IT SPECIALIST
SENIOR IT SPECIALIST

AGENCY/DEPARTMENT:
Administrative Services/Information Technology

Reports to: IT Operations Manager
Supervises: N/A

Approved By HR Director: [Signature]
Date Approved: 1/31/06
Date of Last Revision: 04/28/2005

JOB SUMMARY: Under general direction, performs a wide range of work assignments supporting citywide information technology systems; maintains, troubleshoots, and repairs computer systems, hardware, and computer peripherals; and performs other related work as necessary.

DISTINGUISHING CHARACTERISTICS: The IT Specialist is characterized by journey level performance in a variety of information technology operations and technical support assignments. The Senior IT Specialist performs work at the advanced journey level and is responsible for independent management of projects involving systems of greater size, complexity, and variety.

EXAMPLES OF ESSENTIAL FUNCTIONS:

1. Responds to user help desk requests; provides user technical support.
2. Troubleshoots problems with software, personal computers (PCs), printers and peripherals.
3. Dispatches problems to appropriate sources for resolution when appropriate.
4. Installs, configures, tests, maintains, and updates computers hardware, software and network equipment (e.g., fax server, terminal server, and remote access server).
5. Manages user accounts and assists with system network administration and security.
6. Supports and maintains user account information including rights, security, and systems groups.
7. Provides instruction and training in the operation of computer equipment and software applications.
8. Documents, maintains, upgrades, and replaces hardware and software systems.
9. Maintains service request records and knowledge base.
10. Participates in the identification and evaluation of hardware and software requirements.
11. Participates in the inventory of hardware and software.

SENIOR IT SPECIALIST
IN ADDITION TO THE ABOVE, FUNCTIONS MAY ALSO INCLUDE:
14. Assists IT staff and users in resolving complex computer, hardware, software, and peripheral problems.
15. Monitors performance of computer servers and business networks; investigates, troubleshoots and repairs problems.
16. Evaluates system requirements, applications capabilities, and database configurations; tests new hardware, software, and peripherals technologies in pilot environment.
17. Oversees projects; prepares and maintains project documentation.
18. Liaisons with other City departments, outside agencies, vendors and consultants.
19. Maintains and supports daily scheduled systems and database backups.
20. Conducts research; identifies improvements and enhancements to current system based upon
types of problems encountered and user comments.
22. Provides technical expertise support to lower level staff; allocates work ticket assignments.
23. May coordinate special projects, such as wiring reconstruction and other projects.
