

City of Ontario List of Field Evaluation Organization Laboratories

Field Evaluation Organization Laboratories must apply to and be approved by the Building Official to perform field evaluation on specific electrical equipment. These laboratories must have a professional electrical engineer registered in California on their permanent full-time staff. For each individual project, test reports shall be submitted for approval by the Building Official and shall bear the professional engineer's signature as required by the State of California. The City of Ontario Building Department will perform actual field inspection for the approval of installed electrical equipment. The list below represents acceptable Field Evaluation Organization Laboratories:
