2008	Citrus Ford, Citrus Motors Ontario Inc, Citrus Auto Body, Citrus Motors Ontario Service Department, Hertz Local Edition
2010	Citrus Motors Ontario Inc, Hertz Local Edition
2014	Citrus Motors Ontario Inc

According to the city directory review, the subject property has been occupied by Citrus Ford and utilized for automotive sales, service and repair operations.

City Directory Search for Adjacent Properties	
Year(s)	**Occupant Listed**
2003	Carl's Jr Restaurant (4555 Jurupa St)
2008	Carl's Jr Restaurant (4555 Jurupa St)
2010	Maney Aircraft; Pacific Equipment and Irrigation (1305 S. Wanamaker Ave)
	Universal Plastic Bag Co (1309 S. Wanamaker Ave)
2014	Maney Aircraft; Pacific Equipment and Irrigation (1305 S. Wanamaker Ave)
	Citrus Lincoln Mercury, Ontario Kia (1650 S Woodruff Way)
	Universal Plastic Bag Co (1309 S. Wanamaker Ave)
	Citrus Lincoln Mercury (1650 S Woodruff Way)

Based on the city directory review, no environmentally sensitive listings were identified for the adjacent property addresses.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from EDR on February 26, 2020. The following was observed on the subject property and adjacent properties during the topographic map review:

Date: 1941	
Subject Property:	Depicted as undeveloped
North:	Depicted as undeveloped
South:	Depicted as undeveloped
East:	Depicted as undeveloped
West:	Depicted as undeveloped

Date: 1944	
Subject Property:	No significant changes depicted
North:	No significant changes depicted
South:	No significant changes depicted
East:	No significant changes depicted
West:	No significant changes depicted

Date: 1953	
Subject Property:	Depicted as agricultural land
North:	Depicted as agricultural land
South:	Depicted as agricultural land
East:	Depicted as agricultural land
West:	Depicted as agricultural land

Date: 1954	
Subject Property:	No significant changes depicted
North:	No significant changes depicted
South:	No significant changes depicted
East:	No significant changes depicted
West:	No significant changes depicted

Date: 1966	
Subject Property:	No significant changes depicted
North:	No significant changes depicted
South:	No significant changes depicted
East:	No significant changes depicted
West:	No significant changes depicted

Date: 1973	
Subject Property:	No significant changes depicted
North:	No significant changes depicted
South:	No significant changes depicted
East:	No significant changes depicted
West:	No significant changes depicted

Date: 1976	
Subject Property:	No significant changes depicted
North:	No significant changes depicted
South:	No significant changes depicted
East:	No significant changes depicted
West:	No significant changes depicted

Date: 1981	
Subject Property:	No significant changes depicted
North:	No significant changes depicted
South:	Depicted as agricultural land across a roadway
East:	Depicted as occupied by Interstate 15 and associated ramps followed by vacant land
West:	No significant changes depicted

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

Regulatory Agency Data	
Name of Agency:	California Department of Toxic Substances Control (DTSC)
Point of Contact:	N/A
Agency Address:	5796 Corporate Avenue, Cypress, California
Agency Phone Number:	(714) 484-5300
Date of Contact:	March 6, 2020
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property (Citrus Motors Ontario Inc at 1375 Woodruff Way.) was issued a generator number (CA0000008086) in December 1995. Numerous manifests for the generation of various hazardous materials, including halogenated solvents were associated with this number between 1993 and 2018. The generator number is currently still active. Additionally, the subject property (Citrus Motors Ontario Inc at 1315 Wanamaker Ave) was issued a generator number (CAL000123461) in January 1994. One manifest for the generation of 1.78 tons of unspecified aqueous solution was associated with this number in 1994.

4.1.2 Health Department

Regulatory Agency Data	
Name of Agency:	San Bernardino County Environmental Health Services (SBCHS)
Point of Contact:	Tracie Thompson
Agency Address:	385 North Arrowhead Avenue, 2nd floor, San Bernardino, California
Agency Phone Number:	(800) 442-2283
Date of Contact:	March 6, 2020
Method of Communication:	Faxed Request
Summary of Communication:	As of the date of this report, Partner has not received a response from the SBCHS for inclusion in this report.

4.1.3 Fire Department

Regulatory Agency Data	
Name of Agency:	San Bernardino County Fire Department, Hazardous Materials Division
Point of Contact:	Ms. Maria Molina
Agency Address:	620 E Street, San Bernardino, California
Agency Phone Number:	929 386 8468
Date of Contact:	March 5, 2020
Method of Communication:	In person
Summary of Communication:	As of the date of this report, Partner has not received a response from the SBCFD for inclusion in this report.

4.1.4 Air Pollution Control Agency

Regulatory Agency Data	
Name of Agency:	Air Quality Management District (AQMD)
Point of Contact:	N/A
Agency Address:	21865 Copley Drive, Diamond Bar, California
Agency Phone Number:	(909) 396-2000
Date of Contact:	March 6, 2020
Method of Communication:	Online
Summary of Communication:	According to reviewed records, the subject property has been equipped with a 2,000-gallon gasoline aboveground storage tank and various spray-paint booth since at least 1993.

4.1.5 Regional Water Quality Agency

Regulatory Agency Data	
Name of Agency:	Regional Water Quality Control Board (RWQCB)
Point of Contact:	Laura Gallardo
Agency Address:	320 West 4th Street, Los Angeles, California
Agency Phone Number:	(213) 576-6600
Date of Contact:	March 6, 2020
Method of Communication:	Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB.

4.1.6 Building Department

Regulatory Agency Data	
Name of Agency:	City of Ontario Building Department (OBD)
Point of Contact:	Ms. Tina Fernandez
Agency Address:	303 East B Street, Ontario, CA
Agency Phone Number:	(909) 395-2023
Date of Contact:	March 6, 2020
Method of Communication:	Fax
Summary of Communication:	As of the date of this report, Partner has not received a response from the OBD for inclusion in this report.

4.1.7 Planning Department

Regulatory Agency Data	
Name of Agency:	City of Ontario Planning Department
Point of Contact:	N/A
Agency Address:	303 East B Street, Ontario, CA
Agency Phone Number:	(909) 395-2023
Date of Contact:	March 6, 2020
Method of Communication:	Online
Summary of Communication:	The subject property is zoned for light industrial development by the City of Ontario.

4.1.8 Oil & Gas Exploration

Regulatory Agency Data	
Name of Agency:	California Division of Oil, Gas and Geothermal Resources (DOGGR)
Point of Contact:	N/A
Agency Address:	801 K Street, Sacramento, California
Agency Phone Number:	(916) 322-1080
Date of Contact:	March 6, 2020
Method of Communication:	Online
Summary of Communication:	According to DOGGR, no oil or gas wells are located on or adjacent to the subject property.

4.1.9 Assessor's Office

Regulatory Agency Data	
Name of Agency:	San Bernardino County Assessor (SBCA)
Point of Contact:	N/A
Agency Address:	2720 Gateway Drive, Riverside, California
Agency Phone Number:	(951) 955-6200
Date of Contact:	March 6, 2020
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 0238-0221-22-0000 and is currently owned by Shannon, Dennis A and Janet C Trust.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by EDR. Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	N	N	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG)	0.25	N	**Y**	N
Federal IC/EC Registries	0.50	N	N	N

Radius Report Data

4.2.2 Subject Property Listings

The subject property is identified as an AST, CERS HAZ WASTE, CERS TANKS, FINDS, San Bern Co Permit, CERS, RCRA NonGen/NLR, FINDS, ECHO, HAZNET and HWTS site in the regulatory database report, as discussed below:

- The subject property, identified as Citrus Motors Ontario Inc at 1375 Woodruff Way and 1315 Wanamaker Avenue, is identified on these databases due to the long-term storage, use and generation of hazardous materials. According to reviewed records, the subject property has been equipped with a 2,000-gallon gasoline aboveground storage tank and various spray-paint booths since at least 1993. The subject property (Citrus Motors Ontario Inc at 1375 Woodruff Way.) was issued a generator number (CA0000008086) in December 1995. Numerous manifests for the generation of various hazardous materials, including halogenated solvents were associated with this number between 1993 and 2018. The generator number is currently still active. Additionally, the subject property (Citrus Motors Ontario Inc at 1315 Wanamaker Ave) was issued a generator number (CAL000123461) in January 1994. One manifest for the generation of 1.78 tons of unspecified aqueous solution was associated with this number in 1994. The generator number became inactive in June 1996. Various violations were identified in connection with the storage of the hazardous materials; however, they are limited to administrative issues and all appear to have been returned to compliance. Based on the lack of significant violations or a documented release, these listings are not expected to represent a significant environmental concern.

4.2.3 Adjacent Property Listings

The adjacent properties were identified as a HAZNET, HWTS, RCRA NonGen/NLR FINDS, ECHO, CERS HAZ WASTE, CERS and San Bern Co Permit site in the regulatory database report, as discussed below:

- Zalan Products Inc, 1200 S Wanamaker Avenue is located adjoining the subject property to the north. This site is identified as a HAZNET, HWTS and San Bern Co Permit site. No violations were listed, and this site is not listed on any additional databases that would indicate that a release has occurred. Therefore, this site is not identified as a REC in connection with the subject property.
- S and W Plastics, 1200 S Wanamaker Avenue is located adjoining the subject property to the north. This site is identified as a HAZNET, HWTS and San Bern Co Permit site. According to available information, this site generated 'contaminated soil from site clean-ups' in 1993 and 1995. No additional information was available at the time of this writing. However, this site is not identified on any additional databases that would indicate that a significant release has occurred. The potential release appears to have been a soil only case that was remediated to the satisfaction of the regulatory agency. Based on the potential media impacted (soil only), remediation, and depth to groundwater, this site is not expected to represent a REC in connection with the subject property.
- Ramon Hernandez, 4555 Jurupa Street, is located adjoining the subject property to the west. This site is identified as a HAZNET and HWTS site. No violations were listed, and this site is not listed on any additional databases that would indicate that a release has occurred. Therefore, this site is not identified as a REC in connection with the subject property.
- Maney Aircraft, 1305 S Wanamaker Ave, is located adjoining the subject property to the east. This site is identified as a HAZNET, RCRA NonGen/NLR, CERS HAZ WASTE, CERS TANKS, NPDES, San Bern Co Permit, CIWQS, CERS and HWTS site. Several minor violations were listed; however, this site is not listed on any additional databases that would indicate that a release has occurred. Therefore, this site is not identified as a REC in connection with the subject property.
- Pacific Equipment Irrigation, 1305 S Wanamaker Ave, is located adjoining the subject property to the east. This site is identified as a HWTS site. No violations were listed, and this site is not listed on any additional databases that would indicate that a release has occurred. Therefore, this site is not identified as a REC in connection with the subject property.
- B&B Specialty, 1305 S Wanamaker Ave, is located adjoining the subject property to the east. This site is identified as a HAZNET and HWTS site. No violations were listed, and this site is not listed on any additional databases that would indicate that a release has occurred. Therefore, this site is not identified as a REC in connection with the subject property.
- New World Design Inc, 1309 S Wanamaker Ave, is located adjoining the subject property to the east. This site is identified as a HAZNET and HWTS site. No violations were listed, and this site is not listed on any additional databases that would indicate that a release has occurred. Therefore, this site is not identified as a REC in connection with the subject property.

- Carl's Junior, 4555 Jurupa Street, is located adjoining the subject property to the west. This site is identified as a CHMIRS and San Bern Co Permit site. According to available information, the gas tank of a car in the parking lot of this site ruptured and approximately 5 gallons of gasoline entered the storm drain. Due to the small quantity, no impact to the subject property is expected from this release. No violations were listed in connection with the San Bern Co permit listing and this site is not listed on any additional databases that would indicate that a release has occurred. Therefore, this site is not identified as a REC in connection with the subject property.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.4 Sites of Concern Listings

No sites of concern are identified in the regulatory database report.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.5 Orphan Listings

No orphan listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from Mechanics Bank (User of this report).

User Responsibilities				
Item	**Provided By User**	**Not Provided By User**	**Discussed Below**	**Does Not Apply**
Environmental Pre-Survey Questionnaire		**X**		
Title Records, Environmental Liens, and AULs			**X**	
Specialized Knowledge			**X**	
Actual Knowledge			**X**	
Valuation Reduction for Environmental Issues			**X**	
Identification of Key Site Manager	**Section 5.1.3**			
Reason for Performing Phase I ESA	**Section 1.1**			
Prior Environmental Reports		**X**		
Other		**X**		

5.1 Interviews

5.1.1 Interview with Owner

Mr. Dennis Shannon, Jr., subject property owner, was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or

petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Mr. Shannon, the subject property was developed in 1988 for commercial use. Prior to that, the subject property was developed agriculturally. Mr. Shannon further stated that there have never been USTs on the subject property to the best of his knowledge.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User. The information requested was not received prior to the issuance of this report. Because the Report User (Client) is a lender, it is understood that the Report User would not have knowledge of the property that would significantly impact our ability to satisfy the objectives of this assessment. The lack of this information is not considered to represent a significant data gap.

5.1.3 Interview with Key Site Manager

Mr. Mario Ramos, key site manager (service manager), indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Mr. Ramos, no USTs are located on the subject property to the best of his knowledge. Mr. Ramos stated that the subject property is equipped with one clarifier that is located close to the car wash on the subject property and connected to the drains associated with the subject property. Mr. Ramos stated that the clarifier is maintained monthly by Kleentech. Additionally, according to Mr. Ramos, the subject property is equipped with one 2,000-gallon gasoline AST, one 2,000-gallon used oil AST, two 1,000-gallon new oil ASTs, one 500-gallon new oil AST, three 150-gallon new oil ASTs, one 250-gallon new oil AST and two spray-paint booths. The used oil is picked up by Kleentech on a monthly basis. According to Mr. Ramos, no drains, other than the drains associated with the car wash, are located in the vehicle service areas of the subject property. Minor spills are reportedly mopped up and the dirty mop water is disposed of in the car wash drain. Additionally, Mr. Ramos stated that the subject property is equipped with 78 aboveground hydraulic lifts, and that no below ground hydraulic lifts had ever been located at the subject property.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

No previous reports or other pertinent documentation was provided to Partner for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data	
Site Assessment Performed By:	Tatjana McCondichie
Site Assessment Conducted On:	March 5, 2020

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 1375 South Woodruff Way (Subject Property)			
Name	**Title/Role**	**Contact Number**	**Site Walk* Yes/No**
Mario Ramos	Key Site Manager	(909) 292-2001	Yes
Dennis Shannon, Jr.	Owner	(949) 233-4322	Yes

** Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property*

Environmental concerns were identified during the onsite reconnaissance related to the storage, use, and generation of hazardous substances, as further discussed in Sections 6.1 and 6.2.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters located in trash enclosures on the subject property. An independent solid waste disposal contractor removes solid waste from the subject property. According to property personnel, only household trash is collected in the on-site solid waste dumpsters. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City of Ontario services the subject property vicinity. No wastewater treatment facilities or septic systems were observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces towards storm water drains located throughout the subject property and in the public right of way. The subject property is connected to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the USDA; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity and natural gas provided by Southern California Edison and The Gas Company, respectively.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

Partner identified hazardous substances used, stored, and/or generated on the subject property as noted in the following table:

Hazardous Substances and/or Petroleum Products Noted Onsite

Substance	Container Size	Location	Nature of Use	Disposal Method
Rear axle lube	4x 35-gallon drum	Automotive Service Area	Auto Repair Activities	N/A
Various automotive fluids	Various retail size containers	Automotive Service Area	Auto Repair Activities	N/A
Transmission fluid	55-gallon drums	Automotive Service Area	Auto Repair Activities	N/A
Antifreeze	150-gallon tote	Automotive Service Area	Auto Repair Activities	N/A
Used	150-gallon tote	Automotive	Auto Repair	Transported off-site by

Hazardous Substances and/or Petroleum Products Noted Onsite				
Substance	**Container Size**	**Location**	**Nature of Use**	**Disposal Method**
antifreeze		Service Area	Activities	Kleentech monthly

The materials were found to be properly labeled and stored at the time of the assessment with signs of minor leaks, stains, or spills. Secondary containment is provided.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

Partner observed one aboveground storage tanks (ASTs) for the storage of gasoline and eight ASTs for the storage of new and used oil on the subject property. The ASTs are located on the automotive repair area and parking lot of the subject property. According to reviewed records, the subject property has been equipped with ASTs for the storage of gasoline and new and used motor oil since 1993. The ASTs are currently equipped with secondary containment. No staining, leaks or spills were noted in the vicinity of the ASTs, and no releases have been reported to the regulatory agency.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – "*Non-PCB;"* 2) 50 ppm-500 ppm – "*PCB-Contaminated;"* and, 3) Greater than 500 ppm – "*PCB-Containing."* The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after July 2, 1979.

Two pad-mounted transformers were observed on the subject property. The transformers are not labeled indicating PCB content. No staining or leakage was observed in the vicinity of the transformers. Based on the age and good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

No other potential PCB-containing equipment (interior transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, balers, etc.) was observed on the subject property during Partner's reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

Partner observed the following drains, sumps, and/or clarifiers located on the subject property:

Drains, Sumps, and Clarifiers Observed Onsite			
	Floor Drain(s)	**Sump(s)**	**Clarifier(s)**
Number Observed:	One	N/A	One
Location:	Car Wash Area	N/A	Car Wash Area
Point of Discharge:	Clarifier	N/A	N/A
Sealed/Bermed:	No	N/A	No

The clarifier, also referred to as an oil/water separator, was reportedly installed in the early 1990s and is used to treat wastewater streams generated from the car wash and dirty mop water from auto repair operations. According to Mr. Mario Ramos, the clarifier is maintained by Kleentech on a monthly basis. Based on the use of the clarifier solely for car wash operations, it is not expected to represent a significant environmental concern.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building that have not been appropriately tested are “presumed asbestos-containing material” (PACM).

The subject property buildings were constructed in the 1988. Partner has conducted a limited, visual evaluation of accessible areas for the presence of suspect ACMs at the subject property. The objective of this visual survey was to note the presence and condition of suspect ACM observed. Please refer to the table below for identified suspect ACMs:

Suspect ACMs			
Suspect ACM	**Location**	**Friable Yes/No**	**Physical Condition**
Drywall Systems	Throughout Building Interior	No	Good
Floor Tiles	Throughout Building Interior	No	Good
Floor Tile Mastic	Throughout Building Interior	No	Good
Lay-in Ceiling Tile	Throughout Building Interior	Yes	Good
Stucco	Throughout Building Exterior	Yes	Good

The limited visual survey consisted of noting observable materials (materials which were readily accessible and visible during the course of the site reconnaissance) that are commonly known to potentially contain

asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the site; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to give the User an indication if significant (significant due to quantity, accessibility, or condition) potential sources of ACM or PACM are present at the subject property. Additional sampling, assessment, and evaluation will be warranted for any other use.

Partner was not provided building plans or specifications for review, which may have been useful in determining areas likely to have used ACM.

According to the US EPA, ACM and PACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition. Prior to any disturbance of the construction materials within this facility, a comprehensive ACM survey should be conducted.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm^2 (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated.

It is unlikely that LBP is present in buildings constructed after 1977. Therefore, due to the age of the subject property buildings, it is unlikely that LBP is present.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	**Average Predicted Radon Levels**	**Potential**
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2, where average predicted radon levels are between 2.0 and 4.0 pCi/L.

Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the Ontario Department of Public Works serves the subject property vicinity. According to a representative of the ODPW, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of Ontario are from 24 groundwater public wells and the State Water Project. According to the City of Ontario and the most recent Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g. in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g. ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property buildings for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property; due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Based on Partner's historical research, the subject property has been occupied by an automobile sale and repair facility since at 1988. Additionally, according to South Coast Air Quality Management District records, the subject property has been equipped with a 'spray-paint booth' since at least 1994. All of the facility's lifts are aboveground in nature and there were no drains observed of reported within the permitted spray paint booths and no records of underground features such as underground tanks or clarifiers were noted other than the clarifier that services the car wash only. Some administrative violations were noted during inspections; however, they all appear to have been subsequently brought into compliance. While the use and storage of hazardous substances represents an environmental issue, no further investigation appears warranted at this time.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 1375 South Woodruff Way in Ontario, San Bernardino County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property. Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 1375 South Woodruff Way in Ontario, San Bernardino County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Mechanics Bank
Where Relationships Matter

Feb. 21, 2020

Jay Grenfell
Partner Engineering and Science, Inc.
2154 Torrance Blvd. #200
Torrance, CA90501

RE: RIMS 20-000123-02-01

Dear: Jay Grenfell

This is our letter of Authorization authorizing Jay Grenfell to complete a Phase I Environmental Site Assessment for Mechanics Bank on the terms and conditions set forth herein and in the Master Environmental Services Agreement executed December 09, 2015 between the Bank and Consultant.

I. ENGAGEMENT

This letter serves to engage your professional environmental services, and represents the Bank's authorizations for you to prepare a Phase I Environmental Site Assessment for the property known as:

1375 S Woodruff Way
Ontario, CA91761

The Bank is the client for this report. Consultant shall perform this report as an independent contractor and not as an employee/partner, principal, or agent of the Bank.

The environmental report is hereby ordered and requested by the Bank, which shall make payment directly to Consultant. All documents the Bank furnishes to Consultant in connection with this engagement shall be treated as Confidential under the Agreement.

The Phase I Environmental Site Assessment shall meet or exceed the requirements established by ASTM 1528, or such higher standards as may be required by the Agreement.

II. FEE AND REPORT SPECIFICATIONS

The fee for environmental services rendered under this Letter of Authorization shall be **$2,000.00**. Consultant shall complete services on or before **March 16, 2020**. Upon completion, Consultant shall provide the Bank with 1 electronic copy (PDF format) via RIMSCentral.

Please address your report to the following:
Sandy Helems(JM)
Mechanics Bank - Appraisal Department
1111 Civic Drive, Ste. 240
Walnut Creek, CA 94596

The intended user of this report is Mechanics Bank and-or affiliates

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Torrance, CA 90501-0000
Contact: Brett Nielsen

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Partner Engineering and Science, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Waste Code Matrix as a spreadsheet

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

Report Generation Date: 03/10/2020

PERMIT TO OPERATE

Permit No.
N17204
A/N 442799

This initial permit must be renewed ANNUALLY unless the equipment is moved, or changes ownership.
If the billing for annual renewal fee (Rule 301.f) is not received by the expiration date, contact the District.

Legal Owner or Operator : CITRUS MOTORS ONTARIO, INC
PO BOX 4270
ONTARIO, CA 91761

ID 97063

Equipment Location: 1375 WOODRUFF WAY, ONTARIO, CA 91761

Equipment Description:

Fuel Storage and Dispensing Facility Consisting of:

1) 1 - GASOLINE ABOVEGROUND STORAGE TANK, SUPERVAULT TYPE (G-70-132-B), 11 ' - 0 " L. X 6 ' - 8 " W. X 4 ' - 4 " H., 2,000 - GALLON CAPACITY, EQUIPPED WITH A PRESSURE/VACUUM RELIEF VALVE, AND A SUBMERGED FILL TUBE.

2) 1 - GASOLINE NOZZLE DISPENSING 1 PRODUCT ON A TANK TOP MOUNTED DISPENSER, EQUIPPED WITH PHASE II VAPOR RECOVERY SYSTEM, BALANCE RETRACTOR (G-70-52-AM).

Conditions :

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.

3. ALL PERMIT CONDITIONS APPLICABLE TO THE EQUIPMENT DESCRIBED IN THE PREVIOUS PERMIT TO OPERATE N00459 SHALL REMAIN IN EFFECT UNTIL THE NEW OR MODIFIED EQUIPMENT IS CONSTRUCTED AND OPERATED AS DESCRIBED IN THIS NEW PERMIT. THIS PERMIT TO CONSTRUCT/OPERATE SHALL BECOME INVALID IF THE MODIFICATION AS DESCRIBED IN THE EQUIPMENT DESCRIPTION HAS NOT BEEN COMPLETED WITHIN ONE YEAR FROM THE ISSUE DATE.

4. EXCEPT FOR DIESEL TRANSFERS, PHASE I VAPOR RECOVERY SYSTEMS SHALL BE IN FULL OPERATION WHENEVER FUEL IS BEING TRANSFERRED INTO STORAGE TANKS.

5. EXCEPT FOR DIESEL TRANSFERS, PHASE II VAPOR RECOVERY SYSTEMS SHALL BE IN FULL OPERATION WHENEVER FUEL IS BEING TRANSFERRED INTO MOTOR VEHICLES, AS DEFINED IN RULE 461.

CONTINUATION OF PERMIT TO OPERATE

6. ALL PHASE I AND PHASE II VAPOR RECOVERY EQUIPMENT AT THIS FACILITY SHALL BE INSTALLED, OPERATED AND MAINTAINED TO MEET ALL CALIFORNIA AIR RESOURCES BOARD CERTIFICATION REQUIREMENTS.

7. THE PHASE II VAPOR RECOVERY SYSTEM SHALL BE INSTALLED, OPERATED, AND MAINTAINED SUCH THAT THE MAXIMUM ALLOWABLE PRESSURE THROUGH THE SYSTEM INCLUDING NOZZLE, VAPOR HOSE, SWIVELS, AND UNDERGROUND PIPING DOES NOT EXCEED THE DYNAMIC BACK PRESSURES DESCRIBED BY THE CALIFORNIA AIR RESOURCES BOARD EXECUTIVE ORDER BY WHICH THE SYSTEM WAS CERTIFIED:

NITROGEN FLOWRATES (CFH)	DYNAMIC BACK PRESSURE (INCHES OF WATER)
60	0.35
80	0.62

DYNAMIC BACK PRESSURE TESTS SHALL BE CONDUCTED TO DETERMINE THE PHASE II SYSTEM VAPOR RECOVERY BACK PRESSURES. THE TESTS SHALL BE CONDUCTED IN ACCORDANCE WITH CARB TEST PROCEDURE TP-201.4, METHODOLOGY 1. RESULTS SHALL BE SUBMITTED TO THE AQMD, OFFICE OF ENGINEERING AND COMPLIANCE, WITHIN SEVENTY-TWO (72) HOURS OF TESTS.

THE AQMD SHALL BE NOTIFIED BY E-MAIL AT R461TESTING@AQMD.GOV OR BY FACSIMILE AT TELEPHONE NUMBER (909) 396-3606 AT LEAST SEVENTY-TWO (72) HOURS PRIOR TO TESTING. SUCH NOTIFICATION SHALL INCLUDE THE NAME OF THE OWNER OR OPERATOR; THE NAME OF THE CONTRACTOR; THE LOCATION OF THE FACILITY; AND THE SCHEDULED START AND COMPLETION DATES OF THE DYNAMIC BACK PRESSURE TESTS.

8. A STATIC PRESSURE LEAK DECAY TEST SHALL BE CONDUCTED TO DEMONSTRATE THAT THE STORAGE TANKS, THE REMOTE AND/OR NOZZLE VAPOR RECOVERY CHECK VALVES, ASSOCIATED VAPOR RETURN PIPING AND FITTINGS ARE FREE FROM VAPOR LEAKS. THE TEST SHALL BE CONDUCTED IN ACCORDANCE WITH CARB TEST PROCEDURE METHOD TP-201.3. RESULTS SHALL BE SUBMITTED TO THE AQMD, OFFICE OF ENGINEERING AND COMPLIANCE, WITHIN SEVENTY-TWO (72) HOURS OF TEST.

THE AQMD SHALL BE NOTIFIED BY E-MAIL AT R461TESTING@AQMD.GOV OR BY FACSIMILE AT TELEPHONE NUMBER (909) 396-3606 AT LEAST SEVENTY-TWO (72) HOURS PRIOR TO TESTING. SUCH NOTIFICATION SHALL INCLUDE THE NAME OF THE OWNER OR OPERATOR; THE NAME OF THE CONTRACTOR; THE LOCATION OF THE FACILITY; AND THE SCHEDULED START AND COMPLETION DATES OF THE STATIC PRESSURE LEAK DECAY TEST.

9. IF THE CARB EXECUTIVE ORDER REQUIRES THE INSTALLATION OF A LIQUID REMOVAL DEVICE, A LIQUID REMOVAL RATE TEST SHALL BE CONDUCTED TO DEMONSTRATE THE REMOVAL OF GASOLINE FROM THE VAPOR PASSAGE OF THE COAXIAL HOSE. THE TEST SHALL BE CONDUCTED IN ACCORDANCE WITH CARB TEST PROCEDURE METHOD TP-201.6. RESULTS SHALL BE SUBMITTED TO THE AQMD, OFFICE OF ENGINEERING AND COMPLIANCE, WITHIN SEVENTY-TWO (72) HOURS OF TEST.

CONTINUATION OF PERMIT TO OPERATE

THE AQMD SHALL BE NOTIFIED BY E-MAIL AT R461TESTING@AQMD.GOV OR BY FACSIMILE AT TELEPHONE NUMBER (909) 396-3606 AT LEAST SEVENTY-TWO (72) HOURS PRIOR TO TESTING. SUCH NOTIFICATION SHALL INCLUDE THE NAME OF THE OWNER OR OPERATOR; THE NAME OF THE CONTRACTOR; THE LOCATION OF THE FACILITY; AND THE SCHEDULED START AND COMPLETION DATES OF THE LIQUID REMOVAL RATE TEST.

10. THE TESTING FOR THE ABOVE MENTIONED TESTS SHALL BE CONDUCTED IN ACCORDANCE WITH THE MOST RECENT RULE 461 AMENDMENT OR CARB EXECUTIVE ORDER REQUIREMENTS, WHICHEVER IS MORE STRINGENT.

11. ALL RECORDS AND TEST RESULTS THAT ARE REQUIRED TO BE MAINTAINED BY RULE 461 SHALL BE KEPT ON SITE FOR FOUR YEARS AND MADE AVAILABLE TO DISTRICT REPRESENTATIVES UPON REQUEST.

12. THE MAXIMUM QUANTITY OF GASOLINE DISPENSED FROM THE STORAGE TANKS AT THIS FACILITY SHALL NOT EXCEED 10,000 GALLONS IN ANY ONE CALENDAR MONTH NOR 120,000 GALLONS IN ANY ONE CALENDAR YEAR.

13. RECORDS OF MONTHLY AND ANNUAL FUEL DISPENSED SHALL BE PREPARED, SHALL BE RETAINED ON SITE FOR TWO YEARS, AND SHALL BE MADE AVAILABLE TO DISTRICT REPRESENTATIVES UPON REQUEST.

NOTICE

IN ACCORDANCE WITH RULE 206, THIS PERMIT TO OPERATE OR COPY SHALL BE POSTED ON OR WITHIN 8 METERS OF THE EQUIPMENT.

THIS PERMIT DOES NOT AUTHORIZE THE EMISSION OF AIR CONTAMINANTS IN EXCESS OF THOSE ALLOWED BY DEVISION 26 OF THE HEALTH AND SAFETY CODE OF THE STATE OF CALIFORNIA OR THE RULES OF THE AIR QUALITY MANAGEMENT DISTRICT. THIS PERMIT CANNOT BE CONSIDERED AS PERMISSION TO VOILATE EXISTING LAWS, ORDINANCES, REGULATIONS OR STATUES OF OTHER GOVERNMENT AGENCIES.

If the billing for annual renewal fee (Rule 301.f) is not received by the expiration date, contact the District.

Legal Owner
or Operator:

CITRUS MOTORS ONTARIO INC.
ATTN: STEVE VALENZUELA
PO BOX 4270
ONTARIO, CA 91761

ID 097063

Equipment Location: 1375 WOODRUFF WAY, ONTARIO, CA 91761

Equipment Description:

PAINT SPRAY BOOTH, SPRAYKING, MODEL 200-P, AUTOMOTIVE TYPE, 14'-5" W. X 27'-11" L. X 8'-8" H., WITH EIGHTEEN 20" X 20" EXHAUST FILTERS, ONE 3 H.P. EXHAUST FAN, A 400,000 BTU/HR NATURAL GAS BURNER, A 3 H.P. AIR MAKE UP FAN.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.

3. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA AT LEAST 2 INCHES THICK.

4. A GAUGE SHALL BE INSTALLED TO INDICATE, IN INCHES OF WATER, THE STATIC PRESSURE DIFFERENTIAL ACROSS THE EXHAUST FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCH OF WATER.

5. THIS FACILITY SHALL NOT APPLY COATINGS OR USE CLEAN UP SOLVENTS CONTAINING IN EXCESS OF 900 POUNDS OF ROC MATERIAL IN ANY 30 DAY PERIOD.

6. COMPLETE RECORDS OF THE COATINGS APPLIED BY THIS EQUIPMENT SHALL BE MAINTAINED.

7. THIS EQUIPMENT SHALL COMPLY WITH RULE 1151.

8. COATINGS CONTAINING CARCINOGENIC AIR CONTAMINANTS, AS LISTED IN TABLE I, RULE 1401, SHALL NOT BE APPLIED BY THIS EQUIPMENT.

CONTINUATION OF PERMIT TO CONSTRUCT/OPERATE

9. THE OPERATOR SHALL KEEP RECORDS IN ACCORDANCE WITH THE REQUIREMENTS OF RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS). SUCH RECORDS SHALL BE RETAINED FOR A PERIOD OF THREE YEARS AND SHALL BE MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST.

10. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL PERMITTED EQUIPMENT COVERED BY THE MONTHLY LIMIT. THE RECORD SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING MANAGEMENT OFFICIAL WITH RESPONSIBILITY FOR OPERATION OF EQUIPMENT SUBJECT TO THE PERMIT.

11. THE OPERATOR SHALL MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC-CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THE FACILITY DURING THE PRECEDING 12 MONTHS.

12. THE OPERATOR SHALL RETAIN ALL PURCHASE INVOICES FOR ALL VOC-CONTAINING MATERIAL USED OR STORED AT THE FACILITY, AND ALL WASTE MANIFESTS FOR ALL WASTE VOC-CONTAINING MATERIAL REMOVED FROM THE FACILITY, FOR 36 MONTHS.

THIS PERMIT TO OPERATE R-D80106 SUPERSEDES PERMIT TO OPERATE R-D80106 ISSUED 11/12/97.

NOTICE

IN ACCORDANCE WITH RULE 206, THIS PERMIT TO OPERATE OR COPY SHALL BE POSTED ON OR WITHIN 8 METERS OF THE EQUIPMENT.

PERMIT TO OPERATE

This initial permit must be renewed by 12/10 ANNUALLY unless the equipment is moved, or changes ownership. If the billing for annual renewal fee (Rule 301.f) is not received by the expiration date, contact the District.

Legal Owner Or Operator:

CITRUS MOTORS, INC.
P.O. BOX 4270
ONTARIO, CA. 91760
ATTN: DAN ENGLAND

ID 097063

Equipment located at: 1315 WANAMAKER AVE., ONTARIO, CA. 91762

Equipment Description:

PAINT SPRAY BOOTH/OVEN, INDIRECT FIRED, SAICO, AUTOMOTIVE TYPE, 14'-0" W. X 12'-3" L., X 27'-0" H., WITH TWO 24" X 324 EXHAUST FILTERS AND ONE 10 H.P. EXHAUST FAN, TWO 10 H.P. MAKE UP AIR FANS AND A 1,000,000 BTU/HR HEATER.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.

3. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL THE EXHAUST AIR PASSES THROUGH FILTER MEDIA WHICH IS AT LEAST TWO INCHES THICK.

4. A GAUGE SHALL BE INSTALLED TO INDICATE, IN INCHES OF WATER, THE STATIC PRESSURE DIFFERENTIAL ACROSS THE EXHAUST FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCHES OF WATER.

5. THIS FACILITY SHALL NOT APPLY COATINGS OR USE CLEAN UP SOLVENTS CONTAINING IN EXCESS OF 900 POUNDS OF ROC MATERIAL IN ANY 30 DAY PERIOD.

6. COMPLETE RECORDS OF THE COATINGS APPLIED BY THIS EQUIPMENT SHALL BE MAINTAINED ON A FORM APPROVED IN WRITING BY THE DIRECTOR OF ENFORCEMENT. SUCH RECORDS SHALL BE MAINTAINED FOR A PERIOD OF NOT LESS THAN TWO YEARS AND BE MADE AVAILABLE TO THE DISTRICT UPON REQUEST.

7. THIS EQUIPMENT SHALL COMPLY WITH RULE 109.

PERMIT TO CONSTRUCT/OPERATE

This initial permit must be renewed ANNUALLY unless the equipment is moved, or changes ownership.
If the billing for annual renewal fee (Rule 301.f) is not received by the expiration date, contact the District.

Legal Owner
or Operator: CITRUS MOTORS, INC.
1375 WOODRUFF WAY
ONTARIO, CA 91761

ID 097063

Equipment Location: 1375 WOODRUFF WAY, ONTARIO, CA 91761

Equipment Description:

Fuel Storage and Dispensing Facility Consisting of:

1) 1 - GASOLINE NOZZLE DISPENSING 1 PRODUCT, EQUIPPED WITH PHASE II VAPOR RECOVERY SYSTEM, BALANCE RETRACTOR (G-70-52-AM).

2) 1 - GASOLINE ABOVEGROUND STORAGE TANK, SUPERVAULT MH SERIES (VR-301-E), RECTANGULAR, 11' - 0" L. X 6' - 8" W. X 4' -4" H., 2,000 GALLON CAPACITY, EQUIPPED WITH A HUSKY 5885 PRESSURE/VACUUM RELIEF VALVE, AND A MORRISON BROTHERS PHASE I ENHANCED VAPOR RECOVERY (EVR) SYSTEM (VR-402-B).

Conditions:

SECTION I: GENERAL CONDITIONS

1. OPERATION OF THIS EQUIPMENT SHALL BE IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT WAS ISSUED, UNLESS OTHERWISE NOTED BELOW.

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.

SECTION II: PHASE I VAPOR RECOVERY SYSTEM AND TESTING REQUIREMENTS

3. EXCEPT FOR DIESEL TRANSFERS, PHASE I VAPOR RECOVERY SYSTEMS SHALL BE IN FULL OPERATION WHENEVER FUEL IS BEING TRANSFERRED INTO STORAGE TANKS.

4. A LEAK RATE AND CRACKING PRESSURE TEST OF PRESSURE/VACUUM RELIEF VENT VALVES SHALL BE CONDUCTED WITHIN TEN DAYS (10) AFTER THE START OF OPERATION OF THE PHASE I EVR EQUIPMENT AND AT LEAST ONCE EVERY THREE (3) YEARS THEREAFTER TO DETERMINE THE PRESSURE AND VACUUM AT WHICH THE PRESSURE/VACUUM VENT VALVE ACTUATES, AND TO DETERMINE THE VOLUMETRIC LEAK RATE AT A GIVEN PRESSURE. THE TEST SHALL BE CONDUCTED IN ACCORDANCE WITH THE TEST PROCEDURE METHOD TP-201.1E (OCTOBER 8, 2003). RESULTS SHALL BE SUBMITTED TO THE SCAQMD, OFFICE OF ENGINEERING AND COMPLIANCE, WITHIN SEVENTY-TWO (72) HOURS OF TEST. THIS TEST

CONTINUATION OF PERMIT TO CONSTRUCT/OPERATE

RESULT SHALL BE KEPT ON SITE FOR THREE (3) YEARS AND MADE AVAILABLE TO DISTRICT REPRESENTATIVES UPON REQUEST.

SECTION III: PHASE II VAPOR RECOVERY SYSTEM AND TESTING REQUIREMENTS

5. EXCEPT FOR DIESEL TRANSFERS, PHASE II VAPOR RECOVERY SYSTEMS SHALL BE IN FULL OPERATION WHENEVER FUEL IS BEING TRANSFERRED INTO MOTOR VEHICLES, AS DEFINED IN RULE 461.

6. A STATIC PRESSURE PERFORMANCE TEST SHALL BE CONDUCTED TO QUANTIFY THE VAPOR TIGHTNESS OF THE ABOVEGROUND STORAGE TANK. THE TEST SHALL BE CONDUCTED IN ACCORDANCE WITH THE LATEST VERSION OF EXHIBIT 4 OF CARB EXECUTIVE ORDER VR-402, AS A PERFORMANCE TEST AND AS A REVERIFICATION TEST. RESULTS SHALL BE SUBMITTED TO THE SCAQMD, OFFICE OF ENGINEERING AND COMPLIANCE, WITHIN SEVENTY-TWO (72) HOURS OF TEST.

7. THE PHASE II VAPOR RECOVERY SYSTEM SHALL BE INSTALLED, OPERATED, AND MAINTAINED SUCH THAT THE MAXIMUM ALLOWABLE PRESSURE THROUGH THE SYSTEM INCLUDING NOZZLE, VAPOR HOSE, SWIVELS, AND UNDERGROUND PIPING DOES NOT EXCEED THE DYNAMIC BACK PRESSURES DESCRIBED BY THE CALIFORNIA AIR RESOURCES BOARD EXECUTIVE ORDER BY WHICH THE SYSTEM WAS CERTIFIED:

NITROGEN FLOWRATES (CFH)	DYNAMIC BACK PRESSURE (INCHES OF WATER)
60	0.35
80	0.62

DYNAMIC BACK PRESSURE TESTS SHALL BE CONDUCTED TO DETERMINE THE PHASE II SYSTEM VAPOR RECOVERY BACK PRESSURES. THE TESTS SHALL BE CONDUCTED IN ACCORDANCE WITH CARB TEST PROCEDURE TP-201.4 (JULY 3, 2002), METHODOLOGY 1 AS A PERFORMANCE TEST AND AS A REVERIFICATION TEST. RESULTS SHALL BE SUBMITTED TO THE SCAQMD, OFFICE OF ENGINEERING AND COMPLIANCE, WITHIN SEVENTY-TWO (72) HOURS OF TESTS.

8. IF THE CARB EXECUTIVE ORDER REQUIRES THE INSTALLATION OF A LIQUID REMOVAL DEVICE, A LIQUID REMOVAL RATE TEST SHALL BE CONDUCTED TO DEMONSTRATE THE REMOVAL OF GASOLINE FROM THE VAPOR PASSAGE OF THE COAXIAL HOSE. THE TEST SHALL BE CONDUCTED IN ACCORDANCE WITH CARB TEST PROCEDURE METHOD TP-201.6 (APRIL 28, 2000) AS A PERFORMANCE TEST AND AS A REVERIFICATION TEST. RESULTS SHALL BE SUBMITTED TO THE SCAQMD, OFFICE OF ENGINEERING AND COMPLIANCE, WITHIN SEVENTY-TWO (72) HOURS OF TEST.

SECTION V: GENERAL REQUIREMENTS

9. ALL PHASE I AND PHASE II VAPOR RECOVERY EQUIPMENT AT THIS FACILITY SHALL BE INSTALLED, OPERATED AND MAINTAINED TO MEET ALL CALIFORNIA AIR RESOURCES BOARD CERTIFICATION REQUIREMENTS.

PERMIT TO CONSTRUCT/OPERATE

CONTINUATION OF PERMIT TO CONSTRUCT/OPERATE

10. ALL PERMIT CONDITIONS APPLICABLE TO THE EQUIPMENT DESCRIBED IN THE PREVIOUS PERMIT TO OPERATE N17204 SHALL REMAIN IN EFFECT UNTIL THE NEW OR MODIFIED EQUIPMENT IS CONSTRUCTED AND OPERATED AS DESCRIBED IN THIS NEW PERMIT. THIS PERMIT TO CONSTRUCT/OPERATE SHALL BECOME INVALID IF THE MODIFICATION AS DESCRIBED IN THE EQUIPMENT DESCRIPTION HAS NOT BEEN COMPLETED WITHIN ONE YEAR FROM THE ISSUE DATE. IF THE MODIFICATION HAS NOT BEEN COMPLETED WITHIN ONE YEAR FROM THE ISSUE DATE OF THE PERMIT, A WRITTEN REQUEST SHALL BE SUBMITTED TO THE SCAQMD (ATTENTION: RANDY MATSUYAMA) TO REINSTATE THE PREVIOUSLY INACTIVATED PERMIT TO OPERATE. A NEW APPLICATION SHALL BE FILED IF THERE ARE PLANS TO CONTINUE WITH THE MODIFICATION. FURTHERMORE, THIS CONDITION DOES NOT ALLOW ANY TIME EXTENSIONS TO ANY MODIFICATIONS REQUIRED BY THE CALIFORNIA AIR RESOURCES BOARD OR SCAQMD.

11. NEW EQUIPMENT INSTALLATIONS AND SUBSEQUENT SERVICE AND REPAIRS FOR ANY CERTIFIED COMPONENT FOR WHICH THIS PERMIT WAS ISSUED, SHALL ONLY BE PERFORMED BY A CURRENT AND CERTIFIED PERSON WHO HAS SUCCESSFULLY COMPLETED THE MANUFACTURER'S TRAINING COURSE AND APPROPRIATE INTERNATIONAL CODE COUNCIL (ICC) CERTIFICATION. COMPLETION OF ANY SCAQMD TRAINING COURSE DOES NOT CONSTITUTE AS A SUBSTITUTE FOR THIS REQUIREMENT. PROOF OF SUCCESSFUL COMPLETION OF ANY MANUFACTURER TRAINING COURSE SHALL BE WITH THE MANUFACTURER.

12. THE DISTRICT AT ITS DISCRETION MAY WISH TO WITNESS THE INSTALLATION AND/OR PERFORMANCE TESTING OF THE NEW VAPOR RECOVERY EQUIPMENT. AT LEAST SEVENTY-TWO (72) HOURS PRIOR TO THE INSTALLATION OF THE EQUIPMENT AND ANY OF THE MENTIONED TESTING REQUIREMENTS IN THIS PERMIT, THE APPLICANT SHALL NOTIFY THE SCAQMD BY METHODS SPECIFIED AT THE TIME BY THE EXECUTIVE OFFICER. SUCH NOTIFICATION SHALL INCLUDE THE NAME OF THE OWNER OR OPERATOR; THE NAME OF THE CONTRACTOR; THE LOCATION OF THE FACILITY; AND THE SCHEDULED START AND COMPLETION DATES OF THE TESTS TO BE PERFORMED.

13. UNLESS SCAQMD RULE 461 REQUIRES A MORE FREQUENT TESTING OR INSPECTION SCHEDULE, THE OWNER/OPERATOR SHALL BE RESPONSIBLE TO PERFORM THE SCHEDULED WEEKLY, QUARTERLY, AND ANNUAL INSPECTIONS AS OUTLINED IN THE CARB APPROVED INSTALLATION, OPERATION, AND MAINTENANCE MANUAL FOR THE MORRISION BROS. PHASE I EVR SYSTEM, AS WELL AS ALL THE REQUIRED VAPOR RECOVERY SYSTEM TESTS AS PER THE CURRENT AND APPROPRIATE CARB EXECUTIVE ORDER.

14. AT LEAST SEVENTY-TWO (72) HOURS PRIOR TO BACK-FILLING ANY UNDERGROUND PIPING, THE SCAQMD SHALL BE NOTIFIED BY METHODS SPECIFIED AT THE TIME BY THE EXECUTIVE OFFICER. SUCH NOTIFICATION SHALL INCLUDE THE NAME OF THE OWNER OR OPERATOR; THE NAME OF THE CONTRACTORS; THE LOCATION OF THE FACILITY; AND THE SCHEDULED START AND COMPLETION DATES OF THE BACK-FILLING PROCEDURE. THE BACK-FILLING PROCEDURE SHALL NOT COMMENCE UNTIL INSPECTED BY A DISTRICT REPRESENTATIVE.

15. THE SCAQMD SHALL BE NOTIFIED BY METHODS SPECIFIED AT THE TIME BY THE EXECUTIVE OFFICER AT LEAST SEVENTY-TWO (72) HOURS PRIOR TO ANY OF THE ABOVE MENTIONED TESTING REQUIREMENTS. SUCH NOTIFICATION SHALL INCLUDE THE NAME OF THE OWNER

CONTINUATION OF PERMIT TO CONSTRUCT/OPERATE

OR OPERATOR; THE NAME OF THE CONTRACTOR; THE LOCATION OF THE FACILITY; AND THE SCHEDULED START AND COMPLETION DATES OF THE TESTS TO BE PERFORMED.

16. THE TESTING FOR THE ABOVE MENTIONED TESTS SHALL BE CONDUCTED IN ACCORDANCE WITH THE MOST RECENT RULE 461 AMENDMENT OR CARB EXECUTIVE ORDER REQUIREMENTS, WHICHEVER IS MORE STRINGENT.

17. A COPY OF THE PASS/FAIL TEST RESULTS SHALL BE SENT BY METHODS SPECIFIED AT THE TIME BY THE EXECUTIVE OFFICER WITHIN SEVENTY-TWO (72) HOURS AFTER EACH TEST IS CONDUCTED. FURTHERMORE, THE FINAL TEST RESULTS DEMONSTRATING COMPLIANCE SHALL BE SUBMITTED BY METHODS SPECIFIED AT THE TIME BY THE EXECUTIVE OFFICER WITHIN FOURTEEN (14) CALENDAR DAYS FROM THE DATE WHEN ALL TESTS WERE PASSED. THE TEST REPORT SHALL INCLUDE AT A MINIMUM ALL THE REQUIRED RECORDS OF ALL TESTS PERFORMED, TEST DATA, CURRENT SCAQMD FACILITY ID NUMBER OF THE LOCATION BEING TESTED, THE EQUIPMENT PERMIT TO OPERATE OR APPLICATION NUMBER, THE SCAQMD ID NUMBER OF THE COMPANY PERFORMING THE TESTS, A STATEMENT WHETHER THE SYSTEM OR COMPONENT TESTED MEETS THE REQUIRED STANDARDS, AND THE NAME, SCAQMD TESTER ID NUMBER AND SIGNATURE OF THE PERSON RESPONSIBLE FOR CONDUCTING THE TESTS.

18. ALL RECORDS AND TEST RESULTS THAT ARE REQUIRED TO BE MAINTAINED BY RULE 461 SHALL BE KEPT ON SITE AND MADE AVAILABLE TO DISTRICT REPRESENTATIVES UPON REQUEST.

SECTION VI: GASOLINE THROUGHPUT REQUIREMENTS

19. THE MAXIMUM QUANTITY OF GASOLINE DISPENSED FROM THE STORAGE TANK AT THIS FACILITY SHALL NOT EXCEED 10,000 GALLONS IN ANY ONE CALENDAR MONTH NOR 120,000 GALLONS IN ANY ONE CALENDAR YEAR.

20. RECORDS OF MONTHLY AND ANNUAL FUEL DISPENSED SHALL BE PREPARED, SHALL BE RETAINED ON SITE FOR TWO YEARS, AND SHALL BE MADE AVAILABLE TO DISTRICT REPRESENTATIVES UPON REQUEST.

21. THE OWNER/OPERATOR SHALL SUBMIT THE FACILITY'S MONTHLY GASOLINE THROUGHPUT DATA FOR THE PREVIOUS CALENDAR YEAR TO THE EXECUTIVE OFFICER ON OR BEFORE MARCH 1 FOLLOWING EACH CALENDAR YEAR.

NOTICE

IN ACCORDANCE WITH RULE 206, THIS PERMIT TO OPERATE OR COPY SHALL BE POSTED ON OR WITHIN 8 METERS OF THE EQUIPMENT.

PERMIT TO CONSTRUCT/OPERATE

CONTINUATION OF PERMIT TO CONSTRUCT/OPERATE

THIS PERMIT DOES NOT AUTHORIZE THE EMISSION OF AIR CONTAMINANTS IN EXCESS OF THOSE ALLOWED BY DIVISION 26 OF THE HEALTH AND SAFETY CODE OF THE STATE OF CALIFORNIA OR THE RULES OF THE AIR QUALITY MANAGEMENT DISTRICT. PERMIT TO OPERATE

Permit No.
D98387
A/N 313155
Page 1

This initial permit shall be renewed ANNUALLY unless the equipment is moved, or changes ownership. If the billing for annual renewal fee (Rule 301.f) is not received by the expiration date, contact the District.

Legal Owner Or Operator: CITRUS MOTORS INC.
ATTN: DAVE NESS
P.O. BOX 4270
ONTARIO, CA 91761

ID 097063

Equipment located at: 1315 WANAMAKER AVE ONTARIO, CA 91761

Equipment Description:

REFRIGERANT RECYCLE/RECOVER UNIT, MOTOR VEHICLE AIR CONDITIONING SYSTEM, SUN ELECTRIC, MODEL NO. MRC 300, SERIAL NO. 9519.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.

3. RECORDS SHALL BE MAINTAINED TO INDICATE IN POUNDS PER CALENDAR YEAR THE REFRIGERANTS PURCHASED, USED, RECOVERED, RECYCLED, STORED, AND SOLD FOR USE IN THE DISTRICT; AND REFRIGERANT SHIPPED OFFSITE, IF RECYCLING IS NOT DONE ON THE PREMISE.

4. THIS EQUIPMENT SHALL BE TESTED FOR DETECTABLE LEAKS ONCE EVERY SIX (6) MONTHS USING AN ELECTRONIC HALOGEN DETECTOR IN ACCORDANCE WITH MANUFACTURER'S SPECIFICATIONS, MEASURED 1 CENTIMETER AWAY FROM JOINTS, COUPLINGS AND TUBING OF THE SYSTEM OR WITH ANY ALTERNATE METHOD APPROVED BY THE EXECUTIVE OFFICER.

5. ALL LEAKS IN THIS EQUIPMENT SHALL BE REPAIRED WITHIN TWO (2) BUSINESS DAYS AFTER THE LEAK IS DETECTED.

6. THIS EQUIPMENT SHALL NOT BE USED TO ADD REFRIGERANT TO A VEHICLE UNLESS THE VEHICLE'S AIR CONDITIONING SYSTEM HAS NO DETECTABLE LEAKS.

7. THIS EQUIPMENT SHALL NOT BE OPERATED UNLESS EACH INDIVIDUAL PERFORMING OR SUPERVISING WORK ON MOTOR VEHICLE AIR CONDITIONERS HAS A CERTIFICATE OF TRAINING FROM A DISTRICT APPROVED PROGRAM.

AQMD

CONTINUATION OF PERMIT TO OPERATE

8. RECORDS SHALL BE KEPT TO PROVE COMPLIANCE WITH CONDITIONS 3, 4, 5, AND 7. THE RECORDS SHALL BE KEPT IN A FORMAT APPROVED IN WRITING BY THE COMPLIANCE DIVISION DIRECTOR OF THE DISTRICT. THE RECORDS SHALL BE KEPT FOR AT LEAST TWO YEARS AND MADE AVAILABLE UPON REQUEST.

NOTICE

IN ACCORDANCE WITH RULE 206, THIS PERMIT TO OPERATE OR COPY SHALL BE POSTED ON OR WITHIN 8 METERS OF THE EQUIPMENT.

THIS PERMIT DOES NOT AUTHORIZE THE EMISSION OF AIR CONTAMINANTS IN EXCESS OF THOSE ALLOWED BY DIVISION 26 OF THE HEALTH AND SAFETY CODE OF THE STATE OF CALIFORNIA OR THE RULES OF THE AIR QUALITY MANAGEMENT DISTRICT. THIS PERMIT CANNOT BE CONSIDERED AS PERMISSION TO VIOLATE EXISTING LAWS, ORDINANCES, REGULATIONS OR STATUTES OF OTHER GOVERNMENT AGENCIES.

with any questions or comments.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/16/2019 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/28/2019 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/16/2019 has revealed that there are 20 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Violations:
Site ID: 105794
Site Name: CITRUS MOTORS ONTARIO INC
Violation Date: 09-13-2016
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes: Returned to compliance on 12/22/2016. Hazardous materials above reportable threshold missing from CERS hazardous materials inventory.
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 105794
Site Name: CITRUS MOTORS ONTARIO INC
Violation Date: 09-10-2019
Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description: Failure of generator to obtain assessment or reassessment every five (5) years or the remaining service life of the tank system, as stated in the engineer's assessment, whichever is less. This assessment applies to onground or aboveground tank systems containing only non-RCRA hazardous wastes generated onsite, or for a small quantity

CITRUS MOTORS ONTARIO INC (Continued) **1007739294**

	generator onground or aboveground tank systems containing RCRA hazardous wastes generated onsite.
Violation Notes:	OBSERVATION: A hazardous waste tank reassessment has not been conducted for the waste oil tank system within 5 years of the previous tank system assessment or within the remaining service life of the tank system as stated in the engineer's report, whichever is less. CORRECTIVE ACTION: Obtain a written hazardous waste tank system reassessment for the tank system in accordance with 22 CCR 15 66265.192 and submit a copy to the CUPA.
Violation Division:	San Bernardino County Fire Department
Violation Program:	HW
Violation Source:	CERS
Site ID:	105794
Site Name:	CITRUS MOTORS ONTARIO INC
Violation Date:	09-10-2019
Citation:	22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 10/01/2019. OBSERVATION: The waste paint drums were found open and are not closed between uses. Hazardous waste containers must be kept closed when not in use. A screw in funnel with a sealable lid was recommended. CORRECTIVE ACTION: Close all the hazardous waste containers and submit photos to the CUPA demonstrating that the container listed above has been properly closed.

Registry ID: 110002610390

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Owner/operator fax:	Not reported
Owner/operator extension:	Not reported
Legal status:	Private
Owner/Operator Type:	Owner
Owner/Op start date:	Not reported
Owner/Op end date:	Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No

GANTOM INDUSTRIES (Continued) **1000820512**

Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

FINDS:

Registry ID: 110002897278

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:
Site ID: 84951
Site Name: WEBBER EMI
Violation Date: 02-08-2018
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 03/05/2018. Hazardous waste accumulation time exceeded (CCR 66262.34(a)) The site has a 55 gallon drum of waste oil that appears to be full. The accumulation time limit on this waste has been exceeded. It is recommended that after the waste is removed that used oil be collected in closeable and properly labeled 5 gallon container. The used oil accumulated from the service of the compressor can be taken to a certified used oil collection center. (Auto zone,

WEBBER EMI (Continued) **S105697979**

Pep boys) If you opt to collect and dispose of the waste oil in this manner keep a log showing the date and quantity of used oil taken to the disposal center.

FINDS:

Registry ID: 110002906525

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Description: Failure to keep water out of the secondary containment of UST systems installed on or after July 1, 2003 and before July 1, 2004, or on or after July 1, 2004.
Violation Notes: Returned to compliance on 03/23/2017. OBSERVATION: EACH OF THE FOUR FILL SUMPS CONTAINED STANDING LIQUID AT THE TIME OF INSPECTION. REQUIREMENT: THE TECHNICIAN REMOVED AND PROPERLY CONTAINERIZED THE LIQUID DURING THE INSPECTION. VIOLATION CORRECTED.
Violation Division: San Bernardino County Fire Department
Violation Program: UST
Violation Source: CERS

Site ID: 9535
Site Name: AUTO CHARGERS
Violation Date: 03-22-2018
Citation: 23 CCR 16 2712 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712
Violation Description: Failure to comply with any of the applicable requirements of the permit issued for the operation of the UST system.
Violation Notes: OBSERVATION: THE 91, 87 MAIN AND 87 AUXILLARY FILL SUMPS HAD WATER INSIDE. THE AMOUNT WAS NOT ENOUGH TO TRIGGER THE ALARMS. HOWEVER, THE SAME ISSUE WAS NOTED ON THE LAST MONITORING CERTIFICATION REPORT FOR ALL FILL SUMPS. THE TESTING COMPANY REMOVED THE WATER. CORRECTIVE ACTION: EVEN THOUGH WATER WAS REMOVED, THERE APPEARS TO BE AN ISSUE WITH WATER INTRUSION. THERE WERE NO VISIBLE ISSUES WITH GASKETS OR BOLTS. THE CURRENT MATS BEING USED ARE NOT INTENDED TO KEEP WATER FROM ENTERING, THEY ARE BASIC FLOOR MATS. THERE ARE SPECIAL THICK RUBBER MATS THAT ARE MADE FOR TANK TOPS AND WILL ASSIST IN PREVENTING EASY WATER INTRUSION. INVESTIGATE THIS OPTION AND OTHERS IN ORDER TO RESOLVE THIS MATTER. INFORM OUR DEPARTMENT OF YOUR ROUTE BY THE COMPLIANCE DATE SET.

Classification: Small Quantity Generator

Hazardous Waste Summary:

. Waste code: D000
. Waste name: Not Defined

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D018
. Waste name: BENZENE

Violation Status: No violations found

FINDS:

Registry ID: 110012191163

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002841159

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002918148

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site ID:	107940
Site Name:	CONVERSE
Violation Date:	03-01-2016
Citation:	HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections
Violation Description:	Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes:	Returned to compliance on 03/30/2016. Failure to keep hazardous waste containers closed when not in active use (CCR 66265.173(a)) USED OIL CONTAINER WAS OPEN. MAINTAIN CLOSED WHEN NOT IN USE.
Violation Division:	San Bernardino County Fire Department
Violation Program:	HW
Violation Source:	CERS
Site ID:	107940
Site Name:	CONVERSE
Violation Date:	03-05-2019
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes:	OBSERVATION: Regulated facilities in this jurisdiction are required to include the following two phone numbers in the Emergency Response Plans & Procedures: (800) 33-TOXIC or (909) 386-8425. Note: (800) 33-TOXIC does not work nationwide; non-local callers must use (909) 386-8425 to report any release or threatened release. Also note that calling 911 does not meet the requirement for the handler to report a release and that the local fire department cannot make required notifications on behalf of the handler. SBCC 23.0732(b) If preferred, you may include the linked fillable PDF form available at http://www.sbcfire.org/Portals/58/Documents/Hazardous_Materials/Emergency-Response-Plan.pdf?ver=2017-05-23-142346-253 as part of your Emergency Response Plan. CORRECTIVE ACTION: Submit a complete emergency response plan into the California Environmental Reporting System (CERS).

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 1991-08-14 00:00:00.0
Site name: EMPIRE NISSAN INC
Classification: Not a generator, verified

Violation Status: No violations found

FINDS:

Registry ID: 110002852547

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for

EMPIRE NISSAN INC (Continued) **1000595502**

generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:
Site ID: 114466
Site Name: EMPIRE NISSAN, INC.
Violation Date: 11-09-2016
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: Returned to compliance on 01/26/2017. It was observed during this inspection, that the operator had 55 gallon drums storing drained used oil filters that did not have the accumulation start date. Compliance Requirement: Label the drained used oil filters containers and submit a signed Certificate of Compliance.
Violation Division: San Bernardino County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 114466
Site Name: EMPIRE NISSAN, INC.
Violation Date: 11-09-2016
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 11/14/2016. Failure to obtain an EPA ID Number (CCR 66262.12(a)) At the time of inspection the EPA ID number CAD983594490 was inactive. The operator activated the EPA ID number and this violation has been corrected.
Violation Division: San Bernardino County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 114466
Site Name: EMPIRE NISSAN, INC.
Violation Date: 11-09-2016
Citation: HSC 6.67 25270.6(a)(1), 25270.6(a)(2) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.6(a)(1), 25270.6(a)(2)
Violation Description: Failure to submit a tank facility statement on or before January 1 annually unless a current Business Plan has been submitted.
Violation Notes: Returned to compliance on 01/19/2017. The Business Plan that was submitted was not complete because it was missing the drained used oil filters and parts cleaner. For APSA, the operator can either submit a

EMPIRE NISSAN (Continued) **S104756851**

Business Plan or Tank Facility Statement.
Violation Division: San Bernardino County Fire Department
Violation Program: APSA
Violation Source: CERS

Site ID: 114466
Site Name: EMPIRE NISSAN, INC.
Violation Date: 11-09-2016
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes: Returned to compliance on 01/19/2017. The following hazardous material and hazardous waste were not disclosed on the Business Plan: (8) 55 gallon drums for drained used oil filters and 55 gallons of parts cleaner
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 114466
Site Name: EMPIRE NISSAN, INC.
Violation Date: 11-09-2016
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to discuss in the SPCC Plan procedures to test or inspect each aboveground container for integrity in accordance with industry standards: 1. On a regular schedule. 2. After material repairs are made. 3. By qualified personnel. 4. The frequency and type of testing and inspections based on container size, configuration, and design.
Violation Notes: Returned to compliance on 01/26/2017. There is no industry standard stated in the SPCC Plan for integrity testing conducted at the facility. The SPCC Plan states there will be a monthly formal visual inspection conducted by the Responsible Person or his designee and every 5 years each AST is inspected by a qualified independent tank inspection and testing service. An example of an industry standard is STI SP001. Compliance Requirement: Update the SPCC Plan to include integrity testing conducted in accordance with an industry standard. Submit a signed statement that the SPCC Plan has been updated.

Violation Notes: Returned to compliance on 05/09/2019. A CERS business plan was submitted on 4/20/2015 however it was incomplete. The hazardous materials inventory and the emergency response plan sections were not submitted. Update the plan and submit the missing sections. The plan

HAWTHORNE GARDENING COMPANY (Continued) **S106911478**

must be updated yearly by March 1st. The hazardous materials inventory must include all hazardous materials on site at or above 55 gallons, 500 pounds or 200 cubic feet for compressed gases. The facility is in the process of segregating all hazardous materials to a particular portion of the warehouse. Materials that would need to be listed on the hazardous materials inventory would include items that are toxic, corrosive, reactive or ignitable. pH adjusting chemicals and hydrogen peroxide were observed during the inspection.

Violation Division: San Bernardino County Fire Department

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: Yes
Transporter of hazardous waste: Yes
Treater, storer or disposer of HW: Yes
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Hazardous Waste Summary:

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date:	08-16-2018
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 09/18/2018. OBSERVATION: Used oil filters, brake fluid waste and universal waste aerosols were found on site that were not listed on the CERS inventory. Hazardous waste is disclosable in any quantity. The quantity of brake cleaner also needs to be

ONTARIO T INC DBA JOHN ELWAYS CROWN TOYOTA (Continued) **S112835990**

	updated to reflect the five 55 gallon drums observed. CORRECTIVE ACTION: Submit an accurate and complete hazardous materials inventory into the California Environmental Reporting System (CERS).
Violation Division:	San Bernardino County Fire Department
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	40290
Site Name:	JOHN ELWAY'S CROWN TOYOTA
Violation Date:	08-16-2018
Citation:	22 CCR 15 66265.174 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.174
Violation Description:	Failure to inspect weekly, areas where hazardous waste containers are stored or transferred. The owner or operator shall look for leaking containers and for deterioration of containers and the containment system caused by corrosion or other factors.
Violation Notes:	Returned to compliance on 09/18/2018. OBSERVATION: It was found that a weekly hazardous waste storage area inspection has not been conducted. CORRECTIVE ACTION: Submit a copy of the provided certificate of compliance to indicate the inspection is being conducted.
Violation Division:	San Bernardino County Fire Department
Violation Program:	HW
Violation Source:	CERS
Site ID:	40290
Site Name:	JOHN ELWAY'S CROWN TOYOTA
Violation Date:	08-16-2018
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to ensure drainage from diked storage areas is restrained by valves, except where facility systems are designed to control such discharge, or failure to ensure manually activated pumps or ejectors are used and the condition of the accumulation is inspected prior to draining dike.
Violation Notes:	Returned to compliance on 09/18/2018. The drain valve on the used oil tank located on the south side of the east service department building was found broken in an open position. CORRECTIVE ACTION: Replace the valve and ensure that all valves to containment basins are kept closed. Submit a photograph showing the repair.
Violation Division:	San Bernardino County Fire Department

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/30/2020

Next Scheduled EDR Contact: 04/13/2020
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/14/2019
Date Data Arrived at EDR: 12/05/2019

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

USGS TOPOGRAPHIC MAP

Target Property Map:	5620426 GUASTI, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

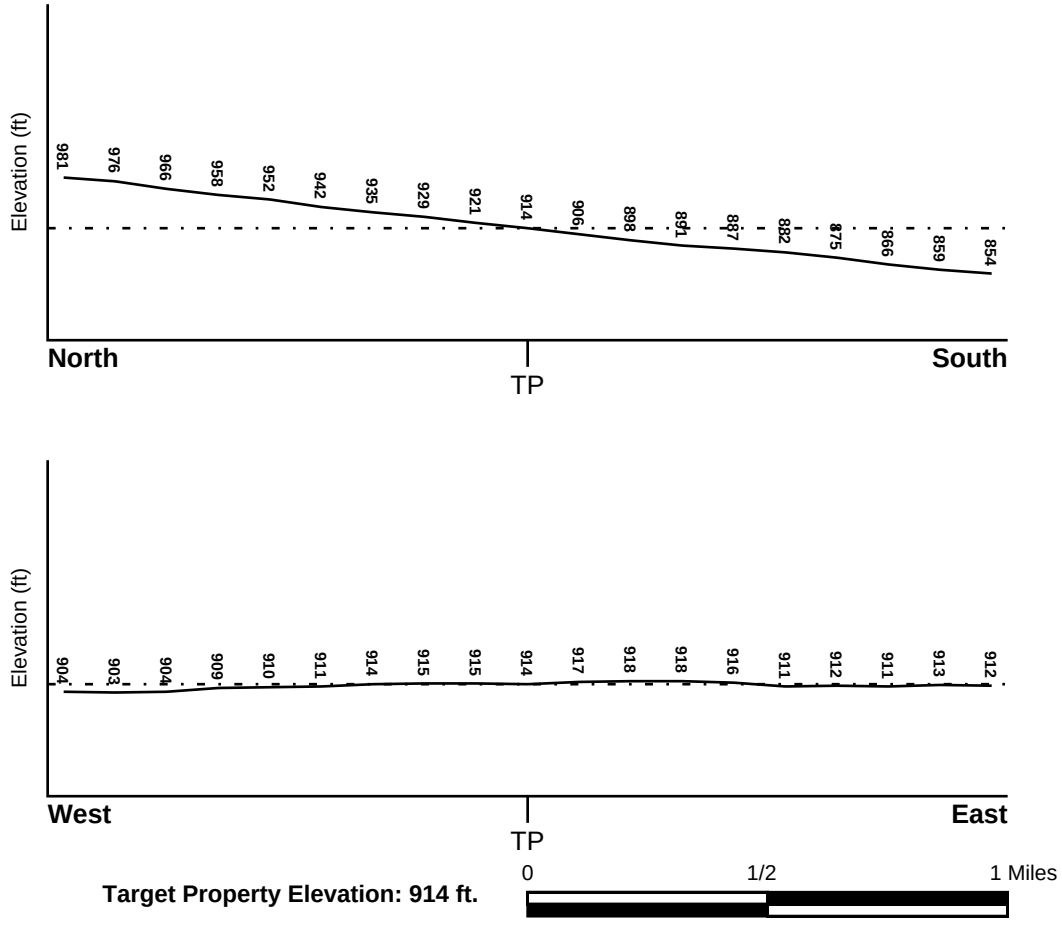
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06071C8641H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

06071C8637H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
GUASTI	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: DELHI

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

WELL SEARCH DISTANCE INFORMATION

DATABASE	SEARCH DISTANCE (miles)
Federal USGS	1.000

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

STREET AND ADDRESS INFORMATION

APPENDIX D: QUALIFICATIONS

Tatjana McCondichie

Professional Assessor

Education: Associates Degree of Language Arts, Olympia-Morata-Gymnasium (Germany), 1992
Major: English

Licenses/Registrations: California Registered Environmental Assessor
No. 08217, 2006

Summary of Professional Experience

Ms. McCondichie has over 6 years experience in environmental and air quality related fields, and has conducted over 100 Phase I Environmental Site Assessment (ESA) projects.

In addition, Ms. McCondichie has performed and managed environmental site assessments on various industrial, commercial, institutional and residential properties. Assessments included limited and comprehensive surveys for asbestos, lead-based paint and lead-in-drinking-water analysis. She has also managed subsurface investigations to determine the presence of contamination in soil, prepared written reports in formats prescribed by various fiduciary institutions and performed peer reviews on environmental site assessments completed by other environmental firms.

Ms. McCondichie's diversity across public and private industrial environments is a major contribution to LandAmerica Assessment Corporation's Professional Assessor team in the Southcentral United States.

Education

B.A. - Botany, Miami University (Ohio)
Minor - Conservation and the Environment

Training

Hazardous Waste Operations Emergency Response (HAZWOPER)

Highlights

Fifteen years of experience with environmental and engineering disciplines
Over 11 years of experience performing and overseeing environmental due diligence projects

Experience Summary

Mr. Kovach has experience in a broad range of environmental and engineering disciplines including: engineering and environmental due diligence services, industrial air, water, and wastewater permit compliance and monitoring, hazardous waste management and disposal, electrical utilities projects, environmental engineering projects, and wetland ecology research.

Mr. Kovach serves as a Senior Project Manager for Partner Engineering and Science, Inc. (Partner), managing and performing Phase I Environmental Site Assessments and other due diligence projects supporting the commercial real estate industry. Mr. Kovach has significant experience in managing, reviewing and performing due diligence assessments for a variety of property types and the needs and requirements of varied number of reporting standards, including ASTM standards, EPA's All Appropriate Inquiry (AAI), and customized client formats. Mr. Kovach's experience extends to numerous different client types and needs, such as lenders, brokers, property owners and prospective purchasers.

Mr. Kovach has performed Phase I Environmental Site Assessments, Environmental Transaction Screens, Property Condition Assessments (PCAs), Regulatory Compliance Assessments, Asbestos sampling, Lead-based Paint sampling, Radon Studies, Lead-in-Water sampling, permit compliance and regulatory agency interaction, hazardous waste storage and handling, air quality monitoring, and environmental emergency responses.

Project Experience

Dry cleaner, San Francisco, CA. Mr. Kovach performed a Phase I Environmental Assessment for a long-term dry cleaning operation and identified significant contamination and human health risk in subsequent investigations.

Industrial aerospace manufacturing facility, San Leandro, CA. Mr. Kovach performed a Phase I Environmental Assessment for an industrial facility identified as one of the responsible parties for a regional plume of groundwater contamination.

Proposed school site, Oakland, CA. Mr. Kovach oversaw and reviewed a Phase I Environmental Assessment for a proposed school site subject to California Department of Toxic Substances Control (DTSC) requirements.

Former mines and ore milling sites, Sierra Nevada Mountains, CA and NV. Mr. Kovach performed several Phase I Environmental Assessments for historical mining and ore milling sites.

Various Dairy Farms, Stanislaus County, CA. Mr. Kovach performed and reviewed several Phase I Environmental Assessments for large dairy farms regulated by the California State Water Resources Control Board's Confined Animal Feeding Operation (CAFO) program.

Paper product manufacturer, Longview, WA. Mr. Kovach performed a Phase I Environmental Assessment for a large, old paper manufacturing facility requiring evaluation of various environmental issues.

High-rise luxury hotel, Seattle, WA . Mr. Kovach performed a Phase I Environmental Assessment for a luxury hotel formerly developed with three gasoline service stations and other environmentally sensitive occupants.

Contact

skovach@partneresi.com

Jay Grenfell, REPA, LEED AP
National Client Manager, Principal

Education

B.A, Environmental Science, University of California at Berkeley

Registrations

Registered Environmental Property Assessor, National Registry of Environmental Professionals
LEED Accredited Professional, United States Green Building Council

Highlights

16 years in the environmental consulting industry
Experience in various disciplines, including regulatory compliance, asbestos abatement, point source air monitoring, Tier II reporting, and Environmental Health & Safety consulting services.

Experience Summary

Mr. Grenfell currently serves as a National Client Manager providing risk management solutions to clients' due diligence and engineering needs. Mr. Grenfell's breadth of experience and understanding of commercial real estate transactions from both an equity investment and lending view allow him to provide risk management consulting that align with client objectives.

Mr. Grenfell conducted and managed thousands of Phase I ESAs on industrial, office, multi-family, government, retail, and hospitality properties prior to assuming his role as a client manager and business development professional. His experience also includes management of large multi-site portfolios for varied and demanding stakeholders, where he mentored field assessors, identifying environmental risks, and provided detailed reports within demanding deadlines. Mr. Grenfell experience includes understanding and coordinating a full suite of due diligence services, including Phase II subsurface investigations, Property Condition Assessments, Seismic Risk Assessments, ALTA Surveys, Asbestos and Lead Surveys, and Energy Audits.

Mr. Grenfell has worked for nationwide and local clients that include commercial developers, mortgage bankers, real estate brokers, individual investors, equity/institutional investment groups, and financial lending institutions, including CMBS lenders, SBA lenders, and GSA (Fannie and Freddie) lenders.

Project Experience

Multi-Site Portfolio, Nationwide. Managed performance and delivery of summary matrix and complete reports for a 300-site portfolio of Class A high-rise office buildings, at the time valued as the largest real estate transaction in history. Lead scheduled conference calls summarizing and evaluating environmental liabilities for a large stakeholder group.

Phase II Subsurface Investigations, Kansas City, Missouri. Conducted eight Phase II Site Assessments at gasoline stations over a four-day period, coordinating and supervising the advancement of soil borings and collected soil and groundwater samples. Documented results in concise, well-written reports.

Industrial Compliance Evaluation, San Francisco, CA. Managed a compliance evaluation team at an 8,000 employee, 24-hour aircraft maintenance center, evaluating environmental regulatory compliance. Provided solutions and established protocols for ensuring compliance.

Third-Party Report Reviews, Chicago, IL. Conducted 3rd-party reviews of over 150 gasoline stations, documenting previous report findings and providing a matrix listing issues and updated risk-based recommendations.

High Rise Office Buildings, San Francisco. Worked with technical team to manage pre-acquisition due diligence for equity investor of high rise office buildings in downtown San Francisco. Included equity PCA with specialty evaluations of façade, MEP, Fire and Life Safety, Roof, and ADA. Provided red flag analysis and summary costs tables within 48 hours of initial site visits with final reports provided within 10 business days.

Multi-Site Portfolio, California. Managed performance and delivery of summary matrix and complete reports for a 150-site portfolio of fast food restaurants providing environmental and property condition assessments with specialty evaluations of roofs and MEP systems.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

APPENDIX F
QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

FARSHAD RAZMDJOO

Managing Principal

Farshad Razmdjoo is the Managing Principal of Ramboll's Southwest operations. He has over 30 years of experience in environmental consulting and engineering. Farshad currently manages a vast variety of consulting projects, including real estate and merger and acquisition due diligence, tenant environmental audits, environmental, health and safety audits, property decommissioning and redevelopment, remedial investigations, remedial action design and implementation, regulatory agency interaction, asbestos management programs, radon surveys, mold investigation and remediation programs and evaluations of lead in drinking water. In addition, he has developed and managed an environmental risk-management program for a major real estate investment trust. Farshad is highly experienced in working with federal and California environmental regulations and has a working knowledge of many other state and local regulatory requirements and agencies throughout the United States. Much of Farshad's past and current projects involve assessing environmental issues at commercial and industrial facilities throughout the North America, Europe, China, and India. For the past 24 years at Ramboll, Farshad has managed projects for representatives in real estate development companies, insurance companies, financial institutions, pension funds, institutional investors, private equities, real estate investment trusts, aerospace companies, industrial and manufacturing companies, and law firms.

CAREER

2013-Current
Managing Principal, Ramboll US Corporation

2009-2013
Principal and Director of Operations, ENVIRON International Corporation

2000-2009
Principal, ENVIRON International Corporation

1993-2000
Senior Manager, ENVIRON International Corporation

1985-1993
Regional Manager & Senior Project Manager, Applied Geosciences Inc.

PROJECTS

Site Investigation and Remediation

- Negotiated with the Santa Ana Regional Water Quality Control Board (SARWQCB) a reasonable path forward for a former manufacturing facility located in Irvine, California where soil and groundwater is impacted with volatile organic compounds (VOCs). Historically, considerable remediation had been performed on site by other consultants, which included excavation, and above ground soil treatment, soil vapor extraction, and groundwater pump and treat technologies. The site has been in a post remediation monitoring phase under the oversight of the SARWQCB. Post remediation monitoring indicated that overall, natural attenuation processes were reducing VOC concentrations over time. However, in 2013, the SARWQCB requested the responsible parties to consider evaluating additional remedial options to reduce concentrations of VOCs in one area of the site. Also a Membrane Interface Probe (MIP) investigation was performed in that area of the site.

- Using the data collected during the MIP investigation, Farshad directed the development of a limited and focused remedial program utilizing state of the art technology appropriate for the restrictive conditions which are present in the area of the site investigated (challenging geologic materials, limited access due to occupied buildings, roadways, neighboring properties, etc.). The SARWQCB approved the remedial plan that included injection of zero-valent iron into the shallow saturated zone to reduce VOCs in the area of concern. The remediation was completed during October and November 2014. A post monitoring program started in December 2014 is on-going.

- Directed the evaluation of potential off-site sources, and development of a site conceptual model for a facility in Vernon, California where chlorinated VOCs (CVOCs) were discovered in groundwater. Designed and managed investigation of soil, soil gas, and groundwater to evaluate potential sources, including use of compound-specific isotope analysis to help demonstrate that the CVOCs detected in soil gas are distinct from those detected in groundwater, and unrelated. Managed additional soil, soil gas, and groundwater investigation to delineate the CVOC impacts onsite. Based on the onsite investigation, a pilot study was designed to assess the efficacy of soil vapor extraction (SVE) to reduce CVOCs in the vadose zone (ground surface to approximately 180 feet below ground surface). The pilot study showed that SVE operations effectively reduced CVOC soil gas concentrations at all depths. The SVE pilot system was expanded and operated under a final Remedial Action Plan. The SVE system appeared to have reached asymptotic conditions and the SVE operation has been stopped and post remedial rebound testing is ongoing. The rebound testing results will be used to assess and negotiate site closure. All work is being implemented under the oversight of Los Angeles Regional Water Quality Control Board (LARWQCB).

- Assisted an owner of a former industrial facility in southern California that was significantly impacted by CVOCs in soil, soil gas, and groundwater. The scope of work included oversight of the remediation of the vadose zone with in situ thermal treatment and evaluation of human health risk assessments to assess various future redevelopment scenarios. The work was conducted under the oversight of the LARWQCB.

- Designed and managed the implementation of site characterizations, remediation, and human health risk assessments for an existing 75-acre commercial and light industrial center in Irvine, California under the oversight of the Orange County Health Care Agency (OCHCA) and the SARWQCB. The work was conducted for the property owner and involved performing appropriate site characterization to define the extent of CVOC releases in soil, soil gas, and groundwater from prior and existing tenants; one of which included a dry cleaning facility. The human health risk assessment considered site specific conditions and data to define risk based threshold concentrations deemed as acceptable concentrations in soil, soil gas, and groundwater for indoor worker receptors.

- Remediation involved injection of approximately 100,000 pounds of zero-valent iron in sixty direct push borings to create three separate permeable reactive barriers or treatment zones. The purpose of work was that each zone would chemically reduce chlorinated solvents in the “shallow zone” groundwater as it migrates through the permeable reactive barrier(s). Due to the low groundwater concentrations, Farshad was able to negotiate the elimination of post remediation groundwater monitoring. The project also involved collection of sub-slab and indoor air samples followed by installation and operation of a sub-slab vapor depressurization system and epoxy coating the interior floors to mitigate vapor intrusion. Post mitigation indoor air samples reported a reduction of indoor air concentrations by 100 times. Farshad successfully negotiated and obtained a “No Further Action” for the site with the concurrence from the SARWQCB.
- Managed a remedial investigation at a California Superfund site in Los Angeles County. The site was under a consent order from Cal-EPA Department of Toxic Substances Control at the time. The project involved performing RI/FS, conducting human health and ecological risk assessments, and preparing a remedial action plan.
- Managed, reviewed, and evaluated numerous Phase I and II reports associated with the acquisition of a 500-acre industrial park in Spokane, Washington. Prepared a report of findings including conclusions and recommendations for review by the client.
- Managed Phase I and II site assessments and estimation of remediation costs of six manufacturing plants in Costa Mesa (Orange County), Perris (Riverside County), Ontario (San Bernardino County), Somerton (Arizona), Alliance (Ohio), and Winter Heaven (Florida).
- Designed and managed a site investigation program to evaluate the nature and the extent of soil contaminated with PCE at a dry cleaning facility in Aliso Viejo, California. Based on the results, several remedial alternatives were evaluated and a risk assessment was performed. Based on the results of the risk assessment, site closure was obtained from OCHCA.
- Managed a remedial investigation/feasibility study (RI/FS) using CPT/HydroPunch and Geoprobe techniques, with installation of multi-level groundwater monitoring wells, evaluation and selection of a remedial alternative, and design and preparation of an interim remedial action plan for remediation of soil and groundwater contaminated with dense non-aquas phase liquid (DNAPL) at a former manufacturing facility in Oxnard, California. The first phase of remediation included the excavation and placement of approximately 11,000 cubic yards of impacted soil into vapor extraction cells for on-site treatment. Soil vapor and vertical and horizontal groundwater extraction wells were installed. The vapor and groundwater treatment systems included air stripping, ultra violet oxidation, and vapor and liquid granulated activated carbon. All work was conducted under oversight of LARWQCB and Ventura County Air Pollution Control District.
- Managed a groundwater investigation program at a former electronics manufacturing plant in Santa Ana, California. This included installation, development, and sampling of shallow groundwater monitoring wells and evaluation and interpretation of hydrogeological and analytical data. The investigation was performed under the regulatory oversight of the SARWQCB.
- For a multinational corporation at an orphan site in the San Francisco Bay Area, provided investigative and consulting services in support of regulatory case closure under the San Francisco Regional Water Quality Control Board’s (RWQCB) Low-Threat Chlorinated Solvent Site guidance. The site was in long-term post-remedial monitoring status when the client took active responsibility for the site. Following development and implementation of soil gas and indoor air quality investigations and an evaluation of potential human health risks, the RWQCB rescinded the cleanup order for the site and issued case closure.
- Provided consulting services to evaluate soil, soil vapor, and groundwater impacts at the Site located at14657 Industry Circle, La Mirada, California. Ramboll was successful in demonstrating that the majority of groundwater impacts on the Site originated from an upgradient source. Through monitoring (4 years of groundwater monitoring and reporting) and evaluation of the remaining chemical of concern, Tetrahydrofuran, Ramboll was successful in attaining site closure using a detailed Conceptual Site Model and Health Risk Assessment to show that the groundwater at the site related to tetrahydrofuran posed no significant risk. The Regional Water Quality Control Board concurred with our assessment and issued a closure letter for the Site in September 2014.

Environmental Risk Management

- Farshad has developed and managed an environmental risk management program for a major real estate investment trust (REIT). This REIT contained over 200 properties with 400 tenants with pharmaceutical and life science operations throughout the western and eastern United States, China, and India. As part of the environmental risk management program, an acquisition due diligence, an asbestos management program, a moisture intrusion and mold prevention response (MIMPR) program, and a tenant environmental audit (TEA) program were developed and implemented. A mold prevention and response plan, as outlined in the MIMPR, was prepared and implemented. More than 500 tenant exit audits for tenants vacating the properties were conducted in accordance with the TEA. An overall tenant environmental audit program has been developed.

Decontamination / Decommissioning

- Managed the decontamination and decommissioning of a former biopharmaceutical research facility. A detailed survey of over 250 rooms was conducted, and radiological materials, hazardous chemicals, and potentially biologically hazardous substances were identified. Upon completion of the decontamination/decommissioning, the entire facility was cleaned and prepared for re-occupancy. Throughout the decommissioning process, Ramboll worked closely with State regulatory officials to demonstrate that all cleanup activities were in compliance with applicable regulations.

- Managed the acquisition due diligence and subsequent redevelopment of a former metal stamping facility in Santa Fe Springs, California. Under Farshad's direction, a Phase I ESA was completed and, based on the findings of the Phase I ESA, a targeted Phase II subsurface investigation was performed to evaluate areas of potential environmental concern that included soil gas, soil, and groundwater sampling. Farshad also assisted the client with closure activities for the site that included performing an assessment of building materials for polychlorinated biphenyls contamination, coordination and oversight of asbestos and lead-based paint surveys, groundwater monitoring well abandonment, post excavation soil sampling on removal of various subsurface features, and preparation of a soil management plan (SMP), to be implemented during redevelopment activities. Subsequently, a no further action letter was obtained from the Santa Fe Springs Fire Department.

Site Closure

- Managed the preparation of a sampling and analysis plan evaluating the nature and extent of soil and groundwater contaminated with tetrachloroethene (PCE) at a dry cleaning facility in Santa Ana, California. Ramboll obtained closure for the site from the SARWQCB.

Litigation Support

- Managed litigation support services related to the fate and transport of organic compounds in soil and groundwater, appropriate remedial alternatives, and cost associated for two facilities in southern California. The results of the evaluations were successfully used as part of the settlement negotiations with the opposing parties.

Due Diligence

- Directed the due diligence process and estimating environmental liabilities for acquisition of a former aerospace manufacturing facility in Los Angeles, California under extremely tight deadline. The site has been impacted with various VOCs, total petroleum hydrocarbons, metals, emerging chemicals, and radioactive wastes. The assignment also included evaluation of methane, asbestos, lead-based paint, and indoor air quality. The work was conducted on behalf of the site's buyer, which planned to develop it into a commercial business park.

- Acted as point of contact and responsible Principal for several national real estate and development clients with properties throughout the United States. Farshad has completed over 1000 assignments supporting the clients in acquiring, managing, and disposing properties. Many of these assignments were undertaken and successfully completed under extreme time constraints.

- Farshad has managed over 30 international multi-site environmental assessments at over 200 industrial, manufacturing, and commercial facilities as a part of merger and acquisition environmental due diligence. These included evaluation of aerospace component manufacturing facilities, automotive manufacturing and distribution facilities, medical device manufacturing facilities, telecommunication facilities, and hardware store facilities. Work plans and subsequent Phase II soil and groundwater investigations were also completed for many of those assignments.

ALEXIS HILLMAN

Senior Managing Consultant

Alexis Hillman is a Senior Managing Consultant at Ramboll's Los Angeles office. She has 19 years of experience in environmental investigations and due diligence projects and is a California Professional Geologist and Certified Hydrogeologist. Ms. Hillman has conducted and managed soil, groundwater, soil vapor, and indoor air quality sampling projects as well as aquifer testing for Phase II site investigations and groundwater monitoring programs, and has contributed to the development of feasibility studies, treatability studies, remedial investigation reports, and remedial action plans. She manages due diligence projects and has contributed to litigation support projects. Ms. Hillman works extensively on redevelopment projects from the due diligence phase, to site investigation, data evaluation, risk assessment, and remediation, as well as construction oversight and soil management.

CAREER

1996-2000
Assistant Geoscientist to Senior Associate Geoscientist, McLaren/Hart, Inc.
Staff Geoscientist responsible for site investigations, due diligence, preparation of work plans, groundwater monitoring reports, Phase I and Phase II reports.

EDUCATION

1990-1994
BS Geology
University of California, Los Angeles

COURSES/CERTIFICATIONS

OSHA 40-hour Hazardous Waste Operations and Emergency Response Standard - HAZWOPER, 2019
Certified Hydrogeologist - California, 2003-2019
Professional Geologist - California, 2001-2019

PROJECTS

2016-present

Former Metals Facility Soil Vapor Extraction

Project manager for Phase I and site characterization activities at former metal preparation facility being considered for multi-use redevelopment. Identified a vapor intrusion concern from chlorinated volatile organic compounds for future tenants and a potential off-site building. Ramboll installed and operates a soil vapor extraction system to proactively reduce concentrations in shallow subsurface soil and soil vapor while waiting for County oversight to begin the closure process.

2014-present

Redevelopment of Former Manufacturing Facility

Conducted and managed due diligence for prospective buyer and developer on property with lengthy site investigation and remediation history. Worked with agency on a separate redevelopment track to conduct earthwork activities under a soil management plan. Conducted pre-construction soil characterization to minimize disposal fees. Oversaw earthwork activities, which included export of 47,900 cubic yards of soil, monitoring soil for impacts and separation of soil for different disposal facilities. In addition, the project includes the design, installation, and ongoing performance monitoring of a sub-slab depressurization system (SSDS) to mitigate residual shallow soil impacts, which Ramboll continues to operate and maintain.

2016-2018

Source Area Excavation & Site Closure Activities

Managed a Phase I environmental site assessment and based on the significant former manufacturing activities, a Phase II investigation was recommended. An area of elevated tetrachloroethene and petroleum hydrocarbons was identified in soil and soil gas. After engaging local agency oversight, Ramboll implemented a source area removal work plan involving the excavation of approximately 207.83 tons of TPH- and VOC-impacted soil from the area with the highest concentrations of those constituents, the "source area", by large diameter auger drilling. Based on its site investigation and removal action activities, Ramboll requested no further action on behalf of its client, which was granted in December 2018 in concert with a land use restriction for commercial uses only.

2014-2016

Aerospace Manufacturing Facility

Managed a Phase I environmental site assessment to evaluate environmental liabilities for an aerospace manufacturing facility in southern California with a 25-year history of extensive site investigations and ongoing remedial actions. The site soil, soil gas and groundwater has been impacted primarily with chlorinated solvents and cleanup is being performed under the oversight of the Los Angeles Regional Water Quality Control Board. Further, conducted a Phase II subsurface investigation to document the current conditions of soil and soil gas to assist the client in marketing the property to potential buyers. The work was conducted on behalf of the parent company, which was considering sale of the property.

2013-2016

Commercial/Residential Redevelopment

Managed site investigation activities and risk assessment following identification of a recognized environmental condition during due diligence of a site being redeveloped into a high rise commercial and residential building in Los Angeles. Implemented soil management plan during grading to address previously unknown areas of impacted soil. Worked with Los Angeles County Fire Department, Health Hazardous Materials Division (LAFD) to satisfy requirements for no further action for soil while meeting aggressive project redevelopment schedules. LAFD provided a letter requiring no further action acknowledging that the contamination had been satisfactorily mitigated with a vapor barrier and passive venting system. Following one year of groundwater monitoring, LAFD also agreed to no further action for groundwater.

2012-2015

Due Diligence

Manager for property transaction environmental assessments, including industrial, commercial and residential property. Responsibilities include agency research, file, aerial photo, and historical map review; site visits and interviews; asbestos, lead-based paint, and drinking water sampling; detailed site plan preparation; and reporting.

2010-2014

Former Dry Cleaning Facility

Confidential Real Estate Investor

Evaluated historical releases from a former dry cleaning facility located in a shopping center. Conducted subsurface evaluations in an existing grocery store to evaluate VOCs in soil, soil gas, and groundwater. Conducted a screening human health risk assessment followed by indoor air sampling. Evaluated VOCs in groundwater over several monitoring events. Negotiated with the local agency to demonstrate groundwater plume stability and acceptable vapor intrusion risk to achieve regulatory closure.

2010-2013

Redevelopment of Industrial Property

Managed environmental issues during redevelopment of a former manufacturing facility in South Gate, California. A soil management plan was prepared to guide earthwork. The site had received a no further action letter for soil with unrestricted use from the DTSC; however, several areas of soil impacted with TPH, VOCs, and SVOCs were encountered during grading operations. To maintain the project schedule and avoid costly penalties for missed deadlines, aggressive excavations were conducted in five areas and in total 24,749 tons of impacted soil were removed and disposed off-site. In areas where building pads were proposed, soil gas surveys were completed to demonstrate to future tenants that the risk to site workers was well below commonly accepted standards. In addition, three previously unknown USTs were found during the grading process and removed and closed under the oversight of the local agency. A supplemental no further action letter was subsequently granted by the DTSC.

2013

Facility Decommissioning and Closure

Obtained closure of an ink manufacturing facility in Santa Fe Springs, California. Prepared the facility decommissioning and closure plan for submittal to the Santa Fe Springs Fire Department following site inspection. Following decommissioning, implemented a post-decommissioning sampling and analysis program to satisfy requirements of the Fire Department. Assistance was provided to the client in closing out stormwater and air permits for the facility. Prepared a closure report following sampling and decommissioning activities.

2002

Due Diligence

Conducted environmental due diligence of aerospace, chemical, manufacturing, multi-tenant and light industrial business parks as part of corporate mergers and acquisitions and commercial real estate transactions in California, Wyoming, and Montana. As part of the due diligence process, prepared cost scenarios for compliance issues regarding air, wastewater, and OSHA issues.

2001-2003

Former Manufacturing Facility

Task manager implementing remedial action plan (RAP) involving the installation of a dual-phase and soil vapor extraction system to clean up chlorinated-solvent impacted soil and groundwater. Implementation of the RAP required management of permitting process through numerous agencies in Southern California.

2001-2002

MTBE Field Investigation

Field geologist for agency driven, regional methyl tertiary-butyl ether (MTBE) study. Conducted discrete-depth groundwater sampling using a combination of air rotary casing hammer and mud rotary drilling techniques and using the Simulprobe sampling tool. The project included continuous core sampling, geophysical logging, and monitoring well installation in the shallow and regional aquifers. The project was completed under the supervision of RWQCB and USEPA representatives. Results of the investigations were used to determine cost allocations for regional remedial efforts.

2001

Due Diligence

Geologist for Phase I Environmental Assessment at former crude oil impoundment site. The Site is currently developed with a shopping center, however due to former operations at the site methane monitoring is conducted on a continuing basis. Other issues identified during the assessment included potential migration of impacted groundwater from an offsite source, and dry cleaning operations at the Site that have impacted a shallow perched groundwater zone. Responsible for reviewing all environmental documents related to the various identified issues and summarizing the work completed to the satisfaction of the Site owner.

1999-2000

Development of Feasibility Studies

Geologist for development of Feasibility Study and Treatability Studies for chlorinated solvent-impacted manufacturing facility in Southern California. The project included document review, compilation and presentation of soil and groundwater data, and comparison to potentially applicable agency clean-up criteria, for the purpose of selecting remedial action alternatives and appropriate treatability studies. Also responsible for implementing certain tasks for treatability studies, installing multiple offsite monitoring wells including several in public right-of-ways and in residential areas and implementing the community relations program in place to address the potential concerns of community members.

1999

Site Investigation

Field geologist for subsurface soil and groundwater investigation at a proposed 2-mile railroad construction site with underground petroleum pipelines in the Port of Los Angeles. This expedited site characterization included sampling at nearly 200 points, management of field database and mobile laboratory, plume definition and GPS surveying.

1999

Site Investigation

Geologist for extensive Cone Penetrometer Testing (CPT) study. Implemented CPT logging and multiple-depth groundwater sampling investigation along downgradient property boundary and prepared detailed cross-section of stratigraphy and distribution of contaminants for presentation to the Regional Water Quality Control Board.

1998

Former Landfill

Geologist for development of Brownfields Redevelopment Workplan. The site was a former landfill that was underdeveloped. Responsibilities include preliminary historical research regarding the extent and nature of the landfill, and development of a work plan to investigate the potential impact to soil and/or groundwater by the former landfill as well as current site operators.

1998

Site Investigation

Field geologist conducting slug tests at former underground storage tank site involved in litigation. The project included slug tests on multiple monitoring wells at the site and data analysis using AQTESOLV. The results were used along with physical soil analysis results to determine if a release date could be estimated.

1996-1997

Site Investigation

Field geologist for the installation of groundwater monitoring wells for a medical equipment manufacturing facility in Irvine, California. Groundwater at the facility is impacted with chlorinated solvents. Responsible for obtaining permits, including right-of-way; setting up subcontractors for well installation and lab analyses; and supervising installation of the monitoring wells. These wells were installed to aid in characterizing the extent of impact to groundwater. Also responsible for preparing groundwater monitoring reports, including groundwater contour maps, chemical impact figures, and hydrographs, under supervision of the RWQCB - Santa Ana Region.

1996

Pesticide Manufacturing Plant

Field geologist for several phases of site characterization for a pesticide manufacturing plant in the Los Angeles area where soil is impacted by chlorinated pesticides, and dioxins and furans. Responsible for implementing sampling plan, which involved precise measurement of sampling depths with the Geoprobe®. Also responsible for performing modified decontamination procedures to ensure representative integrity of samples. All work was performed under supervision of the Department of Toxic Substances Control.

1st Submittal Date: 2/15/2022
2nd Submittal Date: 6/22/2022

Preliminary Water Quality Management Plan (PWQMP)

1. Introduction

The Preliminary Water Quality Management Plan (PWQMP) is a planning tool to improve integration of required water quality elements, stormwater management, water conservation, rainwater harvesting and re-use, and flood management in land use planning and the City's development process. The Preliminary WQMP will assist project applicants and planners in properly designing and laying out project sites so that water quality may be incorporated in the most effective manner and at the lowest cost for the developer.

The San Bernardino County Municipal Separate Storm Sewer System Permit (MS4 Permit) requires project-specific Water Quality Management plans (WQMP) to be prepared for all priority new development and significant redevelopment projects listed in Section 2 of this document. The MS4 Permit stipulates that the City of Ontario require priority project applicants to submit a Preliminary project-specific WQMP, as early as possible, during the environmental review or planning phase of a development project and that the Preliminary WQMP be approved prior to the issuance of land use entitlement.

2. Priority Projects (requiring a Preliminary WQMP)

Land Use entitlement shall not be issued for any of the listed projects, below, until a Preliminary WQMP has been approved by the City's Engineering Department. For construction projects not going through entitlement, a Preliminary and Final project specific WQMP shall be approved, prior to the issuance of construction permits:

Check the appropriate project category below, for this project:

Check below	**Project Categories**
	1. All significant re-development projects. Significant re-development is defined as the addition or replacement of 5,000 or more square feet of impervious surface on an already developed site subject to discretionary approval of the Permittee. Redevelopment does not include routine maintenance activities that are conducted to maintain original line and grade, hydraulic capacity, original purpose of the facility, or emergency redevelopment activity required to protect public health and safety. Where redevelopment results in an increase of less than fifty percent of the impervious surfaces of a previously existing developed site, and the existing development was not subject to WQMP requirements, the numeric sizing criteria discussed below applies only to the addition or replacement, and not to the entire developed site. Where redevelopment results in an increase of fifty percent or more of the impervious surfaces of a previously existing developed site, the numeric sizing criteria applies to the entire development (new and existing).
X	2. New development projects that create 10,000 square feet or more of impervious surface (collectively over the entire project site) including commercial, industrial, residential housing subdivisions (i.e., detached single family home subdivisions, multi-family attached subdivisions or townhomes, condominiums, apartments, etc.), mixed-use, and public projects. This category includes development projects on public and private land, which fall under the planning and building authority of the permitting agency.

Check below	Project Categories
	3. Automotive repair shops (with SIC codes 5013, 5014, 5541, 7532- 7534, 7536-7539).
	4. Restaurants and Food Service Establishments where the land area of development is 5,000 square feet or more.
	5. Developments of 2,500 square feet of impervious surface or more adjacent to (within 200 feet) or discharging directly into environmentally sensitive areas (ESA's) such as areas designated in the Ocean Plan as areas of special biological significance or waterbodies listed on the CWA Section 303(d) list of impaired waters.
X	6. Parking lots of 5,000 square feet or more exposed to storm water. Parking lot is defined as land area or facility for the temporary storage of motor vehicles.
	7. Retail Gasoline Outlets (RGOs) that are either 5,000 sq ft or more or have a projected average daily traffic of 100 or more vehicles per day.
	8. *This project is not covered under any of the categories listed above.

* If the development is not covered under any of the project categories listed in Section 2, the project is not required to design and install Site Design/LID BMPs or Treatment Control BMPs to treat the design storm event (Design Capture Volume) described in Section 4.

3. Preliminary WQMP Objectives

Through a combination of Site Design/LID BMPs (where feasible), Source Control, and/or Treatment Control BMPs, project-specific WQMPs shall address all identified pollutants and hydrologic conditions of concern from new development and significant re-development projects for the categories of projects (priority projects) listed in Section 2. Under each type of BMP, listed below, please indicate which BMPs are planned to be implemented and included in the Final WQMP for the project:

A. Site Design/LID (Low Impact Design) for Reducing Stormwater Runoff:

The MS4 Permit requires each priority development project to infiltrate, harvest and use, evapotranspire, or bio-treat the runoff from a 2-yr, 24-hour storm event (Design Capture Volume). If site conditions do not permit infiltration, harvest and use, evapotranspiration, and/or bio-treatment of the entire Design Capture Volume, at the project site, Site Design/LID techniques are required to be implemented to the Maximum Extent Practicable, at the project site, and the remainder of the DCV shall be infiltrated, harvested, bio-treated or treated by alternative measures. Project applicants shall submit a Preliminary WQMP that documents the LID/Site Design BMPs, proposed for the project. Please indicate, in the table below, which Site Design/LID BMPs will be utilized on this project to accomplish this requirement:

Site Design/LID Practice	Planned	Not Planned
Provide at least the minimum effective area required for LID BMPs, to comply with the WQMP (see Table 3-1 below).		**X[1]**
Grade parking lot areas/drive aisles/roof drains to sheet flow runoff into landscaped swales, via curb cuts or zero-face curbs or otherwise disconnect direct drainage from MS4.		**X[1]**
Design landscaped areas as swales and grade to accept runoff from building roofs, parking lots and project roadways.		**X[1]**
Install surface retention basins or infiltration trenches to receive impervious area runoff.		**X[2]**
Install pervious pavement in parking stalls, alleys, driveways, gutters, walkways, trails or patios.		**X[2]**
Install underground stormwater retention chambers where downstream landscaped areas are limited.	**X**	
Install approved Stormwater Drywells in detention areas.		**X[2]**
Construct streets, sidewalks, and parking lot stalls to the minimum widths necessary.	**X**	
Install on-site Biotreatment basins/trenches with underdrains, where soil type is poorly draining.		**X[2]**
Install “Engineered Soil” to increase uptake/soil storage capacity and/or evapotranspiration.		**X[2]**
Install Rainwater Harvesting/Use Equipment.		**X[3]**
Regional LID BMP facilities are installed, off-site, with the capacity and conveyances to accept post-development storm water runoff from this project and reserved capacity allocation credits have been assigned to the project, in a Certificate or other legally binding document, attached herein		**X[2]**

[1] Project capable of treating the full DCV onsite and not required to demonstrate this site design.
[2] The site will be captured and treated by the proposed underground infiltration facilities.
[3] Concept not utilized because the impervious area is much greater than landscape.

Table 3-1 Minimum Effective Area[1] Required for LID BMPs (surface + subsurface facilities) for Project WQMP to Demonstrate Infeasibility[2] (% of site)

Project Type	New Development	Re-Development
SF/MF Residential < 7 du/ac	10%	5%
SF/MF Residential < 7 - 18 du/ac	7%	3.5%
SF/MF Residential > 18 du/ac	5%	2.5%
Mixed Use, Commercial/Industrial w/FAR< 1.0	10%	5%
Mixed Use, Commercial/Industrial w/FAR 1.0-2.0	7%	3.5%
Mixed Use, Commercial/Industrial w/FAR> 2.0	5%	2.5%
Podium (parking under > 75% of project)	3%	1.5%
Zoning allowing development to property lines	2%	1%
Transit Oriented Development[3]	5%	2.5%
Parking	5%	2.5%

[1] "Effective area" is defined as land area which 1) is suitable for a retention/infiltration BMP (based on infeasibility criteria) and 2) is located down-gradient from building roof or paved areas, so that it may receive gravity flow runoff.

[2] Criteria only required if the project WQMP seeks to demonstrate that the full DCV cannot be feasibly managed on-site.

[3] Transit oriented development is defined as a project with development center within one half mile of a mass transit center.

Key: du/ac = dwelling units/acre, FAR = Floor Area Ratio = ratio of gross floor area of building to gross lot area, MF = Multi Family, SF = Single Family

B. Source Control BMPs – The following BMPs are designed to control stormwater pollutants and runoff water at the location where it is generated. Please indicate which of the listed BMPs are planned to be implemented for the project:

Source Control BMPs	Planned	Not Planned
Minimize non-stormwater site runoff through efficient irrigation system design and controllers.	**X**	
Minimize trash and debris in storm runoff through a regular parking lot, storage yard and roadway sweeping program.	**X**	
Provide proper covers/roofs and secondary containment for outside material storage & work areas.		**X[1]**
Provide solid roofs over all trash enclosures.	**X**	
Site Owner(s)/Property Manager/HOA or POA will be familiar with the project WQMP and stormwater BMPs.	**X**	
Owner or HOA or POA to provide Education/Training of site occupants and employees on stormwater BMPs.	**X**	
Install stormwater placards/stenciled messages with a "No Dumping" message on all on-site/off-site storm drain inlets.	**X**	
Provide contained equipment/vehicle wash rack areas that discharge to sanitary sewer.		**X[2]**

[1] Not applicable. No outside material storage or work areas. Secondary containment not needed.

[2] Not applicable, no vehicle wash areas.

C. Treatment Control BMPs – The following BMPs are designed to control stormwater pollutants where it is not feasible to install on-site or off-site Site Design/LID BMPs, with the requisite capacity to treat the Design Capture Volume for identified Pollutants of Concern or where pretreatment of stormwater runoff is required, ahead of infiltration BMPs. Please indicate which of the listed BMPs are planned to be implemented for the project:

Treatment Control BMP	Planned	Not Planned
Gravity Separator devices for pretreatment of sediment, trash/litter or Oil & Grease	**X**	
Proprietary Biofiltration vaults/devices		**X**
Media Cartridge Filtration Vaults		**X**
Proprietary Filter Inserts for on-site storm drain inlets or retention basin/trench overflow drains		**X**

4. Volume-based calculation (approximate) for sizing on-site or off-site Stormwater Retention/Infiltration, Harvest & Re-Use or Biotreatment facilities

1) After calculating the "Watershed Imperviousness Ratio", i, which is equal to the percent of impervious area in each Drainage Management Area, divided by 100, calculate the composite runoff coefficient C_{BMP} for the Drainage Area above using the following equation:

$$\mathbf{C_{BMP} = 0.858i^3 - 0.78i^2 + 0.774i + 0.04}$$

where: $\mathbf{C_{BMP}}$ = composite runoff coefficient; and,

i = watershed imperviousness ratio.

3) Determine the area-averaged "6-hour Mean Storm Rainfall", P_6, for the Drainage Area. This is calculated by multiplying the area averaged 2-year 1-hour value (0.5"-0.6") by the appropriate regression coefficient (1.4807). The 2-yr, 1-hr value for southern Ontario is approximately to 0.5" (P_6 = 0.5*1.4807 = 0.74 and northern Ontario is approximately 0.6" in/hr (P_6 = 0.6*1.4807 = 0.89).

4) Determine the appropriate drawdown time. Use the regression constant a = 1.582 for 24 hours and a = 1.963 for 48 hours. *Note: Regression constants are provided for both 24 hour and 48-hour drawdown times; however, 48-hour drawdown times should be used in most areas of California. Drawdown times in excess of 48 hours should be used with caution as vector breeding can be a problem after water has stood in excess of 72 hours. (Use of the 24-hour drawdown time should be limited to drainage areas with coarse soils (Class 'A' soils that readily drain.)*

5) Calculate the "Maximized Detention Volume", P_0, using the following equation:

$$\mathbf{P_0 = a \cdot C_{BMP} \cdot P_6}$$

where: $\mathbf{P_0}$ = Maximized Detention Volume, in inches

a = 1.582 for 24 hour and a = 1.963 for 48-hour drawdown,

$\mathbf{C_{BMP}}$ = composite runoff coefficient; and,

$\mathbf{P_6}$ = 6-hour Mean Storm Rainfall, in inches

6) Calculate the "Target Capture Volume", V_0, using the following equation:

$$\mathbf{V_0 = (P_0 \cdot A) / 12}$$

where: $\mathbf{V_0}$ = Target Capture Volume, in acre-feet

$\mathbf{P_0}$ = Maximized Detention Volume, in inches; and,

A = BMP Drainage Area, in acres

Project Volume-based calculation (approximate) for planned on-site or off-site Stormwater Retention/Infiltration, Harvest & Re-Use or Biotreatment facilities:

Variable	Factor/Formula	**DA 1-A**	**n/a**	**n/a**	**n/a**
Impervious surface/total surface, ratio	(i)	0.95	n/a	n/a	n/a
C_{BMP}= runoff coefficient	$0.858i^3 - 0.78i^2 + 0.774i + 0.04$	0.807	n/a	n/a	n/a
P_6	**P_6 = 2-yr,1-hr depth*1.4807 =	0.803	n/a	n/a	n/a
Detention Volume (acre inches)	P_0 = a * C_{BMP} * P_6 =	1.27	n/a	n/a	n/a
Drawdown rate of basin/trench (a)	1.963 for 48-hr drawdown =	1.963	n/a	n/a	n/a
Project Total Area (acre)	(A)	15.15	n/a	n/a	n/a
Design Capture Volume in cu. ft.	$V_0 = [(P_0 * A)/12] *43560$ =	69,915	n/a	n/a	n/a
Runoff Volume infiltrated in first 3 hours of storm (*not applicable for underground systems*)	Vol= in/hr/12 x ft^2 of infiltration area x 3 hrs	n/a	n/a	n/a	n/a
Retention Volume provided in cubic feet.	*Retention capacity of basins, trenches, underground storage or biotreatment basin	69,922	n/a	n/a	n/a

*Volume retained utilizing an underground infiltration facility. Refer to the DCV Calculations section for calculations.

**For P_6 value, use site coordinates and NOAA website to determine project's average 2-yr, 1-hr rainfall depth, at: http://hdsc.nws.noaa.gov/hdsc/pfds/sa/sca_pfds.html .

5. Flow-Based calculation (approximate) for sizing on-site or off-site Biotreatment facilities and proprietary treatment technology BMPs:

1) After calculating the "Watershed Imperviousness Ratio", i, which is equal to the percent of impervious area in each Drainage Management Area divided by 100, calculate the composite runoff coefficient C_{BMP} for the Drainage Area above using the following equation:

$$\mathbf{C_{BMP} = 0.858i^3 - 0.78i^2 + 0.774i + 0.04}$$

where: $\mathbf{C_{BMP}}$ = composite runoff coefficient; and,

i = watershed imperviousness ratio.

2) Determine BMP design rainfall intensity, $\mathbf{I_{BMP}}$, using the project site geo-coordinates and the NOAA website to determine project's average 2-yr, 1-hr rainfall intensity, at: http://hdsc.nws.noaa.gov/hdsc/pfds/sa/sca_pfds.html .Multiply this value by 0.2787 (regression coefficient for Ontario) and a minimum safety factor of 2.

4) Calculate the target BMP flowrate, Q, using the following formula (for each DMA <50 acres*):

$$\mathbf{Q = C_{BMP} \cdot I_{BMP} \cdot A}$$

Where: **Q** = flow in cfs (Cubic feet per second)
$\mathbf{I_{BMP}}$ = BMP design rainfall intensity, in/hr
A = Drainage Area in acres

*For DMAs >50 acres, with C_{BMP} <0.5, the project applicant shall use the unit hydrograph method specified in the San Bernardino County Hydrology Manual, using the design storm pattern with rainfall return frequency such that the peak 1-hr rainfall intensity equals the 85th percentile 1-hr rainfall, multiplied by 2.

Project Flow-based calculation (approximate) for planned on-site or off-site flow-based Biotreatment facilities or Stormwater Treatment BMPs:

Variable	Factor/Formula	**DA 1-A**	**n/a**	**n/a**	**n/a**
Impervious surface/ total surface, ratio	(i)	0.95	n/a	n/a	n/a
C_{BMP}= composite runoff coefficient	$0.858i^3+0.78i^2+0.774i+0.04$	0.81	n/a	n/a	n/a
I_{BMP}	I_{BMP} = 2-yr,1-hr storm intensity*0.2787*safety factor	0.302	n/a	n/a	n/a
Drainage area (ac)	A = DMA sq ft/43,560	15.15	n/a	n/a	n/a
Target BMP flowrate	Q = C_{BPM}* I_{BMP} * A	3.69	n/a	n/a	n/a

6. **Hydrologic Conditions of Concern (HCOC) and use of the on-line San Bernardino County HCOC Map for determining necessary mitigation steps necessary if there are HCOCs downstream of a project:**

Project applicants may access the on-line HCOC Map at: http://permitrack.sbcounty.gov/WAP/. The map will indicate any hydrology concerns with downstream waterways that are hydraulically connected to the project and will indicate if there are any approved regional projects downstream that could be utilized for off-site mitigation of HCOCs. Please indicate here if the project will or will not be able to retain/infilter, harvest and use or biotreat and detain the DCV, on-site, as calculated in Section 4 and if there are HCOCs identified downstream of the project:

Retain or Harvest/Use the DCV on site?	Yes	**X**	No	
Biotreat the DCV but not infilter the runoff?	Yes		No	**X**
HCOCs identified downstream of site?	Yes		No	**X**

If the entire DCV will not be retained on site, the DCV is biotreated but not infiltered or additional detention capacity is needed to address identified HCOCs, downstream of the site, please list here, what additional mitigation measures will be utilized (on-site or off-site) to address HCOCs (see Section 4.2.1-4.2.3 of the SB County WQMP Technical Guidance):

HCOCs not applicable.

7. **Site Plan and Conceptual Grading/Drainage Plan requirements for submission with the Preliminary WQMP:**

Provide a Site Plan and Conceptual Grading/Drainage Plan along with this Preliminary WQMP, which conceptually shows the proposed locations of buildings, homes, parking lots, parks, new paved roadways, landscaped areas, drainage patterns and drainage sub-areas, methods of conveyance, proposed retention/infiltration, harvest & use or biotreatment facilities that are planned for installation. Where it is determined to be infeasible to capture and detain design storm runoff volumes, on-site, please include other design features, as described in Section 3, above. Include numbered or lettered notes on the Site Plan with a legend detailing other BMPs, as described in Section 3.

8. **BMP Maintenance and Funding Mechanism & Description:**

Ownership of the project will be held with Link Logistics Real Estate. Long term maintenance will be the responsibility of the owner. This includes BMP maintenance, catch basin inspection, storm drain maintenance (on-site), efficient irrigation and landscape maintenance, and etcetera until the property is sold or transferred.

9. Acknowledgment:

As the property owner or developer, I understand that this project is required to install and implement permanent LID Storm Water Best Management Practices pursuant to the requirements of the San Bernardino County MS4 Permit and to document those BMPs in the submittal of a Water Quality Management Plan, which is binding on any current or successive owners of this property.

Yes	X	No	

10. Exemption Signature:

As the property owner or developer, I understand that this project is not required by the San Bernardino County MS4 Permit to install and implement permanent LID Storm Water Best Management Practices and will not be required to submit a Water Quality Management Plan.

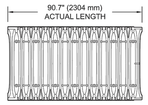
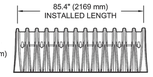
STORMTECH DC-780 CHAMBER

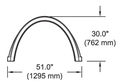
Designed to meet the most stringent industry performance standards for superior structural integrity while providing designers with a cost-effective method to save valuable land and protect water resources. The StormTech system is designed primarily to be used under parking lots, thus maximizing land usage for private (commercial) and public applications. StormTech chambers can also be used in conjunction with Green Infrastructure, thus enhancing the performance and extending the service life of these practices.

- 12' (3.6 m) Deep Cover Applications
- Designed in accordance with ASTM F 2787 and produced to meet the ASTM 2418 product standard.
- AASHTO safety factors provided for AASHTO Design Truck (H20 and deep cover conditions.)

STORMTECH DC-780 CHAMBER
(not to scale)







Nominal Chamber Specifications

Size (L x W x H)
85.4" x 51.0" x 30.0"
2,170 mm x 1,295 mm x 762 mm

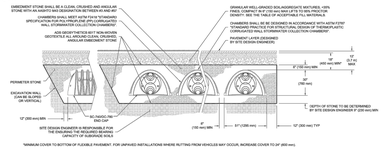
Chamber Storage
46.2 ft³ (1.30 m³)

Min. Installed Storage*
78.4 ft³ (2.20 m³)

Weight
80.0 lbs (36.3 kg)

Shipping
24 chambers/pallet
60 end caps/pallet
12 pallets/truck

*Assumes 9" (230 mm) stone below, 6" (150 mm) row spacing and 40% stone porosity.



DC-780 CUMULATIVE STORAGE VOLUMES PER CHAMBER
Assumes 40% Stone Porosity. Calculations are Based
Upon a 9" (230 mm) Stone Base Under Chambers.

Depth of Water in System Inches (mm)		Cumulative Chamber Storage ft³ (m³)	Total System Cumulative Storage ft³ (m³)
45 (1,143)		46.27 (1.310)	78.47 (2.222)
44 (1,118)		46.27 (1.310)	77.34 (2.190)
43 (1,092)	Stone Cover	46.27 (1.310)	76.21 (2.158)
42 (1,067)		46.27 (1.310)	75.09 (2.126)
41 (1,041)		46.27 (1.310)	73.96 (2.094)
40 (1,016)		46.27 (1.310)	72.83 (2.062)
39 (991)		46.27 (1.310)	71.71 (2.030)
38 (965)		46.21 (1.309)	70.54 (1.998)
37 (940)		46.04 (1.304)	69.32 (1.963)
36 (914)		45.76 (1.296)	68.02 (1.926)
35 (889)		45.15 (1.278)	66.53 (1.884)
34 (864)		44.34 (1.255)	64.91 (1.838)
33 (838)		43.38 (1.228)	63.21 (1.790)
32 (813)		42.29 (1.198)	61.43 (1.740)
31 (787)		41.11 (1.164)	59.58 (1.688)
30 (762)		39.83 (1.128)	57.70 (1.634)
29 (737)		38.47 (1.089)	55.76 (1.579)
28 (711)		37.01 (1.048)	53.76 (1.522)
27 (686)		35.49 (1.005)	51.72 (1.464)
26 (660)		33.90 (0.960)	49.63 (1.405)
25 (635)		32.24 (0.913)	47.52 (1.346)
24 (610)		30.54 (0.865)	45.36 (1.285)
23 (584)		28.77 (0.815)	43.16 (1.223)
22 (559)		26.96 (0.763)	40.97 (1.160)
21 (533)		25.10 (0.711)	38.72 (1.096)
20 (508)		23.19 (0.657)	36.45 (1.032)
19 (483)		21.25 (0.602)	34.16 (0.967)
18 (457)		19.26 (0.545)	31.84 (0.902)
17 (432)		17.24 (0.488)	29.50 (0.835)
16 (406)		15.19 (0.430)	27.14 (0.769)
15 (381)		13.10 (0.371)	24.76 (0.701)
14 (356)		10.98 (0.311)	22.36 (0.633)
13 (330)		8.83 (0.250)	19.95 (0.565)
12 (305)		6.66 (0.189)	17.52 (0.496)
11 (279)		4.46 (0.126)	15.07 (0.427)
10 (254)		2.24 (0.064)	12.61 (0.357)

Depth of Water in System Inches (mm)		Cumulative Chamber Storage ft³ (m³)	Total System Cumulative Storage ft³ (m³)
9 (229)		0 (0)	10.14 (0.287)
8 (203)		0 (0)	9.01 (0.255)
7 (178)		0 (0)	7.89 (0.223)
6 (152)	Stone Foundation	0 (0)	6.76 (0.191)
5 (127)		0 (0)	5.63 (0.160)
4 (102)		0 (0)	4.51 (0.128)
3 (76)		0 (0)	3.38 (0.096)
2 (51)		0 (0)	2.25 (0.064)
1 (25)		0 (0)	1.13 (0.032)

Note: Add 1.13 ft³ (0.032 m³) of Storage for Each Additional Inch (25 mm) of Stone Foundation.

STORAGE VOLUME PER CHAMBER FT³ (M³)

	Bare Chamber Storage ft³ (m³)	Chamber and Stone Foundation Depth in. (mm)		
		9" (230 mm)	12" (300 mm)	18" (450 mm)
DC-780 Chamber	78.4 (2.2)	78.4 (2.2)	81.8 (2.3)	88.6 (2.5)

Note: Assumes 40% porosity for the stone, the bare chamber volume, 6" (150 mm) of stone above, and 6" (150 mm) row spacing.

AMOUNT OF STONE PER CHAMBER

ENGLISH TONS (yds3)	Stone Foundation Depth		
	9"	12"	18"
DC-780 Chamber	4.2 (3.0)	4.7 (3.3)	5.6 (3.9)
METRIC KILOGRAMS (m³)	230 mm	300 mm	450 mm
DC-780 Chamber	3,810 (2.3)	4,264 (2.5)	5,080 (3.0)

Note: Assumes 9" (150 mm) of stone above, and between chambers.

VOLUME EXCAVATION PER CHAMBER YD³ (M³)

	Stone Foundation Depth		
	9" (230 mm)	12" (300 mm)	18" (450 mm)
DC-780 Chamber	5.9 (4.5)	6.3 (4.8)	6.9 (5.3)

Note: Assumes 6" (150 mm) separation between chamber rows and 18" (450 mm) of cover. The volume of excavation will vary as depth of cover increases.

[1] Precipitation frequency (PF) estimates in this table are based on frequency analysis of partial duration series (PDS).

Numbers in parenthesis are PF estimates at lower and upper bounds of the 90% confidence interval. The probability that precipitation frequency estimates (for a given duration and average recurrence interval) will be greater than the upper bound (or less than the lower bound) is 5%. Estimates at upper bounds are not checked against probable maximum precipitation (PMP) estimates and may be higher than currently valid PMP values.

Please refer to NOAA Atlas 14 document for more information.

Estimates from the table in CSV format: Precipitation frequency estimates Submit

Worksheet H: Factor of Safety and Design Infiltration Rate Worksheet

Factor Category		Factor Description	Assigned Weight (w)	Factor Value (v)	Product (p) p = w x v
A	Suitability Assessment	Soil assessment methods	0.25	1	0.25
		Predominant soil texture	0.25	1	0.25
		Site soil variability	0.25	1	0.25
		Depth to groundwater / impervious layer	0.25	1	0.25
		Suitability Assessment Safety Factor, $S_A = \Sigma p$			1.0
B	Design	Tributary area size	0.25	3	0.75
		Level of pretreatment/ expected sediment loads	0.25	1	0.25
		Redundancy	0.25	3	0.75
		Compaction during construction	0.25	1	0.25
		Design Safety Factor, $S_B = \Sigma p$			2.0

Combined Safety Factor, $S_{TOT} = S_A \times S_B$	2.0
Measured Infiltration Rate, inch/hr, K_M (corrected for test-specific bias)	2.60
Design Infiltration Rate, in/hr, $K_{DESIGN} = K_M / S_{TOT}$	1.30

Supporting Data

Briefly describe infiltration test and provide reference to test forms:

A site-specific infiltration test was conducted at the project site to support a minimum measured infiltration result of 2.60 in/hr. The design infiltration rate is 1.30 in/hr after applying the appropriate safety factor. This design rate is suitable for infiltration facilities.

Note: The minimum combined adjustment factor shall not be less than 2.0 and the maximum combined adjustment factor shall not exceed 9.0.

Project No.: **21G228-2**

Subject: **Results of Infiltration Testing**
Proposed Industrial Development
1350 and 1375 South Woodruff Way
Ontario, California

Reference: Geotechnical Investigation, Proposed C/I Development, 1350 and 1375 South Woodruff Way, Ontario, California, prepared by Southern California Geotechnical, Inc. (SCG) for Duke Realty, SCG Project No. 21G228-1, dated November 1, 2021.

Dear Ms. Hickenbottom:

In accordance with your request, we have conducted infiltration testing at the subject site. We are pleased to present this report summarizing the results of the infiltration testing and our design recommendations.

Scope of Services

The scope of services performed for this project was in general accordance with our Proposal No. 21P427, dated September 21, 2021. The scope of services included site reconnaissance, subsurface exploration, field testing, and engineering analysis to determine the infiltration rates of the on-site soils. The infiltration testing was performed in general accordance with the guidelines published in the Riverside County – Low Impact Development BMP Design Handbook – Section 2.3 of Appendix A, prepared for the Riverside County Department of Environmental Health (RCDEH), dated December, 2013. The San Bernardino County standards defer to the guidelines published by the RCDEH.

Site and Project Description

The subject site is located at the address of 1350 and 1375 South Woodruff Way in Ontario, California. The site is bounded to the north by existing commercial buildings, to the west by South Rockefeller Avenue, to the south by East Jurupa Street, and to the east by Highway I-15. Woodruff Way transverses the site in a roughly north to south direction. The general location of the site is illustrated on the Site Location Map, enclosed as Plate 1 in Appendix A of this report.

The site consists of two irregularly-shaped parcels which total 16.06± acres in size. As previously noted, Woodruff Way extends north to south, dividing the site into two (2) parcels, east and west. The site is presently developed as the Citrus Motors automobile dealership. The eastern parcel is

developed with one building, 158,000± ft^2 in size, that includes a Ford dealership, service facility and body shop. The western parcel is developed with a 14,000± ft^2 building that is a Kia dealership. Both buildings are surrounded by asphaltic concrete pavements, with some areas of concrete flatwork and landscape planters.

Detailed topographic information was not available at the time of this report. Based on elevations obtained from Google Earth and visual observations made at the time of the subsurface investigation, the western parcel slopes downward to the southeast at a gradient of 1± percent. The western parcel possesses 2 to 4± feet maximum topographic relief. The eastern parcel slopes downward to the southwest at a gradient of less than 1± percent. The eastern parcel possesses 5± feet maximum topographic relief.

Proposed Development

Two potential site plans depicting the scope of the proposed development were provided by the client. Site Plan 1 depicts a development comprised of a single building, 352,240 ft^2 in size, located in the north-central region of the overall site. This structure would include dock high doors on most of the south side of the building. Site Plan 2 depicts two (2) buildings, one on each side of Woodruff Way. Building 1 will be located on the eastern parcel and will be 236,400± ft^2 in size. This building will include dock doors on the eastern side of the structure. Building 2 will be located on the western parcel and will be 135,870+ ft^2 in size, with dock doors on the eastern side of the structure. We expect that the buildings will be surrounded by asphaltic concrete pavements in the parking and drive areas, Portland cement concrete pavements in the truck court areas, with isolated areas of concrete flatwork and landscape planters. The proposed development will require the abandonment of the portion of Woodruff Way which extends across the project site.

We understand that the proposed development will include on-site stormwater infiltration. The infiltration system is expected to consist of a below-grade chamber system located in the southern region of the site. The bottom of the chamber system is expected to be 14± feet below existing site grades.

Concurrent Study

SCG concurrently conducted a geotechnical investigation at the subject site, referenced above. As a part of this study, seven (7) borings (identified as Boring Nos. B-1 through B-7) were advanced to depths of 20 to 25± feet below the existing site grades, asphaltic concrete (AC) pavements were encountered at the ground surface at all of the boring locations. At these locations, the pavement sections consisted of 2 to 4± inches of asphaltic concrete, underlain by 4 to 6± inches of aggregate base. Artificial fill soils were encountered beneath the existing pavements at all of the boring locations, extending to depths of 2½ to 4½± feet below the existing site grades. The fill soils generally consisted of very loose to medium dense silty fine sands, fine sandy silts and fine to medium sands with varying coarse sand and fine to coarse gravel content. The fill soils possessed a disturbed appearance, resulting in their classification as artificial fill. Native alluvium was encountered beneath the artificial fill at all of the boring locations, extending to at least the maximum explored depth of 25± feet below existing site grades. The alluvium consisted of loose to medium dense silty fine sands, fine sands, fine to medium sands, and fine sandy silts, with varying gravel content.

Groundwater

Free water was not encountered during the drilling of any of the borings. Based on the lack of any water within the borings, and the moisture contents of the recovered soil samples, the static groundwater table is considered to have existed at a depth in excess of 25± feet at the time of the subsurface exploration.

As part of our research, we reviewed readily available groundwater data in order to determine regional groundwater depths. Recent water level data was obtained from the California Department of Water Resources website, http://www.water.ca.gov/waterdatalibrary/. The nearest monitoring well on record is located approximately ½± mile southwest of the site. Water level readings within this monitoring well indicate a groundwater level of 277± feet below the ground surface in March 2021.

Subsurface Exploration

Scope of Exploration

The subsurface exploration conducted for the infiltration testing consisted of two (2) infiltration test borings, advanced to a depth of 14± feet below the existing site grades. The infiltration borings were advanced using a truck-mounted drilling rig, equipped with 8-inch-diameter hollow-stem augers and were logged during drilling by a member of our staff. The approximate locations of the infiltration test borings (identified as I-1 and I-2) are indicated on the Infiltration Test Location Plans, enclosed as Plates 2A and 2B of this report.

Upon the completion of the infiltration borings, the bottom of each test boring was covered with 2± inches of clean ¾-inch gravel. A sufficient length of 3-inch-diameter perforated PVC casing was then placed into each test hole so that the PVC casing extended from the bottom of the test hole to the ground surface. Clean ¾-inch gravel was then installed in the annulus surrounding the PVC casing.

Geotechnical Conditions

Artificial fill soils were encountered at the ground surface at both of the infiltration boring locations, extending to a depth of 3± below the existing site grades. The fill soils generally consist of loose fine sands and silty fine sands with varying gravel content. The fill soils possess a disturbed mottled appearance resulting in their classification as artificial fill.

Native alluvial soils were encountered beneath the fill soils at both of the infiltration boring locations, extending to at least the maximum depth explored of 14± feet below the existing site grades. The alluvial soils generally consist of very loose to medium dense fine sands and fine to coarse sands and occasional silty fine to medium sands. Infiltration Test No. I-1 encountered some fine gravel at depths ranging from 12½± to 14± feet. The Boring Logs, which illustrate the conditions encountered at the boring locations, are included with this report.

Infiltration Testing

As previously mentioned, the infiltration testing was performed in general accordance with the guidelines published in Riverside County – Low Impact Development BMP Design Handbook – Section 2.3 of Appendix A, which apply to San Bernardino County.

Pre-soaking

In accordance with the county infiltration standards for sandy soils, all infiltration test borings were pre-soaked 2 hours prior to the infiltration testing or until all of the water had percolated through the test holes. The pre-soaking process consisted of filling test borings by inverting a full 5-gallon bottle of clear water supported over each hole so that the water flow into the hole holds constant at a level at least 5 times the hole's radius above the gravel at the bottom of each hole. Pre-soaking was completed after all of the water had percolated through the test holes.

Infiltration Testing

Following the pre-soaking process of the infiltration test borings, SCG performed the infiltration testing. Each test hole was filled with water to a depth of at least 5 times the hole's radius above the gravel at the bottom of the test holes. In accordance with the San Bernardino County guidelines, since "sandy soils" were encountered at the bottom of both of the infiltration test borings (where 6 inches of water infiltrated into the surrounding soils for two consecutive 25-minute readings), readings were taken at 10-minute intervals for a total of 1 hour at each test location. After each reading, water was added to the borings so that the depth of the water was at least 5 times the radius of the hole. The water level readings are presented on the spreadsheets enclosed with this report. The infiltration rates for each of the timed intervals are also tabulated on the spreadsheets.

The infiltration rates from the test are tabulated in inches per hour. In accordance with the typically accepted practice, it is recommended that the most conservative reading from the latter part of the infiltration tests be used as the design infiltration rate. The rates are summarized below:

Infiltration Test No.	Depth (feet)	Soil Description	Infiltration Rate (inches/hour)
I-1	14	Brown fine to coarse Sand, some fine Gravel, trace to little Silt	4.2
I-2	14	Brown Silty fine to medium Sand	2.6

Laboratory Testing

Moisture Content

The moisture contents for the recovered soil samples within the borings were determined in accordance with ASTM D-2216 and are expressed as a percentage of the dry weight. These test results are presented on the Boring Logs.

Grain Size Analysis

The grain size distribution of selected soils collected from the base of each infiltration test boring have been determined using a range of wire mesh screens. These tests were performed in general accordance with ASTM D-422 and/or ASTM D-1140. The weight of the portion of the sample retained on each screen is recorded and the percentage finer or coarser of the total weight is calculated. The results of these tests are presented on Plates C-1 and C-2 of this report.

Design Recommendations

Two (2) infiltration tests were performed at the subject site. As noted above, the infiltration rates at these locations vary from 2.6 to 4.1 inches per hour. Based on the infiltration test results, we recommend an infiltration rate of 2.6 inches per hour to be used for the proposed below-grade chamber system in the southern region of the site, if the system extends to a depth of 14 feet below the existing grades.

We recommend that a representative from the geotechnical engineer be on-site during the construction of the proposed infiltration system to identify the soil classification at the base of the system. It should be confirmed that the soils at the base of the proposed infiltration system correspond with those presented in this report to ensure that the performance of the system will be consistent with the rate reported herein.

The design of the storm water infiltration system should be performed by the project civil engineer, in accordance with the City of Ontario and/or County of San Bernardino guidelines. It is recommended that the system be constructed so as to facilitate removal of silt and clay, or other deleterious materials from any water that may enter the system. The presence of such materials would decrease the effective infiltration rate. **It is recommended that the project civil engineer apply an appropriate factor of safety. The infiltration rate recommended above is based on the assumption that only clean water will be introduced to the subsurface profile. Any fines, debris, or organic materials could significantly impact the infiltration rate.** It should be noted that the recommended infiltration rates are based on infiltration testing at two (2) discrete locations and that the overall infiltration rate of the proposed infiltration system could vary considerably.

Infiltration Rate Considerations

The infiltration rates presented herein was determined in accordance with the San Bernardino County guidelines and are considered valid only for the time and place of the actual test. Varying subsurface conditions will exist in other areas of the site, which could alter the recommended infiltration rates presented above. The infiltration rates will decline over time between maintenance cycles as silt or clay particles accumulate on the BMP surface. The infiltration rate is highly dependent upon a number of factors, including density, silt and clay content, grainsize distribution throughout the range of particle sizes, and particle shape. Small changes in these factors can cause large changes in the infiltration rates.

Infiltration rates are based on unsaturated flow. As water is introduced into soils by infiltration, the soils become saturated and the wetting front advances from the unsaturated zone to the saturated zone. Once the soils become saturated, infiltration rates become zero, and water can only move through soils by hydraulic conductivity at a rate determined by pressure head and soil

permeability. Changes in soil moisture content will affect the infiltration rate. Infiltration rates should be expected to decrease until the soils become saturated. Soil permeability values will then govern groundwater movement. Permeability values may be on the order of 10 to 20 times less than infiltration rates. The system designer should incorporate adequate factors of safety and allow for overflow design into appropriate traditional storm drain systems, which would transport storm water off-site.

Construction Considerations

The infiltration rates presented in this report are specific to the tested locations and tested depths. Infiltration rates can be significantly reduced if the soils are exposed to excessive disturbance or compaction during construction. Compaction of the soils at the bottom of the infiltration system can significantly reduce the infiltration ability of the basins. Therefore, the subgrade soils within proposed infiltration system areas should not be over-excavated, undercut or compacted in any significant manner. **It is recommended that a note to this effect be added to the project plans and/or specifications.**

We recommend that a representative from the geotechnical engineer be on-site during the construction of the proposed infiltration systems to identify the soil classification at the base of each system. It should be confirmed that the soils at the base of the proposed infiltration systems correspond with those presented in this report to ensure that the performance of the systems will be consistent with the rates reported herein.

We recommend that scrapers and other rubber-tired heavy equipment not be operated on the basin bottom, or at levels lower than 2 feet above the bottom of the system, particularly within basins. As such, the bottom 24 inches of the infiltration systems should be excavated with non-rubber-tired equipment, such as excavators.

Chamber Maintenance

The proposed project may include infiltration basins. Water flowing into these basins will carry some level of sediment. Wind-blown sediments and erosion of the basin side walls will also contribute to sediment deposition at the bottom of the basin. This layer has the potential to significantly reduce the infiltration rate of the basin subgrade soils. Therefore, a formal basin maintenance program should be established to ensure that these silt and clay deposits are removed from the basin on a regular basis. Appropriate vegetation on the basin sidewalls and bottom may reduce erosion and sediment deposition.

Basin maintenance should also include measures to prevent animal burrows, and to repair any burrows or damage caused by such. Animal burrows in the basin sidewalls can significantly increase the risk of erosion and piping failures.

Location of Infiltration Systems

The use of on-site storm water infiltration systems carries a risk of creating adverse geotechnical conditions. Increasing the moisture content of the soil can cause the soil to lose internal shear strength and increase its compressibility, resulting in a change in the designed engineering properties. Overlying structures and pavements in the infiltration area could potentially be damaged due to saturation of the subgrade soils. **The proposed infiltration systems for this**

site should be located at least 25 feet away from any structures, including retaining walls. Even with this provision of locating the infiltration system at least 25 feet from the building(s), it is possible that infiltrating water into the subsurface soils could have an adverse effect on the proposed or existing structures. It should also be noted that utility trenches which happen to collect storm water can also serve as conduits to transmit storm water toward the structure, depending on the slope of the utility trench. Therefore, consideration should also be given to the proposed locations of underground utilities which may pass near the proposed infiltration system.

The infiltration system designer should also give special consideration to the effect that the proposed infiltration systems may have on nearby subterranean structures, open excavations, or descending slopes. In particular, infiltration systems should not be located near the crest of descending slopes, particularly where the slopes are comprised of granular soils. Such systems will require specialized design and analysis to evaluate the potential for slope instability, piping failures and other phenomena that typically apply to earthen dam design. This type of analysis is beyond the scope of this infiltration test report, but these factors should be considered by the infiltration system designer when locating the infiltration systems.

Closure

We sincerely appreciate the opportunity to be of service on this project. We look forward to providing additional consulting services during the course of the project. If we may be of further assistance in any manner, please contact our office.

Respectfully Submitted,

COLUMN DESCRIPTIONS

DEPTH: Distance in feet below the ground surface.

SAMPLE: Sample Type as depicted above.

BLOW COUNT: Number of blows required to advance the sampler 12 inches using a 140 lb hammer with a 30-inch drop. 50/3" indicates penetration refusal (>50 blows) at 3 inches. WH indicates that the weight of the hammer was sufficient to push the sampler 6 inches or more.

POCKET PEN.: Approximate shear strength of a cohesive soil sample as measured by pocket penetrometer.

GRAPHIC LOG: Graphic Soil Symbol as depicted on the following page.

DRY DENSITY: Dry density of an undisturbed or relatively undisturbed sample in lbs/ft^3.

MOISTURE CONTENT: Moisture content of a soil sample, expressed as a percentage of the dry weight.

LIQUID LIMIT: The moisture content above which a soil behaves as a liquid.

PLASTIC LIMIT: The moisture content above which a soil behaves as a plastic.

PASSING #200 SIEVE: The percentage of the sample finer than the #200 standard sieve.

UNCONFINED SHEAR: The shear strength of a cohesive soil sample, as measured in the unconfined state.

Soil Criteria Test

Interval Number		Time	Time Interval (min)	Water Depth (ft)	Change in Water Level (in)	Did 6 inches of water seep away in less than 25 minutes?	Sandy Soils or Non-Sandy Soils?
1	Initial	8:00 AM	25.00	10.00	28.20	YES	SANDY SOILS
	Final	8:25 AM		12.35			
2	Initial	8:27 AM	25.00	10.00	27.00	YES	SANDY SOILS
	Final	8:52 AM		12.25			

Test Data

Interval Number		Time	Time Interval (min)	Water Depth (ft)	Change in Water Level (ft)	Average Head Height (ft)	Infiltration Rate Q (in/hr)
1	Initial	9:00 AM	10.00	10.00	1.35	3.33	4.64
	Final	9:10 AM		11.35			
2	Initial	9:12 AM	10.00	10.00	1.33	3.34	4.56
	Final	9:22 AM		11.33			
3	Initial	9:24 AM	10.00	10.00	1.30	3.35	4.44
	Final	9:34 AM		11.30			
4	Initial	9:36 AM	10.00	10.00	1.25	3.38	4.24
	Final	9:46 AM		11.25			
5	Initial	9:48 AM	10.00	10.00	1.23	3.39	4.16
	Final	9:58 AM		11.23			
6	Initial	10:00 AM	10.00	10.00	1.23	3.39	4.16
	Final	10:10 AM		11.23			

Per County Standards, Infiltration Rate calculated as follows:

$$Q = \frac{\Delta H(60r)}{\Delta t(r + 2H_{avg})}$$

Where:
- Q = Infiltration Rate (in inches per hour)
- ΔH = Change in Height (Water Level) over the time interval
- r = Test Hole (Borehole) Radius
- Δt = Time Interval
- H_{avg} = Average Head Height over the time interval

INTRODUCTION

A: PROJECT LOCATION

The project site is located on the northerly side of Jurupa Street and south of Wanamaker Avenue between Rockefeller Avenue and Ontario Freeway in the City of Ontario. See following page for vicinity map.

B: STUDY PURPOSE

The purpose of this study is to determine the existing and proposed condition 100-year peak flow rate from the site that drains to an existing 27" reinforced concrete pipe that connects to an existing 96" R.C.P. at Jurupa Avenue south of the project site.

C: PROJECT STAFF:

Thienes Engineering staff involved in this study include:

Reinhard Stenzel, PE
Eduardo Toledanes

NTS

DISCUSSION

The proposed project site encompasses approximately 16.75 acres. There is one proposed warehouse type building of approximately 344,678 square feet. A truck yard and truck parking area will be located at the south side of the building while vehicle parking is on the north, east and westerly side of the building. A paved drive aisle will be located on the easterly, westerly and southerly side of the site. There will be landscaped areas adjacent to Wanamaker Avenue, Rockefeller Avenue and Jurupa Street and other smaller areas throughout the site.

Master Plan of Drainage

The site is tabled to an existing 96" R.C.P. storm drain system in Jurupa Street as commercial development. The site is a portion of the "D18" subareas on the City Master Plan. The total 100 year peak flow for this block is approximately 85.0 cfs.

Please see Appendix "A" (Reference materials) for portions of the City's Master Plan of Drainage and downstream existing storm drain plans.

Existing Condition

The future project site is composed of two separate developed lot at existing condition. Parcel 1 LL 96-19 for the westerly lot and Parcel 2 per Parcel Map 9752 for the easterly lot. Woodruff Way, a public street is utilized as a common access road for both easterly and westerly lot. Each lot has single story type building structure with paved parking and landscaped areas throughout the site.

The Westerly Lot:

The northerly half portion of the west lot (node 100-101) drains northwesterly to an existing catch basin northwest of the site. The 100-year storm event at this location (node 101) is approximately 7.7 cfs. Runoff from the southerly half portion of the site (node 110-111) drains southeasterly to an existing catch basin at the southeast corner of the site and connects to the existing 27" RCP storm drain system at Woodruff Way. The 100-year peak flow rate at this point (node 111) is approximately 6.9 cfs. The remaining easterly portion of the west lot including the westerly half of Woodruff Way (node 200-201) will drain south to an existing catch basin southwest of Woodruff Way. The 100-year runoff discharge from this area (201) is approximately 4.0 cfs. The easterly half of Woodruff Way (node 210-211) will drain south and conveyed into an existing catch basin southeast of Woodruff Way. The 100-year storm event at this location (node 211) is approximately 2.3 cfs. Runoff from the westerly lot including Woodruff Way will be conveyed south to an existing 27" RCP south of Woodruff Way that connects to an existing 96" RCP public

storm drain system in Jurupa Street. The total 100-year peak flow rate from the westerly lot including Woodruff Way is approximately 20.9 cfs (7.7 cfs + 6.9 cfs + 4.0 cfs + 2.3 cfs).

The Easterly Lot:

The westerly half of the easterly lot (node 300-301) will drain from north to south and into an existing catch basin at the southwest corner of the site. The 100-year runoff discharge at this location (node 301) is approximately 16.2 cfs. The northeasterly portion of the site (node 310-311) will sheet flow northwesterly to an existing catch basin northeast of the site. The 100-year peak flow rate from this area (node 311) is approximately 7.6 cfs. The remaining southeasterly area (node 320-321) will drain southwesterly to an existing catch basin south of the site. The 100-year storm event at this point (node 321) is approximately 8.3 cfs. Runoff from the easterly lot will drain to a series of existing catch basins and conveyed south to an existing 27" RCP storm drain system that connects to the existing 96" RCP at Jurupa Street. The total 100-year peak flow rate tributary to the easterly lot is approximately 32.1 cfs (16.2 cfs + 8.3 cfs + 7.6 cfs). Runoff from the northerly landscaped area (node 400-401) will drain westerly to an existing street catch basin at Wanamaker Avenue northwest of the site. The 100-year peak flow rate tributary from this area (node 401) is approximately 0.9 cfs. The remaining westerly landscape area (node 410-411) adjacent to Rockefeller Avenue will drain south and ultimately discharged to an existing street catch basin northeast of Jurupa Street and Rockefeller Avenue intersection. The 100-year storm event at this point (node 411) is approximately 0.2 cfs. The total 100-year peak flow rate tributary to the project site is approximately 54.1 cfs (20.9 cfs + 32.1 cfs + 0.9 cfs + 0.2 cfs).

Offsite runoff from the sloped landscaped area south of the project site sheet flows to an existing ditch that runs southwesterly and easterly and drains to a low point where storm water is conveyed into an existing corrugated metal pipe inlet and discharged south. The storm drain inlet is located southeast of the site adjacent to Ontario freeway and east of the existing electrical pad. There is no available information from the city as to where the existing corrugated metal pipe inlet connected to downstream.

See Appendix "B" for the existing condition hydrology calculations and Appendix "C" for the Existing Condition Hydrology Map.

Proposed Condition

The easterly and westerly lot including Woodruff Way at proposed condition will be integrated into a single lot that will consist of one large warehouse type building. The truck yard including the truck parking area will be located at the south side of the building. There will be vehicle parking areas along the east, west and northeast portion of the site. Catch basins will be situated throughout the project site. A storm drain system will be installed in both east and west side of the proposed building conveying the runoff southerly that ultimately drains to the existing 96" RCP at Jurupa Street.

The westerly half of the site (node 100-103) will drain from north to south via a proposed storm drain system that connects to an existing 27" RCP downstream at Woodruff Way that ultimately discharge to an existing 96" RCP in Jurupa Street. The 100-year peak flow rate tributary to this area (node 103) is approximately 15.7 cfs.
Runoff from the northeasterly area including the easterly half of the site (node 200-223) will drain southwesterly to a series of catch basins and conveyed south via proposed storm drain line that connects to an existing 27" RCP downstream south of the project site. The 100-year runoff discharge from this area (node 223) is approximately 35.1 cfs.

The northerly landscaped area adjacent to Wanamaker Avenue (node 400-401) will sheet flow west to an existing street catch basin northwest of the site. The 100-year storm event at this location (node 401) is approximately 0.8 cfs. The remaining westerly landscaped area adjacent to Rockefeller Avenue (node 410-411) will drain east to an existing street catch basin at the intersection northeast of Jurupa Street and Rockefeller Avenue. The 100-year peak discharge at this location (node 411) is approximately 1.2 cfs.

The total 100-year peak flow rate tributary to the project site at proposed condition is approximately 52.8 cfs (15.7 cfs + 35.1 cfs + 0.8 cfs + 1.2 cfs). which is slightly less than the existing condition (54.1 cfs.). The slight reduction of runoff discharge at proposed condition is due to more landscaped areas were provided onsite and the higher time of concentration or longer runoff travel time. Overall, runoff discharge tributary to the site at proposed condition will not adversely affect the existing 96" RCP storm drain system in Jurupa Street. Detention onsite will not be required.

See Appendix "B" for the proposed condition hydrology calculations and Appendix "C" for the Proposed Condition Hydrology Map.

Methodology

Hydrology calculations were computed based on NOAA Atlas 14 Precipitation Frequency Data rainfall intensities. (See Appendix "A" for reference materials). San Bernardino County's Rational Method Program was used for Hydrology calculations. The soil type is "B" per San Bernardino County Hydrology manual.

[1] Precipitation frequency (PF) estimates in this table are based on frequency analysis of partial duration series (PDS).

Numbers in parenthesis are PF estimates at lower and upper bounds of the 90% confidence interval. The probability that precipitation frequency estimates (for a given duration and average recurrence interval) will be greater than the upper bound (or less than the lower bound) is 5%. Estimates at upper bounds are not checked against probable maximum precipitation (PMP)

URBAN | CROSSROADS

June 5, 2023

Mr. Tom Cruikshank
Link Logistics Real Estate
915 Wilshire Blvd., Suite 2050
Los Angeles, CA 90017

SUBJECT: WOODRUFF LOGISTICS NOISE ASSESSMENT

Dear Mr. Tom Cruikshank:

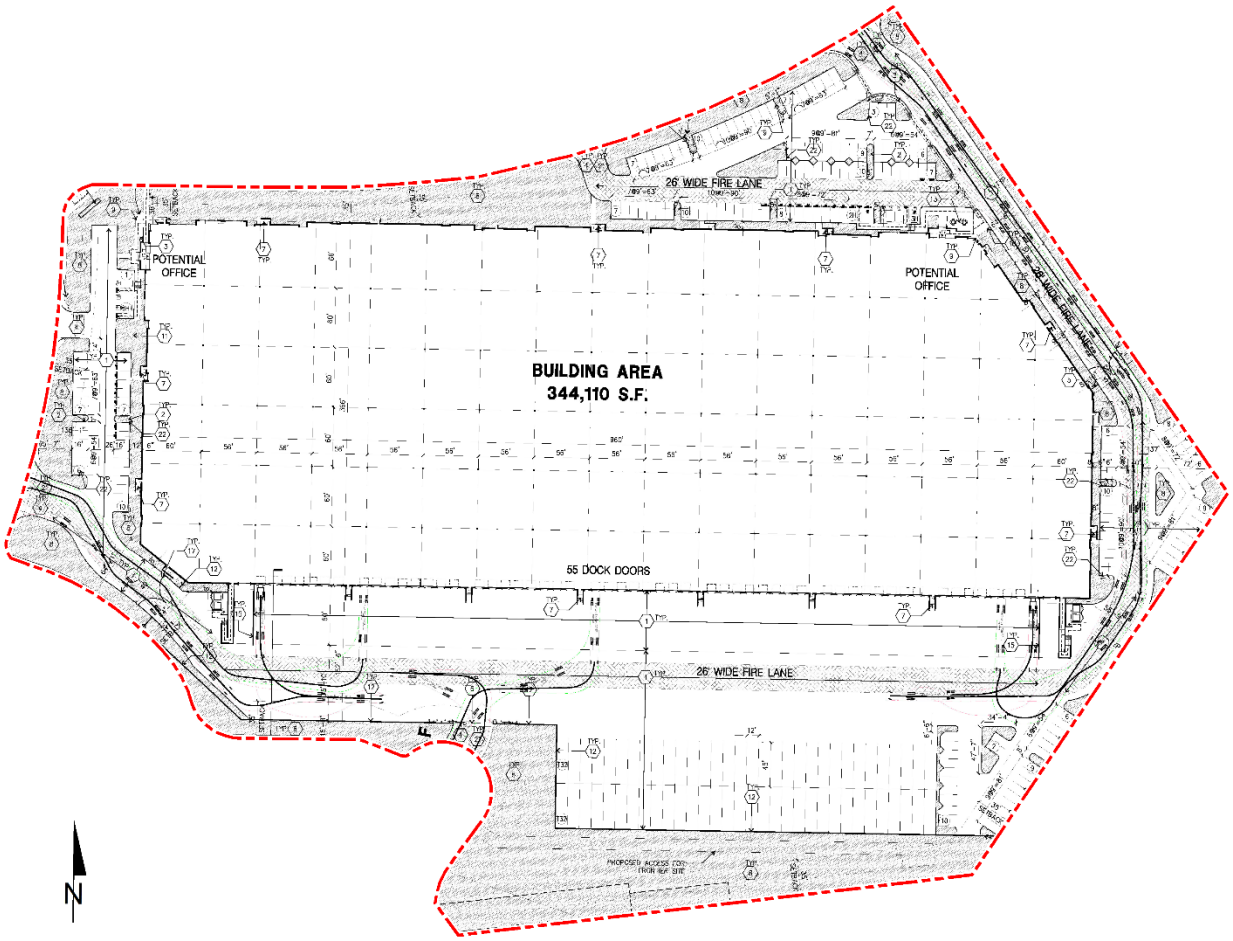
Urban Crossroads, Inc. is pleased to provide the following Noise Assessment for the Woodruff Logistics development (referred to as "Project") located northeast of Jurupa Street and Rockefeller Avenue, south of Wanamaker Avenue, and straddling the existing Woodruff Way in the City of Ontario. The proposed Project includes the development of a 344,110 square foot industrial warehouse building as shown on Exhibit 1. The purpose of this Noise Assessment is to describe the potential Project-related operational and construction noise impact at the nearest noise sensitive receiver locations.

AIRPORT LAND USE COMPATIBILITY

The Project site is located approximately 1.2 miles east of the Ontario International Airport (ONT). This places the Project site within the ONT Airport Influence Area according to Policy Map 2-1 of the *Ontario International Airport Land Use Compatibility Plan (ONT ALUCP).* The ONT ALUCP was amended July 2018 to promote compatibility between airport and the land uses that surround it (1). Since the Project site is located within the ONT Airport Influence Area, the Project is subject to the Noise Criteria established on Table 2-3 in the ONT ALUCP. As shown on Exhibit 2, the Project site is located within the ONT Airport Influence Area and the 65-70 dBA CNEL airport noise impact zone consistent with Policy Map 2-3.

According to Table 2-3 of the ONT ALUCP, the Project's industrial warehouse is considered *normally compatible land use* with exterior noise levels ranging from 65-70 dBA CNEL. For *normally compatible land use,* activities associated with the land use may be carried out with minimal interference from aircraft noise.

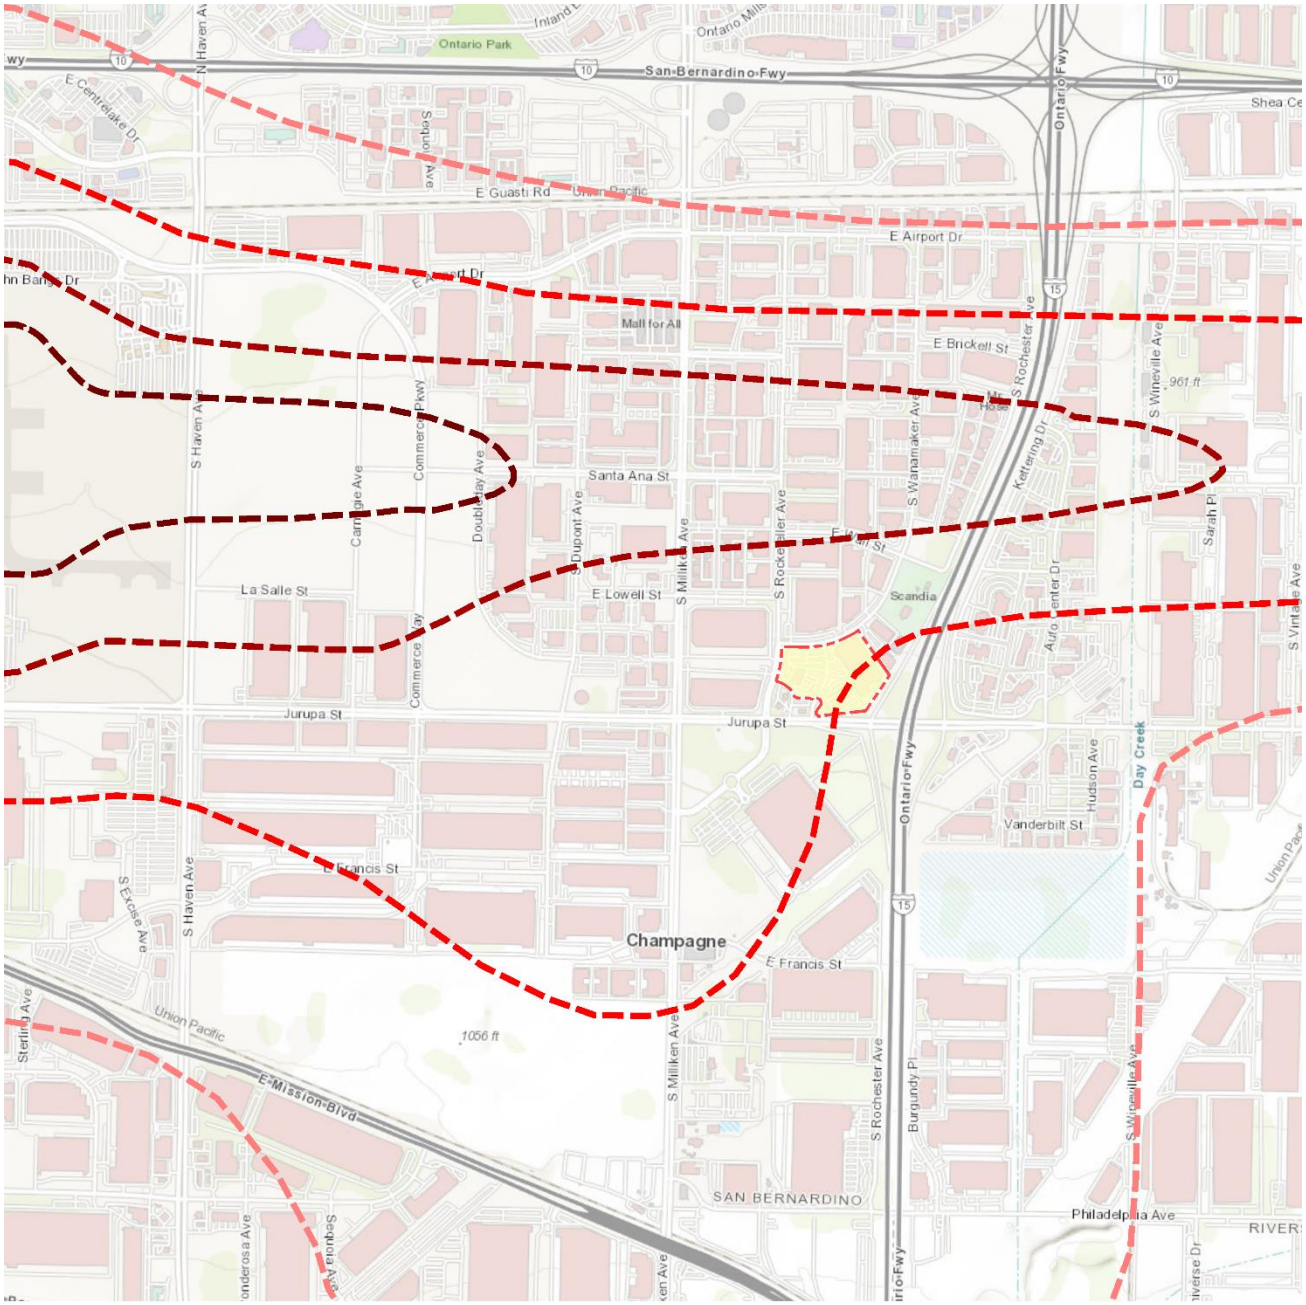
EXHIBIT A: SITE PLAN



RECEIVER LOCATIONS

To assess the potential for long-term operational and short-term construction noise impacts, the following five receiver locations, as shown on Exhibit 3, were identified as representative locations for analysis. Sensitive receivers are generally defined as locations where people reside or where the presence of unwanted sound could otherwise adversely affect the use of the land. Noise-sensitive land uses are generally considered to include schools, hospitals, single-family dwellings, mobile home parks, churches, libraries, and recreation areas. Moderately noise-sensitive land uses typically include multi-family dwellings, hotels, motels, dormitories, out-patient clinics, cemeteries, golf courses, country clubs, athletic/tennis clubs, and equestrian clubs. Land uses that are considered relatively insensitive to noise include business, commercial, and professional developments. Land uses that are typically not affected by noise include: industrial, manufacturing, utilities, agriculture, undeveloped land, parking lots, warehousing, liquid and solid waste facilities, salvage yards, and transit terminals.

EXHIBIT 2: ONT FUTURE AIRPORT NOISE CONTOURS



Source: Ontario International ALUCP Compatibility Policy Map: Noise Impact Zones, Map 2-3 (July 2018 Amendment)

Other sensitive land uses in the Project study area that are located at greater distances than those identified in this noise study will experience lower noise levels than those presented in this report due to the additional attenuation from distance and the shielding of intervening structures. Distance is measured in a straight line from the project site boundary to each receiver location.

EXHIBIT 3: RECEIVER LOCATIONS

NOISE PREDICTION MODEL

To fully describe the exterior operational noise levels from the Project, Urban Crossroads, Inc. developed a noise prediction model using the CadnaA (Computer Aided Noise Abatement) computer program. CadnaA can analyze multiple types of noise sources using the spatially accurate Project site plan, georeferenced Nearmap aerial imagery, topography, buildings, and barriers in its calculations to predict outdoor noise levels. Using the ISO 9613-2 protocol, CadnaA will calculate the distance from each noise source to the noise receiver locations, using the ground absorption, distance, and barrier/building attenuation inputs to provide a summary of noise level at each receiver and the partial noise level contributions by noise source. The noise level calculations provided in this noise assessment account for the distance attenuation provided due to geometric spreading, when sound from a localized stationary source (i.e., a point source) propagates uniformly outward in a spherical pattern. A default ground attenuation factor of 0.5 was used in the noise analysis to account for mixed ground representing a combination of hard and soft surfaces.

OPERATIONAL NOISE ANALYSIS

This section analyzes the potential stationary-source operational noise impacts at the nearby receiver locations resulting from the operation of the proposed Woodruff Logistics Project. This operational noise analysis is intended to describe noise level impacts associated with the expected typical of daytime and nighttime activities at the Project site. The on-site Project-related noise sources are expected to include loading dock activity, truck movements, roof-top, air-conditioning units, parking lot vehicle movements, and trash enclosure activity.

OPERATIONAL NOISE STANDARDS

To analyze noise impacts originating from a designated fixed location or private property such as the Woodruff Logistics Project, stationary-source (operational) noise such as the proposed loading dock activity, truck movements, roof-top, air-conditioning units, parking lot vehicle movements, and trash enclosure activity. are typically evaluated against standards established under a City's Municipal Code. Compliance with the City's Noise Ordinance would result in noise levels that are acceptable to the city and would result in less than significant noise impacts from stationary sources.

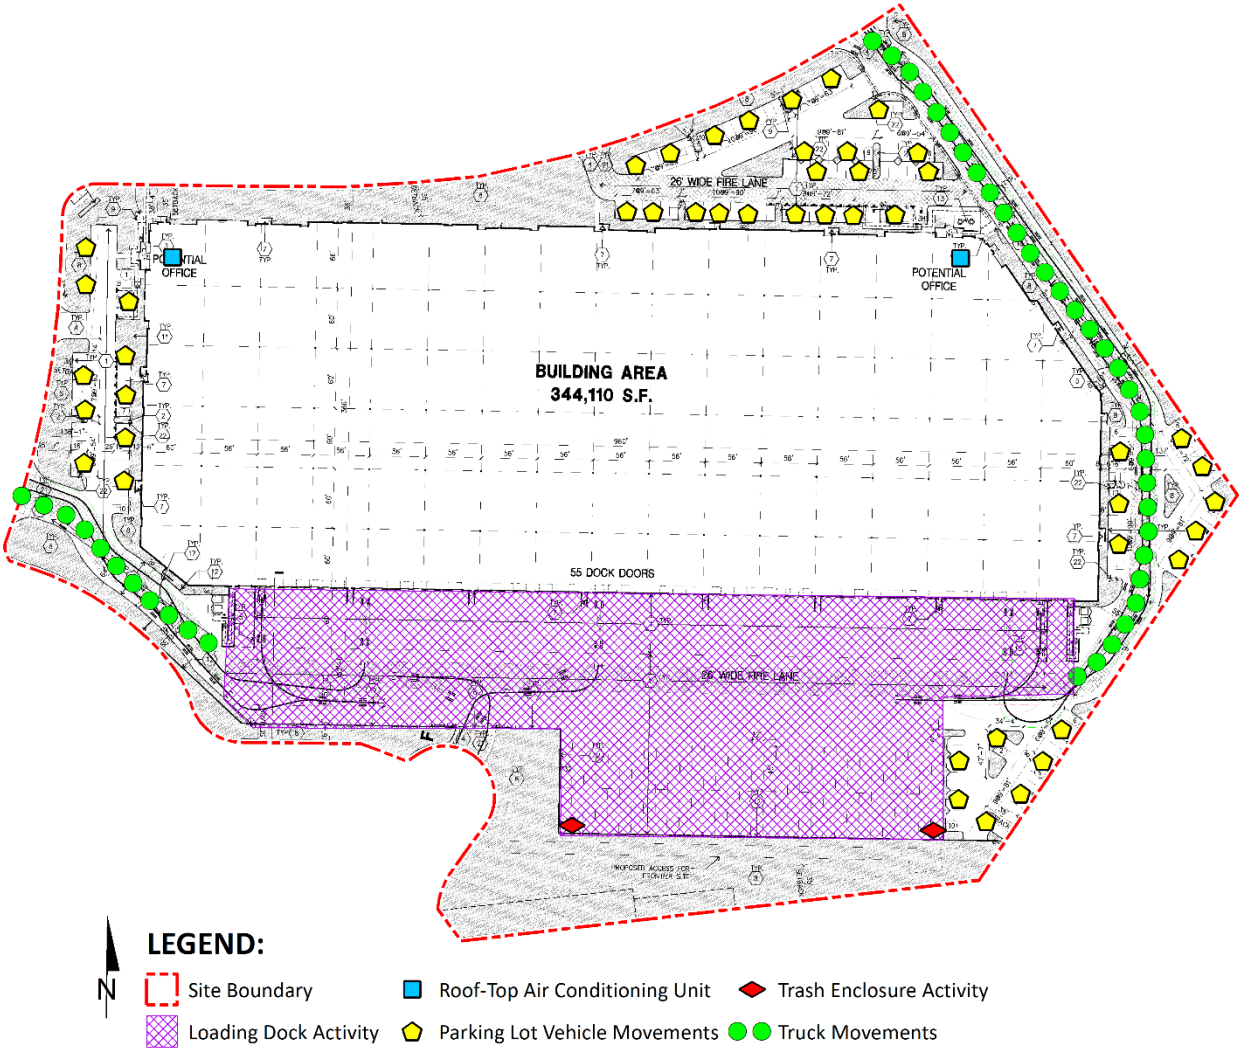
The City of Ontario Municipal Code, Title 5, Chapter 29 Section 5-29.04(a) identifies the allowable daytime and nighttime ambient exterior noise standards for each land use type. For Manufacturing and Industrial land uses (Noise Zone V), such as the Project, ambient exterior noise levels may not exceed 70 dBA L_{eq}. For residential land uses (Noise Zone I), ambient exterior noise levels may not exceed 65 dBA L_{eq} during the daytime hours (7:00 a.m. to 10:00 p.m.) and may not exceed 45 dBA L_{eq} during the nighttime hours (10:00 p.m. to 7:00 a.m.) (2).

OPERATIONAL NOISE SOURCES

To estimate the Project service commercial land use operational noise impacts, reference noise level measurements were collected from similar types of activities to represent the noise levels expected with the development of the proposed Project. While sound pressure levels (e.g., L_{eq}) quantify in decibels the intensity of given sound sources at a reference distance, sound power levels (L_w) are connected to the sound source and are independent of distance. Sound pressure levels vary substantially with distance from the source and diminish because of intervening obstacles and barriers, air absorption, wind, and other factors. Sound power is the acoustical energy emitted by the sound source and is an absolute value that is not affected by the environment. The reference project operational noise levels are based on the Project related noise sources shown on Exhibit 4. The reference project operational sound power levels are summarized below:

- Loading Dock Activity: 111.5 dBA L_w based on reference noise level measurements collected by Urban Crossroads, Inc. This includes truck idling, deliveries, backup alarms, trailer docking including a combination of tractor trailer semi-trucks, two-axle delivery trucks, and background operation activities.
- Truck Movements: 93.2 dBA L_w based on reference noise level measurements describing truck movements collected by Urban Crossroads, Inc. This includes trucks entering and existing the Project driveways and maneuvering in and out of the outdoor loading dock activity area.
- A/C Condenser Units: Represents a Lennox SCA120 series 10-ton model packaged air conditioning unit with a reference sound power level of 88.9 dBA L_w.
- Parking Lot Vehicle Movements: 84.3 dBA L_w based on reference noise level measurements describing warehouse parking lot vehicle activity collected by Urban Crossroads, Inc.
- Trash Enclosure Activity: 89.0 dBA L_w based on reference noise level measurements describing trash enclosure event activity collected by Urban Crossroads, Inc.

EXHIBIT 4: OPERATIONAL NOISE SOURCE LOCATIONS



OPERATIONAL NOISE LEVEL COMPLIANCE

Using the reference noise levels to represent the proposed Project operations that include loading dock activity, truck movements, roof-top, air-conditioning units, parking lot vehicle movements, and trash enclosure activity., Urban Crossroads, Inc. calculated the operational source noise levels that are expected to be generated at the Project site and the Project-related noise level increases that would be experienced at each of the sensitive receiver locations. Table 1 shows that the Project operational noise levels at the off-site receiver locations are expected to range from 20.1 to 25.5 dBA L_{eq}. Appendix A includes the detailed CadnaA operational noise model inputs and calculations.

TABLE 1: OPERATIONAL NOISE LEVEL COMPLIANCE

Receiver Location[1]	Project Operational Noise Levels (dBA Leq)[2]		Noise Level Standards (dBA Leq)[3]		Noise Level Standards Exceeded?[4]	
	Daytime	Nighttime	Daytime	Nighttime	Daytime	Nighttime
R1	21.9	21.8	65.0	45.0	No	No
R2	24.4	24.3	65.0	45.0	No	No
R3	20.1	20.1	65.0	45.0	No	No
R4	25.4	25.4	65.0	45.0	No	No
R5	25.5	25.5	65.0	45.0	No	No

[1] See Exhibit 3 for the receiver locations.
[2] Proposed Project operational noise level calculations are included in Appendix A.
[3] Section 5-29.04 of the City of Ontario Municipal Code.
[4] Do the estimated Project operational noise source activities exceed the noise level standards?
"Daytime" = 7:00 a.m. to 10:00 p.m.; "Nighttime" = 10:00 p.m. to 7:00 a.m.

Table 1 shows that the unmitigated operational noise levels associated with Woodruff Logistics Project will not exceed the City of Ontario exterior noise level standards. Therefore, the operational noise impacts are considered *less than significant* at the nearest noise-sensitive receiver locations.

CONSTRUCTION NOISE STANDARDS

The City of Ontario has set restrictions to control noise impacts associated with construction. Section 5-29.09 of the Municipal Code states: No person, while engaged in construction, remodeling, digging, grading, demolition or any other related building activity, shall operate any tool, equipment or machine in a manner that produces loud noise that disturbs a person of normal sensitivity who works or resides in the vicinity, or a Police or Code Enforcement Officer, on any weekday except between the hours of 7:00 a.m. and 6:00 p.m. or on Saturday or Sunday between the hours of 9:00 a.m. and 6:00 p.m. (2) While the City establishes limits to the hours during which construction activity may take place, it does not identify specific noise level limits for construction noise levels at potentially affected receiver locations for CEQA analysis purposes. Therefore, a numerical construction threshold based on Federal Transit Administration (FTA) Transit Noise and Vibration Impact Assessment Manual is used for analysis of daytime construction impacts, as discussed below.

According to the FTA, local noise ordinances are typically not very useful in evaluating construction noise. They usually relate to nuisance and hours of allowed activity, and sometimes specify limits in terms of maximum levels, but are generally not practical for assessing the impact of a construction project. Project construction noise criteria should account for the existing noise environment, the absolute noise levels during construction activities, the duration of the construction, and the adjacent land use. Due to the lack of standardized construction noise thresholds, the FTA provides guidelines that can be considered reasonable criteria for construction noise assessment. The FTA considers a daytime exterior construction noise level of 80 dBA Leq as a reasonable threshold for noise sensitive residential land use. (3 p. 179)

CONSTRUCTION REFERENCE NOISE LEVELS

To describe construction noise activities, this construction noise analysis was prepared using reference construction equipment noise levels from the Federal Highway Administration (FHWA) published the Roadway Construction Noise Model (RCNM), which includes a national database of construction equipment reference noise emission levels. (4) The RCNM equipment database, provides a comprehensive list of the noise generating characteristics for specific types of construction equipment. In addition, the database provides an acoustical usage factor to estimate the fraction of time each piece of construction equipment is operating at full power (i.e., its loudest condition) during a construction operation.

CONSTRUCTION NOISE ANALYSIS

Using the reference construction equipment noise levels and the CadnaA noise prediction model, calculations of the Project construction noise level impacts at the nearby sensitive receiver locations were completed. Consistent with FTA guidance for general construction noise assessment, Table the combined noise levels for the loudest construction equipment, assuming they operate at the same time is estimated 115 dBA Lw. As shown on Table 2, the construction noise levels are expected to range from 30.3 to 42.1 dBA L_{eq} at the nearby receiver locations. Appendix B includes the detailed CadnaA construction noise model inputs.

TABLE 2: CONSTRUCTION NOISE LEVEL COMPLIANCE

Receiver Location[1]	Construction Noise Levels (dBA L_{eq})		
	Highest Construction Noise Levels[2]	Threshold[3]	Threshold Exceeded?[4]
R1	38.1	80	No
R2	42.1	80	No
R3	30.3	80	No
R4	35.5	80	No
R5	35.7	80	No

[1] Noise receiver locations are shown on Exhibit 3.
[2] Highest construction noise level calculations based on distance from the construction noise source activity to the nearest receiver locations.
[3] Federal Transit Administration, Transit Noise and Vibration Impact Assessment Manual.
[4] Do the estimated Project construction noise levels exceed the construction noise level threshold?

To evaluate whether the Project will generate potentially significant short-term noise levels at nearest receiver locations, a construction-related daytime noise level threshold of 80 dBA L_{eq} is used as a reasonable threshold to assess the daytime construction noise level impacts. Table 3 shows that the unmitigated construction noise levels associated with Woodruff Logistics Project will not exceed will not exceed the reasonable daytime 80 dBA L_{eq} significance threshold during Project construction activities. Therefore, the operational noise impacts are considered less than significant at the nearest noise-sensitive receiver locations.

CONCLUSIONS

This Noise Assessment demonstrates that the operational noise levels associated with Woodruff Logistics Project will not exceed the City of Ontario exterior noise level standards at all nearby receiver locations. Therefore, the project related noise impacts are considered *less than significant* at the nearby noise-sensitive receiver locations. If you have any questions, please contact me directly at (949) 584-3148.

MEMORANDUM

URBAN | CROSSROADS

DATE: February 21, 2023
TO: Tom Cruikshank, Link Logistics Real Estate
FROM: Charlene So, Urban Crossroads, Inc.
JOB NO: 15364-01 TG Memo

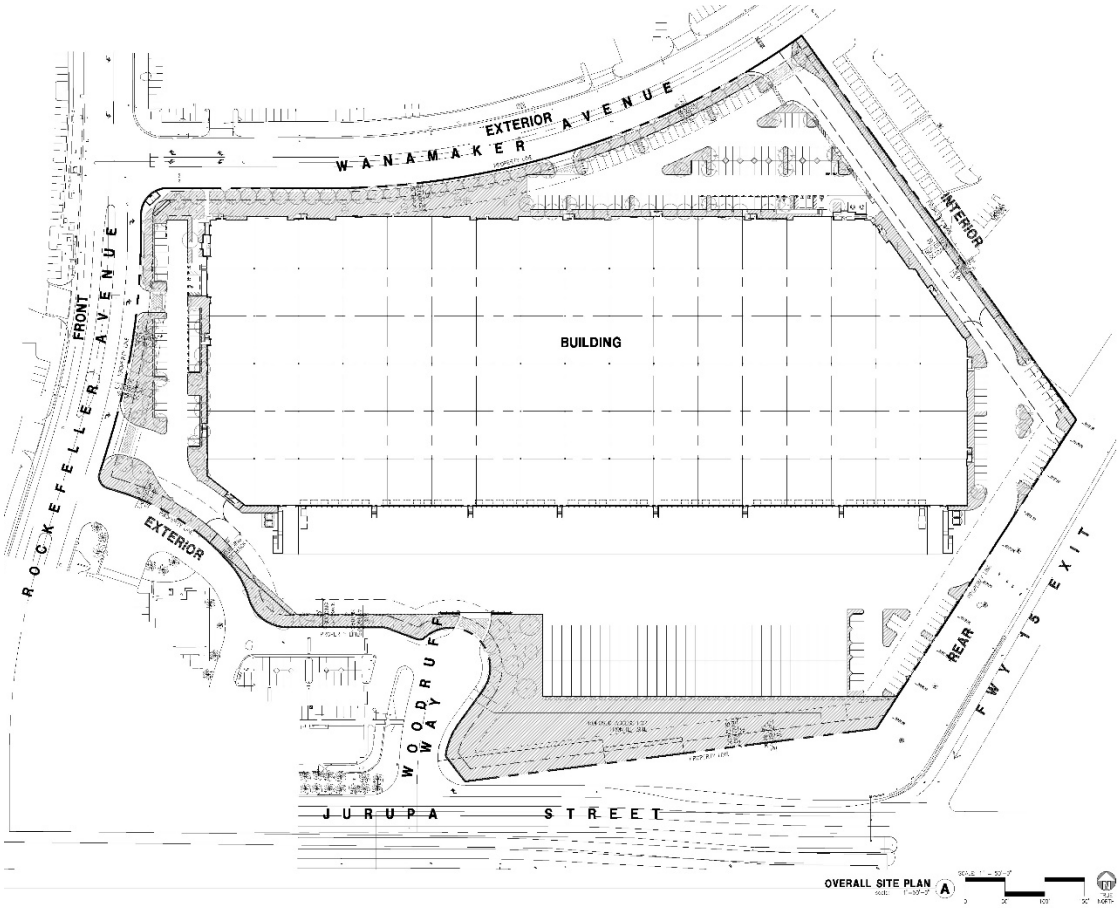
WOODRUFF LOGISTICS CENTER TRIP GENERATION ASSESSMENT

Urban Crossroads, Inc. is pleased to submit this Trip Generation Assessment for the proposed Woodruff Logistics Center development (**Project**), which is located northeast of Jurupa Street and Rockefeller Avenue, south of Wanamaker Avenue, and straddling the existing Woodruff Way in the City of Ontario. The purpose of the following trip generation is to determine whether additional analysis is necessary based on the City's Guidelines (County's Transportation Impact Study Guidelines, dated July 9, 2019).

PROPOSED PROJECT

It is our understanding that the Project is to consist of a 344,678 square foot industrial warehouse building (see Exhibit 1). Access is proposed to Rockefeller Avenue via two driveways (one to serve trucks with both serving passenger cars), Wanamaker Avenue via two driveways (one to serve trucks with both serving passenger cars), and one driveway on Woodruff Way to serve trucks.

EXHIBIT 1: PRELIMINARY SITE PLAN



TRIP GENERATION

EXISTING TRAFFIC

The site is occupied by existing uses that are currently active, specifically the Citrus Motors Ford and Citrus Motors Kia auto dealerships. The Citrus Motors Kia auto dealership lies on a 5.56-acre parcel (APN 238-201-41) located at 1350 Woodruff Way. The Citrus Motors Ford auto dealership lies on a 10.59-acre parcel (APN 238-221-22) located at 1375 Woodruff Way. In an effort to understand the existing traffic associated with the current use, traffic counts were collected at the driveways on May 31, June 1, and June 2, 2022 (Tuesday through Thursday). A summary of the count data collected is shown on Table A-1 of Attachment A. See Attachment A for driveway count data worksheets.

Table 1 below summarizes the average existing trip generation based on the count data collected over three days. The existing site currently generates an average of 1,563 two-way trips per day, with 138 trips during the AM peak hour and 125 trips during the PM peak hour. Trip generation for the existing use has been reflected in both actual vehicles and passenger car equivalent (PCE) on Table 1. PCE factors were applied to the trip generation rates for heavy trucks (large 2-axles, 3-axles, 4+-axles). PCEs allow the typical "real-world" mix of vehicle types to be represented as a

single, standardized unit, such as the passenger car, to be used for the purposes of capacity and level of service analyses. The PCE factors are consistent with the recommended PCE factors in the County Guidelines and with those used for other projects within the County.

TABLE 1: EXISTING TRIP GENERATION

	AM Peak Hour			PM Peak Hour			
Land Use	In	Out	Total	In	Out	Total	Daily
Actual Vehicles:							
Existing Use							
Passenger Cars:	78	54	132	42	79	121	1,468
2-axle Trucks:	4	2	6	3	1	4	75

Total Trips (PCE)[1]	84	57	141	47	81	127	1,582

[1] Total Trips = Passenger Cars + Truck Trips.

THE ONTARIO PLAN (TOP) 2050

The Ontario Plan (**TOP**) 2050 Environmental Impact Report (**EIR**) (August 2022) designates the Project site with industrial development. Per the adopted TOP 2050, the Project site could be developed with up to 398,901 square feet of industrial use (assuming a 16.65-acre site and a floor-to-area-ratio of 0.55). The trip generation rates used for this analysis is based upon information collected by the Institute of Transportation Engineers (ITE) as provided in their Trip Generation Manual (11th Edition, 2021). For purposes of the trip generation assessment, the following ITE land use code and vehicle mix has been utilized for the currently adopted land use per the TOP 2050 (see Table 2):

- ITE land use code 110 (General Light Industrial) has been used to derive site specific trip generation estimates for up to 398,901 square feet. A light industrial facility is a free-standing facility devoted to a single use that has an emphasis on activities other than manufacturing. Typically, there is minimum office space. The vehicle mix has been obtained from the ITE's Trip Generation Manual. The truck percentages were further broken down by axle type per the following South Coase Air Quality Management District (SCAQMD) recommended truck mix: 2-Axle = 16.7%; 3-Axle = 20.7%; 4+-Axle = 62.6%.

TABLE 2: TOP 2050 TRIP GENERATION RATES

Land Use[1]	Units[2]	ITE LU Code	AM Peak Hour In	AM Peak Hour Out	AM Peak Hour Total	PM Peak Hour In	PM Peak Hour Out	PM Peak Hour Total	Daily

[2] TSF = thousand square feet

[3] Truck Mix: South Coast Air Quality Management District's (SCAQMD) recommended truck mix, by axle type.
Normalized % - Without Cold Storage: 16.7% 2-Axle trucks, 20.7% 3-Axle trucks, 62.6% 4-Axle trucks.

The trip generation summary illustrating daily, and peak hour trip generation estimates for the current TOP 2050 in actual and passenger car equivalent (PCE) vehicles are shown on Table 3. As shown on Table 3, the Project site is anticipated to generate a total of 1,946 two-way trips per day with 294 AM peak hour trips and 257 PM peak hour trips based on the TOP 2050 adopted Industrial land use designation (in actual vehicles). In comparison, the Project site is anticipated to generate a total of 2,100 two-way PCE trips per day with 301 PCE AM peak hour trips and 265 PCE PM peak hour trips based on the TOP 2050 adopted Industrial land use designation (see Table 3).

PROPOSED PROJECT

Trip generation rates for the proposed Project is shown on Table 4. The trip generation rates used for this analysis is based upon information collected by the ITE as provided in their Trip Generation Manual (11th Edition, 2021). For purposes of the trip generation assessment, the following ITE land use codes and vehicle mixes have been utilized for the proposed Project (see Table 2):

- High-Cube Fulfillment Center Warehouse (ITE Land Use Code 155) has been used to derive site specific trip generation estimates for up to 292,976 square feet of the proposed Project (or 85% of the overall building square footage). The ITE Trip Generation Manual has trip generation rates for high-cube fulfillment center use for both non-sort and sort facilities (ITE land use code 155). As defined by ITE, a high-cube warehouse is a building that typically has at least 200,000 gross square feet of floor area, has a ceiling height of 24 feet or more, and is used primarily for the storage and/or consolidation of manufactured goods (and to a lesser extent, raw materials) prior to their distribution to retail locations or other warehouses. A typical high-cube warehouse has a high level of on-site automation and logistics management. The automation and logistics enable highly efficient processing of goods through the high-cube warehouse. The ITE Trip Generation Manual has two subcategories for the High-Cube Fulfillment Center use: sort and non-sort. ITE describes a sort facility as a fulfillment center that ships out smaller items, requiring extensive sorting, typically by manual means. In comparison, a non-sort facility is a fulfillment center that ships large box items that are processed primarily with automation rather than through manual means. Some limited assembly and repackaging may occur within the facility. In light of the on-site parking provided, a non-sort facility has been assumed for the purposes of calculating trip generation for the proposed Project. The off-street parking for the currently proposed Project would not support the anticipated daily passenger car (employee) traffic generated by a sort facility (the passenger car sort rate is nearly 4 times that of the non-sort passenger car rate). The vehicle mix (passenger cars versus trucks) has been obtained from the ITE's Trip Generation Manual. The truck percentages were further broken down by axle type per the following SCAQMD recommended truck mix: 2-Axle = 16.7%; 3-Axle = 20.7%; 4+-Axle = 62.6%.
- ITE land use code 157 (High-Cube Cold Storage Warehouse) has been used to derive site specific trip generation estimates for up to 51,702 square feet (15% of the light industrial area). High-cube cold storage warehouses include warehouses characterized by the storage and/or consolidation of manufactured goods (and to a lesser extent, raw materials) prior to their distribution to retail locations or other warehouses. High-cube cold storage warehouses are facilities typified by temperature-controlled environments for frozen food or other perishable products. The High-Cube Cold Storage Warehouse vehicle mix (passenger cars versus trucks) has been obtained from the ITE's Trip Generation Manual. The truck percentages were further broken down by axle type per the following SCAQMD recommended truck mix: 2-Axle = 34.7%; 3-Axle = 11.0%; 4+-Axle = 54.3%.

[3] Truck Mix: South Coast Air Quality Management District's (SCAQMD) recommended truck mix, by axle type.
Normalized % - Without Cold Storage: 16.7% 2-Axle trucks, 20.7% 3-Axle trucks, 62.6% 4-Axle trucks.
Normalized % - With Cold Storage: 34.7% 2-Axle trucks, 11.0% 3-Axle trucks, 54.3% 4-Axle trucks.

The trip generation summary illustrating daily, and peak hour trip generation estimates for the proposed Project in actual and passenger car equivalent (PCE) vehicles are shown on Table 5 and Table 6, respectively. As shown on Table 5, the proposed Project is anticipated to generate a total of 644 two-way trips per day with 50 AM peak hour trips and 51 PM peak hour trips (in actual vehicles). In comparison, the proposed Project is anticipated to generate a total of 812 two-way PCE trips per day with 62 PCE AM peak hour trips and 59 PCE PM peak hour trips (see Table 6).

TRIP GENERATION COMPARISON

Table 7 shows the trip generation comparison between the existing and proposed use. The resulting net new trips are identified on Table 7. As shown, the Project is anticipated to generate 770 fewer two-way trips per day with 79 fewer AM peak hour trips and 68 fewer PM peak hour trips in comparison to the existing uses (in PCE). Per the City's Guidelines, the trip generation comparison is based on PCE as the existing and proposed uses are truck-intensive uses and any operations analysis performed (if necessary) would utilize PCE values.

Total Trips	**-39**	**-40**	**-79**	**-24**	**-45**	**-68**	**-770**

Table 8 shows the trip generation comparison between the adopted TOP 2050 land use (Industrial) and proposed use. The resulting net new trips are identified on Table 8. As shown, the Project is anticipated to generate 1,288 fewer two-way trips per day with 239 fewer AM peak hour trips and 206 fewer PM peak hour trips in comparison to the approved TOP 2050 land use (in PCE).

TABLE 8: TRIP GENERATION COMPARISON – TOP 2050 VS. PROPOSED PROJECT

	AM Peak Hour			PM Peak Hour			
Land Use	In	Out	Total	In	Out	Total	Daily
Proposed Project							
Passenger Cars:	37	5	42	18	31	49	536
Total Truck Trips (PCE):	8	12	20	5	5	10	276
Total Trips	45	17	62	23	36	59	812
TOP 2050 (Industrial)							
Passenger Cars:	257	34	291	34	221	255	1,844
Total Truck Trips (PCE):	7	4	10	6	5	10	256
Total Trips	264	38	302	40	226	266	2,100
Net Change							
Passenger Cars:	-220	-29	-249	-16	-190	-206	-1,308
Total Truck Trips (PCE):	1	8	10	-1	0	0	20
Total Trips	**-219**	**-21**	**-239**	**-17**	**-190**	**-206**	**-1,288**

FINDINGS

The City of Ontario adheres to the San Bernardino County Transportation Authority (SBCTA) Recommended Traffic Impact Study Guidelines for Vehicle Miles Traveled and Level of Service Assessment (dated February 2020, by Fehr & Peers) which has been used to determine whether additional traffic analysis is necessary for the proposed Project. The County's Guidelines indicates that development projects that generate a net increase of 100 or more peak hour vehicle trips (without pass-by reductions) would require the preparation and submittal of a Transportation Impact Analysis.

The Project is anticipated to generate fewer than 50 net new peak hour trips during the morning and evening peak hours. The Project on its own, without taking any credit for existing uses, also generates fewer than 100 new peak hour trips (both in actual vehicles and PCE). Lastly, the proposed Project uses are anticipated to generate fewer trips than the adopted TOP 2050 land use (Industrial). As such, additional peak hour traffic operations analysis is not necessary based on the County's Guidelines.

If you have any questions or comments, I can be reached at cso@urbanxroads.com.

MEMORANDUM

URBAN CROSSROADS

DATE: February 22, 2023
TO: Nicole Morse, T&B Planning, Inc.
FROM: Alex So, Urban Crossroads, Inc.
JOB NO: 15364-01 VMT

WOODRUFF WAY LOGISTICS CENTER VEHICLE MILES TRAVELED (VMT) SCREENING EVALUATION

Urban Crossroads, Inc. is pleased to provide the following Vehicle Miles Traveled (VMT) Screening Evaluation for the Woodruff Way Logistics Center (**Project**), which is located northeast of Jurupa Street and Rockefeller Avenue, south of Wanamaker Avenue, and straddling the existing Woodruff Way in the City of Ontario.

PROJECT OVERVIEW

It is our understanding that the Proposed Project is to consist of a 344,260 square foot industrial warehouse building. A preliminary site plan for the Proposed Project is shown on Attachment A.

BACKGROUND

The California Environmental Quality Act (CEQA) requires all lead agencies to adopt VMT as the measure for identifying transportation impacts for land use projects. To comply with CEQA, in June of 2020 the City of Ontario developed and adopted their own VMT methodologies and thresholds (Resolution No. 2020-071), (**City Guidelines**) (1). This VMT screening evaluation has been developed based on the adopted City Guidelines.

VMT SCREENING

The City Guidelines lists standardized screening methods for project level VMT analysis that can be used to identify when a proposed land use development project is anticipated to result in a less than significant impact, thereby eliminating the need to conduct a full VMT analysis. The City of Ontario VMT screening criteria, as described within the City Guidelines, are listed below:

- Transit Priority Area (TPA) Screening
- Low VMT Area Screening
- Project Type Screening

A land use project need only to meet one of the above screening criteria to result in a less than significant impact.

TPA SCREENING

Consistent with guidance identified in the City Guidelines, projects located within a Transit Priority Area (TPA) (i.e., within ½ mile of an existing "major transit stop"[1] or an existing stop along a "high-quality transit corridor"[2]) may be presumed to have a less than significant impact absent substantial evidence to the contrary. However, the presumption may not be appropriate if a project:

- Has a Floor Area Ratio (FAR) of less than 0.75;
- Includes more parking for use by residents, customers, or employees of the project than required by the jurisdiction (if the jurisdiction requires the project to supply parking);
- Is inconsistent with the applicable Sustainable Communities Strategy (as determined by the lead agency, with input from the Metropolitan Planning Organization); or
- Replaces affordable residential units with a smaller number of moderate- or high-income residential units.

Based on the secondary criteria outlined in the City Guidelines, the Project does not meet the secondary criteria of having an FAR at or above 0.75, regardless of the Project being physically located in a TPA.

TPA Screening criteria is not met.

LOW VMT AREA SCREENING

City Guidelines state that projects may be presumed to have a less than significant VMT impact if located in an already low VMT generating traffic analysis zone (TAZ). City Guidelines recognize low VMT areas as those that generate a VMT per service population (i.e., population and employment) that is 15% below County of San Bernardino Baseline VMT per service population. The San Bernardino Transportation Analysis Model (SBTAM) is used to measure VMT performance in individual TAZs within the region. The Project's physical location was identified in the SBTAM model to determine the TAZ where the Project is located. The Project TAZ 53687401 is then calculated using Origin-Destination (OD) trip matrices to obtain total OD VMT. The resulting total OD VMT is divided by the Project TAZ's service population. The Project TAZ 53687401 has a VMT per service population of 55.8, which was compared to 15% below County

[1] Pub. Resources Code, § 21064.3 ("'Major transit stop' means a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods.").
[2] Pub. Resources Code, § 21155 ("For purposes of this section, a high-quality transit corridor means a corridor with fixed route bus service with service intervals no longer than 15 minutes during peak commute hours.").

of San Bernardino baseline or 28.41 VMT per service population (33.42 x 0.85= 28.41). As a result, the Project is not located within a low VMT generating zone.

Low VMT Area Screening criteria is not met.

PROJECT TYPE SCREENING

The City Guidelines identify that local serving retail with buildings less than 50,000 square feet or other local serving essential services (e.g., day care centers, public schools, medical/dental office buildings, etc.) are presumed to have a less than significant impact absent substantial evidence to the contrary. The proposed Project does not intend to develop any local serving retail land uses.

Additionally, the City Guidelines indicates for small projects that generate low traffic volumes (i.e., fewer than 110 daily trips) and by association low greenhouse gas (GHG) emissions are also assumed to cause a less than significant impact.

Existing Traffic

The site is occupied by existing uses that are currently active, specifically the Citrus Motors Ford and Citrus Motors Kia auto dealerships. The Citrus Motors Kia auto dealership lies on a 5.56-acre parcel (APN 238-201-41) located at 1350 Woodruff Way. The Citrus Motors Ford auto dealership lies on a 10.59-acre parcel (APN 238-221-22) located at 1375 Woodruff Way. In an effort to understand the existing traffic associated with the current use, traffic counts were collected at the driveways on May 31, June 1, and June 2, 2022 (Tuesday through Thursday). A summary of the count data collected is shown on Table B-1 of Attachment B.

Table 1 below summarizes the average existing trip generation based on the count data collected over those three days. The existing site currently generates an average of 1,543 daily vehicle trips.

TABLE 1: EXISTING TRIP GENERATION

	AM Peak Hour			PM Peak Hour			
Land Use	In	Out	Total	In	Out	Total	Daily
Actual Vehicles:							
Existing Use							
Passenger Cars:	78	54	132	42	79	121	1,468
2-axle Trucks:	4	2	6	3	1	4	75
3-axle Trucks:	0	0	0	0	0	0	0
4+-axle Trucks:	0	0	0	0	0	0	0
Total Trucks:	4	2	6	3	1	4	75
Total Trips (Actual Vehicles)[1]	82	56	138	45	80	125	1,543

[1] Total Trips = Passenger Cars + Truck Trips.

THE ONTARIO PLAN (TOP) 2050

The Ontario Plan (**TOP**) 2050 Environmental Impact Report (**EIR**) (August 2022) designates the Project site with industrial development. Per the adopted TOP 2050, the Project site could be

developed with up to 398,901 square feet of industrial use (assuming a 16.65-acre site and a floor-to-area-ratio of 0.55). The trip generation rates used for this analysis are based upon information collected by the Institute of Transportation Engineers (ITE) as provided in their Trip Generation Manual (11th Edition, 2021). For purposes of the VMT screening evaluation, the following ITE land use code and vehicle mix has been utilized for the currently adopted land use per the TOP 2050 (see Table 2):

- ITE land use code 110 (General Light Industrial) has been used to derive site specific trip generation estimates for up to 398,901 square feet. A light industrial facility is a free-standing facility devoted to a single use that has an emphasis on activities other than manufacturing. Typically, there is minimum office space. The vehicle mix has been obtained from the ITE's Trip Generation Manual. The truck percentages were further broken down by axle type per the following South Coast Air Quality Management District (SCAQMD) recommended truck mix: 2-Axle = 16.7%; 3-Axle = 20.7%; 4+-Axle = 62.6%.

TABLE 2: TOP 2050 TRIP GENERATION RATES

Land Use[1]	Units[2]	ITE LU Code	AM Peak Hour In	AM Peak Hour Out	AM Peak Hour Total	PM Peak Hour In	PM Peak Hour Out	PM Peak Hour Total	Daily

[2] Total Trips = Passenger Cars + Truck Trips.

PROPOSED PROJECT

Trip generation rates for the proposed Project are shown on Table 4. The trip generation rates used for this analysis are based upon information collected by the ITE as provided in their Trip Generation Manual (11th Edition, 2021). For purposes of the VMT screening evaluation, the following ITE land use codes and vehicle mixes have been utilized for the proposed Project (see Table 4):

- High-Cube Fulfillment Center Warehouse (ITE Land Use Code 155) has been used to derive site specific trip generation estimates for up to 292,976 square feet of the proposed Project (or 85% of the overall building square footage). The ITE Trip Generation Manual has trip generation rates for high-cube fulfillment center use for both non-sort and sort facilities (ITE land use code 155). As defined by ITE, a high-cube warehouse is a building that typically has at least 200,000 gross square feet of floor area, has a ceiling height of 24 feet or more, and is used primarily for the storage and/or consolidation of manufactured goods (and to a lesser extent, raw materials) prior to their distribution to retail locations or other warehouses. A typical high-cube warehouse has a high level of on-site automation and logistics management. The automation and logistics enable highly efficient processing of goods through the high-cube warehouse. The ITE Trip Generation Manual has two subcategories for the High-Cube Fulfillment Center use: sort and non-sort. ITE describes a sort facility as a fulfillment center that ships out smaller items, requiring extensive sorting, typically by manual means. In comparison, a non-sort facility is a fulfillment center that ships large box items that are processed primarily with automation rather than through manual means. Some limited assembly and repackaging may occur within the facility. In light of the on-site parking provided, a non-sort facility has been assumed for the purposes of calculating trip generation for the proposed Project. The off-street parking for the currently proposed Project would not support the anticipated daily passenger car (employee) traffic generated by a sort facility (the passenger car sort rate is nearly 4 times that of the non-sort passenger car rate). The vehicle mix (passenger cars versus trucks) has been obtained from the ITE's Trip Generation Manual. The truck percentages were further broken down by axle type per the following SCAQMD recommended truck mix: 2-Axle = 16.7%; 3-Axle = 20.7%; 4+-Axle = 62.6%.
- ITE land use code 157 (High-Cube Cold Storage Warehouse) has been used to derive site specific trip generation estimates for up to 51,702 square feet (15% of the light industrial area). High-cube cold storage warehouses include warehouses characterized by the storage and/or consolidation of manufactured goods (and to a lesser extent, raw materials) prior to their distribution to retail locations or other warehouses. High-cube cold storage warehouses are facilities typified by temperature-controlled environments for frozen food or other perishable products. The High-Cube Cold Storage Warehouse vehicle mix (passenger cars versus trucks) has been obtained from the ITE's Trip Generation Manual. The truck percentages were further broken down by axle type per the following

SCAQMD recommended truck mix: 2-Axle = 34.7%; 3-Axle = 11.0%; 4+-Axle = 54.3%.

TRIP GENERATION COMPARISON

Table 7 shows the trip generation comparison between the existing and proposed use. As shown, the Project is anticipated to generate 899 fewer two-way trips per day as compared to the existing use.

TABLE 7: TRIP GENERATION COMPARISON – EXISTING VS. PROPOSED PROJECT

	AM Peak Hour			PM Peak Hour			
Land Use	In	Out	Total	In	Out	Total	Daily
Proposed Project							
Passenger Cars:	37	5	42	18	31	49	536
Total Truck Trips (Actual Vehicles):	4	4	8	1	1	2	108
Total Trips	41	9	50	19	32	51	644
Existing							
Passenger Cars:	78	54	132	42	79	121	1,468
Total Truck Trips (Actual Vehicles):	4	2	6	3	1	4	75
Total Trips	82	56	138	45	80	125	1,543
Net Change							
Passenger Cars:	-41	-49	-90	-24	-48	-72	-932
Total Truck Trips (Actual Vehicles):	0	2	2	-2	0	-2	33
Total Trips	**-41**	**-47**	**-88**	**-26**	**-48**	**-74**	**-899**

Table 8 shows the trip generation comparison between the adopted TOP 2050 land use (Industrial) and proposed use. As shown, the Project is anticipated to generate 1,302 fewer two-way trips per day as compared to the adopted TOP 2050.

TABLE 8: TRIP GENERATION COMPARISON – TOP 2050 VS. PROPOSED PROJECT

	AM Peak Hour			PM Peak Hour			
Land Use	In	Out	Total	In	Out	Total	Daily
Proposed Project							
Passenger Cars:	37	5	42	18	31	49	536
Total Truck Trips (Actual Vehicles):	4	4	8	1	1	2	108
Total Trips	41	9	50	19	32	51	644
TOP 2050 (Industrial)							
Passenger Cars:	257	34	291	34	221	255	1,844
Total Truck Trips (Actual Vehicles):	2	1	3	1	1	2	102
Total Trips	259	35	294	35	222	257	1,946
Net Change							
Passenger Cars:	-220	-29	-249	-16	-190	-206	-1,308
Total Truck Trips (Actual Vehicles):	2	3	5	0	0	0	6
Total Trips	**-218**	**-26**	**-244**	**-16**	**-190**	**-206**	**-1,302**

As shown in Table 7 and 8 the Proposed Project is estimated to have a net reduction in vehicle trips as compared to both the existing land uses and the land uses assumed in the TOP 2050. Therefore, the Project's estimated trips will not exceed the City's 110 net new daily vehicle trip threshold.

Project Type screening criteria is met.

As the Project was found to meet the Project Type screening criteria, it is presumed to have a **less than significant VMT impact**.

MEMORANDUM

URBAN | CROSSROADS

DATE: July 25, 2023
TO: Tom Cruikshank, Link Logistics Real Estate
FROM: Charlene So, Urban Crossroads, Inc.
JOB NO: 15364-03 TA Letter

WOODRUFF LOGISTICS CENTER FOCUSED TRAFFIC ASSESSMENT

Urban Crossroads, Inc. is pleased to submit this Focused Traffic Assessment for the proposed Woodruff Logistics Center development (**Project**), which is located northeast of Jurupa Street and Rockefeller Avenue, south of Wanamaker Avenue, and straddling the existing Woodruff Way in the City of Ontario. The purpose of the following focused traffic assessment is to respond to the City's comment requesting an intersection peak hour level of service (**LOS**) operations analysis at the intersection of Jurupa Street and Rockefeller Avenue to evaluate the effect of an additional westbound right turn traffic at the intersection due to the vacation and termination of the existing Woodruff Way. This assessment will also determine whether a westbound dedicated right turn lane is needed at the intersection of Jurupa Street and Rockefeller Avenue to support the anticipated traffic volume or acceptable peak hour operations.

PROPOSED PROJECT

It is our understanding that the Project is to consist of a 344,678 square foot industrial warehouse building (see Exhibit 1). Access is proposed to Rockefeller Avenue via two driveways (one to serve trucks with both serving passenger cars), Wanamaker Avenue via two driveways (one to serve trucks with both serving passenger cars), and one driveway on Woodruff Way to serve trucks only. As part of the Project, Woodruff Way will be vacated between the existing Carl's Jr. restaurant Wanamaker Avenue. As a result of the vacation, vehicles previously using Woodruff Way to access Wanamaker Avenue will now be using Jurupa Street to Rockefeller Avenue.

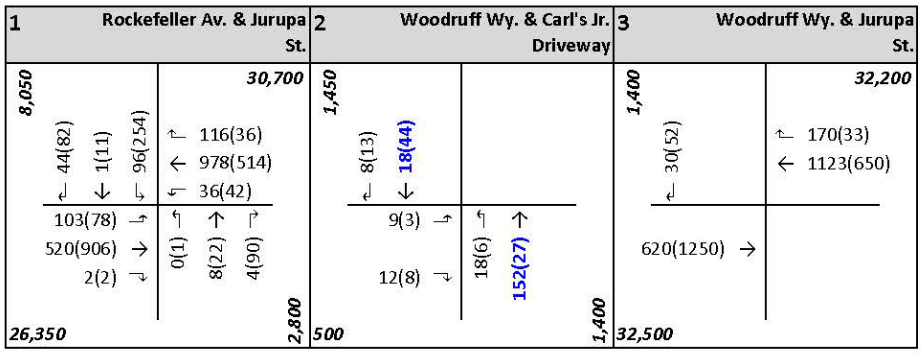
EXISTING CONDITIONS

Traffic counts were conducted on April 26, 2023, at the following intersections:

1. Rockefeller Avenue & Jurupa Street
2. Woodruff Way & Carl's Jr. Driveway
3. Woodruff Way & Jurupa Street

The existing peak hour intersection operations analysis has been conducted for Rockefeller Avenue and Jurupa Street only. Existing traffic volumes are shown on Exhibit 1. Traffic counts were also collected at intersections along Woodruff Way to reassign existing traffic that is currently using Woodruff Way from Jurupa Street to access Wanamaker Avenue (or vice versa). Since the Project is vacating Woodruff Way north of the existing Carl's Jr. driveway, through traffic at the Carl's Jr. driveway will need to be reassigned from Woodruff Way at Jurupa Street to the intersection of Rockefeller Avenue at Jurupa Street for With Project traffic conditions (see **blue** boldface volumes on Exhibit 1). Lastly, volumes into and out of the Carl's Jr. driveway from the north will also be reassigned to the northbound left and eastbound right turn movements. The raw manual peak hour turning movement traffic count data sheets are included in Attachment A.

EXISTING 1: EXISTING (2023) TRAFFIC VOLUMES



##(##) AM(PM) Peak Hour Intersection Volumes

Average Daily Trips

The intersection operations analysis results are summarized in Table 1, which indicates that the intersection of Rockefeller Avenue and Jurupa Street is currently operating at an acceptable level of service (**LOS**) during the peak hours. LOS E is the minimum LOS standard for intersections within the City. The Existing (2023) intersection operations analysis worksheets are included in Attachment B.

TABLE 1: INTERSECTION ANALYSIS FOR EXISTING (2023) CONDITIONS

#	Intersection	Traffic Control[2]	Delay[1] (secs.) AM	Delay[1] (secs.) PM	Level of Service AM	Level of Service PM	Jurisdiction(s) / LOS Standard[3]
1	Rockefeller Av. & Jurupa St.	TS	17.9	22.4	B	C	Ontario / LOS E

[1] Per the Highway Capacity Manual (6th Edition), overall average intersection delay and level of service are shown for intersections with a traffic signal or all way stop control. For intersections with cross street stop control, the delay and level of service for the worst individual movement (or movements sharing a single lane) are shown.

[2] TS = Traffic Signal

PROJECT TRAFFIC

TRIP GENERATION

The trip generation summary illustrating daily, and peak hour trip generation estimates for the proposed Project in actual and passenger car equivalent (**PCE**) vehicles are shown in Table 2 and Table 3, respectively. As shown in Table 2, the proposed Project is anticipated to generate a total of 644 two-way trips per day with 50 AM peak hour trips and 51 PM peak hour trips (in actual vehicles). In comparison, the proposed Project is anticipated to generate a total of 812 two-way PCE trips per day with 62 PCE AM peak hour trips and 59 PCE PM peak hour trips (see Table 3). The trip generation reflected is consistent with that presented in the Woodruff Logistics Center Trip Generation Assessment (dated February 21, 2023).

[1] TSF = thousand square feet

[2] Total Trips = Passenger Cars + Truck Trips.

The site is occupied by existing uses that are currently active, specifically the Citrus Motors Ford and Citrus Motors Kia auto dealerships. The Citrus Motors Kia auto dealership lies on a 5.56-acre parcel (APN 238-201-41) located at 1350 Woodruff Way. The Citrus Motors Ford auto dealership lies on a 10.59-acre parcel (APN 238-221-22) located at 1375 Woodruff Way. Table 4 shows the trip generation comparison between the existing and proposed use. The resulting net new trips are identified in Table 4. As shown, the Project is anticipated to generate 770 fewer two-way trips per day with 79 fewer AM peak hour trips and 68 fewer PM peak hour trips in comparison to the existing uses (in PCE). Per the City's Guidelines, the trip generation comparison is based on PCE as the existing and proposed uses are truck-intensive uses and any operations analysis performed (if necessary) would utilize PCE values.

TABLE 4: TRIP GENERATION COMPARISON

TRIP DISTRIBUTION

The Project trip distribution and assignment process represents the directional orientation of traffic to and from the Project site. The trip distribution pattern of passenger cars is heavily influenced by the geographical location of the site, the location of surrounding uses, and the proximity to the regional freeway system. Exhibit 2 illustrates the passenger car trip distribution patterns and Exhibit 3 illustrates the truck trip distribution patterns. Project trip distribution patterns for the Project are based on existing travel patterns per the traffic count data collected.

EXHIBIT 2: PROJECT (PASSENGER CAR) TRIP DISTRIBUTION

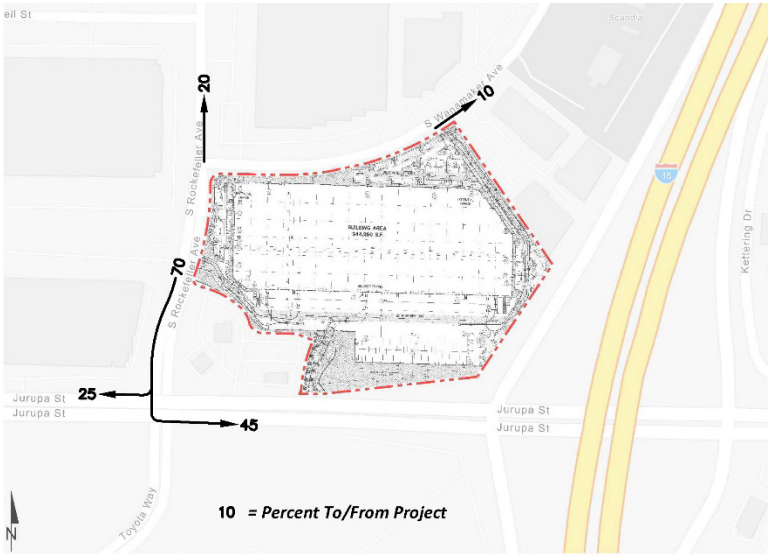

EXHIBIT 3: PROJECT (TRUCK) TRIP DISTRIBUTION

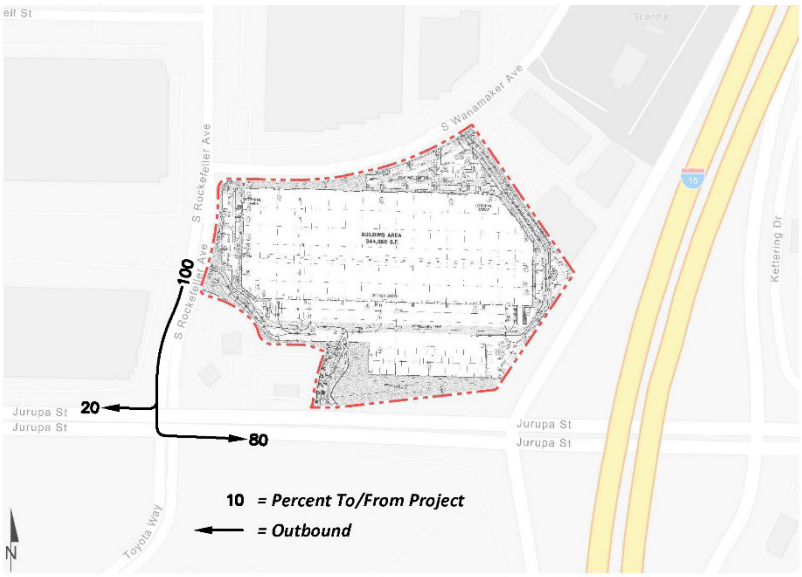
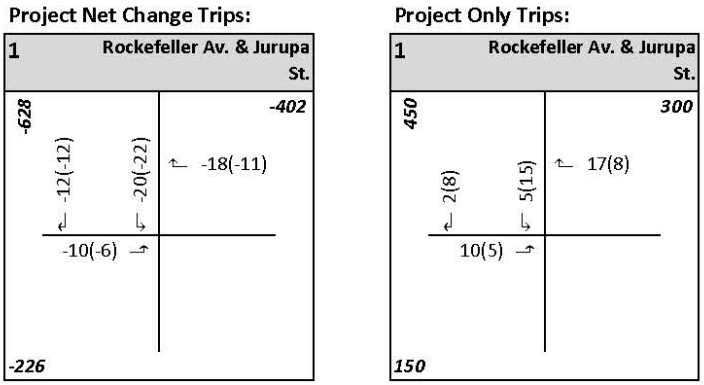


TRIP ASSIGNMENT

The assignment of traffic from the Project area to the adjoining roadway system is based upon the Project trip generation, trip distribution, and the arterial highway and local street system improvements that would be in place by the time of initial occupancy of the Project. Based on the identified Project traffic generation and trip distribution patterns, Project ADT and peak hour intersection turning movement volumes are shown on Exhibit 4. Project volumes are shown based on the trip generation reflected in Table 2 and the net change in Project trips (accounting for the existing use) is also shown (negative values reflect a reduction in trips).

EXHIBIT 4: PROJECT TRAFFIC VOLUMES



##(##) AM(PM) Peak Hour Intersection Volumes
Average Daily Trips

EXISTING PLUS PROJECT

This scenario includes Existing traffic volumes plus Project traffic (**E+P**). The traffic volumes for E+P traffic conditions account for the reassignment of existing trips from Woodruff Way to Rockefeller Avenue along Jurupa Street. The intersection analysis result is summarized in Table 5 for E+P traffic conditions which indicates the intersection of Rockefeller Avenue at Jurupa Street is anticipated to continue to operate at an acceptable LOS. Since the development of the proposed Project will result in a net reduction in trips from the existing use, the peak hour intersection operations at Rockefeller Avenue and Jurupa Street are anticipated to improve under E+P traffic conditions in comparison to Existing traffic conditions. The intersection operations analysis worksheets for E+P traffic conditions are included in Attachment C.

TABLE 5: INTERSECTION ANALYSIS FOR E+P CONDITIONS

			Existing (2023)				E+P				
			Delay[1] (secs.)		Level of Service		Delay[1] (secs.)		Level of Service		
#	Intersection	Traffic Control[2]	AM	PM	AM	PM	AM	PM	AM	PM	Jurisdiction(s) / LOS Standard[3]
1	Rockefeller Av. & Jurupa St.	TS	17.9	22.4	B	C	17.4	21.4	B	C	Ontario / LOS E

1 Per the Highway Capacity Manual (6th Edition), overall average intersection delay and level of service are shown for intersections with a traffic signal or all way stop control. For intersections with cross street stop control, the delay and level of service for the worst individual movement (or movements sharing a single lane) are shown.

2 TS = Traffic Signal

HORIZON YEAR WITH PROJECT

This scenario includes the refined post-process volumes obtained from the San Bernardino County Transportation Analysis Model (**SBTAM**), plus the traffic generated by the proposed Project. The Project trips shown in Exhibit 4 have been added to post-processed Horizon Year Without Project traffic volumes (not the net change in Project trips). The intersection analysis result is summarized in Table 6 for Horizon Year traffic conditions which indicates the intersection of Rockefeller Avenue at Jurupa Street is anticipated to continue to operate at an acceptable LOS. The intersection operations analysis worksheets for Horizon Year With Project traffic conditions are included in Attachment D.

TABLE 6: INTERSECTION ANALYSIS FOR HORIZON YEAR CONDITIONS

#	Intersection	Traffic Control[2]	Delay[1] (secs.) AM	Delay[1] (secs.) PM	Level of Service AM	Level of Service PM	Jurisdiction(s) / LOS Standard[3]
1	Rockefeller Av. & Jurupa St.	TS	61.7	30.7	E	C	Ontario / LOS E

[1] Per the Highway Capacity Manual (6th Edition), overall average intersection delay and level of service are shown for intersections with a traffic signal or all way stop control. For intersections with cross street stop control, the delay and level of service for the worst individual movement (or movements sharing a single lane) are shown.

[2] TS = Traffic Signal

FINDINGS

The City of Ontario adheres to the San Bernardino County Transportation Authority (**SBCTA**) Recommended Traffic Impact Analysis Guidelines for Vehicle Miles Traveled and Level of Service Assessment (dated February 2020, by Fehr & Peers) which has been used to determine whether additional traffic analysis is necessary for the proposed Project. The existing and future westbound right turn volume at the intersection of Rockefeller Avenue and Jurupa Street is less than 300 vehicles per hour during the peak hours. In addition, the intersection is anticipated to operate at an acceptable LOS with the existing lane geometrics, so the intersection operations do not suggest additional capacity (such as a right turn lane) are necessary to maintain acceptable peak hour operations.

If you have any questions or comments, I can be reached at cso@urbanxroads.com.

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

DEVELOPMENT ADVISORY BOARD DECISION

September 18, 2023

303 East B Street, Ontario, California 91764 Phone: 909.395.2036 / Fax: 909.395.2420

DECISION NO.: [insert #]

DECISION NO.: [insert #]

FILE NOS.: PMTT22-025 (TPM 20559) and PDEV22-034

DESCRIPTION: A public hearing to consider Tentative Parcel Map No. 20559 (File No. PMTT22-025) to consolidate two existing parcels on site into one to facilitate a Development Plan (File No. PDEV22-034) to raze approximately 161,320 square feet of commercial buildings and construct one 344,110 square-foot industrial building, on 16.65 acres of land generally located at the southeast corner of Rockefeller Avenue and Wanamaker Avenue, within the proposed Light Industrial Land Use Designation of the California Commerce Center Specific Plan (APNs: 0238-201-41 and 0238-221-22); **submitted by Link Logistics Real Estate Management LLC.**

PART 1: BACKGROUND & ANALYSIS

LINK LOGISTICS REAL ESTATE MANAGEMENT LLC, (herein after referred to as "Applicant") has filed an application requesting approval of Tentative Parcel Map No. 20559, File No. PMTT22-025 and a Development Plan, File No. PDEV22-034, as described in the subject of this Decision (herein after referred to as "Application" or "Project").

PROJECT SETTING: The Project site is comprised of 16.65 acres of land located at the southeast corner of Rockefeller and Wanamaker Avenues and is depicted in Figure 1: Project Location. Existing land uses, Policy Plan (general plan) and zoning designations, and specific plan land uses on and surrounding the Project site are as follows:

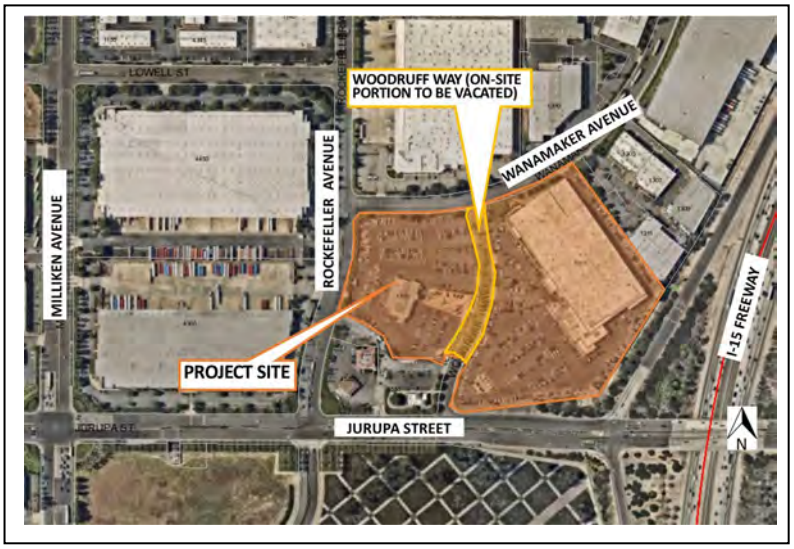

Figure 1: Project Location

	Existing Land Use	*Policy Plan Land Use Designation*	*Zoning Designation*	*Specific Plan Land Use Designation*
Site:	Retail and Service – Car Dealership	Industrial (IND): 0.55 FAR	California Commerce Center Specific Plan	Light Industrial (Proposed)
North:	Industrial	Industrial (IND): 0.55 FAR	California Commerce Center Specific Plan	Light Industrial
South:	Commercial – Gas Station and Fast Food Drive-Thru	Industrial (IND): 0.55 FAR	California Commerce Center Specific Plan	Commercial / Food / Hotel
East:	Interstate-15 Freeway (I-15)	N/A	N/A	N/A
West:	Industrial	Industrial (IND): 0.55 FAR	California Commerce Center Specific Plan	Light Industrial

PROJECT ANALYSIS:

(1) Background — On August 16, 2022, The Ontario City Council certified The Ontario Plan 2050 Supplemental Environmental Impact Report ("TOP 2050 SEIR", State Clearinghouse No. 2021070364, in conjunction with File No. PGPA20-002). The Ontario Plan and associated Supplemental Environmental Impact Report analyzed the Project site and established the land use designation and guidelines for development, including but not limited to, general land use (industrial), maximum FAR (0.55), and assumed building area (approximately 398,900 square feet).

The Project site and the surrounding properties have been zoned for industrial and commercial development since the California Commerce Center Specific Plan ("Specific Plan") was established in January of 1983. Prior to redevelopment of the site for industrial and commercial land uses, the site was historically used for agricultural crops – predominantly citrus orchards.

The Project site is currently developed with a new and used car dealership (Citrus Motors, including Citrus Kia and Citrus Ford). Daily operations include retail sales and motor vehicle servicing activities, including a wash bay and paint booth. The dealership facilities have a combined commercial floor area of 161,320 square feet, which translates to a Floor Area Ratio ("FAR") of 0.22.

On July 18, 2022, the Applicant submitted Tentative Parcel Map No. 20559 (File No. PMTT22-025) and a Development Plan application (File No. PDEV22-034) to facilitate the development of one industrial building totaling 344,110 square feet. The Development Plan also proposes to raze the existing commercial buildings. The Applicant also submitted an amendment to the California Commerce Center Specific Plan (File No. PSPA22-006) to bring the Project site's zoning into compliance with TOP 2050's Industrial land use designation and includes graphic and textural modifications throughout the document.

The Development Advisory Board is tasked with reviewing the Development Plan and Tentative Parcel Map and making recommendations to the Planning Commission for final action. The Planning Commission is tasked with reviewing the Specific Plan Amendment and making a recommendation to the City Council for final action.

(2) Tentative Parcel Map No. 20559 (File No. PMTT22-025) – The Applicant submitted Tentative Parcel Map No. 20559 to combine two existing parcels into one parcel and vacate a portion of Woodruff Way, to accommodate the development of one industrial building on 16.65 acres of land (see Exhibit B: Tentative Parcel Map No. 20559). The proposed parcel exceeds the Specific Plan's minimum parcel size of one acre. While the Specific Plan does not establish minimum lot dimensions, and while the parcel will be irregular in shape, the parcel will also exceed the minimum equivalent Light Industrial zoning district dimensions outlined in the Development Code (100-foot width and 100-foot depth), with an average width of 356 feet and average length of 960 feet.

(3) Development Plan (File No. PDEV22-034)

(a) Site Design/Building Layout — The Project site is generally bounded on three sides by public rights-of-way, including Rockefeller Avenue on the west, Wanamaker Avenue on the north, the proposed termination cul-de-sac of Woodruff Way and Jurupa Street to the south, and the Interstate 15 ("I-15") Freeway along the southeast oblique. The northeast oblique is an interior property line shared with the parcel to the east of the Project site. One industrial building will be constructed along the northern portion of the lot (see Exhibit C - Site Plan).

The proposed building will be 344,110 square feet in area and result in a FAR of 0.48. The building will be largely rectangular in shape and sited in an east-west orientation, with enhanced building frontages facing Rockefeller and Wanamaker Avenues. Dock-high loading doors will face the southerly property line and will largely be screened from public view by a combination of a 14-foot-high concrete screen wall, extensive landscape planter, and the existing commercial development located to the southwest of the site. Portions of the adjacent rights-of-way to the south (I-15 off-ramp and Jurupa Street) are situated at a higher elevation than the Project site (approximately 10- to 24-foot grade difference) and motorists could have unobstructed views of the loading area. In response to the potential visibility of this area, the Applicant has made good-faith efforts to reduce the visual impact by providing additional architectural treatment (metal canopies, glazing, reveal lines, and varied parapet heights) and replacement of the existing chain link fence with a 14-foot-high concrete screen wall, painted and treated to match the building (see Exhibit F – Conceptual Renderings).

(b) Site Access/Circulation —Vehicular access to the parcel is available from two points along both Rockefeller and Wanamaker Avenues. Truck access is available from driveways along both Rockefeller and Wanamaker Avenues, and a driveway from the proposed Woodruff Way cul-de-sac. Pedestrian access to the site is available from Rockefeller and Wanamaker Avenues. No pedestrian access is proposed along Woodruff Way.

(c) Parking — The Project has provided off-street parking pursuant to the "Warehouse and Distribution" parking standards specified in the Development Code. The Project provides 183 passenger vehicle parking spaces and 64 trailer parking spaces, which meet the minimum parking requirements. The off-street parking calculations for the Project are summarized in the table below:

Parking Summary

Type of Use	***Building Area (in SF)***	***Parking Ratio***	***Spaces Required***	***Spaces Provided***
Warehouse / Distribution	334,110 SF warehouse plus 10,000 SF office (344,110 SF total)	One space per 1,000 SF (0.001/SF) for portion of GFA <20,000 SF, plus 0.5 space per 1,000 SF (0.0005/SF) for GFA > 20,000 SF.	182	183
Office	*10,000 SF (0.3 percent of GFA)*	*4 spaces per 1,000 SF (0.004/SF) of GFA.* ***Parking is required when "general business offices" and other associated uses exceed 10 percent of the building GFA.***	*0*	*0*
TOTAL			**182**	**183**
Trailer Parking	55 dock high doors	1 space per 4 dock-high loading doors	14	64

The Development Code requires a more intense parking rate for general business offices and other associated uses, at a rate of four spaces per 1,000 square feet of gross floor area; however, this requirement is only applied when the office square footage exceeds 10 percent of the building's gross floor area. As the proposed office square footage is 10,000 square feet, or 0.3 percent of the building, the square footage for the office is calculated under the Warehouse and Distribution standards.

(d) Architecture — The Applicant proposed a concrete tilt-up industrial building incorporating a contemporary industrial architectural style that will complement the existing industrial buildings surrounding the Project site. The design utilizes various architectural treatments to help break down the building's massing and provide visual interest from each public right-of-way (see Exhibit E: Elevations). Design elements include:

- Unique wood paneling;
- Horizontal and vertical reveal lines to break down the massing;
- Color blocking to provide visual interest;
- Glazing at the main entry and spaced throughout the elevations;
- Decorative metal entry canopies and window "eyebrows";
- Recessed and protruding panels to bring visual changes to the building planes; and
- Varying parapet heights to further break down the massing and provide visual interest.

(e) Landscaping — The Project proposes landscaping along the entire perimeter of the site and adjacent to exterior building walls (see Exhibit G: Conceptual Landscape Plan). A 35-foot landscape area has been provided along the northerly elevation of the building, and a 70-foot-deep landscape area (average) along the southerly property line, which will help to soften the appearance of the architecture and truck parking lot. Per the Ontario Development Code, a minimum of 15 percent landscape coverage is required for corner lots, and 15.5 percent landscaping has been provided, which meets the requirement. A variety of plantings are proposed in a variety of box and gallon sizes, including:

- Trees: Western Redbud, Golden Raintree, Brisbane Box, Fruitless Olive, Date Palm, Aleppo and Canary Island Pines, Italian Cypress, Arizona Sycamore, and Live and Engelmann Oaks in 24-inch to 48-inch box containers.
- Shrubs: Century Plant, Dwarf Bottlebrush, Mediterranean Fan Palm, Flax Lily, Red Yucca, Deer Grass, Heavenly Bamboo, Coffeeberry, Blue Gem Coast Rosemary, and Texas Sage.
- Groundcovers: Dwarf Coyote Bush, Japanese Honeysuckle, Putah Creek Myoporum, and Huntington Carpet Rosemary.
- Screening plants: Flax Lily, Soft Leaf Yucca, and Striped Fortnight Lily.

(f) Signage — All project signage is required to comply with sign regulations provided in Ontario Development Code Division 8.1. Prior to the issuance of a Building Permit for the installation of any new on-site signage, the Applicant is required to submit Sign Plans for Planning Department review and approval.

(g) Utilities (drainage, sewer) — Public utilities (water and sewer) are available to serve the Project. Furthermore, the Applicant has submitted a Preliminary Water Quality Management Plan ("PWQMP"), which establishes the Project's compliance with storm water discharge/water quality requirements. The PWQMP includes site design measures that capture runoff and pollutant transport by minimizing impervious surfaces and maximizes low impact development ("LID") best management practices ("BMPs"), such as retention and infiltration, biotreatment, and evapotranspiration. The PWQMP proposes the use of underground stormwater retention chambers where downstream landscaped areas are limited. Any overflow drainage will be conveyed to the public street by way of parkway drains and culverts.

PUBLIC NOTIFICATION: Public notification is not required, as the Development Advisory Board is acting in its capacity as an advisory body to the Planning Commission. Public notification is required prior to the Planning Commission hearing on the Project.

CORRESPONDENCE: As of the preparation of this Decision, Planning Department staff has not received any written or verbal communications from the owners of properties surrounding the project site or from the public in general, regarding the subject application.

AGENCY/DEPARTMENT REVIEWS: Each City agency/department has been provided the opportunity to review and comment on the subject application and recommend conditions of approval to be imposed upon the application. At the time of the Decision preparation, recommended conditions of approval were provided and are included with this Decision.

AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE: The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

On April 19, 2011, the City Council of the City of Ontario approved and adopted the ONT ALUCP, establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the recommending body for the Project, the Development Advisory Board has reviewed and considered the facts and information contained in the Application and supporting documentation against the ONT ALUCP compatibility factors, including [1] Safety Criteria (ONT ALUCP Table 2-2) and Safety Zones (ONT ALUCP Map 2-2), [2] Noise Criteria (ONT ALUCP Table 2-3) and Noise Impact Zones (ONT ALUCP Map 2-3), [3] Airspace protection Zones (ONT ALUCP Map 2-4), and [4] Overflight Notification Zones (ONT ALUCP Map 2-5). As a result, the Development Advisory Board, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ONT ALUCP.

ENVIRONMENTAL REVIEW: An Addendum to The Ontario Plan 2050 Supplemental Environmental Impact Report (State Clearinghouse No. 2021070364, certified by the Ontario City Council on August 16, 2022, in conjunction with File No. PGPA20-002) was filed for this Project. File No. PGPA20-002 established the underlying TOP 2050 (General Plan) Land Use Plan designation of Industrial (IND, 0.55 FAR) on the project site. The related Specific Plan Amendment will bring the Project site into compliance with TOP 2050 Land Use Plan. The Addendum prepared for the Project does not preclude the imposition of any mitigation measures as laid forth in TOP 2050 SEIR and said mitigation measures are included by reference in the Project conditions of approval. The Addendum also included studies and assessments to support the findings that the Project will not have a significant environmental affect not already covered by TOP 2050 SEIR (see Appendices A through G.3 to Attachment A – Addendum of the related DAB Agenda Report for the Addendum).

COMPLIANCE WITH THE ONTARIO PLAN: The proposed Project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (general plan), and City Council Priorities components of The Ontario Plan ("TOP"). More

specifically, the goals and policies of TOP that are furthered by the proposed project are as follows:

(1) City Council Goals.

- Invest in the Growth and Evolution of the City's Economy
- Operate in a Businesslike Manner

(2) Governance.

Decision Making:

- Goal G1: Sustained decision-making that consistently moves Ontario towards its Vision by using The Ontario Plan as a framework for assessing choices.

➢ G 1-2. Long-term Benefit. We require decisions to demonstrate and document how they add value to the community and support the Ontario Vision.

(3) Policy Plan (General Plan)

Land Use Element:

➢ LU-1.6 Complete Community. We incorporate a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, employers, workers, and visitors have a wide spectrum of choices of where they can live, work, shop and recreate within Ontario.

- Goal LU-2 Compatibility: Compatibility between a wide range of uses and a resultant urban patterns and forms.

➢ LU-2.6 Infrastructure Compatibility. We require infrastructure to be aesthetically pleasing and in context with the community character.

Community Economics Element:

- Goal CE-2 Placemaking: A City of distinctive neighborhoods, districts, corridors.

➢ CE-2.1 Development Projects. We require new development and redevelopment to create unique, high-quality places that add value to the community.

➢ CE-2.2 Development Review. We require those proposing new development and redevelopment to demonstrate how their projects will create appropriately unique, functional, and sustainable places that will compete well with their competition within the region.

➢ CE-2.4 Protection of Investment. We require that new development and redevelopment protect existing investment by providing architecture and urban design of equal or greater quality.

➢ CE-2.5 Private Maintenance. We require adequate maintenance, upkeep, and investment in private property because proper maintenance on private property protects property values.

Safety Element:

▪ Goal S-1 Seismic & Geologic Hazards: Minimized risk of injury, loss of life, property damage, and economic and social disruption caused by earthquake-induced and other geologic hazards.

➢ S-1.2 Entitlement and Permitting Process. We follow state guidelines and the California Building Code to determine when development proposals must conduct geotechnical and geological investigations.

Community Design Element:

▪ Goal CD-1 Image & Identity: A dynamic, progressive city containing distinct and complete places that foster a positive sense of identity and belonging among residents, visitors, and businesses.

➢ CD-1.1 City Identity. We take actions that are consistent with the City being a leading urban center in Southern California while recognizing, enhancing, and preserving the character of our existing viable neighborhoods.

➢ CD-1.3 Existing Neighborhoods. We require the existing character of viable residential and non-residential neighborhoods be preserved, protected, and enhanced.

▪ Goal CD-2 Design Quality: A high level of design quality resulting in neighborhoods, public spaces, parks, and streetscapes that are attractive, safe, functional, human-scale, and distinct.

➢ CD-2.1 Quality Building Design and Architecture. We encourage all development projects to convey visual interest and character through:

- Building volume, massing, and height to provide context-appropriate scale and proportion;
- A true architectural style which is carried out in plan, section, and elevation through all aspects of the building and site design and appropriate for its setting; and
- Exterior building materials that are articulated, high quality, durable, and appropriate for the architectural style.

➢ CD-2.7 Sustainability. We collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping, and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials, and construction techniques.

➢ CD-2.8 Safe Design. We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintaining visibility and accessibility, and using lighting.

➢ CD-2.9 Landscape Design. We encourage durable, sustainable, and drought-tolerant landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits.

➢ CD-2.10 Parking Areas. We require all development, including single-family residential, to minimize the visual impact of surface, structured, and garage parking areas visible from the public realm in an aesthetically pleasing, safe and environmentally sensitive manner. Examples include:

- Surface parking: Shade trees, pervious surfaces, urban run-off capture and infiltration, and pedestrian paths to guide users through the parking field;

➢ CD-2.12 Site and Building Signage. We encourage the use of sign programs that utilize complementary materials, colors, and themes. Project signage should be designed to effectively communicate and direct users to various aspects of the development and complement the character of the structures.

➢ CD-2.13 Entitlement Process. We work collaboratively with all stakeholders to ensure a high degree of certainty in the efficient review and timely processing of all development plans and permits.

▪ Goal CD-5 Protection of Investment: A sustained level of maintenance and improvement of properties, buildings, and infrastructure that protects the property values and encourages additional public and private investments.

➢ CD-5.1 Maintenance of Buildings and Property. We require all public and privately-owned buildings and property (including trails and easements) to be properly and consistently maintained.

➢ CD-5.2 Maintenance of Infrastructure. We require the continual maintenance of infrastructure.

HOUSING ELEMENT COMPLIANCE: The Project is consistent with the Housing Element of the Policy Plan (general plan) component of The Ontario Plan, as the project site is not one of the properties in the Housing Element Sites contained in Tables B-1 and B-2 (Housing Element Sites Inventory) of the Housing Element Technical Report.

PART 2: RECITALS

WHEREAS, the Application is a Project pursuant to the California Environmental Quality Act (Public Resources Code Section 21000 et seq.) ("CEQA") and an initial study has been prepared to determine possible environmental impacts; and

WHEREAS, The Ontario Plan 2050 Supplemental Environmental Impact Report (State Clearinghouse No. 2021070364) was certified on August 16, 2022, (hereinafter referred to as "Certified SEIR"), in which development and use of the Project site was discussed; and

WHEREAS, the Planning Director of the City of Ontario has prepared and approved for attachment to the Certified SEIR, an Addendum to the Certified SEIR (hereinafter referred to as "SEIR Addendum") in accordance with the requirements of the California Environmental Quality Act of 1970, together with State and local guidelines implementing said Act, all as amended to date (collectively referred to as "CEQA"); and

WHEREAS, the SEIR Addendum concluded that implementation of the Project could result in a number of significant effects on the environment that were previously analyzed in the Certified SEIR, and that the Certified SEIR identified mitigation measures that would reduce each of those significant effects to a less-than-significant level; and

WHEREAS, pursuant to State CEQA Guidelines Section 15164(a), a lead agency shall prepare an addendum to a previously certified EIR if some changes or additions are necessary to a project, but the preparation of a subsequent or supplemental EIR is not required; and

WHEREAS, the City determined that none of the conditions requiring preparation of a subsequent or supplemental EIR would occur from the Project, and that preparation of an Addendum to the Certified SEIR was appropriate; and

WHEREAS, the City of Ontario is the lead agency on the Project, and the Development Advisory Board (hereinafter referred to as "DAB") is the recommending authority for the requested approval to construct and otherwise undertake the Project; and

WHEREAS, the DAB has reviewed and considered the SEIR Addendum and related documents for the Project, and intends to take actions on the Project in compliance with CEQA and state and local guidelines implementing CEQA; and

WHEREAS, the SEIR Addendum and related documents are on file in the City of Ontario Planning Department, located at 303 East B Street, Ontario, CA 91764, and are available for inspection by any interested person at that location and are, by this reference, incorporated into this Decision as if fully set forth herein; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Development Advisory Board (hereinafter referred to as "DAB") the responsibility and authority to review and make recommendation to the Planning Commission on the subject Application; and

WHEREAS, all members of the DAB of the City of Ontario were provided the opportunity to review and comment on the Application, and no comments were received opposing the proposed development; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (hereinafter referred to as "ONT ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, as the first action on the Project, on September 18, 2023, the DAB issued a Decision recommending the Planning Commission make a recommendation of approval to the City Council of the SEIR Addendum, finding that the proposed Project introduces no new significant environmental impacts and applying all previously adopted mitigation measures to the Project, which were incorporated by reference; and

WHEREAS, on September 18, 2023, the DAB of the City of Ontario conducted a hearing on the Application and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Decision have occurred.

PART 3: THE DECISION

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED AND DECIDED by the Development Advisory Board of the City of Ontario as follows:

SECTION 1: Environmental Determination and Findings. As the recommending body for the Project, the DAB has reviewed and considered the information contained in the Addendum, the initial study, and the administrative record for the Project, including all written and oral evidence provided during the comment period. Based upon the facts and information contained in the Addendum, the initial study, and the administrative record, including all written and oral evidence presented to the DAB, the DAB finds as follows:

(1) The environmental impacts of the Project were reviewed in conjunction with an Addendum to The Ontario Plan 2050 Supplemental Environmental Impact Report (State Clearinghouse No. 2021070364, certified by the Ontario City Council on August 16, 2022, in conjunction with File No. PGPA20-002); and

(2) The SEIR Addendum and administrative record have been completed in compliance with CEQA, the State CEQA Guidelines, and the City of Ontario Local CEQA Guidelines; and

(3) The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. This Application introduces no new significant environmental impacts; and

(4) All previously adopted mitigation measures shall be a condition of project approval, as they are applicable to the Project, and are incorporated herein by this reference; and

(5) The SEIR Addendum contains a complete and accurate reporting of the environmental impacts associated with the Project, and reflects the independent judgment of the DAB; and

(6) There is no substantial evidence in the administrative record supporting a fair argument that the Project may result in significant environmental impacts.

SECTION 2: Subsequent or Supplemental Environmental Review Not Required. Based on the SEIR Addendum, all related information presented to the DAB, and the specific findings set forth in Section 1, above, the DAB finds that the preparation of a subsequent or supplemental Certified SEIR is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified SEIR that will require major revisions to the Certified SEIR due to the involvement of new significant

environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified SEIR was prepared, that will require major revisions to the Certified SEIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified SEIR was certified/adopted, that shows any of the following:

(a) The Project will have one or more significant effects not discussed in the Certified SEIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified SEIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified SEIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3: Housing Element Compliance. Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the recommending body for the Project, the DAB finds that based on the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the Project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the Project site is not one of the properties in the Housing Element Sites contained in Tables B-1 and B-2 (Housing Element Sites Inventory) of the Housing Element Technical Report.

SECTION 4: Concluding Facts and Reasons. Based upon the substantial evidence presented to the DAB during the above-referenced hearing and upon the facts and information set forth in Parts I (Background and Analysis) and II (Recitals), above, and the determinations set forth in Sections 1 through 3, above, the DAB hereby concludes as follows:

(1) Tentative Parcel Map

a. *The proposed Tentative Parcel Map is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, and applicable area and specific plans, and planned*

unit developments. The proposed Tentative Parcel Map is located within the Industrial (0.55 FAR) land use district of the Policy Plan Land Use Map, and the proposed Light Industrial land use district of the California Commerce Center Specific Plan. The proposed subdivision is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, as the Project will contribute to the establishment of "[a] dynamic, progressive city containing distinct and complete places that foster a positive sense of identity and belonging among residents, visitors, and businesses" (Goal CD-1). Furthermore, the Project will promote the City's policy to "take actions that are consistent with the City being a leading urban center in Southern California while recognizing, enhancing, and preserving the character of our existing viable neighborhoods" (Policy CD-1.1 *City Identity).* With implementation of the Project's conditions of approval, the proposed Project will raze an existing commercial site and facilitate the development of a well-designed industrial building on the under-developed Project site*; and*

b. *The design or improvement of the proposed Tentative Parcel Map is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, and applicable specific plans and planned unit developments.* The proposed Tentative Parcel Map is located within the Industrial (0.55 FAR) land use district of the Policy Plan Land Use Map, and the proposed Light Industrial land use district of the California Commerce Center Specific Plan. The proposed design or improvement of the subdivision is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, as the Project will provide "[a] high level of design quality resulting in neighborhoods, commercial areas, public spaces, parks, and streetscapes that are attractive, safe, functional, human-scale, and distinct" (Goal CD-2). Furthermore, the Project will promote the City's policy to "collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping, and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials, and construction techniques" (Policy CD-2.7 *Sustainability); and*

c. *The site is physically suitable for the type of development proposed.* The Project site meets the minimum lot area and dimensions of the proposed Light Industrial land use district of the California Commerce Center Specific Plan and the equivalent Light Industrial zoning district in the Ontario Development Code, and is physically suitable for the type of industrial development proposed in terms of zoning, land use and development activity proposed, and existing and proposed site conditions. The Project proposes to raze the existing commercial site and construct a well-designed industrial building and associated site improvements, such as landscaping, infrastructure, and safe adjacent rights-of-way; and

d. *The site is physically suitable for the density/intensity of development proposed.* The Project site is proposed for industrial development at a floor area ratio of 0.55. The Project site meets the minimum lot area and dimensions of the Ontario

Development code and the proposed Light Industrial land use district of the California Commerce Center Specific Plan and is physically suitable for this proposed intensity of development. While the Specific Plan does not establish minimum lot dimensions, and while the parcel will be irregular in shape, the parcel will also exceed the minimum comparable Light Industrial zoning district dimensions outlined in the Development Code (100-foot width and 100-foot depth), with an average width of 356 feet and average length of 960 feet. The Specific Plan requires a minimum lot size of 1.0 acre, which the proposed 16.67-acre parcel will satisfy; and

e. *The design of the subdivision or the proposed improvements thereon, are not likely to cause substantial environmental damage, or substantially and avoidably injure fish or wildlife, or their habitat.* The Project site is not located in an area that has been identified as containing species identified as a candidate, sensitive, or special status species in local or regional plans, policies or regulations or by the California Department of Fish and Wildlife or the U.S. Fish and Wildlife Service, nor does the site contain any riparian habitat or other sensitive natural community, and no wetland habitat is present on site; therefore, the design of the subdivision, or improvements proposed thereon, are not likely to cause substantial environmental damage, or substantially and avoidably injure fish or wildlife, or their habitat. The Project site is currently built out with a commercial land use (new and used vehicle retail sales and vehicle servicing facilities). Further, the Project site is surrounded by developed land, adjacent to the I-15 Freeway, and is not suitable for habitat; and

f. *The design of the subdivision, or the type of improvements thereon, are not likely to cause serious public health problems.* The design of the proposed subdivision, and the industrial improvements proposed on the Project site, are not likely to cause serious public health problems, as the Project is not anticipated to involve the transport, use, or disposal of hazardous materials during either construction or Project implementation, include the use of hazardous materials or volatile fuels, nor are there any known stationary commercial or industrial land uses within close proximity to the subject site that use/store hazardous materials to the extent that they would pose a significant hazard to visitors or occupants to the Project site. A Phase I Environmental Site Assessment ("ESA") was completed for the site and did not find the presence of any recognized hazardous substances. However, out of an abundance of caution, additional findings related to non-scope considerations, such as asbestos, mold, lead, and radon, were made. The preliminary studies did not find any additional hazards. Furthermore, additional studies/inspections are required as part of the standard Building Permit process, which will further mitigate any potential exposure to hazardous substances; and

g. *The design of the subdivision, or the type of improvements thereon, will not conflict with easements acquired by the public at large for access through, or use of property within, the proposed subdivision.* The proposed subdivision has provided for all necessary public easements and dedications for access through, or use of property within, the proposed subdivision. Furthermore, all such public easements and dedications have been designed pursuant to: (a) the requirements of the Policy Plan component of The Ontario Plan and applicable area plans; (b) applicable specific plans or planned

unit developments; (c) applicable provisions of the City of Ontario Development Code; (d) applicable master plans and design guidelines of the City; and (e) applicable Standard Drawings of the City.

(2) Development Plan

a. *The proposed development at the proposed location is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan.* The proposed Project is located within the Industrial (0.55 FAR) land use district of the Policy Plan Land Use Map, and the proposed Light Industrial land use district of the California Commerce Center Specific Plan. The development standards and conditions under which the proposed Project will be constructed and maintained, is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan. With the Project conditions of approval, the development standards and conditions under which the proposed Project will be constructed and maintained are consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan. The proposed Project will contribute a well-designed building to the existing industrial neighborhood, as well as provide landscape, drainage, parking, sidewalks, and other visual and safety improvements; and

b. *The proposed development is compatible with those on adjoining sites in relation to location of buildings, with particular attention to privacy, views, any physical constraint identified on the site and the characteristics of the area in which the site is located.* The Project has been designed consistent with the requirements of the City of Ontario Development Code and the proposed Light Industrial land use district of the California Commerce Center Specific Plan, including standards relative to the particular land use proposed (industrial), as-well-as building intensity, building and parking setbacks, building height, number of off-street parking and loading spaces, on-site and off-site landscaping, and fences, walls and obstructions. The Project will raze the existing commercial structures and replace them with an industrial building within an existing industrial corridor and adjacent to other industrial land uses. As such, the Project will not impose any impacts to privacy or views; and

c. *The proposed development will complement and/or improve upon the quality of existing development in the vicinity of the Project and the minimum safeguards necessary to protect the public health, safety and general welfare have been required of the proposed Project.* The Development Advisory Board has required certain safeguards, and imposed certain conditions of approval, which have been established to ensure that: [i] the purposes of the Development Code and California Commerce Center Specific Plan are maintained; [ii] the Project will not endanger the public health, safety or general welfare; [iii] the Project will not result in any significant environmental impacts; [iv] the Project will be in harmony with the area in which it is located; and [v] the Project will be in full conformity with the Vision, City Council Priorities and Policy Plan components of The Ontario Plan, and the Development Code and California Commerce

Center Specific Plan. With implementation of the Project's conditions of approval, the Project will improve upon the under-utilized site with a well-designed new building, as well as upgraded paving, infrastructure, and landscaping; and

d. *The proposed development is consistent with the development standards and design guidelines set forth in the Development Code, or applicable specific plan or planned unit development*. The proposed Project has been reviewed for consistency with the general development standards and guidelines of the Development Code and California Commerce Center Specific Plan that are applicable to the proposed Project, including building intensity, building and parking setbacks, building height, amount of off-street parking and loading spaces, parking lot dimensions, design and landscaping, bicycle parking, on-site landscaping, and fences and walls, as-well-as those development standards and guidelines specifically related to the particular land use being proposed (industrial). As a result of this review, the Development Advisory Board has determined that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the development standards and guidelines described in the Development Code and California Commerce Center Specific Plan.

SECTION 5: Development Advisory Board Action. Based on the findings and conclusions set forth in Sections 1 through 4, above, the DAB hereby recommends that the Planning Commission APPROVES the Application subject to each and every condition set forth in the Conditions of Approval included as Attachment A - File No. PMTT22-025 Conditions of Approval and Attachment B – File No. PDEV22-034 Conditions of Approval of this Decision, and incorporated herein by this reference.

SECTION 6: Indemnification. The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 7: Custodian of Records. The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario. The records are available for inspection by any interested person, upon request.

Project Description: Tentative Parcel Map No. 20559 to consolidate two existing parcels on site into one, on 16.65 acres of land generally located at the southeast corner of Rockefeller Avenue and Wanamaker Avenue, within the proposed Light Industrial Land Use Designation of the California Commerce Center Specific Plan**;** (APNs: 0238-201-41 and 0238-221-22); **submitted by Link Logistics Real Estate Management LLC.**

Prepared By: Alexis Vaughn, Associate Planner
Phone: 909.395.2416 (direct)
Email: avaughn@ontarioca.gov

The Planning Department, Land Development Section, conditions of approval applicable to the above-described Project, are listed below. The Project shall comply with each condition of approval listed below:

1.0 Standard Conditions of Approval. The project shall comply with the *Standard Conditions for New Development*, adopted by City Council Resolution No. 2017-027 on April 18, 2017. A copy of the *Standard Conditions for New Development* may be obtained from the Planning Department or City Clerk/Records Management Department.

2.0 Special Conditions of Approval. In addition to the *Standard Conditions for New Development* identified in condition no. 1.0, above, the project shall comply with the following special conditions of approval:

2.1 Time Limits.

(a) Tentative Parcel Map approval shall become null and void 2 years following the effective date of application approval, unless the final parcel/tract map has been recorded, or a time extension has been approved by the Planning Commission pursuant to Development Code Section 2.02.025 (Time Limits and Extensions). This Permit does not supersede any individual time limits specified herein for performance of specific conditions or improvements.

2.2 Subdivision Map.

(a) The Final Parcel Map shall be in conformance with the approved Tentative Parcel Map on file with the City. Variations rom the approved Tentative Parcel Map may be reviewed and approved by the Planning Department. A substantial variation from the approved Tentative Parcel Map may require review and approval by the Planning Commission, as determined by the Planning Director.

(b) Tentative Parcel Map approval shall be subject to all conditions, requirements and recommendations from all other departments/agencies provided on the attached reports/memorandums.

(c) Pursuant to California Government Section 66474.9, the subdivider agrees that it will defend, indemnify, and hold harmless the City of Ontario or its agents, officers and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer of this subdivision, which action is brought within the time period provided for in Government Code Section 66499.37. The City of Ontario shall promptly notify the subdivider of any such claim, action or proceeding and the City of Ontario shall cooperate fully in the defense.

2.3 General Requirements. The Project shall comply with the following general requirements:

(a) All construction documentation shall be coordinated for consistency, including, but not limited to, architectural, structural, mechanical, electrical, plumbing, landscape and irrigation, grading, utility and street improvement plans. All such plans shall be consistent with the approved entitlement plans on file with the Planning Department.

(b) The project site shall be developed in conformance with the approved plans on file with the City. Any variation from the approved plans must be reviewed and approved by the Planning Department prior to building permit issuance.

(c) The herein-listed conditions of approval from all City departments shall be included in the construction plan set for project, which shall be maintained on site during project construction.

2.4 Landscaping.

(a) The Project shall provide and continuously maintain landscaping and irrigation systems in compliance with the provisions of Ontario Development Code Division 6.05 (Landscaping).

(b) Comply with the conditions of approval of the Planning Department; Landscape Planning Division.

2.5 Walls and Fences. All Project walls and fences shall comply with the requirements of Ontario Development Code Division 6.02 (Walls, Fences and Obstructions).

2.6 Parking, Circulation and Access.

(a) The Project shall comply with the applicable off-street parking, loading and lighting requirements of City of Ontario Development Code Division 6.03 (Off-Street Parking and Loading).

(b) All drive approaches shall be provided with an enhanced pavement treatment. The enhanced paving shall extend from the back of the approach apron, into the site,

to the first intersecting drive aisle or parking space. Precise grading/civil plans shall adequately denote enhanced pavement *on the plan set*, by means of hashing and a legend call-out providing colors, materials, and design details. All details shall be coordinated for consistency with the Project's other plan checks, including architectural and landscape plans. Civil/grading plans shall not simply state "see landscape plan" for enhanced pavement details.

(c) Parking spaces specifically designated and conveniently located for use by the physically disabled shall be provided pursuant to current accessibility regulations contained in State law (CCR Title 24, Part 2, Chapters 2B71, and CVC Section 22507.8).

(d) Bicycle parking facilities, including bicycle racks, lockers, and other secure facilities, shall be provided in conjunction with development projects pursuant to current regulations contained in CALGreen (CAC Title 24, Part 11). Final design and placement of bicycle parking facilities shall be subject to Planning Department review and approval.

2.7 Sound Attenuation. The Project shall be constructed and operated in a manner so as not to exceed the maximum interior and exterior noise levels set forth in Ontario Municipal Code Title 5 (Public Welfare, Morals, and Conduct), Chapter 29 (Noise).

2.8 Environmental Requirements.

(a) If human remains are found during project grading/excavation/construction activities, the area shall not be disturbed until any required investigation is completed by the County Coroner and Native American consultation has been completed (if deemed applicable).

(b) If any archeological or paleontological resources are found during project grading/excavation/construction, the area shall not be disturbed until the significance of the resource is determined. If determined to be significant, the resource shall be recovered by a qualified archeologist or paleontologist consistent with current standards and guidelines, or other appropriate measures implemented.

2.9 Indemnification. The applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer. The City of Ontario shall promptly notify the applicant of any such claim, action or proceeding, and the City of Ontario shall cooperate fully in the defense.

2.10 Additional Fees.

(a) Within 5 days following final application approval, the Notice of Determination ("NOD") filing fee shall be provided to the Planning Department. The fee shall be paid by check, made payable to the "Clerk of the Board of Supervisors", which shall be forwarded to the San Bernardino County Clerk of the Board of Supervisors, along with all applicable environmental forms/notices, pursuant to the requirements of the California Environmental Quality Act ("CEQA"). Failure to provide said fee within the time specified will result in the extension of the statute of limitations for the filing of a CEQA lawsuit from 30 days to 180 days.

(b) After the Project's entitlement approval, and prior to issuance of final building permits, the Planning Department's Plan Check and Inspection fees shall be paid at the rate established by resolution of the City Council.

2.11 Related Applications. Tentative Parcel Map approval shall not be final and complete until such time that related File No. PDEV22-034 has been approved by the Planning Commission and the Addendum to TOP 2050 SEIR and File No. PSPA22-006 have been approved by the City Council.

DAB MEETING DATE:	**September 6, 2023**
PROJECT NAME / DESCRIPTION:	**A Tentative Parcel Map to create one parcel in conjunction with a request to construct one industrial building located within the California Commerce Center Specific Plan.**
LOCATION:	**1350 and 1375 Woodruff Way (APN: 0238-201-41, 0238-221-22)**
APPLICANT:	**B9 Wanamaker Owner LLC**
REVIEWED BY:	Raymond Lee, P.E. Assistant City Engineer — Date: 8/21/23
APPROVED BY:	Khoi Do, P.E. City Engineer — Date: 8-22-23

Last Revised: 8/17/2023

THIS PROJECT SHALL COMPLY WITH THE REQUIREMENTS SET FORTH IN THE GENERAL STANDARD CONDITIONS OF APPROVAL ADOPTED BY THE CITY COUNCIL (RESOLUTION NO. 2017-027) AND THE PROJECT SPECIFIC CONDITIONS OF APPROVAL SPECIFIED HEREIN. ONLY APPLICABLE CONDITIONS OF APPROVAL ARE CHECKED. THE APPLICANT SHALL BE RESPONSIBLE FOR THE COMPLETION OF ALL APPLICABLE CONDITIONS OF APPROVAL PRIOR TO FINAL MAP OR PARCEL MAP APPROVAL, ISSUANCE OF PERMITS AND/OR OCCUPANCY CLEARANCE, AS SPECIFIED IN THIS REPORT.

1. PRIOR TO FINAL MAP OR PARCEL MAP APPROVAL, APPLICANT SHALL:

			Check When Complete
☒	**1.01**	**Dedicate to the City of Ontario, the right-of-way, described below:** **A. The right-of-way required to construct the proposed cul-de-sac at Woodruff Way per the approved tentative parcel map.**	☐
☒	**1.02**	**Dedicate to the City of Ontario, the following easement(s):** **A. A easement for sidewalk purposes along the entire project frontage on Rockefeller Avenue and Wanamaker Avenue, 5-foot typical and varied width at the accessible ramp.**	☐
☐	1.03	Restrict vehicular access to the site as follows: _____	☐
☒	**1.04**	**Vacate the following street(s) and/or easement(s):** **A. All interfering on-site easements shall be quitclaimed, vacated, and/or submit non-interference letter from affected owner/utility company.** **B. Vacate Woodruff Way and the public utility easement from Wanamaker Avenue to the proposed cul-de-sac and the public utility easements within Woodruff Way.** **C. Any public infrastructure (street lights, fire hydrants, etc.) located within the vacation of Woodruff Way shall be removed.** **D. Amend record drawings S10962 and W12248 for the removal of the sewer and water mains in Woodruff Way.**	☐
☐	1.05	Submit a copy of a recorded private reciprocal use agreement or easement. The agreement or easement shall ensure, at a minimum, common ingress and egress and joint maintenance of all common access areas and drive aisles.	☐
☐	1.06	Provide (original document) Covenants, Conditions and Restrictions (CC&Rs) as applicable to the project and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&Rs shall provide for, but not be limited to, common ingress and egress, joint maintenance responsibility for all common access improvements, common facilities, parking areas, utilities, median and landscaping improvements and drive approaches, in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project. The CC&Rs shall also address the maintenance and repair responsibility for public improvements/utilities (sewer, water, storm drain, recycled water, etc.) located within open space/easements. In the event of any maintenance or repair of these facilities, the City shall only restore disturbed areas to current City Standards.	☐
☐	1.07	For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at *http://tceplumecleanup.com/*), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at *http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658*.	☐

☐ 1.08 File an application for Reapportionment of Assessment, together with payment of a reapportionment processing fee, for each existing assessment district listed below. Contact the Financial Services Department at (909) 395-2124 regarding this requirement. ☐

(1) _____

(2) _____

☒ **1.09 Prepare a fully executed Subdivision Agreement (on City approved format and forms) with accompanying security as required, or complete all public improvements.** ☐

☒ **1.10 Provide a monument bond (i.e. cash deposit) in an amount calculated by the City's approved cost estimate spreadsheet (available for download on the City's website: www.ontarioca.gov) or as specified in writing by the applicant's Registered Engineer or Licensed Land Surveyor of Record and approved by the City Engineer, whichever is greater.** ☐

☒ **1.11 Provide a preliminary title report current to within 30 days.** ☐

☐ 1.12 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2341 to initiate the CFD application process. ☐

☐ 1.13 Ontario Ranch Developments: ☐

☐ 1) Provide evidence of final cancellation of Williamson Act contracts associated with this tract, prior to approval of any final subdivision map. Cancellation of contracts shall have been approved by the City Council.

☐ 2) Provide evidence of sufficient storm water capacity availability equivalents (Certificate of Storm Water Treatment Equivalents).

☐ 3) Provide evidence of sufficient water availability equivalents (Certificate of Net MDD Availability).

☐ 1.14 Other conditions: _____ ☐

2. PRIOR TO ISSUANCE OF ANY PERMITS, APPLICANT SHALL:

A. GENERAL
(Permits includes Grading, Building, Demolition and Encroachment)

☒ **2.01 Record Parcel Map No. 20559 pursuant to the Subdivision Map Act and in accordance with the City of Ontario Municipal Code.** ☐

☒ **2.02 Submit a PDF of the recorded map to the City Engineer's office.** ☐

☒ **2.03 Note that the subject parcel is a recognized parcel in the City of Ontario per the following:** ☐
- **A. LLA96-19, formerly Parcel Map 14781 Parcels 4, 5, 6, and portions of 3 and 7.**
- **B. Parcel Map 9752 Parcel 2.**

☐ 2.04 Note that the subject parcel is an 'unrecognized' parcel in the City of Ontario and shall require a Certificate of Compliance to be processed unless a deed is provided confirming the existence of the parcel prior to the date of March 4, 1972. ☐

☐ 2.05 Apply for a: ☐

☐ Certificate of Compliance with a Record of Survey;

☐ Lot Line Adjustment (Record a Conforming Deed with the County of San Bernardino within six months of the recordation of the Lot Line Adjustment to conform the new LLA legal description. Submit a copy of the recorded Conforming Deed to the Engineering Department.);

☐ Make a Dedication of Easement.

☐ 2.06 Provide (original document) Covenants, Conditions and Restrictions (CC&R's), as applicable to the project, and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&R's shall provide for, but not be limited to, common ingress and egress, joint maintenance of all common access improvements, common facilities, parking areas, utilities and drive approaches in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project. ☐

☐ 2.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at *http://tceplumecleanup.com/*), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at *http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658*. ☐

☒ **2.08 Submit a soils/geology report.** ☐

☐ 2.09 Other Agency Permit/Approval: Submit a copy of the approved permit and/or other form of approval of the project from the following agency or agencies: ☐

- ☐ State of California Department of Transportation (Caltrans)
- ☐ San Bernardino County Road Department (SBCRD)
- ☐ San Bernardino County Flood Control District (SBCFCD)
- ☐ Federal Emergency Management Agency (FEMA)
- ☐ Cucamonga Valley Water District (CVWD) for sewer/water service
- ☐ United States Army Corps of Engineers (USACE)
- ☐ California Department of Fish & Game
- ☐ Inland Empire Utilities Agency (IEUA)
- ☐ Other: _____

☐ 2.10 Dedicate to the City of Ontario the right-of-way described below: ☐

_____ feet on _____

Property line corner 'cut-back' required at the intersection of _____ and _____.

☐ 2.11 Dedicate to the City of Ontario the following easement(s):_____ ☐

_____

☐ 2.12 Vacate the following street(s) and/or easement(s): ☐

A. All interfering on-site easements shall be quitclaimed, vacated, and/or submit non-interference letter from affected owner/utility company.

☐ 2.13 Ontario Ranch Developments: ☐

☐ 1) Submit a copy of the permit from the San Bernardino County Health Department to the

Engineering Department and the Ontario Municipal Utilities Company (OMUC) for the destruction/abandonment of the on-site water well. The well shall be destroyed/abandoned in accordance with the San Bernardino County Health Department guidelines.

☐ 2) Make a formal request to the City of Ontario Engineering Department for the proposed temporary use of an existing agricultural water well for purposes other than agriculture, such as grading, dust control, etc. Upon approval, the Applicant shall enter into an agreement with the City of Ontario and pay any applicable fees as set forth by said agreement.

☐ 3) Design proposed retaining walls to retain up to a maximum of three (3) feet of earth. In no case shall a wall exceed an overall height of nine (9) feet (i.e. maximum 6-foot high wall on top of a maximum 3-foot high retaining wall.

☐ 2.14 Submit a security deposit to the Engineering Department to guarantee construction of the public improvements required herein valued at 100% of the approved construction cost estimate. Security deposit shall be in accordance with the City of Ontario Municipal Code. Security deposit will be eligible for release, in accordance with City procedure, upon completion and acceptance of said public improvements. ☐

☒ **2.15 The applicant/developer shall submit all necessary survey documents prepared by a Licensed Surveyor registered in the State of California detailing all existing survey monuments in and around the project site. These documents are to be reviewed and approved by the City Survey Office.** ☐

☒ **2.16 Pay all Development Impact Fees (DIF) to the Building Department. Storm Drain Development Impact Fee, approximately $389,532.52, shall be paid to the Building Department. Final fee shall be determined based on the approved site plan and the DIF rate at the time of payment.** ☐

☒ **2.17 Other conditions:** ☐

A. <u>Final Utilities Systems Map (USM):</u> Submit a Final Utilities Systems Map (FUSM) as part of the precise grading plan submittal that meets all the City's USM requirements. These requirements include to show and label all existing and proposed utilities (including all appurtenances such as backflow devices, DCDAs, etc.), sizes, points of connection, and any easements. The final utility design shall comply with all Division of Drinking Water (CCR §64572) Separation Requirements. See Utility Systems Map (USM) Requirements document for details.

a. The proposed utilities, utility alignments, and Public Rights-of-Way/Public Utility Easements shown on the Conceptual Utilities Systems Map (CUSM) and other Entitlement documents are not considered final and shall be revised during Final Design to meet all City Design Guidelines, Standards, City Requirements, and all of the Conditions of Approval contained in this document.

B. <u>Design Utilities to comply Department of Drinking Water (DDW) Separation Requirements and California Code of Regulations (CCR) § 64572 Compliance:</u> All DDW Separation Requirements under CCR § 64572 must be met. In order to assure compliance with CCR § 64572, on all design documents and plans: label the separation dimensions, measure from outside wall of the conveyances, between public potable water to any other public or private non-potable conveyance (sewer, storm drain, storm water, storm water infiltration, recycled water, recycled water irrigation, high pressure gas/petroleum, etc) whether publicly or privately maintained; provide one label per sheet per conveyance and additional labels where separation dimensions and alignments change; and, for any facilities not currently meeting the separation requirements, revise plans/documents so that the facilities meet the separations requirements.

C. <u>Unused Service Abandonment</u>: All adjacent water services (along with connected appurtenances) and sewer laterals and main stubs along the frontages of the project site not used to provide service to this Development Project shall be abandoned back to the main in accordance with City Standards and Practices.

D. <u>Existing Mains Abandonment:</u> Abandon existing public water and sewer mains within the proposed vacated Woodruff Avenue portion per city current standards and guidelines.

B. PUBLIC IMPROVEMENTS
(See attached Exhibit 'A' for plan check submittal requirements.)

☒ **2.18** **Design and construct full public improvements in accordance with the City of Ontario Municipal Code, current City standards and specifications, master plans and the adopted specific plan for the area, if any. These public improvements shall include, but not be limited to, the following (checked boxes):**

Improvement	Rockefeller Avenue	Wanamaker Avenue	Jurupa Street	Woodruff Way
Curb and Gutter	☐ New; ___ ft. from C/L ☐ Replace damaged ☐ Remove and replace	☒ **New**[2.18.A] ☐ Replace damaged ☐ Remove and replace	☐ New; ___ ft. from C/L ☐ Replace damaged ☐ Remove and replace	☒ **New; along new cul-de-sac** ☐ Replace damaged ☐ Remove and replace

Removal of Improvements	_____ _____ _____	_____ _____ _____	_____ _____ _____	_____ _____ _____
Other Improvements	_____ _____ _____	_____ _____ _____	_____ _____ _____	_____ _____ _____

Specific notes for improvements listed in item no. 2.18, above:

- **A. Construct new curb and gutter where Woodruff was vacated.**
- **B. Construct a new ADA access ramp at the southeast corner of Rockefeller Avenue and Wannamaker Avenue per City Standard Drawing.**
- **C. Add truncated domes to the existing ADA access ramp at the northwest corner of Woodruff and Jurupa.**

☒ **2.19 Construct a 2" asphalt concrete (AC) grind and overlay on the following street(s):** ☐

- **A. Across the entire project frontage along Jurupa Street, curb to median.**
- **B. Across the entire project frontage along Rockefeller Avenue, curb to centerline.**
- **C. Across the entire project frontage along Wanamaker Avenue, curb to curb.**
- **D. Across the entirety of the new cul-de-sac on Woodruff Way.**

☐ 2.20 Reconstruction of the full pavement structural section, per City of Ontario Standard Drawing number 1011, may be required based on the existing pavement condition and final street design. Minimum limits of reconstruction shall be along property frontage, from street centerline to curb/gutter. ☐

☐ 2.21 Make arrangements with the Cucamonga Valley Water District (CVWD) to provide ☐ water service ☐ sewer service to the site. This property is within the area served by the CVWD and Applicant shall provide documentation to the City verifying that all required CVWD fees have been paid. ☐

☐ 2.22 Overhead utilities shall be under-grounded, in accordance with Title 7 of the City's Municipal Code (Ordinance No. 2804 and 2892). Developer may pay in-lieu fee, approximately _____, for undergrounding of utilities in accordance with Section 7-7.302.e of the City's Municipal Code. ☐

☐ 2.23 Other conditions: _____ ☐

C. SEWER

☒ **2.24 An 8-inch sewer main is available for connection by this project in Woodruff Way. (Ref: Sewer plan bar code: S10962)** ☐

☐ 2.25 Design and construct a sewer main extension. A sewer main is not available for direct connection. The closest main is approximately _____ feet away. ☐

☐ 2.26 Submit documentation that shows expected peak loading values for modeling the impact of the subject project to the existing sewer system. The project site is within a deficient public sewer system area. Applicant shall be responsible for all costs associated with the preparation of the model. Based on the results of the analysis, Applicant may be required to mitigate the project impact to the deficient public sewer system, including, but not limited to, upgrading of existing sewer main(s), construction of new sewer main(s) or diversion of sewer discharge to another sewer. ☐

☒ **2.27 Other conditions:** ☐

A. Terminus Manhole: Construct terminus manhole at the end of the sewer main within the proposed Woodruff cul-de-sac and away from the curb and gutter.

a. Terminus manhole must have 10' straight pipe pre and post with slope range of greater or equal to 0.4% and less or equal to 2%.

B. Monitoring Manhole: Construct a monitoring manhole on private property and immediately back of the proposed property line.

C. Proposed Sewer Lateral Alignment and Monitoring Manhole Location: Align the proposed sewer lateral to commence at the proposed onsite cleanout and terminate at the proposed terminus manhole (in public RoW), then place the proposed sewer monitoring manhole (on private PL) immediately back of the property line along this sewer lateral. This is to achieve the maximum sewer spacing from the catch basin and meet the 10' minimum straight pipe alignment for the pre and post piping of the monitoring manhole.

D. Note the following:
The Occupant/Applicant shall apply for a Wastewater Discharge Permit for their establishment and shall comply will all the requirements of the Wastewater Discharge Permit. The application can be downloaded from the City's Utilities website in the drop-down of the "Pretreatment" section (www.ontarioca.gov/OMUC/Utilities). Please select the appropriate application that applies to your type of business. Requirements of the Wastewater Discharge Permit may include, but not limited to: Installation of wastewater pretreatment equipment, such as grease interceptors or clarifiers. For wastewater permit application questions, please contact:
Michael Birmelin, Environmental Programs Manager
omucenvironmental@ontarioca.gov
Phone: (909) 395-261

D. WATER

☒ **2.28 A 12-inch water main is available for connection by this project in Wanamaker Avenue. (Ref: Water plan bar code: W11801)** ☐

A 12-inch water main is available for connection by this project in Woodruff Way. (Ref: Water plan bar code: W12248)

☐ 2.29 Design and construct a water main extension. A water main is not available for direct connection. The closest main is approximately _____ feet away. ☐

☒ **2.30 Other conditions:** ☐

A. Fire Hydrants Installation:
- **a. Construct four fire hydrants along Wannamaker with 300' maximum space between fire hydrants.**
- **b. Abandon one existing fire hydrant per city's guidelines, standards, and/or requirements and a construction a new one near the proposed abandon fire hydrant on Rockefeller.**

B. Double Check Detector Assembly (DCDA): Provide two DCDAs, loop them together onsite.

E. RECYCLED WATER

☒ **2.31 An 8-inch recycled water main is available for connection by this project in Jurupa Street. (Ref: Recycled Water plan bar code: P10296)** ☐

☐ 2.32 Design and construct an on-site recycled water system for this project. A recycled water main does exist in the vicinity of this project. ☐

☐ 2.33 Design and construct an on-site recycled water ready system for this project. A recycled water main does not currently exist in the vicinity of this project but is planned for the near future. If Applicant would like to connect to this recycled water main when it becomes available, the cost for the connection shall be borne solely by the Applicant. ☐

☐ 2.34 Submit one (1) electronic copy, in PDF format, of the Engineering Report (ER), for the use of recycled water to OMUC's Water Quality Programs at OMUCWQPlanCheck@ontarioca.gov for review and subsequent submittal to the California State Water Board (Division of Drinking Water) for final approval. ☐

Note: Review and approval process may take up to three (3) months. Contact the OMUC's Water Quality Programs at (909) 395-2678 or email OMUCWQPlanCheck@ontarioca.gov regarding this requirement.

☐ 2.35 Submit one (1) electronic copy, in PDF format, of the Landscape Plans (on-site & off-site) to OMUC's Water Quality Programs at OMUCWQPlanCheck@ontarioca.gov for review and approval.

☒ **2.36 Other conditions:** ☐

A. Recycled Water: This project is required to use recycled water, therefore, do not abandon any of existing recycled water services and make use of them as required for irrigation. However, please verify that these services are available to connect, if not, then must construct new service(s) as required.

B. City Ordinance 2689: This development shall comply with City Ordinance 2689 and make use of recycled water for all approved uses, including but not limited to landscape irrigation. Appropriately sized public and private mains shall be installed throughout the Project to meet this requirement, as approved by the City

C. RW Program Requirements: In order to receive RW service, the applicant shall comply with the following:
- **a. *Prior to Precise Grading Plan Approval and Building Permits Issuance:***
  - **i. Provide two hard copies and the digital files (in PDF and AutoCAD format) for both on-site and off-site utility plans, including landscape and irrigation improvements.**
  - **ii. Submit an Engineering Report (ER) to the City detailing recycled water usage for review and approval by the City and the State. The review process for the ER is typically 3 months. City will coordinate the State's approval of the ER.**
  - **iii. For details, contact Cynthia Heredia-Torres at (909) 395-2647 or ctorres@ontarioca.gov.**
- **b. *Prior to Occupancy Release/Finalizing:***

i. **Pass start-up and cross-connection test successfully.**
ii. **Provide evidence demonstrating the training of on-site supervisor or designee as determined in the ER.**

F. TRAFFIC / TRANSPORTATION

☐ 2.37 Submit a focused traffic impact study, prepared and signed by a Traffic/Civil Engineer registered in the State of California. The study shall address, but not be limited to, the following issues as required by the City Engineer: ☐
1. On-site and off-site circulation
2. Traffic level of service (LOS) at 'build-out' and future years
3. Impact at specific intersections as selected by the City Engineer

☐ 2.38 New traffic signal installations shall be added to Southern California Edison (SCE) customer account number # 2-20-044-3877. ☐

☒ **2.39 Other conditions:** ☐

A. The Applicant/Developer shall be responsible to design and construct street improvements along property frontage in accordance with conditions issued by City's Land Development Division. These, and all other street improvements required herein, shall include, but not be limited to, sidewalk, LED street lights, signing and striping, and parkway landscaping.

B. Proposed driveways onto Rockefeller Avenue shall be restricted to right-in/right-out access due to the existing raised median on Rockefeller Avenue.

C. Design and construct proposed driveways in accordance with City of Ontario Standard Drawing No. 1204 for Commercial Driveway.

D. The Applicant/Developer shall be responsible to relocate the existing public street light service pedestal at the southwest corner of Wanamaker Avenue and Woodruff Way. The Applicant/Developer shall be responsible to construct all street light improvements necessary to accommodate the service pedestal relocation. The Applicant/Developer shall also install smart nodes on all new street light fixtures along project frontages.

E. The Applicant/Developer shall be responsible to replace any existing street light fixtures along its project frontage of Jurupa Street, Woodruff Way, Rockefeller Avenue, and Wanamaker Avenue with the current City approved LED equivalent fixture in accordance with City's Approved Material List LED Luminaires. The Applicant/Developer shall also install smart nodes on all existing street light fixtures along project frontage.

F. The Applicant/Developer shall be responsible to modify the signing/striping along Wanamaker Avenue to remove the existing two-way left turn lane break currently in place for Woodruff Way.

G. Parking restrictions shall remain in place along all property frontage streets.

H. All landscaping, block walls, and other obstructions shall be compatible with the stopping sight distance requirements per City of Ontario Standard Drawing No. 1309.

I. The Applicant/Developer's engineer-of-record shall meet with City Engineering staff prior to designing and submitting for plan check the signing/striping, street lighting and traffic signal design plans to define limits of improvements.

G. DRAINAGE / HYDROLOGY

☒ **2.40 A 96-inch storm drain main is available to accept flows from this project in Jurupa Street. (Ref: Storm Drain plan bar code: D10718)** ☐

☐ 2.41 Submit a hydrology study and drainage analysis, prepared and signed by a Civil Engineer registered in the State of California. The study shall be prepared in accordance with the San Bernardino County Hydrology Manual and City of Ontario standards and guidelines. Additional drainage facilities, including, but not limited to, improvements beyond the project frontage, may be required to be designed and constructed, by Applicant, as a result of the findings of this study. ☐

☐ 2.42 An adequate drainage facility to accept additional runoff from the site does not currently exist downstream of the project. Design and construct a storm water detention facility on the project site. 100-year post-development peak flow shall be attenuated such that it does not exceed 80% of pre-development peak flows, in accordance with the approved hydrology study and improvement plans. ☐

☐ 2.43 Submit a copy of a recorded private drainage easement or drainage acceptance agreement to the Engineering Department for the acceptance of any increase to volume and/or concentration of historical drainage flows onto adjacent property, prior to approval of the grading plan for the project. ☐

☐ 2.44 Comply with the City of Ontario Flood Damage Prevention Ordinance (Ordinance No. 2409). The project site or a portion of the project site is within the Special Flood Hazard Area (SFHA) as indicated on the Flood Insurance Rate Map (FIRM) and is subject to flooding during a 100-year frequency storm. The site plan shall be subject to the provisions of the National Flood Insurance Program. ☐

☐ 2.45 Other conditions: _____ ☐

H. STORM WATER QUALITY / NATIONAL POLLUTANT DISCHARGE AND ELIMINATION SYSTEM (NPDES)

☐ 2.46 401 Water Quality Certification/404 Permit – Submit a copy of any applicable 401 Certification or 404 Permit for the subject project to the City project engineer. Development that will affect any body of surface water (i.e. lake, creek, open drainage channel, etc.) may require a 401 Water Quality Certification from the California Regional Water Quality Control Board, Santa Ana Region (RWQCB) and a 404 Permit from the United States Army Corps of Engineers (USACE). The groups of water bodies classified in these requirements are perennial (flow year round) and ephemeral (flow during rain conditions, only) and include, but are not limited to, direct connections into San Bernardino County Flood Control District (SBCFCD) channels. ☐
If a 401 Certification and/or a 404 Permit are not required, a letter confirming this from Applicant's engineer shall be submitted.
Contact information: USACE (Los Angeles District) (213) 452-3414; RWQCB (951) 782-4130.

☒ **2.47 Submit a Water Quality Management Plan (WQMP). This plan shall be approved by the Engineering Department prior to approval of any grading plan. The WQMP shall be submitted, utilizing the current San Bernardino County Stormwater Program template, available at: http://www.sbcounty.gov/dpw/land/npdes.asp.** ☐

☒ **2.48 Design and construct a Connector Pipe Trash Screen or equivalent Trash Treatment Control Device, per catch basin located within or accepting flows tributary of a Priority Land Use (PLU) area that meets the Full Capture System definition and specifications, and is on the Certified List of the State Water Resources Control Board. The device shall be adequately sized per catch basin and include a deflector screen with vector control access for abatement application, vertical support bars, and removable component to facilitate maintenance and cleaning.** ☐

☒ **2.49 Other conditions:** ☐

A. Activities resulting in land disturbance of one acre or more is required to obtain coverage under the Construction General Permit (CGP). The owner is the legally responsible person (LRP) of the site and shall have a Stormwater Pollution Prevention Plan (SWPPP) developed and submitted through the SMARTS website at https://smarts.waterboards.ca.gov/smarts/faces/SwSmartsLogin.xhtml

B. All Priority Land Use (PLU): Land use consisting of high-density residential, defined as a land use with at least ten (10) dwelling units per acre, industrial, commercial, mixed urban, and public transportation station land uses shall comply with the statewide Trash Provisions adopted by the State Water Resources Control Board (SWRCB).

J. SPECIAL DISTRICTS

☐ 2.50 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2341 to initiate the CFD application process. ☐

☐ 2.51 Other conditions: _____ ☐

K. FIBER OPTIC

☒ **2.52 A fiber optic line is available for connection by this project in Rockefeller Avenue. (Ref: Fiber Optic Drawing Number: O10597)** ☐

☒ **2.53 Design and construct fiber optic system to provide access to the City's conduit and fiber optic system per the City's Fiber Optic Master Plan. Building entrance conduits shall start from the closest OntarioNet hand hole constructed along the project frontage in the ROW and shall terminate in the main telecommunications room for each building. Conduit infrastructure shall interconnect with the primary and/or secondary backbone fiber optic conduit system at the nearest OntarioNet hand hole. Generally located near the southwest corner of Rockefeller Avenue and Wanamaker Avenue.** ☐

☒ **2.54 Refer to the City's Fiber Optic Master Plan for design and layout guidelines. Contact the Broadband Operations Department at (909) 395-2000, regarding this requirement.** ☐

3. PRIOR TO ISSUANCE OF A CERTIFICATE OF OCCUPANCY, APPLICANT SHALL:

☒ **3.01 Set new monuments in place of any monuments that have been damaged or destroyed as a result of construction of the subject project. Monuments shall be set in accordance with City of Ontario standards and to the satisfaction of the City Engineer.** ☐

☒ **3.02 Complete all requirements for recycled water usage.** ☐

☒ **1) Procure from the OMUC a copy of the letter of confirmation from the California Department of Public Health (CDPH) that the Engineering Report (ER) has been reviewed and the subject site is approved for the use of recycled water.**

☒ **2) Obtain clearance from the OMUC confirming completion of recycled water improvements and passing of shutdown tests and cross connection inspection, upon availability/usage of recycled water.**

☒ **3) Complete education training of on-site personnel in the use of recycled water, in accordance with the ER, upon availability/usage of recycled water.**

☒ **3.03 The applicant/developer shall submit all final survey documents prepared by a Licensed Surveyor registered in the State of California detailing all survey monuments that have been preserved, revised, adjusted or set along with any maps, corner records or Records of Survey needed to comply with these Conditions of Approvals and the latest edition of the California Professional Land Survey Act. These documents are to be reviewed and approved by the City Survey Office.** ☐

☐ 3.04 Ontario Ranch Projects: For developments located at an intersection of any two collector or arterial streets, the applicant/developer shall set a monument if one does not already exist at that intersection. Contact the City Survey office for information on reference benchmarks, acceptable methodology and required submittals. ☐

☒	3.05	**Confirm payment of all Development Impact Fees (DIF) to the Building Department.**	☐
☒	3.06	**Submit electronic copies (PDF and Auto CAD format) of all approved improvement plans, studies and reports (i.e. hydrology, traffic, WQMP, etc.).**	☐

4. PRIOR TO FINAL ACCEPTANCE, APPLICANT SHALL:

☒	4.01	**Complete all Conditions of Approval listed under Sections 1-3 above.**	☐
☒	4.02	**Pay all outstanding fees pursuant to the City of Ontario Municipal Code, including but not limited to, plan check fees, inspection fees and Development Impact Fees.**	☐
☒	4.03	**The applicant/developer shall submit a written request for the City's final acceptance of the project addressed to the City Project Engineer. The request shall include a completed Acceptance and Bond Release Checklist, state that all Conditions of Approval have been completed and shall be signed by the applicant/developer. Upon receipt of the request, review of the request shall be a minimum of 10 business days. Conditions of Approval that are deemed incomplete by the City will cause delays in the acceptance process.**	☐
☒	4.04	**Submit record drawings (PDF) for all public improvements identified within Section 2 of these Conditions of Approval.**	☐

EXHIBIT 'A'

ENGINEERING DEPARTMENT
First Plan Check Submittal Checklist

Project Number: PDEV22-034 , and Parcel Map No. 20559

The following items are required to be included with the first plan check submittal:

1. ☒ **A copy of this check list**
2. ☒ **Payment of fee for Plan Checking**
3. ☒ **Engineering Cost Estimate (on City form) with engineer's wet signature and stamp.**
4. ☒ **Project Conditions of Approval**
5. ☒ **A PDF (electronic submittal) of each required improvement plan at every submittal.**
6. ☐ Potable and Recycled Water demand calculations (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size).
7. ☒ **Public Street improvement plan with street cross-sections**
8. ☐ Public Water improvement plan (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size)
9. ☐ Recycled Water improvement plan (include recycled water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size and an exhibit showing the limits of areas being irrigated by each recycled water meter)
10. ☐ Public Sewer improvement plan
11. ☐ Public Storm Drain improvement plan
12. ☒ **Public Street Light improvement plan**
13. ☒ **Signing and Striping improvement plan**
14. ☒ **Fiber Optic plan (include Auto CAD electronic submittal)**
15. ☐ HOA Landscape improvement plans. Show corner sight line distance per engineering standard drawing 1309.
16. ☐ CFD Landscape improvement plans. Show corner sight line distance per engineering standard drawing 1309.
17. ☒ **Dry Utility plans within public right-of-way (at a minimum the plans must show existing and ultimate right-of-way, curb and gutter, proposed utility location including centerline dimensions, wall to wall clearances between proposed utility and adjacent public line, street work repaired per Standard Drawing No. 1306. Include Auto CAD electronic submittal)**
18. ☐ Traffic Signal improvement plan and One (1) copy of Traffic Signal Specifications with modified Special Provisions. Please contact the Traffic Division at (909) 395-2154 to obtain Traffic Signal Specifications.
19. ☒ **Water Quality Management Plan (WQMP), including the approved Preliminary WQMP (PWQMP).**
20. ☐ Hydrology/Drainage study
21. ☒ **Soils/Geology report**

22. ☒ **Payment for Final Map/Parcel Map processing fee**

23. ☒ **Final Map/Parcel Map**

24. ☒ **Approved Tentative Map**

25. ☒ **Preliminary Title Report (current within 30 days)**

26. ☒ **Traverse Closure Calculations**

27. ☒ **One (1) set of supporting documents and maps (legible copies): referenced improvement plans (full size), referenced record final maps/parcel maps (full size, 18”x26”), Assessor’s Parcel map (full size, 11”x17”), recorded documents such as deeds, lot line adjustments, easements, etc.**

28. ☒ **Engineering Report and an electronic file (include PDF format electronic submittal) for recycled water use**

29. ☒ **Other:**
    A. **Amend record drawings S10962 and W12248 for the removal of the sewer and water mains in Woodruff Way.**

Revision #3

FROM: Alexis Vaughn, Associate Planner

DATE: June 14, 2023

SUBJECT: FILE #: PMTT22-025 Finance Acct#:

The following project has been resubmitted for review. Please send one (1) copy and email one (1) copy of your DAB report to the Planning Department by .

PROJECT DESCRIPTION: A Tentative Parcel Map to create one (1) parcel in conjunction with a request to construct one industrial building totaling 344,260 square feet on 16.65 acres of land located at 1350 and 1375 Woodruff Way, within the Commercial and Light Industrial land use district of the California Commerce Center Specific Plan (APN(s): 0238-201-41 and 0238-221-22). Related File(s): PSPA22-006

☑ The plan does adequately address the departmental concerns at this time.

- ☐ No comments
- ☑ See previous report for Conditions
- ☐ Report attached (1 copy and email 1 copy)
- ☐ Standard Conditions of Approval apply

☐ The plan does not adequately address the departmental concerns.

- ☐ The conditions contained in the attached report must be met prior to scheduling for Development Advisory Board.

CITY OF ONTARIO
MEMORANDUM

DATE:	April 10, 2023
TO:	David Zurita, Engineering
CC:	Alexis Vaughn, Planning
FROM:	Peter Tran, Utilities Engineering
SUBJECT:	DPR #2 – Conditions of Approval (COA) REV.- Utilties Comments (**#8865 & #8866**)
PROJECT NO.:	PDEV22-034 & PMTT22-025 (A Development Plan to demolish 2 exist. bldgs and Construct a 346,260 sqft ind. bldg. on 16.65 acres of land at 1350 and 1375 Woodruff Way)

BRIEF DESCRIPTION

A Development Plan to construct one industrial building totaling 344,260 square feet on 16.65 acres of land located at 1350 and 1375 Woodruff Way, within the Commercial and Light Industrial land use district of the California Commerce Center Specific Plan (APN(s): 0238-201-41 and 0238-221-22). Related File(s): PSPA22-006.

OMUC UTILITIES ENGINEERING DIVISION
CONDITIONS OF APPROVAL

CONDITIONS OF APPROVAL: *The **Ontario Municipal Utilities Company (OMUC) Utilities Engineering Division** recommends this application for approval subject to the Conditions of Approval outlined below and compliance with the City's Design Development Guidelines, Specifications Design Criteria, and City Standards. The Applicant shall be responsible for the compliance with and the completion of all the following applicable Conditions of Approval prior to the following milestones and subject to compliance with City's Design Development Guidelines, Specifications Design Criteria, and City Standards:*

1. Standard Conditions of Approval: Project shall comply with the requirements as set forth in the Amendment to the Standard Conditions of Approval for New Development Projects adopted by the City Council (Resolution No. 2017-027) on April 18, 2017, or as amended or superseded by Council Resolution; as well as the project-specific conditions/requirements as outlined below.

Prior to Issuance of Any Permits (Grading, Building, Demolition and Encroachment), unless other timeline milestones are specified by individual conditions below, the Applicant Shall:

General Conditions (Section 2.A, Other conditions): The Applicant shall comply with the following:

2. Final Utilities Systems Map (USM): Submit a Final Utilities Systems Map (FUSM) as part of the precise grading plan submittal that meets all the City's USM requirements. These requirements include to show and label all existing and proposed utilities (including all appurtenances such as backflow devices, DCDAs, etc.), sizes, points of connection, and any easements. The final utility design shall comply with all Division of Drinking Water (CCR §64572) Separation Requirements. See Utility Systems Map (USM) Requirements document for details.
    a. The proposed utilities, utility alignments, and Public Rights-of-Way/Public Utility Easements shown on the Conceptual Utilities Systems Map (CUSM) and other Entitlement documents are not considered final and shall be revised during Final Design to meet all City Design Guidelines, Standards, City Requirements, and all of the Conditions of Approval contained in this document
3. Design Utilities to comply Department of Drinking Water (DDW) Separation Requirements and California Code of Regulations (CCR) § 64572 Compliance: All DDW Separation Requirements under CCR § 64572 must be met. In order to

assure compliance with CCR § 64572, on all design documents and plans: label the separation dimensions, measure from outside wall of the conveyances, between public potable water to any other public or private non-potable conveyance (sewer, storm drain, storm water, storm water infiltration, recycled water, recycled water irrigation, high pressure gas/petroleum, etc) whether publicly or privately maintained; provide one label per sheet per conveyance and additional labels where separation dimensions and alignments change; and, for any facilities not currently meeting the separation requirements, revise plans/documents so that the facilities meet the separations requirements.

4. Unused Service Abandonment: All adjacent water services (along with connected appurtenances) and sewer laterals and main stubs along the frontages of the project site not used to provide service to this Development Project shall be abandoned back to the main in accordance with City Standards and Practices.
5. Existing Mains Abandonment: Abandon existing public water and sewer mains within the proposed vacated Woodruff Avenue portion per city current standards and guidelines.

Potable Water Conditions (Section 2.D): The Applicant shall comply with the following:

6. Fire Hydrants Installation:
    a. Construct four fire hydrants along Wannamaker with 300' maximum space between fire hydrants.
    b. Abandon one existing fire hydrant per city's guidelines, standards, and/or requirements and a construction a new one near the proposed abandon fire hydrant on Rockefeller.

7. Double Check Detector Assembly (DCDA): Provide two DCDAs, loop them together onsite.

Sanitary Sewer Conditions (Section 2.C): The Applicant shall comply with the following:

8. Terminus Manhole: Construct terminus manhole at the end of the sewer main within the proposed Woodruff cul-de-sac and away from the curb and gutter.
    a. Terminus manhole must have 10' straight pipe pre and post with slope range of greater or equal to 0.4% and less or equal to 2%.

9. Monitoring Manhole: Construct a monitoring manhole on private property and immediately back of the proposed property line.
10. Proposed Sewer Lateral Alignment and Monitoring Manhole Location: Align the proposed sewer lateral to commence at the proposed onsite cleanout and terminate at the proposed terminus manhole (in public RoW), then place the proposed sewer monitoring manhole (on private PL) immediately back of the property line along this sewer lateral. This is to achieve the maximum sewer spacing from the catch basin and meet the 10' minimum straight pipe alignment for the pre and post piping of the monitoring manhole.

11. Note the following:
    The Occupant/Applicant shall apply for a Wastewater Discharge Permit for their establishment and shall comply will all the requirements of the Wastewater Discharge Permit. The application can be downloaded from the City's Utilities website in the drop-down of the "Pretreatment" section (www.ontarioca.gov/OMUC/Utilities). Please select the appropriate application that applies to your type of business. Requirements of the Wastewater Discharge Permit may include, but not limited to: Installation of wastewater pretreatment equipment, such as grease interceptors or clarifiers. For wastewater permit application questions, please contact:

    Michael Birmelin, Environmental Programs Manager
    omucenvironmental@ontarioca.gov
    Phone: (909) 395-261

Recycled Water: (Add following to Section 2.E of Engineering Department COA)

12. Recycled Water: This project is required to use recycled water, therefore, do not abandon any of existing recycled water services and make use of them as required for irrigation. However, please verify that these services are available to connect, if not, then must construct new service(s) as required.
13. City Ordinance 2689: This development shall comply with City Ordinance 2689 and make use of recycled water for all approved uses, including but not limited to landscape irrigation. Appropriately sized public and private mains shall be installed throughout the Project to meet this requirement, as approved by the City
14. RW Program Requirements: In order to receive RW service, the applicant shall comply with the following:

a. *Prior to Precise Grading Plan Approval and Building Permits Issuance:*
    i. Provide two hard copies and the digital files (in PDF and AutoCAD format) for both on-site and off-site utility plans, including landscape and irrigation improvements.
    ii. Submit an **Engineering Report (ER)** to the City detailing recycled water usage for review and approval by the City and the State. The review process for the ER is typically 3 months. City will coordinate the State's approval of the ER.
    iii. For details, contact Cynthia Heredia-Torres at (909) 395-2647 or ctorres@ontarioca.gov.
b. *Prior to Occupancy Release/Finalizing:*
    i. Pass start-up and cross-connection test successfully.
    ii. Provide evidence demonstrating the training of on-site supervisor or designee as determined in the ER

FROM: Celia Corral
DATE: December 19, 2022
SUBJECT: File No. PSPA22-006 PMTT22-025 (PM-20559) PDEV22-034

[X] The Site Plan for this project is approved for DAB based on the following comments:

This project will be conditioned in the Engineering DAB Report to prepare a WQMP based on the approved PWQMP. The WQMP template is available at: http://www.sbcounty.gov/dpw/land/npdes.asp or on the City's website under Engineering/Environmental Services.

Activities resulting in land disturbance of one acre or more is required to obtain coverage under the Construction General Permit (CGP). The owner is the legally responsible person (LRP) of the site and shall have a Stormwater Pollution Prevention Plan (SWPPP) developed and submitted through the SMARTS website at https://smarts.waterboards.ca.gov/smarts/faces/SwSmartsLogin.xhtml

All Priority Land Use (PLU): Land use consisting of high-density residential, defined as a land use with at least ten (10) dwelling units per acre, industrial, commercial, mixed urban, and public transportation station land uses shall comply with the statewide Trash Provisions adopted by the State Water Resources Control Board (SWRCB).

Development Plan and Tentative Parcel Map Conditions of Approval

Civil/ Site Plans

1. Add tree protection notes on construction and demo plans to protect trees to remain. Replacement and mitigation for removed trees shall equal the trunk diameter of heritage trees removed per the Development Code Tree Preservation Policy and Protection Measures, section 6.05.020. The tree inventory shall include a matrix to understand the health of each tree. The mitigation will be determined once a complete inventory is provided.
2. Show on demo plans and landscape construction plans trees to be preserved, removed or mitigation measures for trees removed, such as:
   a. New 15-gallon trees min 1" diameter trunk, in addition to trees required.
   b. New 24" box trees min 1.5" diameter trunk, in addition to trees required.
   c. Upsizing trees on the plan one size larger such as 15 gallon to 24" box, or 24" to 36" box size.
   d. Monetary value of the trees removed as identified in the "Guide for Plant Appraisal," approved certified arborist plant appraiser, may be equal to the value of the installation cost of planting, fertilizing, staking, and irrigating 15-gallon trees (100$ each) to the City of Ontario Historic Preservation Fund for city tree planting or city approved combination of the above items.
3. Before permit issuance, stormwater infiltration devices located in landscape areas shall be reviewed and plans approved by the Landscape Planning Division. Any stormwater devices in parkway areas shall not displace street trees.
4. Note enhanced paving at entries; coordinate all plans for consistency.
5. Show and dimension backflow devices set back 4' from paving on all sides. Locate on level grade
6. Locate utilities, including light standards, fire hydrants, water, drain, and sewer lines, to not

conflict with required tree locations—coordinate civil plans with landscape plans. Relocate the fire hydrant at the southwestern parking lot island finger to the end of the island finger to allow for the required tree.

Landscape Plans

7. Provide an arborist report and tree inventory, as noted in #1. The report must have an inventory of each tree to include the genus, species, trunk diameter, and condition. Tree mitigation will be determined once the complete inventory is received or a total of 909 include of tree replacement, will be required. See mitigation requirements #3 a-d.
8. During plan check, coordinate with Ontario Municipal Utilities Company (OMUC) to submit irrigation plans for recycled water systems to omucwaterquality@ontarioca.gov. OMUC shall review and approve irrigation systems utilizing recycled water before final landscape approval. Submit an electronic approval letter or memo from OMUC with the resubmittal of the landscape package.
9. Show and dimension backflow devices with 36” high strappy leaf shrub screening. Do not encircle utility; show as masses and duplicate masses in other locations at regular intervals.
10. Locate light standards, fire hydrants, water, and sewer lines to not conflict with required tree locations. Coordinate civil plans with landscape plans
11. Show all utilities on the landscape plans. Coordinate so utilities are clear of tree locations.
12. Street trees for this project are Platanus wrightii (Rockefeller Avenue) and Pinus canariensis (Jurupa Street) per the Master Street Tree Plan. Use evergreen background trees to contrast with deciduous street trees (or the opposite) and triangularly space between them.
13. Locate trees for shade on buildings, parking lots, seating areas, and paving, screen blank walls and adjacent properties where missing, accent trees to entries and driveways, and provide visibility to signs, windows, and doors. Locate trees 50% of the canopy width from walls, buildings, and existing trees. Additional trees are required at foundation planters, street setbacks, perimeter plantings, and larger parking lot island fingers where space allows.
14. Show trees at 2/3 mature canopy.
15. Overhead spray systems shall be designed for plant material less than the height of the spray head.
16. Designer or developer to provide agronomical soil testing and include a report on landscape construction plans.
17. Call out all fences and walls, materials proposed, and heights.
18. Landscape construction plans shall meet the requirements of the Landscape Development Guidelines. See http://www.ontarioca.gov/landscape-planning/standards
19. After a project’s entitlement approval, the applicant shall pay all applicable fees for landscape plan check and inspections at a rate established by resolution of the City Council. Landscape construction plans with building permit number for plan check may be emailed to: landscapeplancheck@ontarioca.gov

Project Description: A Development Plan to raze approximately 161,1320 square feet of commercial buildings and construct one 344,110 square-foot industrial building, on 16.65 acres of land generally located at the southeast corner of Rockefeller Avenue and Wanamaker Avenue, within the proposed Light Industrial Land Use Designation of the California Commerce Center Specific Plan**;** (APNs: 0238-201-41 and 0238-221-22); **submitted by Link Logistics Real Estate Management LLC.**

Prepared By: Alexis Vaughn, Associate Planner
Phone: 909.395.2416 (direct)
Email: avaughn@ontarioca.gov

The Planning Department, Land Development Section, conditions of approval applicable to the above-described Project, are listed below. The Project shall comply with each condition of approval listed below:

1.0 Standard Conditions of Approval. The project shall comply with the *Standard Conditions for New Development*, adopted by City Council Resolution No. 2017-027 on April 18, 2017. A copy of the *Standard Conditions for New Development* may be obtained from the Planning Department or City Clerk/Records Management Department.

2.0 Special Conditions of Approval. In addition to the *Standard Conditions for New Development* identified in condition no. 1.0, above, the project shall comply with the following special conditions of approval:

2.1 Time Limits.

(a) Development Plan approval shall become null and void 2 years following the effective date of application approval, unless a building permit is issued and construction is commenced, and diligently pursued toward completion, or a time extension has been approved by the Planning Director. This condition does not supersede any individual time limits specified herein, or any other departmental conditions of approval applicable to the Project, for the performance of specific conditions or improvements.

2.2 General Requirements. The Project shall comply with the following general requirements:

(a) All construction documentation shall be coordinated for consistency prior to submittal for plan check, including, but not limited to, architectural, structural, mechanical,

electrical, plumbing, landscape and irrigation, grading, utility and street improvement plans. All such plans shall be consistent with the approved entitlement plans on file with the Planning Department.

(i) The applicant shall work with the Planning Department – Land Development and Landscape Divisions – prior to plan check submittal to address the excess drive aisle at the northwest corner of the Project site, which should be converted to landscape.

(ii) A minimum 8-foot-wide planter shall separate buildings from parking stalls. Civil sections and site plan shall be updated to be consistent with the architectural and landscape site plans.

(iii) All keynotes/legends shall be coordinated for consistency across all applicable plan sets (e.g. architectural, landscape, and civil plans). Decorative entry pavement details (colors, materials, style) shall be provided across all plans to be submitted for plan check and shall not simply refer to another plan set for said information. The decorative entry pavement's placement shall be coordinated with the Engineering and the Planning Departments, and typically should extend from the property line back to the nearest intersecting drive aisle or parking stall. The currently approved style is grey concrete perimeter banding with red concrete at center, with 3-foot-wide cross score lines.

(iv) All Project information provided on the plans (zoning and General Plan designation, lot size, setbacks, parking standards, landscape percentages, etc.) shall be correct and consistent.

(b) The project site shall be developed in conformance with the approved plans on file with the City. Any variation from the approved plans must be reviewed and approved by the Planning Department prior to building permit issuance.

(c) The herein-listed conditions of approval from all City departments shall be included in the construction plan set for project, which shall be maintained on site during project construction.

2.3 Landscaping.

(a) The Project shall provide and continuously maintain landscaping and irrigation systems in compliance with the provisions of Ontario Development Code Division 6.05 (Landscaping).

(b) Comply with the conditions of approval of the Planning Department; Landscape Planning Division.

(c) Landscaping shall not be installed until the Landscape and Irrigation Construction Documentation Plans required by Ontario Development Code Division 6.05 (Landscaping) have been approved by the Landscape Planning Division.

(d) Changes to approved Landscape and Irrigation Construction Documentation Plans, which affect the character or quantity of the plant material or irrigation system design, shall be resubmitted for approval of the revision by the Landscape Planning Division, prior to the commencement of the changes.

2.4 Walls and Fences.

(a) All Project walls and fences shall comply with the requirements of Ontario Development Code Division 6.02 (Walls, Fences and Obstructions).

(b) A 14-foot-high concrete screen wall shall be constructed along the southwest, south, and southeast property lines to screen the truck yard and dock-high doors from public view. A logical endpoint on the entitlement plan set is where the walls meet the truckyard security gates.

(c) All exposed stairwells shall be architecturally treated to match the building down to finished grade (materials, paint, scoring, etc.) and shall be screened with landscaping to the extent possible. No exposed, untreated footings or stairwells will be permitted.

2.5 Parking, Circulation and Access.

(a) The Project shall comply with the applicable off-street parking, loading and lighting requirements of City of Ontario Development Code Division 6.03 (Off-Street Parking and Loading).

(b) All drive approaches shall be provided with an enhanced pavement treatment. The enhanced paving shall extend from the back of the approach apron, into the site, to the first intersecting drive aisle or parking space.

(c) Areas provided to meet the City's parking requirements, including off-street parking and loading spaces, access drives, and maneuvering areas, shall not be used for the outdoor storage of materials and equipment, nor shall it be used for any other purpose than parking.

(d) The required number of off-street parking spaces and/or loading spaces shall be provided at the time of site and/or building occupancy. All parking and loading spaces shall be maintained in good condition for the duration of the building or use.

(e) Parking spaces specifically designated and conveniently located for use by the physically disabled shall be provided pursuant to current accessibility regulations contained in State law (CCR Title 24, Part 2, Chapters 2B71, and CVC Section 22507.8).

(f) Bicycle parking facilities, including bicycle racks, lockers, and other secure facilities, shall be provided in conjunction with development projects pursuant to current regulations contained in CALGreen (CAC Title 24, Part 11). Final design and placement of bicycle parking facilities shall be subject to Planning Department review and approval.

2.6 Outdoor Loading and Storage Areas.

(a) Loading facilities shall be designed and constructed pursuant to Development Code Division 6.03 (Off-Street Parking and Loading).

(b) Areas designated for off-street parking, loading, and vehicular circulation and maneuvering, shall not be used for the outdoor storage of materials or equipment.

(c) Outdoor loading and storage areas, and loading doors, shall be screened from public view pursuant to the requirements of Development Code Paragraph 6.02.025.A.2 (Screening of Outdoor Loading and Storage Areas, and Loading Doors) Et Seq.

(d) Outdoor loading and storage areas shall be provided with gates that are view-obstructing by one of the following methods:

(i) Construct gates with a perforated metal sheet affixed to the inside of the gate surface (50 percent screen); or
(ii) Construct gates with minimum one-inch square tube steel pickets spaced at maximum 2-inches apart.

(e) The minimum gate height for screen wall openings shall be established based upon the corresponding wall height, as follows:

Screen Wall Height	***Minimum Gate Height***
14 feet:	10 feet
12 feet:	9 feet
10 feet:	8 feet
8 feet:	8 feet
6 feet:	6 feet

2.7 Site Lighting.

(a) All off-street parking facilities shall be provided with nighttime security lighting pursuant to Ontario Municipal Code Section 4-11.08 (Special Residential Building Provisions) and Section 4-11.09 (Special Commercial/Industrial Building Provisions), designed to confine emitted light to the parking areas. Parking facilities shall be lighted from sunset until sunrise, daily, and shall be operated by a photocell switch.

(b) Unless intended as part of a master lighting program, no operation, activity, or lighting fixture shall create illumination on any adjacent property.

2.8 Mechanical and Rooftop Equipment.

(a) All exterior roof-mounted mechanical, heating and air conditioning equipment, and all appurtenances thereto, shall be completely screened from public view by parapet walls or roof screens that are architecturally treated so as to be consistent with the building architecture. Special consideration shall be provided for the viewsheds from adjacent rights-of-way that are at a higher elevation than the project site (e.g. Jurupa Street and the I-15 off-ramp).

(b) All ground-mounted utility equipment and structures, such as tanks, transformers, HVAC equipment, and backflow prevention devices, shall be located out of view from a public street, or adequately screened through the use of landscaping and/or decorative low garden walls.

2.9 Security Standards. The Project shall comply with all applicable requirements of Ontario Municipal Code Title 4 (Public Safety), Chapter 11 (Security Standards for Buildings).

2.10 Signs. All Project signage shall comply with the requirements of Ontario Development Code Division 8.1 (Sign Regulations).

2.11 Sound Attenuation. The Project shall be constructed and operated in a manner so as not to exceed the maximum interior and exterior noise levels set forth in Ontario Municipal Code Title 5 (Public Welfare, Morals, and Conduct), Chapter 29 (Noise).

2.12 Environmental Requirements.

(a) If human remains are found during project grading/excavation/construction activities, the area shall not be disturbed until any required investigation is completed by the County Coroner and Native American consultation has been completed (if deemed applicable).

(b) If any archeological or paleontological resources are found during project grading/excavation/construction, the area shall not be disturbed until the significance of the resource is determined. If determined to be significant, the resource shall be recovered by a qualified archeologist or paleontologist consistent with current standards and guidelines, or other appropriate measures implemented.

2.13 Indemnification. The applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer. The City of Ontario shall promptly notify the applicant of any such claim, action or proceeding, and the City of Ontario shall cooperate fully in the defense.

2.14 Additional Fees.

(a) Within 5 days following final application approval, the Notice of Determination ("NOD") filing fee shall be provided to the Planning Department. The fee shall be paid by check, made payable to the "Clerk of the Board of Supervisors", which shall be forwarded to the San Bernardino County Clerk of the Board of Supervisors, along with all applicable environmental forms/notices, pursuant to the requirements of the California Environmental Quality Act ("CEQA"). Failure to provide said fee within the time specified will result in the extension of the statute of limitations for the filing of a CEQA lawsuit from 30 days to 180 days.

(b) After the Project's entitlement approval, and prior to issuance of final building permits, the Planning Department's Plan Check and Inspection fees shall be paid at the rate established by resolution of the City Council.

2.15 Related Applications. Development Plan approval shall not be final and complete until such time that related File No. PMTT22-025 has been approved by the Planning Commission and the Addendum to TOP 2050 SEIR and File No. PSPA22-006 have been approved by the City Council.

2.16 Public Art. The Project is subject to the requirements of the City's Public Art Ordinance (Ontario Municipal Code Section 5-33.05. Private Art for Public Enjoyment in Commercial and Industrial Development Projects).

2.17 Final Occupancy. The Project Architect of record will certify that construction of each building site and the exterior elevations of each structure shall be completed in compliance with the approved plans. Any deviation to approved plans shall require a resubmittal to the Planning Department for review and approval prior to construction. The Occupancy Release Request Form/Architect Certificate of Compliance shall be provided prior to final occupancy. After the receipt of this Certification, the Planning Department will conduct a final site and exterior elevations inspection. The Owner's Representative and Contractor shall be present.

FROM: **Paul Ehrman, Sr. Deputy Fire Chief/Fire Marshal**
Fire Department

DATE: **September 12, 2022**

SUBJECT: **PDEV22-034 - A Development Plan to construct one industrial building totaling 344,260 square feet on a 16.65 acres of land located at 1350 and 1375 Woodruff Way, within the Commercial and Light Industrial land use district of the California Commerce Center Specific Plan (APN(s): 0238-201-41 and 0238-221-22). Related File(s): PSPA22-006**

☒ The plan **does** adequately address Fire Department requirements at this time.

☒ Standard Conditions of Approval apply, as stated below.

SITE AND BUILDING FEATURES:

A. 2019 CBC Type of Construction: Type IIIB

B. Type of Roof Materials: Panelized

C. Ground Floor Area(s): 344,260 Sq. Ft.

D. Number of Stories: 1

E. Total Square Footage: 344,260 Sq. Ft.

F. 2019 CBC Occupancy Classification(s): S

CONDITIONS OF APPROVAL:

1.0 GENERAL

☒ 1.1 The following are the Ontario Fire Department ("Fire Department") requirements for this development project, based on the current edition of the California Fire Code (CFC), and the current versions of the Fire Prevention Standards ("Standards.") It is recommended that the applicant or developer transmit a copy of these requirements to the on-site contractor(s) and that all questions or concerns be directed to the Bureau of Fire Prevention, at (909) 395-2029. For copies of Ontario Fire Department Standards please access the City of Ontario web site at www.ontarioca.gov/Fire/Prevention.

☒ 1.2 These Fire Department conditions of approval are to be included on any and all construction drawings.

2.0 FIRE DEPARTMENT ACCESS

☒ 2.1 Fire Department vehicle access roadways shall be provided to within 150 ft. of all portions of the exterior walls of the first story of any building, unless specifically approved. Roadways shall be paved with an all-weather surface and shall be a minimum of twenty-four (24) ft. wide. See Standard #B-004.

☒ 2.2 In order to allow for adequate turning radius for emergency fire apparatus, all turns shall be designed to meet the minimum twenty five feet (25') inside and forty-five feet (45') outside turning radius per Standard #B-005.

☒ 2.3 Fire Department access roadways that exceed one hundred and fifty feet (150') in length shall have an approved turn-around per Standard #B-002.

☒ 2.4 Access drive aisles which cross property lines shall be provided with CC&Rs, access easements, or reciprocating agreements, and shall be recorded on the titles of affected properties, and copies of same shall be provided at the time of building plan check.

☒ 2.5 "No Parking-Fire Lane" signs and /or red painted curbs with lettering are required to be installed in interior access roadways, in locations where vehicle parking would obstruct the minimum clear width requirement. Installation shall be per Standard #B-001.

☒ 2.6 Security gates or other barriers on fire access roadways shall be provided with a Knox brand key switch or padlock to allow Fire Department access. See Standards #B-003, B-004 and H-001.

☒ 2.7 Any time PRIOR to on-site combustible construction and/or storage, a minimum twenty-four (24) ft. wide circulating all weather access roads shall be provided to within 150 ft. of all portions of the exterior walls of the first story of any building, unless specifically approved by fire department and other emergency services.

3.0 WATER SUPPLY

☒ 3.1 The required fire flow per Fire Department standards, based on the 2019 California Fire Code, Appendix B, is 4000 gallons per minute (g.p.m.) for 4 hours at a minimum of 20 pounds per square inch (p.s.i.) residual operating pressure.

☒ 3.2 Off-site (public) fire hydrants are required to be installed on all frontage streets, at a minimum spacing of three hundred foot (300') apart, per Engineering Department specifications.

☒ 3.3 Buildings that exceed 100,000 square feet in floor area shall provide an onsite looped fire protection water line around the building(s.) The loops shall be required to have two or more points of connection from a public circulating water main.

☒ 3.4 The water supply, including water mains and fire hydrants, shall be tested and approved by the Engineering Department and Fire Department prior to combustible construction to assure availability and reliability for firefighting purposes.

4.0 FIRE PROTECTION SYSTEMS

☒ 4.2 Underground fire mains which cross property lines shall be provided with CC & R, easements, or reciprocating agreements, and shall be recorded on the titles of affected properties, and copies of same shall be provided at the time of fire department plan check. The shared use of private fire mains or fire pumps is allowable only between immediately adjacent properties and shall not cross any public street.

☒ 4.3 An automatic fire sprinkler system is required. The system design shall be in accordance with National Fire Protection Association (NFPA) Standard 13. All new fire sprinkler systems, except those in single family dwellings, which contain twenty (20) sprinkler heads or more shall be monitored by an approved listed supervising station. An application along with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.

☒ 4.5 Fire Department Connections (FDC) shall be located on the address side of the building within one hundred fifty feet (150') of a public fire hydrant on the same side of the street. Provide identification for all fire sprinkler control valves and fire department connections per Standard #D-007. Raised curbs adjacent to Fire Department connection(s) shall be painted red, five feet either side, per City standards.

☒ 4.6 A fire alarm system is required. The system design shall be in accordance with National Fire Protection Association (NFPA) Standard 72. An application along with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.

☒ 4.7 Portable fire extinguishers are required to be installed prior to occupancy per Standard #C-001. Please contact the Fire Prevention Bureau to determine the exact number, type and placement required.

5.0 BUILDING CONSTRUCTION FEATURES

☒ 5.1 The developer/general contractor is to be responsible for reasonable periodic cleanup of the development during construction to avoid hazardous accumulations of combustible trash and debris both on and off the site.

☒ 5.2 Approved numbers or addresses shall be placed on all new and existing buildings in such a position as to be plainly visible and legible from the street or road fronting the property. Multi-tenant or building projects shall have addresses and/or suite numbers provided on the rear of the building. Address numbers shall contrast with their background. See Section 9-1 6.06 of the Ontario Municipal Code and Standards #H-003 and #H-002.

☒ 5.6 Knox ® brand key-box(es) shall be installed in location(s) acceptable to the Fire Department. All Knox boxes shall be monitored for tamper by the building fire alarm system. See Standard #H-001 for specific requirements.

☒ 5.7 Placards shall be installed in acceptable locations on buildings that store, use or handle hazardous materials in excess of the quantities specified in the CFC. Placards shall meet the requirements of National Fire Protection Association (NFPA) Standard 704.

6.0 OTHER SPECIAL USES

☒ 6.1 The storage, use, dispensing, or handling of any hazardous materials shall be approved by the Fire Department, and adequate fire protection features shall be required. If hazardous materials are proposed, a Fire Department Hazardous Materials Information Packet, including Disclosure Form and Information Worksheet, shall be completed and submitted with Material Safety Data Sheets to the Fire Department along with building construction plans.

☒ 6.2 Any High Piled Storage, or storage of combustible materials greater than twelve (12') feet in height for ordinary (Class I-IV) commodities or storage greater than six feet (6') in height of high hazard (Group A plastics, rubber tires, flammable liquids, etc.) shall be approved by the Fire Department, and adequate fire protection features shall be required. If High Piled Storage is proposed, a Fire Department High Piled Storage Worksheet shall be completed and detailed racking plans or floor plans submitted prior to occupancy of the building.

☒ 6.3 Underground fuel tanks, their associated piping and dispensers shall be reviewed, approved, and permitted by Ontario Building Department, Ontario Fire Department, and San Bernardino County Fire Department Hazardous Materials Division. In fueling facilities, an exterior emergency pump shut-off switch shall be provided.

CITY OF ONTARIO
MEMORANDUM

TO: **Alexis Vaughn, Assistant Planner**

FROM: **Officer Tony Galban, Police Department**

DATE: **August 25, 2022**

SUBJECT: **PDEV22-025 - A DEVELOPMENT PLAN TO CONSTRUCT ONE INDUSTRIAL BUILDINGS TOTALING 344,260 SQUARE FEET, LOCATED AT 1350 AND 1375 WOODRUFF WAY.**

The "Standard Conditions of Approval" contained in Resolution No. 2017-027 apply. The applicant shall read and be thoroughly familiar with these conditions, including, but not limited to, the requirements below.

- Required lighting for all walkways, driveways, doorways, parking lots, hallways and other areas used by the public shall be provided. Lights shall operate via photosensor. Photometrics shall be provided to the Police Department and include the types of fixtures proposed and demonstrate that such fixtures meet the vandal-resistant requirement. Planned landscaping shall not obstruct lighting.
- Rooftop addresses shall be installed on the buildings as stated in the Standard Conditions. The numbers shall be at a minimum 6 feet tall and 2 foot wide, in reflective white paint on a flat black background, and oriented with the bottom of the numbers towards the addressed street. Associated letters shall also be included.
- First floor common stairwells shall be constructed to either allow for visibility through the stairwell risers or to prohibit public access to the areas behind stairwells
- The Applicant shall comply with construction site security requirements as stated in the Standard Conditions.

The Applicant is invited to contact Officer Tony Galban at (909) 408-1006 with any questions or concerns regarding these conditions.

CITY PROJECT ENGINEER & PHONE NO:	**David Zurita (909) 395-2155**
CITY PROJECT PLANNER & PHONE NO:	**Alexis Vaughn (909) 395-2416**
DAB MEETING DATE:	**September 6, 2023**
PROJECT NAME / DESCRIPTION:	**A Tentative Parcel Map to create one parcel in conjunction with a request to construct one industrial building located within the California Commerce Center Specific Plan.**
LOCATION:	**1350 and 1375 Woodruff Way (APN: 0238-201-41, 0238-221-22)**
APPLICANT:	**B9 Wanamaker Owner LLC**
REVIEWED BY:	Raymond Lee 8/21/23 **Raymond Lee, P.E.** **Date** **Assistant City Engineer**
APPROVED BY:	8-22-23 **Khoi Do, P.E.** **Date** **City Engineer**

Last Revised: 8/17/2023

THIS PROJECT SHALL COMPLY WITH THE REQUIREMENTS SET FORTH IN THE GENERAL STANDARD CONDITIONS OF APPROVAL ADOPTED BY THE CITY COUNCIL (RESOLUTION NO. 2017-027) AND THE PROJECT SPECIFIC CONDITIONS OF APPROVAL SPECIFIED HEREIN. ONLY APPLICABLE CONDITIONS OF APPROVAL ARE CHECKED. THE APPLICANT SHALL BE RESPONSIBLE FOR THE COMPLETION OF ALL APPLICABLE CONDITIONS OF APPROVAL PRIOR TO FINAL MAP OR PARCEL MAP APPROVAL, ISSUANCE OF PERMITS AND/OR OCCUPANCY CLEARANCE, AS SPECIFIED IN THIS REPORT.

1. PRIOR TO FINAL MAP OR PARCEL MAP APPROVAL, APPLICANT SHALL:

			Check When Complete
☒	**1.01**	**Dedicate to the City of Ontario, the right-of-way, described below:** **A. The right-of-way required to construct the proposed cul-de-sac at Woodruff Way per the approved tentative parcel map.**	☐
☒	**1.02**	**Dedicate to the City of Ontario, the following easement(s):** **A. A easement for sidewalk purposes along the entire project frontage on Rockefeller Avenue and Wanamaker Avenue, 5-foot typical and varied width at the accessible ramp.**	☐
☐	1.03	Restrict vehicular access to the site as follows: _____	☐
☒	**1.04**	**Vacate the following street(s) and/or easement(s):** **A. All interfering on-site easements shall be quitclaimed, vacated, and/or submit non-interference letter from affected owner/utility company.** **B. Vacate Woodruff Way and the public utility easement from Wanamaker Avenue to the proposed cul-de-sac and the public utility easements within Woodruff Way.** **C. Any public infrastructure (street lights, fire hydrants, etc.) located within the vacation of Woodruff Way shall be removed.** **D. Amend record drawings S10962 and W12248 for the removal of the sewer and water mains in Woodruff Way.**	☐
☐	1.05	Submit a copy of a recorded private reciprocal use agreement or easement. The agreement or easement shall ensure, at a minimum, common ingress and egress and joint maintenance of all common access areas and drive aisles.	☐
☐	1.06	Provide (original document) Covenants, Conditions and Restrictions (CC&Rs) as applicable to the project and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&Rs shall provide for, but not be limited to, common ingress and egress, joint maintenance responsibility for all common access improvements, common facilities, parking areas, utilities, median and landscaping improvements and drive approaches, in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project. The CC&Rs shall also address the maintenance and repair responsibility for public improvements/utilities (sewer, water, storm drain, recycled water, etc.) located within open space/easements. In the event of any maintenance or repair of these facilities, the City shall only restore disturbed areas to current City Standards.	☐
☐	1.07	For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at *http://tceplumecleanup.com/*), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at *http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658*.	☐

☐ 1.08 File an application for Reapportionment of Assessment, together with payment of a reapportionment processing fee, for each existing assessment district listed below. Contact the Financial Services Department at (909) 395-2124 regarding this requirement. ☐

(1) _____

(2) _____

☒ **1.09 Prepare a fully executed Subdivision Agreement (on City approved format and forms) with accompanying security as required, or complete all public improvements.** ☐

☒ **1.10 Provide a monument bond (i.e. cash deposit) in an amount calculated by the City's approved cost estimate spreadsheet (available for download on the City's website: www.ontarioca.gov) or as specified in writing by the applicant's Registered Engineer or Licensed Land Surveyor of Record and approved by the City Engineer, whichever is greater.** ☐

☒ **1.11 Provide a preliminary title report current to within 30 days.** ☐

☐ 1.12 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2341 to initiate the CFD application process. ☐

☐ 1.13 Ontario Ranch Developments: ☐

☐ 1) Provide evidence of final cancellation of Williamson Act contracts associated with this tract, prior to approval of any final subdivision map. Cancellation of contracts shall have been approved by the City Council.

☐ 2) Provide evidence of sufficient storm water capacity availability equivalents (Certificate of Storm Water Treatment Equivalents).

☐ 3) Provide evidence of sufficient water availability equivalents (Certificate of Net MDD Availability).

☐ 1.14 Other conditions: _____ ☐

2. PRIOR TO ISSUANCE OF ANY PERMITS, APPLICANT SHALL:

A. GENERAL
(Permits includes Grading, Building, Demolition and Encroachment)

☒ **2.01 Record Parcel Map No. 20559 pursuant to the Subdivision Map Act and in accordance with the City of Ontario Municipal Code.** ☐

☒ **2.02 Submit a PDF of the recorded map to the City Engineer's office.** ☐

☒ **2.03 Note that the subject parcel is a recognized parcel in the City of Ontario per the following:** ☐
- **A. LLA96-19, formerly Parcel Map 14781 Parcels 4, 5, 6, and portions of 3 and 7.**
- **B. Parcel Map 9752 Parcel 2.**

☐ 2.04 Note that the subject parcel is an 'unrecognized' parcel in the City of Ontario and shall require a Certificate of Compliance to be processed unless a deed is provided confirming the existence of the parcel prior to the date of March 4, 1972. ☐

☐ 2.05 Apply for a: ☐

☐ Certificate of Compliance with a Record of Survey;

☐ Lot Line Adjustment (Record a Conforming Deed with the County of San Bernardino within six months of the recordation of the Lot Line Adjustment to conform the new LLA legal description. Submit a copy of the recorded Conforming Deed to the Engineering Department.);

☐ Make a Dedication of Easement.

☐ 2.06 Provide (original document) Covenants, Conditions and Restrictions (CC&R's), as applicable to the project, and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&R's shall provide for, but not be limited to, common ingress and egress, joint maintenance of all common access improvements, common facilities, parking areas, utilities and drive approaches in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project. ☐

☐ 2.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at *http://tceplumecleanup.com/*), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at *http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658*. ☐

☒ **2.08 Submit a soils/geology report.** ☐

☐ 2.09 Other Agency Permit/Approval: Submit a copy of the approved permit and/or other form of approval of the project from the following agency or agencies: ☐

- ☐ State of California Department of Transportation (Caltrans)
- ☐ San Bernardino County Road Department (SBCRD)
- ☐ San Bernardino County Flood Control District (SBCFCD)
- ☐ Federal Emergency Management Agency (FEMA)
- ☐ Cucamonga Valley Water District (CVWD) for sewer/water service
- ☐ United States Army Corps of Engineers (USACE)
- ☐ California Department of Fish & Game
- ☐ Inland Empire Utilities Agency (IEUA)
- ☐ Other: _____

☐ 2.10 Dedicate to the City of Ontario the right-of-way described below: ☐

_____ feet on _____

Property line corner 'cut-back' required at the intersection of _____ and _____.

☐ 2.11 Dedicate to the City of Ontario the following easement(s):_____ ☐

_____

☐ 2.12 Vacate the following street(s) and/or easement(s): ☐

A. All interfering on-site easements shall be quitclaimed, vacated, and/or submit non-interference letter from affected owner/utility company.

☐ 2.13 Ontario Ranch Developments: ☐

☐ 1) Submit a copy of the permit from the San Bernardino County Health Department to the

Engineering Department and the Ontario Municipal Utilities Company (OMUC) for the destruction/abandonment of the on-site water well. The well shall be destroyed/abandoned in accordance with the San Bernardino County Health Department guidelines.

☐ 2) Make a formal request to the City of Ontario Engineering Department for the proposed temporary use of an existing agricultural water well for purposes other than agriculture, such as grading, dust control, etc. Upon approval, the Applicant shall enter into an agreement with the City of Ontario and pay any applicable fees as set forth by said agreement.

☐ 3) Design proposed retaining walls to retain up to a maximum of three (3) feet of earth. In no case shall a wall exceed an overall height of nine (9) feet (i.e. maximum 6-foot high wall on top of a maximum 3-foot high retaining wall.

☐ 2.14 Submit a security deposit to the Engineering Department to guarantee construction of the public improvements required herein valued at 100% of the approved construction cost estimate. Security deposit shall be in accordance with the City of Ontario Municipal Code. Security deposit will be eligible for release, in accordance with City procedure, upon completion and acceptance of said public improvements. ☐

☒ **2.15 The applicant/developer shall submit all necessary survey documents prepared by a Licensed Surveyor registered in the State of California detailing all existing survey monuments in and around the project site. These documents are to be reviewed and approved by the City Survey Office.** ☐

☒ **2.16 Pay all Development Impact Fees (DIF) to the Building Department. Storm Drain Development Impact Fee, approximately $389,532.52, shall be paid to the Building Department. Final fee shall be determined based on the approved site plan and the DIF rate at the time of payment.** ☐

☒ **2.17 Other conditions:** ☐

A. <u>Final Utilities Systems Map (USM):</u> Submit a Final Utilities Systems Map (FUSM) as part of the precise grading plan submittal that meets all the City's USM requirements. These requirements include to show and label all existing and proposed utilities (including all appurtenances such as backflow devices, DCDAs, etc.), sizes, points of connection, and any easements. The final utility design shall comply with all Division of Drinking Water (CCR §64572) Separation Requirements. See Utility Systems Map (USM) Requirements document for details.

a. The proposed utilities, utility alignments, and Public Rights-of-Way/Public Utility Easements shown on the Conceptual Utilities Systems Map (CUSM) and other Entitlement documents are not considered final and shall be revised during Final Design to meet all City Design Guidelines, Standards, City Requirements, and all of the Conditions of Approval contained in this document.

B. <u>Design Utilities to comply Department of Drinking Water (DDW) Separation Requirements and California Code of Regulations (CCR) § 64572 Compliance:</u> All DDW Separation Requirements under CCR § 64572 must be met. In order to assure compliance with CCR § 64572, on all design documents and plans: label the separation dimensions, measure from outside wall of the conveyances, between public potable water to any other public or private non-potable conveyance (sewer, storm drain, storm water, storm water infiltration, recycled water, recycled water irrigation, high pressure gas/petroleum, etc) whether publicly or privately maintained; provide one label per sheet per conveyance and additional labels where separation dimensions and alignments change; and, for any facilities not currently meeting the separation requirements, revise plans/documents so that the facilities meet the separations requirements.

C. <u>Unused Service Abandonment</u>: All adjacent water services (along with connected appurtenances) and sewer laterals and main stubs along the frontages of the project site not used to provide service to this Development Project shall be abandoned back to the main in accordance with City Standards and Practices.

D. <u>Existing Mains Abandonment:</u> Abandon existing public water and sewer mains within the proposed vacated Woodruff Avenue portion per city current standards and guidelines.

B. PUBLIC IMPROVEMENTS
(See attached Exhibit 'A' for plan check submittal requirements.)

☒ **2.18** **Design and construct full public improvements in accordance with the City of Ontario Municipal Code, current City standards and specifications, master plans and the adopted specific plan for the area, if any. These public improvements shall include, but not be limited to, the following (checked boxes):**

Improvement	Rockefeller Avenue	Wanamaker Avenue	Jurupa Street	Woodruff Way
Curb and Gutter	☐ New; ___ ft. from C/L ☐ Replace damaged ☐ Remove and replace	☒ **New**[2.18.A] ☐ Replace damaged ☐ Remove and replace	☐ New; ___ ft. from C/L ☐ Replace damaged ☐ Remove and replace	☒ **New; along new cul-de-sac** ☐ Replace damaged ☐ Remove and replace

Removal of Improvements	_____ _____ _____	_____ _____ _____	_____ _____ _____	_____ _____ _____
Other Improvements	_____ _____ _____	_____ _____ _____	_____ _____ _____	_____ _____ _____

Specific notes for improvements listed in item no. 2.18, above:

A. Construct new curb and gutter where Woodruff was vacated.
B. Construct a new ADA access ramp at the southeast corner of Rockefeller Avenue and Wannamaker Avenue per City Standard Drawing.
C. Add truncated domes to the existing ADA access ramp at the northwest corner of Woodruff and Jurupa.

☒ **2.19 Construct a 2" asphalt concrete (AC) grind and overlay on the following street(s):** ☐

A. Across the entire project frontage along Jurupa Street, curb to median.
B. Across the entire project frontage along Rockefeller Avenue, curb to centerline.
C. Across the entire project frontage along Wanamaker Avenue, curb to curb.
D. Across the entirety of the new cul-de-sac on Woodruff Way.

☐ 2.20 Reconstruction of the full pavement structural section, per City of Ontario Standard Drawing number 1011, may be required based on the existing pavement condition and final street design. Minimum limits of reconstruction shall be along property frontage, from street centerline to curb/gutter. ☐

☐ 2.21 Make arrangements with the Cucamonga Valley Water District (CVWD) to provide ☐ water service ☐ sewer service to the site. This property is within the area served by the CVWD and Applicant shall provide documentation to the City verifying that all required CVWD fees have been paid. ☐

☐ 2.22 Overhead utilities shall be under-grounded, in accordance with Title 7 of the City's Municipal Code (Ordinance No. 2804 and 2892). Developer may pay in-lieu fee, approximately _____, for undergrounding of utilities in accordance with Section 7-7.302.e of the City's Municipal Code. ☐

☐ 2.23 Other conditions: _____ ☐

C. SEWER

☒ **2.24 An 8-inch sewer main is available for connection by this project in Woodruff Way. (Ref: Sewer plan bar code: S10962)** ☐

☐ 2.25 Design and construct a sewer main extension. A sewer main is not available for direct connection. The closest main is approximately _____ feet away. ☐

☐ 2.26 Submit documentation that shows expected peak loading values for modeling the impact of the subject project to the existing sewer system. The project site is within a deficient public sewer system area. Applicant shall be responsible for all costs associated with the preparation of the model. Based on the results of the analysis, Applicant may be required to mitigate the project impact to the deficient public sewer system, including, but not limited to, upgrading of existing sewer main(s), construction of new sewer main(s) or diversion of sewer discharge to another sewer. ☐

☒ **2.27 Other conditions:** ☐

A. Terminus Manhole: Construct terminus manhole at the end of the sewer main within the proposed Woodruff cul-de-sac and away from the curb and gutter.

a. Terminus manhole must have 10' straight pipe pre and post with slope range of greater or equal to 0.4% and less or equal to 2%.

B. Monitoring Manhole: Construct a monitoring manhole on private property and immediately back of the proposed property line.

C. Proposed Sewer Lateral Alignment and Monitoring Manhole Location: Align the proposed sewer lateral to commence at the proposed onsite cleanout and terminate at the proposed terminus manhole (in public RoW), then place the proposed sewer monitoring manhole (on private PL) immediately back of the property line along this sewer lateral. This is to achieve the maximum sewer spacing from the catch basin and meet the 10' minimum straight pipe alignment for the pre and post piping of the monitoring manhole.

D. Note the following:
The Occupant/Applicant shall apply for a Wastewater Discharge Permit for their establishment and shall comply will all the requirements of the Wastewater Discharge Permit. The application can be downloaded from the City's Utilities website in the drop-down of the "Pretreatment" section (www.ontarioca.gov/OMUC/Utilities). Please select the appropriate application that applies to your type of business. Requirements of the Wastewater Discharge Permit may include, but not limited to: Installation of wastewater pretreatment equipment, such as grease interceptors or clarifiers. For wastewater permit application questions, please contact:
Michael Birmelin, Environmental Programs Manager
omucenvironmental@ontarioca.gov
Phone: (909) 395-261

D. WATER

☒ **2.28 A 12-inch water main is available for connection by this project in Wanamaker Avenue. (Ref: Water plan bar code: W11801)** ☐

A 12-inch water main is available for connection by this project in Woodruff Way. (Ref: Water plan bar code: W12248)

☐ 2.29 Design and construct a water main extension. A water main is not available for direct connection. The closest main is approximately _____ feet away. ☐

☒ **2.30 Other conditions:** ☐

A. Fire Hydrants Installation:
- **a. Construct four fire hydrants along Wannamaker with 300' maximum space between fire hydrants.**
- **b. Abandon one existing fire hydrant per city's guidelines, standards, and/or requirements and a construction a new one near the proposed abandon fire hydrant on Rockefeller.**

B. Double Check Detector Assembly (DCDA): Provide two DCDAs, loop them together onsite.

E. RECYCLED WATER

☒ **2.31 An 8-inch recycled water main is available for connection by this project in Jurupa Street. (Ref: Recycled Water plan bar code: P10296)** ☐

☐ 2.32 Design and construct an on-site recycled water system for this project. A recycled water main does exist in the vicinity of this project. ☐

☐ 2.33 Design and construct an on-site recycled water ready system for this project. A recycled water main does not currently exist in the vicinity of this project but is planned for the near future. If Applicant would like to connect to this recycled water main when it becomes available, the cost for the connection shall be borne solely by the Applicant. ☐

☐ 2.34 Submit one (1) electronic copy, in PDF format, of the Engineering Report (ER), for the use of recycled water to OMUC's Water Quality Programs at OMUCWQPlanCheck@ontarioca.gov for review and subsequent submittal to the California State Water Board (Division of Drinking Water) for final approval. ☐

Note: Review and approval process may take up to three (3) months. Contact the OMUC's Water Quality Programs at (909) 395-2678 or email OMUCWQPlanCheck@ontarioca.gov regarding this requirement.

☐ 2.35 Submit one (1) electronic copy, in PDF format, of the Landscape Plans (on-site & off-site) to OMUC's Water Quality Programs at OMUCWQPlanCheck@ontarioca.gov for review and approval.

☒ **2.36 Other conditions:** ☐

A. Recycled Water: This project is required to use recycled water, therefore, do not abandon any of existing recycled water services and make use of them as required for irrigation. However, please verify that these services are available to connect, if not, then must construct new service(s) as required.

B. City Ordinance 2689: This development shall comply with City Ordinance 2689 and make use of recycled water for all approved uses, including but not limited to landscape irrigation. Appropriately sized public and private mains shall be installed throughout the Project to meet this requirement, as approved by the City

C. RW Program Requirements: In order to receive RW service, the applicant shall comply with the following:
- **a. *Prior to Precise Grading Plan Approval and Building Permits Issuance:***
  - **i. Provide two hard copies and the digital files (in PDF and AutoCAD format) for both on-site and off-site utility plans, including landscape and irrigation improvements.**
  - **ii. Submit an Engineering Report (ER) to the City detailing recycled water usage for review and approval by the City and the State. The review process for the ER is typically 3 months. City will coordinate the State's approval of the ER.**
  - **iii. For details, contact Cynthia Heredia-Torres at (909) 395-2647 or ctorres@ontarioca.gov.**
- **b. *Prior to Occupancy Release/Finalizing:***

i. **Pass start-up and cross-connection test successfully.**
ii. **Provide evidence demonstrating the training of on-site supervisor or designee as determined in the ER.**

F. TRAFFIC / TRANSPORTATION

☐ 2.37 Submit a focused traffic impact study, prepared and signed by a Traffic/Civil Engineer registered in the State of California. The study shall address, but not be limited to, the following issues as required by the City Engineer: ☐
1. On-site and off-site circulation
2. Traffic level of service (LOS) at 'build-out' and future years
3. Impact at specific intersections as selected by the City Engineer

☐ 2.38 New traffic signal installations shall be added to Southern California Edison (SCE) customer account number # 2-20-044-3877. ☐

☒ **2.39 Other conditions:** ☐

A. The Applicant/Developer shall be responsible to design and construct street improvements along property frontage in accordance with conditions issued by City's Land Development Division. These, and all other street improvements required herein, shall include, but not be limited to, sidewalk, LED street lights, signing and striping, and parkway landscaping.

B. Proposed driveways onto Rockefeller Avenue shall be restricted to right-in/right-out access due to the existing raised median on Rockefeller Avenue.

C. Design and construct proposed driveways in accordance with City of Ontario Standard Drawing No. 1204 for Commercial Driveway.

D. The Applicant/Developer shall be responsible to relocate the existing public street light service pedestal at the southwest corner of Wanamaker Avenue and Woodruff Way. The Applicant/Developer shall be responsible to construct all street light improvements necessary to accommodate the service pedestal relocation. The Applicant/Developer shall also install smart nodes on all new street light fixtures along project frontages.

E. The Applicant/Developer shall be responsible to replace any existing street light fixtures along its project frontage of Jurupa Street, Woodruff Way, Rockefeller Avenue, and Wanamaker Avenue with the current City approved LED equivalent fixture in accordance with City's Approved Material List LED Luminaires. The Applicant/Developer shall also install smart nodes on all existing street light fixtures along project frontage.

F. The Applicant/Developer shall be responsible to modify the signing/striping along Wanamaker Avenue to remove the existing two-way left turn lane break currently in place for Woodruff Way.

G. Parking restrictions shall remain in place along all property frontage streets.

H. All landscaping, block walls, and other obstructions shall be compatible with the stopping sight distance requirements per City of Ontario Standard Drawing No. 1309.

I. The Applicant/Developer's engineer-of-record shall meet with City Engineering staff prior to designing and submitting for plan check the signing/striping, street lighting and traffic signal design plans to define limits of improvements.

G. DRAINAGE / HYDROLOGY

☒ **2.40 A 96-inch storm drain main is available to accept flows from this project in Jurupa Street. (Ref: Storm Drain plan bar code: D10718)** ☐

☐ 2.41 Submit a hydrology study and drainage analysis, prepared and signed by a Civil Engineer registered in the State of California. The study shall be prepared in accordance with the San Bernardino County Hydrology Manual and City of Ontario standards and guidelines. Additional drainage facilities, including, but not limited to, improvements beyond the project frontage, may be required to be designed and constructed, by Applicant, as a result of the findings of this study. ☐

☐ 2.42 An adequate drainage facility to accept additional runoff from the site does not currently exist downstream of the project. Design and construct a storm water detention facility on the project site. 100-year post-development peak flow shall be attenuated such that it does not exceed 80% of pre-development peak flows, in accordance with the approved hydrology study and improvement plans. ☐

☐ 2.43 Submit a copy of a recorded private drainage easement or drainage acceptance agreement to the Engineering Department for the acceptance of any increase to volume and/or concentration of historical drainage flows onto adjacent property, prior to approval of the grading plan for the project. ☐

☐ 2.44 Comply with the City of Ontario Flood Damage Prevention Ordinance (Ordinance No. 2409). The project site or a portion of the project site is within the Special Flood Hazard Area (SFHA) as indicated on the Flood Insurance Rate Map (FIRM) and is subject to flooding during a 100-year frequency storm. The site plan shall be subject to the provisions of the National Flood Insurance Program. ☐

☐ 2.45 Other conditions: _____ ☐

H. STORM WATER QUALITY / NATIONAL POLLUTANT DISCHARGE AND ELIMINATION SYSTEM (NPDES)

☐ 2.46 401 Water Quality Certification/404 Permit – Submit a copy of any applicable 401 Certification or 404 Permit for the subject project to the City project engineer. Development that will affect any body of surface water (i.e. lake, creek, open drainage channel, etc.) may require a 401 Water Quality Certification from the California Regional Water Quality Control Board, Santa Ana Region (RWQCB) and a 404 Permit from the United States Army Corps of Engineers (USACE). The groups of water bodies classified in these requirements are perennial (flow year round) and ephemeral (flow during rain conditions, only) and include, but are not limited to, direct connections into San Bernardino County Flood Control District (SBCFCD) channels. ☐
If a 401 Certification and/or a 404 Permit are not required, a letter confirming this from Applicant's engineer shall be submitted.
Contact information: USACE (Los Angeles District) (213) 452-3414; RWQCB (951) 782-4130.

☒ **2.47 Submit a Water Quality Management Plan (WQMP). This plan shall be approved by the Engineering Department prior to approval of any grading plan. The WQMP shall be submitted, utilizing the current San Bernardino County Stormwater Program template, available at: http://www.sbcounty.gov/dpw/land/npdes.asp.** ☐

☒ **2.48 Design and construct a Connector Pipe Trash Screen or equivalent Trash Treatment Control Device, per catch basin located within or accepting flows tributary of a Priority Land Use (PLU) area that meets the Full Capture System definition and specifications, and is on the Certified List of the State Water Resources Control Board. The device shall be adequately sized per catch basin and include a deflector screen with vector control access for abatement application, vertical support bars, and removable component to facilitate maintenance and cleaning.** ☐

☒ **2.49 Other conditions:** ☐

A. Activities resulting in land disturbance of one acre or more is required to obtain coverage under the Construction General Permit (CGP). The owner is the legally responsible person (LRP) of the site and shall have a Stormwater Pollution Prevention Plan (SWPPP) developed and submitted through the SMARTS website at https://smarts.waterboards.ca.gov/smarts/faces/SwSmartsLogin.xhtml

B. All Priority Land Use (PLU): Land use consisting of high-density residential, defined as a land use with at least ten (10) dwelling units per acre, industrial, commercial, mixed urban, and public transportation station land uses shall comply with the statewide Trash Provisions adopted by the State Water Resources Control Board (SWRCB).

J. SPECIAL DISTRICTS

☐ 2.50 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2341 to initiate the CFD application process. ☐

☐ 2.51 Other conditions: _____ ☐

K. FIBER OPTIC

☒ **2.52 A fiber optic line is available for connection by this project in Rockefeller Avenue. (Ref: Fiber Optic Drawing Number: O10597)** ☐

☒ **2.53 Design and construct fiber optic system to provide access to the City's conduit and fiber optic system per the City's Fiber Optic Master Plan. Building entrance conduits shall start from the closest OntarioNet hand hole constructed along the project frontage in the ROW and shall terminate in the main telecommunications room for each building. Conduit infrastructure shall interconnect with the primary and/or secondary backbone fiber optic conduit system at the nearest OntarioNet hand hole. Generally located near the southwest corner of Rockefeller Avenue and Wanamaker Avenue.** ☐

☒ **2.54 Refer to the City's Fiber Optic Master Plan for design and layout guidelines. Contact the Broadband Operations Department at (909) 395-2000, regarding this requirement.** ☐

3. PRIOR TO ISSUANCE OF A CERTIFICATE OF OCCUPANCY, APPLICANT SHALL:

☒ **3.01 Set new monuments in place of any monuments that have been damaged or destroyed as a result of construction of the subject project. Monuments shall be set in accordance with City of Ontario standards and to the satisfaction of the City Engineer.** ☐

☒ **3.02 Complete all requirements for recycled water usage.** ☐

☒ **1) Procure from the OMUC a copy of the letter of confirmation from the California Department of Public Health (CDPH) that the Engineering Report (ER) has been reviewed and the subject site is approved for the use of recycled water.**

☒ **2) Obtain clearance from the OMUC confirming completion of recycled water improvements and passing of shutdown tests and cross connection inspection, upon availability/usage of recycled water.**

☒ **3) Complete education training of on-site personnel in the use of recycled water, in accordance with the ER, upon availability/usage of recycled water.**

☒ **3.03 The applicant/developer shall submit all final survey documents prepared by a Licensed Surveyor registered in the State of California detailing all survey monuments that have been preserved, revised, adjusted or set along with any maps, corner records or Records of Survey needed to comply with these Conditions of Approvals and the latest edition of the California Professional Land Survey Act. These documents are to be reviewed and approved by the City Survey Office.** ☐

☐ 3.04 Ontario Ranch Projects: For developments located at an intersection of any two collector or arterial streets, the applicant/developer shall set a monument if one does not already exist at that intersection. Contact the City Survey office for information on reference benchmarks, acceptable methodology and required submittals. ☐

☒	**3.05**	**Confirm payment of all Development Impact Fees (DIF) to the Building Department.**	☐
☒	**3.06**	**Submit electronic copies (PDF and Auto CAD format) of all approved improvement plans, studies and reports (i.e. hydrology, traffic, WQMP, etc.).**	☐

4. PRIOR TO FINAL ACCEPTANCE, APPLICANT SHALL:

☒	**4.01**	**Complete all Conditions of Approval listed under Sections 1-3 above.**	☐
☒	**4.02**	**Pay all outstanding fees pursuant to the City of Ontario Municipal Code, including but not limited to, plan check fees, inspection fees and Development Impact Fees.**	☐
☒	**4.03**	**The applicant/developer shall submit a written request for the City's final acceptance of the project addressed to the City Project Engineer. The request shall include a completed Acceptance and Bond Release Checklist, state that all Conditions of Approval have been completed and shall be signed by the applicant/developer. Upon receipt of the request, review of the request shall be a minimum of 10 business days. Conditions of Approval that are deemed incomplete by the City will cause delays in the acceptance process.**	☐
☒	**4.04**	**Submit record drawings (PDF) for all public improvements identified within Section 2 of these Conditions of Approval.**	☐

EXHIBIT 'A'

ENGINEERING DEPARTMENT
First Plan Check Submittal Checklist

Project Number: PDEV22-034 , and Parcel Map No. 20559

The following items are required to be included with the first plan check submittal:

1. ☒ **A copy of this check list**
2. ☒ **Payment of fee for Plan Checking**
3. ☒ **Engineering Cost Estimate (on City form) with engineer's wet signature and stamp.**
4. ☒ **Project Conditions of Approval**
5. ☒ **A PDF (electronic submittal) of each required improvement plan at every submittal.**
6. ☐ Potable and Recycled Water demand calculations (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size).
7. ☒ **Public Street improvement plan with street cross-sections**
8. ☐ Public Water improvement plan (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size)
9. ☐ Recycled Water improvement plan (include recycled water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size and an exhibit showing the limits of areas being irrigated by each recycled water meter)
10. ☐ Public Sewer improvement plan
11. ☐ Public Storm Drain improvement plan
12. ☒ **Public Street Light improvement plan**
13. ☒ **Signing and Striping improvement plan**
14. ☒ **Fiber Optic plan (include Auto CAD electronic submittal)**
15. ☐ HOA Landscape improvement plans. Show corner sight line distance per engineering standard drawing 1309.
16. ☐ CFD Landscape improvement plans. Show corner sight line distance per engineering standard drawing 1309.
17. ☒ **Dry Utility plans within public right-of-way (at a minimum the plans must show existing and ultimate right-of-way, curb and gutter, proposed utility location including centerline dimensions, wall to wall clearances between proposed utility and adjacent public line, street work repaired per Standard Drawing No. 1306. Include Auto CAD electronic submittal)**
18. ☐ Traffic Signal improvement plan and One (1) copy of Traffic Signal Specifications with modified Special Provisions. Please contact the Traffic Division at (909) 395-2154 to obtain Traffic Signal Specifications.
19. ☒ **Water Quality Management Plan (WQMP), including the approved Preliminary WQMP (PWQMP).**
20. ☐ Hydrology/Drainage study
21. ☒ **Soils/Geology report**

22. ☒ **Payment for Final Map/Parcel Map processing fee**

23. ☒ **Final Map/Parcel Map**

24. ☒ **Approved Tentative Map**

25. ☒ **Preliminary Title Report (current within 30 days)**

26. ☒ **Traverse Closure Calculations**

27. ☒ **One (1) set of supporting documents and maps (legible copies): referenced improvement plans (full size), referenced record final maps/parcel maps (full size, 18”x26”), Assessor’s Parcel map (full size, 11”x17”), recorded documents such as deeds, lot line adjustments, easements, etc.**

28. ☒ **Engineering Report and an electronic file (include PDF format electronic submittal) for recycled water use**

29. ☒ **Other:**
    A. **Amend record drawings S10962 and W12248 for the removal of the sewer and water mains in Woodruff Way.**

CITY OF ONTARIO
MEMORANDUM

DATE:	April 10, 2023
TO:	David Zurita, Engineering
CC:	Alexis Vaughn, Planning
FROM:	Peter Tran, Utilities Engineering
SUBJECT:	DPR #2 – Conditions of Approval (COA) REV.- Utilties Comments (**#8865 & #8866**)
PROJECT NO.:	PDEV22-034 & PMTT22-025 (A Development Plan to demolish 2 exist. bldgs and Construct a 346,260 sqft ind. bldg. on 16.65 acres of land at 1350 and 1375 Woodruff Way)

BRIEF DESCRIPTION

A Development Plan to construct one industrial building totaling 344,260 square feet on 16.65 acres of land located at 1350 and 1375 Woodruff Way, within the Commercial and Light Industrial land use district of the California Commerce Center Specific Plan (APN(s): 0238-201-41 and 0238-221-22). Related File(s): PSPA22-006.

OMUC UTILITIES ENGINEERING DIVISION
CONDITIONS OF APPROVAL

CONDITIONS OF APPROVAL: *The **Ontario Municipal Utilities Company (OMUC) Utilities Engineering Division** recommends this application for approval subject to the Conditions of Approval outlined below and compliance with the City's Design Development Guidelines, Specifications Design Criteria, and City Standards. The Applicant shall be responsible for the compliance with and the completion of all the following applicable Conditions of Approval prior to the following milestones and subject to compliance with City's Design Development Guidelines, Specifications Design Criteria, and City Standards:*

1. Standard Conditions of Approval: Project shall comply with the requirements as set forth in the Amendment to the Standard Conditions of Approval for New Development Projects adopted by the City Council (Resolution No. 2017-027) on April 18, 2017, or as amended or superseded by Council Resolution; as well as the project-specific conditions/requirements as outlined below.

Prior to Issuance of Any Permits (Grading, Building, Demolition and Encroachment), unless other timeline milestones are specified by individual conditions below, the Applicant Shall:

General Conditions (Section 2.A, Other conditions): The Applicant shall comply with the following:

2. Final Utilities Systems Map (USM): Submit a Final Utilities Systems Map (FUSM) as part of the precise grading plan submittal that meets all the City's USM requirements. These requirements include to show and label all existing and proposed utilities (including all appurtenances such as backflow devices, DCDAs, etc.), sizes, points of connection, and any easements. The final utility design shall comply with all Division of Drinking Water (CCR §64572) Separation Requirements. See Utility Systems Map (USM) Requirements document for details.
    a. The proposed utilities, utility alignments, and Public Rights-of-Way/Public Utility Easements shown on the Conceptual Utilities Systems Map (CUSM) and other Entitlement documents are not considered final and shall be revised during Final Design to meet all City Design Guidelines, Standards, City Requirements, and all of the Conditions of Approval contained in this document
3. Design Utilities to comply Department of Drinking Water (DDW) Separation Requirements and California Code of Regulations (CCR) § 64572 Compliance: All DDW Separation Requirements under CCR § 64572 must be met. In order to

assure compliance with CCR § 64572, on all design documents and plans: label the separation dimensions, measure from outside wall of the conveyances, between public potable water to any other public or private non-potable conveyance (sewer, storm drain, storm water, storm water infiltration, recycled water, recycled water irrigation, high pressure gas/petroleum, etc) whether publicly or privately maintained; provide one label per sheet per conveyance and additional labels where separation dimensions and alignments change; and, for any facilities not currently meeting the separation requirements, revise plans/documents so that the facilities meet the separations requirements.

4. Unused Service Abandonment: All adjacent water services (along with connected appurtenances) and sewer laterals and main stubs along the frontages of the project site not used to provide service to this Development Project shall be abandoned back to the main in accordance with City Standards and Practices.
5. Existing Mains Abandonment: Abandon existing public water and sewer mains within the proposed vacated Woodruff Avenue portion per city current standards and guidelines.

Potable Water Conditions (Section 2.D): The Applicant shall comply with the following:

6. Fire Hydrants Installation:
    a. Construct four fire hydrants along Wannamaker with 300' maximum space between fire hydrants.
    b. Abandon one existing fire hydrant per city's guidelines, standards, and/or requirements and a construction a new one near the proposed abandon fire hydrant on Rockefeller.

7. Double Check Detector Assembly (DCDA): Provide two DCDAs, loop them together onsite.

Sanitary Sewer Conditions (Section 2.C): The Applicant shall comply with the following:

8. Terminus Manhole: Construct terminus manhole at the end of the sewer main within the proposed Woodruff cul-de-sac and away from the curb and gutter.
    a. Terminus manhole must have 10' straight pipe pre and post with slope range of greater or equal to 0.4% and less or equal to 2%.

9. Monitoring Manhole: Construct a monitoring manhole on private property and immediately back of the proposed property line.
10. Proposed Sewer Lateral Alignment and Monitoring Manhole Location: Align the proposed sewer lateral to commence at the proposed onsite cleanout and terminate at the proposed terminus manhole (in public RoW), then place the proposed sewer monitoring manhole (on private PL) immediately back of the property line along this sewer lateral. This is to achieve the maximum sewer spacing from the catch basin and meet the 10' minimum straight pipe alignment for the pre and post piping of the monitoring manhole.

11. Note the following:
    The Occupant/Applicant shall apply for a Wastewater Discharge Permit for their establishment and shall comply will all the requirements of the Wastewater Discharge Permit. The application can be downloaded from the City's Utilities website in the drop-down of the "Pretreatment" section (www.ontarioca.gov/OMUC/Utilities). Please select the appropriate application that applies to your type of business. Requirements of the Wastewater Discharge Permit may include, but not limited to: Installation of wastewater pretreatment equipment, such as grease interceptors or clarifiers. For wastewater permit application questions, please contact:

    Michael Birmelin, Environmental Programs Manager
    omucenvironmental@ontarioca.gov
    Phone: (909) 395-261

Recycled Water: (Add following to Section 2.E of Engineering Department COA)

12. Recycled Water: This project is required to use recycled water, therefore, do not abandon any of existing recycled water services and make use of them as required for irrigation. However, please verify that these services are available to connect, if not, then must construct new service(s) as required.
13. City Ordinance 2689: This development shall comply with City Ordinance 2689 and make use of recycled water for all approved uses, including but not limited to landscape irrigation. Appropriately sized public and private mains shall be installed throughout the Project to meet this requirement, as approved by the City
14. RW Program Requirements: In order to receive RW service, the applicant shall comply with the following:

a. *Prior to Precise Grading Plan Approval and Building Permits Issuance:*
    i. Provide two hard copies and the digital files (in PDF and AutoCAD format) for both on-site and off-site utility plans, including landscape and irrigation improvements.
    ii. Submit an **Engineering Report (ER)** to the City detailing recycled water usage for review and approval by the City and the State. The review process for the ER is typically 3 months. City will coordinate the State's approval of the ER.
    iii. For details, contact Cynthia Heredia-Torres at (909) 395-2647 or ctorres@ontarioca.gov.
b. *Prior to Occupancy Release/Finalizing:*
    i. Pass start-up and cross-connection test successfully.
    ii. Provide evidence demonstrating the training of on-site supervisor or designee as determined in the ER

Development Plan and Tentative Parcel Map Conditions of Approval

Civil/ Site Plans

1. Add tree protection notes on construction and demo plans to protect trees to remain. Replacement and mitigation for removed trees shall equal the trunk diameter of heritage trees removed per the Development Code Tree Preservation Policy and Protection Measures, section 6.05.020. The tree inventory shall include a matrix to understand the health of each tree. The mitigation will be determined once a complete inventory is provided.
2. Show on demo plans and landscape construction plans trees to be preserved, removed or mitigation measures for trees removed, such as:
   a. New 15-gallon trees min 1" diameter trunk, in addition to trees required.
   b. New 24" box trees min 1.5" diameter trunk, in addition to trees required.
   c. Upsizing trees on the plan one size larger such as 15 gallon to 24" box, or 24" to 36" box size.
   d. Monetary value of the trees removed as identified in the "Guide for Plant Appraisal," approved certified arborist plant appraiser, may be equal to the value of the installation cost of planting, fertilizing, staking, and irrigating 15-gallon trees (100$ each) to the City of Ontario Historic Preservation Fund for city tree planting or city approved combination of the above items.
3. Before permit issuance, stormwater infiltration devices located in landscape areas shall be reviewed and plans approved by the Landscape Planning Division. Any stormwater devices in parkway areas shall not displace street trees.
4. Note enhanced paving at entries; coordinate all plans for consistency.
5. Show and dimension backflow devices set back 4' from paving on all sides. Locate on level grade
6. Locate utilities, including light standards, fire hydrants, water, drain, and sewer lines, to not

conflict with required tree locations—coordinate civil plans with landscape plans. Relocate the fire hydrant at the southwestern parking lot island finger to the end of the island finger to allow for the required tree.

Landscape Plans

7. Provide an arborist report and tree inventory, as noted in #1. The report must have an inventory of each tree to include the genus, species, trunk diameter, and condition. Tree mitigation will be determined once the complete inventory is received or a total of 909 include of tree replacement, will be required. See mitigation requirements #3 a-d.
8. During plan check, coordinate with Ontario Municipal Utilities Company (OMUC) to submit irrigation plans for recycled water systems to omucwaterquality@ontarioca.gov. OMUC shall review and approve irrigation systems utilizing recycled water before final landscape approval. Submit an electronic approval letter or memo from OMUC with the resubmittal of the landscape package.
9. Show and dimension backflow devices with 36” high strappy leaf shrub screening. Do not encircle utility; show as masses and duplicate masses in other locations at regular intervals.
10. Locate light standards, fire hydrants, water, and sewer lines to not conflict with required tree locations. Coordinate civil plans with landscape plans
11. Show all utilities on the landscape plans. Coordinate so utilities are clear of tree locations.
12. Street trees for this project are Platanus wrightii (Rockefeller Avenue) and Pinus canariensis (Jurupa Street) per the Master Street Tree Plan. Use evergreen background trees to contrast with deciduous street trees (or the opposite) and triangularly space between them.
13. Locate trees for shade on buildings, parking lots, seating areas, and paving, screen blank walls and adjacent properties where missing, accent trees to entries and driveways, and provide visibility to signs, windows, and doors. Locate trees 50% of the canopy width from walls, buildings, and existing trees. Additional trees are required at foundation planters, street setbacks, perimeter plantings, and larger parking lot island fingers where space allows.
14. Show trees at 2/3 mature canopy.
15. Overhead spray systems shall be designed for plant material less than the height of the spray head.
16. Designer or developer to provide agronomical soil testing and include a report on landscape construction plans.
17. Call out all fences and walls, materials proposed, and heights.
18. Landscape construction plans shall meet the requirements of the Landscape Development Guidelines. See http://www.ontarioca.gov/landscape-planning/standards
19. After a project’s entitlement approval, the applicant shall pay all applicable fees for landscape plan check and inspections at a rate established by resolution of the City Council. Landscape construction plans with building permit number for plan check may be emailed to: landscapeplancheck@ontarioca.gov

DEVELOPMENT ADVISORY BOARD DECISION

September 18, 2023

303 East B Street, Ontario, California 91764 Phone: 909.395.2036 / Fax: 909.395.2420

DECISION NO.: [insert #]

FILE NO.: PDEV23-007

DESCRIPTION: A hearing to consider a Development Plan to construct 144 multiple-family residential units on 9.18 gross acres of land located on the east side of Twinkle Avenue approximately 500 feet north of Moonlight Street, within Planning Area 3B (Medium Density Residential) of the Rich Haven Specific Plan. (APNs: 0218-016-06, 0218-016-07, 0218-016-18, 0218-203-08, 0218-203-01, 0218-203-02, 0218-203-03, 0218-203-04, 0218-203-07, 0218-203-06, and 0218-203-05); **submitted by Landsea Homes.**

PART 1: BACKGROUND & ANALYSIS

LANDSEA HOMES, (herein after referred to as "Applicant") has filed an application requesting approval of a Development Plan, File No. PDEV23-007, as described in the subject of this Decision (herein after referred to as "Application" or "Project").

PROJECT SETTING: The Project site is comprised of 9.18 acres of land located at on the east side of Twinkle Avenue approximately 500 feet north of Moonlight Street and is depicted in Exhibit A: Project Location Map, attached. Existing land uses, Policy Plan (general plan) and zoning designations, and specific plan land uses on and surrounding the project site are as follows:

	Existing Land Use	***Policy Plan Land Use Designation***	***Zoning Designation***	***Specific Plan Land Use Designation***
Site:	Vacant	(MDR) Medium Density Residential (11.1 – 25 du/ac)	Rich Haven Specific Plan	Planning Area 3B (Medium Density Residential)
North:	Vacant	(MDR) Medium Density Residential (11.1 – 25 du/ac)	Rich Haven Specific Plan	Planning Area 2B (Medium Density Residential)
South:	SCE Easement	Open Space - Non-Recreation (OS-NR)	Rich Haven Specific Plan	Open Space Non-Recreation
East:	Vacant	Industrial (0.55 FAR)	Rich Haven Specific Plan	Planning Area 3A (Medium Density Residential)
West:	Residential Subdivision	(MDR) Medium Density Residential (11.1 – 25 du/ac)	Rich Haven Specific Plan	Planning Area 3C (Light Industrial)

PROJECT ANALYSIS:

(1) Background — On December 4, 2007, the City Council certified the Rich Haven Specific Plan Environmental Impact Report in conjunction with File No. PGPA07-001. The related Rich Haven Specific Plan, File No. PSP05-004, was approved by the City Council on December 18, 2007. The Specific Plan established the land use designations, development standards, and design guidelines for approximately 512 acres of land, which included the potential development of 4,256 residential units and 889,200 square feet of commercial/office land uses.

On July 28, 2020, the Planning Commission approved a Development Plan (File No. PDEV20-004) to construct Nuehouse, a Mid-Century Modern themed community that consisted of 100 single-family residential units (8-pack cluster) and 134 multiple-family residential units (6-plex row townhomes and 12-plex courtyard townhomes) on 79.7 acres of land located west of the Project Site.

On June 20, 2023, the City Council certified the Rich Haven Specific Plan Amendment and Environmental Impact Report (State Clearinghouse No. 2022100425) in conjunction with File No. PSPA22-001. The amendment included land use changes to bring the Rich Haven Specific Plan into compliance with The Ontario Plan Policy Plan (General Plan) that also included updates to the residential, commercial, and industrial development standards, exhibits, and text changes.

On October 25, 2022, the Planning Commission approved Tentative Tract Map No. 20530 (File No. PMTT22-009) to subdivide the Project site into 3 numbered lots and 15 lettered lots for residential uses, drive aisles, and common open space purposes.

On February 24, 2023, the applicant submitted a Development Plan (File No. PDEV23-007) to construct 144 multiple-family residential units on the Project Site. The proposed Project will serve as an extension of the existing Neuhouse Community and continue the same architectural theme and design features throughout the proposed development.

(2) Site Design/Building Layout — Proposed are twelve 12-plex Courtyard Townhomes totaling 144 multiple-family residential units, which includes five floor plans and one architectural style (see Exhibit B—Site Plan, attached). The proposed Courtyard Townhome product has garage access from an autocourt, with the main entrances of units fronting the street, private drive aisle or a paseo. The primary access into each unit will be from a paseo landscaped with accent trees and landscape planters to provide visual interest and promote pedestrian mobility. All plans incorporate various design features such as horizontal and vertical building articulation, varied entry designs, private patios, second floor laundry facilities, and second floor decks/balconies. All homes will have a two-car garage, with the exception of Plan 1, which will have a one-car garage (see Exhibit C—Floor Plan, attached). The proposed floor plans are further described below:

- Plan 1: 937 square feet, 1 bedroom, 1.5 bath, and one-car garage.

- Plan 2: 1,092 square feet, 2 bedrooms, 2.5 baths, and two-car garage.
- Plan 3: 1,136 square feet, 2 bedrooms, 2.5 baths, and two-car garage.
- Plan 4: 1,468 square feet, 3 bedrooms, 2.5 baths, and two-car garage.
- Plan 5: 1,486 square feet, 3 bedrooms, 2.5 baths, and two-car garage.

(3) Site Access/Circulation — The previously approved related Tentative Tract Map No. 20530, facilitated the construction of the backbone streets, internal public/private streets, and primary access points into the Project site, from Twinkle Avenue (see Exhibit B—Site Plan, attached). Twinkle Avenue runs north/south along the western frontage of the site and continues south through the New Haven – Canvas Park residential community that is presently under construction.

(4) Parking — The Project has provided off-street parking pursuant to the multiple family parking standards specified in the Rich Haven Specific Plan. The number of off-street parking spaces provided exceeds the minimum parking requirement for the Project. The off-street parking calculations for the Project are summarized in the table below:

Product Type (No. of Units)	***Req. Parking Per Unit***	***Total Req. Parking***	***Garage Space Provided***	***On-Street/ Drive Aisle/ Driveway Parking Spaces***	***Total Provided***
Courtyard Townhome - One Bedroom (24 Units)	1.75 – Including one-car garage	42	24 spaces	69 Drive-aisle 18 On-street	**111**
Courtyard Townhome - 2 Bedrooms (48 Units)	2 – Including two-car garage	96	96 spaces	N/A	**96**
Courtyard Townhome - 3 Bedrooms (72 Units)	2.5 – Including two-car garage	180	144 spaces	N/A	**144**
Guest Parking	• Portion of dwellings < 50: 0.25 spaces per dwelling; • Portion of 50 to 100 dwellings: 0.20 spaces per dwelling; • Portion of dwellings > 100: 0.17 spaces per dwelling	30			
Totals (144 units)		**348**	**264**	**87**	**351**
					2.4 spaces per unit

(5) Architecture — A California Modern architectural style is proposed for the courtyard townhomes which incorporates a varying parapet roofline; first and second story pop-out features; smooth sand finish stucco exterior with accent horizontal siding;

square entry openings with horizontal siding or color blocking; recessed windows with metal awnings; and bright colored front entry doors with accent glass inserts to complement the modern architectural style (see Exhibit D—Elevations, attached).

(6) Landscaping — Tentative Tract Map No. 20530 facilitated the construction of a neighborhood park, sidewalks, parkways, and open space areas. TOP Policy PR1-1 requires new developments to provide a minimum of 2 acres of Private Park per 1,000 residents. The map was required to provide 0.97 acres of parkland to meet the minimum TOP private park requirement and provided 1.01 acres (see Exhibit E—Open Space, attached). To satisfy the park requirement, the applicant is constructing a 1-acre community park centrally located within the Tract. The central park is divided into two general areas that include a passive turf area and smaller active areas. The open turf area incorporates activity earthen mounds and shade trees. The active areas are comprised of shade structures with picnic tables, a half-court basketball, exercise stations, cornhole area and a tot-lot for 5 to 12 year olds. The proposed pedestrian circulation system provides connectivity to the parks, residential neighborhoods within the Project site, and adjacent communities.

(7) CC&R's — The previously approved related Tentative Tract Map required that CC&R's be prepared and recorded with the final map. The CC&R's will outline the maintenance responsibilities for the open space areas, recreation amenities, drive aisles, utilities, and upkeep of the entire site, to ensure on-going maintenance of the common areas and facilities.

(8) Utilities (drainage, sewer) — All major backbone improvements and interior site improvements will be constructed consistent with the proposed Tentative Tract Map and related Development Agreement (File No. PDA18-005). Furthermore, the Applicant has submitted a Preliminary Water Quality Management Plan ("PWQMP"), which establishes the Project's compliance with storm water discharge/water quality requirements. The PWQMP includes site design measures that capture runoff and pollutant transport by minimizing impervious surfaces and maximizes low impact development ("LID") best management practices ("BMPs"), such as retention and infiltration, biotreatment, and evapotranspiration.

PUBLIC NOTIFICATION: Public notification is not required, as the Development Advisory Board is acting in its capacity as an advisory body to the Planning Commission. Public notification is required prior to the Planning Commission hearing on the Project.

CORRESPONDENCE: As of the preparation of this Decision, Planning Department staff has not received any written or verbal communications from the owners of properties surrounding the project site or from the public in general, regarding the subject application.

AGENCY/DEPARTMENT REVIEWS: Each City agency/department has been provided the opportunity to review and comment on the subject application and recommend conditions of approval to be imposed upon the application. At the time of the Decision

preparation, recommended conditions of approval were provided and are included with this Decision.

AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE: The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

On April 19, 2011, the City Council of the City of Ontario approved and adopted the ONT ALUCP, establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the recommending body for the Project, the Development Advisory Board has reviewed and considered the facts and information contained in the Application and supporting documentation against the ONT ALUCP compatibility factors, including [1] Safety Criteria (ONT ALUCP Table 2-2) and Safety Zones (ONT ALUCP Map 2-2), [2] Noise Criteria (ONT ALUCP Table 2-3) and Noise Impact Zones (ONT ALUCP Map 2-3), [3] Airspace protection Zones (ONT ALUCP Map 2-4), and [4] Overflight Notification Zones (ONT ALUCP Map 2-5). As a result, the Development Advisory Board, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ONT ALUCP.

COMPLIANCE WITH THE ONTARIO PLAN: The proposed project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (general plan), and City Council Priorities components of The Ontario Plan ("TOP"). More specifically, the goals and policies of TOP that are furthered by the proposed project are as follows:

(1) City Council Goals.

- Invest in the Growth and Evolution of the City's Economy
- Maintain the Current High Level of Public Safety
- Operate in a Businesslike Manner
- Focus Resources in Ontario's Commercial and Residential Neighborhoods
- Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
- Encourage, Provide or Support Enhanced Recreational, Educational, Cultural and Healthy City Programs, Policies and Activities
- Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in the New Model Colony

(2) Vision.

Distinctive Development:

- Commercial and Residential Development

➢ Development quality that is broadly recognized as distinctive and not exclusively tied to the general suburban character typical of much of Southern California.

(3) Governance.

Decision Making:

- Goal G1: Sustained decision-making that consistently moves Ontario towards its Vision by using The Ontario Plan as a framework for assessing choices.

➢ G 1-2. Long-term Benefit. We require decisions to demonstrate and document how they add value to the community and support the Ontario Vision.

(4) Policy Plan (General Plan)

Land Use Element:

- Goal LU-1 Balance: A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.

➢ LU-1.1 Strategic Growth. We concentrate growth in strategic locations that help create place and identity, maximize available and planned infrastructure, foster the development of transit, and support the expansion of the active and multimodal transportation networks throughout the City.

➢ LU-1.6 Complete Community. We incorporate a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, employers, workers, and visitors have a wide spectrum of choices of where they can live, work, shop and recreate within Ontario.

- Goal LU-2 Compatibility: Compatibility between a wide range of uses and a resultant urban patterns and forms.

➢ LU-2.6 Infrastructure Compatibility. We require infrastructure to be aesthetically pleasing and in context with the community character.

Housing Element:

- Goal H-2 Housing Supply & Diversity: Diversity of types of quality housing that are affordable to a range of household income levels, accommodate changing demographics, and support and reinforce the economic sustainability of Ontario.

- H-2.4 Ontario Ranch. We support a premier lifestyle community in the Ontario Ranch, distinguished by diverse housing, highest design quality, and cohesive and highly amenitized neighborhoods.

- H-2.5 Housing Design. We require architectural excellence through adherence to City design guidelines, thoughtful site planning, environmentally sustainable practices, and other best practices.

- Goal H-5 Special Needs: A full range of housing types and community services that meet the special housing needs for all individuals and families in Ontario, regardless of income level, age, or other status.

- H-5.2 Family Housing. We support the development of larger rental apartments that are appropriate for families with children, including, as feasible, the provision of services, recreation, and other amenities.

Community Economics Element:

- Goal CE-1 Complete Community: A complete community that provides for all incomes and stages of life.

- CE-1.6 Diversity of Housing. We collaborate with residents, housing providers, and the development community to provide housing opportunities for every stage of life; we plan for a variety of housing types and price points to encourage the development of housing supportive of our efforts to attract business in growing sectors of the community while being respectful of existing viable uses.

- Goal CE-2 Placemaking: A City of distinctive neighborhoods, districts, corridors, and centers where people choose to be.

- CE-2.1 Development Projects. We require new development and redevelopment to create unique, high-quality places that add value to the community.

- CE-2.2 Development Review. We require those proposing new development and redevelopment to demonstrate how their projects will create appropriately unique, functional, and sustainable places that will compete well with their competition within the region.

- CE-2.4 Protection of Investment. We require that new development and redevelopment protect existing investment by providing architecture and urban design of equal or greater quality.

- CE-2.5 Private Maintenance. We require adequate maintenance, upkeep, and investment in private property because proper maintenance on private property protects property values.

Safety Element:

- Goal S-1 Seismic & Geologic Hazards: Minimized risk of injury, loss of life, property damage, and economic and social disruption caused by earthquake-induced and other geologic hazards.

  - S-1.1 Implementation of Regulations and Standards. We require that all new habitable structures be designed in accordance with the most recent California Building Code adopted by the City, including provisions regarding lateral forces and grading.

Community Design Element:

- Goal CD-1 Image & Identity: A dynamic, progressive city containing distinct and complete places that foster a positive sense of identity and belonging among residents, visitors, and businesses.

  - CD-1.1 City Identity. We take actions that are consistent with the City being a leading urban center in Southern California while recognizing, enhancing, and preserving the character of our existing viable neighborhoods.

  - CD-1.2 Place Types. We establish Place Types in urban, mixed use, and transit-oriented areas to foster the City's identity as a premier community and require new development within each Place Type to incorporate prescribed urban patterns, forms, and placemaking priorities.

  - CD-1.3 Existing Neighborhoods. We require the existing character of viable residential and non-residential neighborhoods be preserved, protected, and enhanced.

- Goal CD-2 Design Quality: A high level of design quality resulting in neighborhoods, public spaces, parks, and streetscapes that are attractive, safe, functional, human-scale, and distinct.

  - CD-2.1 Quality Building Design and Architecture. We encourage all development projects to convey visual interest and character through:

    - Building volume, massing, and height to provide context-appropriate scale and proportion;
    - A true architectural style which is carried out in plan, section, and elevation through all aspects of the building and site design and appropriate for its setting; and
    - Exterior building materials that are articulated, high quality, durable, and appropriate for the architectural style.

  - CD-2.2 Neighborhood Design. We create distinct residential neighborhoods that promote a sense of community and identity by emphasizing access, connectivity, livability, and social interaction through such elements as:

- A pattern of smaller, walkable blocks that promote activity, safety, and access to nearby amenities and services;
- Varied parcel sizes and lot configurations to accommodate a diversity of housing types;
- Traffic calming measures to slow traffic and promote walkability while maintaining acceptable traffic flows and emergency evacuation access;
- Floor plans that encourage views onto the street and de-emphasize the visual and physical dominance of garages (introducing the front porch as the "outdoor living room"), as appropriate; and
- Landscaped parkways, with sidewalks separated from the curb and designed to maximize safety, comfort, and aesthetics for all users.

➢ CD-2.7 Sustainability. We collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping, and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials, and construction techniques.

➢ CD-2.8 Safe Design. We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintaining visibility and accessibility, and using lighting.

➢ CD-2.9 Landscape Design. We encourage durable, sustainable, and drought-tolerant landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits.

➢ CD-2.10 Parking Areas. We require all development, including single-family residential, to minimize the visual impact of surface, structured, and garage parking areas visible from the public realm in an aesthetically pleasing, safe and environmentally sensitive manner. Examples include:

- Surface parking: Shade trees, pervious surfaces, urban run-off capture and infiltration, and pedestrian paths to guide users through the parking field;
- Structured parking: facade articulation, screening, appropriate lighting, and landscaping; and
- Garage parking: providing access to single-family residential garages through alley access, recessing garages from the frontage to emphasize front doors or active living spaces.

➢ CD-2.11 Entry Statements. We encourage the inclusion of amenities, signage, and landscaping at the entry to neighborhoods, commercial centers, mixed use areas, industrial developments, and public places that reinforce them as uniquely identifiable places.

- CD-2.12 Site and Building Signage. We encourage the use of sign programs that utilize complementary materials, colors, and themes. Project signage should be designed to effectively communicate and direct users to various aspects of the development and complement the character of the structures.

- CD-2.13 Entitlement Process. We work collaboratively with all stakeholders to ensure a high degree of certainty in the efficient review and timely processing of all development plans and permits.

- CD-3.2 Comfortable, Human-Scale Public Realm. We require that public spaces, including streets, parks, and plazas on both public and private property be designed to maximize safety, comfort and aesthetics and connect to the citywide pedestrian, vehicular, and bicycle networks.

- *CD-3.3* Complete and Connected Network. We require that pedestrian, vehicular, and bicycle circulation on both public and private property be coordinated to provide connections internally and externally to adjacent neighborhoods and properties (existing and planned) through a system of local roads and trails that promote walking and biking to nearby destinations (including existing and planned parks, commercial areas, and transit stops) and are designed to maximize safety, comfort, and aesthetics.

- CD-3.4 Context-Aware and Appropriate Design. We require appropriate building and site design that complements existing development, respects the intent and identity of the Place Type, and provides appropriate transitions and connections between adjacent uses to ensure compatibility of scale, maintain an appropriate level of privacy for each use, and minimize potential conflicts.

- CD-3.5 Active Frontages. We create lively pedestrian streetscapes by requiring primary building, business, and residential entrances, outdoor dining, and storefronts be located on ground floors adjacent to sidewalks or public spaces and designed to maximize safety, comfort, aesthetics, and the intended functionality (as defined by the Place Type).

- CD-3.6 Managed Infrastructure. We collaborate with developers and property owners to facilitate development that realizes the envisioned character and functionality of the Place Type through the use of green and shared infrastructure within each Place Type.

- Goal CD-5 Protection of Investment: A sustained level of maintenance and improvement of properties, buildings, and infrastructure that protects the property values and encourages additional public and private investments.

- CD-5.1 Maintenance of Buildings and Property. We require all public and privately-owned buildings and property (including trails and easements) to be properly and consistently maintained.

- CD-5.2 Maintenance of Infrastructure. We require the continual maintenance of infrastructure.

HOUSING ELEMENT COMPLIANCE: The project is consistent with the Housing Element of the Policy Plan (general plan) component of The Ontario Plan, as the project site is not one of the properties in the Housing Element Sites contained in Tables B-1 and B-2 (Housing Element Sites Inventory) of the Housing Element Technical Report.

PART 2: RECITALS

WHEREAS, the Application is a Project pursuant to the California Environmental Quality Act (Public Resources Code Section 21000 et seq.) ("CEQA") and an initial study has been prepared to determine possible environmental impacts; and

WHEREAS, the Rich Haven Specific Plan Amendment Environmental Impact Report (State Clearinghouse No. 2022100425) was certified on June 20, 2023 (hereinafter referred to as "Certified EIR"), in which development and use of the Project site was discussed; and

WHEREAS, the environmental impacts of this Project were thoroughly analyzed in the Certified EIR, which concluded that implementation of the Project could result in a number of significant effects on the environment and identified mitigation measures that would reduce each of those significant effects to a less-than-significant level; and

WHEREAS, the City's "Local Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Development Advisory Board (hereinafter referred to as "DAB") the responsibility and authority to review and make recommendation to the Planning Commission on the subject Application; and

WHEREAS, all members of the DAB of the City of Ontario were provided the opportunity to review and comment on the Application, and no comments were received opposing the proposed development; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (hereinafter referred to as "ONT ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on September 18, 2023, the DAB of the City of Ontario conducted a hearing on the Application and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Decision have occurred.

PART 3: THE DECISION

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED AND DECIDED by the Development Advisory Board of the City of Ontario as follows:

SECTION 1: Environmental Determination and Findings. As the recommending body for the Project, the DAB has reviewed and considered the information contained in the previous Certified EIR and supporting documentation. Based upon the facts and information contained in the previous Certified EIR and supporting documentation, the DAB finds as follows:

(1) The environmental impacts of this Project were previously reviewed in conjunction with File No. PSPA22-001, the Rich Haven Specific Plan Amendment for which an Environmental Impact Report (State Clearinghouse No. 2022100425) was adopted by the City Council on June 20, 2023.

(2) The previous Certified EIR contains a complete and accurate reporting of the environmental impacts associated with the Project; and

(3) The previous Certified EIR was completed in compliance with CEQA and the Guidelines promulgated thereunder, and the City of Ontario Local CEQA Guidelines; and

(4) The previous Certified EIR reflects the independent judgment of the Planning Commission; and

(5) The proposed Project will introduce no new significant environmental impacts beyond those previously analyzed in the previous Certified EIR, and all mitigation

measures previously adopted with the Certified EIR, are incorporated herein by this reference.

SECTION 2: Subsequent or Supplemental Environmental Review Not Required. Based on the information presented to the DAB, and the specific findings set forth in Section 1, above, the DAB finds that the preparation of a subsequent or supplemental Certified EIR is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and

(3) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and

(4) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The Project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3: Housing Element Compliance. Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the recommending body for the Project, the DAB finds that based on the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the Project is consistent with the Housing Element of the Policy

Plan (General Plan) component of The Ontario Plan, as the Project site is not one of the properties in the Housing Element Sites contained in Tables B-1 and B-2 (Housing Element Sites Inventory) of the Housing Element Technical Report.

SECTION 4: Concluding Facts and Reasons. Based upon the substantial evidence presented to the DAB during the above-referenced hearing and upon the facts and information set forth in Parts I (Background and Analysis) and II (Recitals), above, and the determinations set forth in Sections 1 and 3, above, the DAB hereby concludes as follows:

(1) *The proposed development at the proposed location is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan.* The proposed Project is located within the (MDR) Medium Density Residential (11.1 – 25 du/ac) land use district of the Policy Plan Land Use Map, and Planning Area 3B (Medium Density Residential) of the Rich Haven Specific Plan. The development standards and conditions under which the proposed Project will be constructed and maintained, is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan; and

(2) *The proposed development is compatible with those on adjoining sites in relation to location of buildings, with particular attention to privacy, views, any physical constraint identified on the site and the characteristics of the area in which the site is located.* The Project has been designed consistent with the requirements of the City of Ontario Development Code and Planning Area 3B (Medium Density Residential) of the Rich Haven Specific Plan, including standards relative to the particular land use proposed (multiple family residential), as-well-as building intensity, building and parking setbacks, building height, number of off-street parking and loading spaces, on-site and off-site landscaping, and fences, walls and obstructions; and

(3) *The proposed development will complement and/or improve upon the quality of existing development in the vicinity of the Project and the minimum safeguards necessary to protect the public health, safety and general welfare have been required of the proposed Project.* The Development Advisory Board has required certain safeguards, and impose certain conditions of approval, which have been established to ensure that: [i] the purposes of Planning Area 3B (Medium Density Residential) of the Rich Haven Specific Plan are maintained; [ii] the Project will not endanger the public health, safety or general welfare; [iii] the Project will not result in any significant environmental impacts; [iv] the Project will be in harmony with the area in which it is located; and [v] the Project will be in full conformity with the Vision, City Council Priorities and Policy Plan components of The Ontario Plan, and the Rich Haven Specific Plan; and

(4) *The proposed development is consistent with the development standards and design guidelines set forth in the Development Code, or applicable specific plan or planned unit development*. The proposed Project has been reviewed for consistency with the general development standards and guidelines of the Rich Haven Specific Plan that

are applicable to the proposed Project, including building intensity, building and parking setbacks, building height, amount of off-street parking and loading spaces, parking lot dimensions, design and landscaping, bicycle parking, on-site landscaping, and fences and walls, as-well-as those development standards and guidelines specifically related to the particular land use being proposed (multiple family residential). As a result of this review, the Development Advisory Board has determined that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the development standards and guidelines described in the Rich Haven Specific Plan.

SECTION 5: Development Advisory Board Action. Based on the findings and conclusions set forth in Sections 1 through 4, above, the DAB hereby recommends the Planning Commission APPROVES the Application subject to each and every condition set forth in the Conditions of Approval included as Attachment A of this Decision, and incorporated herein by this reference.

SECTION 6: Indemnification. The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 7: Custodian of Records. The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario. The records are available for inspection by any interested person, upon request.

Project Description: A Development Plan to construct 144 multiple-family residential units on 9.18 gross acres of land located on the east side of Twinkle Avenue approximately 500 feet north of Moonlight Street, within Planning Area 3B (Medium Density Residential) of the Rich Haven Specific Plan. (APNs: 0218-016-06, 0218-016-07, 0218-016-18, 0218-203-08, 0218-203-01, 0218-203-02, 0218-203-03, 0218-203-04, 0218-203-07, 0218-203-06, and 0218-203-05); **submitted by Landsea Homes.**

Prepared By: Lorena Mejia, Senior Planner
Phone: 909.395.2276 (direct)
Email: lmejia@ontarioca.gov

The Planning Department, Land Development Section, conditions of approval applicable to the above-described Project, are listed below. The Project shall comply with each condition of approval listed below:

1.0 Standard Conditions of Approval. The project shall comply with the *Standard Conditions for New Development*, adopted by City Council Resolution No. 2017-027 on April 18, 2017. A copy of the *Standard Conditions for New Development* may be obtained from the Planning Department or City Clerk/Records Management Department.

2.0 Special Conditions of Approval. In addition to the *Standard Conditions for New Development* identified in condition no. 1.0, above, the project shall comply with the following special conditions of approval:

2.1 Time Limits.

(a) Development Plan approval shall become null and void 2 years following the effective date of application approval, unless a building permit is issued and construction is commenced, and diligently pursued toward completion, or a time extension has been approved by the Planning Director. This condition does not supersede any individual time limits specified herein, or any other departmental conditions of approval applicable to the Project, for the performance of specific conditions or improvements.

2.2 General Requirements. The Project shall comply with the following general requirements:

(a) All construction documentation shall be coordinated for consistency, including, but not limited to, architectural, structural, mechanical, electrical, plumbing, landscape

and irrigation, grading, utility and street improvement plans. All such plans shall be consistent with the approved entitlement plans on file with the Planning Department.

(b) The project site shall be developed in conformance with the approved plans on file with the City. Any variation from the approved plans must be reviewed and approved by the Planning Department prior to building permit issuance.

(c) The herein-listed conditions of approval from all City departments shall be included in the construction plan set for project, which shall be maintained on site during project construction.

2.3 Landscaping.

(a) The Project shall provide and continuously maintain landscaping and irrigation systems in compliance with the provisions of Ontario Development Code Division 6.05 (Landscaping).

(b) Comply with the conditions of approval of the Planning Department; Landscape Planning Division.

(c) Landscaping shall not be installed until the Landscape and Irrigation Construction Documentation Plans required by Ontario Development Code Division 6.05 (Landscaping) have been approved by the Landscape Planning Division.

(d) Changes to approved Landscape and Irrigation Construction Documentation Plans, which affect the character or quantity of the plant material or irrigation system design, shall be resubmitted for approval of the revision by the Landscape Planning Division, prior to the commencement of the changes.

2.4 Walls and Fences. All Project walls and fences shall comply with the requirements of Ontario Development Code Division 6.02 (Walls, Fences and Obstructions).

2.5 Parking, Circulation and Access.

(a) The Project shall comply with the applicable off-street parking, loading and lighting requirements of City of Ontario Development Code Division 6.03 (Off-Street Parking and Loading).

(b) Areas provided to meet the City's parking requirements, including off-street parking, and loading spaces, access drives, and maneuvering areas, shall not be used for the outdoor storage of materials and equipment, nor shall it be used for any other purpose than parking.

(c) Parking spaces specifically designated and conveniently located for use by the physically disabled shall be provided pursuant to current accessibility regulations contained in State law (CCR Title 24, Part 2, Chapters 2B71, and CVC Section 22507.8).

2.6 Site Lighting.

(a) All off-street parking facilities shall be provided with nighttime security lighting pursuant to Ontario Municipal Code Section 4-11.08 (Special Residential Building Provisions) and Section 4-11.09 (Special Commercial/Industrial Building Provisions), designed to confine emitted light to the parking areas. Parking facilities shall be lighted from sunset until sunrise, daily, and shall be operated by a photocell switch.

(b) Unless intended as part of a master lighting program, no operation, activity, or lighting fixture shall create illumination on any adjacent property.

2.7 Mechanical and Rooftop Equipment.

(a) All exterior roof-mounted mechanical, heating and air conditioning equipment, and all appurtenances thereto, shall be completely screened from public view by parapet walls or roof screens that are architecturally treated so as to be consistent with the building architecture.

(b) All ground-mounted utility equipment and structures, such as tanks, transformers, HVAC equipment, and backflow prevention devices, shall be located out of view from a public street, or adequately screened through the use of landscaping and/or decorative low garden walls.

2.8 Security Standards. The Project shall comply with all applicable requirements of Ontario Municipal Code Title 4 (Public Safety), Chapter 11 (Security Standards for Buildings).

2.9 Signs.

(a) All Project signage shall comply with the requirements of Ontario Development Code Division 8.1 (Sign Regulations).

2.10 Sound Attenuation. The Project shall be constructed and operated in a manner so as not to exceed the maximum interior and exterior noise levels set forth in Ontario Municipal Code Title 5 (Public Welfare, Morals, and Conduct), Chapter 29 (Noise).

2.11 Disclosure Statements.

(a) A copy of the Public Report from the Department of Real Estate, prepared for the subdivision pursuant to Business and Professions Code Section 11000 et seq., shall be provided to each prospective buyer of the residential units and shall include a statement to the effect that:

(i) This tract is subject to noise from the Ontario International Airport and may be more severely impacted in the future.

(ii) Some of the property adjacent to this tract is zoned for agricultural uses and there could be fly, odor, or related problems due to the proximity of animals.

(iii) The area south of Riverside Drive lies within the San Bernardino County Agricultural Preserve. Dairies currently existing in that area are likely to remain for the foreseeable future.

(iv) This tract is part of a Landscape Maintenance District. The homeowner(s) will be assessed through their property taxes for the continuing maintenance of the district.

2.12 Environmental Requirements.

(a) If human remains are found during project grading/excavation/construction activities, the area shall not be disturbed until any required investigation is completed by the County Coroner and Native American consultation has been completed (if deemed applicable).

(b) If any archeological or paleontological resources are found during project grading/excavation/construction, the area shall not be disturbed until the significance of the resource is determined. If determined to be significant, the resource shall be recovered by a qualified archeologist or paleontologist consistent with current standards and guidelines, or other appropriate measures implemented.

2.13 Indemnification. The applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer. The City of Ontario shall promptly notify the applicant of any such claim, action or proceeding, and the City of Ontario shall cooperate fully in the defense.

2.14 Additional Fees.

(a) Within 5 days following final application approval, the Notice of Determination ("NOD") filing fee shall be provided to the Planning Department. The fee shall be paid by check, made payable to the "Clerk of the Board of Supervisors", which shall be forwarded to the San Bernardino County Clerk of the Board of Supervisors, along with all applicable environmental forms/notices, pursuant to the requirements of the California Environmental Quality Act ("CEQA"). Failure to provide said fee within the time specified will result in the extension of the statute of limitations for the filing of a CEQA lawsuit from 30 days to 180 days.

(b) After the Project's entitlement approval, and prior to issuance of final building permits, the Planning Department's Plan Check and Inspection fees shall be paid at the rate established by resolution of the City Council.

2.15 Final Occupancy. The Project Architect of record will certify that construction of each building site and the exterior elevations of each structure shall be completed in compliance with the approved plans. Any deviation to approved plans shall require a resubmittal to the Planning Department for review and approval prior to construction. The Occupancy Release Request Form/Architect Certificate of Compliance shall be provided prior to final occupancy. After the receipt of this Certification, the Planning Department will conduct a final site and exterior elevations inspection. The Owner's Representative and Contractor shall be present.

2.16 Additional Requirements.

(a) All applicable conditions of approval of Development Agreement (File No. PDA18-005) and Tentative Tract Map No. 20530 (File No. PMTT22-009) shall apply to this tract.

(b) All applicable conditions of approval of the Rich Haven Specific Plan shall apply to this tract.

(c) The eastern perimeter community block wall shall be 8 feet high.

(d) The City Council has authorized the Baldy View Chapter of the Building Industry Association to manage a standardized off-site directional sign program on a non-profit basis. The program uses uniform sign structures and individual identification and directional signs for residential development. **No other off-site signing is authorized.** (For additional information, contact the Baldy View Chapter BIA at (909) 945-1884.

ENGINEERING DEPARTMENT
CONDITIONS OF APPROVAL

(Land Development Division, Environmental Section, Traffic & Transportation Division, Ontario Municipal Utilities Company and Information Technology & Management Services Department Conditions incorporated)

PROJECT ENGINEER:	**Angela Truong, Assistant Engineer**	**(909) 395-2134**
PROJECT PLANNER:	**Lorena Mejia, Senior Planner**	**(909) 395-2276**
DAB MEETING DATE:	**September 18th, 2023**	
PROJECT NAME/DESCRIPTION:	**PDEV23-007, a Development Plan approval to construct one-hundred forty-four (144) multiple-family dwellings on approximately 9.19 acres of land within Planning Areas 5B, 5C, 5D and 5E (Residential – SFD/Attached and Edison Easement) of the Rich Haven Specific Plan.**	
LOCATION:	**E/O Twinkle Avenue, approximately 500 feet N/O Moonlight Street (APNs: 0218-016-06, 0218-016-07, 0218-016-18, 0218-203-01 to 0218-203-08)**	
APPLICANT:	**Landsea Homes**	
REVIEWED BY:	Raymond Lee **Raymond Lee, P.E.** **Assistant City Engineer**	8/29/23 **Date**
APPROVED BY:	 **Khoi Do, P.E.** **City Engineer**	8.29.23 **Date**

THIS PROJECT SHALL COMPLY WITH THE REQUIREMENTS SET FORTH IN THE GENERAL STANDARD CONDITIONS OF APPROVAL ADOPTED BY THE CITY COUNCIL (RESOLUTION NO. 2017-027) AND THE PROJECT SPECIFIC CONDITIONS OF APPROVAL SPECIFIED IN HEREIN. ONLY APPLICABLE CONDITIONS OF APPROVAL ARE LISTED BELOW. THE APPLICANT SHALL BE RESPONSIBLE FOR THE COMPLETION OF ALL APPLICABLE CONDITIONS OF APPROVAL PRIOR TO ISSUANCE OF PERMITS AND/OR OCCUPANCY CLEARANCE, AS SPECIFIED IN THIS REPORT.

---

1. The project shall comply with the Conditions of Approval for Tract Map No. 20530, approved at the DAB meeting of October 17, 2022, attached herewith for reference, except for the following conditions to supersede previously issued COAs 1.02A and 1.02B:
    a. Dedicate a 36 – 46 foot wide easement for public utility purposes along E. Jacobson Paseo.
    b. Dedicate a 36 – 46 foot wide varies easement for public utility purposes along S. Eichler Paseo.
    c. Dedicate a 37 foot wide easement for public utility purposes along E. Lautner Paseo.

2. The project shall comply with the Rich Haven Specific Plan, File No. PSP05-004, adopted December 4, 2007, as amended.

3. The project shall comply with the additional Conditions of Approval from OMUC, attached as Exhibit A for reference.

4. The applicant/developer shall comply with the Development Agreement (DA), File No. PDA18-005, by and between the City of Ontario and Haven Ontario NMC 1, LLC and Haven Ontario NMC 2, LLC, recorded with the San Bernardino County Recorder's Office on December 27, 2022, as Doc# 2022-0406482.

5. The applicant/developer shall be responsible to:

   a. In the current NMC East Storm Water Treatment Quality Allocation Units Distribution Table, NMC Builders, LLC has allocated adequate treatment credits from the available remaining regional treatment capacity in the Mill Creek Wetlands to Brookcal Ontario, LLC (Brookfield Residential) for this development project in their portion of the "Rich Haven" Specific Plan area. Prior to approval of the Tentative Tract Map area, Brookcal Ontario, LLC is required to provide and attach a copy of the Certificate of Conditional Storm Water Treatment Capacity (SWQ) Availability for the Net Acreage of this project.
   b. Design and construct in-fill public street lights and a potential new service along its project frontage on Twinkle Avenue. Street lighting shall be LED-type and in accordance with City's Approved Material List LED Luminaires. Also install smart nodes on all new street light fixtures along project frontage.
   c. Meet with City Engineering staff prior to designing and submitting for plan check the street lighting design plans to define limits of improvements.

CITY OF ONTARIO
MEMORANDUM

ONTARIO MUNICIPAL UTILITIES COMPANY

DATE:	August 29, 2023
TO:	Angela Truong, Engineering Department
CC:	Lorena Mejia, Planning Department
FROM:	Heather Young, Utilities Engineering Division
	Christy Stevens, Utilities Engineering Division
SUBJECT:	DPR#3 - Utilities Conditions of Approval (COA) **(#9467)**
PROJECT NO.:	TM-20530 (PDEV23-007)

BRIEF DESCRIPTION:

A Development Plan approval to construct one-hundred forty-four (144) multiple-family dwellings on approximately 9.19 acres of land generally located on the east side of Twinkle Avenue approximately 500 feet north of Moonlight Street, within Planning Areas 5B, 5C, 5D and 5E (Residential – SFD/Attached and Edison Easement) of the Rich Haven Specific Plan. (APN(s): 0218-016-06, 0218-016-07, 0218-016-18, 0218-203-08, 0218-203-01, 0218-203-01, 0218-203-02, 0218-203-03, 0218-203-04, 0218-203-07, 0218-203-06 & 0218-203-05). Related File(s): PMTT22-009.

OMUC UTILITIES ENGINEERING DIVISION
CONDITIONS OF APPROVAL

CONDITIONS OF APPROVAL: *The Ontario Municipal Utilities Company (OMUC) Utilities Engineering Division recommends this application for approval subject to the Conditions of Approval outlined below and compliance with the City's Design Development Guidelines, Specifications Design Criteria, and City Standards. The Applicant shall be responsible for the compliance with and the completion of all the following applicable Conditions of Approval prior to the following milestones and subject to compliance with City's Design Development Guidelines, Specifications Design Criteria, and City Standards:*

General Conditions:

1. Standard Conditions of Approval: Project shall comply with the requirements set forth in the Amendment to the Standard Conditions of Approval for New Development Projects adopted by the City Council (Resolution No. 2017-027) on April 18, 2017, or as amended or superseded by Council Resolution; as well as project-specific conditions/requirements as outlined below.

Prior to Issuance of Any Permits (Grading, Building, Demolition and Encroachment), unless other timeline milestones are specified by individual conditions below, the Applicant Shall:

General Conditions (Section 2.A, Other conditions): The Applicant shall comply with the following:

2. Inherited Requirements and Conditions of Approval: This project is subject to all the Requirements and Conditions of Approval of from PSP05-004 Rich-Haven Specific Plan, PMTT17-013 (TM-20134), PDA_18-005, and PMTT22-009 (TM-20530), as amended. For any Conditions of Approval that conflict, these Conditions shall supersede those conflicting Conditions.
3. Final Utilities Systems Map (USM): Submit a Final Utilities Systems Map (USM) as part of the precise grading plan submittal that meets all the City's USM requirements. These requirements include to show and label all existing and proposed utilities (including all appurtenances such as backflow devices, DCDAs, etc.), sizes, points of connection, and any easements. The final utility design shall comply with all Division of Drinking Water (CCR §64572) Separation Requirements. See Utility Systems Map (USM) Requirements document for details.
    a. Division of Drinking Water (DDW) Separation Requirements and California Code of Regulations (CCR) § 64572 Compliance: All DDW Separation Requirements under CCR § 64572 must be met. In order to assure compliance with CCR § 64572, label the separation dimensions, measure from outside wall of the conveyances [CCR §64572(g)], between potable water to any other non-potable conveyance

(sewer, storm drain, storm water, storm water infiltration, recycled water, recycled water irrigation, high pressure gas/petroleum, etc.) publicly or privately maintained. Provide one label per sheet per conveyance and additional labels where separation dimensions and alignments change. For any facilities not currently meeting the following separation requirements, revise plans so that the facilities meet the following separations requirements:

i. Minimum Separations (and Alignment Requirements) for Conveyances running Parallel to Potable Water Mains, Services, Laterals, and Conveyances (services, meters, fire hydrants, blowoff, air vacs, etc.):
    1. At least 10 feet horizontally from and one foot vertically above, any parallel pipeline conveying Sewer or Fluid Fuels. [CCR §64572(a)]
    2. At least 4 feet horizontally from, and one foot vertically above, any parallel pipeline conveying Recycled Water, Storm Drainage, or Raw Ground Water. [CCR §64572(b) & CCR §64572(c)]

ii. Minimum Separations (and Alignment Requirements) for Conveyances Crossing Potable Water Mains, Services, Laterals and Conveyances: [CCR §64572(d)]
    1. Potable Water Conveyances shall cross no less than 45-degrees to and at least one foot above any pipeline conveying Sewer, Fluid Fuels, Recycled Water, Storm Drainage, Raw Ground Water, or Private Water.
    2. No connection joints shall be made in the Potable Water Conveyance within eight horizontal feet of crossing the non-potable conveyance.

iii. Other Minimum Separations for Potable Water Mains, Services, Laterals and Conveyances [CCR §64572(f)]:
    1. 100 horizontal feet of the nearest edge of any sanitary landfill, wastewater disposal pond, or hazardous waste disposal site.
    2. 25 horizontal feet of the nearest edge of any cesspool, septic tank, sewage leach field, or seepage pit.
    3. 25 horizontal feet of the nearest edge of any underground hazardous material storage tank.
    4. 25 horizontal feet of the nearest edge of any facilities for storm water retention, storm water infiltration, bioswale, or groundwater recharge site.

iv. If unable to meet DDW Separation Requirements, submit for review and approval a DDW Waiver, explaining the reason for the waiver and proposing a mitigation measure for the State to consider in their review of the waiver. The waiver would be required during plan check.

Sanitary Sewer Conditions (Section 2.C): The Applicant shall comply with the following:

4. Sanitary Sewer Infrastructure:
    a. Install 8-inch sewer mains (or approved size per Final SSAMP) throughout TM-20530, with point of connections to the existing 8-inch sewer mains in Twinkle Avenue. Public sewer mains installed in private drives shall be within a Public Utility Easement.

5. Unused Sewer Abandonment:
    a. Unused existing sewer stub and manhole in Twinkle Avenue approximately 120 feet south of Pollock Street shall be abandoned back to the main connection.
    b. Unused existing sewer stub, manholes, and main in Twinkle Avenue about 127 feet north of the intersection of Twinkle Avenue and Pollock Street shall be abandoned back to the first point of service in Brunswick Paseo.
    c. Abandon any unused existing sewer mains and install a terminus manhole.

Potable Water Conditions (Section 2.D): The Applicant shall comply with the following:

6. Potable Water Infrastructure:
    a. Install 8-inch potable water mains throughout TM-20530, with two points of connection to the 8-inch water main at the intersection of Twinkle Avenue and Lautner Paseo and at the intersection of Twinkle Avenue and approximately 120 feet south of Pollock Street. Public potable water mains installed in private drives shall be within a Public Utility Easement.
        i. 8-inch public potable water mains shall be a minimum of 4' from curb.

7. Unused Potable Water Stub Abandonment:

   a. The unused existing potable water stub in Twinkle Avenue approximately 103 feet south of Pollock Street shall be abandoned back to the main connection.

   b. The unused existing potable water stub and its appurtenances in Twinkle Avenue approximately 115 feet north of Pollock Street shall be abandoned back to the main connection.

   c. The unused existing potable water stub and its appurtenances east of the intersection of Twinkle Avenue and Pollock Street shall be abandoned back to the main connection.

CITY OF ONTARIO

ENGINEERING DEPARTMENT CONDITIONS OF APPROVAL

(Engineering Services Division [Land Development Section and Environmental Section], Traffic & Transportation Division, Ontario Municipal Utilities Company and Broadband Operations & Investment and Revenue Resources Department Conditions incorporated)

☐ DEVELOPMENT PLAN ☐ OTHER	☐ PARCEL MAP ☒ **TRACT MAP** ☐ FOR CONDOMINIUM PURPOSES
PROJECT FILE NO. TM-20530 **RELATED FILE NO(S). PMTT22-009**	
☒ **ORIGINAL** ☐ REVISED: __/__/__	

CITY PROJECT ENGINEER & PHONE NO:	**Michael Bhatanawin, P.E. (909) 395-2130**
CITY PROJECT PLANNER & PHONE NO:	**Lorena Mejia (909) 395-2276**
DAB MEETING DATE:	**October 17, 2022**
PROJECT NAME / DESCRIPTION:	**TM-20530, a Tentative Tract Map for condominium purposes to subdivide 8.3 acres of land into three (4) numbered lots and 15 lettered lots, to facilitate the development of 144 multi-family dwellings, within PA-5 of the Rich Haven Specific Plan**
LOCATION:	**Northeast of Pollock St and Twinkle Ave**
APPLICANT:	**Richland Communities**
REVIEWED BY:	Raymond Lee 10/13/22 **Raymond Lee, P.E.** **Date** **Assistant City Engineer**
APPROVED BY:	10.13.22 **Khoi Do, P.E.** **Date** **City Engineer**

Last Revised: 10/13/2022

THIS PROJECT SHALL COMPLY WITH THE REQUIREMENTS SET FORTH IN THE GENERAL STANDARD CONDITIONS OF APPROVAL ADOPTED BY THE CITY COUNCIL (RESOLUTION NO. 2017-027) AND THE PROJECT SPECIFIC CONDITIONS OF APPROVAL SPECIFIED HEREIN. ONLY APPLICABLE CONDITIONS OF APPROVAL ARE CHECKED. THE APPLICANT SHALL BE RESPONSIBLE FOR THE COMPLETION OF ALL APPLICABLE CONDITIONS OF APPROVAL PRIOR TO FINAL MAP APPROVAL, ISSUANCE OF PERMITS AND/OR OCCUPANCY CLEARANCE, AS SPECIFIED IN THIS REPORT.

1. PRIOR TO FINAL MAP APPROVAL, APPLICANT SHALL:

Check When Complete

☐ 1.01 Dedicate to the City of Ontario, the right-of-way, described below: ☐

_____ feet on _____

Property line corner 'cut-back' required at the intersection of _____ and _____.

☒ **1.02 Dedicate to the City of Ontario, the following easement(s):** ☐

A. 34-48 feet wide varies easement for public utility purposes along Private Drive 'A'
B. 34 feet wide easement for public utility purposes along Private Drive 'B'

☐ 1.03 Restrict vehicular access to the site as follows: _____ ☐

☒ **1.04 Vacate the following street(s) and/or easement(s):** ☐

A. All interfering on-site easements shall be quitclaimed, vacated, and/or submit non-interference letter from affected owner/utility company.
B. E Eames St from Twinkle Ave to easterly tract boundaries
C. E Pollock St from Twinkle Ave to easterly tract boundaries

☐ 1.05 Submit a copy of a recorded private reciprocal use agreement or easement. The agreement or easement shall ensure, at a minimum, common ingress and egress and joint maintenance of all common access areas and drive aisles. ☐

☒ **1.06 Provide (original document) Covenants, Conditions and Restrictions (CC&Rs) as applicable to the project and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&Rs shall provide for, but not be limited to, common ingress and egress, joint maintenance responsibility for all common access improvements, common facilities, parking areas, utilities, median and landscaping improvements and drive approaches, in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project. The CC&Rs shall also address the maintenance and repair responsibility for public improvements/utilities (sewer, water, storm drain, recycled water, etc.) located within open space/easements. In the event of any maintenance or repair of these facilities, the City shall only restore disturbed areas to current City Standards.** ☐

☐ 1.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at *http://tceplumecleanup.com/*), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at *http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658*. ☐

☐ 1.08 File an application for Reapportionment of Assessment, together with payment of a reapportionment processing fee, for each existing assessment district listed below. Contact the Financial Services Department at (909) 395-2124 regarding this requirement. ☐

(1) _____

(2) _____

☒ **1.09 Prepare a fully executed Subdivision Agreement (on City approved format and forms) with accompanying security as required, or complete all public improvements.** ☐

☒ **1.10 Provide a monument bond (i.e. cash deposit) in an amount calculated by the City's approved cost estimate spreadsheet (available for download on the City's website: www.ontarioca.gov) or as specified in writing by the applicant's Registered Engineer or Licensed Land Surveyor of Record and approved by the City Engineer, whichever is greater.** ☐

☒ **1.11 Provide a preliminary title report current to within 30 days.** ☐

☒ **1.12 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2341 to initiate the CFD application process.** ☐

☒ **1.13 Ontario Ranch Developments:** ☐

☐ 1) Provide evidence of final cancellation of Williamson Act contracts associated with this tract, prior to approval of any final subdivision map. Cancellation of contracts shall have been approved by the City Council.

☒ **2) Provide evidence of sufficient storm water capacity availability equivalents (Certificate of Storm Water Treatment Equivalents).**

☒ **3) Provide evidence of sufficient water availability equivalents (Certificate of Net MDD Availability).**

☒ **1.14 Other conditions:** ☐

A. Record Lot Line Adjustments 22-004, 22-005 and 22-06. Additionally, record Conforming Deeds with the County of San Bernardino within six months of the recordation of the Lot Line Adjustments to conform the new LLA legal description. Submit a copy of the recorded Conforming Deeds to the Engineering Department.

B. The Tract Map shall comply with the approved Rich Haven Specific Plan, the Development Agreement and the Conditions of Approval for Tentative Tract Map No. 20530.

C. Applicant/developer shall obtain all off-site right-of-way/easements necessary to construct the required public improvements identified within Section 2 of these Conditions of Approval.

2. PRIOR TO ISSUANCE OF ANY PERMITS, APPLICANT SHALL:

A. GENERAL
(Permits includes Grading, Building, Demolition and Encroachment)

☒ **2.01** **Record Tract Map No. 20530 pursuant to the Subdivision Map Act and in accordance with the City of Ontario Municipal Code.** ☐

☒ **2.02** **Submit a PDF of the recorded map to the City Engineer's office.** ☐

☐ 2.03 Note that the subject parcel is a recognized parcel in the City of Ontario per_____. ☐

☐ 2.04 Note that the subject parcel is an 'unrecognized' parcel in the City of Ontario and shall require a Certificate of Compliance to be processed unless a deed is provided confirming the existence of the parcel prior to the date of March 4, 1972. ☐

☐ 2.05 Apply for a: ☐

☐ Certificate of Compliance with a Record of Survey;

☐ Lot Line Adjustment (Record a Conforming Deed with the County of San Bernardino within six months of the recordation of the Lot Line Adjustment to conform the new LLA legal description. Submit a copy of the recorded Conforming Deed to the Engineering Department.);

☐ Make a Dedication of Easement.

☐ 2.06 Provide (original document) Covenants, Conditions and Restrictions (CC&R's), as applicable to the project, and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&R's shall provide for, but not be limited to, common ingress and egress, joint maintenance of all common access improvements, common facilities, parking areas, utilities and drive approaches in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project. ☐

☐ 2.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at http://tceplumecleanup.com/), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658. ☐

☒ **2.08** **Submit a soils/geology report.** ☐

☐ 2.09 Other Agency Permit/Approval: Submit a copy of the approved permit and/or other form of approval of the project from the following agency or agencies: ☐

- ☐ State of California Department of Transportation (Caltrans)
- ☐ San Bernardino County Road Department (SBCRD)
- ☐ San Bernardino County Flood Control District (SBCFCD)
- ☐ Federal Emergency Management Agency (FEMA)
- ☐ Cucamonga Valley Water District (CVWD) for sewer/water service
- ☐ United States Army Corps of Engineers (USACE)
- ☐ California Department of Fish & Game
- ☐ Inland Empire Utilities Agency (IEUA)
- ☐ Other: _____

☐ 2.10 Dedicate to the City of Ontario the right-of-way described below: ☐

_____ feet on _____

Property line corner 'cut-back' required at the intersection of _____ and _____.

☐ 2.11 Dedicate to the City of Ontario the following easement(s): _____ ☐

_____

☐ 2.12 Vacate the following street(s) and/or easement(s): ☐

A. All interfering on-site easements shall be quitclaimed, vacated, and/or submit non-interference letter from affected owner/utility company.

☒ **2.13 Ontario Ranch Developments:** ☐

☐ 1) Submit a copy of the permit from the San Bernardino County Health Department to the Engineering Department and the Ontario Municipal Utilities Company (OMUC) for the destruction/abandonment of the on-site water well. The well shall be destroyed/abandoned in accordance with the San Bernardino County Health Department guidelines.

☐ 2) Make a formal request to the City of Ontario Engineering Department for the proposed temporary use of an existing agricultural water well for purposes other than agriculture, such as grading, dust control, etc. Upon approval, the Applicant shall enter into an agreement with the City of Ontario and pay any applicable fees as set forth by said agreement.

☒ **3) Design proposed retaining walls to retain up to a maximum of three (3) feet of earth. In no case shall a wall exceed an overall height of nine (9) feet (i.e. maximum 6-foot high wall on top of a maximum 3-foot high retaining wall.**

☐ 2.14 Submit a security deposit to the Engineering Department to guarantee construction of the public improvements required herein valued at _____% of the approved construction cost estimate. Security deposit shall be in accordance with the City of Ontario Municipal Code. Security deposit will be eligible for release, in accordance with City procedure, upon completion and acceptance of said public improvements. ☐

☒ **2.15 The applicant/developer shall submit all necessary survey documents prepared by a Licensed Surveyor registered in the State of California detailing all existing survey monuments in and around the project site. These documents are to be reviewed and approved by the City Survey Office.** ☐

☒ **2.16 Pay all Development Impact Fees (DIF) to the Building Department. Final fee shall be determined based on the approved site plan and the DIF rate at the time of payment.** ☐

☐ 2.17 Other conditions: _____ ☐

B. PUBLIC IMPROVEMENTS
(See attached Exhibit 'A' for plan check submittal requirements.)

☒ **2.18** **Design and construct full public improvements in accordance with the City of Ontario Municipal Code, current City standards and specifications, master plans and the adopted specific plan for the area, if any. These public improvements shall include, but not be limited to, the following (checked boxes):** ☐

Improvement	Twinkle Ave	All Private Drives	Street 3	Street 4
Curb and Gutter	☐ New; ___ ft. from C/L ☐ Replace damaged ☐ Remove and replace	☐ New; ___ ft. from C/L ☐ Replace damaged ☐ Remove and replace	☐ New; ___ ft. from C/L ☐ Replace damaged ☐ Remove and replace	☐ New; ___ ft. from C/L ☐ Replace damaged ☐ Remove and replace
AC Pavement	☐ Replacement ☐ Widen ____ additional feet along frontage, including pavm't transitions	☐ Replacement ☐ Widen ____ additional feet along frontage, including pavm't transitions	☐ Replacement ☐ Widen ____ additional feet along frontage, including pavm't transitions	☐ Replacement ☐ Widen ____ additional feet along frontage, including pavm't transitions
PCC Pavement (Truck Route Only)	☐ New ☐ Modify existing	☐ New ☐ Modify existing	☐ New ☐ Modify existing	☐ New ☐ Modify existing
Drive Approach	☒ **New** ☐ Remove and replace	☐ New ☐ Remove and replace	☐ New ☐ Remove and replace	☐ New ☐ Remove and replace
Sidewalk	☒ **New (A)** ☐ Remove and replace	☐ New ☐ Remove and replace	☐ New ☐ Remove and replace	☐ New ☐ Remove and replace
ADA Access Ramp	☒ **New** ☐ Remove and replace	☐ New ☐ Remove and replace	☐ New ☐ Remove and replace	☐ New ☐ Remove and replace
Parkway	☒ **Trees (A)** ☒ **Landscaping (w/irrigation) (A)**	☐ Trees ☐ Landscaping (w/irrigation)	☐ Trees ☐ Landscaping (w/irrigation)	☐ Trees ☐ Landscaping (w/irrigation)
Raised Landscaped Median	☐ New ☐ Remove and replace	☐ New ☐ Remove and replace	☐ New ☐ Remove and replace	☐ New ☐ Remove and replace

Removal of Improvements				
Other Improvements				

Specific notes for improvements listed in item no. 2.17, above:

A. **East side along project frontage**
B. **All utilities and infrastructure shall be designed and installed to the ultimate condition**

☐ 2.19 Construct a 2" asphalt concrete (AC) grind and overlay on the following street(s): _____ ☐

_____

☐ 2.20 Reconstruction of the full pavement structural section, per City of Ontario Standard Drawing number 1011, may be required based on the existing pavement condition and final street design. Minimum limits of reconstruction shall be along property frontage, from street centerline to curb/gutter. ☐

☐ 2.21 Make arrangements with the Cucamonga Valley Water District (CVWD) to provide ☐ water service ☐ sewer service to the site. This property is within the area served by the CVWD and Applicant shall provide documentation to the City verifying that all required CVWD fees have been paid. ☐

☐ 2.22 Overhead utilities shall be under-grounded, in accordance with Title 7 of the City's Municipal Code (Ordinance No. 2804 and 2892). Developer may pay in-lieu fee, approximately _____, for undergrounding of utilities in accordance with Section 7-7.302.e of the City's Municipal Code. ☐

☐ 2.23 Other conditions: _____ ☐

C. SEWER

☒ **2.24 A 8 inch sewer main is available for connection by this project in Twinkle Ave. (Ref: Sewer plan bar code: S16445)** ☐

☐ 2.25 Design and construct a sewer main extension. A sewer main is not available for direct connection. The closest main is approximately _____ feet away. ☐

☐ 2.26 Submit documentation that shows expected peak loading values for modeling the impact of the subject project to the existing sewer system. The project site is within a deficient public sewer system area. Applicant shall be responsible for all costs associated with the preparation of the model. Based on the results of the analysis, Applicant may be required to mitigate the project impact to the deficient public sewer system, including, but not limited to, upgrading of existing sewer main(s), construction of new sewer main(s) or diversion of sewer discharge to another sewer. ☐

☒ **2.27 Other conditions:** ☐

See OMUC Conditions of Approval attached.

D. WATER

☒ **2.28 A 8 inch water main is available for connection by this project in Twinkle Ave. (Ref: Water plan bar code: W16594)** ☐

☐ 2.29 Design and construct a water main extension. A water main is not available for direct connection. The closest main is approximately _____ feet away. ☐

☒ **2.30 Other conditions:** ☐

See OMUC Conditions of Approval attached.

E. RECYCLED WATER

☐ 2.31 A _____Inch recycled water main is available for connection by this project in _____. (Ref: Recycled Water plan bar code:_____) ☐

☐ 2.32 Design and construct an on-site recycled water system for this project. A recycled water main does exist in the vicinity of this project. ☐

☐ 2.33 Design and construct an on-site recycled water ready system for this project. A recycled water main does not currently exist in the vicinity of this project, but is planned for the near future. If Applicant would like to connect to this recycled water main when it becomes available, the cost for the connection shall be borne solely by the Applicant. ☐

☐ 2.34 Submit two (2) hard copies and one (1) electronic copy, in PDF format, of the Engineering Report (ER), for the use of recycled water, to the OMUC for review and subsequent submittal to the California Department of Public Health (CDPH) for final approval. ☐

Note: The OMUC and the CDPH review and approval process will be approximately three (3) months. Contact the Ontario Municipal Utilities Company at (909) 395-2647 regarding this requirement.

☒ **2.35 Other conditions:** ☐

See OMUC Conditions of Approval attached.

F. TRAFFIC / TRANSPORTATION

☐ 2.36 Submit a focused traffic impact study, prepared and signed by a Traffic/Civil Engineer registered in the State of California. The study shall address, but not be limited to, the following issues as required by the City Engineer: ☐
1. On-site and off-site circulation
2. Traffic level of service (LOS) at 'build-out' and future years
3. Impact at specific intersections as selected by the City Engineer

☐ 2.37 New traffic signal installations shall be added to Southern California Edison (SCE) customer account number # 2-20-044-3877. ☐

☒ **2.38 Other conditions:** ☐

A. **If street chokers along Twinkle Avenue have not been constructed at the time of development of PMTT22-009, Street chokers along Twinkle Avenue shall be designed and constructed in accordance with City Standard Drawing No. 1110.**
B. **As currently proposed, Private Drive 'A' onto Twinkle Avenue shall be restricted to right-in/right-out ingress/egress due to the raised median approaching the roundabout.**
C. **Parking shall be restricted with signs along chokers per City Standard Drawing No. 1110.**
D. **All landscaping, block walls, and other obstructions shall be compatible with the stopping sight distance requirements per City of Ontario Standard Drawing No. 1309.**
E. **The Applicant/Developer's engineer-of-record shall meet with City Engineering staff prior to designing and submitting for plan check the signing/striping and street lighting design plans to define limits of improvements.**

G. DRAINAGE / HYDROLOGY

☒ **2.39 A 72 inch storm drain main is available to accept flows from this project in Twinkle Ave. (Ref: Storm Drain plan bar code: D14257)** ☐

☒ **2.40 Submit a hydrology study and drainage analysis, prepared and signed by a Civil Engineer registered in the State of California. The study shall be prepared in accordance with the San Bernardino County Hydrology Manual and City of Ontario standards and guidelines. Additional drainage facilities, including, but not limited to, improvements beyond the project frontage, may be required to be designed and constructed, by Applicant, as a result of the findings of this study.** ☐

☐ 2.41 An adequate drainage facility to accept additional runoff from the site does not currently exist downstream of the project. Design and construct a storm water detention facility on the project site. 100 year post-development peak flow shall be attenuated such that it does not exceed 80% of pre-development peak flows, in accordance with the approved hydrology study and improvement plans. ☐

☐ 2.42 Submit a copy of a recorded private drainage easement or drainage acceptance agreement to the Engineering Department for the acceptance of any increase to volume and/or concentration of historical drainage flows onto adjacent property, prior to approval of the grading plan for the project. ☐

☐ 2.43 Comply with the City of Ontario Flood Damage Prevention Ordinance (Ordinance No. 2409). The project site or a portion of the project site is within the Special Flood Hazard Area (SFHA) as indicated on the Flood Insurance Rate Map (FIRM) and is subject to flooding during a 100 year frequency storm. The site plan shall be subject to the provisions of the National Flood Insurance Program. ☐

☒ **2.44 Other conditions:** ☐

A. **Abandon existing 18" storm drain lateral (A-13) and catch basin (A1) on Eames St. (Ref: Storm Drain plan bar code: D14257)**
B. **Abandon existing 18" storm drain laterals (B-13 & B-14) and catch basins (B3, B4) on Pollock St. (Ref: Storm Drain plan bar code: D14259)**
C. **Install a 36" storm drain lateral at the intersection of Twinkle Ave and Private Drive 'B'**

and connect to existing 72" storm drain line.

D. **Install a 36" storm drain lateral at the intersection of Twinkle Ave and Private Drive 'A' and connect to existing 72" storm drain line.**

H. STORM WATER QUALITY / NATIONAL POLLUTANT DISCHARGE AND ELIMINATION SYSTEM (NPDES)

☐ 2.45 401 Water Quality Certification/404 Permit – Submit a copy of any applicable 401 Certification or 404 Permit for the subject project to the City project engineer. Development that will affect any body of surface water (i.e. lake, creek, open drainage channel, etc.) may require a 401 Water Quality Certification from the California Regional Water Quality Control Board, Santa Ana Region (RWQCB) and a 404 Permit from the United States Army Corps of Engineers (USACE). The groups of water bodies classified in these requirements are perennial (flow year round) and ephemeral (flow during rain conditions, only) and include, but are not limited to, direct connections into San Bernardino County Flood Control District (SBCFCD) channels.
If a 401 Certification and/or a 404 Permit are not required, a letter confirming this from Applicant's engineer shall be submitted.
Contact information: USACE (Los Angeles District) (213) 452-3414; RWQCB (951) 782-4130. ☐

☒ 2.46 **Submit a Water Quality Management Plan (WQMP). This plan shall be approved by the Engineering Department prior to approval of any grading plan. The WQMP shall be submitted, utilizing the current San Bernardino County Stormwater Program template, available at: http://www.sbcounty.gov/dpw/land/npdes.asp.** ☐

☐ 2.47 Design and construct a Connector Pipe Trash Screen or equivalent Trash Treatment Control Device, per catch basin located within or accepting flows tributary of a Priority Land Use (PLU) area that meets the Full Capture System definition and specifications, and is on the Certified List of the State Water Resources Control Board. The device shall be adequately sized per catch basin and include a deflector screen with vector control access for abatement application, vertical support bars, and removable component to facilitate maintenance and cleaning. ☐

☐ 2.48 Other conditions: _____ ☐

J. SPECIAL DISTRICTS

☒ 2.49 **File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2341 to initiate the CFD application process.** ☐

☐ 2.50 Other conditions: _____ ☐

K. FIBER OPTIC

☒ 2.51 **A fiber optic line is available for connection by this project in Twinkle Ave. (Ref: Fiber Optic plan bar code: O10683)** ☐

☒ 2.52 **Design and construct fiber optic system to provide access to the City's conduit and fiber optic system per the City's Fiber Optic Master Plan. Building entrance conduits shall start from the closest OntarioNet hand hole constructed along the project frontage in the ROW and shall terminate in the main telecommunications room for each building. Conduit infrastructure shall interconnect with the primary and/or secondary backbone fiber optic conduit system at the nearest OntarioNet hand hole located at the southeast corner of Twinkle Ave & Eames St and on Twinkle Ave s/o Pollock St. Limits of work are generally along the project frontage of Twinkle Ave and all Private Drives.** ☐

☒ **2.53** **Refer to the City's Fiber Optic Master Plan for design and layout guidelines. Contact the Broadband Operations Department at (909) 395-2000, regarding this requirement.** ☐

3. PRIOR TO ISSUANCE OF A CERTIFICATE OF OCCUPANCY, APPLICANT SHALL:

☒ **3.01** **Set new monuments in place of any monuments that have been damaged or destroyed as a result of construction of the subject project. Monuments shall be set in accordance with City of Ontario standards and to the satisfaction of the City Engineer.** ☐

☒ **3.02** **Complete all requirements for recycled water usage.** ☐

☒ **1) Procure from the OMUC a copy of the letter of confirmation from the California Department of Public Health (CDPH) that the Engineering Report (ER) has been reviewed and the subject site is approved for the use of recycled water.**

☒ **2) Obtain clearance from the OMUC confirming completion of recycled water improvements and passing of shutdown tests and cross connection inspection, upon availability/usage of recycled water.**

☒ **3) Complete education training of on-site personnel in the use of recycled water, in accordance with the ER, upon availability/usage of recycled water.**

☒ **3.03** **The applicant/developer shall submit all final survey documents prepared by a Licensed Surveyor registered in the State of California detailing all survey monuments that have been preserved, revised, adjusted or set along with any maps, corner records or Records of Survey needed to comply with these Conditions of Approvals and the latest edition of the California Professional Land Survey Act. These documents are to be reviewed and approved by the City Survey Office.** ☐

☐ 3.04 Ontario Ranch Projects: For developments located at an intersection of any two collector or arterial streets, the applicant/developer shall set a monument if one does not already exist at that intersection. Contact the City Survey office for information on reference benchmarks, acceptable methodology and required submittals. ☐

☒ **3.05** **Confirm payment of all Development Impact Fees (DIF) to the Building Department.** ☐

☒ **3.06** **Submit electronic copies (PDF and Auto CAD format) of all approved improvement plans, studies and reports (i.e. hydrology, traffic, WQMP, etc.).** ☐

4. PRIOR TO FINAL ACCEPTANCE, APPLICANT SHALL:

☒ **4.01** **Complete all Conditions of Approval listed under Sections 1-3 above.** ☐

☒ **4.02** **Pay all outstanding fees pursuant to the City of Ontario Municipal Code, including but not limited to, plan check fees, inspection fees and Development Impact Fees.** ☐

☒ **4.03** **The applicant/developer shall submit a written request for the City's final acceptance of the project addressed to the City Project Engineer. The request shall include a completed Acceptance and Bond Release Checklist, state that all Conditions of Approval have been completed and shall be signed by the applicant/developer. Upon receipt of the request, review of the request shall be a minimum of 10 business days. Conditions of Approval that are deemed incomplete by the City will cause delays in the acceptance process.** ☐

☒ **4.04** **Submit record drawings (PDF) for all public improvements identified within Section 2 of these Conditions of Approval.** ☐

EXHIBIT 'A'

ENGINEERING DEPARTMENT
First Plan Check Submittal Checklist

Project Number: PMTT22-009 and/or Tract Map No. 20530

The following items are required to be included with the first plan check submittal:

1. ☒ **A copy of this check list**
2. ☒ **Payment of fee for Plan Checking**
3. ☒ **One (1) copy of Engineering Cost Estimate (on City form) with engineer's wet signature and stamp.**
4. ☒ **One (1) copy of project Conditions of Approval**
5. ☒ **Include a PDF (electronic submittal) of each required improvement plan at every submittal.**
6. ☒ **Two (2) sets of Potable and Recycled Water demand calculations (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size).**
7. ☐ Three (3) sets of Public Street improvement plan with street cross-sections
8. ☒ **Four (4) sets of Public Water improvement plan (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size)**
9. ☒ **Four (4) sets of Recycled Water improvement plan (include recycled water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size and an exhibit showing the limits of areas being irrigated by each recycled water meter)**
10. ☒ **Four (4) sets of Public Sewer improvement plan**
11. ☒ **Five (5) sets of Public Storm Drain improvement plan**
12. ☒ **Three (3) sets of Public Street Light improvement plan**
13. ☒ **Three (3) sets of Signing and Striping improvement plan**
14. ☒ **Three (3) sets of Fiber Optic plan (include Auto CAD electronic submittal)**
15. ☒ **Three (3) sets of Dry Utility plans within public right-of-way (at a minimum the plans must show existing and ultimate right-of-way, curb and gutter, proposed utility location including centerline dimensions, wall to wall clearances between proposed utility and adjacent public line, street work repaired per Standard Drawing No. 1306. Include Auto CAD electronic submittal)**
16. ☐ Three (3) sets of Traffic Signal improvement plan and One (1) copy of Traffic Signal Specifications with modified Special Provisions. Please contact the Traffic Division at (909) 395-2154 to obtain Traffic Signal Specifications.
17. ☒ **Two (2) copies of Water Quality Management Plan (WQMP), including one (1) copy of the approved Preliminary WQMP (PWQMP).**
18. ☒ **One (1) copy of Hydrology/Drainage study**
19. ☒ **One (1) copy of Soils/Geology report**
20. ☒ **Payment for Final Map/Parcel Map processing fee**

21. ☒ **Three (3) copies of Final Map**

22. ☒ **One (1) copy of approved Tentative Map**

23. ☒ **One (1) copy of Preliminary Title Report (current within 30 days)**

24. ☒ **One (1) copy of Traverse Closure Calculations**

25. ☒ **One (1) set of supporting documents and maps (legible copies): referenced improvement plans (full size), referenced record final maps/parcel maps (full size, 18"x26"), Assessor's Parcel map (full size, 11"x17"), recorded documents such as deeds, lot line adjustments, easements, etc.**

26. ☒ **Two (2) copies of Engineering Report and an electronic file (include PDF format electronic submittal) for recycled water use**

27. ☐ Other: _____

CITY OF ONTARIO
MEMORANDUM

ONTARIO MUNICIPAL UTILITIES COMPANY

DATE:	October 13, 2022
TO:	Michael Bhatanawin, Engineering Department
CC:	Lorena Mejia, Planning Department Charles Mercier, Planning Department
FROM:	Heather Young, Utilities Engineering Division Eric Woosley, Utilities Engineering Division
SUBJECT:	DPR#2 UPT#2 REV1- Utilities Conditions of Approval (COA) **(#8741)**
PROJECT NO.:	TM-20530 (PMTT22-009)
ATTACHMENT(S):	Conceptual Utility Systems Map electronically received 10/09/2022

BRIEF DESCRIPTION:

A Tentative Tract Map (TT 20530) for condominium purposes, to subdivide 8.3 acres of land into 4 numbered lots and 15 lettered lots, to facilitate the development of 144 multi-family dwellings located northeast of Pollock Street and Twinkle Avenue, within PA-5 of the Rich-Haven Specific Plan (APN(s): 218-016-06, 218-016-07, 218-016-18, 218-203-01, 218-203-02, 218-203-03, 218-203-04, 218-203-07, 218-203-06, & 218-203-05).

OMUC UTILITIES ENGINEERING DIVISION
CONDITIONS OF APPROVAL

CONDITIONS OF APPROVAL: *The Ontario Municipal Utilities Company (OMUC) Utilities Engineering Division recommends this application for approval subject to the Conditions of Approval outlined below and compliance with the City's Design Development Guidelines, Specifications Design Criteria, and City Standards. The Applicant shall be responsible for the compliance with and the completion of all the following applicable Conditions of Approval prior to the following milestones and subject to compliance with City's Design Development Guidelines, Specifications Design Criteria, and City Standards:*

General Conditions:

1. Standard Conditions of Approval: Project shall comply with the requirements set forth in the Amendment to the Standard Conditions of Approval for New Development Projects adopted by the City Council (Resolution No. 2017-027) on April 18, 2017, or as amended or superseded by Council Resolution; as well as project-specific conditions/requirements as outlined below.

Prior to Issuance of Any Permits (Grading, Building, Demolition and Encroachment), unless other timeline milestones are specified by individual conditions below, the Applicant Shall:

General Conditions (Section 2.A, Other conditions): The Applicant shall comply with the following:

2. Inherited Requirements and Conditions of Approval: This project is subject to all the Requirements and Conditions of Approval of from PSP05-004 Rich-Haven Specific Plan, PMTT17-013 (TM-20134), and PDA_18-005, as amended. For any Conditions of Approval that conflict, these Conditions shall supersede those conflicting Conditions.
3. Final Utilities Systems Map (USM): Submit a Final Utilities Systems Map (USM) as part of the precise grading plan submittal that meets all the City's USM requirements. These requirements include to show and label all existing and proposed utilities (including all appurtenances such as backflow devices, DCDAs, etc.), sizes, points of connection, and any easements. The final utility design shall comply with all Division of Drinking Water (CCR §64572) Separation Requirements. See Utility Systems Map (USM) Requirements document for details.
4. Note the following definitions and concepts for Public Utility Improvements and Private Utility Improvements: Public Improvements shall be designed per City Public Design Guidelines and City Standards and constructed

through a City Encroachment Permit; and, Private Onsite Improvements shall be designed per Building Code and Plumbing Code and constructed through a City Building Permit.

a. Public Utility Improvements include the following: water main pipelines and sewer main pipelines; sewer laterals connecting to a Public Sewer Main up to the Cleanout (or Manhole) at PL/RoW; water services and connected appurtenances (Meters/Meter Boxes, Fire Hydrants, Airvacs, Blowoffs, etc.) connecting to a Public Water Main per City Standards; and, Fire Services connecting to a Public Water Main from the Main up to the DCDA. Public Water Improvements and Public Sewer Improvements are required to be designed and constructed through Public Improvement Plans with Plan View and Profile View per City Standards, Guidelines, and Requirements.

b. Private Utility Improvements include the following: onsite water plumbing lines after a Public Meter, or after the Fire DCDA and including the DCDA; Backflow Devices and other Cross-Connection Prevention; onsite sewer upstream of the Public Sewer Lateral, including the Cleanout (or Manhole) at PL/RoW/PUE Edge; Monitoring Manholes and other Wastewater Pretreatment Facilities. Private Onsite Utility Improvements are required to be designed and constructed per Building and Plumbing Plans with: the Backflows, DCDAs, Cleanout (or Manhole) at PL/RoW/PUE Edge, and Monitoring Manholes being designed and constructed through a Precise Grading Plan; and, the other Pretreatment Devices (Grease Interceptor, Sand, Oil Interceptors, etc.) and the connections to the buildings and structures through a building Plumbing Plan.

5. Public Utilities and Public Right-of-Way (PRoW) including Public Utility Easements (PUE): Public Utilities shall be subject to the Minimum PRoW Requirements and PRoW Restrictions:

   a. Minimum PRoW Area Requirements: Public Utilities shall be installed within in existing PRoW in alignments/locations that meet the following minimum PRoW areas surrounding the Public Utilities, and/or additional PRoW shall be dedicated/granted to the City to provide the following minimum PRoW areas surrounding the Public Utilities:
      i. For each main, the PRoW shall be a minimum of 20 feet wide, centered on the utility main with a minimum of 10 feet of PRoW on each side of the main and this minimum area shall extend a minimum for 10 feet past the end of a main.
      ii. For each Service/Lateral, the PRoW shall be a minimum of 10 feet wide, centered on the service/lateral with a minimum of 5 feet of PRoW on each side of each service/lateral;
      iii. For each water meter box, the PRoW shall be a minimum of 5 feet behind and 5 feet on each side of a water meter box;
      iv. For each water appurtenances (fire hydrants, blowoffs, airvacs, etc.), the PRoW shall be a minimum of 5 feet on each side surrounding the water appurtenances (fire hydrants, blowoffs, airvacs, etc.);
      v. The PRoW minimum areas for separate Public Utilities may overlap, provide that all minimum separations and PRoW Restrictions are met.

Sanitary Sewer Conditions (Section 2.C): The Applicant shall comply with the following:

6. Sanitary Sewer Infrastructure:

   a. Install 8-inch sewer mains (or approved size per Final SSAMP) in Private Drive 'A' throughout TTM20530, with point of connection to the existing 8-inch sewer main in Twinkle Avenue. Public sewer mains installed in private drives shall be within a Public Utility Easement.

   b. Onsite sewer installed in private alleys of TTM20530 shall be privately owned and maintained.

7. Sewer Sub-Area Master Plan (SSAMP): Submit a Final Sewer Sub-Area Master Plan (SSAMP) pursuant to Section 4-8 of the Sewer Master Plan (SMP) and submit it to OMUC for review and approval with the first submittal of the sewer plans and prior to issuance of any permits.

8. Unused Sewer Abandonment:

   a. Unused existing sewer stub and manhole in Twinkle Avenue approximately 120 feet south of Pollock Street shall be abandoned back to the main connection.

   b. Unused existing sewer stub and manhole in Twinkle Avenue about 127 feet north of the intersection of Twinkle Avenue and Pollock Street shall be abandoned back to the main connection.

   c. Unused existing sewer stub and manhole in Eames Street shall be abandoned back to the main connection.

d. Abandon any unused existing sewer mains and install a terminus manhole.

Potable Water Conditions (Section 2.D): The Applicant shall comply with the following:

9. Potable Water Infrastructure:
    a. Install 8-inch potable water mains in Private Drive 'B' and Private Drive 'A' throughout TTM20530, with two points of connection to the 8-inch water main at the intersection of Twinkle Avenue and Private Drive 'B' and at the intersection of Twinkle Avenue and approximately 120 feet south of Pollock Street. Public potable water mains installed in private drives shall be within a Public Utility Easement.
10. Potable Water Service:
    a. Domestic Service: Each Building shall have its own domestic potable water service and master meter connected to the Public Potable Water System. The services and meters shall be such locations so that no more than 28 units are serviced on a potable water main deadend.
    b. Backflow Prevention: Each meter connected to the Public Potable Water System that serves any use that is more than one (1) single family residential unit or any non-residential use requires a backflow prevention device.
    c. Fire Water Service: Each fire service shall have a Double Check Detector Assembly (DCDA) per current City Standards to serve the onsite private fire system. The onsite fire system and onsite domestic water plumbing system shall be separate.
11. Unused Potable Water Stub Abandonment: The unused existing potable water stub in Twinkle Avenue approximately 103 feet south of Pollock Street shall be abandoned back to the main connection.

Recycled Water Conditions (Section 2.E): The Applicant shall comply with the following:

12. City Ordinance 2689: This development shall comply with City Ordinance 2689 and make use of recycled water for all approved uses, including but not limited to landscape irrigation. Appropriately sized public and private mains shall be installed throughout the Project to meet this requirement, as approved by the City.
13. Recycled Water Infrastructure:
    a. Option 1: If the same Housing Association for TM-20134 will be used for TTM20530, tie into private onsite recycled water system from adjacent tract within TM-20134 for recycled water usage, if feasible. If not, see Option 2.
    b. Option 2: Install recycled water main (930PZ) in Twinkle Avenue from the northernly boundary of the Project to the Project's park or further south if recycled water services are needed further south within the Project. Recycled water main shall be temporarily charged by the potable water main until recycled water is available for connection per TTM20259 in Twinkle Avenue north of the Project. The temporary potable water connection shall have a backflow prevention device. Once recycled water is available for connection per TTM20529, this Project shall connect to the recycled water and this Project shall remove the temporary potable water connection and its appurtenances used to charge the recycled water main.
14. RW Program Requirements: In order to receive RW service, the applicant shall comply with each of the following:
    a. Prior to Precise Grading Plan Approval and Building Permits Issuance:
        i. Provide two hard copies and the digital files (in PDF and AutoCAD format) for both on-site and off-site utility plans, including landscape and irrigation improvements.
        ii. Submit an **Engineering Report (ER)** to the City detailing recycled water usage for review and approval by the City and the State. The review process for the ER is typically 3 months. City will coordinate the State's approval of the ER.
        iii. For details, contact Cynthia Heredia-Torres at (909) 395-2647 or ctorres@ontarioca.gov.
    b. Prior to Occupancy Release/Finalizing:
        i. Pass start-up and cross-connection test successfully.
        ii. Provide evidence demonstrating the training of on-site supervisor or designee as determined in the ER.

CITY OF ONTARIO
MEMORANDUM

TO: **Lorena Mejia, Senior Planner**
Planning Department

FROM: **Paul Ehrman, Sr. Deputy Fire Chief/Fire Marshal**
Fire Department

DATE: **March 14, 2023**

SUBJECT: **PDEV23-007 - A Development Plan approval to construct one-hundred forty-four (144) multiple-family dwellings on approximately 9.19 acres of land generally located on the east side of Twinkle Avenue approximately 500 feet north of Moonlight Street, within Planning Areas 5B, 5C, 5D and 5E (Residential – SFD/Attached and Edison Easement) of the Rich Haven Specific Plan. (APN(s): 0218-016-06, 0218-016-07, 0218-016-18, 0218-203-08, 0218-203-01, 0218-203-01, 0218-203-02, 0218-203-03, 0218-203-04, 0218-203-07, 0218-203-06 & 0218-203-05). Related File(s): PMTT22-009.**

☒ The plan **does** adequately address Fire Department requirements at this time.

☒ Standard Conditions of Approval apply, as stated below.

SITE AND BUILDING FEATURES:

A. 2019 CBC Type of Construction: Type V-B

B. Type of Roof Materials: Ordinary

C. Ground Floor Area(s): Varies, 12 Buildings, 144 Units

D. Number of Stories: 2

E. Total Square Footage: 12,199 Sq. Ft.

F. 2019 CBC Occupancy Classification(s): R2

CONDITIONS OF APPROVAL:

1.0 GENERAL

☒ 1.1 The following are the Ontario Fire Department ("Fire Department") requirements for this development project, based on the current edition of the California Fire Code (CFC), and the current versions of the Fire Prevention Standards ("Standards.") It is recommended that the applicant or developer transmit a copy of these requirements to the on-site contractor(s) and that all questions or concerns be directed to the Bureau of Fire Prevention, at (909) 395-2029. For copies of Ontario Fire Department Standards please access the City of Ontario web site at www.ontarioca.gov/Fire/Prevention.

☒ 1.2 These Fire Department conditions of approval are to be included on any and all construction drawings.

2.0 FIRE DEPARTMENT ACCESS

☒ 2.1 Fire Department vehicle access roadways shall be provided to within 150 ft. of all portions of the exterior walls of the first story of any building, unless specifically approved. Roadways shall be paved with an all-weather surface and shall be a minimum of twenty-four (24) ft. wide. See Standard #B-004.

☒ 2.2 In order to allow for adequate turning radius for emergency fire apparatus, all turns shall be designed to meet the minimum twenty five feet (25') inside and forty-five feet (45') outside turning radius per Standard #B-005.

☒ 2.3 Fire Department access roadways that exceed one hundred and fifty feet (150') in length shall have an approved turn-around per Standard #B-002.

☒ 2.4 Access drive aisles which cross property lines shall be provided with CC&Rs, access easements, or reciprocating agreements, and shall be recorded on the titles of affected properties, and copies of same shall be provided at the time of building plan check.

☒ 2.5 "No Parking-Fire Lane" signs and /or red painted curbs with lettering are required to be installed in interior access roadways, in locations where vehicle parking would obstruct the minimum clear width requirement. Installation shall be per Standard #B-001.

☒ 2.6 Security gates or other barriers on fire access roadways shall be provided with a Knox brand key switch or padlock to allow Fire Department access. See Standards #B-003, B-004 and H-001.

☒ 2.7 Any time PRIOR to on-site combustible construction and/or storage, a minimum twenty-four (24) ft. wide circulating all weather access roads shall be provided to within 150 ft. of all portions of the exterior walls of the first story of any building, unless specifically approved by fire department and other emergency services.

3.0 WATER SUPPLY

☒ 3.1 The required fire flow per Fire Department standards, based on the 2019 California Fire Code, Appendix B, is 1500 gallons per minute (g.p.m.) for 2 hours at a minimum of 20 pounds per square inch (p.s.i.) residual operating pressure.

☒ 3.2 Off-site (public) fire hydrants are required to be installed on all frontage streets, at a minimum spacing of three hundred foot (300') apart, per Engineering Department specifications.

☒ 3.4 The water supply, including water mains and fire hydrants, shall be tested and approved by the Engineering Department and Fire Department prior to combustible construction to assure availability and reliability for firefighting purposes.

4.0 FIRE PROTECTION SYSTEMS

☒ 4.1 On-site private fire hydrants are required per Standard #D-005, and identified in accordance with Standard #D-002. Installation and locations(s) are subject to the approval of the Fire Department. An application with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.

☒ 4.2 Underground fire mains which cross property lines shall be provided with CC & R, easements, or reciprocating agreements, and shall be recorded on the titles of affected properties, and copies of same shall be provided at the time of fire department plan check. The shared use of private fire mains or fire pumps is allowable only between immediately adjacent properties and shall not cross any public street.

☒ 4.3 An automatic fire sprinkler system is required. The system design shall be in accordance with National Fire Protection Association (NFPA) Standard 13. All new fire sprinkler systems, except those in single family dwellings, which contain twenty (20) sprinkler heads or more shall be monitored by an approved listed supervising station. An application along with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.

☒ 4.4 Wood frame buildings that are to be sprinkled shall have these systems in service (but not necessarily finaled) before the building is enclosed.

☒ 4.5 Fire Department Connections (FDC) shall be located on the address side of the building within one hundred fifty feet (150') of a public fire hydrant on the same side of the street. Provide identification for all fire sprinkler control valves and fire department connections per Standard #D-007. Raised curbs adjacent to Fire Department connection(s) shall be painted red, five feet either side, per City standards.

☒ 4.6 A fire alarm system is required. The system design shall be in accordance with National Fire Protection Association (NFPA) Standard 72. An application along with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.

☒ 4.7 Portable fire extinguishers are required to be installed prior to occupancy per Standard #C-001. Please contact the Fire Prevention Bureau to determine the exact number, type and placement required.

5.0 BUILDING CONSTRUCTION FEATURES

☒ 5.1 The developer/general contractor is to be responsible for reasonable periodic cleanup of the development during construction to avoid hazardous accumulations of combustible trash and debris both on and off the site.

☒ 5.2 Approved numbers or addresses shall be placed on all new and existing buildings in such a position as to be plainly visible and legible from the street or road fronting the property. Multi-tenant or building projects shall have addresses and/or suite numbers provided on the rear of the building. Address numbers shall contrast with their background. See Section 9-1 6.06 of the Ontario Municipal Code and Standards #H-003 and #H-002.

☒ 5.3 Single station smoke alarms and carbon monoxide alarms are required to be installed per the California Building Code and the California Fire Code.

☒ 5.4 Multiple unit building complexes shall have building directories provided at the main entrances. The directories shall be designed to the requirements of the Fire Department, see Section 9-1 6.06 of the Ontario Municipal Code and Standard #H-003. .

☒ 5.5 All residential chimneys shall be equipped with an approved spark arrester meeting the requirements of the California Building Code.

☒ 5.6 Knox ® brand key-box(es) shall be installed in location(s) acceptable to the Fire Department. All Knox boxes shall be monitored for tamper by the building fire alarm system. See Standard #H-001 for specific requirements.

Irvine, CA 92618

☒	**Preliminary Plans (dated 8/9/2023) meet the Standard Conditions for New Development and have been approved considering that the following conditions below be met upon submittal of the landscape construction documents.**
☐	**Preliminary Plans (dated) have not been approved. Corrections noted below are required before Preliminary Landscape Plan approval.**

A RESPONSE SHEET IS REQUIRED WITH RESUBMITTAL OR PLANS WILL BE RETURNED AS INCOMPLETE.
Landscape construction plans with plan check number may be emailed to:
landscapeplancheck@ontarioca.gov

Preliminary Plan Corrections:

Civil/ Site Plans

1. The project shall be designed with recycled water for HOA-maintained property (parks, parkways, neighborhood edges, common areas). Potable water with a backflow shall only be used on single-family detached properties, even if HOA maintained.
2. Add Note to Grading and Landscape Plans: Landscape areas where compaction has occurred due to grading activities and where trees or stormwater infiltration areas are located shall be loosened by soil fracturing. For trees, a 12'x12'x18" deep area; for stormwater infiltration, the entire area shall be loosened. Add the following information on the plans: The backhoe method of soil fracturing shall be used to break up compaction. A 4" layer of Compost is spread over the soil surface before fracturing is begun. The backhoe shall dig into the soil lifting and then drop the soil immediately back into the hole. The bucket then moves to the adjacent soil and repeats. The Compost falls into the spaces between the soil chunks created. Fracturing shall leave the soil surface quite rough with large soil clods. These must be broken by additional tilling. Tilling in more Compost to the surface after fracturing per the soil report will help create an A horizon soil. Imported or reused Topsoil can be added on top of the fractured soil as needed for grading. The Landscape Architect shall be present during this process and provide certification of the soil fracturing. For additional reference, see Urban Tree Foundation – Planting Soil Specifications.
3. Note for compaction to be no greater than 85% in landscape areas. All finished grades at 1 ½" below finished surfaces. Slopes to be maximum 3:1.
4. Relocate utilities to minimum clearances to allow parkway trees. Coordinate utilities to allow parkway trees spaced 30' apart. Show and note a 10' total space, 5' clearance on each side of the tree from any utility or hardscape, including water, sewer, drain lines, and driveways, and 10' clear from street lights.
5. Locate utilities, including light standards, fire hydrants, water, drain, and sewer lines to not

conflict with required tree locations—coordinate civil plans with landscape plans.

6. Adjust utilities to locate water lines out of island planters; tee off at a 90 from backflow devices and move the line into the street. This allows for space for a tree behind the device.
7. Show and dimension backflow devices set back a minimum 3' from paving on all sides. Locate on level grade.
8. Show and dimension transformers set back 5' from paving (driveways, streets, vehicular drives) on all sides to avoid bollards and provide a minimum 3' setback in all other areas. Coordinate with landscape plans.
9. Before permit issuance, stormwater infiltration devices located in landscape areas shall be reviewed and plans approved by the Landscape Planning Division. Any stormwater devices in parkway areas shall not displace street trees.
10. Note on plan: Finished grade shall be no more than 8" from the stucco/plaster face of the wall.
11. Dimension, show and call out for step-outs at parking spaces adjacent to planters; a 12" total wide monolithic concrete curb, DG paving or pavers with edging.
12. Note on plans: The entire project landscaping will be HOA-maintained.

Landscape Plans

13. During plan check, coordinate with Ontario Municipal Utilities Company (OMUC) to submit irrigation plans for recycled water systems to omucwaterquality@ontarioca.gov. OMUC shall review and approve irrigation systems utilizing recycled water before final landscape approval. Submit an electronic approval letter or memo from OMUC with the resubmittal of the landscape package.
14. At plan check, provide an overall exhibit showing water meter locations, including POC and controllers.
15. During plan check, submit an overall tree exhibit showing HOA parkways and common area trees to avoid conflicts.
16. During plan check, provide details for all amenities; furniture, play equipment, benches, and exercise equipment. Amenities and equipment shall be high-quality products and materials.
17. Callout and provide decorative paving in motor courts.
18. Locate light standards, fire hydrants, water, and sewer lines to not conflict with required tree locations. Coordinate civil plans with landscape plans.
19. Show all utilities on the landscape plans. Coordinate so utilities are clear of tree locations.
20. Additional trees are required for shading or open spaces and parking areas.
21. All single-family and multi-family residential private patio areas shall have landscape and irrigation; include a hose bib, anti-siphon valve, and area of landscape within the private patios.
22. Note: Overhead spray systems shall be designed for plant material less than the height of the spray head.
23. Show minimum on-site tree sizes per the Landscape Development standards; see the Landscape Planning website. 5% 48" box, 10% 36 box, 30% 24" box, 55% 15 gallon.
24. Show 25% of trees as California native (Platanus racemosa, Quercus agrifolia, Quercus wislizenii, Quercus douglasii, Cercis occidentalis, etc.) in appropriate locations.
25. Landscape construction plans shall meet the requirements of the Landscape Development Guidelines. See http://www.ontarioca.gov/landscape-planning/standards
26. Provide phasing map for multi-phase projects.
27. After a project's entitlement approval, the applicant shall pay all applicable fees for landscape plan check and inspections at a rate established by resolution of the City Council. Landscape construction plans with building permit number for plan check may be emailed to: landscapeplancheck@ontarioca.gov

AIRPORT LAND USE COMPATIBILITY PLANNING
CONSISTENCY DETERMINATION REPORT

ONTARIO AIRPORT PLANNING

The project is impacted by the following ONT ALUCP Compatibility Zones:

Safety	Noise Impact	Airspace Protection	Overflight Notification
☐ Zone 1	☐ 75+ dB CNEL	☐ High Terrain Zone	☐ Avigation Easement Dedication
☐ Zone 1A	☐ 70 - 75 dB CNEL	☑ FAA Notification Surfaces	☐ Recorded Overflight Notification
☐ Zone 2	☐ 65 - 70 dB CNEL	☐ Airspace Obstruction Surfaces	☑ Real Estate Transaction Disclosure
☐ Zone 3	☐ 60 - 65 dB CNEL	☐ Airspace Avigation Easement Area	
☐ Zone 4		Allowable Height: 200 ft +	
☐ Zone 5			

The project is impacted by the following Chino ALUCP Safety Zones:

☐ Zone 1 ☐ Zone 2 ☐ Zone 3 ☐ Zone 4 ☐ Zone 5 ☐ Zone 6

Allowable Height: _____

CONSISTENCY DETERMINATION

This proposed Project is: ☐ Exempt from the ALUCP ☐ Consistent ● Consistent with Conditions ☐ Inconsistent

The proposed project is located within the Airport Influence Area of Ontario International Airport (ONT) and was evaluated and found to be consistent with the policies and criteria of the Airport Land Use Compatibility Plan (ALUCP) for ONT.

Real Estate Transaction Disclosure required.

Airport Planner Signature: Lorena Mejia

PROJECT CONDITIONS

The proposed project is located within the Airport Influence Area of Ontario International Airport (ONT) and was evaluated and found to be consistent with the Airport Land Use Compatibility Plan (ALUCP) for ONT. The applicant is required to meet the Real Estate Transaction Disclosure in accordance with California Codes (Business and Professions Code Section 11010-11024). New residential subdivisions within an Airport Influence Area are required to file an application for a Public Report consisting of a Notice of Intention (NOI) and a completed questionnaire with the Department of Real Estate and include the following language within the NOI:

NOTICE OF AIRPORT IN VICINITY
This property is presently located in the vicinity of an airport, within what is known as an airport influence area. For that reason, the property may be subject to some of the annoyances or inconveniences associated with proximity to airport operations (for example: noise, vibration, or odors). Individual sensitivities to those annoyances can vary from person to person. You may wish to consider what airport annoyances, if any, are associated with the property before you complete your purchase and determine whether they are acceptable to you.
