazardous materials handling plans and Best Management Practices implemented under SCAQMD Rule 402 et al. The Addendum Project would comply with all SCAQMD Rules regulating and controlling odors and odor sources. The Addendum Project would therefore not create objectionable odors affecting a substantial number of people. On this basis, when compared to the Certified EIR findings, no new or substantially increased odor impacts would occur under the Addendum Project.

Addendum Project Mitigation Measures: None.

Sources: *The Ontario Plan Draft Environmental Impact Report, State Clearinghouse No. 2008101140* (The Planning Center) April 2009; *The Vine Air Quality, Greenhouse Gas & Health Risk Assessment Memorandum* (Urban Crossroads, Inc.) October 5, 2020; Addendum Project Design Concepts.

4. BIOLOGICAL RESOURCES

Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Have a substantial adverse effect, either directly or through habitat modification, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?					X	
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies and regulations; or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?					X	
c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?					X	
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?					X	
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?					X	
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?					X	

Substantiation:

- a) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR notes that implementation of The Ontario Plan would not directly affect sensitive species since the General Plan does not confer entitlements for development. However, development in accordance with The Ontario Plan could impact sensitive species. Projects considered for approval under The Ontario Plan would be subject to independent CEQA review to determine whether there is potential habitat on-site for sensitive species. The Certified EIR did not identify any significant impacts in this regard. (Certified EIR, pp. 5.4-26 – 5.4-28).

Certified EIR Mitigation Measures: None.

Addendum Project: In order to assess the current conditions at the Addendum Project site, a biological report has been prepared.² The full report is presented as Attachment B to this Addendum. The following discussions summarize the findings of the Biological Report.

Special-Status Plant Species

No special-status plant species were observed on the Addendum Project site during the 2019 site surveys.

Special-Status Wildlife Species

Although no special-status wildlife species were observed at the site, a number of special-status wildlife species were identified as *potentially* occurring onsite, including some species with historic records from the site vicinity. Of primary concern for the site are the Delhi Sands Flower-Loving Fly (*Rhaphiomidas terminatus abdominalis*) and the Burrowing owl (*Athene cunicularia*), as discussed below.

² *Biological Report for the Toscana Square Project Site* (Harmsworth Associates) October 2019.

Delhi Sands Flower-Loving Fly

Delhi Sands Flower-Loving Fly (DSF) is restricted to the Delhi Sands formation, on ancient inland sand dunes. The entire Addendum Project site has been mapped by the United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Soil Survey as being composed of Delhi sand soils. Since Delhi sand soils are wind deposited (aeolian), the boundaries established by the USDA are not exact and change over time. Due to surrounding development, the Delhi sand soils on the Addendum site are no longer subject to aeolian processes.

To assess the suitability of the onsite soils to support DSF, a Habitat Suitability Assessment was conducted for the Addendum site.³ The site was evaluated for the quality or purity and for its potential to support DSF. Areas were assigned one or more ratings ranging between 1 and 5, with 5 being the best quality and most suitable habitat. Please refer also to Exhibit 5 of the Habitat Suitability Assessment, included as Attachment B to this Addendum.

The Habitat Suitability Assessment determined that there are Delhi sand soils within the vineyard located in the northern half of the Addendum site that are moderately contaminated from agricultural activities associated with vineyards. This area totals approximately 23 acres, and was rated as low quality to moderate quality with a habitat quality rating of 3/4. The Habitat Suitability Assessment concluded that this area is expected to have a low to moderate potential to support DSF. Further analysis and consultation with the USFWS and CFWS will be undertaken for this northern portion of the Addendum site as part future development plans, as no specific development is currently being proposed for this area. Consistent with Federal, State, and local requirements, the preparation of protocol surveys and consultation will need to occur prior to the issuance of any construction permits for this area.

Soils surrounding the existing buildings along the eastern boundary of the Addendum site were rated either as very low quality with a habitat quality rating of 2, or were rated as unsuitable with a habitat quality rating of 1 due to the lack of clean Delhi sand soils,

³ *Toscana Square Project Site, City of Ontario, San Bernardino County, California, Delhi Sands Flower-Loving Fly Habitat Suitability Assessment* (ELMT Consulting, Inc.) October 2019.

impervious surfaces, and loose gravel. The Habitat Suitability Assessment concluded that this area is unlikely to support a population of DSF.

The Vine portion (southern half) of the Addendum site contains Delhi sand soils that are no longer clean due to extensive contamination with organic material from disking and weed abatement activities. This area totals approximately 20 acres that was rated as very low quality to low quality with a habitat quality rating of 2/3. It is also noted that focused DSF presence/absence surveys were conducted for The Vine portion of the Addendum site for five (5) consecutive years from 2004 to 2008 with negative results. Given the above ratings of Delhi sand soils and negative focused survey results, the Habitat Suitability Assessment concluded that The Vine portion of the Addendum site is considered poor-quality habitat and is unlikely to support a population of DSF.

Burrowing owl

Burrowing owls occur in shortgrass prairies, grasslands, lowland scrub, agricultural lands (particularly rangelands), prairies, coastal dunes, desert floors, and some artificial, open areas as a yearlong resident. They require large open expanses of sparsely vegetated areas on gently rolling or level terrain with an abundance of active small mammal burrows. As a critical habitat feature, they require the use of rodent or other burrows for roosting and nesting cover. They can also use pipes, culverts, and nest boxes. No burrowing owls or their sign were detected during the surveys and there was no evidence that any burrowing owls occur onsite. No onsite burrows showed any evidence of owl occupancy. In addition, this species has not been recorded at the site in the past. Burrowing owls are presumed absent from the site.

Summary

Based on the preceding discussion, no special-status species have been observed at the Project site; however, common bird species are present. Impacts to nesting birds is prohibited by the Federal Migratory Bird Treaty Act of 1918 (MBTA), and is considered a potentially significant impact. With the implementation of the following mitigation, impacts to special-status species resulting from the Addendum Project would be less-than-significant. It is also noted that, as stated within the Certified EIR, projects located within the New Model Colony (such as the Addendum Project) are required to pay a

Mitigation Fee that would be used by the Greater Prado Basin Habitat Conservation Program to acquire, restore, enhance, maintain, or manage mitigation lands.

Addendum Project Mitigation Measures:

- 4-1 *Avoidance of Nesting Migratory Birds: If possible, all vegetation removal activities shall be scheduled from August 1 to February 1, which is outside the general avian nesting season. This would ensure that no active nests would be disturbed and that removal could proceed rapidly. If vegetation is to be cleared during the nesting season, all suitable habitat will be thoroughly surveyed within 72 hours prior to clearing for the presence of nesting birds by a qualified biologist (Project Biologist). The Project Biologist shall be approved by the City and retained by the Applicant. The survey results shall be submitted by the Project Applicant to the City Planning Department. If any active nests are detected, the area shall be flagged and mapped on the construction plans along with a minimum 300-foot buffer, with the final buffer distance to be determined by the Project Biologist. The buffer area shall be avoided until, as determined by the Project Biologist, the nesting cycle is complete or it is concluded that the nest has failed. In addition, the Project Biologist shall be present on the site to monitor the vegetation removal to ensure that any nests, which were not detected during the initial survey, are not disturbed.*
- 4-2 *Avoidance of Nesting Burrowing Owls: No more than 72 hours prior to any site disturbances, focused surveys for the burrowing owl shall be conducted. If absence of this species is confirmed, project work can proceed. If, however, burrowing owl is located on site, the appropriate resource agencies (CDFW and USFWS) shall be contacted. The Project Applicant shall consult with the wildlife agencies regarding the most appropriate methods and timing for removal of owls. As necessary, owls will be actively evicted following agency approved protocols (i.e., placing a one-way door at the burrow entrance to ensure that owls cannot access the burrow once they leave). Any such active eviction shall occur outside of the breeding/nesting season. That is, active eviction shall be accomplished between September 1 and February 15. If more than 30 days has elapsed between owl eviction and completion of clearing and grubbing activities, a subsequent survey for the burrowing owl shall be conducted to ensure that owls have not re-populated the site. Any reoccupation by owls will require subsequent protocol active eviction.*

b, c) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR determined that implementation of The Ontario Plan would not result in direct impacts, however, projects approved pursuant to the General Plan could indirectly result in impacts to such resources. As such, individual projects undergoing environmental review under CEQA would be required to determine whether there is potential habitat onsite for sensitive species. The Certified EIR did not identify any significant impacts in this regard.

Certified EIR Mitigation Measures: None.

Addendum Project: Based on the findings of the Biological Report, no riparian habitat, sensitive natural communities, or federally protected wetlands exist within the subject site. Nor does the Addendum Project propose or require uses or facilities that would result in potentially significant impacts to offsite riparian habitat, sensitive natural community, or federally protected wetlands. The Addendum Project would not have a substantial adverse effect on any riparian habitat, sensitive natural community, or federally protected wetlands.

Addendum Project Mitigation Measures: None.

d) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR states that no regional wildlife movement corridors have been identified in the City, and most of the City is ill-suited for the purposes of wildlife movement. Additionally, compliance with existing policies and regulations would ensure impacts in this regard are less-than-significant. (Certified EIR, p. 5.4-30).

Certified EIR Mitigation Measures: None.

Addendum Project: The Biological Report determined that no wildlife corridors or linkages are located onsite, and it is unlikely that the site is of any significance to wildlife

movement. Consistent with the conclusion of the Certified EIR, the Addendum Project would not interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors or impede the use of native wildlife nursery sites.

Addendum Project Mitigation Measures: None.

e, f) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR did not identify any conflicts with any local policies or ordinances protecting biological resources, adopted Habitat Conservation Plan, Natural Community Plan, or other approved local, regional, or state habitat conservation plan. (Certified EIR, pp. 5.4-30 – 5.4-31).

Certified EIR Mitigation Measures: None.

Addendum Project: The Addendum Project would not conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan.

Addendum Project Mitigation Measures: None.

Sources: *The Ontario Plan Draft Environmental Impact Report, State Clearinghouse No. 2008101140 (The Planning Center) April 2009; Biological Report for the Toscana Square Project Site (Harmsworth Associates) October 2019; Addendum Project Design Concepts.*

5. CULTURAL RESOURCES

Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Cause a substantial adverse change in the significance of a historical resource pursuant to Section 15064.5?					X	

Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?					X	
c) Disturb any human remains, including those interred outside of formal cemeteries?					X	

Substantiation:

- a) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: Historic resources in the City include historic districts, historic landmarks or points of historical interest, and other buildings, structures, objects, and sites that appear eligible for listing on the National, California, or Local Registers of Historic Places. The Certified EIR concluded that adoption of The Ontario Plan itself would not directly affect any historical structures; however, identified and potential historic structures and sites may be vulnerable as development occurs. The Certified EIR concluded this was a potentially significant impact. (Certified EIR, pp. 5.5-16 – 5.5-19).

Certified EIR Mitigation Measures:

5-1 Historic or potentially historic resources in the City shall be evaluated for historic significance through the City’s tier system prior to the issuance of development approvals in the Focus Areas.

Even with the implementation of Mitigation Measure 5-1, the Certified EIR concluded that impacts to historical resources would be significant and unavoidable.

Addendum Project: To assess the potential for historic resources, a Cultural Resources Assessment has been conducted for the Addendum site.⁴ During the field survey, a small remnant of a historic period vineyard was identified, comprising a historic-period residence, barn, stable, and several acres of grapevines.⁵ The Cultural Resources Assessment determined that the property is not recommended eligible for the California Register and does not qualify as a City Historic Landmark. The Assessment concluded that the property would not be considered a “historical resource” under CEQA, and does not warrant further consideration. As such, no new or substantially increased historical resources impacts would occur under the Addendum Project.

Addendum Project Mitigation Measures: None.

b) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: Adoption of The Ontario Plan in itself would not directly affect archaeological resources. However, long-term implementation of the proposed Land Use Plan could allow development and redevelopment of potentially sensitive areas. The Certified EIR concluded this was a potentially significant impact. (Certified EIR, p. 5.5-20).

Certified EIR Mitigation Measures:

5-2 *In areas of documented or inferred archaeological and/or paleontological resource presence, City staff shall require applicants for development permits to provide studies to document the presence/absence of such resources. On properties where resources are identified, such studies shall provide a detailed mitigation plan, including a monitoring program and recovery and/or in situ preservation plan, based on the recommendations of a qualified cultural preservation expert. The mitigation plan shall include the following requirements:*

⁴ *Cultural Resources Assessment, Toscana Square Project, City of Ontario, San Bernardino County, California* (BCR Consulting, LLC) December 1, 2019.

⁵ It is noted that the San Antonio Winery tasting room, located along Milliken Avenue, was not a part of the Addendum Project site at the time of the Assessment. The tasting room was constructed in 1972, and is not considered a historic resource. The Cultural Resources Assessment concluded that the San Antonio Winery tasting room did not warrant further consideration.

- a) *Archaeologists and/or paleontologist shall be retained for the project and will be on call during grading and other significant ground-disturbing activities.*
- b) *Should any cultural/scientific resources be discovered, no further grading shall occur in the area of the discovery until the Planning Director is satisfied that adequate provisions are in place to protect these resources.*
- c) *Unanticipated discoveries shall be evaluated for significance by a San Bernardino County Certified Professional Archaeologist/Paleontologist. If significance criteria are met, then the project shall be required to perform data recovery, professional identification, radiocarbon dates, and other special studies; submit materials to a museum for permanent curation; and provide a comprehensive final report including catalog with museum numbers.*

5-3 *Upon receipt of an application for a Specific Plan or a project that requires a General Plan amendment subject to CEQA and is within the City's jurisdiction, the City's representative shall consult with the relevant tribe(s)' representative(s) to determine if the proposed project is within a culturally sensitive area to the tribe. If sufficient evidence is provided to reasonably ascertain that the site is within a [tribal] culturally sensitive area, then a cultural resources assessment prepared by an archaeologist shall be required. The findings of the cultural resources assessment shall be incorporated into the CEQA documentation. A copy of the report shall be forwarded to the tribe(s). If mitigation is recommended in the CEQA document, the procedure described in Mitigation Measure 5-4 shall be followed.*

5-4 *Prior to the issuance of grading permits for a Specific Plan or project that requires a General Plan amendment for which the CEQA document defines cultural resource mitigation for potential tribal resources, the project applicant shall contact the designated tribe(s) to notify them of the grading, excavation, and monitoring program. The applicant shall coordinate with the City of Ontario and the tribal representative(s) to develop mitigation measures that address the designation, responsibilities, and participation of tribal monitors during grading, excavation, and ground-disturbing activities; scheduling; terms of compensation; and treatment and final disposition of any cultural resources, sacred sites, and human remains discovered on the site. The City of Ontario shall be the final arbiter of the conditions for projects within the City's jurisdiction.*

With the implementation of Mitigation Measures 5-2 through 5-4, the Certified EIR concluded that impacts to archaeological and/or paleontological resources would be less-than-significant.

Addendum Project: No archaeological resources were identified within the Addendum site. The Cultural Resources Assessment determined that historic period and modern disturbances related to development have disturbed sediments beyond depths at which buried archaeological resources are likely. The Assessment concluded that no additional cultural resources work or monitoring is necessary for the Addendum site.

Potential impacts to tribal cultural resources are discussed subsequently, at Checklist Item 18, *Tribal Cultural Resources*.

Addendum Project Mitigation Measures: None.

c) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR concluded that compliance with existing regulations would ensure that the potential for The Ontario Plan to disturb any human remains, including those interred outside of formal cemeteries was less-than-significant. (Certified EIR, p. 5.5-21).

Certified EIR Mitigation Measures: None.

Addendum Project: The Addendum Project would be required to comply with all existing regulations, including the California Public Resources Code Section 5097.98, which would afford protection for any human remains discovered during development activities. No significant impacts would occur.

Addendum Project Mitigation Measures: None.

6. ENERGY

Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?					X	
b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?					X	

Substantiation:

a – b) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: This environmental topical concern has been added to the *CEQA Guidelines* Appendix G, Environmental Checklist Form since the adoption of the Certified EIR, and was therefore not specifically addressed in the Certified EIR.

Certified EIR Mitigation Measures: Not Applicable.

Addendum Project: The Addendum Project in total would be required to comply with incumbent performance standards established under the Building Energy Efficiency Standards contained in the California Code of Regulations (CCR), Title 24, Part 6 (Title 24, Energy Efficiency Standards). The Addendum Project would be required to conform to applicable CALGreen provisions (CCR, Title 24, Part 11 – CALGreen). CALGreen was implemented in 2007 to support the goals of the State’s greenhouse gas reduction and building energy efficiency programs.

Additionally, developers and owners/tenants generally have vested financial incentives to avoid imprudent energy consumption practices. In this regard, there is growing recognition among developers and owners/tenants that energy-efficient and sustainable practices yield both environmental and economic benefits.

Based on the preceding, the Addendum Project would not result in or cause wasteful, inefficient, and unnecessary consumption of energy; and would not conflict with or obstruct a state or local plan for renewable energy or energy efficiency. No new or substantially increased energy impacts would occur under the Addendum Project.

Addendum Project Mitigation Measures: None.

7. GEOLOGY AND SOILS

Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:						
(i) rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42;					X	
(ii) strong seismic ground shaking;					X	
(iii) seismic-related ground failure, including liquefaction; or					X	

Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
(iv) landslides?					X	
b) Result in substantial soil erosion or the loss of topsoil?					X	
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?					X	
d) Be located on expansive soil, as defined in Table 18 1 B of the Uniform Building Code, creating substantial risks to life or property?					X	
e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?						X
f) Directly or indirectly destroy a unique paleontological resource or site or unique geological feature?					X	

Substantiation:

a - d) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR recognizes existing geological conditions and location of the City within a seismically active area, but concludes that compliance with California Building Code (CBC) regulations and standard conditions of approval would preclude significant impacts in this regard. (Certified EIR, pp. 5.7-16 – 5.7-19).

Certified EIR Mitigation Measures: None.

Addendum Project: Underlying geology/soils conditions at the subject site and the surrounding area have not changed since the preparation of the Certified EIR. No active or potentially active faults are known to exist at the site. In addition, the subject site does not lie within an Alquist-Priolo Earthquake Fault Zone. According to Figure S-1, *Seismic Hazards* of The Ontario Plan, the site is not located in an area of geological concern.

As part of the City's standard review and approval of development projects, the Addendum Project would be required to comply with requirements of a final City-approved geotechnical report, and applicable provisions of the UBC and CBC. All final plans would be required to incorporate design- and site-appropriate means to avoid or minimize any geological concerns. The Addendum Project would therefore not result in new, additional, or different geological impacts than were considered and addressed in the Certified EIR.

Addendum Project Mitigation Measures: None.

e) *No Impact.*

Certified EIR Conclusions: According to the Certified EIR, wastewater from the City of Ontario is treated at wastewater treatment facilities owned and operated by the Inland Empire Utilities Agency (Regional Plant No. 1 in the City of Ontario and Regional Plant No. 5 in the City of Chino). The use of septic tanks would not occur in the City.

Certified EIR Mitigation Measures: None.

Addendum Project: As under the Certified EIR, the Addendum Project would connect to the City's sanitary sewer system. No septic tanks or other alternative wastewater disposal systems are proposed. On this basis, the Addendum Project would have no impacts relative to septic tanks or alternative waste water disposal systems.

Addendum Project Mitigation Measures: None.

f) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: Adoption of The Ontario Plan in itself would not directly affect paleontological resources. However, long-term implementation of the proposed Land Use Plan could allow development and redevelopment of potentially sensitive areas. The Certified EIR concluded this was a potentially significant impact. (Certified EIR, p. 5.5-20).

Certified EIR Mitigation Measures: Please refer to Mitigation Measures 5-2 through 5-4 (presented previously). With the implementation of these mitigation measures, the Certified EIR deemed impacts to paleontological resources would be less-than-significant.

Addendum Project: As discussed previously at Checklist Item 5, *Cultural Resources*, the Cultural Resources Assessment prepared for the Addendum Project determined that no cultural resources would be affected by the Addendum Project and no further work or monitoring in this regard would be required. The Addendum Project would therefore not result in new, additional, or different impacts than were considered and addressed in the Certified EIR.

Addendum Project Mitigation Measures: None.

Sources: *The Ontario Plan Draft Environmental Impact Report, State Clearinghouse No. 2008101140* (The Planning Center) April 2009; Addendum Project Design Concepts.

8. GREENHOUSE GAS EMISSIONS

Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?					X	
b) Conflict with any applicable plan, policy or regulation of an agency adopted for the purpose of reducing the emissions of greenhouse gases?					X	

Substantiation:

a,b) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR determined that buildout of The Ontario Plan would contribute to global climate change through direct emissions of GHG from onsite area sources, offsite energy production required for onsite activities, and indirect emissions from water use and vehicle trips. As such, the potential for implementation of The Ontario Plan to generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment, or conflict with any applicable plan, policy or regulation of an agency adopted for the purpose of reducing the emissions of greenhouse gases was deemed significant and unavoidable, even with the implementation of the following mitigation measures. (Re-Circulated Portions of The Ontario Plan Draft Environmental Impact Report, p. 2-118).

Certified EIR Mitigation Measures:

6-1 *The City of Ontario shall prepare a Climate Action Plan within 18 months after adopting The Ontario Plan. The goal of the Climate Action Plan shall be to reduce GHG emissions from all activities within the City boundaries to support the State's efforts under AB 32*

and to mitigate the impact of climate change on the City, State, and world. Once completed, the City shall update The Ontario Plan and associated policies, as necessary, to be consistent with the Climate Action Plan and prepare a subsequent or supplemental Environmental Impact Report, if new significant impacts are identified. The Climate Action Plan shall include the following:

- *Emission Inventories: The City shall establish GHG emissions inventories including emissions from all sectors within the City, using methods approved by, or consistent with guidance from, the CARB; the City shall update inventories every 3 years or as determined by state standards to incorporate improved methods, better data, and more accurate tools and methods, and to assess progress. If the City is not on schedule to achieve the GHG reduction targets, additional measures shall be implemented, as identified in the CAP.*
 - *The City shall establish a baseline inventory of GHG emissions including municipal emissions, and emissions from all business sectors and the community.*
 - *The City shall define a “business as usual” scenario of municipal, economic, and community activities, and prepare a projected inventory for 2020 based on that scenario.*

- *Emission Targets: The City will develop Plans to reduce or encourage reductions in GHG emissions from all sectors within the City:*
 - *A Municipal Climate Action Plan which shall include measures to reduce GHG emissions from municipal activities by at least 30 percent by 2020 compared to the “business as usual” municipal emissions (including any reductions required by the California Air Resource Board under AB 32.*
 - *A Business Climate Action Plan in collaboration with the business community, which shall include measures to reduce GHG emissions from business activities, and which shall seek to reduce emissions by at least 30 percent by 2020 compared to “business as usual” business emissions.*

- *A Community Climate Action Plan in collaboration with the stakeholders from the community at large, which shall include measures reduce GHG emissions from community activities, and which shall seek to reduce emissions by at least 30 percent by 2020 compared to "business as usual" community emissions.*

6-2 *The Climate Action Plan shall include specific measures to achieve the GHG emissions reduction targets identified in Mitigation Measure 6-1. The Climate Action Plan shall quantify the approximate greenhouse gas emissions reductions of each measure and measures shall be enforceable. Measures listed below, along with others, shall be considered during the development of the Climate Action Plan (CAP):*

- *Require all new or renovated municipal buildings to seek Silver or higher Leadership in Energy and Environmental Design (LEED) standard, or compliance with similar green building rating criteria.*
- *Require all municipal fleet purchases to be fuel efficient vehicles for their intended use based on the fuel type, design, size, and cost efficiency.*
- *Require that new development projects in Ontario that require demolition prepare a demolition plan to reduce waste by recycling and/or salvaging a nonhazardous construction and demolition debris.*
- *Require that new developments design buildings to be energy efficient by siting buildings to take advantage of shade, prevailing winds, landscaping, and sun screening to reduce energy required for cooling.*
- *Require that cool roofs for non-residential development and cool pavement to be incorporated into the site/building design for new development where appropriate.*
- *Evaluate the feasibility of implementing a Public Transit Fee to support Omnitrans in developing additional transit service in the City.*

- *Require diesel emission reduction strategies to eliminate and/or reduce idling at truck stops, warehouses, and distribution facilities throughout the City.*
- *Install energy efficient lighting and lighting control systems in all municipal buildings.*
- *Require all new traffic lights installed be energy efficient traffic signals. Require the use of reclaimed water for landscape irrigation in all new development and on public property where such connections are within the service boundaries of the City's reclaimed water system.*
- *Require all new landscaping irrigation systems installed within the City to be automated, high-efficient irrigation systems to reduce water use and require use of bubbler irrigation; low-angle, low-flow spray heads; or moisture sensors. Conduct energy efficiency audits of existing municipal buildings by checking, repairing, and readjusting heating, ventilation, and air conditioning systems, lighting, water heating equipment, insulation, and weatherization.*
- *Ensure that its local Climate Action, Land Use, Housing, and Transportation Plans are aligned with, support, and enhance any regional plans that have been developed consistent with state guidance to achieve reductions in GHG emissions.*
- *Mitigate climate change by decreasing heat gain from pavement and other hard surfaces associated with infrastructure.*
- *Reduce heat gain from pavement and other similar hardscaping.*
- *Work with appropriate agencies to create an interconnected transportation system that allows a shift in travel from private passenger vehicles to alternative modes, including public transit, ride sharing, car-sharing, bicycling and walking.*

- *Provide safe and convenient access for pedestrians and bicyclists to, across, and along major transit priority streets.*
- *Facilitate employment opportunities that minimize the need for private vehicle trips, by:*
 - *Amending zoning ordinances and the Development Code to include live/work sites and satellite work centers in appropriate locations.*
- *Encouraging telecommuting options with new and existing employers, through project review and incentives, as appropriate.*
- *Establish policies and programs to reduce onsite parking demand and promote ridesharing and public transit at large events.*
- *Support and promote the use of low-and zero-emission vehicles, by:*
 - *Encouraging the necessary infrastructure to facilitate the use of zero emission vehicles and clean alternative fuels, such as electric vehicle charging facilities and conveniently located alternative fueling stations.*
 - *Encouraging new construction to include vehicle access to properly wired outdoor receptacles to accommodate ZEV and/or plug in electric hybrids (PHEV).*
 - *Encouraging transportation fleet standards to achieve the lowest emissions possible, using a mix of alternate fuels, PZEV or better fleet mixes.*
 - *Establishing incentives, as appropriate, to taxicab owners to use alternative fuel or gas-electric hybrid vehicles.*

- *Establish green building requirements and standards for new development and redevelopment projects, and work to provide incentives for green building practices and remove barriers that impede their use.*
- *Allow increased height limits and/or flexibility in other standards for projects that incorporate energy efficient green building practices where not prohibited by Airport Land Use Compatibility Plan (ALUCP)/Federal Aviation Administration (FAA).*
- *Identify and remove regulatory or procedural barriers to implementing green building practices within its jurisdiction, such as updating codes, guidelines, and zoning, and ensure that all plan review and building inspection staff are trained in green building materials, practices, and techniques.*
- *Support the use of green building practices by:*
 - *Providing information, marketing, training, and technical assistance about green building practices.*
 - *Adopting a Green Building ordinance with guidelines for green building practices in residential and commercial development.*
- *Adopt energy efficiency performance standards for buildings designed to achieve a greater reduction in energy and water use than currently required by state law, including:*
 - *Standards for the installation of "cool roofs".*
 - *Standards for improved overall efficiency of lighting systems.*
 - *Requirements for the use of Energy Star appliances and fixtures in discretionary new development.*

- *Encourage the performance of energy audits for residential and commercial buildings prior to completion of sale, and that audit results and information about opportunities for energy efficiency improvements be presented to the buyer.*
- *Establish policies and programs that facilitate the siting of new renewable energy generation.*
- *Require that any building constructed in whole or in part with City funds incorporate passive solar design features, such as daylighting and passive solar heating, where feasible.*
- *Prepare and implement a comprehensive plan to improve energy efficiency of municipal facilities, including:*
 - *Conducting energy audits.*
 - *Retrofitting municipal facilities for energy efficiency where feasible and when remodeling or replacing components, including increased insulation, installing green or reflective roofs and low-emissive window glass.*
 - *Implementing an energy tracking and management system for its municipal facilities.*
 - *Installing energy-efficient exit signs, street signs, and traffic lighting, subject to life/safety considerations.*
 - *Installing energy-efficient lighting retrofits and occupancy sensors, and institute a "lights out at night" policy, subject to life/safety considerations.*
 - *Retrofitting heating and cooling systems to optimize efficiency (e.g., replace chillers, boilers, fans, pumps, belts, etc.).*
 - *Installing Energy Star® appliances and energy-efficient vending machines.*

- *Improving water use efficiency, including a schedule to replace or retrofit system components with high-efficiency units (i.e., ultra-low-flow toilets, fixtures, etc.).*
- *Installing irrigation control systems which maximize water use efficiency and minimize off-peak use.*
- *Adopting an accelerated replacement schedule for energy inefficient systems and components.*
- *Insure that staff receives appropriate training and support to implement objectives and policies to reduce GHG emissions, including:*
 - *Providing energy efficiency training to design, engineering, building operations, and maintenance staff.*
 - *Providing information on energy use and management, including data from the tracking and management system, to managers and others making decisions that influence energy use.*
 - *Providing energy design review services to departments undertaking new construction or renovation projects, to facilitate compliance with LEED standards.*
- *Maximize efficiency at drinking water treatment, pumping, and distribution facilities, including development of off-peak demand schedules for heavy commercial and industrial users.*
- *Establish a replacement policy and schedule to replace fleet vehicles and equipment with the most fuel-efficient vehicles practical, including gasoline hybrid and alternative fuel or electric models.*
- *Require the installation of outdoor electrical outlets on buildings to support the use,*

where practical, of electric lawn and garden equipment, and other tools that would otherwise be run with small gas engines or portable generators.

- *Implement measures to reduce employee vehicle trips and to mitigate emissions impacts from municipal travel.*
- *Conduct a comprehensive inventory and analysis of the urban forest, and coordinate tree maintenance responsibilities with all responsible departments, consistent with best management practices.*
- *Evaluate existing landscaping and options to convert reflective and impervious surfaces to landscaping, and will install or replace vegetation with drought-tolerant, low-maintenance native species or edible landscaping that can also provide shade and reduce heat-island effects.*
- *Implement enhanced programs to divert solid waste from landfill operations, by:*
 - *Establishing a diversion target which meets or exceeds AB 939 requirements.*
 - *Promoting and expanding recycling programs, purchasing policies, and employee education to reduce the amount of waste produced.*
- *Reduce per capita water consumption consistent with state law by 2020.*
- *Establish a water conservation plan that may include such policies and actions as:*
 - *Maintaining and refining the City's tiered rate structure for water use.*
 - *Establishing restrictions on time of use for landscape watering, or other demand management strategies.*

- *Establishing performance standards for irrigation equipment and water fixtures, consistent with state law.*
 - *Establish programs and policies to increase the use of recycled water, including:*
 - *Promoting the use of recycled water for agricultural, industrial, and irrigation purposes, including grey water systems for residential irrigation.*
 - *Ensure that building standards and permit approval processes promote and support water conservation, by:*
 - *Establishing building design guidelines and criteria to promote water efficient building design, including minimizing the amount of non-roof impervious surfaces around the building(s).*
 - *Establishing menus and check-lists for developers and contractors to ensure water-efficient infrastructure and technology are used in new construction, including low-flow toilets and shower heads, moisture-sensing irrigation, and other such advances.*
 - *Organize workshops on waste reduction activities for the home or business, such as backyard composting, or office paper recycling, and shall schedule recycling dropoff events and neighborhood chipping/mulching days.*
 - *Organize workshops on steps to increase energy efficiency in the home or business, such as weatherizing the home or building envelope, installing smart lighting systems, and how to conduct a self-audit for energy use and efficiency.*
- 6-3 *The City of Ontario will amend the Municipal Code within 18 months after adopting The Ontario Plan, with provisions implementing the following GHG emission reduction concepts:*

- *Increase densities in urban core areas to support public transit, by, among other means:*
 - *Removing barriers to the development of accessory dwelling units in existing residential neighborhoods.*

- *Reduce required road width standards wherever feasible to calm traffic and encourage alternative modes of transportation.*

- *Add bicycle facilities to city streets and public spaces, where feasible.*

- *Promote infill, mixed-use, and higher density development, and provide incentives to support the creation of affordable housing in mixed use zones.*

- *Plan for and create incentives for mixed-use development.*

- *Identify sites suitable for mixed-use development and establish appropriate site-specific standards to accommodate mixed uses which could include:*
 - *Increasing allowable building height or allow height limit bonuses, in appropriate areas and where safe to do so.*

 - *Allowing flexibility in applying development standards (such as FAR2 and lot coverage) based on the location, type, and size of the units, and the design of the development.*

 - *Allowing reduced and shared parking based on the use mix, and availability of and proximity to public transit stops.*

 - *Allowing for tandem parking, shared parking and off-site parking leases.*

- *Enable prototype mixed-use structures for use in neighborhood center zones that can be adapted to new uses over time with minimal internal remodeling.*

- *Identify and facilitate the inclusion of complementary land uses not already present in local zoning districts, such as supermarkets, parks and recreational fields, schools in neighborhoods, and residential uses in business districts, to reduce the vehicle miles traveled and promote bicycling and walking to these uses.*
- *Revise zoning ordinance(s) to allow local-serving businesses, such as childcare centers, restaurants, banks, family medical offices, drug stores, and other similar services near employment centers to minimize midday vehicle use.*
- *Develop form-based community design standards to be applied to development projects and land use plans, for areas designated mixed-use.*
- *Implement a Housing Overlay Zone for residential properties at transit centers and along transit corridors. This may include average minimum residential densities of 25 units per acre within one quarter miles of transit centers; average minimum densities of 15 units per acre within one quarter mile of transit corridors; and minimum FAR of 0.5:1 for non-residential uses within a quarter mile of transit centers or corridors.*
- *Identify transit centers appropriate for mixed-use development, and promote transit oriented, mixed-use development within these targeted areas, by:*
 - *Providing maximum parking standards and flexible building height limitations.*
 - *Providing density bonus programs.*
 - *Establishing guidelines for private and public spaces for transit-oriented and mixed-use development.*
 - *Discouraging auto-oriented development.*
- *Ensure new development is designed to make public transit a viable choice for residents, including:*

- *Locating medium to high density development near activity centers that can be served efficiently by public transit and alternative transportation modes.*
- *Locating medium to high density development near streets served by public transit whenever feasible.*
- *Linking neighborhoods to bus stops by continuous sidewalks or pedestrian paths.*
- *Develop form-based community design standards to be applied to development projects and land use plans, for areas designated mixed-use.*
- *Create and preserve distinct, identifiable neighborhoods whose characteristics support pedestrian travel, especially within, but not limited to, mixed-use and transit-oriented development areas, by:*
 - *Designing or maintaining neighborhoods where the neighborhood amenities can be reached in approximately five minutes of walking.*
 - *Encouraging pedestrian-only streets and/or plazas within developments, and destinations that may be reached conveniently by public transportation, walking, or bicycling.*
 - *Allowing flexible parking strategies in neighborhood activity centers to foster a pedestrian-oriented streetscape.*
 - *Providing continuous sidewalks with shade trees and landscape strips to separate pedestrians from traffic.*
 - *Encouraging neighborhood parks and recreational centers near concentrations of residential areas (preferably within one quarter mile) and include pedestrian walkways and bicycle paths that encourage nonmotorized travel.*

- *Ensure pedestrian access to activities and services, especially within, but not limited to, mixed-use and transit-oriented development areas, by:*
 - *Ensuring new development that provides pedestrian connections in as many locations as possible to adjacent development, arterial streets, thoroughfares.*
 - *Ensuring a balanced mix of housing, workplaces, shopping, recreational opportunities, and institutional uses, including mixed-use structures.*
 - *Locating schools in neighborhoods, within safe and easy walking distances of residences served.*
 - *Encouraging new development in which primary entrances are pedestrian entrances, with automobile entrances and parking located to the rear.*
 - *Supporting development where automobile access to buildings does not impede pedestrian access, by consolidating driveways between buildings or developing alley access.*
 - *Utilizing street parking as a buffer between sidewalk pedestrian traffic and the automobile portion of the roadway.*
 - *Prioritizing the physical development of pedestrian connectors for existing areas that do not meet established connectivity standards.*
- *Mitigate climate change by decreasing heat gain from pavement and other hard surfaces associated with infrastructure.*
- *Reduce heat gain from pavement and other similar hardscaping, by:*
 - *Including low-water landscaping in place of hardscaping around transportation infrastructure and in parking areas.*

- *Establishing standards that provide for pervious pavement options.*
- *Removing obstacles to natural, drought tolerant landscaping and low-water landscaping.*
- *Coordinate with appropriate agencies to create an interconnected transportation system that allows a shift in travel from private passenger vehicles to alternative modes, including public transit, ride sharing, car-sharing, bicycling and walking, including, but not limited to:*
 - *Providing safe and convenient access for pedestrians and bicyclists to, across, and along major transit priority streets.*
- *Upgrade and maintain the following transit system infrastructure to enhance public use, including:*
 - *Ensuring transit stops and bus lanes are safe, convenient, clean and efficient.*
 - *Ensuring transit stops have clearly marked street-level designation, and are accessible.*
 - *Ensuring transit stops are safe, sheltered, benches are clean, and lighting is adequate.*
 - *Working with transit providers to place transit stations along transit corridors within mixed-use or transit-oriented development areas at intervals appropriate for the mode of transit.*
- *Facilitate employment opportunities that minimize the need for private vehicle trips, by:*
 - *Amending zoning ordinances and the Development Code to include live/work sites and satellite work centers in appropriate locations.*

- *Encouraging telecommuting options with new and existing employers, through project review and incentives, as appropriate.*
- *Establish standards for new development and redevelopment projects to support bicycle use, including:*
 - *Amending the Development Code to include standards for pedestrian and bicyclist accommodations, including:*
 - *Providing access for pedestrians and bicyclist to public transportation through construction of dedicated paths, where feasible.*
 - *Requiring new development and redevelopment projects to include bicycle facilities, as appropriate with the new land use, including:*
 - *Where feasible, promote the construction of weatherproof bicycle facilities and at a minimum, provide bicycle racks or covered, secure parking near the building entrances.*
- *Establish a network of multi-use trails to facilitate direct off-street bicycle and pedestrian travel, and will provide bike racks along these trails at secure, lighted locations.*
- *Establish policies and programs to reduce onsite parking demand and promote and public transit at large events.*
- *Require new commercial and retail developments to provide prioritized parking for electric vehicles and vehicles using alternative fuels.*
- *Support and promote the use of low-and zero-emission vehicles (NEV), by:*

- *Encouraging the necessary infrastructure to facilitate the use of zero emission vehicles and clean alternative fuels, such as electric vehicle charging facilities and conveniently located alternative fueling stations.*
- *Encouraging new construction to include vehicle access to properly wired outdoor receptacles to accommodate ZEV and/or plug in electric hybrids (PHEV).*
- *Encouraging transportation fleet standards to achieve the lowest emissions possible, using a mix of alternate fuels, PZEV or better fleet mixes.*
- *Establishing incentives, as appropriate, to taxicab owners to use alternative fuel or gas-electric hybrid vehicles.*

- *Establish green building requirements and standards for new development and redevelopment projects, and work to provide incentives for green building practices and remove barriers that impede their use.*
- *Allow increased height limits and/or flexibility in other standards for projects that incorporate energy efficient green building practices where not prohibited by ALUCP/FAA.*

- *Identify and remove regulatory or procedural barriers to implementing green building practices within its jurisdiction, such as updating codes, guidelines, and zoning, and ensure that all plan review and building inspection staff are trained in green building materials, practices, and techniques.*

- *Support the use of green building practices by:*
 - *Establishing guidelines for green building practices in residential and commercial development.*

- *Providing incentives, which may include reduction in development fees, administrative fees, and/or expedited permit processing for projects that use green building practices.*

- *Adopt energy efficiency performance standards for buildings that achieve a greater reduction in energy and water use than otherwise required by current state law, including:*
 - *Standards for the installation of "cool roofs".*

 - *Standards for improved overall efficiency of lighting systems.*

 - *Requirements for the use of Energy Star appliances and fixtures in discretionary new development.*

 - *Requirements for new residential lots and/or structures to be arranged and oriented to maximize effective use of passive solar energy.*

- *Require that affordable housing development incorporate energy efficient design and features to the maximum extent feasible.*

- *Identify possible sites for production of renewable energy (such as solar, wind, small hydro, and biogas).*

- *Identify and remove or otherwise address barriers to renewable energy production, including:*
 - *Reviewing and revising building and development codes, design guidelines, and zoning ordinances to remove renewable energy production barriers.*

- *Working with related agencies, such as fire, water, health and others that may have policies or requirements that adversely impact the development or use of renewable energy technologies.*
- *Developing protocols for safe storage of renewable and alternative energy products with the potential to leak, ignite or explode, such as biodiesel, hydrogen, and/or compressed air.*
- *Allow renewable energy projects in areas zoned for open space, where consistent with the Land Use element, and other uses and values.*
- *Promote and encourage renewable energy generation, and co-generation projects where feasible and appropriate.*
- *Require that, where feasible, all new buildings be constructed to allow for easy, cost effective installation of solar energy systems in the future, using such “solar-ready” features as:*
 - *Optimal roof orientation (between 20 to 55 degrees from the horizontal), with sufficient south-sloped roof surface, where such buildings architecture and construction are designed for sloped roofs.*
 - *Clear access without obstructions (chimneys, heating and plumbing vents, etc.) on the south sloped roof.*
 - *Roof framing that will support the addition of solar panels.*
 - *Installation of electrical conduit to accept solar electric system wiring.*
 - *Installation of plumbing to support a solar hot water system and provision of space for a solar hot water storage tank.*

- *Require that any building constructed in whole or in part with City funds incorporate passive solar design features, such as daylighting and passive solar heating, where feasible.*

- *Prepare and implement a comprehensive plan to improve energy efficiency of municipal facilities, including:*
 - *Conducting energy audits.*

 - *Retrofitting municipal facilities for energy efficiency where feasible and when remodeling or replacing components, including increased insulation, installing green or reflective roofs and low-emissive window glass.*

 - *Implementing an energy tracking and management system for its municipal facilities.*

 - *Installing energy-efficient exit signs, street signs, and traffic lighting, subject to life/safety considerations.*

 - *Installing energy-efficient lighting retrofits and occupancy sensors, and institute a "lights out at night" policy, subject to life/safety considerations.*

 - *Retrofitting heating and cooling systems to optimize efficiency (e.g., replace chillers, boilers, fans, pumps, belts, etc.).*

 - *Installing Energy Star® appliances and energy-efficient vending machines.*

 - *Improving water use efficiency, including a schedule to replace or retrofit system components with high-efficiency units (i.e., ultra-low-flow toilets, fixtures, etc.).*

 - *Installing irrigation control systems maximizing water use efficiency and minimizing off-peak use.*

- *Adopting an accelerated replacement schedule for energy inefficient systems and components.*
- *Require that any newly constructed, purchased, or leased municipal space meet minimum standards, such as:*
 - *The Energy Star® New Homes Program established by U.S. EPA.*
 - *The incorporation of passive solar design features in new buildings, including daylighting and passive solar heating.*
- *Reduce per capita water consumption consistent with state law by 2020.*
- *Establish a water conservation plan that may include such policies and actions as:*
 - *Maintaining and refining the City's tiered rate structure for water use.*
 - *Establishing restrictions on time of use for landscape watering, or other demand management strategies.*
 - *Establishing performance standards for irrigation equipment and water fixtures, consistent with State Law.*
- *The City will establish programs and policies to increase the use of recycled water, including:*
 - *Promoting the use of recycled water for agricultural, industrial, and irrigation purposes, including grey water systems for residential irrigation.*
- *Ensure that building standards and permit approval processes promote and support water conservation, by:*

- *Establishing building design guidelines and criteria to promote water efficient building design, including minimizing the amount of non-roof impervious surfaces around the building(s).*
- *Establishing menus and check-lists for developers and contractors to ensure water-efficient infrastructure and technology are used in new construction, including low-flow toilets and shower heads, moisture-sensing irrigation, and other such advances.*
- *Install water-efficient landscapes and irrigation, including:*
 - *Requiring planting drought-tolerant and native species, and covering exposed dirt with moisture-retaining mulch or other materials such as decomposed granite.*
 - *Requiring the installation of water-efficient irrigation systems and devices, including advanced technology such as moisture-sensing irrigation controls.*
- *Promote the planting of shade trees and establish shade tree guidelines and specifications, including:*
 - *Establishing guidelines for tree planting based on the land use (residential, commercial, parking lots, etc.).*
 - *Establishing guidelines for tree types based on species size, branching patterns, whether deciduous or evergreen, whether roots are invasive, etc.*
 - *Establishing tree guidelines for placement, including distance from structures, density of planting, and orientation relative to structures and the sun.*
- *Develop an Urban Forestry Program to consolidate policies and ordinances regarding tree planting, maintenance, and removal, including:*

- *Establishing guidelines for tree planting, including criteria for selecting deciduous or evergreen trees low-VOC-producing trees, and emphasizing the use of drought-tolerant native trees and vegetation.*

6-4 *Measures listed in Mitigation Measure 6-2 and 6-3 shall be considered by the City while reviewing all new development, as appropriate, between the time of adoption of The Ontario Plan and adoption of the Climate Action Plan (CAP).*

6-5 *Pursuant to a goal of overall consistency with the Sustainable Communities Strategies, the City of Ontario shall evaluate new development for consistency with the development pattern set forth in the Sustainable Communities Strategies plan, upon adoption of the plan by the Southern California Association of Governments.*

6-6 *The City of Ontario shall participate in the County of San Bernardino’s Green Valley Initiative.*

Addendum Project: GHG emissions of the Addendum Project were modeled employing the latest version of the California Emissions Estimator Model™ (CalEEMod™ v2016.3.2), and are presented at Table 8-1.

**Table 8-1
Addendum Project GHG Emissions**

Emission Source	Emissions (MT/yr.)			
	CO ₂	CH ₄	N ₂ O	Total CO ₂ E
Annual construction-related emissions amortized over 30 years	49.40	0.01	0.00	49.54
Area Source	0.05	1.30e-04	0.00	0.05
Energy Source	3,033.56	0.10	0.04	3,046.87
Mobile Source	5,798.31	0.33	0.00	5,805.44
On-Site Equipment	101.68	0.03	0.00	102.50
Waste	181.17	10.71	0.00	448.84
Water Usage	733.12	5.35	0.13	905.91
Total CO₂E (All Sources)	10,359.16			

Source: *The Vine Air Quality, Greenhouse Gas & Health Risk Assessment Memorandum* (Urban Crossroads, Inc.) October 5, 2020.

As shown at Table 8-1, the Addendum Project would generate a total of approximately 10,359.16 MTCO_{2e} per year. Table 8-2 compares these emissions with those identified within the Certified EIR.

Table 8-2
GHG Emissions Comparison

Emission Source	Annual Emissions (MTCO_{2e})
Addendum Project	10,359.16
Certified EIR	29,046.98
Variance	-18,687.82

Source: *The Vine Air Quality, Greenhouse Gas & Health Risk Assessment Memorandum* (Urban Crossroads, Inc.) October 5, 2020.

As shown above, the Addendum Project would result in a net decrease in GHG emissions when compared to the GHG emissions assumed within the Certified EIR. The Addendum Project would therefore not result in new or substantively different or substantively increased GHG emissions impacts.

Addendum Project Mitigation Measures: None.

Sources: *The Ontario Plan Draft Environmental Impact Report, State Clearinghouse No. 2008101140* (The Planning Center) April 2009; *The Vine Air Quality, Greenhouse Gas & Health Risk Assessment Memorandum* (Urban Crossroads, Inc.) October 5, 2020; Addendum Project Design Concepts.

9. HAZARDS AND HAZARDOUS MATERIALS

Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?					X	
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?					X	
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within ¼ mile of an existing or proposed school?					X	
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?					X	
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?					X	
f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?					X	
g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?					X	

Substantiation:

a-c) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR determined that buildout in accordance with The Ontario Plan would involve the transport, use, and/or disposal of hazardous materials; however, these activities would be in compliance with federal, state, and local regulations thus precluding significant impacts in this regard. (Certified EIR, p. 5.8-24).

Certified EIR Mitigation Measures: None.

Addendum Project: The Addendum Project would not result in or cause exposure(s) to hazards or potentially hazardous conditions. That is, uses proposed under the Project are not considered hazardous.

During the normal course of construction and operation activities, there would be limited transport of potentially hazardous materials (e.g., gasoline, diesel fuel, paints, solvents, fertilizer, etc.) to and from the Addendum Project site. However, as presented within the Certified EIR, the Project would be required to comply with all City and County Hazardous Materials Management Plans and regulations addressing transport, use, storage and disposal of these materials. The Addendum Project does not propose or require uses or activities that would result in atypical transportation, use, storage, or disposal of hazardous or potentially hazardous materials not addressed under current regulations and policies.

Further, any occupancies that would store or use hazardous materials would be required to comply with California Hazardous Materials Business Plan (HMBP) requirements (*California Health & Safety Code, Division 20, Chapter 6.95*) The HMBP contains detailed information on the storage of hazardous materials at regulated facilities. The purpose of the HMBP is to prevent or minimize damage to public health, safety, and the environment, from a release or threatened release of a hazardous material. The HMBP also provides emergency response personnel with adequate information to help them better prepare and respond to chemical-related incidents at regulated facilities.

Based on the preceding, no new or substantially increased impacts in this regard would occur as a result of the Addendum Project.

Addendum Project Mitigation Measures: None.

d) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: Many properties within the City of Ontario are included on State and federal lists of registered hazardous materials sites. The Certified EIR concluded that compliance with federal, state, and local regulations would ensure these properties would not cause significant impacts. (Certified EIR, p. 5.8-25).

Certified EIR Mitigation Measures: None.

Addendum Project: Based on information contained within the EnviroStor database, maintained by the Department of Toxic Substance Control (DTSC, <http://www.envirostor.dtsc.ca.gov/>), the Addendum site is not on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5. As such, no new or substantially increased impacts in this regard would occur as a result of the Addendum Project.

Addendum Project Mitigation Measures: None.

e) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: Airport Influence Areas for Ontario International Airport (ONT), as well as Chino Airport property, are located within the City of Ontario. The Certified EIR determined that consistency reviews of new development with the appropriate Airport Land Use Compatibility Plan (ALUCP) would be sufficient to prevent significant impacts. (Certified EIR, p. 5.8-27).

Certified EIR Mitigation Measures: None.

Addendum Project: The Addendum site is within the ONT Airport Influence Area (AIA). Specifically, the site is located approximately 1.9 miles southerly of ONT and approximately 2.8 miles from the nearest runway (RW 8R-26L). The ALUCP for ONT defines the AIA as an area in which current and future airport-related noise, overflight, safety, and airspace protection factors may significantly affect land uses or necessitate restriction on those uses. The Project site is located outside the ONT safety zones⁶ and the Chino Airport safety zones⁷. As with the development anticipated within the Certified EIR, development implemented pursuant to the Addendum Project would comply with all requirements set forth within the ALUCP. Based on the preceding, no new or substantially increased impacts in this regard would occur as a result of the Addendum Project.

Addendum Project Mitigation Measures: None.

f) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The City manages disaster preparedness through the Technical Services Bureau of the Ontario Fire Department, which is responsible for the preparation of the community for disasters and the organization of recovery efforts. The Fire Department also works with other local public departments, such as the San Bernardino County Fire Department Hazardous Materials Division and, if necessary, the Countywide HazMat Team of the County Environmental Health Department, to enact these principles and to protect the community in the event of a disaster.

Additionally, the City maintains a Local Hazard Mitigation Plan and participates in the Standardized Emergency Management System (SEMS) as required under Government Code Section 8607(a).

The Certified EIR concluded that buildout in accordance with The Ontario Plan would not significantly affect these resources. (Certified EIR, p. 5.8-28).

⁶ http://www.ont-iac.com/wp-content/uploads/2019/02/ONT-compatibility-Exhibit-8-_July-2018-Amendment.pdf

⁷ <https://dot.ca.gov/-/media/dot-media/programs/aeronautics/documents/californiaairportlanduseplanninghandbook-a11y.pdf>

Certified EIR Mitigation Measures: None.

Addendum Project: The Addendum Project would not cause permanent alteration to vehicle circulation routes, and would not interfere with any identified emergency response or emergency evacuation plan. In accordance with existing City policies, coordination with the local fire and police departments during pre-construction review of the Project's plans will ensure that potential interference with emergency response and evacuation efforts are avoided. No new or substantially increased impacts regarding emergency response plans or emergency evacuation plans would occur as a result of the Addendum Project.

Addendum Project Mitigation Measures: None.

g) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR determined that adherence to existing regulations and review of building plans by the Ontario Fire Department would reduce risks from urban and wildland fire threats to the City. No significant impacts were identified. (Certified EIR, p. 5.8-32).

Certified EIR Mitigation Measures: None.

Addendum Project: The Addendum Project site is located in an urbanized area, and no wildlands are located in the vicinity of the site. Fire protection services are provided to the City and the Project site by the Ontario Fire Department. Preconstruction coordination with Fire Department staff and adherence to local fire department regulations during construction and operation of the Project will be required. As such, no new or substantially increased impacts in this regard would occur as a result of the Addendum Project.

Addendum Project Mitigation Measures: None.

Sources: The Ontario Plan Draft Environmental Impact Report, State Clearinghouse No. 2008101140 (The Planning Center) April 2009; Addendum Project Design Concepts.

10. HYDROLOGY AND WATER QUALITY

Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Violate any other water quality standards or waste discharge requirements or potential for discharge of storm water pollutants from areas of material storage, vehicle or equipment fueling, vehicle or equipment maintenance (including washing), waste handling, hazardous materials handling or storage, delivery areas or loading docks, or other outdoor work areas?					X	
b) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?					X	
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:					X	
(i) result in substantial erosion or siltation on- or off-site?					X	
(ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite?						

Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
(iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?					X	
(iv) impede or redirect flood flows?					X	
d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?					X	
e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?						X

Substantiation:

a) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR noted that although buildout of The Ontario Plan would increase concentrations of pollutants during construction and post-construction activities, future projects would be required to prepare a Water Quality Management Plan (WQMP) identifying Best Management Practices (BMPs) to reduce pollutants, including site-design, source-control, and/or treatment BMPs. The Certified EIR did not identify any significant impacts in this regard. (Certified EIR, p. 5.9-23).

Certified EIR Mitigation Measures: None.

Addendum Project: A WQMP has been prepared for The Vine (southern) portion of the Addendum site (*Water Quality Management Plan For: Toscana Square 20-Acre Site Ontario, CA [Kimley-Horn] October 2019*), and is provided at Attachment C to this Addendum.

Similarly, a WQMP for the remaining portion will be prepared as part of future development plans. The WQMP for the southern portion identifies applicable BMPs to be implemented by The Vine Project.

Buildout of the entire Addendum site would occur in compliance with erosion control measures, including grading and dust control measures, imposed via City grading permit regulations. Operations would comply with the National Pollutant Discharge Elimination System (NPDES) permit requirements. The NPDES requirements include, but are not limited to: minimizing stormwater pollutants of concern; containing properly designed outdoor material storage areas; containing properly designed trash storage areas; and providing proof of ongoing BMP maintenance.

Based on the preceding, the Addendum Project's potential to violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality is considered less-than-significant; no new or substantially increased water quality impacts would occur as a result of the Addendum Project.

Addendum Project Mitigation Measures: None.

b) No Changes or New Information Requiring Preparation of an MND or EIR.

Certified EIR Conclusions: The Certified EIR acknowledged that development pursuant to The Ontario Plan would increase the amount of impervious surface within the City; however, groundwater recharge efforts would not be hindered. Future development projects would be required to prepare project-specific hydrology studies, implement BMPs for compliance with NPDES regulations, and comply with City policies promoting infiltration of runoff and groundwater recharge. (Certified EIR, pp. 5.9-19 – 5.9-20).

Certified EIR Mitigation Measures: None.

Addendum Project: Direct additions or withdrawals of groundwater are not proposed by the Addendum Project. Construction proposed by the Project would not involve

massive substructures at depths that would significantly impair or alter the direction or rate of flow of groundwater.

A Hydrology Report has been prepared for The Vine (southern) portion of the Addendum Project site (*Preliminary Drainage Report, Toscana Square, San Bernardino County, California* [Kimley Horn] October 2019), and is provided at Attachment C to this Addendum. The drainage study identifies the use of dry wells within the site. Dry wells are used to capture runoff water and allow it to percolate into the ground. This minimizes drainage and water quality impacts to the municipal drainage system and allows for groundwater recharge.

A specific hydrology study addressing the northern portion will be prepared concurrently with future development plans. It is assumed that similar water percolation features will be utilized within the northern portion of the Addendum site.

The Addendum Project would not contribute to groundwater depletion or interfere with groundwater recharge to an environmentally significant degree. No new or substantially increased groundwater impacts would occur as a result of the Addendum Project.

Addendum Project Mitigation Measures: None.

c) No Changes or New Information Requiring Preparation of an MND or EIR.

Certified EIR Conclusions: Consistent with NPDES requirements, post-development runoff quantities would not be permitted to substantially increase as a result of a development project considered for approval under The Ontario Plan. In this regard, projects would be required to prepare project-specific hydrology studies. Further, existing City policies encourage the use of low impact development strategies to intercept runoff, slow the discharge rate, increase infiltration and ultimately reduce discharge volumes to traditional storm drain systems.

The Certified EIR notes that while the amount of impervious surfaces would be increased under The Ontario Plan (and thus surface water flows into drainage systems), existing

City and County requirements would ensure significant impacts do not occur. (Certified EIR, p. 5.9-19).

Certified EIR Mitigation Measures: None.

Addendum Project: Existing drainage patterns onsite would be retained. The Vine portion of the Addendum site will utilize a series of inlets that will retain runoff volume in six underground detention vaults to decrease the post-development peak flows. Additionally, the development will employ the use of dry wells to capture runoff.

These drainage facilities have been sized to accommodate drainage for the entire Addendum Project site, and limit the post-development peak flows to 80 percent of the pre-development peak flows. No new or substantially increased drainage impacts would occur as a result of the Addendum Project.

Addendum Project Mitigation Measures: None.

d) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR concluded that, although inundation within the City is possible, the gently sloping terrain and emergency procedures in place would preclude significant hazards in this regard. (Certified EIR, pp. 5.9-23 through 5.9-24).

Certified EIR Mitigation Measures: None.

Addendum Project: According to Figure S-2, *Flood Hazards* of The Ontario Plan, the Addendum site is not located within a floodplain, near any drainage basins or channels, or within a dam inundation area. No new or substantially increased inundation impacts would occur as a result of the Addendum Project.

Addendum Project Mitigation Measures: None.

e) *No Impact.*

Certified EIR Conclusions: This checklist item was not specifically addressed within the Certified EIR.

Certified EIR Mitigation Measures: Not Applicable.

Addendum Project: The Addendum Project would not conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan. The Project would have no impact in this regard.

Addendum Project Mitigation Measures: None.

Sources: The Ontario Plan Draft Environmental Impact Report, State Clearinghouse No. 2008101140 (The Planning Center) April 2009; Water Quality Management Plan For: Toscana Square 20-Acre Site Ontario, CA (Kimley-Horn) October 2019; Preliminary Drainage Report, Toscana Square, San Bernardino County, California (Kimley Horn) October 2019; Addendum Project Design Concepts.

11. LAND USE AND PLANNING

Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Physically divide an established community?					X	
b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?					X	

Substantiation:

a, b) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR concludes that implementation of The Ontario Plan would not result in significant land use impacts. (Certified EIR, p. 5.10-31).

Certified EIR Mitigation Measures: None.

Addendum Project: No established community is located on the site. To accommodate the Addendum Project, the site's land use designations would be amended. Tables 11-1 and 11-2 detail the breakdown of amended land use and zoning designations.

**Table 11-1
Existing and Proposed Land Use Designations**

Parcel	Existing TOP Land Use Designation	Existing Acreage	Proposed TOP Land Use Designation	Proposed Acreage
1083-361-01	Mixed Use	20.0	Industrial General Commercial	15.0 5.0
1083-361-04	Mixed Use	9.4	Industrial General Commercial	6.8 2.6
1083-361-07	Mixed Use Open Space Non-Recreation	11.95 3.75	Industrial Open Space Non-Recreation	11.95 3.75
Total				45.1

**Table 11-2
Existing and Proposed Zoning Designations**

Parcel	Existing Zoning Designation	Existing Acreage	Proposed Zoning Designation	Proposed Acreage
1083-361-01	Specific Plan	20.0	IL, Light Industrial CC, Community Commercial	15.0 5.0
1083-361-04	LDR-5, Low Density Residential CC, Community Commercial	8.1 1.3	IL, Light Industrial CC, Community Commercial	6.8 2.6
1083-361-07	CC, Community Commercial OS-R, Open Space Recreation	11.95 3.75	IL, Light Industrial OS-R, Open Space Recreation	11.95 3.75
Total				45.1

Table 11-3 presents a comparison between the maximum allowable FAR assumed within the General Plan and what is being proposed by the Addendum Project.

Table 11-3
Comparison of Assumed and Proposed FAR

Land Use	General Plan Assumption (Maximum Allowable)	Proposed Addendum Project
Industrial	n/a	0.47 FAR 697,150 square feet
Commercial	0.25 FAR 254,499 square feet	0.08 FAR 26,700 square feet
Office	1.5 FAR 669,735 square feet	n/a
Residential	25 du/ac 185 units total	n/a
Total	924,234 square feet	723,850 square feet

Land use goals, plans, policies, and regulations germane to the Project include the City of Ontario General Plan and Zoning Ordinance. The Addendum Project would comport to requirements and standards of the IL (Light Industrial), CC (Community Commercial), and OS-R (Open Space) zones. On this basis, and with the incorporation of any applicable mitigation measures identified within Table 5.1-1 of this Addendum, the potential for the Project to conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect is considered less-than-significant.

Addendum Project Mitigation Measures: None.

Sources: The Ontario Plan Draft Environmental Impact Report, State Clearinghouse No. 2008101140 (The Planning Center) April 2009; Addendum Project Design Concepts.

12. MINERAL RESOURCES

Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?					X	
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?					X	

Substantiation:

a, b) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR concludes that implementation of The Ontario Plan would have no potential to result in the loss of a known mineral resource of value to the region or the state; or result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan. (Certified EIR, p. 5.11-7).

Certified EIR Mitigation Measures: None.

Addendum Project: Underlying conditions at the subject site have not changed since preparation of the Certified EIR, and the site remains devoid of any potentially valuable or locally-important mineral resources. On this basis, the Addendum Project would have no potential to result in the loss of a known mineral resource of value to the region or the state; or result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan. No new or substantially increased mineral resources impacts would occur as a result of the Addendum Project.

Addendum Project Mitigation Measures: None.

Sources: The Ontario Plan Draft Environmental Impact Report, State Clearinghouse No. 2008101140 (The Planning Center) April 2009; Addendum Project Design Concepts.

13. NOISE

Would the project result in:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?					X	
b) Generation of excessive groundborne vibration or groundborne noise levels?					X	
c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?					X	

Substantiation:

a) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR determined that new development implemented pursuant to The Ontario Plan would result in an increase in traffic on local roadways, and substantially increase the existing noise environment. Additionally, because construction activities associated with new development may occur near noise-sensitive receptors and noise disturbances may occur for prolonged periods of time, construction noise

impacts were considered potentially significant. Even with the implementation of Mitigation Measures 12-1 and 12-4, the potential for a substantial temporary or permanent increase in ambient noise levels was considered a significant and unavoidable impact of The Ontario Plan. (Certified EIR, p. 5.12-41).

Certified EIR Mitigation Measures:

12-1 Prior to the issuance of building permits for any project that involves a noise-sensitive use within the 65 dBA CNEL contour along major roadways, freeways, railroads, or the Los Angeles/Ontario International Airport, the project property owner/developers shall retain an acoustical engineer to conduct an acoustic analysis and identify, where appropriate, site design features (e.g., setbacks, berms, or sound walls) and/or required building acoustical improvements (e.g., sound transmission class rated windows, doors, and attic baffling), to ensure compliance with the City's Noise Compatibility Criteria and the California State Building Code and California Noise Insulation Standards (Title 24 and 21 of the California Code of Regulations).

12-4 Construction activities associated with new development that occurs near sensitive receptors shall be evaluated for potential noise impacts. Mitigation measures such as installation of temporary sound barriers for adjacent construction activities that occur adjacent to occupied noise-sensitive structures, equipping construction equipment with mufflers, and reducing nonessential idling of construction equipment to no more than five minutes shall be incorporated into the construction operations to reduce construction-related noise to the extent feasible.

Addendum Project: To evaluate the noise levels associated with the Addendum Project, a Noise Impact Assessment was conducted⁸, and is presented as Attachment D to this Addendum. The following discussions summarize the findings of the Noise Impact Assessment.

⁸ *The Vine Noise Impact Assessment Memorandum* (Urban Crossroads, Inc.) October 6, 2020.

Noise Standards

Construction

The City of Ontario has set restrictions to control noise impacts associated with construction. Construction noise would be considered significant if construction activities occurring outside of the hours specified (7:00 AM and 6:00 PM weekdays and 9:00 AM to 6:00 PM weekends, excluding federal holidays) or if construction activities substantially elevate the ambient noise environment at noise-sensitive uses for a substantial period. It is assumed that the Addendum Project construction activities would comply with the City approved hour of activity restrictions, thereby precluding construction activities during noise-sensitive time periods. To present a conservative approach, this analysis nonetheless evaluates construction noise based on the 65 dBA Leq exterior noise level limit for the neighboring residential land uses (Noise Zone I).

Operational

The City of Ontario requires that noise from new stationary sources in the City comply with the City's Noise Ordinance, which limits the acceptable noise at the property line of the impacted property, to reduce nuisances to sensitive land uses. For Manufacturing and Industrial land uses (Noise Zone V), such as the Addendum Project, ambient exterior noise levels may not exceed 70 dBA Leq. For residential land uses (Noise Zone I), ambient exterior noise levels may not exceed 65 dBA Leq during the daytime hours (7:00 a.m. to 10:00 p.m.), and may not exceed 45 dBA Leq during the nighttime hours (10:00 p.m. to 7:00 a.m.).

Ambient Conditions

To assess the existing noise level environment, five 24-hour noise level measurements were taken at noise sensitive receiver locations in the Addendum Project study area. Table 13-1 presents the ambient noise measurements. Please also refer to Noise Impact Assessment Exhibit C, *Noise Measurement Locations*.

Table 13-1
Ambient Noise Measurements

Location	Description	Energy Average Noise Level (dBA Leq)	
		Daytime	Nighttime
L1	Located on McCloud River Lane behind an existing single-family home at 3968 Klamath River Drive.	55.8	52.8
L2	Located near the intersection of Merced River Road and McCloud River Lane in the nearby single-family residential neighborhood.	54.5	54.8
L3	Located north of East Riverside Drive and south of the single-family home at 2965 McCloud River Lane.	56.8	55.2
L4	Located near Mill Creek Avenue west of the single-family home at 3935 E. Lindenwood Drive.	59.9	57.8
L5	Located south of East Riverside Drive and east of the single-family home at 4097 E. Auburn Way.	55.1	54.8

Source: *The Vine Noise Impact Assessment Memorandum* (Urban Crossroads, Inc.) October 6, 2020.

Sensitive Receivers

To assess the potential for short-term construction and long-term operational impacts, the following five receiver locations, shown at Noise Impact Assessment Exhibit D, *Sensitive Receiver Locations*, were identified as representative locations for analysis.

R1: Located approximately 196 feet west of the Project site, R1 represents an existing residential home located at 3977 Yuba River Drive in the City of Ontario. A 24-hour noise level measurement was taken near this location, L1, to describe the existing ambient noise environment.

R2: Location R2 represents the existing single-family residential home at 2913 McCloud River Lane located roughly 285 feet west of the Project site in the City of Ontario. A 24-hour noise level measurement was taken near this location, L2, to describe the existing ambient noise environment.

R3: Located approximately 287 feet west of the Project site across the power transmission lines, R3 represents an existing residential home at 2965 McCloud River Lane in the City of

Ontario. L3 represents the nearest 24-hour noise level measurement taken near this location to describe the existing ambient noise environment.

R4: Location R4 represents the Colony High School located approximately 1,731 feet south west of the Project site at 3850 E. Riverside Drive. The 24-hour noise level measurement location L4 is used to describe the existing ambient noise environment.

R5: Located approximately 294 feet south of the Project site across E. Riverside Drive, R5 represents an existing single-family residential home at 4097 E. Auburn Way in the City of Ontario. A 24-hour noise level measurement was taken near this location, L5, to describe the existing ambient noise environment.

Construction Noise Impacts

To describe the Addendum Project construction noise levels, measurements were collected for similar activities at several construction sites. Based on the reference construction noise levels, noise levels associated with construction of the Addendum Project were estimated as presented at Table 13-2.

Table 13-2
Construction Equipment Noise Level Summary

Location	Construction Noise Levels (dBA Leq)		
	Highest Construction Noise Levels	Threshold	Threshold Exceeded?
R1	62.7	65	No
R2	59.5	65	No
R3	59.4	65	No
R4	43.8	65	No
R5	59.2	65	No

Source: The Vine Noise Impact Assessment Memorandum (Urban Crossroads, Inc.) October 6, 2020.

As shown at Table 13-2, the construction noise levels will satisfy the City of Ontario exterior noise level limit of 65 dBA Leq for the neighboring residential land uses (Noise Zone I).

Operational Noise Impacts

To assess the highest potential noise conditions, the analysis assumes the Addendum Project would be operational 24 hours per day, seven days per week. The Addendum Project business operations would primarily be conducted within the enclosed buildings, except for traffic movement, parking, and the loading/unloading of trucks at designated loading bays. The onsite Project-related noise sources are expected to include: short term truck idling, delivery truck activities, backup alarms, and the loading/unloading of dry goods, roof-top air conditioning units, and parking lot vehicle movements.

Table 13-3 presents the combined total Project-only operational noise level projections at the nearby sensitive receiver locations in comparison with the City of Ontario Municipal Code exterior noise level standards.

Table 13-3
Operational Noise Level Compliance

Location	Noise Sources			Combined Operational Noise Levels	Noise Level Standard		Threshold Exceeded	
	Unloading/Docking Activity	Roof-Top A/C Unit	Parking Lot Movements		Day time	Night time	Day time	Night time
R1	36.0	35.3	27.0	39.0	65	45	No	No
R2	36.9	30.8	25.6	38.1	65	45	No	No
R3	35.3	28.4	24.6	36.4	65	45	No	No
R4	24.7	17.6	13.1	25.7	65	45	No	No
R5	33.9	28.1	24.2	35.3	65	45	No	No

Source: The Vine Noise Impact Assessment Memorandum (Urban Crossroads, Inc.) October 6, 2020.

As shown above, the Addendum Project operational noise levels at the nearby sensitive receiver locations are expected to range from 25.7 to 39.0 dBA Leq. Based on the results of this analysis, the Addendum Project operational noise levels will satisfy the City of Ontario Municipal Code 65 dBA Leq daytime and 45 dBA Leq nighttime exterior noise level standards at nearby noise sensitive single-family residential land uses.

Operational noise levels that comply with applicable standards do not comprise a substantial permanent increase in ambient noise levels, or a substantial temporary or periodic increase in ambient noise levels.

Off-Site Traffic Noise Impacts

To describe the potential off-site traffic noise associated with the Addendum Project, a Trip Generation Analysis Comparison was prepared.⁹ Trip generation for the Addendum Project was compared to trip generation that would occur under the development of the subject site envisioned under The Ontario Plan. As detailed at Section 17, *Transportation*, the Addendum Project is anticipated to generate 15,299 fewer trip-ends per day (with 326 fewer AM and 1,100 fewer PM peak hour trips) than those assumed within the Certified EIR. This equates to a 34% reduction during the AM, 62% reduction during the PM peak hours, and a 71% reduction to daily trip-ends.

In 2019, the land uses envisioned for the Addendum site were modified within the Land Use Element of TOP. These changes were based on previous land use approvals for the Addendum site. The modified uses included multi-family residential, retail, and office uses. The Addendum Project is anticipated to generate 12,870 fewer trip-ends per day (with 333 fewer AM and 1,194 fewer PM peak hour trips) as compared to the uses currently envisioned for the site. This equates to a 33% reduction during the AM, 64% reduction during the PM peak hours, and a 68% reduction to daily trip-ends.

Based on the preceding, the Addendum Project would result in far fewer daily trips than either those assumed within the Certified EIR, or when compared to the land uses currently approved for the site. Reduced traffic generation under the Addendum Project would translate to diminished traffic noise impacts when compared to impacts identified in the Certified EIR. The Certified EIR concluded that development of land uses pursuant to The Ontario Plan would result in significant and unavoidable transportation-source noise impacts. Under the Addendum Project, transportation-source noise impacts would be diminished when compared to impacts presented in the Certified EIR. On this basis, when compared to the Certified EIR findings, no new or substantially increased transportation-source noise impacts would occur under the Addendum Project.

⁹ *The Vine Trip Generation Evaluation* (Urban Crossroads, Inc) September 24, 2020.

Summary

The Certified EIR concluded that development of land uses pursuant to The Ontario Plan would result in significant and unavoidable noise impacts. As presented in the preceding discussions, under the Addendum Project, noise impacts would be less-than-significant. On this basis, when compared to the Certified EIR findings, no new or substantially increased noise impacts would occur under the Addendum Project.

Addendum Project Mitigation Measures: None.

b) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR determined that mobile-source and operational vibration impacts associated with buildout of The Ontario Plan would be less-than-significant. However, construction activities associated with buildout of the individual land uses could expose sensitive uses to strong levels of groundborne vibration. Additionally, sensitive land uses along the Union Pacific railroad corridor would be exposed to strong levels of groundborne vibration. Even with the implementation of Mitigation Measure 12-1, the Certified EIR concluded that construction-source groundborne vibration would be a significant and unavoidable impact. Impacts related to the Union Pacific railroad corridor would be less-than-significant, as mitigated. (Certified EIR, pp. 5.12-40 – 5.12-42).

Certified EIR Mitigation Measures:

12-2 *Individual projects that involve vibration-intensive construction activities, such as pile drivers, jack hammers, and vibratory rollers, occurring near sensitive receptors shall be evaluated for potential vibration impacts. If construction-related vibration is determined to be perceptible at vibration-sensitive uses (i.e., exceed the Federal Transit Administration vibration-annoyance criteria of 78 VdB during the daytime), additional requirements, such as use of less vibration intensive equipment or construction techniques, shall be implemented during construction (e.g., drilled piles to eliminate use of vibration-intensive pile driver).*

12-3 *Prior to the issuance of building permits for any project that involves a vibration-sensitive use directly adjacent to the Union Pacific Railroad or Southern California Regional Rail Authority*

main lines shall retain an acoustical engineer to evaluate potential for trains to create perceptible levels of vibration indoors. If vibration-related impacts are found, mitigation measures, such as use of concrete, iron, or steel, or masonry materials to ensure that levels of vibration amplification are within acceptable limits to building occupants, shall be implemented. Pursuant to the Federal Transit Administration vibration-annoyance criteria, these acceptable limits are 78 VdB during the daytime and 72 VdB during the nighttime for residential uses, 84 VdB for office uses, and 90 VdB for workshops.

Addendum Project:

Construction Vibration

Construction activity can result in varying degrees of ground vibration, depending on the equipment and methods used, distance to the affected structures and soil type. It is expected that groundborne vibration from construction activities would cause only intermittent, localized intrusion. The Addendum Project's construction activities most likely to cause vibration impacts are:

- **Heavy Construction Equipment:** Although all heavy mobile construction equipment has the potential of causing at least some perceptible vibration, the vibration is usually short-term and is not of sufficient magnitude to cause building damage. It is not expected that heavy equipment such as large bulldozers would operate close enough to any residences to cause a vibration impact.
- **Trucks:** Trucks hauling building materials to construction sites can be sources of vibration intrusion if the haul routes pass through residential neighborhoods on streets with bumps or potholes. Repairing the bumps and potholes generally eliminates the problem.

Groundborne vibration levels resulting from construction activities occurring within the Project site were estimated by data published by the Federal Transit Administration (FTA), as shown at Table 13-4.

Table 13-4
Construction Equipment Vibration Levels

Location	Land Use	Distance to Construction Activity	Receiver Vibration Levels (VdB)					Threshold (VdB)	Threshold Exceeded?
			Small Bulldozer	Jack-hammer	Loaded Trucks	Large Bulldozer	Highest Vibration Levels		
R1	Residential	196'	31.2	52.2	59.2	60.2	60.2	78	No
R2	Residential	285'	26.3	47.3	54.3	55.3	55.3	78	No
R3	Residential	287'	26.2	47.2	54.2	55.2	55.2	78	No
R4	School	1,731'	2.8	23.8	30.8	31.8	31.8	78	No
R5	Residential	294'	25.9	46.9	53.9	54.9	54.9	78	No

Source: *The Vine Noise Impact Assessment Memorandum* (Urban Crossroads, Inc.) October 6, 2020.

Table 13-4 shows the highest construction vibration levels are expected to approach 60.2 VdB at sensitive receiver location R1. This vibration level would not exceed the 78 VdB residential identified by the FTA. All other locations would experience vibration levels below those anticipated to affect receiver R1. Moreover, the impacts at the site of the closest sensitive receivers are unlikely to be sustained during the entire construction period but will occur rather only during the times that heavy construction equipment is operating adjacent to the Project site perimeter.

Operational Vibration

The operation of the Addendum Project will include heavy trucks moving on site to and from the loading dock areas. Truck vibration levels are dependent on vehicle characteristics, load, speed, and pavement conditions. Typical vibration levels for heavy trucks at normal traffic speeds do not exceed 65 VdB at 25 feet. Therefore, given that delivery trucks would be traveling on-site at lower speeds, unmitigated Project-related operational vibration levels at the nearby receiver locations are anticipated to remain below 65 VdB. As such, unmitigated Project operational vibration levels would remain below the FTA vibration thresholds of 78 VdB at nearby sensitive receiver locations. On this basis, the operational vibration impacts resulting from transiting heavy trucks would be less-than-significant.

Summary

Based on the preceding, the potential for the Addendum Project to result in the generation of excessive groundborne vibration or groundborne noise levels is considered less-than-

significant. No new or substantially increased impacts would occur as a result of the Addendum Project.

Addendum Project Mitigation Measures: None.

c) No Changes or New Information Requiring Preparation of an MND or EIR.

Certified EIR Conclusions: Aircraft overflights, takeoffs, and landings in the City of Ontario contribute to the ambient noise environment. The Certified EIR concluded that Chino Airport does not significantly affect sensitive receptors within the City of Ontario. However, sensitive land uses within the 65 dba CNEL noise contour of the Ontario International Airport would be exposed to substantial levels of airport-related noise. Even with the implementation of mitigation, airport-related noise was deemed a significant and unavoidable impact of The Ontario Plan. (Certified EIR, pp. 5.12-40 – 5.12-42).

Certified EIR Mitigation Measures: Refer to Mitigation Measure 12-1, above.

Addendum Project: The Addendum Project site is located roughly two miles southeast of the Ontario International Airport (ONT). The Ontario International Airport Land Use Compatibility Plan was adopted by Ontario City Council on April 19, 2011 to promote compatibility between the airport and the land uses that surround it. The Project site is located within the airport influence area exposing the site to exterior noise levels ranging from 60-65 dBA CNEL. The Table 2-3 Noise Criteria established within the Ontario International Airport Land Use Compatibility Plan would apply to the Addendum Project. Industrial land uses located within the 60-65 dBA CNEL noise level contours of ONT, such as the Addendum Project, are considered a normally compatible land use and must reduce interior noise levels to 50 dBA CNEL. Standard building construction practices required under the State of California Green Building Standards Code (CALGreen) typically provide up to 25 dBA CNEL of attenuation. As such, application of standard CALGreen construction practices would yield acceptable Project interior noise levels of approximately 35 to 40 dBA CNEL.

Based on the preceding, the Addendum Project would not be adversely affected by airport/airfield noise, nor would the Addendum Project contribute to or result in adverse

airport/airfield noise impacts. No new or substantially increased impacts would occur as a result of the Addendum Project.

Addendum Project Mitigation Measures: None.

Sources: The Ontario Plan Draft Environmental Impact Report, State Clearinghouse No. 2008101140 (The Planning Center) April 2009; The Vine Noise Impact Assessment Memorandum (Urban Crossroads, Inc.) October 6, 2020; Addendum Project Design Concepts.

14. POPULATION AND HOUSING

Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?					X	
b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?					X	

Substantiation:

a – b) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR concluded that, while The Ontario Plan would increase both population and employment in the City, impacts would be less-than-significant. (Certified EIR pp. 5.13-12 – 5.13-20).

Certified EIR Mitigation Measures: None.

Addendum Project:

Direct Population Growth Inducement

No housing exists within the Addendum Project site. The site does not accommodate any resident populations. The Addendum Project represents a component of development and growth generally anticipated by the City, as reflected by the site's current Land Use designations. Development proposed by the Addendum Project responds globally to existing and anticipated market demands of the City and region.

Indirect Growth Inducement

Indirect population growth inducement could result from creation of additional jobs and the extension of infrastructure and services to areas not currently served, or substantial capacity/capability upgrades to existing systems and services.

Job Creation

In general terms, job creation furthers growth via wages, salaries and general fiscal benefits; increased demands for housing; and increased demands for housing, and consumer goods and services. However, job creation and associated growth would not result in impacts not already considered and addressed in the Certified EIR.

Infrastructure Improvements

The Addendum Project would implement infrastructure improvements that are consistent with the City and purveyor master plans. Growth that may result from or be facilitated by the Addendum Project infrastructure improvements would not result in impacts not previously considered and addressed in the Certified EIR.

SCAG Regional Population Growth Projections

SCAG population growth projections reflect assumptions and development scenarios incorporated in local plans including City general plans. As demonstrated in the preceding discussions, the Project would not induce or generate growth beyond that reflected in the Certified EIR. Accordingly, the Project would not result in growth not already anticipated within SCAG population growth projections for the region.

Summary

Based on the preceding discussions, the Addendum Project would not induce substantial population growth; displace substantial numbers of existing housing; or displace substantial numbers of people. No new or substantially increased population and housing impacts would occur as a result of the Addendum Project.

Addendum Project Mitigation Measures: None.

Sources: The Ontario Plan Draft Environmental Impact Report, State Clearinghouse No. 2008101140 (The Planning Center) April 2009; Addendum Project Design Concepts.

15. PUBLIC SERVICES

Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any public service:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Fire protection?						X
b) Police protection?						X
c) Schools?						X
d) Parks?						X
e) Other public facilities?						X

Substantiation:

a – e) *No Impact.*

Certified EIR Conclusions: Section 5.14, *Public Services*, of the Certified EIR concluded that no significant impacts related to public services would occur.

Certified EIR Mitigation Measures: None.

Addendum Project: The Addendum Project would be constructed within an already-developed urban environment. Fire protection and police protection services are currently available to the subject site via existing facilities. Further, the industrial and commercial uses proposed by the Project would not create substantive additional demands for school or park facilities. Development impact fees and sales tax revenues generated by the Addendum Project would provide funding sources available for support and enhancement of public services commensurate with incremental demands of the development. No new or substantially increased public service impacts would occur as a result of the Addendum Project.

Addendum Project Mitigation Measures: None.

Sources: *The Ontario Plan Draft Environmental Impact Report, State Clearinghouse No. 2008101140* (The Planning Center) April 2009; Addendum Project Design Concepts.

16. RECREATION

Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?					X	
b) Include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?					X	

Substantiation:

a, b) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR determined that because new development would be required to provide sufficient public parkland or pay in-lieu fees, impacts to recreational facilities would be less-than-significant. (Certified EIR, pp. 5.15-12 – 5.15-15).

Certified EIR Mitigation Measures: None.

Addendum Project: The Addendum Project does not propose residential uses or recreational facilities. The proposed industrial and commercial uses would not generate resident populations, and therefore would have no potential to increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated; or to include or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment. Additionally, as discussed within the Certified EIR, the Addendum Project would be required to pay in-lieu fees. No new or substantially increased recreation impacts would occur as a result of the Addendum Project.

Addendum Project Mitigation Measures: None.

Sources: The Ontario Plan Draft Environmental Impact Report, State Clearinghouse No. 2008101140 (The Planning Center) April 2009; Addendum Project Design Concepts.

17. TRANSPORTATION

Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?					X	
b) Conflict or be inconsistent with CEQA Guidelines section 15064.3 ¹⁰ or will conflict with an applicable congestion management program, including, but not limited to, level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?					X	
c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?					X	
d) Result in inadequate emergency access?					X	

Substantiation:

a) *No Changes or New Information Requiring Preparation of an MND or EIR.*

¹⁰ CEQA Guidelines section 15064.3(c) provides that a lead agency “may elect to be governed by the provisions” of the section immediately; otherwise, the section’s provisions apply July 1, 2020. Here, the District has not elected to be governed by Section 15064.3. Accordingly, an analysis of vehicles miles traveled (VMT) is not necessary to determine whether a proposed project will have a significant transportation impact.

Certified EIR Conclusions: The Certified EIR concluded that with the implementation of regulatory requirements, all transportation impacts would be less-than-significant, with the exception of the following:

“Trips generated as a result of buildout of the proposed land use plan would cause a deficient level of service for the existing area intersections without implementation of the recommended lane geometry improvements. In addition, buildout of the proposed land use plan would also cumulatively contribute to the cumulatively significant freeway level of service impact that is already projected to occur in the future.”

The Certified EIR concluded that cumulative impacts in this regard would be significant and unavoidable. More specifically, the Certified EIR states, “Mitigation Measure 16-1 includes development of more enhanced intersections throughout the City, as identified in Table 5.16-6, and construction of additional turn and through lanes. Implementation of these improvements would result in LOS E or above at all intersections during both AM and PM peak hours. These improvements would occur through the entitlement process. Under the City’s development impact fee program, project applicants for new developments can either contribute their fair share toward traffic improvements or make the improvements as part of the project. Additionally, the City of Ontario has a Capitol [*sic*] Improvement Program that details the implementation of regional improvements. With implementation of the mitigation measure, impacts to local roadways would be less than significant. However, buildout of the Proposed Land Use Plan would result in additional traffic volume that would significantly cumulatively contribute to mainline freeway segment impacts. The City’s development impact fees cannot be used for improvements to roadway facilities under Caltrans’ sole jurisdiction, such as freeway mainline segments, and the City cannot widen the freeway itself. Indeed, the widening of a freeway would require the acquisition of additional right-of-way, often at the expense of residential uses, and the high cost financially and socially of such a disruption would render such cumulative mitigation infeasible, even if it were within the City’s jurisdiction. Consequently, impacts to freeway segments within the City under Impact 5.16-1 would be significant and unavoidable.” (Certified EIR, p. 5.16-47).

Certified EIR Mitigation Measure:

16-1 *The Mobility Element of the Ontario Plan shall be consistent with the traffic study prepared by Kimley-Horn and Associates. Table 5.16-6 shows the recommended lane geometry for the Proposed Land Use Plan.*

Addendum Project: Comparative traffic impacts of the Addendum Project can be inferred by comparing the estimated trip generation between the land uses that were assumed within the Certified EIR Traffic Impact Analysis (TIA) to the traffic generation of the Addendum Project land uses. To this end, a Trip Generation Analysis Comparison has been conducted for the Addendum Project.¹¹ The Trip Generation Analysis Comparison is presented as Attachment E to this Addendum.

The trip generation for a development is expressed in vehicle trip ends, defined as one-way vehicular movements, either entering or exiting the generating land use. Trip generation rates for different land uses are typically found in publications by the Institute of Transportation Engineers (ITE) and by local agencies such as San Diego Association of Governments (SANDAG). Trip generation rates for the Project were obtained from ITE's *Trip Generation*, 10th Edition for the peak hours of adjacent street traffic (7 am to 9 am during the morning peak period and 4 pm to 6 pm during the evening peak period), and on a typical weekday.

The Traffic Impact Analysis prepared for the Certified EIR was based on a traffic model that subdivided the City into 254 traffic analysis zones. The Addendum Project site comprises Traffic Analysis Zone (TAZ) 191. Within the Certified EIR, TAZ 191 was assumed to contain over 1.3 million square feet of commercial and retail uses.

Table 17-1 presents a comparison of the trip generation associated with the Addendum Project compared to those assumed under the Certified EIR for TAZ 191.

¹¹ *The Vine Trip Generation Evaluation* (Urban Crossroads, Inc.) September 24, 2020.

Table 17-1
Trip Generation Comparison (General Plan)

Land Use	AM Peak Hour			PM Peak Hour			Daily
	In	Out	Total	In	Out	Total	
Currently Adopted TAZ 191							
Passenger Cars	674	322	996	734	1,037	1,771	21,495
Addendum Project

Variance							
Passenger Cars	-178	-196	-373	-564	-571	-1,135	-16,005
Truck Trips	39	8	47	8	27	35	706
Total Variance (PCE)	-139	-188	-326	-556	-544	-1,100	-15,299

Source: *The Vine Trip Generation Evaluation* (Urban Crossroads, Inc.) September 24, 2020.

As shown above, the Addendum Project is anticipated to generate 15,299 fewer trip-ends per day (with 326 fewer AM and 1,100 fewer PM peak hour trips) than those assumed within the Certified EIR for TAZ 191. This equates to a 34% reduction during the AM, 62% reduction during the PM peak hours, and a 71% reduction to daily trip-ends.

In 2019, the land uses envisioned for the Addendum site were modified within the Land Use Element of TOP. These changes were based on previous land use approvals for the Addendum site. The modified uses included multi-family residential, retail, and office uses.

Table 17-2 presents a comparison of the trip generation associated with the Addendum Project compared to the modified land uses currently approved for the site.

Table 17-2
Trip Generation Comparison (Currently Adopted Land Uses)

Land Use	AM Peak Hour			PM Peak Hour			Daily
	In	Out	Total	In	Out	Total	
Currently Adopted Land Uses							
Passenger Cars	753	250	1,003	686	1,180	1,865	19,066
Addendum Project							
Passenger Cars	496	126	623	170	466	636	5,490
Truck Trips	39	8	47	8	27	35	706
Total Project Trips (PCE)	535	134	670	178	493	671	6,196
Variance							
Passenger Cars	-257	-124	-380	-516	-714	-1,229	-13,576
Truck Trips	39	8	47	8	27	35	706
Total Variance (PCE)	-218	-116	-333	-508	-687	-1,194	-12,870

Source: *The Vine Trip Generation Evaluation* (Urban Crossroads, Inc.) September 24, 2020.

As shown above, the Addendum Project is anticipated to generate 12,870 fewer trip-ends per day (with 333 fewer AM and 1,194 fewer PM peak hour trips) as compared to the uses currently envisioned for the site. This equates to a 33% reduction during the AM, 64% reduction during the PM peak hours, and a 68% reduction to daily trip-ends.

Based on the preceding discussions, the Addendum Project would result in far fewer daily trips than either those assumed within the Certified EIR for TAZ 191 (-71%), or when compared to the land uses currently assumed in TOP for the site (-68%). As such, the Addendum Project would not result in any new or substantially increased impacts that were not identified as part of the Certified EIR.

Addendum Project Mitigation Measures: None.

b) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: *CEQA Guidelines* Section 15064.3, subdivision (b) was added to the *CEQA Guidelines* in 2019. The Vehicle Miles Traveled (VMT) metric established under Section 15064.3 is recognized. The VMT metric is effective as of July 2020. The VMT metric and related provisions were therefore not considered in the Certified EIR.

Certified EIR Mitigation Measures: None.

Addendum Project: The *CEQA Guidelines* Section 15064.3 VMT metric and related provisions have not yet been adopted or implemented by the City. Pending City adoption and implementation of a VMT analysis methodology/VMT thresholds, current jurisdictional LOS analysis methodologies and LOS deficiency criteria are reflected in this Addendum analysis. The Addendum Project would therefore not result in any impacts relative to *CEQA Guidelines* Section 15064.3, subdivision (b).

Addendum Project Mitigation Measures: None.

c – d) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR concluded that although buildout of the of the City would result in changes to the circulation network, it would not increase hazards due to design features. Roadway classification standards adopted by the City include roadway design standards that would preclude the construction of any unsafe features. Additionally, a review of emergency access is included as part of the City's Design Review process. (Certified EIR, p. 5.16-36).

Certified EIR Mitigation Measures: None.

Addendum Project: The Addendum Project does not propose elements or aspects that would substantially increase transportation/traffic hazards. Moreover, all improvements would be designed and implemented consistent with City traffic engineering and safety

standards, thereby minimizing the potential to result in or cause hazardous traffic/transportation conditions.

The Addendum Project would generate urban traffic comparable to and compatible with the vehicle mix and vehicle categories present within the area roadway system. The Project uses would therefore not cause or result in incompatible vehicle movements or traffic that would substantively increase hazards. Further, based on the projected net decrease in trip generation under the Addendum Project, the potential for the Project to result in potential traffic hazards would likely be reduced when compared to the uses assumed within the Certified EIR.

The Addendum Project does not propose or require uses or facilities that would permanently or adversely affect emergency access to the subject or surrounding properties. In conjunction with the review and approval of building permits, all plans would be reviewed to assure compliance with all applicable emergency access and safety requirements.

Additionally, pursuant to the Project Construction Traffic Management Plan (please refer to Addendum Section 2, *Project Description*, 2.4.6 *Construction Traffic Management Plan*), the Addendum Project would be required to maintain appropriate access during construction activities.

Addendum Project Mitigation Measures: None.

Sources: *The Ontario Plan Draft Environmental Impact Report, State Clearinghouse No. 2008101140* (The Planning Center) April 2009; *The Vine Trip Generation Evaluation* (Urban Crossroads, Inc.) September 24, 2020; Addendum Project Design Concepts.

18. TRIBAL CULTURAL RESOURCES

Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or					X	
b) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.					X	

Substantiation:

a, b) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: This environmental topical concern has recently been added to the *CEQA Guidelines* Appendix G, Environmental Checklist Form and was therefore not specifically addressed in the Certified EIR. Impacts to tribal cultural resources were addressed through Section 5.5, *Cultural Resources*, of the Certified EIR. With the implementation of mitigation, the Certified EIR concluded that impacts would be less-than-significant.

Certified EIR Mitigation Measures:

- 5-3 *Upon receipt of an application for a Specific Plan or a project that requires a General Plan amendment subject to CEQA and is within the City's jurisdiction, the City's representative shall consult with the relevant tribe(s)' representative(s) to determine if the proposed project is within a culturally sensitive area to the tribe. If sufficient evidence is provided to reasonably ascertain that the site is within a [tribal] culturally sensitive area, then a cultural resources assessment prepared by an archaeologist shall be required. The findings of the cultural resources assessment shall be incorporated into the CEQA documentation. A copy of the report shall be forwarded to the tribe(s). If mitigation is recommended in the CEQA document, the procedure described in Mitigation Measure 5-4 shall be followed.*
- 5-4 *Prior to the issuance of grading permits for a Specific Plan or project that requires a General Plan amendment for which the CEQA document defines cultural resource mitigation for potential tribal resources, the project applicant shall contact the designated tribe(s) to notify them of the grading, excavation, and monitoring program. The applicant shall coordinate with the City of Ontario and the tribal representative(s) to develop mitigation measures that address the designation, responsibilities, and participation of tribal monitors during grading, excavation, and ground-disturbing activities; scheduling; terms of compensation; and treatment and final disposition of any cultural resources, sacred sites, and human remains discovered on the site. The City of Ontario shall be the final arbiter of the conditions for projects within the City's jurisdiction.*

Addendum Project: As discussed previously at Checklist Item 5, *Cultural Resources*, the Addendum Project would not affect historic, archaeological, or paleontological resources. Consistent with Mitigation Measure 5-3, the City initiated tribal notification on November 19, 2019. In response to information received from the Native American Heritage Commission, additional tribes were notified on December 20, 2019. Of the responses received to date, only the Gabrieleno Band of Mission Indians – Kizh Nation has requested consultation. Moving forward, Certified EIR Mitigation Measure 5-4 will be implemented by the Addendum Project, as presented within the *Mitigation and Implementation Summary Matrix*, shown within Section 5.0 of this Addendum.

Consultation and coordination with relevant tribes, as required by Mitigation Measures 5-3 and 5-4, act to preclude significant impacts to tribal cultural resources. The Addendum Project would not result in any new or substantially increased impacts that were not identified as part of the Certified EIR.

Addendum Project Mitigation Measures: None.

Sources: The Ontario Plan Draft Environmental Impact Report, State Clearinghouse No. 2008101140 (The Planning Center) April 2009; Addendum Project Design Concepts.

19. UTILITIES AND SERVICE SYSTEMS

Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Require or result in the relocation or construction of new or expanded water, wastewater treatment, storm water drainage, electric power, natural gas, or telecommunication facilities, the construction or relocation of which could cause significant environmental effects?					X	
b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?					X	
c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?					X	
d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?					X	

Would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?					X	

Substantiation:

a-c) *No Changes or New Information Requiring Preparation of an MND or EIR.*

Certified EIR Conclusions: The Certified EIR concluded that, although buildout of The Ontario Plan would generate additional wastewater, it would be adequately treated in accordance with Regional Water Quality Control Board and California Department of Public Health requirements. Additionally, storm drainage systems would be expanded to accommodate growth associated with the buildout of The Ontario Plan. Upon implementation of regulatory requirements and standard conditions of approval, impacts in this regard were deemed less-than-significant. (Certified EIR, pp. 5.17-25 and 5.17-28).

The Certified EIR also determined that buildout of The Ontario Plan would create a four percent greater need for water supply than previously assessed in the City of Ontario Urban Water Management Plan (2005). Mitigation Measures 17-1 through 17-3 were included to preclude significant impacts. (Certified EIR, p. 5.17-20).

Certified EIR Mitigation Measures:

17-1 *The City shall include a policy in the Policy Plan that requires water conservation measures for development projects to improve water use efficiency and reduce overall water demand. Reduce potable water demand, through conservation measures, including but not limited to:*

- a) *Work cooperatively with all developers to incorporate conservation measures into project designs (such as those recommended by the California Urban Water Conservation Council).*
- b) *Continue to develop and implement drought contingency plans to assist citizens and businesses reduce water use during water shortages and emergencies.*
- c) *Revise the City Code to include a Water-Efficient Landscape Ordinance to encourage or, as appropriate, require the use of water-efficient landscaping consistent with AB 325.*

17-2 *The City shall include a policy in the Policy Plan that maximizes the use of recycled water as an irrigation (nonpotable) source for landscaping, parks, and other irrigation opportunities in all areas of the City and requires use of recycled water in dual-system office and industrial uses in selected urban areas of the City, where available and feasible.*

17-3 *The City shall include a policy in the Policy Plan that the City participate through the Chino Basin Water Master and the Inland Empire Utilities Agency in regional efforts to develop finding additional sources of water for groundwater recharge, such as capture of stormwater runoff, recycled water, or other sources to ensure that the Chino Basin stays in long-term hydraulic balance and sustainability and that adequate additional local water sources would be available to increase the flexibility of the City's water supply.*

Addendum Project: Assuming a base water demand factor of 2,200 gallons per day/acre for commercial uses and 2,000 gallons per day/acre for industrial uses, development of the Addendum Project would result in a water demand reduction of 53.6 acre-feet per year as compared to the water demand assumed in Certified EIR.¹²

¹² Water Supply Assessment, Meredith International Centre, Albert C. Webb, 2014

**Table 19-1
Water Demand**

	Land Use	Acreage/DU	Water Factor (gpd/acre)	Total Water Use (gal/day)	Total Water Use (acre feet per year)	Water Use Reduction
Existing General Plan						
	Residential	7.4/185	251/DU	46,435	52.0	
	Retail	23.3	2200	51,260	57.0	
	Office	10.2	3400	34,680	38.8	
<i>Total General Plan</i>				132,375	147.8	
Addendum Project						
	Industrial	33.7	2000	67,400	75.5	
	Commercial	7.6	2200	16,720	18.7	
<i>Total Addendum</i>				84,120	94.2	
Difference				(48,255)	(53.6)	(36.7%)

As shown in Table 19-1, implementation of the Addendum Project would result in a 36.7 percent reduction in water demand as compared to the uses assumed within the Certified EIR.

Current development plans for The Vine Project show connections to existing potable and recycled water facilities located adjacent to the site, as illustrated at Figure 2.4-5. All improvements would be constructed and inspected by the City of Ontario. The Project proponents would be required to pay utility and service system connection fees established by the City to support the maintenance and planned improvement of existing infrastructure.

No additional or non-standard treatment is required to meet the Addendum Project's water demands. The Addendum Project would be required to pay applicable water and sewer connection and service fees, which act to fund City improvement plans, operations, and maintenance. The IEUA, as a regional wastewater treatment provider, will determine when and in what manner treatment facilities will be constructed and/or upgraded to meet increasing demands of areawide development, including the incremental demands of the Addendum Project.

The Addendum Project would not result in any new or substantially increased utility or service system impacts not previously identified within the Certified EIR.

Addendum Project Mitigation Measures: None.

d,e) No Changes or New Information Requiring Preparation of an MND or EIR.

Certified EIR Conclusions: The Certified EIR concluded that buildout of The Ontario Plan would be served by landfills with sufficient permitted capacities to accommodate all solid waste disposal needs. Additionally, no conflicts with federal, state, and local management and reduction statutes and regulations related to solid waste were identified. The Certified EIR determined that impacts related to solid waste would be less-than-significant. (Certified EIR, p. 5.17-31).

Certified EIR Mitigation Measures: None.

Addendum Project: Refuse within the City is sent to the West Valley Materials Recovery Facility (MRF) in Fontana for processing, recycling, or landfilling. Most refuse is then transported from the MRF to El Sobrante Landfill in the City of Corona. El Sobrante landfill has a capacity of 184,930,000 tons and is expected to close in 2030.

Solid waste management statutes and regulations applicable to the Addendum Project are summarized below.

City of Ontario Construction & Demolition Recycling Plan (CDRP)

Pursuant to Ontario Municipal Ordinance (OMC) Sec. 6-3.602 *Construction & Demolition Recycling Plan* and the 2016 California Green Building Standards Code (CALGreen), all building and demolition permit applicants are required to prepare and submit a Construction & Demolition Recycling Plan (CDRP) and a Construction & Demolition Recycling Plan (CDRP) Summary Report. OMC Sec. 6-3.602 and CALGreen require all construction and qualifying renovation and demolition projects to divert at least 65% of all generated waste materials. The Addendum Project would be subject to (OMC) Sec. 6-3.602 and CALGreen construction waste diversion mandates. The City oversees

compliance with OMC Sec. 6-3.602 and CALGreen construction waste diversion mandates.

AB 939 - California Integrated Waste Management Act of 1989

Solid waste management is guided by the California Integrated Waste Management Act of 1989 (AB 939), which emphasizes resource conservation through reduction, recycling, and reuse of solid waste. AB 939 requires that localities conduct a Solid Waste Generation Study (SWGS) and develop a Source Reduction Recycling Element (SRRE), providing for a minimum 50 percent reduction in waste sent to landfills. Diversion rates are calculated and tracked by the California Integrated Waste Management Board (Board). Alternatively, the Board can determine that a jurisdiction's "good faith efforts" to implement comprehensive diversion programs have satisfied the requirement even if diversion levels are below 50 percent.

To reduce waste disposal, AB 939 requires every California city and county to divert 50 percent of its waste from landfills. Residential, commercial and governmental waste recycling programs in support of the SRRE have been implemented by the City.

The City is currently meeting or exceeding all AB 939 solid waste diversion targets. The Addendum Project would be required to comply with AB 939 as implemented by the City.

AB 341 - Commercial Recycling

Assembly Bill 341 mandates recycling for businesses producing four or more cubic yards of solid waste per week, and multifamily dwellings of five units or more. Under the law, business must separate recyclables from trash and then either subscribe to City of Ontario recycling services, self-haul their recyclables, or contract with a permitted private recycler. The Addendum Project would be subject to Assembly Bill 341 mandates.

AB 1826 - Commercial Organics Recycling

Under Assembly Bill 1826, businesses are required to arrange for organic recycling services. The Project would be subject to Assembly Bill 1826 mandates.

The California Department of Resources Recycling and Recovery (CalRecycle) oversees both the mandatory commercial recycling program and the mandatory commercial organics recycling program. The City of Ontario supports both bills through public outreach, monitoring of recycling efforts, providing notification to non-compliant businesses, and periodic State reporting.

The Project would be required to comply with the above solid waste management statutes and regulations. The City and CalRecycle would oversee and monitor compliance with applicable solid waste management statutes and regulations.

SB 1383 - Organic Waste Management Requirements

SB 1383 establishes targets to achieve a 50 percent reduction in the level of the statewide disposal of organic waste from the 2014 level by 2020 and a 75 percent reduction by 2025. The law grants CalRecycle the regulatory authority required to achieve the organic waste disposal reduction targets and establishes an additional target that not less than 20 percent of currently disposed edible food is recovered for human consumption by 2025.

The City is currently developing programs and strategies to address the requirements of SB 1383, the Addendum Project would be required to ultimately abide by those requirements.

As stated within the Certified EIR, impacts to solid waste services and facilities from new development such as the Addendum Project are handled through the payment of development impact fees as outlined in the City of Ontario Development Impact Fee Calculation and Nexus Fee Schedules. With the payment of required development impact fees and compliance with existing solid waste regulations, the Addendum Project would not result in any new or substantially increased solid waste impacts not previously identified within the Certified EIR.

Addendum Project Mitigation Measures: None.

Sources: The Ontario Plan Draft Environmental Impact Report, State Clearinghouse No. 2008101140 (The Planning Center) April 2009; Addendum Project Design Concepts.

20. WILDFIRE

If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
a) Substantially impair an adopted emergency response plan or emergency evacuation plan?						X
b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?						X
c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?						X
d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?						X

Substantiation:

a – d) *No Impact.*

Certified EIR Conclusions: This environmental topical concern has been recently added to the *CEQA Guidelines* Appendix G, Environmental Checklist Form and was therefore not specifically addressed in the Certified EIR.

Certified EIR Mitigation Measures: Not Applicable.

Addendum Project: The Addendum Project site, and City of Ontario as a whole, is a densely urbanized area. According to California Department of Forestry and Fire

Protection (CAL FIRE) Fire Hazard Severity Zone Maps, the area is not located within or near a state responsibility area, or within an area classified as a very high fire hazard severity zone.

Fire protection services for the Addendum Project site and vicinity are currently available through the Ontario Fire Department. Adherence to local fire department building and site design requirements, and compliance with codified fire protection and prevention measures during construction and operation of the Addendum Project are required. No new or substantially increased wildfire impacts would occur as a result of the Addendum Project.

Addendum Project Mitigation Measures: None.

Sources: https://osfm.fire.ca.gov/media/6781/fhszs_map62.pdf; Addendum Project Design Concepts.

21. MANDATORY FINDINGS OF SIGNIFICANCE

	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
Does the project: a) Have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?					X	

Does the project:	Substantial Change in Project Requiring Major MND Revisions	Substantial Change in Circumstances Requiring Major MND Revisions	New Information Showing Greater Significant Effects than Previous MND	New Information Showing Ability to Reduce but not Eliminate Significant Effects in Previous MND	No Changes or New Information Requiring Preparation of an MND or EIR	No Impact
b) Have impacts that are individually limited, but cumulatively considerable? (“Cumulatively considerable” means that the incremental effects of a project are considerable when viewed in connection with the effects of the past projects, the effects of other current projects, and the effects of probable future projects.)					X	
c) Have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?					X	

Substantiation:

a – c) *No Changes or New Information Requiring Preparation of an MND or EIR.*

This Addendum defines, describes, compares, and contrasts potential environmental impacts of the Addendum Project in the context of the environmental impacts assessed in the Certified EIR. In so doing, this Addendum substantiates consistency with applicable California Environmental Quality Act (CEQA) Guidelines provisions addressing preparation of an Addendum to a previously-Certified EIR.

As supported by the discussions presented herein, the Addendum Project would not substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory; have impacts that are individually limited, but cumulatively considerable; or have environmental

effects which will cause substantial adverse effects on human beings, either directly or indirectly.

The Addendum Project would not result in or cause any new significant impacts, substantively increased impacts, or substantively different environmental impacts than those previously addressed in the Certified EIR.

4.0 DETERMINATION

4.0 DETERMINATION

As supported by the analysis presented herein, the potential environmental effects of the development allowed by the Addendum Project, and associated required discretionary actions, have been adequately addressed in the Certified EIR. This Addendum provides minor technical changes to the Certified EIR analysis. As such, the development of any further information and analysis is not warranted. Pursuant to the requirements of *CEQA Guidelines* Section 15162 and 15164, the following determinations have been made.

Major Revisions to the Certified EIR Not Required

Based on the preceding analysis and information, there is no evidence that major changes to the Certified EIR are required. This Addendum indicates that there is no new significant or more severe environmental impact, and that the development of the Project described herein would essentially have the same, or reduced, impacts as those described in the Certified EIR.

No Substantial Change in Circumstances Requiring Major Revisions to the Certified EIR

No information exists in the record, or is otherwise available that indicates that there are substantial changes in circumstances that would require major changes to the Certified EIR.

No New Information Showing Greater Significant Effects than Identified in the Certified EIR

This Addendum has considered all available relevant information to determine whether there is new information, which was not available at the time the Certified EIR was prepared, that may indicate that a new significant effect may occur that was not reported in the Certified EIR. As supported by the analysis presented in this Addendum, there is no substantial new information that was not available at the time of

the Certified EIR, indicating that there will be a new, significant impact requiring major revisions of the Certified EIR.

No New Information Showing Ability to Reduce Significant Effects Identified in the Certified EIR

The Addendum analysis substantiates that there are no significant impacts requiring identification of new or additional alternatives to the Addendum Project. The continued implementation of applicable Certified EIR mitigation measures reduce the Project's potentially significant impacts to levels that are less-than-significant.

Summary

The analysis presented in this document substantiates that the analysis presented in the Certified EIR is sufficient to satisfy CEQA requirements for the proposed Addendum Project. That is, with incorporation of mitigation, implementation of the Addendum Project described and evaluated herein will not result in any significant new, different, additional, or substantially increased environmental impacts than were previously considered and addressed in the Certified EIR. As such, environmental assessment of the Addendum Project does not require any major revision of the previously-approved Certified EIR, nor will the development allowed by the Addendum Project result in conditions that would require preparation of further analysis as described in the *CEQA Guidelines*.

5.0 MITIGATION SUMMARY

5.0 MITIGATION SUMMARY

5.1 OVERVIEW

The following Table 5.1-1, *Mitigation and Implementation Summary Matrix*, comprehensively presents mitigation measures incorporated in the Certified EIR, and associated with the development of the Addendum Project described herein.

Within the “Mitigation Measures” column, Mitigation Measures that are no longer required are indicated by ~~strikeout font~~, new Mitigation Measures are indicated by ***bold italic text***. The “Remarks” column identifies status and applicability of Mitigation Measures. Retained or new mitigation measures presented at Table 5.1-1 will be implemented through Project Conditions of Approval or as otherwise deemed appropriate by the City.

At the discretion of the Planning Director, any of the mitigation measures identified at Table 5.1-1 may be modified to respond to conditions and context as they may apply to development proposed by the Addendum Project. Any such discretionary modifications cannot result in any new significant environmental impacts; rather, modifications would ensure compliance and consistency with current City goals, policies, regulations, and development programs/plans.

Table 5.1-1 Mitigation and Implementation Summary Matrix	
Mitigation Measures	Remarks
Aesthetics	
N/A	No mitigation was included within the Certified EIR; No mitigation is required of the Addendum Project.
Agriculture and Forestry Resources	
N/A	No mitigation was included within the Certified EIR; No mitigation is required of the Addendum Project.
Air Quality	
<p>3-1 The City of Ontario Building Department shall require that all new construction projects incorporate all feasible mitigation measures to reduce air quality emissions. Potential measures shall be incorporated as conditions of approval for a project and may include:</p> <ul style="list-style-type: none"> • Requiring fugitive dust control measures that exceed South Coast Air Quality Management District’s Rule 403, such as: <ul style="list-style-type: none"> ○ Requiring use of nontoxic soil stabilizers to reduce wind erosion. ○ Applying water every four hours to active soil-disturbing activities. ○ Tarping and/or maintaining a minimum of 24 inches of freeboard on trucks hauling dirt, sand, soil, or other loose materials. ○ Using construction equipment rated by the United States Environmental Protection Agency as having Tier 3 or higher exhaust emission limits. ○ Ensuring construction equipment is properly serviced and maintained to the manufacturer’s standards. ○ Limiting nonessential idling of construction equipment to no more than five consecutive minutes. ○ Using Super-Compliant VOC paints for coating of architectural surfaces whenever possible. A list of Super-Compliant architectural 	<p>Not Applicable. This is a directive for City staff for implementation during the development approval process; not mitigation measures for the Addendum Project. It is noted that the Addendum Project would not result in air quality impacts not previously addressed as part of the Certified EIR analysis.</p>

Table 5.1-1 Mitigation and Implementation Summary Matrix	
Mitigation Measures	Remarks
<p>coating manufactures can be found on the South Coast Air Quality Management District's website at: http://www.aqmd.gov/prdas/brochures/Super-Compliant_AIM.pdf.</p>	
<p>3-2 The City of Ontario shall evaluate new development proposals within the City and require all developments to include access or linkages to alternative modes of transportation, such as transit stops, bike paths, and/or pedestrian paths (e.g., sidewalks).</p>	<p>Not Applicable. This is a directive for City staff for implementation during the development approval process; not mitigation measures for the Addendum Project. It is noted that the Addendum Project would not result in air quality impacts not previously addressed as part of the Certified EIR analysis.</p>
<p>3-3 The City of Ontario shall evaluate new development proposals within the City for potential incompatibilities with regard to the California Air Resources Board's Air Quality and Land Use Handbook: A Community Health Perspective (April 2005). New development that is inconsistent with the recommended buffer distances shall only be approved if all feasible mitigation measures, such as high efficiency Minimum Efficiency Reporting Value filters have been incorporated into the project design to protect future sensitive receptors from harmful concentrations of air pollutants as a result of proximity to existing air pollution sources.</p>	<p>Not Applicable. This is a directive for City staff for implementation during the development approval process; not mitigation measures for the Addendum Project. It is noted that the Addendum Project would not result in air quality impacts not previously addressed as part of the Certified EIR analysis.</p>
Biological Resources	
<p><i>4-1 Avoidance of Nesting Migratory Birds: If possible, all vegetation removal activities shall be scheduled from August 1 to February 1, which is outside the general avian nesting season. This would ensure that no active nests would be disturbed and that removal could proceed rapidly. If vegetation is to be cleared during the nesting season, all suitable habitat will be thoroughly surveyed within 72 hours prior to clearing for the presence of nesting birds by a qualified biologist (Project Biologist). The Project Biologist shall be approved by the City and retained by the Applicant. The survey results shall be submitted by the Project Applicant to the City Planning Department. If any active nests are detected, the area shall</i></p>	<p>Applicable. This Measure shall be implemented by the Addendum Project.</p>

Table 5.1-1 Mitigation and Implementation Summary Matrix	
Mitigation Measures	Remarks
<p><i>be flagged and mapped on the construction plans along with a minimum 300-foot buffer, with the final buffer distance to be determined by the Project Biologist. The buffer area shall be avoided until, as determined by the Project Biologist, the nesting cycle is complete or it is concluded that the nest has failed. In addition, the Project Biologist shall be present on the site to monitor the vegetation removal to ensure that any nests, which were not detected during the initial survey, are not disturbed.</i></p>	
<p>4-2 Avoidance of Nesting Burrowing Owls: <i>No more than 72 hours prior to any site disturbances, focused surveys for the burrowing owl shall be conducted. If absence of this species is confirmed, project work can proceed. If however, burrowing owl is located on site, the appropriate resource agencies (CDFW and USFWS) shall be contacted. The Project Applicant shall consult with the wildlife agencies regarding the most appropriate methods and timing for removal of owls. As necessary, owls will be actively evicted following agency approved protocols (i.e., placing a one-way door at the burrow entrance to ensure that owls cannot access the burrow once they leave). Any such active eviction shall occur outside of the breeding/nesting season. That is, active eviction shall be accomplished between September 1 and February 15. If more than 30 days has elapsed between owl eviction and completion of clearing and grubbing activities, a subsequent survey for the burrowing owl shall be conducted to ensure that owls have not re-populated the site. Any reoccupation by owls will require subsequent protocol active eviction.</i></p>	<p>Applicable. This Measure shall be implemented by the Addendum Project.</p>
Cultural Resources	
<p>5-1 Historic or potentially historic resources in the City shall be evaluated for historic significance through the City's tier system prior to the issuance of development approvals in the Focus Areas.</p>	<p>Not Applicable. This is a directive for City staff to review projects of historic significance. It is not a mitigation measure for the Addendum Project. It is noted that the Addendum Project would not result in</p>

Table 5.1-1 Mitigation and Implementation Summary Matrix	
Mitigation Measures	Remarks
	cultural resources impacts not previously addressed within the Certified EIR analysis.
<p>5-2 In areas of documented or inferred archaeological and/or paleontological resource presence, City staff shall require applicants for development permits to provide studies to document the presence/absence of such resources. On properties where resources are identified, such studies shall provide a detailed mitigation plan, including a monitoring program and recovery and/or in situ preservation plan, based on the recommendations of a qualified cultural preservation expert. The mitigation plan shall include the following requirements:</p> <p>a) Archaeologists and/or paleontologist shall be retained for the project and will be on call during grading and other significant ground disturbing activities.</p> <p>b) Should any cultural/scientific resources be discovered, no further grading shall occur in the area of the discovery until the Planning Director is satisfied that adequate provisions are in place to protect these resources.</p> <p>c) Unanticipated discoveries shall be evaluated for significance by a San Bernardino County Certified Professional Archaeologist/Paleontologist. If significance criteria are met, then the project shall be required to perform data recovery, professional identification, radiocarbon dates, and other special studies; submit materials to a museum for permanent curation; and provide a comprehensive final report including catalog with museum numbers.</p>	<p>Not Applicable. This is a directive for City staff to require archaeological and paleontological resource studies as part of the development review process. This is not a mitigation measure for the Addendum Project. It is noted that the Addendum Project would not result in cultural resources impacts not previously addressed within the Certified EIR analysis.</p>
<p>5-3 Upon receipt of an application for a Specific Plan or a project that requires a General Plan amendment subject to CEQA and is within the City's jurisdiction, the City's representative shall consult with the relevant tribe(s)' representative(s) to determine if the proposed project is within a culturally sensitive area to the tribe. If sufficient</p>	<p>Applicable. This Measure would be implemented by the Addendum Project.</p>

Table 5.1-1 Mitigation and Implementation Summary Matrix	
Mitigation Measures	Remarks
evidence is provided to reasonably ascertain that the site is within a [tribal] culturally sensitive area, then a cultural resources assessment prepared by an archaeologist shall be required. The findings of the cultural resources assessment shall be incorporated into the CEQA documentation. A copy of the report shall be forwarded to the tribe(s). If mitigation is recommended in the CEQA document, the procedure described in Mitigation Measure 5-4 shall be followed.	
5-4 Prior to the issuance of grading permits for a Specific Plan or project that requires a General Plan amendment for which the CEQA document defines cultural resource mitigation for potential tribal resources, the project applicant shall contact the designated tribe(s) to notify them of the grading, excavation, and monitoring program. The applicant shall coordinate with the City of Ontario and the tribal representative(s) to develop mitigation measures that address the designation, responsibilities, and participation of tribal monitors during grading, excavation, and ground-disturbing activities; scheduling; terms of compensation; and treatment and final disposition of any cultural resources, sacred sites, and human remains discovered on the site. The City of Ontario shall be the final arbiter of the conditions for projects within the City's jurisdiction.	Applicable. This Measure would be implemented by the Addendum Project.

**Table 5.1-1
Mitigation and Implementation Summary Matrix**

Mitigation Measures	Remarks
Greenhouse Gas Emissions	
<p>6-1 The City of Ontario shall prepare a Climate Action Plan within 18 months after adopting The Ontario Plan. The goal of the Climate Action Plan shall be to reduce GHG emissions from all activities within the City boundaries to support the State’s efforts under AB 32 and to mitigate the impact of climate change on the City, State, and world. Once completed, the City shall update The Ontario Plan and associated policies, as necessary, to be consistent with the Climate Action Plan and prepare a subsequent or supplemental Environmental Impact Report, if new significant impacts are identified. The Climate Action Plan shall include the following:</p> <ul style="list-style-type: none"> • Emission Inventories: The City shall establish GHG emissions inventories including emissions from all sectors within the City, using methods approved by, or consistent with guidance from, the CARB; the City shall update inventories every 3 years or as determined by state standards to incorporate improved methods, better data, and more accurate tools and methods, and to assess progress. If the City is not on schedule to achieve the GHG reduction targets, additional measures shall be implemented, as identified in the CAP. • The City shall establish a baseline inventory of GHG emissions including municipal emissions, and emissions from all business sectors and the community. • The City shall define a “business as usual” scenario of municipal, economic, and community activities, and prepare a projected inventory for 2020 based on that scenario. 	<p>Not Applicable. This is a directive for City staff to prepare a Climate Action Plan. This is not a mitigation measure for the Addendum Project. It is noted that the Addendum Project would not result in GHG impacts not previously addressed as part of the Certified EIR analysis.</p>

**Table 5.1-1
Mitigation and Implementation Summary Matrix**

Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Emission Targets: The City will develop Plans to reduce or encourage reductions in GHG emissions from all sectors within the City: • A Municipal Climate Action Plan which shall include measures to reduce GHG emissions from municipal activities by at least 30 percent by 2020 compared to the "business as usual" municipal emissions (including any reductions required by the California Air Resource Board under AB 32. • A Business Climate Action Plan in collaboration with the business community, which shall include measures to reduce GHG emissions from business activities, and which shall seek to reduce emissions by at least 30 percent by 2020 compared to "business as usual" business emissions. • A Community Climate Action Plan in collaboration with the stakeholders from the community at large, which shall include measures reduce GHG emissions from community activities, and which shall seek to reduce emissions by at least 30 percent by 2020 compared to "business as usual" community emissions. 	
<p>6-2 The Climate Action Plan shall include specific measures to achieve the GHG emissions reduction targets identified in Mitigation Measure 6.1. The Climate Action Plan shall quantify the approximate greenhouse gas emissions reductions of each measure and measures shall be enforceable. Measures listed below, along with others, shall be considered during the development of the Climate Action Plan (CAP):</p> <ul style="list-style-type: none"> • Require all new or renovated municipal buildings to seek Silver or higher Leadership in Energy and Environmental Design (LEED) 	<p>Not Applicable. This is a directive for City staff during the preparation of the Climate Action Plan. This is not a mitigation measure for the Addendum Project. It is noted that the Addendum Project would not result in GHG impacts not previously addressed as part of the Certified EIR analysis.</p>

**Table 5.1-1
Mitigation and Implementation Summary Matrix**

Mitigation Measures	Remarks
<p>standard, or compliance with similar green building rating criteria.</p> <ul style="list-style-type: none"> • Require all municipal fleet purchases to be fuel efficient vehicles for their intended use based on the fuel type, design, size, and cost efficiency. • Require that new development projects in Ontario that require demolition prepare a demolition plan to reduce waste by recycling and/or salvaging a nonhazardous construction and demolition debris. • Require that new developments design buildings to be energy efficient by siting buildings to take advantage of shade, prevailing winds, landscaping, and sun screening to reduce energy required for cooling. • Require that cool roofs for non residential development and cool pavement to be incorporated into the site/building design for new development where appropriate. • Evaluate the feasibility of implementing a Public Transit Fee to support Omnitrans in developing additional transit service in the City. • Require diesel emission reduction strategies to eliminate and/or reduce idling at truck stops, warehouses, and distribution facilities throughout the City. • Install energy efficient lighting and lighting control systems in all municipal buildings. 	

**Table 5.1-1
Mitigation and Implementation Summary Matrix**

Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Require all new traffic lights installed be energy efficient traffic signals. Require the use of reclaimed water for landscape irrigation in all new development and on public property where such connections are within the service boundaries of the City's reclaimed water system. • Require all new landscaping irrigation systems installed within the City to be automated, high-efficient irrigation systems to reduce water use and require use of bubbler irrigation; low-angle, low-flow spray heads; or moisture sensors. Conduct energy efficiency audits of existing municipal buildings by checking, repairing, and readjusting heating, ventilation, and air conditioning systems, lighting, water heating equipment, insulation, and weatherization. • Ensure that its local Climate Action, Land Use, Housing, and Transportation Plans are aligned with, support, and enhance any regional plans that have been developed consistent with state guidance to achieve reductions in GHG emissions. • Mitigate climate change by decreasing heat gain from pavement and other hard surfaces associated with infrastructure. • Reduce heat gain from pavement and other similar hardscaping. • Work with appropriate agencies to create an interconnected transportation system that allows a shift in travel from private passenger vehicles to alternative modes, including public transit, ride sharing, car sharing, bicycling and walking. • Provide safe and convenient access for pedestrians and bicyclists to, across, and along major transit priority streets. 	

**Table 5.1-1
Mitigation and Implementation Summary Matrix**

Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Facilitate employment opportunities that minimize the need for private vehicle trips, by: • Amending zoning ordinances and the Development Code to include live/work sites and satellite work centers in appropriate locations. • Encouraging telecommuting options with new and existing employers, through project review and incentives, as appropriate. • Establish policies and programs to reduce onsite parking demand and promote ridesharing and public transit at large events. • Support and promote the use of low and zero emission vehicles, by: • Encouraging the necessary infrastructure to facilitate the use of zero emission vehicles and clean alternative fuels, such as electric vehicle charging facilities and conveniently located alternative fueling stations. • Encouraging new construction to include vehicle access to properly wired outdoor receptacles to accommodate ZEV and/or plug in electric hybrids (PHEV). • Encouraging transportation fleet standards to achieve the lowest emissions possible, using a mix of alternate fuels, PZEV or better fleet mixes. • Establishing incentives, as appropriate, to taxicab owners to use alternative fuel or gas electric hybrid vehicles. 	

**Table 5.1-1
Mitigation and Implementation Summary Matrix**

Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Establish green building requirements and standards for new development and redevelopment projects, and work to provide incentives for green building practices and remove barriers that impede their use. • Allow increased height limits and/or flexibility in other standards for projects that incorporate energy efficient green building practices where not prohibited by Airport Land Use Compatibility Plan (ALUCP)/Federal Aviation Administration (FAA). • Identify and remove regulatory or procedural barriers to implementing green building practices within its jurisdiction, such as updating codes, guidelines, and zoning, and ensure that all plan review and building inspection staff are trained in green building materials, practices, and techniques. • Support the use of green building practices by: <ul style="list-style-type: none"> • Providing information, marketing, training, and technical assistance about green building practices. • Adopting a Green Building ordinance with guidelines for green building practices in residential and commercial development. • Adopt energy efficiency performance standards for buildings designed to achieve a greater reduction in energy and water use than currently required by state law, including: <ul style="list-style-type: none"> • Standards for the installation of "cool roofs". • Standards for improved overall efficiency of lighting systems. 	

Table 5.1-1 Mitigation and Implementation Summary Matrix	
Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Requirements for the use of Energy Star appliances and fixtures in discretionary new development. • Encourage the performance of energy audits for residential and commercial buildings prior to completion of sale, and that audit results and information about opportunities for energy efficiency improvements be presented to the buyer. • Establish policies and programs that facilitate the siting of new renewable energy generation. • Require that any building constructed in whole or in part with City funds incorporate passive solar design features, such as daylighting and passive solar heating, where feasible. • Prepare and implement a comprehensive plan to improve energy efficiency of municipal facilities, including: <ul style="list-style-type: none"> • Conducting energy audits. • Retrofitting municipal facilities for energy efficiency where feasible and when remodeling or replacing components, including increased insulation, installing green or reflective roofs and low emissive window glass. • Implementing an energy tracking and management system for its municipal facilities. • Installing energy efficient exit signs, street signs, and traffic lighting, subject to life/safety considerations. 	

**Table 5.1-1
Mitigation and Implementation Summary Matrix**

Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Installing energy efficient lighting retrofits and occupancy sensors, and institute a "lights out at night" policy, subject to life/safety considerations. • Retrofitting heating and cooling systems to optimize efficiency (e.g., replace chillers, boilers, fans, pumps, belts, etc.). • Installing Energy Star® appliances and energy efficient vending machines. • Improving water use efficiency, including a schedule to replace or retrofit system components with high efficiency units (i.e., ultra-low flow toilets, fixtures, etc.). • Installing irrigation control systems which maximize water use efficiency and minimize off-peak use. • Adopting an accelerated replacement schedule for energy inefficient systems and components. • Insure that staff receives appropriate training and support to implement objectives and policies to reduce GHG emissions, including: • Providing energy efficiency training to design, engineering, building operations, and maintenance staff. • Providing information on energy use and management, including data from the tracking and management system, to managers and others making decisions that influence energy use. 	

**Table 5.1-1
Mitigation and Implementation Summary Matrix**

Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Providing energy design review services to departments undertaking new construction or renovation projects, to facilitate compliance with LEED standards. • Maximize efficiency at drinking water treatment, pumping, and distribution facilities, including development of off peak demand schedules for heavy commercial and industrial users. • Establish a replacement policy and schedule to replace fleet vehicles and equipment with the most fuel efficient vehicles practical, including gasoline hybrid and alternative fuel or electric models. • Require the installation of outdoor electrical outlets on buildings to support the use, where practical, of electric lawn and garden equipment, and other tools that would otherwise be run with small gas engines or portable generators. • Implement measures to reduce employee vehicle trips and to mitigate emissions impacts from municipal travel. • Conduct a comprehensive inventory and analysis of the urban forest, and coordinate tree maintenance responsibilities with all responsible departments, consistent with best management practices. • Evaluate existing landscaping and options to convert reflective and impervious surfaces to landscaping, and will install or replace vegetation with drought tolerant, low maintenance native species or edible landscaping that can also provide shade and reduce heat island effects. 	

Table 5.1-1 Mitigation and Implementation Summary Matrix	
Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Implement enhanced programs to divert solid waste from landfill operations, by: • Establishing a diversion target which meets or exceeds AB 939 requirements. • Promoting and expanding recycling programs, purchasing policies, and employee education to reduce the amount of waste produced. • Reduce per capita water consumption consistent with state law by 2020. • Establish a water conservation plan that may include such policies and actions as: • Maintaining and refining the City's tiered rate structure for water use. • Establishing restrictions on time of use for landscape watering, or other demand management strategies. • Establishing performance standards for irrigation equipment and water fixtures, consistent with state law. • Establish programs and policies to increase the use of recycled water, including: • Promoting the use of recycled water for agricultural, industrial, and irrigation purposes, including grey water systems for residential irrigation. 	

**Table 5.1-1
Mitigation and Implementation Summary Matrix**

Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Ensure that building standards and permit approval processes promote and support water conservation, by: • Establishing building design guidelines and criteria to promote water efficient building design, including minimizing the amount of non-roof impervious surfaces around the building(s). • Establishing menus and check lists for developers and contractors to ensure water efficient infrastructure and technology are used in new construction, including low flow toilets and shower heads, moisture sensing irrigation, and other such advances. • Organize workshops on waste reduction activities for the home or business, such as backyard composting, or office paper recycling, and shall schedule recycling dropoff events and neighborhood chipping/mulching days. • Organize workshops on steps to increase energy efficiency in the home or business, such as weatherizing the home or building envelope, installing smart lighting systems, and how to conduct a self-audit for energy use and efficiency. 	
<p>6-3 The City of Ontario will amend the Municipal Code within 18 months after adopting The Ontario Plan, with provisions implementing the following GHG emission reduction concepts:</p> <ul style="list-style-type: none"> • Increase densities in urban core areas to support public transit, by, among other means:- • Removing barriers to the development of accessory dwelling units in existing residential neighborhoods. 	<p>Not Applicable. This is a directive for the City to amend the Municipal Code to reflect certain GHG emission reduction concepts. This is not a mitigation measure for the Addendum Project.</p>

**Table 5.1-1
Mitigation and Implementation Summary Matrix**

Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Reduce required road width standards wherever feasible to calm traffic and encourage alternative modes of transportation. • Add bicycle facilities to city streets and public spaces, where feasible. • Promote infill, mixed use, and higher density development, and provide incentives to support the creation of affordable housing in mixed use zones. • Plan for and create incentives for mixed use development. • Identify sites suitable for mixed use development and establish appropriate site specific standards to accommodate mixed uses which could include: • Increasing allowable building height or allow height limit bonuses, in appropriate areas and where safe to do so. • Allowing flexibility in applying development standards (such as FAR2 and lot coverage) based on the location, type, and size of the units, and the design of the development. • Allowing reduced and shared parking based on the use mix, and availability of and proximity to public transit stops. • Allowing for tandem parking, shared parking and off site parking leases. 	

**Table 5.1-1
Mitigation and Implementation Summary Matrix**

Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Enable prototype mixed-use structures for use in neighborhood center zones that can be adapted to new uses over time with minimal internal remodeling. • Identify and facilitate the inclusion of complementary land uses not already present in local zoning districts, such as supermarkets, parks and recreational fields, schools in neighborhoods, and residential uses in business districts, to reduce the vehicle miles traveled and promote bicycling and walking to these uses. • Revise zoning ordinance(s) to allow local-serving businesses, such as childcare centers, restaurants, banks, family medical offices, drug stores, and other similar services near employment centers to minimize midday vehicle use. • Develop form based community design standards to be applied to development projects and land use plans, for areas designated mixed-use. • Implement a Housing Overlay Zone for residential properties at transit centers and along transit corridors. This may include average minimum residential densities of 25 units per acre within one quarter miles of transit centers; average minimum densities of 15 units per acre within one quarter mile of transit corridors; and minimum FAR of 0.5:1 for non-residential uses within a quarter mile of transit centers or corridors. • Identify transit centers appropriate for mixed-use development, and promote transit-oriented, mixed-use development within these targeted areas, by:- 	

**Table 5.1-1
Mitigation and Implementation Summary Matrix**

Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Providing maximum parking standards and flexible building height limitations. • Providing density bonus programs. • Establishing guidelines for private and public spaces for transit-oriented and mixed-use development. • Discouraging auto-oriented development. • Ensure new development is designed to make public transit a viable choice for residents, including: • Locating medium to high density development near activity centers that can be served efficiently by public transit and alternative transportation modes. • Locating medium to high density development near streets served by public transit whenever feasible. • Linking neighborhoods to bus stops by continuous sidewalks or pedestrian paths. • Develop form-based community design standards to be applied to development projects and land use plans, for areas designated mixed-use. • Create and preserve distinct, identifiable neighborhoods whose characteristics support pedestrian travel, especially within, but not limited to, mixed-use and transit-oriented development areas, by: 	

Table 5.1-1 Mitigation and Implementation Summary Matrix	
Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Designing or maintaining neighborhoods where the neighborhood amenities can be reached in approximately five minutes of walking. • Encouraging pedestrian only streets and/or plazas within developments, and destinations that may be reached conveniently by public transportation, walking, or bicycling. • Allowing flexible parking strategies in neighborhood activity centers to foster a pedestrian-oriented streetscape. • Providing continuous sidewalks with shade trees and landscape strips to separate pedestrians from traffic. • Encouraging neighborhood parks and recreational centers near concentrations of residential areas (preferably within one quarter mile) and include pedestrian walkways and bicycle paths that encourage nonmotorized travel. • Ensure pedestrian access to activities and services, especially within, but not limited to, mixed use and transit-oriented development areas, by:- • Ensuring new development that provides pedestrian connections in as many locations as possible to adjacent development, arterial streets, thoroughfares. • Ensuring a balanced mix of housing, workplaces, shopping, recreational opportunities, and institutional uses, including mixed-use structures. 	

Table 5.1-1 Mitigation and Implementation Summary Matrix	
Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Locating schools in neighborhoods, within safe and easy walking distances of residences served. • Encouraging new development in which primary entrances are pedestrian entrances, with automobile entrances and parking located to the rear. • Supporting development where automobile access to buildings does not impede pedestrian access, by consolidating driveways between buildings or developing alley access. • Utilizing street parking as a buffer between sidewalk pedestrian traffic and the automobile portion of the roadway. • Prioritizing the physical development of pedestrian connectors for existing areas that do not meet established connectivity standards. • Mitigate climate change by decreasing heat gain from pavement and other hard surfaces associated with infrastructure. • Reduce heat gain from pavement and other similar hardscaping, by: • Including low water landscaping in place of hardscaping around transportation infrastructure and in parking areas. • Establishing standards that provide for pervious pavement options. • Removing obstacles to natural, drought tolerant landscaping and low water landscaping. 	

**Table 5.1-1
Mitigation and Implementation Summary Matrix**

Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Coordinate with appropriate agencies to create an interconnected transportation system that allows a shift in travel from private passenger vehicles to alternative modes, including public transit, ride sharing, car sharing, bicycling and walking, including, but not limited to: • Providing safe and convenient access for pedestrians and bicyclists to, across, and along major transit priority streets. • Upgrade and maintain the following transit system infrastructure to enhance public use, including: • Ensuring transit stops and bus lanes are safe, convenient, clean and efficient. • Ensuring transit stops have clearly marked street level designation, and are accessible. • Ensuring transit stops are safe, sheltered, benches are clean, and lighting is adequate. • Working with transit providers to place transit stations along transit corridors within mixed use or transit oriented development areas at intervals appropriate for the mode of transit. • Facilitate employment opportunities that minimize the need for private vehicle trips, by: • Amending zoning ordinances and the Development Code to include live/work sites and satellite work centers in appropriate locations. 	

**Table 5.1-1
Mitigation and Implementation Summary Matrix**

Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Encouraging telecommuting options with new and existing employers, through project review and incentives, as appropriate. • Establish standards for new development and redevelopment projects to support bicycle use, including: • Amending the Development Code to include standards for pedestrian and bicyclist accommodations, including: • Providing access for pedestrians and bicyclist to public transportation through construction of dedicated paths, where feasible. • Requiring new development and redevelopment projects to include bicycle facilities, as appropriate with the new land use, including: • Where feasible, promote the construction of weatherproof bicycle facilities and at a minimum, provide bicycle racks or covered, secure parking near the building entrances. • Establish a network of multi-use trails to facilitate direct off-street bicycle and pedestrian travel, and will provide bike racks along these trails at secure, lighted locations. • Establish policies and programs to reduce onsite parking demand and promote and public transit at large events. • Require new commercial and retail developments to provide prioritized parking for electric vehicles and vehicles using alternative fuels. 	

**Table 5.1-1
Mitigation and Implementation Summary Matrix**

Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Support and promote the use of low and zero emission vehicles (NEV), by: • Encouraging the necessary infrastructure to facilitate the use of zero emission vehicles and clean alternative fuels, such as electric vehicle charging facilities and conveniently located alternative fueling stations. • Encouraging new construction to include vehicle access to properly wired outdoor receptacles to accommodate ZEV and/or plug in electric hybrids (PHEV). • Encouraging transportation fleet standards to achieve the lowest emissions possible, using a mix of alternate fuels, PZEV or better fleet mixes. • Establishing incentives, as appropriate, to taxicab owners to use alternative fuel or gas electric hybrid vehicles. • Establish green building requirements and standards for new development and redevelopment projects, and work to provide incentives for green building practices and remove barriers that impede their use. • Allow increased height limits and/or flexibility in other standards for projects that incorporate energy efficient green building practices where not prohibited by ALUCP/FAA. • Identify and remove regulatory or procedural barriers to implementing green building practices within its jurisdiction, such 	

**Table 5.1-1
Mitigation and Implementation Summary Matrix**

Mitigation Measures	Remarks
<p>as updating codes, guidelines, and zoning, and ensure that all plan review and building inspection staff are trained in green building materials, practices, and techniques.</p> <ul style="list-style-type: none"> • Support the use of green building practices by: • Establishing guidelines for green building practices in residential and commercial development. • Providing incentives, which may include reduction in development fees, administrative fees, and/or expedited permit processing for projects that use green building practices. • Adopt energy efficiency performance standards for buildings that achieve a greater reduction in energy and water use than otherwise required by current state law, including: <ul style="list-style-type: none"> • Standards for the installation of "cool roofs". • Standards for improved overall efficiency of lighting systems. • Requirements for the use of Energy Star appliances and fixtures in discretionary new development. • Requirements for new residential lots and/or structures to be arranged and oriented to maximize effective use of passive solar energy. • Require that affordable housing development incorporate energy efficient design and features to the maximum extent feasible. 	

Table 5.1-1 Mitigation and Implementation Summary Matrix	
Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Identify possible sites for production of renewable energy (such as solar, wind, small hydro, and biogas). • Identify and remove or otherwise address barriers to renewable energy production, including: <ul style="list-style-type: none"> • ⊙ Reviewing and revising building and development codes, design guidelines, and zoning ordinances to remove renewable energy production barriers. • ⊙ Working with related agencies, such as fire, water, health and others that may have policies or requirements that adversely impact the development or use of renewable energy technologies. • ⊙ Developing protocols for safe storage of renewable and alternative energy products with the potential to leak, ignite or explode, such as biodiesel, hydrogen, and/or compressed air. • Allow renewable energy projects in areas zoned for open space, where consistent with the Land Use element, and other uses and values. • Promote and encourage renewable energy generation, and co-generation projects where feasible and appropriate. • Require that, where feasible, all new buildings be constructed to allow for easy, cost effective installation of solar energy systems in the future, using such “solar ready” features as: <ul style="list-style-type: none"> • ⊙ Optimal roof orientation (between 20 to 55 degrees from the horizontal), with sufficient south-sloped roof surface, where such 	

Table 5.1-1 Mitigation and Implementation Summary Matrix	
Mitigation Measures	Remarks
<p>buildings architecture and construction are designed for sloped roofs.</p> <ul style="list-style-type: none"> • ☉ Clear access without obstructions (chimneys, heating and plumbing vents, etc.) on the south sloped roof. • Roof framing that will support the addition of solar panels. • Installation of electrical conduit to accept solar electric system wiring. • Installation of plumbing to support a solar hot water system and provision of space for a solar hot water storage tank. • Require that any building constructed in whole or in part with City funds incorporate passive solar design features, such as daylighting and passive solar heating, where feasible. • Prepare and implement a comprehensive plan to improve energy efficiency of municipal facilities, including: • Conducting energy audits. • Retrofitting municipal facilities for energy efficiency where feasible and when remodeling or replacing components, including increased insulation, installing green or reflective roofs and low emissive window glass. • Implementing an energy tracking and management system for its municipal facilities. 	

Table 5.1-1 Mitigation and Implementation Summary Matrix	
Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Installing energy efficient exit signs, street signs, and traffic lighting, subject to life/safety considerations. • Installing energy efficient lighting retrofits and occupancy sensors, and institute a "lights out at night" policy, subject to life/safety considerations. • Retrofitting heating and cooling systems to optimize efficiency (e.g., replace chillers, boilers, fans, pumps, belts, etc.). • Installing Energy Star® appliances and energy efficient vending machines. • Improving water use efficiency, including a schedule to replace or retrofit system components with high efficiency units (i.e., ultra-low flow toilets, fixtures, etc.). • Installing irrigation control systems maximizing water use efficiency and minimizing off-peak use. • Adopting an accelerated replacement schedule for energy inefficient systems and components. • Require that any newly constructed, purchased, or leased municipal space meet minimum standards, such as: <ul style="list-style-type: none"> • The Energy Star® New Homes Program established by U.S. EPA. • The incorporation of passive solar design features in new buildings, including daylighting and passive solar heating. 	

Table 5.1-1 Mitigation and Implementation Summary Matrix	
Mitigation Measures	Remarks
<ul style="list-style-type: none"> • Reduce per capita water consumption consistent with state law by 2020. • Establish a water conservation plan that may include such policies and actions as: • Maintaining and refining the City's tiered rate structure for water use. • Establishing restrictions on time of use for landscape watering, or other demand management strategies. • Establishing performance standards for irrigation equipment and water fixtures, consistent with State Law. • The City will establish programs and policies to increase the use of recycled water, including: • Promoting the use of recycled water for agricultural, industrial, and irrigation purposes, including grey water systems for residential irrigation. • Ensure that building standards and permit approval processes promote and support water conservation, by: • Establishing building design guidelines and criteria to promote water efficient building design, including minimizing the amount of non-roof impervious surfaces around the building(s). • Establishing menus and check-lists for developers and contractors to ensure water efficient infrastructure and technology are used in new 	

Table 5.1-1 Mitigation and Implementation Summary Matrix	
Mitigation Measures	Remarks
<p>construction, including low flow toilets and shower heads, moisture sensing irrigation, and other such advances.</p> <ul style="list-style-type: none"> • Install water efficient landscapes and irrigation, including: • Requiring planting drought tolerant and native species, and covering exposed dirt with moisture retaining mulch or other materials such as decomposed granite. • Requiring the installation of water efficient irrigation systems and devices, including advanced technology such as moisture sensing irrigation controls. • Promote the planting of shade trees and establish shade tree guidelines and specifications, including: • Establishing guidelines for tree planting based on the land use (residential, commercial, parking lots, etc.). • Establishing guidelines for tree types based on species size, branching patterns, whether deciduous or evergreen, whether roots are invasive, etc. • Establishing tree guidelines for placement, including distance from structures, density of planting, and orientation relative to structures and the sun. • Develop an Urban Forestry Program to consolidate policies and ordinances regarding tree planting, maintenance, and removal, including: 	

Table 5.1-1 Mitigation and Implementation Summary Matrix	
Mitigation Measures	Remarks
<ul style="list-style-type: none"> Establishing guidelines for tree planting, including criteria for selecting deciduous or evergreen trees low VOC producing trees, and emphasizing the use of drought tolerant native trees and vegetation. 	
<p>6-4 Measures listed in Mitigation Measure 6-2 and 6-3 shall be considered by the City while reviewing all new development, as appropriate, between the time of adoption of The Ontario Plan and adoption of the Climate Action Plan (CAP).</p>	<p>Not Applicable. This is a directive for City staff to consider Mitigation Measure 6-2 and 6-3 while reviewing all new development, as appropriate, between the time of adoption of The Ontario Plan and adoption of the Climate Action Plan. This is not a mitigation measure for the Addendum Project. It is noted that the Addendum Project would not result in GHG impacts not previously addressed as part of the Certified EIR analysis.</p>
<p>6-5 Pursuant to a goal of overall consistency with the Sustainable Communities Strategies, the City of Ontario shall evaluate new development for consistency with the development pattern set forth in the Sustainable Communities Strategies plan, upon adoption of the plan by the Southern California Association of Governments.</p>	<p>Not Applicable. This is a directive for City staff to evaluate new development for consistency with the development pattern set forth in the Sustainable Communities Strategies plan. This is not a mitigation measure for the Addendum Project. It is noted that the Addendum Project would not result in GHG impacts not previously addressed as part of the Certified EIR analysis.</p>
<p>6-6 The City of Ontario shall participate in the County of San Bernardino's Green Valley Initiative.</p>	<p>Not Applicable. This is a directive for the City to participate in the County of San Bernardino's Green Valley Initiative. This is not a mitigation measure for the Addendum Project. It is noted that the Addendum Project would not result in GHG impacts not previously addressed as part of the Certified EIR analysis.</p>
Hazards and Hazardous Materials	
N/A	No mitigation was included within the Certified EIR; No mitigation is required of the Addendum Project.
Hydrology and Water Quality	
N/A	No mitigation was included within the Certified EIR; No mitigation is required of the Addendum Project.

Land Use and Planning	
N/A	No mitigation was included within the Certified EIR; No mitigation is required of the Addendum Project.
Mineral Resources	
N/A	No mitigation was included within the Certified EIR; No mitigation is required of the Addendum Project.
Noise	
12-1 Prior to the issuance of building permits for any project that involves a noise sensitive use within the 65 dBA CNEL contour along major roadways, freeways, railroads, or the Los Angeles/Ontario International Airport, the project property owner/developers shall retain an acoustical engineer to conduct an acoustic analysis and identify, where appropriate, site design features (e.g., setbacks, berms, or sound walls) and/or required building acoustical improvements (e.g., sound transmission class rated windows, doors, and attic baffling), to ensure compliance with the City's Noise Compatibility Criteria and the California State Building Code and California Noise Insulation Standards (Title 24 and 21 of the California Code of Regulations).	Not Applicable. This is a directive for City staff to require applicants to retain an acoustical engineer to conduct an acoustic analysis. This is not a mitigation measure for the Addendum Project. It is noted that the Addendum Project would not result in noise impacts not previously addressed as part of the Certified EIR analysis.
12-2 Individual projects that involve vibration intensive construction activities, such as pile drivers, jack hammers, and vibratory rollers, occurring near sensitive receptors shall be evaluated for potential vibration impacts. If construction-related vibration is determined to be perceptible at vibration sensitive uses (i.e., exceed the Federal Transit Administration vibration annoyance criteria of 78 VdB during the daytime), additional requirements, such as use of less vibration intensive equipment or construction techniques, shall be implemented during construction (e.g., drilled piles to eliminate use of vibration intensive pile driver).	Not Applicable. This is a directive for City staff to require some applicants to study potential vibration on nearby uses. This is not a mitigation measure for the Addendum Project. It is noted that the Addendum Project would not result in noise impacts not previously addressed as part of the Certified EIR analysis.

Table 5.1-1 Mitigation and Implementation Summary Matrix	
Mitigation Measures	Remarks
<p>12-3 Prior to the issuance of building permits for any project that involves a vibration sensitive use directly adjacent to the Union Pacific Railroad or Southern California Regional Rail Authority main lines shall retain an acoustical engineer to evaluate potential for trains to create perceptible levels of vibration indoors. If vibration related impacts are found, mitigation measures, such as use of concrete, iron, or steel, or masonry materials to ensure that levels of vibration amplification are within acceptable limits to building occupants, shall be implemented. Pursuant to the Federal Transit Administration vibration annoyance criteria, these acceptable limits are 78 VdB during the daytime and 72 VdB during the nighttime for residential uses, 84 VdB for office uses, and 90 VdB for workshops.</p>	<p>Not Applicable. This is a directive for City staff to require some applicants to study potential railroad vibration on impact certain sensitive use. This is not a mitigation measure for the Addendum Project. It is noted that the Addendum Project would not result in noise impacts not previously addressed as part of the Certified EIR analysis.</p>
<p>12-4 Construction activities associated with new development that occurs near sensitive receptors shall be evaluated for potential noise impacts. Mitigation measures such as installation of temporary sound barriers for adjacent construction activities that occur adjacent to occupied noise sensitive structures, equipping construction equipment with mufflers, and reducing nonessential idling of construction equipment to no more than five minutes shall be incorporated into the construction operations to reduce construction related noise to the extent feasible.</p>	<p>Not Applicable. This is a directive for City staff to consider temporary sound barriers to reduce construction noise from adjacent uses. This is not a mitigation measure for the Addendum Project. It is noted that the Addendum Project would not result in noise impacts not previously addressed as part of the Certified EIR analysis.</p>
Population and Housing	
N/A	No mitigation was included within the Certified EIR; No mitigation is required of the Addendum Project.
Public Services

Mitigation Measures	Remarks
Recreation	
N/A	No mitigation was included within the Certified EIR; No mitigation is required of the Addendum Project.
Transportation	
16-1 The Mobility Element of the Ontario Plan shall be consistent with the traffic study prepared by Kimley-Horn and Associates. Table 5.16-6 shows the recommended lane geometry for the Proposed Land Use Plan.	Not Applicable. This is a directive for City staff to assure that the Mobility Element of the Ontario Plan is consistent with the recommendations of the associated traffic study. This is not a mitigation measure for the Addendum Project. It is noted that the Addendum Project would not result in transportation impacts not previously addressed as part of the Certified EIR analysis.
Tribal Cultural Resources	
Please refer to Mitigation Measures 5-3 and 5-4, presented under Cultural Resources.	See earlier remarks.
Utilities and Service Systems	
17-1 The City shall include a policy in the Policy Plan that requires water conservation measures for development projects to improve water use efficiency and reduce overall water demand. Reduce potable water demand, through conservation measures, including but not limited to: a) Work cooperatively with all developers to incorporate conservation measures into project designs (such as those recommended by the California Urban Water Conservation Council). b) Continue to develop and implement drought contingency plans to assist citizens and businesses reduce water use during water shortages and emergencies.	Not Applicable. This is a directive for City staff to assure that a water use efficiency policy is included in the Policy Plan. This is not a mitigation measure for the Addendum Project. It is noted that the Addendum Project would not result in utilities or service systems impacts not previously addressed as part of the Certified EIR analysis.

Table 5.1-1 Mitigation and Implementation Summary Matrix	
Mitigation Measures	Remarks
e) Revise the City Code to include a Water Efficient Landscape Ordinance to encourage or, as appropriate, require the use of water efficient landscaping consistent with AB 325.	
17-2The City shall include a policy in the Policy Plan that maximizes the use of recycled water as an irrigation (nonpotable) source for landscaping, parks, and other irrigation opportunities in all areas of the City and requires use of recycled water in dual system office and industrial uses in selected urban areas of the City, where available and feasible.	Not Applicable. This is a directive for City staff to assure that a water use efficiency policy is included in the Policy Plan that maximizes the use of recycled water. This is not a mitigation measure for the Addendum Project. It is noted that the Addendum Project would not result in utilities or service systems impacts not previously addressed as part of the Certified EIR analysis.
17-3The City shall include a policy in the Policy Plan that the City participate through the Chino Basin Water Master and the Inland Empire Utilities Agency in regional efforts to develop finding additional sources of water for groundwater recharge, such as capture of stormwater runoff, recycled water, or other sources to ensure that the Chino Basin stays in long term hydraulic balance and sustainability and that adequate additional local water sources would be available to increase the flexibility of the City's water supply.	Not Applicable. This is a directive for City staff to assure that policy is included in the Policy Plan that requires the City to participate with regional water agency in the pursuit of additional water sources. This is not a mitigation measure for the Addendum Project. It is noted that the Addendum Project would not result in utilities or service systems impacts not previously addressed as part of the Certified EIR analysis.
Wildfire	
N/A	No mitigation was included within the Certified EIR; No mitigation is required of the Addendum Project.

ATTACHMENT A
Air Quality, GHG, and HRA

October 5, 2020

Mr. Ross Geller
Applied Planning
11762 De Palma Road, 1-C 310
Corona, CA 92883

SUBJECT: THE VINE AIR QUALITY, GREENHOUSE GAS, & HEALTH RISK ASSESSMENT MEMORANDUM

Dear Mr. Ross Geller:

Urban Crossroads, Inc. is pleased to provide the following Air Quality, Greenhouse Gas, & Health Risk Assessment Memorandum (Memorandum) for The Vine Project (Addendum Project), which is located at the northwesterly corner of Milliken Avenue and East Riverside Drive, in the City of Ontario, as shown on Exhibit A. The purpose of this work effort is to determine if the Addendum Project would result in new or substantially different air quality or greenhouse gas impacts than those considered and addressed in The Ontario Plan EIR (Certified EIR).

ADDENDUM PROJECT SUMMARY

The Addendum Project considered herein is proposing to develop 557,720 square feet (80% of the total industrial square footage) of general light industrial use, 139,430 square feet (20% of the total industrial square footage) of manufacturing use, and 26,700 square feet of retail use within the approximate 44-acre Project site.

Within this analysis, likely maximum air quality and greenhouse gas impacts of the above uses are evaluated. At the discretion of the City, uses differing from those evaluated here, and that could result in substantially different air quality and greenhouse gas impacts than the uses evaluated, would be subject to additional CEQA environmental analysis. Ultimate scope and configuration of the Addendum Project uses would be as approved by the City. The Project site location is presented at Exhibit A.

EXHIBIT A: LOCATION MAP

PROPOSED LAND USE DESIGNATIONS

PROJECT SITE

The Project site existing Policy Plan Land Use designation and Zoning designation would be amended to allow for development and land uses proposed under the Addendum Project. More specifically, the existing Policy Plan Land Use designation of the Project site, “Mixed Use” (Area 12), would be amended to “Industrial” and General Commercial.” The Project site is currently zoned Specific Plan. As amended under the Addendum Project, Zoning of the Project site would be changed to “IL” (Light Industrial) and “CC” (Community Commercial).

ADJACENT PROPERTIES

Policy Plan (General Plan) Land Use and Zoning designations of adjacent properties are summarized below. The Addendum Project would not affect Land Use and Zoning designations of adjacent properties.

North SR-60 (Pomona) freeway/Caltrans Right-of-Way.

South Policy Plan Land Use Designation: General Commercial
Zoning: Specific Plan

East City of Eastvale General Plan: Business Park
City of Eastvale Zoning: C-P-S - Scenic Highway Commercial (southerly adjacent to SR-60); I-P - Industrial Park (northerly of East Riverside Drive)

West Policy Plan Land Use Designation: Open Space – Non-Recreation
Zoning: “UC” (Utilities Corridor)

EXISTING LAND USES

PROJECT SITE

A portion of the Project site is currently developed with two existing buildings. Information regarding the demolition quantities is not readily available. As such, the total building square footage of structures that would be demolished was conservatively estimated to be 27,491 square feet. It should be noted that this quantity is inclusive of demolition of other structures (i.e. sheds) and existing asphalt/pavement.

ADJACENT PROPERTIES

Existing land uses of adjacent properties are summarized below. The Addendum Project would not affect adjacent property land uses.

North SR-60 (Pomona) freeway/Caltrans Right-of-Way

South Southerly of the Project site, across East Riverside Drive, properties are currently vacant and undeveloped but are approved for Specific Plan Community Commercial uses (Edenglen Specific Plan)

East Easterly of the Project site, across Milliken Avenue and adjacent to the southerly portions of the Project site properties are City of Eastvale properties developed with light industrial uses; adjacent to the northerly portions of the Project site are City of Eastvale properties are vacant and undeveloped.

West An existing SCE easement defines the westerly Project boundary. A commercial nursery is located within the SCE easement adjacent to the Project site southern 20 acres. Single family homes (Creekside) are located westerly of the SCE easement.

ONTARIO PLAN EIR AIR QUALITY AND GREENHOUSE GAS IMPACT SIGNIFICANCE FINDINGS

The Ontario Plan EIR determined that development of the City pursuant to the Policy Plan would result in the following significant and unavoidable air quality impacts:

- Buildout of the City pursuant to the Policy Plan would conflict with the SCAQMD's AQMP.
- Construction-Source Impacts exceeding regional air quality thresholds, cumulative contribution to SCAQMD nonattainment designations, and elevated concentrations of air pollutants at sensitive receptors.
- Operational-Source Impacts exceeding regional air quality thresholds, cumulative contribution to SCAQMD nonattainment designations, and elevated concentrations of air pollutants at sensitive receptors.
- Conversion of agricultural land to nonagricultural uses would temporarily expose residents to objectionable odors.
- Buildout of the City pursuant to the Policy Plan would generate greenhouse gas emissions that would significantly contribute to global climate change impacts in California.

Where impacts were determined to be significant and unavoidable, the EIR identifies mitigation that would reduce the impact(s) to the extent feasible. The Ontario Plan EIR further determined that all greenhouse gas impacts resulting from development of the City pursuant to the Policy Plan would not be potentially significant or would be reduced to levels that would be less-than-significant through implementation of the Ontario Plan EIR mitigation measures. Please refer also to Ontario Plan EIR, available at the following link: <http://www.ontarioplan.org/environmental-impact-report/>.

ADDENDUM PROJECT AIR QUALITY IMPACT ANALYSIS

AIR QUALITY REGIONAL EMISSIONS THRESHOLDS

The SCAQMD has also developed regional significance thresholds for other regulated pollutants, as summarized at Table 1 (1). The SCAQMD’s CEQA Air Quality Significance Thresholds (April 2019) indicate that any projects in the SCAB with daily emissions that exceed any of the indicated thresholds should be considered as having an individually and cumulatively significant air quality impact.

TABLE 1: MAXIMUM DAILY REGIONAL EMISSIONS THRESHOLDS

Pollutant	Construction	Operations
Regional Thresholds		
NO _x	100 lbs/day	55 lbs/day
VOC	75 lbs/day	55 lbs/day
PM ₁₀	150 lbs/day	150 lbs/day
PM _{2.5}	55 lbs/day	55 lbs/day
SO _x	150 lbs/day	150 lbs/day
CO	550 lbs/day	550 lbs/day
Lead	3 lbs/day	3 lbs/day

lbs/day – Pounds Per Day

Source: Regional Thresholds presented in this table are based on the SCAQMD Air Quality Significance Thresholds, March 2015

STANDARD REGULATORY REQUIREMENTS/BEST AVAILABLE CONTROL MEASURES (BACMS)

SCAQMD Rules that are currently applicable during construction activity for this Project include but are not limited to Rule 403 (Fugitive Dust) (2) and Rule 1113 (Architectural Coatings) (3). Additionally, this analysis assumes the Project’s compliance with the 2019 Title 24 Standards.

BACM AQ-1

All applicable measures included in Rule 403, shall be incorporated into Project plans and specifications as implementation of Rule 403, which include but are not limited to (2):

- All clearing, grading, earth-moving, or excavation activities shall cease when winds exceed 25 mph per SCAQMD guidelines in order to limit fugitive dust emissions.
- The contractor shall ensure that traffic speeds on unpaved roads and Project site areas are limited to 15 miles per hour or less.

- The contractor shall ensure that all disturbed unpaved roads and disturbed areas within the Project are watered at least three (3) times daily during dry weather. Watering, with complete coverage of disturbed areas, shall occur at least three times a day, preferably in the mid-morning, afternoon, and after work is done for the day.

BACM AQ-2

The following measures shall be incorporated into Project plans and specifications as implementation of SCAQMD Rule 1113 (3):

- Only “Low-Volatile Organic Compounds” paints (no more than 50 gram/liter of VOC) consistent with SCAQMD Rule 1113 shall be used.

CONSTRUCTION EMISSIONS

Construction activities associated with the Project would result in emissions of carbon monoxide (CO), Volatile Organic Compounds (VOCs), Nitrogen Oxides (NO_x), Sulfur Oxides (SO_x), particulate matter ≤ 10 microns (PM₁₀), and particulate matter ≤ 2.5 microns (PM_{2.5}). The duration of construction activity was based on the 2021 Opening Year. The construction schedule utilized in the analysis, shown in Table 2, represents a “worst-case” analysis scenario should construction occur any time after the respective dates since emission factors for construction decrease as time passes and the analysis year increases due to emission regulations becoming more stringent.¹

Demolition

A portion of the Project site is currently developed with two existing buildings. Information regarding the demolition quantities is not readily available. As such, the total building square footage of structures that would be demolished was conservatively estimated to be 27,491 square feet. It should be noted that this quantity is inclusive of demolition of other structures (i.e. sheds) and existing asphalt/pavement.

TABLE 2: CONSTRUCTION DURATION

Phase Name	Start Date	End Date	Days
Demolition	05/01/2021	05/21/2021	15
Site Preparation	05/22/2021	06/18/2021	20
Grading	06/19/2021	07/09/2021	15
Building Construction	07/10/2021	12/24/2021	120
Paving	10/09/2021	12/24/2021	55
Architectural Coating	08/08/2021	12/24/2021	100

¹ As shown in the California Emissions Estimator Model (CalEEMod) User’s Guide Version 2016.3.2, Section 4.3 “OFFROAD Equipment” as the analysis year increases, emission factors for the same equipment pieces decrease due to the natural turnover of older equipment being replaced by newer less polluting equipment and new regulatory requirements.

Construction Equipment

The associated construction equipment was generally based on California Emissions Estimator Model™ (CalEEMod) 2016.3.2 defaults. A detailed summary of construction equipment assumptions by phase is provided at Table 3.

TABLE 3: CONSTRUCTION EQUIPMENT

REGIONAL CONSTRUCTION EMISSIONS SUMMARY

The estimated maximum daily regional construction emissions are summarized on Table 4. Detailed construction model outputs are presented in Attachment A. Under the assumed scenarios, emissions resulting from the Project construction would not exceed criteria pollutant thresholds established by the SCAQMD for emissions of any criteria pollutant. Thus, a less than significant impact would occur for Project-related construction-source emissions and no mitigation is required.

TABLE 4: ADDENDUM PROJECT REGIONAL CONSTRUCTION EMISSIONS SUMMARY

Phase	Emissions (lbs/day)					
	VOC	NO _x	CO	SO _x	PM ₁₀	PM _{2.5}
Summer						
2021	48.62	82.28	81.50	0.26	23.51	9.99
Winter						
2021	48.68	82.11	75.18	0.25	23.51	9.99
Maximum Daily Emissions	48.68	82.28	81.50	0.26	23.51	9.99
SCAQMD Regional Threshold	75	100	550	150	150	55
Threshold Exceeded?	NO	NO	NO	NO	NO	NO

OPERATIONAL EMISSIONS

Operational activities associated with the Project would result in emissions of CO, VOCs, NO_x, SO_x, PM₁₀, and PM_{2.5}. Operational related emissions are expected from the following primary sources: area source emissions, energy source emissions, mobile source emissions, and on-site equipment emissions.

Area Source Emissions

Architectural Coatings – Over a period of time, the buildings that are part of this Project will be subject to emissions resulting from the evaporation of solvents contained in paints, varnishes, primers, and other surface coatings as part of Project maintenance. The emissions associated with architectural coatings were calculated using the CalEEMod.

Consumer Products – Consumer products include, but are not limited to detergents, cleaning compounds, polishes, personal care products, and lawn and garden products. Many of these products contain organic compounds which when released in the atmosphere can react to form ozone and other photochemically reactive pollutants. The emissions associated with use of consumer products were calculated based on defaults provided within the CalEEMod model.

Landscape Maintenance Equipment – Landscape maintenance equipment would generate emissions from fuel combustion and evaporation of unburned fuel. Equipment in this category would include lawnmowers, shredders/grinders, blowers, trimmers, chain saws, and hedge trimmers used to maintain the landscaping of the Project. The emissions associated with landscape maintenance equipment were calculated based on assumptions provided in the CalEEMod model.

Energy Source Emissions

Combustion Emissions Associated with Natural Gas and Electricity – Electricity and natural gas are used by almost every project. Criteria pollutant emissions are emitted through the generation of electricity

and consumption of natural gas. However, because electrical generating facilities for the Project area are located either outside the region (state) or offset through the use of pollution credits (RECLAIM) for generation within the SCAB, criteria pollutant emissions from offsite generation of electricity is generally excluded from the evaluation of significance and only natural gas use is considered. The emissions associated with natural gas use were calculated using CalEEMod.

Title 24 Energy Efficiency Standards – California’s Energy Efficiency Standards for Residential and Nonresidential Buildings was first adopted in 1978 in response to a legislative mandate to reduce California’s energy consumption. The standards are updated periodically to allow consideration and possible incorporation of new energy efficient technologies and methods. Energy efficient buildings require less electricity. The 2019 version of Title 24 was adopted by the CEC and will become effective on January 1, 2020. As such, the analysis herein assumes compliance with the 2019 Title 24 Standards.

Mobile Source Emissions

Project mobile source emissions impacts are primarily dependent overall daily vehicle trip generation. According to *The Vine Trip Generation Evaluation* prepared by Urban Crossroads, Inc., the Addendum Project would generate 5,770 two-way trips per day (see Table 5 of the *Trip Generation Evaluation*) (4).

REGIONAL OPERATIONAL EMISSIONS SUMMARY

Table 5 summarizes the Project’s daily regional emissions from on-going operations. Detailed construction model outputs are presented in Attachment B. As shown, during operational activity, Project emissions would exceed the SCAQMD regional thresholds of significance for emissions of NO_x. NO_x exceedances that would occur under the Addendum Project are considered and addressed within the Certified EIR. Moreover, as discussed subsequently, NO_x and other operational-source emissions generated under the Addendum Project would be incrementally reduced when compared to emissions generated by development of the subject site pursuant to the Policy Plan.

TABLE 5: ADDENDUM PROJECT OPERATIONAL EMISSIONS SUMMARY

Operational Activities – Summer Scenario	Emissions (lbs/day)					
	VOC	NO _x	CO	SO _x	PM ₁₀	PM _{2.5}

Threshold Exceeded?	NO	YES	NO	NO	NO	NO

LOCALIZED CONSTRUCTION EMISSIONS SUMMARY

The analysis makes use of methodology included in the SCAQMD *Final Localized Significance Threshold Methodology* (LST Methodology) (5). The SCAQMD has established that impacts to air quality are significant if there is a potential to contribute or cause localized exceedances of the federal and/or state ambient air quality standards (NAAQS/CAAQS). Collectively, these are referred to as Localized Significance Thresholds (LSTs). The SCAQMD established LSTs in response to the SCAQMD Governing Board’s Environmental Justice Initiative I-4². LSTs represent the maximum emissions from a project that will not cause or contribute to an exceedance of the most stringent applicable federal or state ambient air quality standard at the sensitive receptor. The SCAQMD states that lead agencies can use the LSTs as another indicator of significance in its air quality impact analyses.

² The purpose of SCAQMD’s Environmental Justice program is to ensure that everyone has the right to equal protection from air pollution and fair access to the decision-making process that works to improve the quality of air within their communities. Further, the SCAQMD defines Environmental Justice as “...equitable environmental policymaking and enforcement to protect the health of all residents, regardless of age, culture, ethnicity, gender, race, socioeconomic status, or geographic location, from the health effects of air pollution.”

Sensitive Receptors

Receptor locations are off-site locations where individuals may be exposed to emissions from Project activities. This Memorandum analyzes localized construction and operational emissions impacts at the nearest sensitive receptors.

Residential Receptors – Some people are especially sensitive to air pollution and are given special consideration when evaluating air quality impacts from projects. These groups of people include children, the elderly, individuals with pre-existing respiratory or cardiovascular illness, and athletes and others who engage in frequent exercise. Structures that house these persons or places where they gather to exercise are defined as “sensitive receptors”; they are also known to be locations where an individual can remain for 24 hours.

Non-Residential Receptors – As per the *LST Methodology*, commercial and industrial facilities are not included in the definition of sensitive receptor because employees do not typically remain onsite for a full 24 hours but are typically onsite for eight hours. However, it should be noted that the *LST Methodology* explicitly states that “LSTs based on shorter averaging periods, such as the NO₂ and CO LSTs, could also be applied to receptors such as industrial or commercial facilities since it is reasonable to assume that a worker at these sites could be present for periods of one to eight hours (5).” Consistent with the SCAQMD’s Final LST Methodology, the nearest industrial or commercial use to the Project site will be used to determine operational and construction air impacts for emissions of NO₂ and CO.

Project-related Sensitive Receptors

Sensitive receptors in the Project study area include existing residential homes and an educational use, as described below and as shown on Exhibit B:

- R1: Located approximately 196 feet west of the Project site, R1 represents an existing residential home located at 3977 Yuba River Drive in the City of Ontario.
- R2: Location R2 represents the existing single-family residential home at 2913 McCloud River Lane located roughly 285 feet west of the Project site in the City of Ontario.
- R3: Located approximately 287 feet west of the Project site across the power transmission lines, R3 represents an existing residential home at 2965 McCloud River Lane in the City of Ontario.
- R4: Location R4 represents the Colony High School located approximately 1,731 feet south west of the Project site at 3850 E Riverside Drive.
- R5: Located approximately 294 feet south of the Project site across E Riverside Drive, R5 represents an existing single-family residential home at 4097 E Auburn Way in the City of Ontario.

The SCAQMD recommends that the nearest sensitive receptor be considered when determining the Project’s potential to cause an individual and cumulatively significant impact. As such, the nearest sensitive receptor for evaluation of localized PM₁₀ and PM_{2.5} emissions is an existing residential home located approximately 196 feet/60 meters west Project site at 3977 Yuba River Drive. For purposes of

EXHIBIT B: SENSITIVE RECEPTOR LOCATIONS

LEGEND:

- Receptor Locations
- Distance from receptor to Project site boundary (in feet)
- Existing Barrier Height (in feet)
- Existing Barrier

analysis, the 60-meter receptor distance will be utilized as a screening threshold to determine LSTs for emissions of PM₁₀ and PM_{2.5}. Alternatively, the nearest sensitive receptor for evaluation of localized NO_x and CO emissions is the San Antonio Winery located immediate adjacent (less than 25-meters) to Project site. The *LST Methodology* explicitly states that “It is possible that a project may have receptors closer than 25 meters. Projects with boundaries located closer than 25 meters to the nearest receptor should use the LSTs for receptors located at 25 meters (5).” As the San Antonio Winery is located immediate adjacent to the Project site, a 25-meter receptor distance will be used for NO₂ and CO.

Table 6 identifies the localized impacts at the nearest receptor location in the vicinity of the Project. Outputs from the model runs for construction LSTs are provided in Attachment A. Under the assumed scenarios, emissions resulting from the Project construction will not exceed the numerical thresholds of significance established by the SCAQMD for any criteria pollutant. Thus, a less than significant impact would occur for localized Project-related construction-source emissions and no mitigation is required.

TABLE 6: ADDENDUM PROJECT LOCALIZED SIGNIFICANCE SUMMARY OF CONSTRUCTION

On-Site Demolition Emissions	Emissions (lbs/day)			
	NO _x	CO	PM ₁₀	PM _{2.5}

SCAQMD Localized Threshold	237	1873	45	12
Threshold Exceeded?	NO	NO	NO	NO

LOCALIZED OPERATIONAL EMISSIONS SUMMARY

Table 7 shows the calculated emissions for the Project’s operational activities compared with the applicable LSTs. The LST analysis includes on-site sources only; however, CalEEMod outputs do not separate on-site and off-site emissions from mobile sources. In an effort to establish a maximum potential impact scenario for analytic purposes, the emissions shown on Table 6 represent all on-site Project-related stationary (area) sources and five percent (5%) of the Project-related mobile sources. Modeling based on these assumptions demonstrates that even within broad encompassing parameters, localized Project operational-source emissions would not exceed applicable LSTs.

TABLE 7: ADDENDUM PROJECT LOCALIZED SIGNIFICANCE SUMMARY OF OPERATIONS (WITHOUT MITIGATION)

Operational Activity	Emissions (lbs/day)			
	NO _x	CO	PM ₁₀	PM _{2.5}
Maximum Daily Emissions	11.45	12.99	2.62	1.09
SCAQMD Localized Threshold	270	2,193	14	3
Threshold Exceeded?	NO	NO	NO	NO

AIR QUALITY IMPACTS COMPARISON

CONSTRUCTION-SOURCE EMISSIONS

REGIONAL EMISSIONS

The Certified EIR concluded that development of land uses pursuant to the Policy Plan would result in significant and unavoidable regional construction-source air quality impacts. Under the Addendum Project, regional construction-source air quality impacts would be less-than-significant. On this basis, when compared to the Certified EIR findings, no new or substantially increased regional construction-source air quality impacts would occur under the Addendum Project.

LOCALIZED EMISSIONS

The Certified EIR concluded that development of land uses pursuant to the Policy Plan would result in significant and unavoidable localized construction-source air quality impacts. Under the Addendum Project, localized construction-source air quality impacts would be less-than-significant. On this basis, when compared to the Certified EIR findings, no new or substantially increased localized construction-source air quality impacts would occur under the Addendum Project.

OPERATIONAL-SOURCE EMISSIONS

REGIONAL EMISSIONS

Table 8 compares peak operational-source criteria pollutant emissions generated by the Policy Plan Land Uses with peak operational-source criteria pollutant emissions generated by the Addendum Project. Outputs from the model runs for the Ontario General Plan Update is provided in Attachment C.

As indicated on Table 8, emissions generated by the Addendum Project would generally result in a net decrease in peak operational-source criteria pollutant emissions when compared to peak operational-source criteria pollutant emissions generated by the land uses assumed in the Ontario General Plan Update for the subject site. As such, the Addendum Project would therefore not result in new or substantively different or substantively increased operational-source air quality impacts.

**TABLE 8: SUMMARY OF PEAK OPERATIONAL EMISSIONS COMPARISON
 (ADDENDUM PROJECT VS. POLICY PLAN LAND USES)**

Operational Activities – Summer Scenario	Emissions (lbs/day)					
	VOC	NO _x	CO	SO _x	PM ₁₀	PM _{2.5}
Addendum Project	34.34	69.05	163.74	0.49	42.96	12.23
Policy Plan Land Uses (TAZ 191 – Mixed Use)	102.42	198.04	460.14	1.23	100.93	28.34
Variance (Addendum Project – Policy Plan Land Uses)	-68.08	-128.99	-296.40	-0.74	-57.97	-16.11
Operational Activities – Winter Scenario	Emissions (lbs/day)					
	VOC	NO _x	CO	SO _x	PM ₁₀	PM _{2.5}
Addendum Project	33.02	70.98	143.22	0.46	42.95	12.22
Policy Plan Land Uses (TAZ 191 – Mixed Use)	97.34	203.84	412.16	1.15	100.92	28.34
Variance (Addendum Project – Policy Plan Land Uses)	-64.32	-132.86	-268.94	-0.69	-57.97	-16.12

LOCALIZED EMISSIONS

The Certified EIR concluded that development of land uses pursuant to the Policy Plan would result in significant and unavoidable localized operational-source air quality impacts. Under the Addendum Project, localized operational-source air quality impacts would be less-than-significant. On this basis, when compared to the Certified EIR findings, no new or substantially increased localized operational-source air quality impacts would occur under the Addendum Project.

ADDENDUM PROJECT GREENHOUSE GAS ANALYSIS

GREENHOUSE GAS EMISSIONS THRESHOLDS

According to the City of Ontario CEQA thresholds, to determine whether impacts from GHG emissions are significant. Would the project:

- Generate GHG emissions, either directly or indirectly, that may have a significant impact on the environment?
- Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of GHGs?

The evaluation of an impact under CEQA requires measuring data from a project against both existing conditions and a “threshold of significance.” With regard to establishing a significance threshold, the Office of Planning and Research’s amendments to the CEQA Guidelines Section 15064.7(c) state that “[w]hen adopting thresholds of significance, a lead agency may consider thresholds of significance previously adopted or recommended by other public agencies, or recommended by experts, provided the decision of the lead agency to adopt such thresholds is supported by substantial evidence.”

CEQA Guidelines Section 15064.4(a) further states, “...A lead agency shall have discretion to determine, in the context of a particular project, whether to: (1) Use a model or methodology to quantify GHG emissions resulting from a project, and which model or methodology to use ...; or (2) Rely on a qualitative analysis or performance based standards.”

ADDENDUM PROJECT GREENHOUSE GAS EMISSIONS

GHG emissions impacts were modeled employing the CalEEMod 2016.3.2. Outputs from the model runs are provided in Attachments A and B. As shown on Table 9, the Addendum Project proposed land uses would generate a total of approximately 10,359.16 MTCO₂e per year.

TABLE 9: ADDENDUM PROJECT GHG EMISSIONS

Emission Source	Emissions (MT/yr)			
	CO ₂	CH ₄	N ₂ O	Total CO ₂ E
Annual construction-related emissions amortized over 30 years	49.40	0.01	0.00	49.54
Area Source	0.05	1.30e-04	0.00	0.05
Energy Source	3,033.56	0.10	0.04	3,046.87
Mobile Source	5,797.31	0.33	0.00	5,805.44
On-Site Equipment	101.68	0.03	0.00	102.50
Waste	181.17	10.71	0.00	448.84
Water Usage	733.12	5.35	0.13	905.91
Total CO₂E (All Sources)	10,359.16			

MT/yr = metric tons per year

GREENHOUSE GAS EMISSIONS COMPARISON

Table 10 compares GHG emissions of the Addendum Project proposed land uses with GHG emissions generated by the Policy Plan Land Uses. Outputs from the model runs for the Policy Plan Land Uses is provided in Attachment C.

As indicated in Tables 10, the Addendum Project would result in a net decrease in GHG emissions as compared to the GHG emissions associated with the development of subject pursuant to the Policy Plan. The Certified EIR concluded that development of land uses pursuant to the Policy Plan would result in significant and unavoidable GHG emission impacts. Under the Addendum Project, GHG emissions would be incrementally reduced when compared to GHG emissions that would be generated by development of the subject site pursuant to the Policy Plan. On this basis, when compared to the Certified EIR findings, no new or substantially increased GHG emissions impacts would occur under the Addendum Project.

**TABLE 10: GHG EMISSIONS COMPARISON
 (ADDENDUM PROJECT VS. POLICY PLAN LAND USES)**

Emission Source	Annual Emissions (MTCO ₂ e)
Addendum Project	10,359.16
Policy Plan Land Uses	29,046.98
Variance (Addendum Project – Policy Plan Land Uses)	-18,687.82

ADDENDUM PROJECT HEALTH RISK ASSESSMENT

This analysis also evaluates the potential mobile source health risk impacts to receptors (residents or workers) associated with the development of the proposed Addendum Project. Health risk exposures were modeled in accordance with the guidelines in the SCAQMD's Health Risk Assessment Guidance for Analyzing Cancer Risks from Mobile Source Diesel Idling Emissions for CEQA Air Quality Analysis. SCAQMD recommends using the Environmental Protection Agency's (U.S. EPA's) AERMOD model which has been employed accordingly. Risk calculations were conducted consistent with the Office of Environmental Health Hazards Assessment (OEHHA)'s 2015 Risk Assessment Guidelines. Detailed health risk modeling results are presented at Appendix B to this Memorandum.

More specifically the analysis presented here evaluates potential health risk impacts that could result from exposure to Toxic Air Contaminants (TACs), including diesel particulate matter (DPM) generated by heavy-duty diesel trucks associated with trucks accessing the industrial portion of the Addendum Project (per the *Trip Generation Evaluation*, the Addendum Project is anticipated to generate up to 280 two-way (140 inbound and 140 outbound) heavy-duty truck trips per day).

At the maximally exposed individual receptor (MEIR), the maximum incremental cancer risk attributable to the Addendum Project is estimated at 1.43 in one million, which is less than the SCAQMD threshold of 10 in one million. At this same location, non-cancer risks were estimated to be 0.002, which would not exceed the applicable SCAQMD threshold of 1.0. As such, the Addendum Project uses will not cause a significant human health or cancer risk at any potentially affected receptors. The nearest modeled receptors and modeled source configuration are illustrated on Exhibit C. The Addendum Project uses do not otherwise comprise facilities or operations that would generate emissions concentrations that would potentially affect sensitive receptors.

The Certified EIR concluded that development pursuant to the Policy Plan would result in significant and unavoidable air quality impacts due to elevated concentrations of air pollutants at sensitive receptors. As summarized above, under the Addendum Project air quality impacts due to elevated concentrations of air pollutants at sensitive receptors would be less-than-significant. On this basis, when compared to the Certified EIR findings, no new or substantially increased air quality impacts due to elevated concentrations impacts at sensitive receptors would occur under the Addendum Project.

EXHIBIT C: MODELED RECEPTORS AND SOURCES

Legend

- Resident
- School
- Worker
- Off-Site Travel
- On-Site Idling and Travel

OTHER CONSIDERATIONS

- The Certified EIR concluded that development pursuant to the Policy Plan would result in significant and unavoidable AQMP consistency impacts. Although the Addendum Project would amend the site's current land use designations, the Addendum Project would not substantively increase or otherwise alter the development intensities beyond that currently anticipated for the subject site under the Policy Plan. Moreover, the Addendum Project uses would result fewer emissions than would result from development of the subject site pursuant to the Policy Plan. On this basis, when compared to the Certified EIR findings, no new or substantially increased AQMP consistency impacts would occur under the Addendum Project.
- The Certified EIR concluded that development pursuant to the Policy Plan would result in significant and unavoidable temporary odor impacts associated with transition of agricultural lands to nonagricultural uses. The Addendum Project does not propose or require transition of agricultural lands to nonagricultural uses, nor is the subject site affected by proximate agricultural use odor sources. Further, construction-source and operational-source odor impacts that may result from the Addendum Project are controlled as a byproduct of hazardous/potentially hazardous materials handling plans and Best Management Practices implemented under SCAQMD Rule 402 et al. The Addendum Project would comply with all SCAQMD Rules regulating and controlling odors and odor sources. The Addendum Project would therefore not create objectionable odors affecting a substantial number of people. On this basis, when compared to the Certified EIR findings, no new or substantially increased odor impacts would occur under the Addendum Project.

CONCLUSIONS

Based on the analysis presented here, air pollutant and greenhouse gas emissions generated by the Addendum Project, in comparison to what could be generated by the uses allowed for the subject site under the Ontario Plan, would be comparatively diminished under the Addendum Project. No changed or new information has been identified to indicate that the potential for the Addendum Project to result in impacts that would be substantively greater than or different from those that would result from development evaluated in the Certified EIR.

Executive Summary

This report contains the findings of a habitat suitability assessment for the Delhi Sands flower-loving fly (*Rhaphiomidas terminatus abdominalis*) (DSF), a federally endangered species, for the proposed Toscana Square Project Site located in the City of Ontario, San Bernardino County, California. The purpose of this assessment is to characterize existing site conditions and assess the quality of Delhi sand soils on the project site that are known to support DSF. The habitat suitability assessment was conducted by ELMT Consulting (ELMT) biologists Thomas J. McGill, Ph.D., and Travis McGill on October 23, 2019.

The entire project site has been mapped by the United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Soil Survey as being composed of Delhi sand soils. Since Delhi sand soils are wind deposited (aeolian), the boundaries established by the USDA are not exact and change over time. Due to surrounding development, the Delhi sand soils on the project site are no longer subject to aeolian processes.

Although the northern half of the project site is an existing vineyard, there are clean Delhi sand soils within the vineyard moderately contaminated from agricultural activities associated with the vineyards, totaling approximately 23 acres. The northern half of the project site was rated as low quality to moderate quality with a habitat quality rating of 3/4.

Soils surrounding the existing winery and residence along the eastern boundary of the site were rated either as very low quality with a habitat quality rating of 2 or were rated as unsuitable with a habitat quality rating of 1 due the lack of clean Delhi sand soils, impervious surfaces, and loose gravel. Each area is approximately 3 acres in size.

The southern half of the project site supports Delhi sand soils that is no longer clean due to extensive contamination with organic material from disking and weed abatement activities. This area totals approximately 20 acres that were rated as either very low quality to low quality with a habitat quality rating of 2/3. Focused DSF presence/absence surveys were conducted on the southern half of the project site for five (5) consecutive years from 2004 to 2008 and were all negative.

Given the above ratings of Delhi sand soils and negative focused survey results, the southern half of the project site is considered poor-quality habitat and is unlikely to support a population of DSF. Similarly, the 6 acres associated with the winery and residence is considered unsuitable or poor-quality and is unlikely to support a population of DSF. The northern half, which is still an active vineyard, has clean Delhi sands with some contamination from being used as a vineyard for several decades and would be expected to have a low to moderate

potential to support DSF. The United States Fish and Wildlife Service (USFWS) will likely require focused survey for the northern half of the site.

Section 1 Introduction

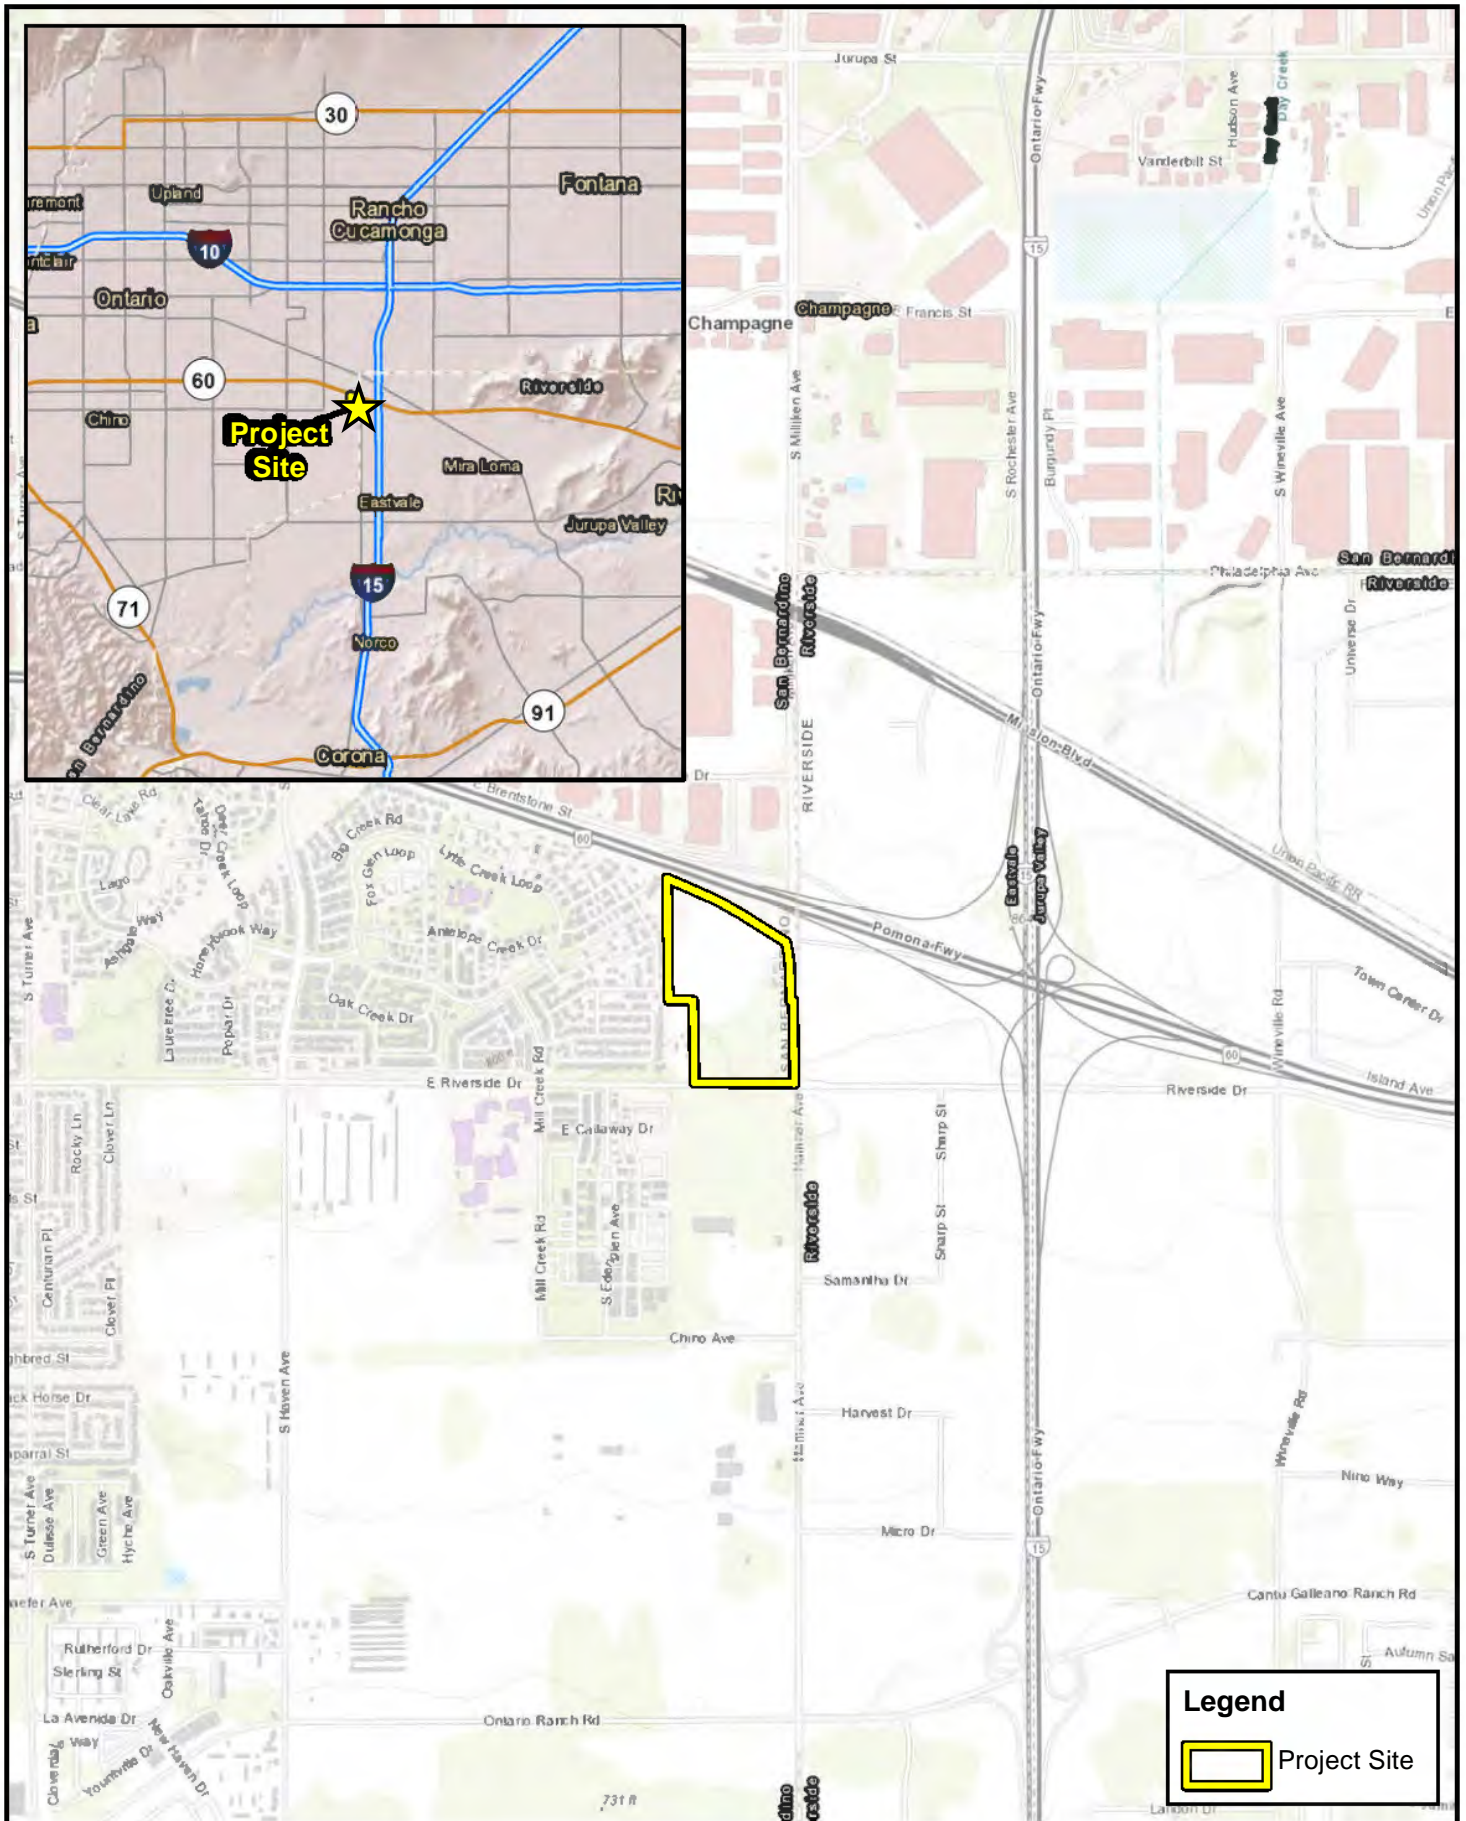

ELMT Consulting (ELMT) prepared this Delhi Sands Flower-Loving Fly (DSF) Habitat Suitability Assessment for the proposed Toscana Square Project Site (project site or site) located in the City of Ontario, San Bernardino County, California. ELMT biologists Thomas J. McGill, Ph.D., and Travis McGill inventoried and evaluated the condition of the habitat on October 23, 2019. This assessment was conducted to determine if the soils on the site have clean Delhi sand soils capable of providing suitable habitat for DSF.

1.1 PROJECT LOCATION

The project site is generally located south of State Route 60, west of Interstate 15, north of the Santa Ana River, and east of State Route 83 in the City of Ontario, San Bernardino County, California (Exhibit 1, *Regional Vicinity*). The project site is depicted on the Guasti quadrangle of the United States Geological Survey's (USGS) 7.5-minute topographic map series in Section 1 of Township 2 South, Range 7 West. Specifically, the project site is bordered by State Route 60 to the north, Hamner Avenue to the east, Riverside Drive to the south, and an existing residential development to the west (Exhibit 2, *Project Site*).

1.2 PROJECT DESCRIPTION

The Toscana Square Project proposes construction and operation of up to 359,730 square feet of industrial uses and up to 85,578 square feet of commercial uses within the southerly 20-acres of an approximately 49-acre site. As requested by the city, this includes the northerly 29 acres; although, there are no current plans to develop these parcels.

TOSCANA SQUARE PROJECT SITE
DSF SUITABILITY ASSESSMENT

Project Site

Section 2 Background

It has been generally acknowledged that DSF occur in Delhi sand soils, particularly clean dune formations composed of Aeolian sands. Conversely, soils and sands deposited by fluvial processes from the surrounding alluvial fans do not support DSF. These alluvial soils are composed of coarse sands, cobble and gravel (Tujunga soils) or coarse sands, silts and clays (Cieneba soils). In this part of San Bernardino County, the separation of soil types has been lost due to the mixing and cross contamination from years of agricultural activities, development, and other man-made disturbances.

Depending on the extent of mixing and contamination, some areas formally mapped in 1970 as Delhi sand soils no longer have potential to support DSF populations. Conversely, some areas formally mapped as Cieneba soils may now be composed of Delhi sand soils and have potential to support DSF. Six DSF experts (Ken Osborne, Greg Ballmen, Rudy Matoni, Karen Cleary-Rose, Alison Anderson and Tom McGill) used this criterion, the relative abundance of clean Delhi sand soils versus the amount of Cienba or other alluvial soils, to rate the suitability of the habitat to support DSF (Michael Brandman Associates, 2003). Soils high in gravel and alluvial materials, or high in fine materials such as silts and clays, were rated low, while soils that appear to be high in Aeolian deposited sands were rated high. This qualitative assessment of DSF habitat was further refined by considering the relative degree of soil compaction. Alluvial soils have a tendency to solidify to a hard surface pavement, while Aeolian soils are easier to penetrate and provide good substrate for DSF.

Although it has been common to attribute the presence of four common plant species California buckwheat (*Eriogonum fasciculatum*), California croton (*Croton californicus*), deer weed (*Acmispon glaber*), and telegraph weed (*Heterotheca grandiflora*) as indicators of habitat suitability, for the assessment, vegetation composition was not given much weight in making this habitat evaluation. These dominant plant species, and plant species composition of habitats, may not be directly relevant to larval development (due to likely predatory or parasitic habitat of DSF larvae) (Osborne, et al. 2003). The known immature life histories of the nine asiloid fly families, including that to which the DSF is classified, are primarily predatory and/or parasitic on other invertebrate species (mainly insects) and the presence or absence of plant species appears not to be relevant to the life history of these flies.

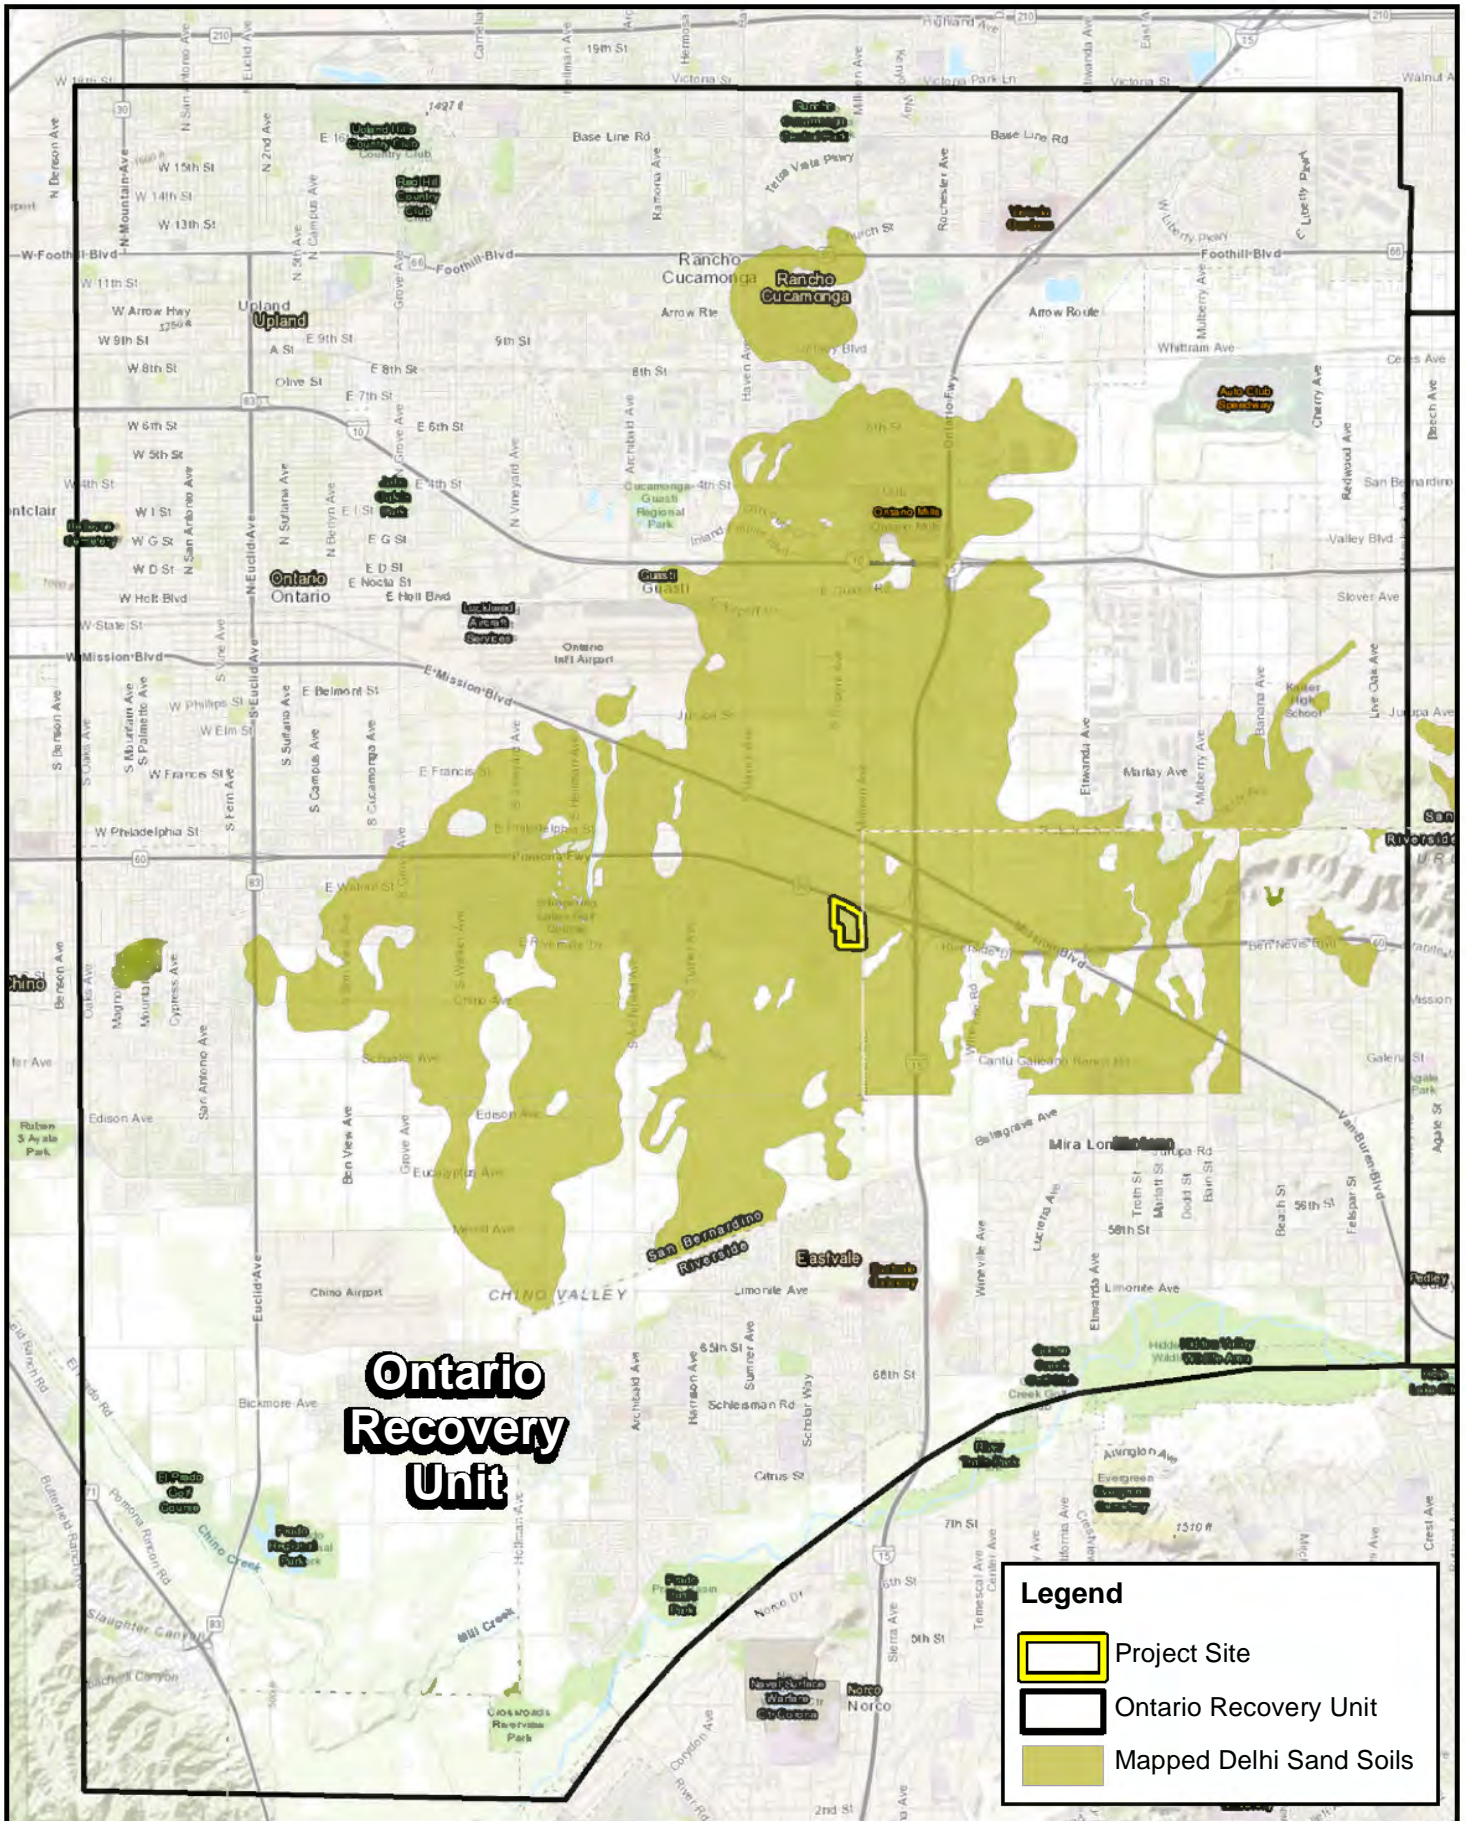

Land with suitable DSF habitat include only those areas with open, undisturbed Delhi Series soils that have not been permanently altered by residential, commercial, or industrial development, or other human actions. Areas known to contain Delhi sand soils and/or to be occupied by DSF have been divided by USFWS into three recovery units (Colton, Jurupa, and Ontario Recovery Units (USFWS, 1997)). These recovery units are defined as large geographic areas based on geographic proximity, similarity of habitat, and potential genetic exchange.

Within these three recovery units, are areas that have been previously protected by conservation easements:

- Colton: Eight sites have been permanently protected in the Colton recovery unit. In the USFWS five-year review of the DSF Recovery Plan (USFWS, 2008) the USFWS acknowledge that 8 sites had been identified as supporting DSF within the Colton Recovery Unit. These sites have been permanently protected in the Colton Recovery Unit. Within the Colton Recovery unit, the Slover/Pepper population is partially protected through the establishment of a 7.5-acre Colton Transmission Facility Reserve at the eastern terminus of Santa Ana Ave in Colton and 150-acre Conservation Bank. There are about 160-acres of undeveloped DSF habitat contiguous with these conservation areas (USFWS, 2008).
- Jurupa: Approximately 21 ha (52-acres) of DSF habitat have been protected for this population along the Jurupa Hills. Approximately 12 ha (30-acres) are protected under a conservation easement within Riverside County (“I-15/Galena” Biological Opinion; FWS-WRIV-774). An additional 9 ha (22-acres) will be placed under a conservation easement and managed in San Bernardino County as a result of interagency consultation between the USFWS and the U. S. Army Corps of Engineers (Corps) (“Fontana Business Center” Biological Opinion; FWS-SB-1788.9), in accordance with section 7 of the Endangered Species Act.
- Ontario: In 2000, 4 ha (10-acres) of DSF habitat near the intersection of Greystone and Milliken Avenues in the City of Ontario, San Bernardino County, were acquired for conservation and an additional 1.2 ha (3-acres) of contiguous habitat was avoided, but not permanently conserved. At that time, these properties were surrounded by undeveloped land with some characteristics of DSF habitat, and the USFWS anticipated that a larger DSF reserve would be created that could sustain a robust DSF population. However, most of the surrounding property has subsequently been developed for commercial or industrial uses, and it is unlikely that the existing population can be sustained over the long term.

The project site is located within the Ontario Recovery Unit, within 0.25 mile of the previously conserved habitat protected under a conservation easement (Exhibit 3, *DSF Recovery Units*). In the USFWS five-year review of the DSF Recovery Plan (USFWS, 2008), the USFWS acknowledged the habitat conditions have changed that preclude long-term conservation goals in the Ontario Recovery unit. Even though the recovery unit contains Delhi sand soils, the lack of occupied habitat was thought to preclude the unit from having long-term conservation value (USFWS, 2008). However, in 2019 an Amendment was issued to the Recovery Plan

documenting that several flies had been detected in the Ontario Recovery Unit near a small, conserved parcel. As a result DSF is no longer presumed to be absent from the Ontario Recovery Unit.

TOSCANA SQUARE PROJECT SITE
 DSF SUITABILITY ASSESSMENT
DSF Recovery Units

Section 3 Methodology

The criteria discussed in detail below were used to rate the relative abundance of clean Delhi sand soils versus the amount of Cieneba, Tujunga, or other alluvial soils, to rate the suitability of the habitat to support DSF. Soils high in gravel and alluvial materials, or high in fine materials such as silts and clays, were rated low, while soils that appear to be high in Aeolian deposited sands were rated high. This qualitative assessment of DSF habitat was further refined by considering the relative degree of soil compaction. Alluvial soils have a tendency to solidify to a hard surface pavement, while Aeolian soils are easier to penetrate and provide good substrate for DSF.

3.1 SOIL

On-site and adjoining soils were researched prior to the field visit using the United States Department of Agricultural (USDA) Natural Resources Conservation Survey (NRCS) Soil Survey for San Bernardino County, California. In addition, a review of the local geological conditions and historical aerial photographs was conducted to assess the ecological changes the project site has undergone. In particular, the USDA NRCS was reviewed to determine the location of mapped Delhi sand soils on or within the immediate vicinity of the project site.

3.2 HABITAT SUITABILITY ASSESSMENT

ELMT biologists Thomas J. McGill, Ph.D., and Travis J. McGill surveyed the project site on October 23, 2019. The habitat suitability assessment consisted of a visual and tactile inspection of all areas on the project site that contain Delhi sand soils. Based on the USDA NRCS Soil Survey, all surface soils within the project site are comprised of Delhi fine sands (Exhibit 4, *Soils*). Since the project site as a whole was mapped as supporting Delhi sand soils, the site was evaluated for the quality or purity and for its potential to support DSF. Areas were assigned one or more ratings ranging between 1 and 5, with 5 being the best quality and most suitable habitat:

1. Soils dominated by heavy deposits of alluvial material including coarse sands and gravels with little or no Delhi sand soils and evidence of soil compaction. Developed areas, non-Delhi sands soils with high clay, silt, and/or gravel content. Delhi sands extensively and deeply covered by dumping of exotic soils, rubble, trash or organic debris. *Unsuitable*.
2. Delhi sand soils are present, but the soil characteristics include a predominance of alluvial materials (Tujunga Soils and Hilmar loamy sand), or predominance of other foreign contamination. Sever and frequent disturbance (such as maintenance yard or high use roadbed). *Very Low Quality*.

3. Although not clean, sufficient Delhi sand soils are present to prevent soil compaction. Moderately contaminated Delhi sands. Delhi sands with moderate to high disturbance (such as annual disking). Sufficient Delhi sands are present to prevent soil compaction (related to contamination by foreign soils). Some sandy soils exposed on the surface due to fossorial animal activity. *Low Quality*.
4. Abundant clean Delhi sand soils with little or no foreign soils (such as alluvial material, Tujunga soils or Hilmar loamy sand) present. Moderate abundance of exposed sands on the soil surface. Low vegetative cover. Evidence of moderate degree of fossorial animal activity by vertebrates and invertebrates. May represent high quality habitat with mild or superficial disturbance. *Moderate Quality*.
5. Sand dune habitat with clean Delhi sand soils. High abundance of exposed sands on the soil surface. Low vegetative cover. Evidence (soil surface often gives under foot) of high degree of fossorial animal activity by vertebrates and invertebrates. Sand associated plant and arthropod species may be abundant. *High Quality*.

It should be noted that habitat qualities often vary spatially within a site so that conditions on a site fall within a range of qualities. Further, overall habitat quality is affected by the overall habitat value of a site.

Section 4 Results

4.1 EXISTING CONDITIONS

The approximately 49-acre project site is located within a developed area in the City of Ontario, immediately south of State Route 60 and west of Interstate 15. The project site is relatively flat with no areas of significant topographic relief. Onsite surface elevation ranges from approximately 811 feet above mean sea level (msl) on the northwestern boundary to 979 feet above msl on the southern boundary of the project site generally slopes from north to south. The project site occurs in an area surrounded by land that has undergone a conversion from agricultural land uses into industrial, commercial, and residential land uses. The project site is bordered by an existing residential development to the west, State Route 60 and industrial developments to the north, Hamner Avenue, vacant land and industrial developments to the east, and Riverside Drive and vacant land to the south.

The project site has been heavily disturbed from disking activities on the southern half of the project site, agricultural activities associated with the active vineyard on the northern half of the project site, and disturbances associated within the developments on the northeast portion of the project site. Developments on the north eastern portion of the project site consist of the San Antonio Winery, a church, a restaurant, and parking lot.

One (1) vegetation community was observed on the project site during the survey, non-native grassland/disturbed. In addition, the project site supports three (3) land cover types that would be classified as vineyard, disturbed, and developed.

Non-native Grassland/Disturbed

The southern portion of the project site supports a mixture of disturbed areas and non-native grasslands. Disturbed areas are not developed but support minimal vegetation that are dominated by non-native species and do not support naturally occurring plant communities. These areas often present when activities such as weed abatement and disking have ceased and fast-growing non-native plants are allowed to spread. Non-native grassland is dominated by non-native and invasive grasses and may contain a variety of native and other non-native species mixed within. Despite any presence of native plant species, heavy domination by non-native grasses remove naturally occurring plant communities. The fast-growing grasses that dominate this community can present as a result of disking and often lead to areas being devoid of living vegetation for portions of the year. The 2019 Habitat Assessment report refers to these areas as semi-natural herbaceous.

On the project site, the non-native grassland/disturbed areas are associated with areas that are subject to routine disking activities. Areas that had recent disking were devoid of living

vegetation or were sparsely vegetated. There was evidence, based on dead plants, that the sparser areas were dominated by brome (*Bromus* spp.) and wild oats (*Avena fatua*) earlier in the spring, prior to disking. The more vegetated areas were dominated by Russian thistle (*Salsola tragus*) and puncture vine (*Tribulus terrestris*). Other species present included golden crownbeard (*Verbesina encelioides*), short-podded mustard (*Hirschfeldia incana*), common fiddleneck (*Amsinckia intermedia*), telegraph weed (*Heterotheca grandiflora*), western ragweed (*Ambrosia psilostachya*), coyote melon (*Cucurbita californica*), and Jimson weed (*Datura stramonium*).

Vineyard

The northern portion of the site supports an active vineyard. Some weedy species occurred along the edges and intermixed throughout the vineyard. These included puncture vine, Bermuda grass (*Cynodon dactylon*), and brome grass species (*Bromus* spp.).

Disturbed

The northeast corner of the project site, north of the existing buildings has been heavily disturbed and used as an overflow parking lot with loose gravel spread throughout.

Developed

The northeast portion of the project site supports the San Antonio Winery buildings, a church, restaurant, parking lot, and ornamental landscaping.

4.2 HABITAT SUITABILITY ASSESSMENT

Per USDA NRCS Soil Survey results, Delhi sand soils have been mapped across the entire project site (refer to Exhibit 4). In addition, mapped Delhi sand soils extend north, south, east, and west of the project site in areas that primarily consists of industrial, commercial and residential developments.

Although the northern half of the project site is an existing vineyard, there are clean Delhi sand soils within the vineyard moderately contaminated from agricultural activities associated with the vineyards, totaling approximately 23 acres. The northern half of the project site was rated as low quality to moderate quality with a habitat quality rating of 3/4.

Soils surrounding the existing winery and residence along the eastern boundary of the site were rated either as very low quality with a habitat quality rating of 2 or were rated as unsuitable with a habitat quality rating of 1 due to the lack of clean Delhi sand soils, impervious surfaces, and loose gravel. Each area is approximately 3 acres in size.

The southern half of the project site supports Delhi sand soils that is no longer clean due to extensive contamination with organic material from disking and weed abatement activities. This area totals approximately 20 acres that were rated as either very low quality to low quality with a habitat quality rating of 2/3. Focused DSF presence/absence surveys were conducted on the southern half of the project site for five (5) consecutive years from 2004 to 2008 and were all negative.

Refer to Exhibit 5, *DSF Habitat Suitability* for a depiction of the habitat suitability ratings across the project site, and Table 1 below.

Table 1: Habitat Quality/Suitability Rating

	Unsuitable Rating of 1	Very Low Quality Rating of 2	Very Low Quality/ Low Quality Rating of 2/3	Low Quality/ Moderate Quality Rating of 3/4
Northern Portion	–	–	–	23 acres
Southern Portion	–	–	20 acres	–
Northeast Portion	3 acres	3 acres	–	–
TOTALS	3 Acres	3 Acres	20 acres	23 acres

TOSCANA SQUARE PROJECT SITE
DSF SUITABILITY ASSESSMENT

DSF Habitat Suitability

Section 5 Conclusion and Recommendations

The majority of the project site is underlain with Delhi sand soils with varying levels of contamination. The southern half of the project site was rated as very low quality to low quality with a habitat quality rating of 2/3. Focused presence/absence surveys were conducted on the southern half of the project site for five (5) consecutive years from 2004 to 2008, and were all negative. The northern half of the project site was rated as low quality to moderate quality with a habitat quality rating of 3/4. Soils near the northeast portion of the project site, associated with the winery and a residence were rated as very low quality with a habitat quality rating of 2 and as unsuitable with a habitat quality rating of 1.

Given the above ratings of Delhi sand soils and negative focused survey results, the southern half of the project site is considered poor-quality habitat and is unlikely to support a population of DSF. Similarly, the 6 acres associated with the winery and residence is considered poor-quality and is unlikely to support a population of DSF. The northern half, which is still an active vineyard, has clean Delhi sands with some contamination from being used as a vineyard for several decades and would be expected to have a low to moderate potential to support DSF. Given the recent sightings of DSF in the Ontario Recovery Unit, the USFWS will likely require focused survey for the northern half site. It is recommended that the applicant consult with the USFWS regarding development of this site.

If the USFWS requires focused surveys, the project applicant will need to either conduct the 2-year survey protocol to determine the presence/absence of DSF, or assume presence of DSF onsite and prepare a Habitat Conservation Plan (HCP) that will provide “Take” authority for impacts to DSF that could occur onsite. If the USFWS qualifies the site as potentially occupied but at a very low density due to the existing site conditions, a Low Effect HCP (LE-HCP) can be prepared. A LE-HCP is a streamlined process, normally allowing an application to be processed in 6 to 9 months. However, given the USFWS current workload, LE-HCP have been taking 18 to 24 months.

1.0 INTRODUCTION

The Toscana Square Project proposes construction and operation of up to 359,730 square feet of industrial uses and up to 85,578 square feet of commercial uses within the southerly 20-acres of an approximately 49-acre site. As requested by the city, this includes the northerly 29 acres; although, there are no current plans to develop these parcels. The Toscana Square Project site is located in the City of Ontario, San Bernardino County, California (Figure 1). The site is south of Interstate 60, west of Hamner Avenue, north of Riverside Avenue and east of existing residential developments (Figures 2 and 3). The site is within SE Section 1 of Township 2 South and Range 7 West of the Guasti, California, United States Geological Survey (USGS) 7.5-minute topographic quadrangle (Figure 1).

A site assessment and biological surveys were conducted at the site at the request of Applied Planning. The surveys conducted in summer 2019 included all of the project site; and consisted of;

- a general biological assessment,
- general plant and wildlife surveys,
- vegetation mapping,
- habitat assessment for assessing potential for special status plant species¹,
- habitat assessment for assessing potential for special status wildlife species²,
- focused surveys for burrowing owl (*Athene cunicularia*), and,
- general assessment for Corps Waters/wetlands and CDFW streambeds.

Focused surveys for threatened, endangered and sensitive plant or wildlife species (other than the burrowing owl) were not conducted as part of this assessment.

The entire Toscana Square Project site consists of approximately 49 acres of undeveloped land, vineyard and associated developed areas located within the built-up city limits. The project site has been significantly impacted due to years of disturbance, trash, off-road trails, footpaths and active agriculture. The site slopes gently from north to south and topography varies from an elevation of approximately 811 feet above msl along the northwestern boundary to 979 feet above msl along the southern boundary of the site (Exhibit 3).

The site has a Mediterranean type climate, with hot dry summers, relatively cool winters and sparse rains. Annual precipitation for the region averages 13.3 inches, and average annual temperature ranges from 50⁰ to 79⁰ F. Rainfall during the 2018/2019 season was above normal throughout southern California (Appendix A).

¹ Special status plant species = federal or state listed threatened or endangered species, or proposed endangered, threatened or candidate species, California Native Plant Society Species List (CNPS list 1-4), or otherwise sensitive species.

² Special status wildlife species = federal or state listed threatened or endangered species, or proposed endangered, threatened or candidate species, or otherwise sensitive species.

2.0 METHODS

2.1 Biological Resources Information sources

In addition to the site visit, field surveys, vegetation mapping, wildlife inventories, and habitat assessments information on the biological resources of the project site was obtained by reviewing existing available data. Databases such as the California Natural Diversity Database (CNDDDB 2019) and California Native Plant Society's Inventory of Rare and Endangered Vascular Plants of California (Tibor 2001) were reviewed regarding the potential occurrence of any special status species or sensitive habitat within or in close proximity of the project site.

The resources used in this thorough archival review included the following;

- California Natural Diversity Data Base (CNDDDB) for the USGS 7.5' quadrangle which comprised the study area: Guasti and neighboring quads for pertinent data,
- California Native Plant Society Inventory of rare and endangered vascular plants of California (Tibor 2001; CNPS On-line Inventory),
- Special Animals (including California Species of Special Concern), CDFW, Natural Heritage Division, August 2019,
- Special Vascular Plants, Bryophytes, and Lichens List, CDFW, Natural Heritage Division, August 2019,
- State and Federally Listed Endangered, Threatened and Rare Plants of California, CDFW, Natural Heritage Division, August 2019,
- State and Federally Listed Endangered and Threatened Animals of California, CDFW, Natural Heritage Division, August 2019,
- Published literature (Chesser *et al.* 2013, Sibley 2000, Small 1994, Moyle *et al.* 1995, Jennings and Hayes 1994, Stebbins 1985, Webster *et al.* 1980, Burt and Grossenheider 1976).

2.2 Vegetation mapping, habitat assessment for special status plant species and general botanical surveys

Vegetation mapping, habitat assessments and general botanical surveys were conducted on 17 July and 28 August 2019 by Paul Galvin. Vegetation types within the project site were mapped according the state-wide A Manual of California Vegetation, Second Edition (Sawyer *et al.* 2009). This is the mapping system recognized and recommend by regulatory agencies. Vegetation was mapped to the association level by hand on an aerial photographic base map conducted while walking throughout the study area. A general plant species list was compiled concurrently with the vegetation mapping surveys (Appendix B). Scientific and common nomenclature in Hickman (1993) was used as the taxonomic resource. The equivalent vegetation community under the old Holland classification system (Holland 1986) was also noted.

The habitat assessment for special status plant species was conducted concurrently with the vegetation mapping, and concentrated on habitats with the highest potential for yielding special status species, although all areas of the project site were checked. Each habitat within the study area was traversed on foot, examining the areas for particular features such as seeps, unique geologic types, exposures, etc., that would indicate the presence of a preferred habitat for special status plant species. Methods followed the state guidelines for Surveying and Evaluating Impacts to Special Status Native Plant Populations and Sensitive Natural Communities (CDFW 2018).

2.3 Wildlife surveys and habitat assessment for special status wildlife

Field surveys for wildlife and habitat assessment for special status wildlife species were conducted on July 17 and 28 August 2019 by Paul Galvin. All portions of the site were traversed on foot to survey each vegetation community, look for evidence of wildlife presence and conduct an assessment of potential habitat for special status species. Wildlife species were detected during the field surveys by sight, vocalizations, burrows, tracks, scat, scrapings and other sign. No specialized techniques, such as trapping, mist nets or taped calls, were used during the surveys.

Latin and common names of wildlife referred to in this report follow Powell and Hogue (1979), Hogue 1993 and NatureServe (<http://www.natureserve.org/explorer/>) for invertebrates; NatureServe for fish; North American Herpetology (<http://www.naherpetology.org/nameslist>) for amphibians and reptiles; American Ornithologists' Union Checklist of North American Birds - 7th Edition (2017) for birds; Baker et al. 2003 for mammals; and Grenfell et al. 2003, California Department of Fish and Game & California Interagency Wildlife Task Group (http://www.dfg.ca.gov/whdab/pdfs/species_list.pdf) and Perrins et al. 1983 for common names.

2.4 Focused burrowing owl surveys

Burrowing owls occur in shortgrass prairies, grasslands, lowland scrub, agricultural lands (particularly rangelands), prairies, coastal dunes, desert floors, and some artificial, open areas as a yearlong resident. They require large open expanses of sparsely vegetated areas on gently rolling or level terrain with an abundance of active small mammal burrows. As a critical habitat feature, they require the use of rodent or other burrows for roosting and nesting cover. They can also use pipes, culverts, and nest boxes (USFWS 2003, Haug *et al.* 1993, Zeiner *et al.* 1990).

Prior to conducting fieldwork previous results of wildlife surveys and habitat assessments in the project area were reviewed. Potential burrowing owl habitat occurs throughout the site and adjacent off-sites areas and all areas of the site were included in the survey.

Focused burrowing owl surveys at the project site were conducted following standard burrowing owl survey protocols and the Fish and Game methods (CDFG 2012). The

survey area consisted of all areas of the site and a buffer area of 150 meters outside the entire extent of the site boundary. All these areas were surveyed a total of two times. Focused burrowing owl surveys were conducted on 17 July and 28 August 2019 by Paul Galvin.

Surveys were conducted during the morning hours (from 1 hour before sunrise to 2 hours after sunrise). All surveys were conducted during good weather conditions (not too hot and no or only light winds).

The survey methods consisted of scanning all open areas and suitable habitat with binoculars prior to walking through that area. The biologist then conducted pedestrian walking surveys through all areas. The walking transects were spaced to ensure 100% visual coverage of the ground surface. The exact distance between transect lines varied depending on topography and vegetation but was generally no more than 75 feet. All open areas, banks, rodent burrows and any other area likely to support owl burrows were checked.

2.5 Wetland Delineation

Although a formal wetland delineation was not conducted, the project area was checked in the field for the presence of streambeds, definable channels, wetland and riparian vegetation and hydric soils. All areas of topographic relief suspected of representing historic or current drainage patterns were inspected on-foot.

Field visits were conducted on 17 July 2019 by Paul Galvin.

3.0 RESULTS

3.1 Soils

The soils on the study area are from the Delhi association and are nearly level to strongly sloping, somewhat excessively drained, very deep soils on alluvial fans in coarse-textured, wind-re-formed granitic material (NRCS Soil Survey 2019, Woodruff 1980, Knecht 1971). The following soils are mapped as occurring within the project area:

Delhi fine sand (Db)

This nearly level to strongly sloping soil is on alluvial fans that have been reworked by wind action. Typically the upper 40 inches consist of pale-brown (10YR 6/3) sand and fine sand, single grained, loose when dry. This soil is used for grapes, pasture plants, alfalfa and some citrus.

3.2 Vegetation communities

The Toscana Square Project site has been significantly impacted due to years of disking, dumping, disturbance and agriculture (Photographs 1 through 8, Appendix E). Currently the site contains one vegetation community and two additional land types; semi-natural herbaceous, vineyard and developed. Vegetation types within the project site were mapped according the state-wide A Manual of California Vegetation (Sawyer *et al.* 2009) to the extent possible. Since this system focuses on native vegetation communities many disturbed and man-made land covers do not fit cleanly into the system. The best fit possible was made to map and classify the onsite vegetation. The equivalent vegetation community under the old Holland classification system (Holland 1986) is also noted. Dirt roads were mapped as the vegetation community which they go through.

Semi-natural herbaceous

Semi-natural herbaceous stands is a type of non-native grassland community, with low to medium growing herbaceous vegetation type dominated by annual grasses and forbs of Mediterranean origin. These areas are often devoid of vegetation for portions of the year due to disking. Holland (1986) classified this habitat type as Ruderal.

On the project site, the semi-natural herbaceous stands are associated with areas of historic disking. During the site visits much of the semi-natural herbaceous stands was devoid of vegetation or sparsely vegetated with Russian thistle (*Salsola tragus*) and puncture vine (*Tribulus terrestris*). There was evidence, based on dead plants, that the site was dominated by common fiddleneck (*Amsinckia intermedia*) and brome grass (*Bromus* spp.) earlier in the spring, prior to disking.

Other species present included summer mustard (*Hirschfeldia incana*), wild oats (*Avena fatua*), lamb's quarters (*Chenopodium album*), cheeseweed (*Malva parviflora*),

horseweed (*Conyza canadensis*), telegraph weed (*Heterotheca grandiflora*), western ragweed (*Ambrosia psilostachya*), golden crown beard (*Verbesina encelioides*), Jimson weed (*Datura stramonium*) and castor bean (*Ricinus communis*).

Semi-natural herbaceous stands occurred in the entire southern portion of the site. A total of 20 acres of semi-natural herbaceous stands occurred in the project site (Figure 5).

Vineyard

An active vineyard occurred in the northern portion of the site. A few weeds occurred around the edge of the vineyard.

A total of 23.8 acres of vineyard occurred in the project site (Figure 5).

Developed

San Antonio Winery buildings, a church, restaurant, car-park and landscaping occurred adjacent the vineyard. In addition to buildings, car park, and landscaping, a number of non-native weeds occurred in this area.

A total of 4.8 acres of developed occurred in the project site (Figure 5).

3.3 Plant Inventory

Plant species at the Toscana Square Project site consisted of species associated with open and disturbed habitats. A total of 28 vascular plant species, representing 15 families were detected at the project site during the current surveys (Appendix B). About 39% (15) were native and the remaining 18 species were exotic. The best represented family was Asteraceae (8 species).

3.4 Special Status Plant Species

There are no historic site records for any special status plant species onsite (CNDDDB 2019). Based on a review of CNDDDB, the CNPS Inventory of Rare and Endangered Vascular Plants of California (Tibor 2001, CNPS 2019), and field surveys, a few special status species were identified for additional analysis, although none are expected to occur onsite (Table 1).

No special-status plants were observed on the Toscana Square Project site during the 2019 site surveys.

Figure 4: Soils at the Toscana Square Project site. Source: NRCS Soil Survey 2019.

Figure 5: Vegetation map of Toscana Square Project site (in red). Source: Google Earth, Inc.

Table 1: Special status plant species that occurred or have the potential to occur in the Toscana Square Project site: Definitions - status: Fed = federal, FE = federal endangered, FT = federal threatened, FPE = federally proposed for listing as endangered, FPT = federally proposed for listing as threatened, FC = federal candidate species, FSC = federal special concern species, state = state of California, SE = state endangered, ST = state threatened, SCE = state candidate for listing as endangered, SCT = state candidate for listing as threatened, SC = state species of concern, FP = fully protected species, none = no federal or state listing, see Appendix C for CNPS Status. Occurrence onsite: Occurs = known to occur onsite, Unlikely = could occur due to presence of suitable habitat onsite but not detected during current survey, Not Expected = does not occur due to limited suitable habitat onsite and not detected.

Scientific Name	Common Name	Status	Occurrence Onsite	Habitat
<i>Abronia villosa</i> var. <i>aurita</i> NYCTAGINACEAE	Chaparral sand-verbena	Fed: None State: None CNPS 1B.1	Unlikely	Annual herb occurs on sandy soils in desert dunes, coastal scrub and chaparral. Blooms from January-September from 80-1600 meters.
<i>Ambrosia pumila</i> ASTERACEAE	San Diego ambrosia	Fed: none State: none CNPS: 1B.1	Unlikely	Dry sunny sites, grasslands, disturbed areas, <500ft, blooms June-September.
<i>Berberis nevinii</i> BERBERIDACEAE	Nevin’s barberry	Fed: FE State: SE CNPS 1B.1	Not Expected	Coarse soils and rocky slopes in chaparral and gravelly wash margins in alluvial scrub. Found from 300 to 700 meters elevation.
<i>Calochortus plummerae</i> LILACEAE	Plummer’s mariposa lily	Fed: None State: None CNPS 4.2	Unlikely	Chaparral, Foothill Woodland, Yellow Pine Forest, Coastal Sage Scrub, Valley Grassland in open rocky or sandy areas. Blooms from May-July below 1,700 meters.
<i>Centromadia pungens</i> ssp. <i>laevis</i> ASTERACEAE	Smooth tarplant	Fed: None State: None CNPS 1B.1	Unlikely	Chenopod scrub, meadows and seeps, playas, riparian woodland, valley and foothill grassland
<i>Chorizanthe parryi</i> var. <i>parryi</i> POLYGONACEAE	Parry’s spineflower	Fed: None State: None CNPS 1B.1	Unlikely	Coastal scrub and chaparral in open gravelly or sandy areas. Blooms from April-June from 40-1075 meters.
<i>Chorizanthe polygonoides</i> var. <i>longispina</i> POLYGONACEAE	Long-spined spineflower	Fed: None State: None CNPS 1B.2	Unlikely	Annual herb occurs in chaparral, coastal scrub, meadows and seeps. Blooms from April- June from 30-1530 meters.
<i>Cladium californicum</i> CYPERACEAE	California saw-grass	Fed: None State: None CNPS 2B.2	Not Expected	Freshwater marshes in freshwater wetlands, alkali sinks and riparian areas. Blooms from June – September.

Scientific Name	Common Name	Status	Occurrence Onsite	Habitat
<i>Deinandra paniculata</i> ASTERACEAE	San Diego tarweed	Fed: None State: None CNPS: 4.2	Unlikely	Valley and foothill grassland, coastal scrub, typically in non-wetlands
<i>Dodecahema leptoceras</i> POLYGONACEAE	Slender horned spine flower	Fed: FE State: SE CNPS: 1B.1	Unlikely	Sandy places in sage scrub, grassland. Blooms from April-June from 200-760 meters.
<i>Horkelia cuneata</i> <i>ssp. puberula</i> ROSACEAE	Mesa horkelia	Fed: None State: None CNPS: 1B.1	Unlikely	Perennial herb found in dry sandy soils in the outer coast ranges in chaparral, coastal scrub, and cismontane woodland. Blooms from February through July from 70-810 meters.
<i>Imperata brevifolia</i> POACEAE	Satintail	Fed: None State: None CNPS: 2B.1	Not Expected	Chaparral, coastal sage scrub, creosote bush scrub, wetland-riparian, meadows and seeps/moist areas/perennial herb/0-500m / September-May
<i>Mucronea californica</i> POLYGONACEAE	California spineflower	Fed: None State: None CNPS: 4.2	Unlikely	Coastal strand, chaparral, foothill woodland, northern coastal scrub, coastal sage scrub, valley grassland/dunes and coastal/annual herb/0-1,000m/March-July
<i>Muhlenbergia californica</i> POACEAE	California muhly	Fed: none State: none CNPS: 4.3	Not Expected	Rivers, streams, seeps, wetlands within Chaparral, Foothill Woodland, Coastal Sage Scrub, Valley Grassland. Blooms from July-Sept below 2,500 meters.
<i>Phacelia stellaris</i> HYDROPHYLLACEAE	Brad's phacelia	Fed: None State: None CNPS 1B.1	Unlikely	Coastal scrub and dunes in open sandy areas. Blooms from spring.
<i>Pseudognaphalium leucocephalum</i> ASTERACEAE	White rabbit-tobacco	Fed: None State: None CNPS 2B.2	Unlikely	Coastal scrub, chaparral, cismontane woodland, riparian woodland, sandy, gravelly soil. Blooms from July – December.
<i>Symphotrichum defoliatum</i> ASTERACEAE	San Bernardino aster	Fed: None State: None CNPS 1B.2	Unlikely	Grassland and meadow habitat near water and in disturbed areas.

3.5 Wetlands and streambeds

A formal jurisdictional delineation was not conducted onsite; however a general assessment of onsite drainage features was conducted as part of the biological assessment.

The site does not contain any lakes, rivers, creeks, streambeds, wetlands, vernal pools, temporary rain pools or riparian areas. There are no areas onsite that are subject to the jurisdiction to the US Army Corps of Engineers, the California Department of Fish and Wildlife or Regional Water Quality Control Board.

3.6 Wildlife overview

Wildlife at the study area consisted of common species and species associated with open, disturbed habitats. The most abundant species detected during the site visit were birds such as American crow (*Corvus brachyrhynchos*), mourning dove (*Zenaida macroura*) and house finch (*Carpodacus mexicanus*). A total of 22 wildlife species were detected during the site visits, including two reptile, 17 bird and three mammalian species (Appendix D).

3.7 Special status wildlife species

No special-status wildlife species were observed on the Toscana Square Project site during the 2019 site surveys.

Based on a review of CNDDDB (2019), published literature and field surveys and assessments, a number of special status wildlife species were identified as potentially occurring onsite, including some species with historic records from the project vicinity (Table 2). All special status wildlife species with some potential to occur onsite are addressed in Table 3, the two species for which focused surveys were conducted, Delhi Sands Flower-Loving Fly (*Rhaphiomidas terminatus abdominalis*) and burrowing owls. are additionally discussed below.

Delhi Sands Flower-Loving Fly (*Rhaphiomidas terminatus abdominalis*)

Delhi Sands Flower-Loving Fly is restricted to the Delhi Sands formation, on ancient inland sand dunes. Suitable habitat does occur onsite for this fly species. Focused surveys were conducted onsite for Delhi Sands Flower-Loving Fly in 2003 through 2008 and no fly was detected (Drake 2008). Updated focused surveys were conducted in 2019 by another party and any Delhi Sands Flower-Loving Fly issues need to be discussed with that party.

Burrowing owls (*Athene cunicularia*)

Burrowing owls (*Athene cunicularia*) occur in shortgrass prairies, grasslands, lowland scrub, agricultural lands (particularly rangelands), prairies, coastal dunes, desert floors, and some artificial, open areas as a yearlong resident. They require large open expanses of sparsely vegetated areas on gently rolling or level terrain with an abundance of active small mammal burrows. As a critical habitat feature, they require the use of rodent or other burrows for roosting and nesting cover. They can also use pipes, culverts, and nest boxes (USFWS 2003, Haug *et al.* 1993, Zeiner *et al.* 1990).

No burrowing owls or their sign were detected during the surveys and there was no evidence that any burrowing owls occur onsite. No onsite burrows showed any evidence of owl occupancy. In addition, this species has not been recorded from the project site in the past.

Burrowing owls are presumed absent from the site.

3.8 Wildlife movement corridors and linkages

The terms “wildlife corridors” and “linkages” are based upon fundamental ecological concepts, but can be easily misinterpreted because: 1) universally accepted definitions of these terms have not been established; 2) each term can be interpreted using different time scales (i.e. daily, seasonal, annual and evolutionary) and spatial scales (i.e. microclimate, local, community, and landscape) which changes their meaning; 3) the areas and values change from species to species; and, 4) the understanding of how these processes work is on-going and conclusions are subject to revision. The following definitions are intended to provide a working understanding of corridors and linkages and are summarized from several sources (SCWP 2003, USCA9D 1990, Barrett and Livermore 1983, Beier 1993).

Wildlife corridor - Wildlife corridors are areas which animals can use to move from one patch of suitable habitat to another. These areas would be expected to have the least habitat fragmentation relative to surroundings areas. A wildlife corridor establishes connectivity for animals to move, live, reproduce and respond to functional ecological processes during the course of a year to several years. The quality and functionality of a particular wildlife corridor varies from species to species.

Wildlife crossings are generally small, narrow wildlife corridors that allow wildlife to pass through an obstacle or barrier such as a roadway to reach another patch of habitat. Wildlife crossings are manmade and include culverts, drainage pipes, underpasses, tunnels, and, more recently, crossings created specifically for wildlife movement over or under highways.

Both wildlife crossings and wildlife corridors function to prevent habitat fragmentation that would result in the loss of species that require large contiguous expanses of unbroken habitat and/or that occur in low densities.

Linkages – Linkages are areas that provide for long term movement or interaction of wildlife to maintain natural evolutionary and ecological patterns. Linkages are fundamental for gene flow and large scale ecological processes. These areas are usually defined by the zones of “least resistance” for the genes of a given species to move or “flow” between core reserve populations.

No wildlife corridors or linkages are known at the Toscana Square Project site. Much of the project vicinity is already developed and it is unlikely that the site is of any significance to wildlife movement.

Table 2: Special status wildlife species that occurred or have the potential to occur in the Toscana Square Project site. Definitions - status: Fed = federal, FE = federal endangered, FT = federal threatened, FPE = federally proposed for listing as endangered, FPT = federally proposed for listing as threatened, FC = federal candidate species, FSC = federal special concern species, state = state of California, SE = state endangered, ST = state threatened, SCE = state candidate for listing as endangered, SCT = state candidate for listing as threatened, CSC = California species of special concern, FP = fully protected species, CNDDDB = species listed under the states CNDDDB program, none = no federal or state listing. Occurrence onsite: Occurs = known to occur onsite, Unlikely = could occur due to presence of suitable habitat onsite but not detected during current survey, Not Expected = does not occur due to limited suitable habitat onsite and not detected.

Scientific Name	Common Name	ESA/CESA Status	Other Status	Occurrence onsite	Habitat/comments
Invertebrates					
<i>Rhaphiomidas terminatus abdominalis</i>	Delhi Sands Flower-Loving Fly	Fed: FE State: None	CNDDDB Ranked	Unlikely, absent during past focused surveys	Restricted to the Delhi Sands formation, on ancient inland sand dunes.
Amphibians					
<i>Spea hammondi</i>	Western spadefoot	ESA: None CESA: None	DFG: SSC	Not Expected, no pools present	grassland, open habitats with sandy or gravelly soil; temporary rainpools for breeding
Reptiles					
<i>Phrynosoma blainvillii</i>	coast horned lizard	ESA: None CESA: None	CDFW: SSC	Unlikely	sandy washes and open sandy areas within coastal sage scrub, grassland, chaparral, oak and riparian woodland
<i>Aspidoscelis hyperythra</i>	orange-throated whiptail	ESA: None CESA: None	CDFW: WL	Unlikely	open, sparsely covered land, often with well-drained sandy or loose soils in coastal sage scrub, grassland, chaparral, oak woodland and riparian habitats
<i>Aspidoscelis tigris stejnegeri</i>	coastal whiptail	ESA: None CESA: None	CDFW: SSC	Unlikely	Semiarid habitats with open sparsely vegetated areas, scrub, chaparral, grassland and woodland habitats
<i>Anniella stebbinis</i>	Southern California legless lizard	ESA: None CESA: None	CDFW: SSC	Unlikely	Sandy, loose loamy soils in chaparral, oak woodland, coastal sage scrub
<i>Salvadora hexalepis virgulata</i>	Coast patch-nosed snake	ESA: None CESA: None	CDFW: SSC	Unlikely	habitat generalist, associated with brushy or shrubby vegetation
<i>Arizona elegans occidentalis</i>	California glossy snake	ESA: None CESA: None	CDFW: SSC	Unlikely	arid scrub, rocky washes, grasslands, chaparral. Appears to prefer microhabitats of open areas and areas with soil loose enough for easy burrowing.
Birds					
<i>Accipiter cooperi</i>	Cooper's hawk	ESA: None	CDFW: WL	Unlikely	mature forests, open woodlands, wood edges, river

		CESA: None			groves, riparian woodland
<i>Accipiter striatus</i>	sharp-shinned hawk	ESA: None CESA: None	CDFW: WL	Unlikely	wide variety of habitats used by wintering and migrating birds, but mostly associated with woodland and scrubland; breeds in mountains, does not breed in southern California
<i>Aquila chrysaetos</i>	golden eagle	ESA: None CESA: None	CDFW: SSC, FP FW: BCC	Unlikely	Open mountains, foothills, plains, open country
<i>Buteo regalis</i>	ferruginous hawk	ESA: None CESA: None	CDFW: WL FW: BCC	Unlikely	plains, prairies, grasslands, does not breed in southern California
<i>Buteo swainsoni</i>	Swainson’s hawk	ESA: None CESA: None	FW: BCC	Unlikely	prairies, grasslands, more widespread in migration
<i>Circus cyaneus</i>	northern harrier	ESA: None CESA: None	CDFW: SSC	Unlikely	grassland, marshes, agricultural land, open areas in scrub and chaparral; ground or shrub nesting
<i>Elanus leucurus</i>	white-tailed kite	ESA: None CESA: None	CDFW: FP	Unlikely	forages in grasslands; nests and roosts in oak and riparian woodland
<i>Falco columbarius</i>	merlin	ESA: None CESA: None	CDFW: WL	Unlikely	nests in open woodlands, savanna, does not breed in southern California, woodlands, open areas in winter, migration
<i>Falco mexicanus</i>	prairie falcon	ESA: None CESA: None	CDFW: WL FW: BCC	Unlikely	open arid country, grasslands, more widespread in winter
<i>Falco peregrinus anatum</i>	American peregrine falcon	ESA: SE CESA: None	CDFW: FP FW: BCC	Unlikely	nest on cliffs or rock outcroppings, usually near water; forages over open country (grassland, scrub, marshes)
<i>Asio flammeus</i>	short-eared owl	ESA: None CESA: None	CDFW: SSC	Unlikely	grasslands, open habitats
<i>Athene cunicularia</i>	burrowing owl	ESA: None CESA: None	CDFW: SSC FW: BCC	Unlikely	grasslands, farmland and other open habitats
<i>Lanius ludovicianus</i>	loggerhead shrike	ESA: None CESA: None	CDFW: SSC	Unlikely	grassland, scrub and other open habitats with perching structures; nests in trees and shrubs
<i>Eremophila alpestris actia</i>	California horned lark	ESA: None CESA: None	CDFW: WL	Unlikely	Open areas with little or no ground cover, such as grassland or ruderal vegetation
<i>Agelaius tricolor</i>	Tricolored blackbird	ESA: None CESA: ST	CDFW: SSC FW: BCC	Unlikely	Highly social and gregarious bird forms large colonies, typically in marshes and agricultural areas
Mammals					

<i>Lasiurus xanthinus</i>	Western yellow bat	ESA: None CESA: None	CDFW: SSC WBWG: H	Unlikely	Usually occur in riparian, oak or pinyon-juniper woodland and urban areas, Roosts in trees
<i>Antrozous pallidus</i>	pallid bat	ESA: None CESA: None	CDFW: SSC WBWG: H	Unlikely	Coastal sage scrub, oak woodland and chaparral; roosts in caves, mines, rock crevices, trees and buildings
<i>Macrotus californicus</i>	California leaf-nosed bat	ESA: None CESA: None	CDFW: SSC WBWG: H	Unlikely	roosts in caves or old mines
<i>Corynorhinus townsendii</i>	Western big-eared bat	ESA: None CESA: None	CDFW: SSC WBWG: H	Unlikely	roosts in caves, old mines or buildings
<i>Myotis thysanodes</i>	fringed myotis	ESA: None CESA: None	CDFW: SSC WBWG: H	Unlikely	caves, old buildings
<i>Myotis volans</i>	long-legged myotis	ESA: None CESA: None	CDFW: SSC WBWG: H	Unlikely	buildings, pockets and crevices in rocks
<i>Myotis yumanensis</i>	Yuma myotis	ESA: None CESA: None	CDFW: SSC WBWG: LM	Unlikely	caves, tunnels and buildings in arid areas
<i>Eumops perotis californicus</i>	California mastiff bat	ESA: None CESA: None	CDFW: SSC WBWG: H	Unlikely	widespread forager; roosts in cliffs and buildings
<i>Chaetodipus fallax fallax</i>	Northwestern San Diego pocket Mouse	ESA: None CESA: None	CDFW: SSC	Unlikely	occurs in open scrub and grassland areas, in the valleys and foothills
<i>Onychomys torridus ramona</i>	southern grasshopper mouse	ESA: None CESA: None	CDFW: SSC	Unlikely	annual grassland and coastal sage scrub
<i>Dipodomys merriami parvus</i>	San Bernardino kangaroo rat	ESA: FE CESA: None	CDFW: SSC	Unlikely, due to inappropriate soils	confined to primary and secondary alluvial fan scrub habitats, with sandy soils deposited by fluvial (water) rather than aeolian (wind) processes. Burrows are dug in loose soil, usually near or beneath shrubs
<i>Perognathus longimembris brevinasus</i>	Los Angeles little pocket mouse	ESA: None CESA: None	DFG: CSC CNDDDB Ranked	Unlikely	occurs in lower elevation scrub and grassland with open ground and fine, sandy soil
<i>Neotoma lepida intermedia</i>	San Diego desert woodrat	Fed: none State: none	CDFW: SSC	Unlikely	cactus patches and rock outcroppings in coastal sage scrub
<i>Lepus californicus bennettii</i>	San Diego black-tailed jackrabbit	ESA: None CESA: None	CDFW: SSC	Unlikely	coastal sage scrub, grassland and chaparral
<i>Taxidea taxus</i>	American badger	ESA: None CESA: None	CDFW: SSC	Unlikely	widespread in natural habitats

4.0 BIOLOGICAL CONSTRAINTS

There are a number of potential biological constraints at Toscana Square Project site. Any significant impacts to these biological constraints that would result from the proposed project would require appropriate mitigation.

Significance of impacts to biological resources are assessed using impact significance threshold criteria, which reflect the policy statement contained in California Environmental Quality Act (CEQA), Section 21001(c) of the California Public Resources Code. Accordingly, the State Legislature has established the following policy of the State of California:

Prevent the elimination of fish or wildlife species due to man's activities, ensure that fish and wildlife populations do not drop below self-perpetuating levels, and preserve for future generations representations of all plant and animal communities..

Determining whether a project may have a significant effect, or impact, plays a critical role in the CEQA process. According to the CEQA Guidelines, (Section 15064.7, Thresholds of Significance), each public agency is encouraged to develop and adopt (by ordinance, resolution, rule, or regulation) thresholds of significance that the agency uses in the determination of the significance of environmental effects. A threshold of significance is an identifiable quantitative, qualitative or performance level of a particular environmental effect, non-compliance with which means the effect will normally be determined to be significant by the agency and compliance with which means the effect normally will be determined to be less than significant. In the development of thresholds of significance for impacts to biological resources CEQA Guidelines provides guidance primarily in Section 15065, Mandatory Findings of Significance, and the CEQA Guidelines, Appendix G, Environmental Checklist Form. Section 15065(a) states that a project may have a significant effect where:

The project has the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or wildlife community, reduce the number or restrict the range of an endangered, rare, or threatened species, ..

Therefore, impacts to biological resources are considered potentially significant (before considering offsetting mitigation measures) if one or more of the following criteria discussed below would result from implementation of the proposed project;

Appendix G of the State CEQA Guidelines indicate that a project may be deemed to have a significant effect on the biological resources if the project is likely to:

- a) *Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service.*
- b) *Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service.*
- c) *Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means.*
- d) *Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites.*
- e) *Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance.*
- f) *Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan.*

4.1 List of the potential biological constraints at the Toscana Square Project site

- 1. Nesting birds.
- 2. Special status wildlife species
 - a. Updated surveys for Delhi Sands Flower-Loving Fly (*Rhaphiomidas terminatus abdominalis*) were conducted in 2019 by another party. This report needs to be consulted to confirm if Delhi Sands Flower-Loving Fly are still absent from the site.

4.2 Permits and consultations likely required

As a result of these potential biological constraints, any proposed project at the Toscana Square Project would require the following permits/consultations/co-ordination;

California Environmental Quality Act (CEQA);
CEQA Document

Federal Migratory Bird Treaty Act of 1918 (MBTA);

The MBTA governs the taking and killing of migratory birds, their eggs, parts, and nests and prohibits the take of any migratory bird, their eggs, parts, and nests. No take of migratory birds is allowed under this act. Construction work must comply with the MBTA.

4.3 Recommended mitigation measures

- 1) *Avoidance of Nesting Migratory Birds: If possible, all vegetation removal activities shall be scheduled from August 1 to February 1, which is outside the general avian nesting season. This would ensure that no active nests would be disturbed and that removal could proceed rapidly. If vegetation is to be cleared during the nesting season, all suitable habitat will be thoroughly surveyed within 72 hours prior to clearing for the presence of nesting birds by a qualified biologist (Project Biologist). The Project Biologist shall be approved by the City and retained by the Applicant. The survey results shall be submitted by the Project Applicant to the City Planning Department. If any active nests are detected, the area shall be flagged and mapped on the construction plans along with a minimum 300-foot buffer, with the final buffer distance to be determined by the Project Biologist. The buffer area shall be avoided until, as determined by the Project Biologist, the nesting cycle is complete or it is concluded that the nest has failed. In addition, the Project Biologist shall be present on the site to monitor the vegetation removal to ensure that any nests, which were not detected during the initial survey, are not disturbed.*

- 2) *Avoidance of Nesting Burrowing Owls: No more than 72 hours prior to any site disturbances, focused surveys for the burrowing owl shall be conducted. If absence of this species is confirmed, project work can proceed. If however, burrowing owl is located on site, the appropriate resource agencies (CDFW and USFWS) shall be contacted. The Project Applicant shall consult with the wildlife agencies regarding the most appropriate methods and timing for removal of owls. As necessary, owls will be actively evicted following agency approved protocols (i.e., placing a one-way door at the burrow entrance to ensure that owls cannot access the burrow once they leave). Any such active eviction shall occur outside of the breeding/nesting season. That is, active eviction shall be accomplished between September 1 and February 15. If more than 30 days has elapsed between owl eviction and completion of clearing and grubbing activities, a subsequent survey for the burrowing owl shall be conducted to ensure that owls have not re-populated the site. Any reoccupation by owls will require subsequent protocol active eviction.*

6.2 Appendix B: Plant species detected at the Toscana Square Project site, 2019.

SCIENTIFIC NAME (SYNONYM)	COMMON NAME
ANGIOSPERMAE	FLOWERING PLANTS
ANGIOSPERMS - DICOTYLEDONES	DICOTS
ANACARDIACEAE	SUMAC or CASHEW FAMILY
<i>Schinus sp.*</i>	Peruvian Pepper Tree
APOCYNACEAE	DOGBANE FAMILY
<i>Asclepias eriocarpa</i>	Indian Milkweed
ASTERACEAE	SUNFLOWER FAMILY
<i>Ambrosia artemisiifolia*</i>	Common Ragweed
<i>Baccharis salicifolia</i>	Mulefat
<i>Conyza canadensis</i>	Common Horseweed
<i>Helianthus annuus</i>	Western Sunflower
<i>Heterotheca grandiflora</i>	Telegraph Weed
<i>Lactuca serriola*</i>	Prickly or Wild Lettuce
<i>Oncosiphon piluliferum*</i>	Stinknet
<i>Verbesina encelioides*</i> (= <i>V. encelioides</i> ssp. <i>exauriculata</i>)	Golden Crownbeard
BORAGINACEAE	BORAGE FAMILY
<i>Amsinckia intermedia</i> (= <i>A. menziesii</i> var. <i>e.</i>)	Common Fiddleneck
BRASSICACEAE	MUSTARD FAMILY
<i>Hirschfeldia incana*</i>	Shortpod or Summer Mustard
CACTACEAE	CACTUS FAMILY
<i>Opuntia sp.</i>	Prickly Pear
CHENOPODIACEAE	GOOSEFOOT FAMILY
<i>Chenopodium chenopodioides*</i>	Pigweed, Goosefoot
<i>Salsola tragus*</i>	Russian Thistle
CUCURBITACEAE	GOURD FAMILY
<i>Marah macrocarpa</i>	Man-Root, Wild Cucumber
EUPHORBIACEAE	SPURGE FAMILY
<i>Ricinus communis*</i>	Castor-Bean
<i>Acmispon americanus</i> var. <i>americanus</i> (= <i>Lotus purshianus</i> var. <i>purshianus</i>)	American Lotus
GERANIACEAE	GERANIUM FAMILY
<i>Erodium botrys*</i>	Long-Beaked Filaree
SOLANACEAE	NIGHTSHADE FAMILY
<i>Datura wrightii</i> (= <i>D. meteloides</i>)	Western Jimsonweed
VITACEAE	GRAPE FAMILY
<i>Vitis vinifera*</i>	Cultivated Grape, Wine Grape
ZYGOPHYLLACEAE	CALTROP FAMILY
<i>Tribulus terrestris</i>	Puncture Vine
ARECACEAE	PALM FAMILY
<i>Phoenix sp.*</i>	Exotic Palm
POACEAE	GRASS FAMILY
<i>Avena fatua*</i>	Wild Oat
<i>Bromus sp.</i>	Brome grass
<i>Bromus diandrus*</i>	Common Ripgut Grass

<i>Bromus madritensis ssp. madritensis</i> *	Foxtail Chess
<i>Cynodon dactylon</i> *	Bermuda Grass
KEY: Asterisk (*) = non-native species or cultivated; + = sensitive species; Sources: Taxonomy - Hickman (1993), http://ucjeps.berkeley.edu/interchange.html , November 2018; Common names and non-native species designations according to Roberts (1998), then Hickman (1993)	

6.3 Appendix C: California Native Plant Society Categories

CNPS Status based on California Native Plant Society's Inventory of Rare and Endangered Vascular Plants of California (Tibor 2001):

List 1A: Plants Presumed Extinct in California

The plants of List 1A are presumed extinct because they have not been seen or collected in the wild for many years. Although most of them are restricted to California, a few are found in other states as well. There is a difference between "extinct" and "extirpated." A plant is extirpated if it has been locally eliminated. It may be doing quite nicely elsewhere in its range. All of the plants constituting List 1A meet the definitions of Sec. 1901, Chapter 10 (Native Plant Protection) of the California Department of Fish and Game Code and are eligible for state listing.

List 1B: Plants Rare, Threatened or Endangered in California and Elsewhere

The plants of List 1B are rare throughout their range. All but a few are endemic to California. All of them are judged to be vulnerable under present circumstances or to have a high potential for becoming so because of their limited or vulnerable habitat, their low numbers of individuals per population (even though they may be wide ranging), or their limited number of populations. All of the plants constituting List 1B meet the definitions of Sec. 1901, Chapter 10 (Native Plant Protection) of the California Department of Fish and Game Code and are eligible for state listing.

List 2: Plants Rare, Threatened or Endangered in California, But More Common Elsewhere

Except for being common beyond the boundaries of California, the plants of List 2 would have appeared on List 1B. Based on the "Native Plant Protection Act," plants are considered without regard to their distribution outside the state. All of the plants constituting List 2 meet the definitions of Sec. 1901, Chapter 10 (Native Plant Protection) of the California Department of Fish and Game Code and are eligible for state listing.

List 3: Plants About Which We Need More Information—A Review List

The plants that comprise List 3 are an assemblage of taxa that have been transferred from other lists or that have been suggested for consideration. The necessary information that would assign most to a sensitivity category is missing.

List 4: Plants of Limited Distribution—A Watch List

The plants in this category are of limited distribution in California and their vulnerability or susceptibility to threat appears low at this time. While these plants cannot be called "rare" from a statewide perspective, they are uncommon enough that their status should be monitored regularly. Many of them may be significant locally. Should the degree of endangerment or rarity of a plant change, they will be transferred to a more appropriate list.

Threat Code Extensions and their meanings:

- .1- Seriously endangered in California
- .2- Fairly endangered in California
- .3- Not very endangered in California

6.4 Appendix D: Wildlife species detected at the Toscana Square Project site, 2019.

FAMILY/SPECIES NAME	COMMON NAME
REPTILIA	REPTILES
PHRYNOSOMATIDAE	ZEBRA-TAILED, EARLESS, FRING-TOED, SPINY, TREE, SIDE-BLOTCHED AND HORNED LIZARDS
<i>Sceloporus occidentalis</i>	Western Fence Lizard
<i>Uta stansburiana</i>	Common Side-blotched Lizard
ARDEIDAE	BITTERNs, HERONS AND ALLIES
<i>Ardea alba</i>	Great Egret
ACCIPITRIDAE	HAWKS, KITES, EAGLES AND ALLIES
<i>Buteo jamaicensis</i>	Red-tailed Hawk
COLUMBIDAE	PIGEONS AND DOVES
<i>Columba livia</i>	Rock Pigeon
<i>Streptopelia decaocto</i>	Eurasian Collared-Dove
<i>Zenaida macroura</i>	Mourning Dove
FALCONIDAE	CARCARAS AND FALCONS
<i>Falco sparverius</i>	American Kestrel
TYRANNIDAE	TYRANT FLYCATCHERS
<i>Sayornis nigricans</i>	Black Phoebe
<i>Sayornis saya</i>	Say's Phoebe
<i>Tyrannus vociferans</i>	Cassin's Kingbird
CORVIDAE	JAYS AND CROWS
<i>Corvus brachyrhynchos</i>	American Crow
<i>Corvus corax</i>	Common Raven
HIRUNDINIDAE	SWALLOWS
<i>Hirundo rustica</i>	Barn Swallow
MIMIDAE	MOCKINGBIRDS AND THRASHERS
<i>Mimus polyglottos</i>	Northern Mockingbird
STURNIDAE	STARLINGS
<i>Sturnus vulgaris</i>	European Starling
ICTERIDAE	BLACKBIRDS
<i>Icterus cucullatus</i>	Hooded Oriole
FRINGILLIDAE	FRINGILLINE AND CARDUELINE FINCHES
<i>Haemorhous mexicanus</i>	House Finch
PASSERIDAE	OLD WORLD SPARROWS
<i>Passer domesticus</i>	House Sparrow
MAMMALIA	MAMMALS
LEPORIDAE	RABBITS & HARES
<i>Sylvilagus audubonii</i>	Desert Cottontail
SCIURIDAE	SQUIRRELS, CHIPMUNKS & MARMOTS
<i>Otospermophilus beecheyi</i>	California Ground Squirrel
GEOMYIDAE	POCKET GOPHERS
<i>Thomomys bottae</i>	Botta's Pocket Gopher

Hydrology Report

APPENDIX D
Noise Impact Assessment

October 6, 2020

Mr. Ross Geller
Applied Planning, Inc.
11762 De Palma Road, 1-C 310
Corona, CA 92883

SUBJECT: THE VINE NOISE IMPACT ASSESSMENT MEMORANDUM

Urban Crossroads, Inc. is pleased to provide the following Noise Impact Assessment Memorandum for the proposed The Vine Project (Addendum Project). The Addendum Project is located at the northwesterly corner of Milliken Avenue and East Riverside Drive in the City of Ontario, as shown on Exhibit A. The purpose of this work effort is to determine if the Addendum Project would result in new or substantially different noise impacts than those considered and addressed in The Ontario Plan EIR (Certified EIR).

ADDENDUM PROJECT SUMMARY

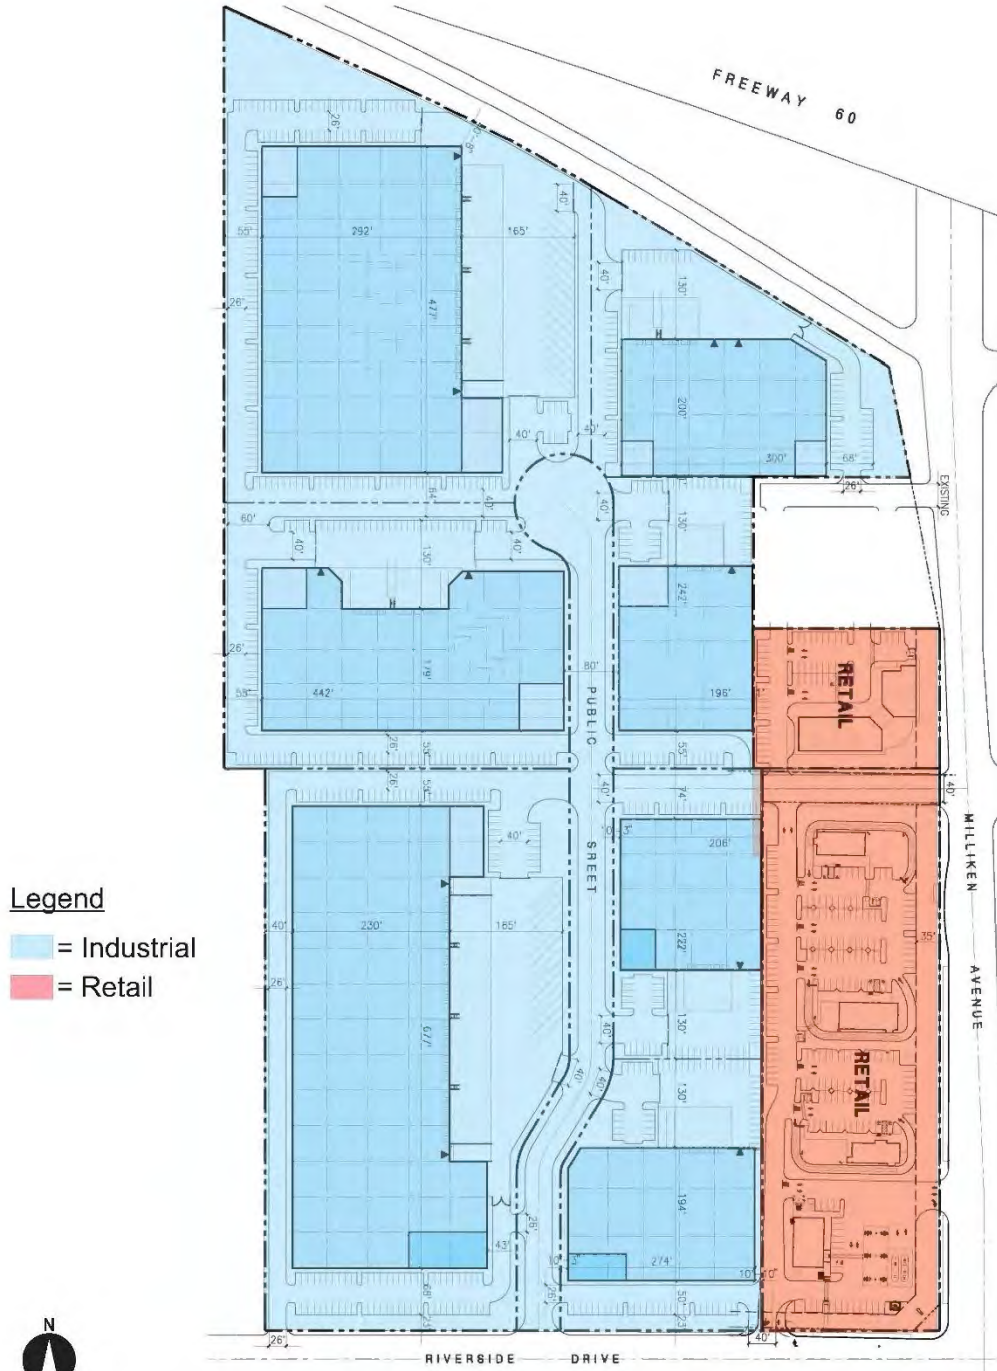

The Addendum Project considered herein is proposing to develop 557,720 square feet (80% of the total industrial square footage) of general light industrial use, 139,430 square feet (20% of the total industrial square footage) of manufacturing use, and 26,700 square feet of retail use within the approximate 44-acre Project site.

Within this analysis, likely maximum noise impacts of the above uses are evaluated. At the discretion of the City, uses differing from those evaluated here, and that could result in substantially different noise impacts than the uses evaluated, would be subject to additional CEQA environmental analysis. Ultimate scope and configuration of the Addendum Project uses would be as approved by the City. The Project site location is presented at Exhibit A. The Addendum Project Land Use Concept is presented at Exhibit B.

EXHIBIT A: LOCATION MAP

EXHIBIT B: LAND USE CONCEPT

Note: Building orientations and configurations are illustrative only.

PROPOSED LAND USE DESIGNATIONS

PROJECT SITE

The Project site existing Policy Plan Land Use designation and Zoning designation would be amended to allow for development and land uses proposed under the Addendum Project. More specifically, the existing Policy Plan Land Use designation of the Project site, “Mixed Use” (Area 12), would be amended to “Industrial” and General Commercial.” The Project site is currently zoned Specific Plan. As amended under the Addendum Project, Zoning of the Project site would be changed to “IL” (Light Industrial) and “CC” (Community Commercial).

ADJACENT PROPERTIES

Policy Plan (General Plan) Land Use and Zoning designations of adjacent properties are summarized below. The Addendum Project would not affect Land Use and Zoning designations of adjacent properties.

North SR-60 (Pomona) freeway/Caltrans Right-of-Way.

South Policy Plan Land Use Designation: General Commercial
Zoning: Specific Plan

East City of Eastvale General Plan: Business Park
City of Eastvale Zoning: C-P-S - Scenic Highway Commercial (southerly adjacent to SR-60); I-P - Industrial Park (northerly of East Riverside Drive)

West Policy Plan Land Use Designation: Open Space – Non-Recreation
Zoning: “UC” (Utilities Corridor)

EXISTING LAND USES

PROJECT SITE

A portion of the Project site is currently developed with two existing buildings. Information regarding the demolition quantities is not readily available. As such, the total building square footage of structures that would be demolished was conservatively estimated to be 27,491 square feet. It should be noted that this quantity is inclusive of demolition of other structures (i.e. sheds) and existing asphalt/pavement.

ADJACENT PROPERTIES

Existing land uses of adjacent properties are summarized below. The Addendum Project would not affect adjacent property land uses.

North SR-60 (Pomona) freeway/Caltrans Right-of-Way

- South* Southerly of the Project site, across East Riverside Drive, properties are currently vacant and undeveloped but are approved for Specific Plan Community Commercial uses (Edenglen Specific Plan)
- East* Easterly of the Project site, across Milliken Avenue and adjacent to the southerly portions of the Project site properties are City of Eastvale properties developed with light industrial uses; adjacent to the northerly portions of the Project site are City of Eastvale properties are vacant and undeveloped.
- West* An existing SCE easement defines the westerly Project boundary. A commercial nursery is located within the SCE easement adjacent to the Project site southern 20 acres. Single family homes (Creekside) are located westerly of the SCE easement.

ONTARIO PLAN EIR NOISE/VIBRATION IMPACT SIGNIFICANCE FINDINGS

The Ontario Plan EIR determined that development of the City pursuant to the Policy Plan would result in the following significant and unavoidable noise/vibration impacts:

- Transportation-Source Noise Impacts
- Construction-Source Noise Impacts
- Construction-Source Vibration Impacts
- Airport-Source Noise Impacts

Where impacts were determined to be significant and unavoidable, the EIR identifies mitigation that would reduce the impact(s) to the extent feasible. The Ontario Plan EIR further determined that all other noise/vibration impacts resulting from development of the City pursuant to the Policy Plan would not be potentially significant or would be reduced to levels that would be less-than-significant through implementation of the Ontario Plan EIR mitigation measures. Please refer also to Ontario Plan EIR, available at the following link: <http://www.ontarioplan.org/environmental-impact-report/>.

NOISE STANDARDS
